What I seek to do is to continue that moratorium in place; since last year, it was attached to appropriations legislation rather than authorization legislation; and since that will expire at the end of this year, I offer this amendment.

We have in place, as every Member of the Senate knows, a limited test ban, the outer space treaty, SALT I and II, the ABM, each of which and indeed the security of the United States, depends on our ability to be able to verify.

I constantly hear the Senator from Arizona—whom I respect enormously on this subject—and others say: "I want to guarantee that we have the ability to verify."

Mr. President, the critical component of the American ability to be able to verify is our satellites. But because of the march of technology, because of the changes that take place technologically, verification becomes harder and harder with each move we make to develop new weapons systems.

For example, we all know, the cruise missile system which we are developing now on submarines as well as in aircraft is extremely difficult to be able to verify. As we begin to improve technology, we make verification harder.

Our satellites remain, however, the single most important component of our military capability to verify Soviet activities.

Development of antisatellite systems fundamentally erode the assumption that our satellites—our early warning eyes and ears—have a sanctuary in space. The existence of weapons capable of destroying our satellites would erode our key functions of intelligence, warning, attack assessment, command and control, damage reporting and prehostilities crisis management.

So it is really the United States that has a lot to lose if effective antisatellite weapons are developed and deployed by the Soviet Union in an all-out competition on these technologies.

We rely on our satellites for vital information to our national defense, from command and control of our military to early warning of nuclear attack.

Our military forces are far-flung. Not only do we have bases around the world, but the preponderance of our nuclear weapons is located beyond our shores. When our satellites are made vulnerable, we risk decapitation of our nuclear and conventional forces. We place at risk this ability of the United States to maintain a credible response to sneak attack.

Loss of our satellites is such a serious long-term strategic problem that the long-term disadvantage we would face from the further development of Asat technologies profoundly outweighs any short-term theoretical advantage we might possibly claim from going ahead with the testing of our current Asat.

If we are to continue to test the F-15 plane with the miniature homing vehicle that constitutes our Asat against objects in space, the current moratorium by the Soviets inevitably will give way. The Soviet Union inevitably has to push forward in order to catch up, because the Soviet Union does not have a homing vehicle capacity. No one who deals with this issue will assert that they have ever tested or have any kind of operational homing capacity. The Soviet Union, if we develop our homing capacity further, will have to develop their technologies; and the result 5 to 10 years from now will be a higher threat to our satellites and to our space-based assets, such as our space shuttle, when it flies again, or future space stations.

It is far easier to protect our satellites against the current Soviet threat than it would be against subsequent generations of Soviet Asat's. The later we take action, the more systems will be deployed, the more complicated the technology will become and the more difficult compliance with any treaty will be to verify.

I ask my colleagues who have voted in an effort to try to stop the Asat to take note that the Office of Technology Assessment, in its report on Asat's and arms control, pointed out that the United States is more dependent on satellites to perform important military functions than is the Soviet Union. If we are more dependent on our satellites, it would seem incontravertible that a halt in Asat development benefits the United States.

Proponents of continuing to build antisatellite weapons have argued three essential things: No. 1, that antisatellite development is essential to destroy Soviet satellites that locate and target U.S. military forces; No. 2, that it is important to counter the Soviets' operational Asat system; and No. 3, it is important for leverage in the arms control talks.

I would like to examine each of these very quickly. Let me say at this time that our satellite system, as currently designed, cannot accomplish any of these goals.

First, apart from any arms control considerations, the fact is that the U.S. system does not today work effectively and is not projected to be able to work effectively. Our systems' limitations are made very clear by the unclassified sections of a recent GAO report, with which I know the distinguished chairman of the committee is familiar.

In June 1986, this year, the GAO issued a classified and unclassified section of a report which I commend to my colleagues. The classified section, which I cannot discuss here, lays out more than clearly how our system does not work and why it does not work. But let me refer, if I can, without revealing any classified sections, to the unclassified section:

During future consideration of DOD's budget requests for the Asat program, the Congress should consider the information in this report on the system's limited projected operational capability, as well as its schedule delays, increased costs, and limited test program.

The GAO has explicitly invited us to consider the Asat's limited capabilities under the best of circumstances; its schedule delays, which have existed apart from congressional restrictions; its increased costs, which are there for anyone to read in the report; and an inadequate testing regime, which I believe cannot be solved because of the very serious problem of Asat tests creating orbital debris threatening all satellites—our and the Soviets' alike.

Mr. President, I will go into this a little later in my discussion. But, in-

creasingly, there is evidence of how each explosion in space is creating more debris. I point out to my colleagues that papers have been published citing scientific evidence that this debris, created by our Asat testing, may already be threatening our satellites. I will go into that later.

Again, let me draw from the GAO unclassified section:

• • • technical problems in developing the system hardware have caused test delays, production stretch-outs and increased costs. • • • The program has encountered technical difficulties throughout the past 8 years, mostly with the miniature vehicle.

□ 1220

The truth is, Mr. President, that the U.S. Asat provides us with relatively little military benefit, even as it endangers arms control for the reasons I have already stated.

As to the second claim that the U.S. Asat is needed to counter the Soviet Asat, let me discuss for a minute the capabilities of the Soviet Asat, because we know that it just is not true that the Soviet Asat represents a significant threat to the United States at the current moment.

Again, without touching any unclassified material, we know that the Soviet Union has not tested its own satellite in more than 3 years.

We know from numerous nonclassified published reports and testimony that in total, in the whole history of the Asat of the Soviet Union, it has only been tested 20 times. We know that it has failed to intercept its target 11 times, for an overall success rate of just 45 percent.

We also know, Mr. President, most importantly, that in the recent years of the test when they have tried to transcend to the improved, infrared homing method for their Asat, they have been totally unsuccessful in being able to do so.

Their weapons system was introduced in 1968. We know that it is lifted into orbit on top of a modified SS-9 booster rocket, a large liquid fueled rocket. It weighs more than 2,000 kilograms and is 6 meters long.

We know in each test it has always been launched from within available site of Tyuratum and one other site and can only be launched into a narrow declination between 62 and 65 degrees of inclination which means it must only be targeted against one of our satellites when that satellite is specifically within that declination and because of its altitude limitations it can only hit a satellite when that satellite is at the lowest point of orbit. Therefore, it does not threaten the most critical satellites that we have for verification, for command and control, and for communications.

We know that it takes the Soviet satellite one to two trips around the globe before it can link up with a target and then explode beside the target, and we know that it is at least 6 hours before the Soviet Union could ever fire and remount its missile and shoot again.

So we know, Mr. President, that there are serious limitations to the Soviet system because within 6 hours we would have adequate time for countless responses. We would know when they were bringing the rocket out onto the pad. We would know before they fired it and certainly have time to respond before the next 6 hours have evolved. It would take them literally weeks to literally threaten our satellites at this time, and even then only low altitude satellites. Indeed, even the interception itself takes 3 hours or more and is something that we could track.

So there are basic conceptual flaws in the Soviet program.

Finally, it is very difficult to fire a massive liquid fueled rocket in rapid succession, we know that, and to pretend that somehow that the Soviet system is a significant threat to us is a mistake.

So that is the state of the current Soviet capability.

We have designed a system that has very limited capability ourselves as the GAO report demonstrates, but the problem is our system goes on to an F-15 fighter and all you have to do if you are in the Soviet Union is sit there and say to yourself, "Now wait a minute, the United States is firing a homing vehicle off an aircraft it sends up to 40,000 feet and fires; if they have been successful on one aircraft or two aircraft or one or two or three tests, that means that every single F-15 they have in their arsenal is a potential homing vehicle, potential antisatellite weapon" and the Soviets have to take that into consideration.

It is clear, Mr. President, also on the final argument about leverage and bargaining chips that if you take a bargaining chip too far down the road, if you do not play your chip at some point there is a point where you cannot play it at all. If we give the Soviets the belief or perception that we have developed a system and we have some adequate level of confidence we can deploy this system, that it is operational, then it is a chip that you cannot play anymore. And we are on the brink of doing that at a time when the Soviet Union has offered us an opportunity to have a moratorium and to continue it.

Now, why is the status quo in the interest of the United States? First, as the OTA, the Office of Technology Assessment, has stated the development of antisatellite weapons poses a more significant threat to the United States than to the Soviet Union because of our greater military reliance on our satellites.

Further testing by the United States, therefore, jeopardizes us.

It was precisely for this reason that Congress prior to the current moratorium insisted that no such tests should take place if it were to gravely impair the prospects for negotiations for satellite weapons.

Our satellites are not in danger today, Mr. President, but our own Asat tests could make them in danger tomorrow. Let me come back to this question of hazard and collisions in space. In the past few years antisatellite tests have been a major contribution to that growing hazard of collision in space. Each Asat test that we perform in which the interceptor explodes or it collides with a target and then explodes produces about 100 large fragments of orbiting debris.

The single U.S. Asat test last September was responsible for a 63-percent increase in radar tracking objects in orbit during the last 6 months of 1985.

As Dr. George Flynn, professor of physics at New York University, in Plattsburgh, NY has pointed out, this orbiting debris can become a serious problem for U.S. satellites.

It is easy to understand how that happens when the amount of debris increases.

NASA studies published in 1978 indicate that the proposed U.S. space station would require more shielding from manmade debris hazard than from the natural hazard of collision with meteors.

One major problem with this orbiting debris is its long life. Of the 98 radar-trackable fragments produced by the first Soviet Asat test almost 18 years ago, 61 fragments were still in orbit and trackable as of March 31, 1986.

The U.S. Asat test last September put 199 new trackable objects in orbit. Together, the U.S. and Soviet Asat tests are responsible for 915 Asat fragments that are still in orbit, about a 5.5-percent increase of the total objects in orbit since the beginning of the space age.

When there are only a few fragments in orbit, Mr. President, obviously the chances of collision are small, but as we increase the number of objects in space, we increase collision frequency and then the opportunity for catastrophic collision begins.

Carried to the extreme, I think that process can endanger every nation's satellites, in war and peacetime alike.

Mr. President, such a collision may have recently destroyed at least one U.S. satellite, the NOAA-8 polar orbiting satellite lost in early January of this year. The New York Times description of the loss of this satellite and the simultaneous appearance of multiple fragments surrounding the satellite which we were tracking is precisely the kind of consequence that scientists have said results from colli-

sion and from space debris, although that satellites loss may also have been caused by an internal explosion.

Scientists have suggested that the Cosmos 954 and the Cosmos 1275 satellites were destroyed by collisions in space, and a number of other satellites, including the space shuttle, have been hit and damaged by smaller orbiting debris.

So if we really need to rely on our satellites, if our satellites really are important to our national security, as I believe and as I think we all believe, the last thing we should be doing is creating a substantial risk of destroying them by space debris from increased antisatellite weapons testing.

Mr. President, I will close with this comment: If we are concerned about protecting ourselves from the military missions of Soviet satellites, we have other approaches than testing and deploying a U.S. Asat. United States and Soviet satellites use UHF, and sometimes SHF and EHF, frequencies. As MIT professor Ashton Carter has stated, to stop an enemy satellite from tracking U.S. ships or engaging in other hostile activity during war, these satellites are susceptible to uplink jamming in varying degrees and may be blinded through ground-based directed-energy weapons or high-power radio frequency transmissions.

As an alternative, we could continue the process of improving the survivability featuring on U.S. satellites. As Dr. Carter has explained, the unclassified Navstar Global Positioning System displays the kind of features, available at reasonable cost, that can make attack much more difficult, time consuming and conspicuous.

In the meantime, we could begin to negotiate seriously with the Soviets about antisatellite weapons treaty to supplement the ABM Treaty and the Outer Space Treaty we have already negotiated. Possibly this new treaty could ban all tests of Asat's against objects in space. Possibly it could be limited to the development of Asat's capable of attacking higher Earth orbits because of verification problems of stopping lower Earth orbit Asat's.

In either case, continuation of the mutual moratorium will offer negotiators on both sides the breathing room to see if an Asat treaty is obtainable in Geneva. As an alternative, the moratorium constitutes a form of arms control through parallel conduct and mutual restraint. We have seen too little of that in the 40 years since the dawn of the nuclear era, and it seems to me this Congress ought to be encouraged by the success we have had in restraining Asat competition over the past few years.

Mr. President, passage of this amendment will maintain the status quo on Asat's, and thus offers the best way to protect American satellites. It is clear from past evidence that the administration has not yet seen anything in the Soviet offers which they believe opens up those discussions. This is regrettable.

I believe the Senator from Virginia—and he is a member of the Senate arms control observer group—and others would agree with me when I say there has not been any discussion. There is nothing currently absolutely on the table regarding this. All we are doing is holding out hope. I think Congress could assist in that process by continuing the status quo.

Once again, I reiterate, this is not new. This does not change the current situation. It does not alter the law. It does not alter the current bargaining position, because currently our bargaining position is bargaining from the position of a moratorium.

The issue is, will the Senate express its will that we should continue to bargain from that position, that it is important for us not to put our own satellites at risk, that our own national security is more dependent on maintaining a sanctuary in space? And I hope we will so vote.

Mr. WARNER. Will the Senator yield for a question?

Mr. KERRY. Mr. President, I reserve what additional time I have.

I ask unanimous consent to add Senator HARKIN and Senator HEINZ as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Will the Senator yield for a question? We have had this debate together for many years, and each time the Senator from Massachusetts is well prepared and has strong convictions on the subject.

But, as I listened today, it seemed to me that he had a rather important omission as he analyzed the respective positions between the United States and the Soviet Union in this capacity of satellite interception.

I know the Senator follows with care the advancement of the Soviet Union in their high energy lasers, ground based, and also that their ABM system has certain capabilities that we have reason to believe poses a potential threat to our satellites. I ask the Senator to address both of those issues before he concludes his remarks.

Mr. KERRY. Mr. President, I would be delighted to do so. If I am going to do that, I would like to ask that I can do it on your time rather than on mine.

Mr. WARNER. Bear in mind that we purposely only took one-third of the time of the Senator from Massachusetts. Why do we not equally divide the time and you can make a brief response? I am willing to equally divide the time for the Senator's response to my question.

Mr. KERRY. Will the distinguished Senator from Virginia repeat his question? He is concerned about the laser capacity of the Soviet Union?

Mr. WARNER. The Senator laid out the relative balance between the Soviet capabilities and U.S. capabilities, but the Senator from Massachusetts omitted any reference to the well-established fact that the Soviets are ahead of the United States in ground-based lasers, which lasers have the potential ability to intercept some of our satellites. And, likewise, the Soviet ABM system has a capability of intercepting our satellites.

Mr. KERRY. The distinguished Senator is correct. The Soviet Union has been doing research, is doing research, and, by some people's judgments, may be ahead of us with respect to ground-based laser capability. I think it is seriously at issue to what degree they may be ahead. The information is extremely hard to quantify.

Certainly, if we are going to be sensible with respect to our approach to defense regarding the national security interest of this country, we should make an assumption that they are ahead and react accordingly.

However, nothing in this amendment, nothing that I seek to do will limit our ability to adjust to any ground-based laser because, as you know, the Senate just voted a day or so ago to continue research into our laser ability, ground-based and otherwise. Under the SDI Program, that research will continue. But there is no evidence to date whatsoever that the Soviet Union has tested against an object in space.

Under the strictures of my amendment, if the Soviet Union were to move to so test, all the President has to do is certify to us. We do not have a right of approval or disapproval. He merely certifies to us that the Soviet Union is so doing and we may do the same thing. There is nothing in this amendment that limits the ability of the United States to defend itself. This amendment merely seeks to maintain a status quo bargaining position and that we do not proceed to upset the equilibrium.

Finally, this is only applicable as to antisatellite objects in space testing. It is not applicable as to current antisatellite derivatives that may come out of the SDI Program down the road.

Mr. WARNER. Mr. President, one observation. I think the Senator from Massachusetts would concur that we really possess little, if any, ability to verify what they are doing with those high energy lasers by way of testing.

Mr. KERRY. I do not agree with that. If they are testing against an object in space, as I have shown by virtue of our ability to track every single explosion, how do we know there are 199 trackable objects, how do we know about the Cosmos 954, how do we know about the Cosmos

1125? Because we do have the ability to track every single explosion in space and the consequences thereof.

If any laser were to explode against an object in space, we would know it instantaneously and we would respond, I am sure, in a bipartisan and responsible fashion.

Mr. WARNER. Mr. President, in view of the shortness of time, I shall only make one observation. My good friend from Massachusetts knows that there are many ways to incapacitate a satellite other than by explosion. These lasers could well take out various elements of a satellite and there would be no explosion that could be detected.

Mr. KERRY. Let us not confuse this particular amendment with that particular potentiality. That would be a mistake. This amendment only deals with a kinetic kill, with an explosion by virtue of our pursuit of the homing vehicle science or their continued pursuit of the co-orbiting or homing vehicle science. So it locks us into a mutuality and to a very narrow set of restrictions.

Mr. WARNER. Mr. President, I say to my good friend, a kill is a kill. If you knock out the eyes and ears of a satellite, it is just as dead and ineffective as it is if it is exploded.

Mr. President, I think we better conclude on this and allow other Members to speak.

Mr. KERRY. Mr. President, I just want to take 30 seconds, before I yield to the distinguished Senator from Colorado, to say, indeed, a kill is a kill. But let us not confuse apples with oranges. This amendment only seeks to restrict one kind of method of killing, not another. And it would be irresponsible for us to upset the equilibrium in that particular methodology of killing if we have to get into that kind of distinction.

Mr. GOLDWATER. Mr. President, will the Senator from Massachusetts yield for a unanimous-consent request?

Mr. KERRY. I yield for that purpose.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that, following the disposition of the Kerry amendment, the pending amendment be temporarily laid aside for the consideration of the Kennedy amendment relating to labor provisions and, following the disposition of the Kennedy amendment, for the consideration of the Stevens amendment relating to the alternative defense personnel system.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. Reserving the right to object. I do not think the minority leader has had a chance to look at either one of these. I would ask the Senator from Arizona to withhold that just briefly and let us take a look at it in a little more detail.

The PRESIDING OFFICER. The Senator from Massachusetts has the floor.

Mr. KERRY. Mr. President, I yield 3 minutes to the distinguished Senator from Colorado.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. HART. Mr. President, I wish to commend the Senator from Massachusetts for raising this issue once again, as he has before, and I strongly join with him in urging the Senate to adopt the measure which he proposes.

Mr. President, time and time again the American people have demonstrated a fundamental understanding of the nuclear arms race, and that is that there is only one way out of it; and that is through negotiations that are verifiable. Overwhelmingly the American people know we cannot win a nuclear arms race, that there is no victory or no achievable goal at the end of unlimited buildup. The American people led by national leaders of both political parties for the past 20 or 30 years have come to a common understanding and a majority consensus that says we must negotiate limits on the numbers and kinds of nuclear weapons on both sides.

□ 1240

Yet, Mr. President, time and time again as I have traveled the country and in my own State of Colorado I run into Americans who are hesitant about negotiations and they say "I am not sure we can trust the Russians." Mr. President, we cannot trust the Russians. That is why we are negotiating with them or should be. We trust the British. We do not have arms control agreements with the British or indeed any of the other Western allies. It is because we do not trust the Russians that we seek to arrive at negotiated limits on nuclear weapons, and have for the past 20 years, more or less—unfortunately less in the last few years.

This still leads the average American to the question of well, if we do negotiate an agreement, how do we go about knowing whether or not the Russians are living up to it? That is what brings us to the subject here today. That is overhead reconnaissance.

One of the reasons most Americans are not sure about our ability to monitor the provisions of an agreement is because much of this arcane, highly technological and sophisticated world has been kept secret as probably it must be. Yet, once the American people are assured by their political, military, and intelligence leaders that, yes; we do in fact have the technological capability to watch what the Soviets are doing, to observe their behavior and their testing and production patterns, and to have——

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. HART. I ask for 1 additional minute.

Mr. KERRY. I yield 1 additional minute.

Mr. HART. The ability to monitor the terms of an agreement, that our intelligence and military leadership agrees with that capability that we do in fact possess it to a rather high degree of certainty, then the American people can in fact trust that negotiated process and trust the agreements that are brought back for ratification.

Mr. President, we should not be in the business of putting out the eyes of our opponents and weakening their ability to monitor our compliance with agreements nor should they be in the business either.

The only out way of this dilemma, Mr. President, is to have rules of the road for providing for the kind of observance on both sides that does in fact permit negotiated agreements that have been the mainstay of our foreign policy and arms control for the past two or three decades.

Mr. President, we should not be in the business of developing the capability of limiting the Soviets' ability to monitor our compliance nor should they be in the business of limiting our ability to monitor their compliance.

I strongly urge the support of the Senate on the measure put forward by the Senator from Massachusetts.

Mr. KERRY. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The Senator from Massachusetts has 7 minutes remaining.

Mr. KERRY. Mr. President, I reserve the balance of my time.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I will just take about 2 minutes.

Mr. President, I rise in opposition to the proposed moratorium on testing of antisatellite weapons known as Asat. The Senate has consistently supported a limited test program. In fact last year's conference report on the Department of Defense authorization bill endorsed a limited test program for Asat.

The only possible operational Asat system in the world is in the hands of the Soviet Union. Critics of a United States capability make issue that the Soviets have not tested their system for several years. Unfortunately, our intelligence is not good enough to assure us whether or not the Soviet system requires further testing to ensure operational reliability.

Additionally, Soviet high energy lasers and antiballistic missile interceptors are assessed to have an Asat

capability. This may enable them to cripple or destroy vital U.S. satellites.

A moratorium on U.S. testing would be just one more unilateral arms control concession on the part of the United States mandated by the Congress. Because of Soviet Asat capabilities in other systems, we have little or no ability to verify a moratorium on the part of the Soviet Union.

Mr. President, I feel that this amendment represents an unwise concession to the Soviets and I urge its defeat.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I yield such time as the distinguished Senator from California may require.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Thank you, Mr. President.

I thank the distinguished manager.

Mr. President, the junior Senator from Massachusetts is certainly correct when he says that the ill-advised amendment that he has brought before us is not a new question. Indeed, it is not. This body has repeatedly rejected it not quite as many times as the Soviets have successfully tested their kinetic interceptor. But it is certainly not a new question. Indeed, it goes back quite a ways. It goes back certainly to the time of his predecessor, and concentrating on the specific focus of his amendment which is prohibition of testing of an antisatellite weapons against an object in space.

I think that we need to understand that the senior Senator from South Carolina is absolutely right when, as he did a moment ago, characterizes this amendment as an unnegotiated unilateral arms control concession mandated by the Congress.

The reason that such a moratorium currently exists is not because the Senate of the United States has ever voted for it except that they yielded to its being contained in a conference report after defeating it several times, as recently as last year and in prior sessions.

What we are talking about is trying to provide the United States with an adequate counter so that we are not vulnerable to the Asat capability of the Soviet Union. Those critical eyes and ears that have been referred to are indeed critical. There is an existing Soviet capability to do great damage to low-altitude satellites upon which we depend for critical intelligence information.

When I said this is not a new question, I had in mind going back in the CONGRESSIONAL RECORD to a debate in which the predecessor to the junior Senator from Massachusetts, the distinguished Paul Tsongas, was engaged in a similar question, a similar debate. Senator Tsongas is well remembered on this floor as a man of courage, a man with both physical courage as well as the moral courage of his convictions, and a man capable of objectivity of the kind that real intellectual integrity permits.

In an exchange which he and I had on the subject of the advisability of continued testing of precisely the kind of kinetic kill system that is under debate this morning, Senator Tsongas pressed upon this body the advisability of engaging in negotiations with the Soviets to limit harm to both sides. He wanted there to be negotiations.

Mr. President, that is not the issue that is before us. What the Senator from Massachusetts is proposing this morning is that there be no testing by the United States unless there is certification to the Congress by the President of the fact that the Soviet Union has conducted after the date of enactment of this act a test against an object in space of a dedicated antisatellite weapon.

There is no need for the Soviets to engage in further testing, Mr. President. As the junior Senator from Massachusetts has conceded, they have already conducted 20. They have already conducted a sufficient number of successful tests that they need to conduct no more. They have a capability. They have a capability which can do great damage to those high value assets possessed by the United States, and that was conceded on page S 6956 of the CONGRESSIONAL RECORD on June 12, of 1984, by the Senator's distinguished predecessor, the Honorable Paul Tsongas.

□ 1250

Mr. KERRY. Will the distinguished Senator yield for a question?

Mr. WILSON. I will be pleased to yield without losing my right to the floor.

Mr. KERRY. Is the Senator aware that the system of the Soviet Union can only be fired from one location? Is the Senator aware of that?

Mr. WILSON. That has not been clearly established.

Mr. KERRY. I believe if the Senator reads the reports, he would know that it has only been fired from one location.

Mr. WILSON. It has only been fired from one location, that is correct.

Mr. KERRY. Is the Senator aware that it has been fired with a liquid booster rocket?

Mr. WILSON. Yes; what is the point?

Mr. KERRY. My point is that that is the only rocket being used in the shot. It takes 6 hours to replace it on the launch pad, and there are only two launching sites on that pad. The only thing it would do would be to take out two satellites before the United States had time to respond.

Mr. WILSON. To answer the Senator's question, I believe he is making happy assumptions about a limitation on the Soviet capability that neither he nor anyone else can certify to.

Mr. KERRY. I beg your pardon. I will direct the Senator——

Mr. WILSON. I will complete my remarks and then hear the Senator on his side. Since we only have 20 minutes on this side, I will not yield further. I will answer the question.

He is making assumptions that we have no evidence to prove.

What I was saying is that I commend to the junior Senator from Massachusetts the wisdom of his predecessor who when faced with this same debate and who, as to the ultimate simple question as to whether or not the United States should engage in testing its Asat capability in order that we might have some demonstrated capability, which we have not done and which we do not possess, the Senator from Massachusetts, at that time said:

> The Senator from California says we have to test the F-15. I do not argue that point. All I say is that as you go about that testing,

the second crack at negotiation is at least as important.

He did not, Mr. President, I will advise us, as has the junior Senator from Massachusetts this morning as in previous efforts when he was defeated in the Senate, never gaining more than 35 votes on this point, state that we should engage in a unilateral concession. That is what this amounts to.

The point is we have done some very limited testing but we have not tested the critical homing device without which we have no certainty that our technology is, in fact, capable of the kinetic kill.

Mr. President, the point is very simple: They have tested a weapon. They have a capability. We have not tested. We do not have a demonstrated capability. Even in terms of the climate for arms control, I fail to see our forbearance about giving away what we might otherwise negotiate which improves our bargaining position. We have little time for this debate.

I thank the distinguished manager for yielding.

Mr. WARNER. I thank the distinguished Senator from California.

May I advise all Senators that at the conclusion of the time on both sides it will be the intention of this Senator to move to table.

It is my hope that Senators in preparing themselves for this vote will take the opportunity to look at pages 170–171 of the report on each Senator's desk and in their office.

Also, bear in mind that a great deal of the information which bears on this issue is highly classified. I am hopeful

that all Senators will so inform themselves about that body of fact prior to their voting today.

Mr. President, I now yield such time as may be required to the Senator from Indiana.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, I rise in opposition to this amendment and also to reiterate what has already been stated by other Senators, that basically this is a unilateral Asat ban congressionally mandated and imposed by the Congress. It has already been stated many times that the Soviets have tested their coorbital Asat well over 20 times and the United States less than 5. The Soviets certainly have an operational Asat capability. The United States is far, far behind.

We also know full well, Mr. President, that we simply cannot verify any ban on antisatellite testing. We can verify a conventional Asat's use, when it is used and there is an explosion, but verification of testing is simply, at this juncture, almost an impossibility.

Anything can be an Asat. You can put another satellite up very close to another satellite and just bump it and be able to put it out of existence or render it inoperable. That is the easy way to have an Asat. There is no way to verify what satellite might be an Asat.

Furthermore, Mr. President, we do not have any space-based surveillance capabilities right now. We do not have that and we would need to implement even reasonable space control agreements.

Also, we need the Asat capability for a number of reasons.

One, the United States needs to have command of space or at least be able to contend for such command. We have to be able to contend for space, just like we contend for control of the ground and control of the seas. We are an island nation.

We must protect interests and allies far from our borders and this means most of our communication and intelligence gathering has come to depend on satellites. We can neither allow the Soviets to have the free use of their satellites to target our ships or armies nor can we allow them to have a monopoly in being able to disable our satellites.

I also point out that having defensive capability for our satellites is a very important prerequisite for arms control for determining the rules of the road eventually for space.

If we are going to get into something like space defense zones, in which a side is going to be kept out, obviously these satellites are going to have to have a defensive capability to be able to defend themselves against an attack. Yet, an Asat ban, such as we would have if this amendment passed, would prohibit testing of defensive satellites as well as Asat's.

Therefore, I think this amendment if it were to be passed would cause us to have the worst of all worlds. We would have no defense for our satellites. By having no defense others obviously have greater incentives for attack. And we would have no meaningful verification.

I think by not going forward with an Asat capability, you really do damage to any kind of arms control that might take place to determine what the rules of the road might be in space.

In essence, Mr. President, by the adoption of this amendment we would create greater instability, greater uncertainty. I hope it is soundly rejected.

Mr. WARNER. I thank the distinguished Senator from Indiana.

At this time, I ask unanimous consent that a very significant body of communications directed to the Senate from the following individuals be incorporated in the RECORD:

The Secretary of Defense, the Secretary of the Air Force, the Chairman of the Joint Chiefs of Staff, the Commander in Chief of the U.S. Space Command, the U.S. Arms Control and Disarmament Agency, the Director's Communication, and the recently retired Chief of Staff of the Air Force, General Gabriel.

All of these communications urge the U.S. Senate in unequivocal, strong terms to reject this amendment.

I will cite one paragraph by the recently retired Chief of Staff of the Air Force which I think signifies the seriousness with which this matter is viewed by our Department of Defense.

The lack of a United States ASAT capability will allow the Soviets permanent and unlimited use of their space systems which permit real-time targeting of our military forces and continue to place those forces in grave risk.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE AIR FORCE,
OFFICE OF THE CHIEF OF STAFF,
U.S. AIR FORCE
*Washington DC, June 4, 1986.*

Hon. JOHN W. WARNER,
*Chairman, Subcommittee on Strategic and Theater Nuclear Forces, Committee on Armed Services, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: I am deeply concerned about the future of our current air-launched anti-satellite (ASAT) program and want to assure you of Air Force support for continued development of this vital capability.

The lack of a US ASAT capability will allow the Soviets permanent and unlimited use of their space systems which permit real-time targeting of our military forces and continue to place those forces at grave risk. Therefore, I believe it is imperative that we field an operational ASAT system as early as possible. As you are aware, the Soviets have had an operational antisatellite system for some time. Their capability places many of our vital satellites in jeopardy. Without a similar US ASAT capability, this situation is destabilizing as it does not provide the military option to respond in kind to a Soviet provocation in space.

The Air Force is firmly committed to the development and deployment of the current air-launched miniature vehicle ASAT capability. We have solved the complex technical problems involved in such a project. The flawless intercept of an old experimental satellite last September more than adequately proved our ability to handle the technical job. I likewise believe that cost and schedule are reasonable, realistic and achievable. However, in order to develop and deploy an operational ASAT system at the earliest possible date with the least cost, we need the help of the Congress. The current restrictions on testing have caused the Air Force to implement a less than optimum approach which, if continued, will result in further increased costs and schedule delays.

I reaffirm my hope that the Congress will recognize the critical importance of the ASAT system in our integrated military force structure and will work with us to provide the funding and support necessary to jointly accomplish a successful program in an effective manner.

Sincerely,

CHARLES A. GABRIEL.

---

OFFICE OF THE CHAIRMAN,
JOINT CHIEFS OF STAFF,
*Washington DC, June 5, 1986.*

Hon. BARRY GOLDWATER,
*Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: During the past months I have become deeply concerned about the uncertain future our antisatellite (ASAT) program faces in Congress. From my perspective, there are serious warfighting implications which place our forces at risk if Cognress continues the current moratorium on US ASAT testing, and consequently, prohibits ASAT development and deployment.

The existing asymmetry in USSR versus US ASAT capability allows the Soviets to hold many of our vital space assets in jeopardy without a comparable US capabilty to act as a check. Our need to protect our critical space assets from ASAT attack, coupled with our inability to repond-in-kind to such attacks, leaves us with few options for responding to this threat.

A more important implication of the lack of a US ASTA system is our inability to deny the Soviets the use of satellite systems that provide support to their operational forces worldwide. The most threatening of these satellite systems can provide targeting information in real-time to Soviet weapons platforms, thus enhancing significantly their ability to strike our forces. In fact, our very ability to project power to areas vital to our national security interests is threatened directly by these satellite systems—a threat we believe will grow more serious in the future.

In short, we have a clear military need for an ASAT capability to deny the enemy free access and use of space in crisis and war. Our operational requirements are based on demonstrated Soviet space capabilities and an assement of their warfighting potential. By conceding our ASAT capability to the Soviets through a moratorium, we also concede to them an unrestricted space sanctuary and wartime control of space.

Unilateral concession of space control to the Soviets makes no contribution to arms control or our policy of deterrence. In fact,

without an ASAT capbility our deterrence is being eroded. I ask for your continued support for a sustained ASAT program at this critical time. I trust that Congress will recognize the importance of an ASAT system to extend the credibility of warfighting capability across all theaters of conflict.

Sincerely,

WILLIAM J. CROWE, Jr.,
*Chairman, Joint Chiefs of Staff.*

---

U.S. SPACE COMMAND,
PETERSON AIR FORCE BASE,
*Colorado, June 5, 1986.*

Hon. BARRY GOLDWATER,
*Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: I am very concerned that current Congressional deliberations may jeopardize the future course of our Air-Launched Antisatellite (ASAT) program.

An ASAT capability is an essential, but as yet, unfulfilled element of our military force structure and deterrence posture. The continued lack of an ASAT capability leaves this nation with an inability to counter the clear and formidable threat posed by Soviet space systems to US and Allied forces.

The Soviets have demonstrated the ability to effectively use their space assets as an integral part of their military forces. We also depend on our space system for more effective operations. Unfortunately, our space systems are placed at risk by the operational Soviet ASAT while Soviet space systems go unchallenged. In the event of conflict, this imbalance in capability could mainfest itself in the form of lost US and Allied lives and hinder achievement of national objectives.

An operational ASAT system will help to deter attacks against our space systems by providing a response-in-kind capability. Such a system will enhance our overall deterrence posture by putting at risk the Soviet space systems that directly support their military forces.

The current Air-Launched ASAT program as restructured in January, prescribes a clear and achievable course toward building an operationally sound weapons system. The force structure provided by this program will allow us to place at risk a significant number of the most critical, near-term threat satellites and also provide the opportunity to make a carefully considered national decision about potential future ASAT systems.

I strongly solicit your support for the current Air-Launched ASAT program as it holds the most promise for providing this nation a near-term space defense capability.

Sincerely,

ROBERT T. HERRES,
*General, USAF Commander in Chief.*

---

U.S. ARMS CONTROL
AND DISARMAMENT AGENCY,
*Washington, DC, June 6, 1986.*

Hon. JOHN W. WARNER,
*U.S. Senate, Washington, DC.*

DEAR JOHN: I am writing to ask your support for the U.S. Anti-Satellite (ASAT) program and to ask you to oppose any reimposition in FY 87 of the FY 86 restriction on U.S. ASAT tests against objects in space.

The Soviet Union already has an existing ASAT capability which is unaffected by U.S. legislative restrictions:

The co-orbital dedicated ASAT is fully operational and has been for over 12 years. It was tested over a dozen times before it went operational; it no longer needs to be tested.

The Soviets can also use their nuclear-armed GALOSH ABM interceptors in an ASAT mode. They are now in the process of upgrading the GALOSH system deployed at Moscow.

We believe the Soviets' two ground-based test lasers at Sary Shagan could be the forerunner of an operational ground-based laser program within a few years, capable of performing ASAT functions.

Congressionally-imposed unilateral restrictions on the U.S. ASAT program are harmful to our deterrent posture. The Soviets may be more likely to inflict damage on U.S. satellites, particularly in a conventional conflict, if they know the U.S. has no corresponding ASAT capability.

Unilateral legislative restrictions on the U.S. ASAT program are also harmful to arms control, reducing the Soviet incentive to negotiate in Geneva. To date, in the Nuclear and Space Talks, the Soviets have proposed only what amounts to a "comprehensive" ASAT ban.

The United States has made clear that a comprehensive ASAT ban is not practical or verifiable. The Soviet co-orbital system is smaller than a Volkswagen; the Soviet booster used to launch their co-orbital system is the same booster used for many of their space missions other than ASAT. Because of its small, and therefore easily concealable size, we do not know how many Soviet interceptors have been manufactured and stored. We would not know whether existing systems had actually been destroyed or were still being produced secretly. Likewise, systems with inherent ASAT capability that exist purportedly for other reasons, such as the GALOSH ABM and the ground-based lasers, would remain. Thus, the Soviets could easily maintain a covert ASAT capability in the regime of a comprehensive ban on testing or deployment.

Thus, a "comprehensive" ban has little meaning, a fact clearly recognized by the Soviet side during the 1978-1979 ASAT negotiations. The verification problems of ASAT are particularly significant because the satellites that serve U.S. and Allied security are few in number. Therefore, cheating—even on a small scale—could pose a disportionate risk.

Effective verification is critical, particularly in light of Soviet non-compliance with past arms control agreements. Congress understands this, as witnessed by the statutory language itself that "the United States should endeavor in good faith to negotiate with the Soviet Union a mutual and verifiable agreement with the strictest possible limitations on anti-satellite weapons consistent with the national security interests of the United States."

The United States has, therefore, told the Soviet side in Geneva that while we have been unable to date to identify an ASAT agreement that would be verifiable and in U.S. interest, we are prepared to consider any Soviet proposals that meet these criteria. To date, the Soviets have not come up with any such proposals.

The United States has approached the Geneva Nuclear and Space Talks seriously. We have offered to the Soviets detailed proposals that attempt to meet stated Soviet concerns. We have consulted extensively with Congress on the negotiations since they opened in March 1985, I believe that Congress and the Executive Branch can and should continue to work together. But it is important to recognize that Congressionally-imposed unilateral U.S. restrictions such as the ASAT ban do not help the negotiations. Such restrictions unfairly hinder the U.S. negotiators and provide implicit leverage to the Soviet Union.

Sincerely,

KENNETH L. ADELMAN.

## VOTES ON CLOTURE MOTIONS POSTPONED UNTIL 5 P.M.

Mr. WARNER. Mr. President, I ask unanimous consent that notwithstanding the provisions of rule XXII, that the cloture votes for today on the Byrd amendment 2412 and the Dole amendment 2417 be postponed until 5 p.m. today, with the hope that an agreement will be reached for the Senate to consider both issues separately.

The PRESIDING OFFICER. Without objection, it is so ordered.

□ 1300

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KERRY. Mr. President, I ask unanimous consent that Senator BIDEN be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I rise as cosponsor of this amendment to continue the ban on Asat testing against targets in space. Allowing Asat testing to go forward would be a tragic mistake which would doom our last chance to prevent this new and destablizing turn down the path of an arms race in space.

It is not too late to serve our true security interests by negotiating a ban, or at least sharp limitations, on testing and deployment of antisatellite systems. But time is running out.

Obviously, negotiations would be required to determine whether agreement on mutually acceptable terms could be reached, and there would be thorny verification issues. But while the Soviet leaders have been signaling their readiness to negotiate, the Reagan administration has not. Nevertheless, along with the clear and present danger of a new arms race in this field, there is also a clear and present opportunity, if we choose to take it.

One aspect of this issue which has received almost no attention is the past record; yet it is instructive. How many in this body realize that:

The United States had an operational Asat system deployed over 20 years ago, long before the Soviet Union did;

The Soviet Union was led to pursue its Asat tests at least in part because of the American lead;

The United States first proposed—in 1977—then delayed—until 1978—and finally discontinued—in 1979—Asat negotiations with the Soviet Union.

The Soviet Asat test moratorium has now lasted more than 3 years. Despite claims to the contrary, the existing Soviet Asat weapon is not a significant threat to our vital military satellites.

However, if the Soviet Union resumes Asat testing, as is inevitable if the United States moves forward, it will develop far more advanced Asat weapons which will be a major threat to our most critical satellites. This would harm our national security and make nuclear war more likely.

In addition to the security benefits to be gained from a continued Asat test ban, there are other reasons to continue the test moratorium.

The MHV Asat has serious technical problems, as pointed out in a recently declassified GAO report.

Stated that report:

. . . Technical problems in developing the (ASAT) system hardware have caused test delays, production stretchouts and increased costs. . . . The program has encountered technical difficulties throughout the past eight years, mostly with the miniature vehicle.

The GAO report went on to include:

During future consideration of DoD's budget requests for the ASAT program, the Congress should consider the information in this report on the system's limited projected operational capability as well as its schedule delays, increased costs, and limited test program.

An objective analysis of the Asat Program in the context of overall U.S. national security interests makes clear that there is no justification for its continuation. This is particularly true in light of the criticisms of the program contained in the recent GAO report.

Mr. President, the Air Force, which is in charge of this program recently cut back the operational force from 112 to 64 missiles and from two operational bases to one. The Air Force knows that this program is a turkey. What, then, is to be lost by continuing the test moratorium? Nothing.

Mr. President, in 1970, in the midst of the SALT I negotiations, the United States had a chance to halt testing of MIRV's and incorporate a MIRV ban into that agreement. I remember a long and emotional debate within this body on the question of a MIRV test ban. Ultimately, MIRV testing went forward and we failed to to a ban on MIRV testing and deployment in the SALT I interim agreement. This failure led to massive MIRV deployments on each side that accelerated the nuclear arms race and destabilized the precarious nuclear balance of terror. Let's not make the same mistake again.

I believe that Senate adoption of this amendment will help persuade this administration to seek to prevent the further weaponization of space and to negotiate verifiable limits on United States and Soviet Asat testing and deployments—limits that would be very much in the national security interest of the United States.

I urge my colleagues to support this amendment.

Mr. SIMON. Mr. President, I am pleased to cosponsor this amendment which extends the Asat testing moratorium for as long as the Soviets refrain from testing against targets in space. I congratulate Senator KERRY for his leadership in this area, and I am pleased to see my other distinguished colleagues as cosponsors—there are 17 of us in all—who believe strongly that an Asat stimulus to the arms race is not in our interests.

I'm not talking only about how Asat's will increase instability because of the pressures it will create for a Soviet preemptive strike. I'm saying that an Asat moratorium is in our best interest because we will be worse off with an Asat race than the Soviets will. We will be worse off because we depend more on our satellites for military effectiveness than the Soviet Union does.

Our military communications, early warning, and reconnaissance satellites are essential for U.S. military action anywhere on Earth. They are also crucial for the enforcement of nuclear arms control agreements, without which our security would be greatly reduced.

Since this administration has so strongly emphasized the importance of verification in arms control, it is inconsistent for them to support a program that will make our best source of verification vulnerable to Soviet attack. I am also concerned about how an antisatellite weapon would affect our early warning satellites. These sensors orbit 22,300 miles above the equator and give us our only source of timely warning of Soviet missile launches. It is not an exaggeration to say that without them, we would not know if we were at peace or at war.

Much has been made of the Soviet Asat. But their weapon is primitive. It would only be able to hit just a few of our critical satellites in low Earth orbits. This poses no threat at all to the majority of our most crucial satellites I have just described.

What are the facts about the Soviet Asat? One fact is that the Soviet system failed in its last six tests and hasn't been tested at all since 1982. Leslie Dirks, former Director of the CIA's Office of Research and Technology, argued publicly in 1984 that the Soviet Asat "doesn't work. Anyone who has followed it closely would have to agree."

Gen. Lew Allen, former Air Force Chief of Staff, said back in 1979 that the Soviet Asat was not much of a threat. General Allen was referring to a Soviet Asat weapon that is virtually identical to the present Soviet Asat. We know this to be the case because the Soviets have not tested their Asat since 1982.

Does this sound like the kind of weapon that justifies launching an arms race that we can't win? I say we can't win because the Soviets simply don't rely on satellites as extensively as we do. Even if they did, it has clearly become an important Soviet goal to head off an Asat race, as evidenced by their unilateral moratorium since 1982.

Asat arms control needs to be given a chance. So far, we have ignored the opportunities at hand, and once again we are only hurting ourselves. The Soviets have tabled an Asat arms control agreement at the United Nations that, with some modifications, ought to be taken up and fully negotiated. During the intermim, we should maintain the current moratorium on Asat testing and work toward an agreement that bans any Asat weapons from being produced, tested, and deployed.

I hope we can all agree in this chamber on the importance of negotiating an agreement to protect our satellites. An Asat test moratorium is in our best interest, and I urge my colleagues to support this measure.

Mr. MATHIAS. Mr. President, I am very pleased to join with Senator KERRY, Senator CHAFEE, and Senator SIMON in offering this amendment to prohibit the testing of Asat weapons so long as the Soviet Union does not test. The ongoing moratorium on the testing of Asat weapons has strengthened, not diminished, our national security. To resume testing now would be to reopen a door of the arms race that has been successfully slammed shut.

I think most of us would agree that it would be better if we could negotiate limits on Asat testing, rather than have a congressionally imposed ban. But we have tried that approach without success. In the defense authorization bill passed 2 years ago, the Congress outlined several conditions that had to be met before the United States could test an Asat weapon against an object in space. One of the requirements was a Presidential certification that the United States is "endeavoring in good faith, to negotiate with the Soviet Union a mutual and verifiable agreement with the strictest possible limitations on antisatellite weapons consistent with the national security interests of the United States."

Also required was a Presidential certification that Asat testing is "necessary to avert a clear and irrevocable harm to the national security."

These conditions were not idly chosen. The first reflects a congressional determination that it is in the national security interest of the United States to reach an agreement with the Soviet Union to limit the testing and deployment of Asat weapons. The second reflects a conviction that Asat testing should proceed only if our national security would otherwise be imperiled.

It is fanciful to believe that these conditions have been met. The United States is clearly not engaged in negotiations to limit or ban Asats. We have not advanced a single concrete proposal in this area. Indeed, the administration has argued that an Asat ban should not be negotiated because of verification difficulties. Thus, on the one hand the administration states that it is not interested in negotiations, while at the same time it certifies to Congress that it is negotiating.

Nor has the second condition been met. The administration has yet to make the case that a ban on Asat testing would clearly and irrevocably harm the U.S. national security. The Congress did not believe that testing was required to avert such harm at the time the condition was established. And the fact that Congress imposed a testing prohibition last year reveals that it remains unconvinced. Indeed, it seems to have been the judgment of Congress last year that a United States-Soviet Asat competition would damage, not strengthen, U.S. security.

But the fact that these conditions have clearly not been met did not stop the administration from testing. Last August it certified the seemingly uncertifiable and proceeded to test an Asat weapon against an object in space.

Thus, by making a travesty of the certification requirements, the administration brought the congressional ban on Asat testing upon itself. And there is no good reason for lifting this ban. Our security has been strengthened, not diminished, by the ongoing moratorium on Asat testing. It is well known that the United States is more dependent on its satellites than the Soviet Union. Thus, satellite vulnerability poses a greater problem for the United States than for the Soviet Union. Yet the direct result of continuing our own Asat Test Program would be to provoke corresponding Soviet actions that would put our satellites at risk. If we embark on an Asat Test Program the Soviets will surely resume their own test program—a program that was terminated in 1982 after a series of consecutive failures.

It seems self-evident that it is unwise to start a competition in which we have more to lose than the Soviets. And yet that would be the consequence of resuming Asat testing. It seems absolutely senseless to revive a competition that has been put to rest. I therefore urge Senators to support this amendment.

AN ASAT MORATORIUM CAN STRENGTHEN U.S. SECURITY

● Mr. BUMPERS. Mr. President, everyone in the Senate recognizes that the United States is extraordinarily dependent upon her satellites for civilian and military communications. About 70 percent of U.S. military overseas communications are routed through space, a proportion that is still growing and may reach 90 percent in a few more years. Satellites also play a crucial supporting role in major defense and foreign policy decisions, and they are key to the conduct of military operations, from minor ones like Grenada and Libya to the Alpha and Omega of World War III: Its detection, execution, and termination, as well as—we all hope—its deterrence.

We are almost certainly more dependent upon our satellites than the Soviets are on theirs, the result of our advantages in satellite technology, the more closed nature of Soviet society, and the wider distribution of United States military assests around the globe. Also, the Soviets have direct land lines of communication to most of its forces by virtue of geographical realities.

The current constellation of U.S. communications, early warning, photoreconnaissance, and other satellites is both physically fragile and lacking in resiliency. Our system of satellites is vulnerable to Soviet attack, and its very design philosophy—relatively shall numbers of expensive, highly sophisticated satellites—means that wounds inflicted on it would be slow to heal—and expensive. The current crisis in U.S. space launch capability, precipitated by the triple tragedies of *Challenger,* Titan 34D, and Delta, has given us a chillingly real demonstration of the fragility of our space-based assets.

It is very important to avoid the serious hemorrhaging of our security interests that would result from the loss of our satellites. This reality dictates a wide variety of measures to deal with the problem, and arms control is just one of them. There is broad support here in the Senate and elsewhere for satellite hardening and other countermeasures that will protect our satellites.

In short, we need to pursue Asat arms control not for its own sake, but because it can help to preserve and strengthen our national security interests. The key word here is "help." Arms control alone can almost never solve national security problems. If we insist, for whatever reasons, that we should not pursue or reach an arms control agreement on Asat or anything else unless it can solve the entire problem, we will never reach any agreements. Furthermore, the Soviet threat to our satellites, and thus our security, will proceed to grow.

This sums up the rationale in the latter part of the 1970's for the U.S. policy on Asat. We were rightly concerned about the vulnerability of our satellites to the operational Soviet Asat. Accordingly, we initiated steps to enhance the survivability of our satellites, we pursued negotiations to try to limit the Soviet Asat threat, and we began our current Asat Weapon Program, both to give the Soviets an incentive to agree to a ban on such systems and to give us a militarily useful option if agreement could not be reached.

Even then it was recognized that arms control could not eliminate all antisatellite threats. However, appropriate arms control restrictions, coupled with programmatic options like satellite hardening, electronic countermeasures, and maneuver tactics could restrict the most militarily useful Asat options. Again, arms control alone cannot solve the whole problem, but it can make a useful contribution to at least bound the problem.

Turning to the specifics of past efforts, there were three rounds of Asat negotiations held with the Soviets, each round lasting longer than its predecessor:

Round 1: 1 week, June 8–15, 1978, in Helsinki;

Round 2: 3½ weeks, January 23–February 16, 1979, in Bern;

Round 3: 8 weeks, April 23–June 17, 1979, in Vienna.

Some progress was made during these talks, though they fell far short of reaching an agreement. The United States successfully fended off Soviet claims that our space shuttle was an Asat weapon. Both sides did agree that further consultation and study were needed by each side. The Soviet invasion of Afghanistan, and possibly United States failure to ratify SALT II ruled out any further rounds of these talks. The Soviets, who had stopped testing their Asat as the talks began, resumed testing after they lapsed.

It is important that we continue R&D in this area, both to maintain leverage on the Soviets and to give us a usable capability if the arms control approach fails, much as the earlier U.S. dual track approach sought to do. Yet while the administration has staunchly defended and doggedly pursued the Asat weapon track, the arms control track has fared very poorly. There were no Asat negotiations with the Soviets during the first 4 years of the current administration, and the current space arms negotiations in Geneva are reportedly focusing on SDI, not Asat.

While the administration has been in power, there has been modest accomplishment from other sources. On August 18, 1983, Secretary Andropov announced that the Soviet Union was beginning an Asat flight test moratorium and urged the United States to join in. That moratorium has been in effect for nearly 3 years now. It is difficult to argue that the Soviet moratorium has hurt United States security interests.

In 1983 and 1984 Congress passed some fairly weak legislation dealing with Asat tests and arms control that required the administration to do little

more than submit reports. But 1985 was a different story. Last year, on the continuing appropriations bill, the House approved a flight test moratorium provision that the Senate conferees wisely accepted. U.S. security interests have not been damaged in the last year from this act.

But why has there been such an apparent lack of interest by the administration in Asat arms control? First of all, there certainly are a number of formidable technical problems in limiting Asat weapons. As I mentioned earlier, if your goal is to eliminate all Asat threats to satellites, you may as well give up. There are lots of weapons that have some residual Asat capabilities. And there are important verification challenges, as there are in almost every area of arms control.

The major driver behind the Asat Program, however, is the Soviet Rorsat/Eorsat—ship-tracking satellite—threat to United States ships. The administration talks about satellite threats to land targets, but the real driver is the threat to our ships at sea and the approximately 65,000 sailors aboard them at any given time. Unlike other areas, U.S. maritime strategy is based on U.S. superiority, not parity. The administration accordingly wants to be able to counter Soviet systems that can threaten our naval superiority, such as Rorsats and Eorsats. Asat deployment has thus always been an administration objective. The President's space policy directive of July 4, 1982, directed "operational deployment as a goal" for our Asat Program. And while in both START and INF there had been serious interagency policy review and preparation leading to negotiations underway by that time, there had really not been any serious interagency review of and preparations for Asat arms control before that 1982 statement had been made.

The irony is that while the Navy would in theory be the greatest beneficiary of our Asat Program, they are far from enthusiastic about it and were reported 2 years ago as favoring a United States-Soviet ban on Asat tests. Reportedly they believe there are better ways to counter Soviet satellites that do not put United States satellites at risk to the same degree that an unrestricted Asat race would. And as if that weren't enough, the Air Force, which runs the Asat Program, is also lukewarm about it. They reportedly have proposed ending the program on at least one occasion and probably other times, too. From the major slippage in Asat IOC it would certainly appear not to be one of their highest priorities.

Through early 1989 it is unlikely that there will be any progress on Asat arms control made by the current administration. I would like to be surprised on this, but current trends allow no other conclusion. Given the administration's unflagging devotion to the strategic defense initiative, it is unlikely that they would agree to any arms control limits on Asat, since such limits would most likely limit SDI as well. There is a small chance that some agreement could be reached limiting high-altitude Asat testing, since that would not appear to infringe too heavily on SDI. After all, missiles do not unsually reach geosynchronous orbits. But even that is unlikely.

The best we can hope for is a continuation of the mutual flight test moratorium. While this is better than having unlimited testing, I am uneasy about this because such a situation should be governed by an agreement which allows for proper verification safeguards, tight definitions, procedures for handling disputes, and all the other boring but essential details that make up an arms agreement.

There is also the very real possibility that in this Gramm-Rudman environment of tight defense budgets, Congress may kill the entire Asat Program. Already the chairman of the House Armed Services Committee, LES ASPIN, has indicated his interest in this. I personally believe that we should continue with R&D on Asat at some funding level, though without flight testing, as long as the Soviets do likewise. The dual track approach to Asat still appears to have a lot of merit. I wish that the administration would recognize the inevitable and put the Asat flight test moratorium on a firmer footing through a negotiated agreement. In return I am confident that Congress would retain an R&D program for Asat.

In the meantime, we should do the best we can. Let us continue the Asat moratorium and ensure both a U.S. lock on tested superior Asat technology and strengthened U.S. security interests. I urge my colleagues to support the Asat moratorium amendment.●

Mr. KERRY. Mr. President, I want very quickly to address a couple of the comments that have been made here. Comment No. 1 is that of the distinguished Senator from Indiana that we need to be able to defend our satellites. This amendment has nothing to do with the issue of defense of satellites. This is an antisatellite kill offensive weapon restraint and has nothing to do with defense, No. 1.

No. 2, I have heard both the Senator from California and the Senator from Indiana say, this is a unilateral giving up of something.

For 3 years now, the Soviet Union has already unilaterally done it. There is nothing unilateral about our joining them whatsoever. It is a mutual conscious parallelism by which we decide to do what someone else has already done and are moving toward what it has already done.

Mr. WILSON. Mr. President, will the Senator yield?

Mr. KERRY. No, Mr. President, I shall not yield, because I have too little time left to answer the comments of my colleagues.

No. 3, the Soviets have tested once in the last 8 years successfully; once in 8 years successfully. To assume that a co-orbiting system somehow threatens the Unites States now after all that the Senator from Indiana said about how important they are for command and control, then not to be willing to restrict, not research, not other kinds of research, but only firing against an object in space, I think would be wrong.

Finally, let me comment, the distinguished former Senator from Massachusetts, Paul Tsongas, my predecessor, I know very well. I have spoken to him many, many times since I came to the Senate. We have talked about this subject. I am glad my friend from California feels he is a person of great intellectual integrity because my predecessor supports this, has long sought it, and would like to see it passed. I hope it will be.

I yield 2 minutes to the distinguished Senator from Michigan [Mr. LEVIN].

Mr. LEVIN. Mr. President, first, let me thank my friend from Massachusetts. I support this amendment. It clearly calls for a mutual ban on further testing. By its terms, it is not unilateral at all, but mutual, which I think is critical. I think most of the Members of the Senate would agree it is critical for any kind of arms control success.

An arms race in antisatellite weapons would harm our national security. We need them for arms control verification. We want to know where Soviet forces are. We want to know we can detect any Soviet launch as soon as it might occur. We want to be able to communicate with our dispersed nuclear forces in the event of a crisis in order to restrain them until the last possible moment.

These are the stabilizing functions that our satellites perform now. A race to perfect antisatellite weapons is therefore a race against crisis stability. This amendment would clearly advance our national security interests.

The Soviets have an extremely cumbersome, indeed primitive Asat capability. It is a co-orbital system to be launched from an old SS-9 rocket. A killer satellite is launched into the same orbit as its target, and closes slowly until it is close enough to explode itself and destroy the target. This method of attack takes hours, not minutes. It is effective only in low orbits, and can be monitored every moment during its ascent and attack. Therefore, we are not dealing with a weapon readily used to blind our satel-

lites in close succession with a Soviet first strike. Hours before the Asat attack might be completed, we will know of it. Furthermore, to a far greater degree than is true of the Soviet assets, our satellites are in a high, geosynchronous orbit beyond the reach of this Soviet Asat.

The United States has been testing a far more sophisticated system. It utilizes the F-15 fighter to carry to high altitude a small rocket whose warhead can be guided to a direct attack on a low Earth-orbit satellite in a matter of minutes. This system would represent a far more serious threat to satellites and the time factor would give little warning that an attack was taking place. Perfection of this Asat system is the single development most likely to kick off an Asat arms race. The pending amendment would prevent this and signal our willingness to negotiate a test ban.

The administration, in its 1986 Arms Control Impact Statement, takes two quite contradictory stances on the Asat issue. On the one hand, this document affirms that the United States is "prepared to examine space arms control issues in the Conference on Disarmament." On the other, it states: "No arrangements or agreements * * * have been found to date that are judged to be in the overall interest of the United States." In response to a certification clause this Congress enacted to prevent testing of these Asat weapons until good-faith negotiations had been attempted with the Soviets, ACDA Director Adelman instead certified that no possible Asat treaty would be in the national interest, and thus that no negotiations need take place.

In fact, Mr. President, there are several viable approaches to an Asat test and deployment ban. None of them are perfect, since any Minuteman missile could be utilized as an Asat weapon simply by launching it toward a satellite target and then detonating its nuclear warhead. The Soviets could do the same, so in the extreme case, we will always have an Asat. The point is, weapons designed specifically for this purpose only add another layer to the dynamic of threat and counterthreat. Again, the satellites we deploy are largely a benign and stabilizing influence on the strategic scene.

There are some satellite functions far less benign. One, of particular concern to the Navy, is the Rorsat, the Radar Over Ocean Reconnaissance Satellite. The Soviets use this capability to keep track of our carrier groups, and could use them to direct bombers and, in some instances, nuclear weapons, to attack our fleets. Another problem is real-time surveillance capability which might be used for targeting of land forces, including our ICBM silos, in what is called the shoot-look-shoot attack. The clear import of this distinction between benign and threatening satellite assets is the idea that Asat arms control might begin with an agreement not to deploy these too tempting targets at all. This would reduce pressure to create Asat weapons, and it would add to crisis stability.

A second proposal for Asat arms control is "keep out zones." Simply put, we would regulate the allowed distance between satellites to prevent the seeding of "space mines" in the vicinity of our satellites assets. This regime is already imposed on commercial satellites in geosynchronous orbit to prevent interference in communications traffic.

Third, we should consider a ban on both co-orbital and direct ascent Asat weapons. The time to do this is now; once the United States has demonstrated its Asat capability, the Soviets will surely feel compelled to develop a similar Asat of their own. Such a ban, which can be verified by rules similar to existing arms control nonconcealment measures, is manifestly in our national security interest. The fact is the United States has a heavier reliance on satellites than does the Soviet Union. Our forces are more dispersed, making the communications problem all the more difficult. And we launch fewer, more expensive, longer lived assets. Should we go ahead with space-based SDI technologies, this problem will only be more acute. The very first target of a Soviet attack would probably be the SDI's battle stations, vulnerable high-value targets precisely to the degree that SDI becomes the leak-proof umbrella some hope it can be. This is but one more example of how the administration's antiarms control stance places in jeopardy even some of their own cherished programs.

A successful Asat weapons ban treaty would also bolster confidence in the continuing viability of the ABM Treaty. Perhaps this is the reason the administration is not serious about Asat arms control. Whatever the reason, the bald pronouncement that no conceivable Asat Treaty is in the national interest should not be accepted by this body.

I have outlined three possible approaches, all of which have substantial benefits for the overall stability of our nuclear posture. Good-faith negotiations could undoubtedly discover more. What we need to do here is provide the climate in which successful Asat weapons talks might begin. The mutual test ban called for in this amendment will signify the Senate's interest, and it will prevent technological development from gaining such a headstart on the slow process of negotiation that any such talks cannot possibly succeed. A race to develop antisatellite weapons and then to perfect defenses for our satellites is a race that need not be run.

For all these reasons, I support the amendment.

The PRESIDING OFFICER (Mr. MCCONNELL). The Senator from Massachusetts.

Mr. KERRY. Mr. President, how much time remains?

The PRESIDING OFFICER. Three minutes.

Mr. KERRY. And how much time to the other side?

The PRESIDING OFFICER. Two minutes.

Mr. KERRY. I reserve such time as I have at this time. I shall be happy to yield to the Senator from California for a question on his time.

Mr. WARNER. Mr. President, I suggest to the Senator from California, if he wishes to respond, I would be happy to yield about 40 seconds to him, if that is possible, since I would like to have some concluding remarks in the minute and 20 seconds that I would have remaining.

Mr. WILSON. I thank the Chair. I thank my colleague.

Mr. President, because we have so little time, I shall simply first ask unanimous consent that page 15824 of the CONGRESSIONAL RECORD of June 12, 1984, be printed in the RECORD, that portion in which Senator Tsongas is quoted as saying:

> The Senator from California says that we have to test the F-15. I do not argue that point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Mr. TSONGAS. That is correct.

Mr. WILSON. I assume the Senator would also agree, and this is what I was seeking to get the Senator's attention on during the closed session, when he says the Soviets will be more vulnerable to the U.S. antisatellite capability, does that not presuppose that we have tested that capability beyond what is clearly the first phase with respect to the F-15?

Mr. TSONGAS. Let me answer it by asking the Senator a question: Would he rather have their tested second orbit interceptor or our F-15 approach? Which would he rather have?

Mr. WILSON. I think we would rather have ours once we have tested it. But we have not tested it, that is precisely the point. Therefore, while we could argue the relative merits of direct descent as opposed to the more time-consuming orbital or co-orbital approach the Soviets have undertaken, the fact is they have a tested, reliable system, one which they feel sufficient confidence in that they have agreed to avoid it, which they can agree to under existing international rules.

Mr. TSONGAS. Does the Senator consider the second orbit intercept to be a reliable system? Would the Senator vote for such a system in our program?

Mr. WILSON. What the Senator would vote for is that we test it so that we can develop it to the level of confidence it apparently has now on the part of the Senator from Massachusetts. I would like to share that confidence. I believe we can but not if we ban unilateral testing.

If the Senator is asked do I have some confidence in the ability of the Soviet

weapon to do danger to a great number of high-value satellite assets of the United States, the answer is yes, I do.

Mr. TSONGAS. Mr. President, that is not in debate.

The final point I make, Mr. President, is that no matter what happens here today, and I think perhaps we can negotiate our way out of this, the fact is that whether we have a treaty or do not have a treaty, one of the major issues of vulnerability—we hear a lot of talk about what lasers can do and what these intercepts can do. The fact is that one of the ways to get around this is to build in defenses. You can, indeed, make satellites that are more maneuverable. You can, indeed, put protective devices on satellites to obviate some of the problems of lasers. We have not done that. Whether these amendments pass or fail today, there is an obligation on the part of the United States to do something about vulnerability of our satellites. Even those of us who argue for an approach of Asat arms control would in no way argue with that point.

What we are going to vote on today is very simple: We are saying to the administration, yes, go ahead with your testing; yes, go ahead with all your R&D; but at least begin to negotiate.

The Senator from California says we have to test the F-15. I do not argue that point. All I say is as you go about doing that, the second track is at least as important, sitting down and negotiating. When you do not do that, nothing else can be accomplished and the window of opportunity will have closed, the second orbit intercept is vulnerable.

Mr. WILSON. Because we have so little time, Mr. President, I simply say the fault I found in Senator KERRY's statement was his representation that in contrast to this being a unilateral concession on our part, the Soviets have been doing it for 3 years. They have been doing it for 3 years after completing successful testing. That was the point.

With that, I yield to the distinguished manager.

Mr. QUAYLE. Mr. President, would the Senator yield for a unanimous-consent request?

Mr. WARNER. Yes, Mr. President, I yield.

Mr. QUAYLE. I ask unanimous consent that an article appearing in the Christian Science Monitor concerning space self-defense zones be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Mar. 24, 1986]

MAKING WAR LESS ATTRACTIVE: SPACE SELF-DEFENSE ZONES

(By Dan Quayle)

As US arms control negotiators in Geneva again attempt to reduce American and Soviet arsenals, it's time to consider a new arms control idea—space self-defense zones—that would make war less attractive both in space and on earth.

It's no secret that both the United States and the Soviet Union have scores of satellites deployed in space that are critical for military surveillance, warning, communication, navigation, weather prediction, and mapping.

It's also no secret that there is a tremendous military incentive to attack these satellites. Consider: If the Soviets destroyed enough of US reconnaissance, communication, and navigation satellites, they not only could blind us to a missile strike, but deprive US ground and naval forces of the communication and control capabilities needed to counter conventional attacks.

Unfortunately, US satellites are vulnerable. Although Americans have no antisatellite weapons (ASATs) deployed yet, the Soviets have a rocket-launched ASAT that can attack US low-orbiting satellites, and it could be improved to attack ones in higher orbits. The Soviets have also tested ground-based lasers that could blind US satellites, and they have threatened to deploy space mines—explosive satellites that could maneuver near US satellites and be commanded to destroy them without warning.

Two efforts have been suggested to check this threat. The first, now under way, is to make US satellites harder to find, more difficult to harm, more numerous and, if attacked, able to evade and shoot back.

Although helpful, this approach is unlikely to be sufficient unless the satellites have enough warning of an attack. Such warning might be feasible against current Soviet rocket-launched ASATs that announce their departure with a missile launch and take more than an hour to reach their target. But with space mines or space-based lasers, the attack would be virtually instantaneous.

The second way to check this threat is to ban ASAT testing. The supposed appeal of such a test ban, its supporters argue, is that if testing is prohibited, deployment can be prevented. If one prevents deployment, space vulnerability is no longer a problem.

This approach, however, is most presumptive.

Verifying what's an ASAT is virtually impossible. Almost anything that penetrates space—missiles, satellites, space stations, shuttles, ground-based lasers and jammers—can be used to degrade or destroy US satellites. There is little sense in offering something that on its face cannot and probably never will be verified.

An ASAT test ban would curtail US development not only of ASATs, but also of shoot-back satellite defenses critical to assure US space assets a modicum of survivability. Developing these defenses requires much more overt testing than is needed for ASATs, because unlike ASATs, they do not know where their target is well in advance.

The end result of an ASAT ban would be increased uncertainty concerning US satellites' vulnerability. The United States would be unable to ascertain Soviet ASAT deployments, and US satellites would be denied a defensive capacity in case of attack. Thus, the worst of all worlds—no defenses, no verification, and greater instability and uncertainty.

There is a better way to check the threat posed to satellites—space self-defense zones—which would allow defenses, enhance verification, and significantly reduce the incentive for either side to attack the others' satellites. What the zones would do is simple: Keep one side's satellites far enough apart from the other's to make an instantaneous surprise attack by either side virtually impossible. Both sides would be permitted an equal number of zones within which they would have exclusive rights to position their satellites permanently, and to inspect, expel, or otherwise render harmless intruders if they exceed an agreed upon, safe number.

Both sides could perfect defenses for their satellites within their zones as an additional safeguard, and ASATs would also be permitted (on the basis that what one cannot verify, one can hardly prohibit). With space self-defense zones, the utility of ASATs would be greatly reduced, since, by the time they reached their target, they will have given the other side clear warning of an attack. At best they might succeed in destroying one or two satellites quickly, but that would hardly accomplish much. Only by destroying many satellites simultaneously could either side hope to eliminate a country's ability to execute a specific military mission.

The zones' sizes would vary for different satellite orbits since some are more densely populated than others. But they would be large enough to be quite useful.

Some zones could be in geosynchronous orbit (22,000 miles above the earth), where the most critical civilian and military satellites are. In this 170,000-mile orbit, it would be relatively easy to create a sizable number of large sectors—say 36 zones, each one 4,600 miles across, with 12 each for the US and the USSR, and another 12 neutral zones. Given the zones' size, a space-based ASAT missile would require minutes to reach the other side's satellites, and current lasers, even if space-based, would be out of lethal range.

With the possible development later of very powerful space-based lasers, it might be necessary to create larger zones at geosynchronous orbits and above.

For the moment, only a basic agreement on space self-defense zones needs to be proposed. If the Soviets are uninterested in such a scheme, it will increase the US burden to develop its own satellite defenses unilaterally. It will also suggest just how much space arms limitations the US can expect from the Soviets—and in a way that an ASAT ban, which would only favor them, would not.

Certainly, space self-defense zones belong on the US arms control agenda. If agreement can be reached on this approach, US security would be enhanced, as would the Soviet Union's. It's an arms control idea that should be pursued.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Mr. President, let me comment one last time with respect to my distinguished predecessor, Senator Tsongas. The debate at that time, and I have read it very carefully, because of last year when the distinguished Senator from Virginia and I went through this—that was about a point in space at that particular time. I know the Senator from Virginia will agree with me. That related to a point-in-space testing we had at that time. That is different from an object in space. It might be possible to deal with a point in space differently from this. We are talking about firing objects in space, which has a whole different outcome in terms of arms control and perception and perception of threat.

Mr. President, let me close by saying this gives us the opportunity to continue not a unilateral measure but a mutual measure. The Soviet Union has not tested in 3 years. The Soviet

Union has stopped. Why, then, cannot the United States of America stop?

We have had a successful test against a point in space of our F-15, against an object in space. They have never had a successful test of a homing object against an object in space. Therefore, we could say we are ahead in that technology. But the whole effort to reach an arms control agreement requires that both sides sometimes move in a conscious, parallel way in order to try to provide the breathing room by which you do not go beyond, in technology, and thereby disrupt your ability to have that parallelism that allows you to reach an agreement.

I strongly urge the Senate to hold onto that moratorium. It is not a change. If the President certifies to us that, at any time, the Soviet Union tests, we may go ahead and test; it does not restrict research; it does not restrict our ability to design those systems. It restricts only the test against an object in space and only for that period of time that there is mutuality with the Soviet Union.

I listened to the Senator from Indiana say our satellites are so critical we have to defend them. What better defense could there be for satellites than to have a sanctuary in space with no threat of effective antisatellite weapons? That is something that we could achieve if we hold onto this moratorium.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, to refresh the recollection of Senators, the Senate has consistently supported a limited Asat test program. Last year, it rejected a similar amendment by the distinguished Senator from Massachusetts by a vote of 51 to 35. Following that, the Senate voted 74 to 9 to permit a limited Asat test program to proceed.

That limited program is almost identical to the one we now have recommended by the Armed Services Committee and requested by the Department of Defense.

In fairness to my distinguished colleague, I have searched my mind to determine what, if anything, has changed from those rather decisive votes last year until this time this year.

□ 1310

The one thing that has changed, Mr. President, is the atmosphere of arms negotiations now being conducted by both the Soviet Union and the United States, and this particular program is integral to those negotiations. For this body now to take it away from the President of the United States, entrusted by our Constitution as the principal person dealing with the foreign policy of the United States, I think would be a mistake. I urge the Senate to consider the actions taken in the previous years and to establish a consistent precedent. I thank the Chair.

Mr. President, at this time, I move to table the amendment of the Senator from Massachusetts and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Washington [Mr. EVANS] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 55, nays 43, as follows:

[Rollcall Vote No. 192 Leg.]

YEAS—55

| Hart | Mitchell | |

NOT VOTING—2

| | |
|---|---|
| Eagleton | Evans |

So the motion to lay on the table amendment No. 2650, was agreed to.

□ 1330

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. KERRY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, we now have an amendment by Senator KENNEDY. There is no time limit on it. It promises to be short.

I announce that following that, although we did not get a unanimous-consent agreement on it, and I think there would be no objection, a matter concerning civilian personnel will be presented by TED STEVENS.

I say to my colleagues we are beginning to move a little better and if all Senators are interested in not working tomorrow, let us keep it up and let us try to get here on time for votes.

Mr. DOLE. Mr. President, I have been having some discussions with the managers. I think the distinguished minority leader has also visited with the managers.

I think in fairness to our colleagues who have commitments tonight and tomorrow I better report I am going to do what the managers want to do and they want to finish this bill.

I would think that all of us plan on being here a while this evening, maybe not too late this evening and probably here tomorrow unless by some miracle we should complete this between now and 6, 7, or 8 o'clock. Otherwise, it looks like a Saturday session.

I would again indicate there has been no waste of time. It is not a case where someone has been deliberate. It is a question of so many amendments. It is a very massive piece of legislation.

We are in the last week before the recess. I do not disagree with the distinguished minority leader. If we do not keep the schedule there are going to be many more Members have to change plans and we will just stay 1 day tomorrow.

I believe if we do not finish this bill now, that is the end of it, I say in fairness to the managers.

Then they have invested a whole week and many Senators and hundreds of staff and all the different agencies they are dealing with, and I do not believe we want that to happen.

So, I am going to announce now that we are going to carry out the wishes of the managers who wish to finish this bill this week.

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Senator will have to ask unanimous consent.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the pending amendments be temporarily set aside.

Mr. GRAMM. Mr. President, reserving the right to object, I would like to inquire of the distinguished Senator from Massachusetts if this is amendment No. 2403 printed in the RECORD, the amendment that we have contemplated for several days would be sent to the desk?

Mr. KENNEDY. This is not that particular amendment.

Mr. GRAMM. Mr. President, I have asked on several occasions to see the amendment. It is not my desire to hold up the deliberations of this body but I would be constrained to object until I

could have an opportunity to look at the amendment.

On that basis, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts may go ahead.

Mr. METZENBAUM. Who has the floor?

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. I yield.

Mr. METZENBAUM. Mr. President, I heard what the Senator from Texas said. The Senator from Texas knows what this is all about. There is no secret about it.

I just want to say that at this point in the afternoon at 20 minutes to 2 when it is necessary to move this bill forward as the managers desire, if we are going to start playing games about objecting to the introduction of an amendment, I am perfectly willing to play that game and then everybody ought to go home because I do not think that kind of game is appropriate at this point. We all know what the amendment of the Senator from Massachusetts is about. There is no secret at all about it.

Mr. GRAMM. Mr. President, will the distinguished Senator yield?

Mr. METZENBAUM. Certainly.

□ 1340

Mr. GRAMM. I do not believe that it is an unreasonable request to ask to see the amendment. I have asked on three occasions to see it and the distinguished Senator from Michigan earlier this day objected to exactly the same request. So all I am asking to do is see the amendment. I do not intend to be intimidated on this issue and until I see the amendment I intend to object.

Mr. NUNN. Mr. President, while this is being worked out, unless there is another amendment that is going to be offered, I have a brief statement I would like to make.

Mr. MATHIAS. I have an amendment.

Mr. NUNN. Mr. President, if the Senator from Maryland would withhold, I would like to make a very brief statement on the question of access to the ABM Treaty, which I am sure the Senator from Maryland would be interested in, while the minority leader is here, because he has been very involved in this.

AGREEMENT REACHED ON ABM ACCESS

Mr. President, on July 25 I delivered a speech on the Senate floor concerning the administration's refusal to grant the Senate access to the negotiating record of the 1972 ABM Treaty.

As Members are aware, this issue was precipitated by the administration's unilateral action last fall reinterpreting crucial provisions of the treaty relating to the development and testing of mobile and space-based ABM systems based on advanced new technologies.

In my opinion, refusal to provide the Senate with access to the documents upon which the reinterpretation was based would have threatened a fundamental institutional interest of the Senate—its powers and responsibilities under the Constitution as a coequal partner in the treaty process.

Mr. President, today I am pleased to announce that the administration has reconsidered its position and has now agreed to provide the Senate with access to these documents.

Yesterday, the Secretary of State sent a letter to the distinguished chairman and ranking member of the Foreign Relations Committee, Senators LUGAR and PELL, informing the Senate that that portion of the negotiating record that is pertinent to the limitations on development and testing of so-called exotic ABM systems will be transmitted to the Senate.

The documents will be sent next week and will be stored in the Senate Office of Classified National Security Information (S-407). Senators and a very small group of designated professional staff will be able to review the material at that location.

In accepting this arrangement, we have reserved the right to request any additional documents within the scope of our original request which we might identify during the course of our review and deem necessary to a full understanding of the negotiating record as it pertains to these provisions in the treaty.

Mr. President, I am very pleased that the administration has made this decision. The decision upholds the historic respect which has been afforded the Senate with respect to its constitutional role in the treaty process and avoids setting a precedent which I believe would have been extremely prejudicial to the Senate's powers and responsibilities in this area.

I am hopeful that the understanding on access that we have reached with the administration will enable the Senate to reach its own judgments regarding the correct interpretation of the treaty.

Mr. President, this could have been a real roadblock in our bill, but we have been able to work it out.

Senator GOLDWATER has been very helpful. The minority leader has written letters and has several meetings on this subject. The Senator from Alaska, Senator STEVENS, the chairman of the arms control observer group, has been very helpful. There have been a number of people who have been interested in this, including Senator HART, Senator LEVIN, Senator COHEN, and Senator KENNEDY.

Senator PELL and Senator LUGAR have taken the lead. They have exchanged letters with the Secretary of State. Senator PELL and Senator LUGAR will have a statement a little later on this afternoon, and the letters will be made available.

As I said, we understand that the documents will be coming next week and then we will have the right to ask, as we examine that record, for further information, as needed. I do not know whether this agreement is going to hold all the way, but it is a very strong step forward. It is an enormously important matter for the institution of the Senate, because historically the Senate has had access to negotiating records as part of our role in being charged with the constitutional duty of ratifying treaties.

This is also very important in the arms control process. It goes to the question of what the appropriate interpretation of the ABM Treaty is, whether it is the historical interpretation or the broader reinterpretation that has been put forward in recent months. The question of the broad versus narrow interpretation very well could end up being one of the most important parts of the whole arms control negotiation. So the Senate will be able to have access. We will have a very limited number of staff people who have access and we will go into the details in the future.

But this is going to avoid what I had hoped to avoid, and that is a major floor fight on this subject. I think it does help to facilitate the windup of this bill but, more importantly, I think it protects the historical role of the U.S. Senate in having access to negotiating records on treaties that we are required to ratify.

Mr. HART. Will the Senator yield?

Mr. NUNN. If I could yield first to the minority leader for a brief period, because he has been the leader in trying to secure this information.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Georgia.

PROGRESS ACHIEVED TO INCREASE SENATE ACCESS TO THE ABM TREATY NEGOTIATING RECORD, ESPECIALLY REGARDING SDI, AND TO PRESERVE SENATE'S CONSTITUTIONAL PREROGATIVES ON TREATY MATTERS

Mr. BYRD. Mr. President, I do not want to transgress on the time of the Senate, but this is an important matter. As the distinguished Senator from Georgia stated, it is a matter that goes to the heart of the institution's role, this Senate's role, in the making and approval of the ratification of treaties.

Under the Constitution, the President shall make treaties by and with the advice and consent of the Senate. It requires a two-thirds vote of those Senators present to approve the ratification of a treaty.

What Senator NUNN is talking about here, and with which so many Sena-

tors have been actively engaged on both sides of the aisle, is the matter of having access to the negotiating records in relation to the ABM Treaty and the administration's new interpretation of that treaty. This has a great bearing on what our decisions will be, and ought to be, in relation to SDI and other matters, and we have had difficulty in getting that kind of access.

Now, as the distinguished Senator from Georgia has said, after these various meetings and discussions and letters back and forth and back and forth, we think we may have accomplished a reasonable and effective way to approach this matter that will resolve, in our estimation, the needs of this Senate as it carries out the will of the people under the Constitution.

As the Senate knows, several of us—Senators PELL, NUNN, HART, KENNEDY, and LEVIN—have been involved in intensive efforts for some time to obtain increased Senate access to the negotiating record of the Anti-Ballistic Missile [ABM] Treaty, and other important related documents. Senators LUGAR, GOLDWATER, and WARNER also have provided timely assistance.

We believe that access to these documents is critical to the Senate fully evaluating and understanding the administration's proposed reinterpretation of the ABM Treaty, and that theory's relationship to the strategic defense initiative [SDI].

Considering the controversy surrounding the SDI Program, as well as the great concerns expressed by many American national security experts and by our allies about the ABM Treaty reinterpretation, increased, Senate access to the treaty negotiating record and related materials is an absolute necessity. This is especially so since this new theory may have profound, negative ramifications for arms control and for our strategic military posture.

Increased Senate access to these documents also is required for the Senate to make the most informed decisions about the scope, composition, pace, and funding levels of the SDI Program, a point I stressed strongly and frequently to the administration in seeking such access.

Heretofore, the administration's response to our requests, and its method of creating and propounding the treaty reinterpretation, have been disappointing and have come perilously close to threatening the Senate's constitutional prerogatives as a coequal with the executive branch in the treatymaking process.

However, as Senators PELL, LUGAR, and NUNN already have indicated, our efforts may be beginning to obtain results. The most recent administration response appears positive, and we even may gain increased access to at least some of the needed documents as early as next week.

We reserve final judgment whether this access is sufficient, and, if necessary, we expect to make further requests of the administration in this regard. We shall always reserve the option to pursue legislative remedies, although that is unnecessary now due to the positive nature of this latest, administration response, and we hope that a spirit of mutual cooperation will make such remedies unnecessary in the future.

We look forward to such continued cooperation in the future on the part of all those involved in this issue, both in the executive branch and in the Senate.

Mr. President, I close by saying that I thank the Senator from Georgia, Mr. NUNN, and the distinguished Senator from Arizona, Mr. GOLDWATER, Mr. PELL, Mr. HART, Mr. LUGAR, Mr. WARNER, Mr. STEVENS, Mr. MATHIAS, and others who have spent a considerable length of time and effort together with our staffs, in this effort. I congratulate them.

The Senate is in their debt, and I am sure the people will like what we are trying to do because it is in their interest.

Mr. PELL. Will the Senator from Georgia yield?

NUNN. I yield the floor. That way, I will not be trying to parcel out the time.

Mr. MATHIAS addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. MATHIAS. Mr. President, I ask unanimous consent that I may yield briefly to the Senator from Rhode Island without losing the floor.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I thank the Senator from Maryland. I just want to say, in connection with the matter under discussion, that I am very pleased the Secretary of State has responded in a positive way to the requests the Foreign Relations Committee chairman, Senator LUGAR, and I made for Senate access to portions of the negotiating record of the 1972 ABM Treaty.

Senator LUGAR and I wrote the Secretary today confirming agreements under which Senators will be able to review the records and reach their own judgments on the constraints applied by the treaty to the development of new ABM systems.

This outcome follows extensive discussions involving a number of Senators, including the distinguished minority leader [Mr. BYRD] and the ranking Democratic member of the Committee on Armed Services [Mr. NUNN], and others.

This access is of central importance in reaching decisions on the controls which should be applied to the strategic defense initiative.

Moreover, the question of exactly what controls are applied by the ABM Treaty covers has direct bearing on the potential outcome of the negotiations in Geneva.

Last fall, following a review of the treaty, the administration announced that the traditional interpretation of the treaty pertaining to the development and testing of futuristic or exotic systems was in error. However, Secretary Shultz later announced that our policy would be to follow the traditional interpretation, although the new, broad interpretation was justified.

It is critically important that the Senate judge for itself whether we are justified in leaving the way open to an unconstrained defensive arms race.

The Senate must determine what controls are justified by the record so that it can participate with the executive branch in forging new arms control agreements which will build upon present controls to reduce arms and move us away from the threat of nuclear war.

Mr. President, thanks to the forthcoming attitude and responsiveness of the administration, we will be able to carry out our responsibilities in this area.

Mr. President, I ask unanimous consent that the letter Senator LUGAR and I wrote to the Secretary on August 1 requesting the materials, the Secretary's letter to us on August 5, and our response today confirming the arrangements be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
*Washington, DC, August 1, 1986.*

Hon. GEORGE P. SHULTZ,
*Secretary of State,*
*Washington, DC.*

DEAR MR. SECRETARY: We were most pleased to meet with Ambassador Paul Nitze and Judge Abraham Sofaer to discuss with them issues surrounding the ABM Treaty negotiating record. Both Ambassador Nitze and Judge Sofaer were willing to deal with concerns stated by Members. In particular, the assembled Members discussed with them possible ways in which access might be arranged for Senators and selected professional staff members with respect to the portions of the ABM Treaty negotiating record that bear upon the applicability of the Treaty to the development, testing, and deployment of ABM systems and components "based on other physical principles," or what Senator Goldwater referred to in his letter of June 25, 1986, as "exotic technologies."

On the basis of this and other conversations, we are cognizant of the Administration's present views on the so-called "broad" and "narrow" interpretations of the ABM Treaty. While the Administration has expressed reservations over requests for access to the entire negotiating record and to a variety of other documents, we nonetheless believe that the essential concerns of Members with respect to "exotic technologies"

and ABM Treaty commitments should be met.

We have concluded that the Senate must have access to particular parts of the record of the negotiations which culminated in the 1972 Anti-Ballistic Missile Treaty, together with other relevant documents. These materials are necessary to allow the Senate to reach its own judgments regarding the correct interpretation of the ABM Treaty. The Senate also has a need at this point to reach a decision on the funding of research and development of exotic or future techologies. The recent study conducted by Judge Sofaer and the earlier study done for the Department of Defense by Colonel Fitzgerald and Ambassador Graybeal at the Systems Planning Corporation would be of considerable value in helping Members assess the issue.

In addition, for the period from March 15, 1971, through May 26, 1972, we request all documentary materials in the negotiating record of the ABM Treaty which deal with the negotiation of the limits in Articles II, III, and V, and Agreed Statement D pertaining to ABM systems and components based on then-current technologies or other physical principles, to include, inter alia, the following:

All messages to and from the delegation;

Relevant versions of the Joint Draft Text;

Prepared statements presented al all joint meetings between the United States and the Soviet Union, including all proposals regarding treaty provisions and texts; and

The legal analysis of the Treaty provisions prepared in May 1972, by John Rhinelander, the legal advisor to the delegation.

Furthermore, to aid Members in assessing implemenation of the Treaty, directives issued by executive branch agencies in the months following ratification would be particulary important.

The materials should be provided directly to the Committee on Foreign Relations, which would be responsible for safeguarding them and ensuring properly-controlled access and handling. We anticipate asking that the materials be held for the Committee in S-407, a secure facility under the direct charge of the Majority and Democratic Leaders. No xeroxing of the materials provided to the Foreign Relations Committee will be permitted, nor will the documents be removed from S-407. We would expect to make arrangements under which the materials would be available to Members and to six cleared professional staff members, one each to be designated by the Majority and Democractic Leaders and the chairman and Ranking Members of the Foreign Relations and Armed Servcies Committees.

We would appreciate your assistance in making the necessary arrangements to provide the requested materials at an early date.

Whith every good wish.

Sincerely,

RICHARD G. LUGAR,
*Chairman.*
CLAIBORNE PELL,
*Ranking Minority Member.*

---

THE SECRETARY OF STATE,
*Washington, August 5, 1986.*

Hon. CLAIBORNE PELL,
*United States Senate.*

DEAR SENATOR PELL: I have received your letter of August 1, requesting access for the Senate to the portions of the ABM Treaty negotiating record that bear on the applicability of the Treaty to the development, testing, and deployment of ABM systems and components "based on other physical principles," or what Senator Goldwater referred to in his letter of June 25, 1986 as "exotic technologies." In this connection, you have also asked for a study prepared by Colonel FitzGerald and Ambassador Graybeal for the Department of Defense and the analysis by Judge Sofaer, as well as other documents.

A number of the items you have requested are part of the deliberative process within the Executive Branch or are otherwise privileged. At the same time, I appreciate the Senate's concern that it be able to understand the basis for interpretation of the Treaty announced by the President last October. We all recognize the highly unusual circumstances surrounding the application of the ABM Treaty—the review by the Administration in 1985 concerning the proper interpretation of the scope of the Treaty, and the importance of the President's SDI program to the national defense, among others. Accordingly, we have decided to provide to the Foreign Relations Committee, as soon as the materials may be assembled and S-407 is ready to receive them, the FitzGerald-Graybeal study and that portion of Judge Sofaer's analysis that evaluates the negotiating record together with the documents from the negotiating record on which it relies.

The FitzGerald-Graybeal and Sofaer studies aimed to be comprehensive. The FitzGerald-Graybeal study has an appendix consisting of about two hundred pages of memoranda of conversations, working papers, and draft texts from the negotiating record. Together with the documents on which Judge Sofaer based his analysis, these documents are the documents on which the Administration formed its judgment with regard to the applicability of the Treaty to the development, testing, and deployment of ABM systems based on "other physical principles." They include the documents you have specifically requested that bear on the issue, in particular the records of the negotiations and drafts texts regarding Articles II, III, and V and Agreed Statement D. I believe these documents together deal with all the issues of concern to you and other Senators.

I will also provide the sections of John Rhinelander's May 24, 1972 memorandum pertinent to the issues you wish to examine. That memorandum is a general description of the Treaty's terms, not a discussion of the negotiating history. Earlier drafts of Rhinelander's memorandum may be useful in evaluating the final drafts; relevant excerpts of the drafts will also be provided.

The provision of certain other documents you request raises separate and more difficult questions. Because we are making available the items on which the Administration's interpretation was based, I believe you will find that provision of the excerpts, quotes, and other references in the studies satisfies your request.

The conditions proposed by you for guaranteeing the security of the documents and controlling access to them are acceptable. Along these lines, please provide the names of the six staff members to whom access is to be granted, as proposed in your letter. I propose that the Foreign Relations Committee return the documents to the Department of State when the present Congress adjourns. Of course, as Ambassador Nitze and Judge Sofaer have previously indicated, I remain prepared to ask them to brief individual Senators on the contents of the memoranda or the negotiating record.

I am sending a similar letter to Chairman Lugar.

Sincerely yours,

GEORGE P. SHULTZ.

---

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
*Washington, DC, August 8, 1986.*

Hon. GEORGE P. SHULTZ,
*Secretary of State,*
*Washington, DC.*

DEAR MR. SECRETARY: We appreciate very much your prompt and forthcoming response to our request that you provide the Senate access to particular parts of the record of the negotiations which culminated in the 1972 Anti-Ballistic Missile Treaty, together with other relevent documents.

We expect that the materials you have decided to provide as soon as they are assembled—pertinent sections of the May 24, 1972, Rhinelander memorandum, the 1985 Fitz Gerald-Graybeal study, and the portion of Judge Sofaer's analysis that evaluates the negotiating record, together with the documents and appendices accompanying the latter two studies—will be of considerable value in allowing the Senate to reach its own judgments regarding the correct interpretation of the treaty. We hope the provided materials will be sufficient to allow those judgments to be made, but we will not be certain of that until we have received the materials and reviewed them. Accordingly, we must reserve the right to request any additional documents within the scope of our August 1 letter which we might identify in the course of our review and which we conclude are necessary to a full understanding of the negotiating record.

The heavy schedule during the remaining weeks of this Congress may prevent completion of our review before adjournment. Nonetheless, we expect to conduct our review expeditiously, as time permits, and will return the documents upon completion of that review. We expect to identify the six professional staff members to whom access will be granted at an early date and will ensure that your office is notified. Finally, we have arranged for the Committee to receive the documents and to store them in S-407 as soon as they can be provided.

With every good wish,

Sincerely,

RICHARD G. LUGAR.
CLAIBORNE PELL.

□ 1350

Mr. MATHIAS. Mr. President, I have been following the efforts of the Senator from Georgia with great interest. I have noted that there is a considerable interest in the country, far beyond Capitol Hill itself. I congatulate him for his leadership and his persistence in this matter. I think the administration is also to be congratulated for taking a broad and, I think, proper view. I believe the country is going to be better off as a result of the decision made in this matter.

Mr. President, I ask unanimous consent that the pending amendments be set aside that I may call up amendment No. 2355.

Mr. HART. Mr. President, will the Senator yield for just 1 minute on the previous issue we were discussing?

Mr. MATHIAS. If I can yield without losing my right to the floor.

The PRESIDING OFFICER. Without objection.

Mr. HART. Mr. President, as early I think as last April in behalf of the chairman of the Armed Services Committee, Mr. GOLDWATER, the ranking member, Mr. NUNN, the Senator from Virginia, Mr. WARNER, and the Senator from Colorado raised objection with the administration on behalf of the Armed Services Committee about the posture that had been taken that the Antiballistic Missile Treaty was now being reinterpreted in a broader sense as to what kind of research and development could be permitted but that the evidence based upon the negotiating record that permitted that broader interpretation would not be made available to the the Armed Services Committee or the Senate.

With the approval of both the Senator from Arizona and the Senator from Georgia, our committee went forward to seek that record. Today we have finally after several months received approval from the administration so that the Senate of the United States can have access to a record that, in this Senator's view, under constitutional law has been and should have been available to us all along. There seems little question to anyone who has any kind of notion about the constitutional balance of powers that the Senate of the United States must have full and free access to the negotiating records to carry out its treaty ratification responsibility.

So I want to thank the Senator from Arizona and the Senator from Georgia for their persistence as well as the leadership in the Foreign Relations Committee in bringing about what is, I think all of us acknowledge, a necessary result, and had it not been for their persistence, we could have been in a very, very serious crisis between the legislative and executive branches.

I am glad finally the administration came around to the obvious point of view. But I think had it not been for the persistent effort by our committee leaders, that might not have happened. We would have suffered as a consequence.

Mr. NUNN. Mr. President, I thank the Senator from Colorado. He is the ranking Democratic member of the Strategic Subcommittee and has played an enormously important role in not only our strategic weapons program, but also in the review of the negotiating posture of SALT II agreement, as well as the START negotiations now. He has been a leader in trying to secure this information that we now hopefully are going to get within the next week. So I thank my friend from Colorado for his remarks, for his leadership, and for protecting the institutional role of the U.S. Senate as well as our interest in the arms control negotiations that are currently going on.

Mr. LEVIN addressed the Chair.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. NUNN. I yield the floor.

Mr. MATHIAS. I think I have the floor.

Mr. LEVIN. Will the Senator yield 2 minutes?

Mr. MATHIAS. Mr. President, I ask unanimous consent that I may yield briefly to the Senator from Michigan without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. I thank my friend from Maryland.

First, let me congratulate Senators NUNN, LUGAR, HART, and all of those involved in these negotiations. The administration came up with a radical new interpretation of the ABM Treaty. It accepted mutually the Soviet Union interpretation of 13 years, and suddenly came out with a totally new interpretation. Senator NUNN and others have been able now to finally obtain materials from the administration. I commend them for this great success.

I am troubled by a couple of lines in this letter. I am wondering whether Senator NUNN might comment on them. I am troubled with the lines which read near the bottom of page 1, "The document from the negotiating record on which the administration relies" will be provided. That sounds like the portions that they will be giving to us are only the portions which support their new position, rather than all of the relevant portions on this issue.

Mr. NUNN. I am sorry. Would the Senator repeat which letter that is? Is that the letter from the Secretary of State?

Mr. LEVIN. The letter from the Secretary of State, August 5.

Mr. NUNN. What paragraph?

Mr. LEVIN. Near the bottom of page 1, the last line says—it is a long line, but I am going to use part of it—that the documents from the negotiating record on which it relies implies that the only documents from the negotiating record which we would be receiving are those portions they are using to rely on for their new interpretation, and on page 2 of that same letter, it says in the third from the last paragraph, we are making available the items on which the administration's interpretation was based, again implying that it is only the items that support the administration's interpretation which are being furnished.

I know the Senator from Georgia has a very different idea as to what is intended and surely what he intends. I wonder whether he might want to comment on that. I believe he has covered this in part in his response. I think it is important for the RECORD as to what our understanding is as to what will be furnished.

Mr. NUNN. The Senator has read this document very carefully, this letter from the Secretary of State. But the understanding we have had orally is that we will get all portions of the negotiating record that are relevant to this subject on one side or the other.

Any phrase in the Secretary of State's letter that might be interpreted as qualifications would, in the spirit of what was agreed to, not really be qualifications. That remains to be seen, though.

What we are saying now is that we believe we have a good-faith understanding, we hope it is good faith, that we are going to receive the documents, and we are going to pursue any other documents we might need. Senator PELL and Senator LUGAR read this letter very carefully also. They drafted a response to the Secretary of State. In that response, dated August 8, which Senator PELL has already introduced in the RECORD, the second paragraph reads as follows:

> We hope that the provided materials will be sufficient to allow those judgments to be made. But we will not be certain of that until we receive the materials and review them. Accordingly we must reserve the right to request any additional documents within the scope of our August 1st letter which we might identify in the course of our review and which we conclude are necessary to a full understanding of the negotiating record.

So I say to the Senator, first, that the original letter from Senator LUGAR and Senator PELL was indeed very broad, and, second, the response from the Secretary was somewhat narrowed with some specific words. The Senator has correctly identified these words as perhaps troublesome. However, our response on August 8 made it clear we wanted the documents we originally referred to. We reserve the right to ask for additional documents. That is the understanding. The oral understanding is that we would have access to all relevant material.

Also, I might add we have asked for and will receive the Fitzgerald report and all accompanying documents. This report of course supports the original interpretation. So if you have the material supporting the interpretation of the negotiating record on both sides, it seems to me you have gotten pretty close to what we need, but we will judge it as we go and, hopefully, we will get everything we need. We will continue to pursue it.

Mr. LEVIN. I thank my friend. Again, I thank my friend from Maryland.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the pending amendments be set aside so that I may call up Amendment 2355.

Mr. KENNEDY. Mr. President, will the Senator withhold that request for a moment?

Mr. MATHIAS. Perhaps we could get the Chair to act on that request, and then I will be happy to yield.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. MATHIAS. I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I, too, want to join my colleagues in commending those on the committee for what I think is enormously important service to the Senate and to the American people in obtaining these kinds of assurances and being able to examine the various information at the time of the consideration of the ABM Treaty.

We have seen in recent times where the administration has been reluctant in supplying the Senate as well as the House of Representatives important and valuable information so that they could fulfill their particular functions. We have seen some willingness in the recent days to accede to the request of the Senate Judiciary Committee in one area, to provide information vital to our constitutional responsibilities and advising the President on a nominee for Chief Justice of the Supreme Court.

I must say the work done now by all of these Senators in a bipartisan effort to gain this information I think is commendable in an area of enormous importance to our national security.

I join in commending all of those who have spoken now during these past few moments because I think it is very significant service to this institution and to our country.

I thank the Senator from Maryland for yielding.

□ 1400

AMENDMENT NO. 2355

(Purpose: To require that any United States Government support for military or paramilitary operations in Angola be openly acknowledged publicly debated)

Mr. MATHIAS. Mr. President, I call up amendment No. 2355.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Maryland [Mr. MATHIAS], for himself, Mr. LEAHY, Mr. BRADLEY, and Mr. SIMON, proposes an amendment numbered 2355.

Mr. MATHIAS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new title:

TITLE —

SECTION 1. DECLARATION THAT ANY SUPPORT FOR MILITARY OR PARAMILITARY OPERATIONS IN ANGOLA SHOULD BE OPENLY ACKNOWLEDGED AND PUBLICLY DEBATED.

The Congress finds that the United States Government should support military or paramilitary operations in Angola only if the provision of that support is the openly acknowledged policy of the United States. It is, therefore, the sense of the Congress that the United States Government should not provide any such support until the President has publicly informed the Congress and the American people that United States Government support for military or paramilitary operations in Angola is important to the national security and the Congress has approved such support.

SECTION 2. ENSURING THAT SUPPORT IS OPENLY ACKNOWLEDGED.

(a) ANY SUPPORT MUST BE OPENLY ACKNOWLEDGED.—During fiscal years 1986 and 1987, a department, agency or other instrumentality of the United States Government may obligate or expend funds—

(1) to conduct, directly or indirectly, military or paramilitary operations in Angola, or

(2) to provide any financial, material, or other assistance, directly or indirectly, to any group engaged in military or paramilitary operations in Angola,

only if the use of funds for that purpose is the openly acknowledged policy of the United States Government, as determined in accordance with subsection (b).

(b) PRESIDENTIAL REQUEST AND CONGRESSIONAL APPROVAL.—In order to ensure that any United States Government support for military or paramilitary operations in Angola is openly acknowledged, funds may be used for the purposes described in subsection (a) only if—

(1) the President determines that United States Government support for military or paramilitary operations in Angola is important to the national security and submits to the Speaker of the House of Representatives and the President of the Senate a request that the Congress approve openly acknowledged United States Government support for those operations; and

(2) the Congress enacts a joint resolution approving United States Government support for military or paramilitary operations in Angola.

Any such support may be provided only to the extent permitted by that joint resolution.

(c) INTERPRETATION OF LIMITATION.—Nothing in this section should be construed to prohibit the obligation or expenditure of funds for—

(1) United States diplomatic activities;

(2) activities of the United States Armed Forces which are reported to the Congress pursuant to section 4(a) of the War Powers Resolution; or

(3) assistance provided through the United Nations High Commissioner for Refugees or the International Committee of the Red Cross.

(d) RELATIONSHIP WITH OTHER LAWS.—The requirements of this section may not be waived under the authority of any other provision of law. This section supercedes any provision of law which might otherwise be construed to allow funds to be used for the purposes described in subsection (a).

Mr. MATHIAS. Mr. President, I anticipated we would call up this amendment last night. But we had reached the point in the debate when the chairman of the committee said that thereafter we would be dealing with cats and dogs. Since this amendment did not fit into the category of either a cat or a dog, that it might be more analogous to an alligator, therefore, I thought we better hold it over until today.

Mr. President, we have covered a lot of ground on this bill thus far, and I congratulate the chairman of the committee, I congratulate both managers of the committee.

Mr. President, we have gone from defense needs to arms control to homeporting. We have discussed conventional and nuclear arms, unconventional warfare and what is now termed "low intensity conflict." At the initiative of the Senators from Maine and Georgia, we have moved to enhance the coordination of special operations forces that might be needed in high-intensity and low-intensity conflicts.

Mr. President, I would like to discuss briefly one high-intensity conflict in which the United States is beginning to insert itself more and more deeply—as yet without very much congressional consideration. I might say without proper congressional consideration.

I am referring to Angola, a vast, mineral-rich country in southern Africa which is in the throes of an escalating civil war, a civil war which has complex origins in the protracted collapse of the last colonial empire in Africa, a civil war into which both Superpowers were drawn in the 1970's and now seem to be drawn again in the 1980's.

The United States has only recently switched from a role of active mediation in Angola and the region's disputes to that of indirect participation on one side. We have done so, incredibly, without congressional debate, without full consideration, without any public attention, by the increasingly popular device of "covert aid."

Covert action and covert aid amount to the conduct of foreign policy and sometimes conducting war by clandestine means. As such, in a difficult and dangerous world, they have a place in our foreign policy—though on a sharply limited plane.

For example, covert activities should pass a number of stringent tests before they go forward. They must not violate the law; they must be adopted only after all above-board options have been exhausted; and they must form part of a coherent policy which contributes to realistic objectives and national interests.

Covert aid or covert action must, at a minimum, be covert.

It is perfectly ridiculous to talk about overt-covert aid and yet that is what has been happening in our involvement in Angola.

In recent months, Jonas Savimbi, the leader of one faction which opposes the government of Angola, has been wined and dined in Washington. He has been received at every official level. The President of the United States has expressed overt support for covert aid. An American public relations firm has acquired a contract worth hundreds of thousands of dollars—probably our dollars to promote UNITA—publicly and privately.

So I think we can all say that the option of covert assistance in Angola is a tenuous one.

It may be an option that just does not exist any more. We could call it, perhaps, partially disguised aid, or we can say it is unpublicized aid, or we can call it a number of other things. But I do not think we can call it covert.

Let us face it. Beyond a vague, fingers crossed hope that other African nations will not notice, the main effect of continuing to label the provision of weapons and other aid to UNITA is to exclude the Congress from a full and direct role in an important matter.

The intelligence committees review covert actions, but have very restricted power—not the authority essential for discussing and developing a credible policy over the long run. Under the Constitution, Congress has the power to declare war and appropriate funds for defense and foreign policy. Certainly, under these terms, the supply of military material in Angola, apparently including Stinger missiles, amounts to a major shift in American foreign policy—one in which Congress should be directly involved.

Without discussing Angola at length, without raising complex issues such as the extent to which we align ourselves with the government of South Africa at a most inappropriate time or the best strategy for promoting stability in the region, the case for full discussion is sound and compelling.

And that really, Mr. President, is the principal objective of this amendment—that assistance to UNITA be openly acknowledged through a request for funds, be fully debated and be put to the ultimate test, a vote in this Chamber.

Little more than a decade ago, we intervened in Angola—covertly. And what happened? Without clear goals, with little understanding of the dynamics of the collapse of a moribund colonial rule, we intervened with very little preparation and less commitment.

Today, supporters of aid to UNITA argue that the climate is different, that the cause is simple and just, that we are ready now to make a long-term commitment to stick it out.

But through this amendment, I ask—and my cosponsors ask, the distinguished Senator from Vermont [Mr. LEAHY], the distinguished Senator from New Jersey [Mr. BRADLEY], and the distinguished Senator from Illinois [Mr. SIMON]—in this particular region are we ready for a long-term commitment?

I am confident that if we all examine the circumstances more closely—instead of labeling it covert and looking the other way pretending that we are not noticing what is happening—our policy will compel us to move in another direction. Without beginning to answer them in detail, I might just ask a few pertinent questions.

For example, do we really want to align ourselves with the Government of South Africa in this way at this time? How can we expect the South Africans to respect our determined opposition to apartheid as long as we are cooperating with them on what they perceive as a critical security matter?

Do we believe that we can help bring about a withdrawal of Cuban troops by taking sides and raising the level of the confict militarily? A year ago, the United States was accepted, accepted as the key mediator in the region's conflicts. Today, after the decision to intervene actively, if covertly, the Angolans refuse to talk to us.

Is UNITA really in danger of defeat, as some supporters of covert aid argued after last year's Government offensive? Intelligence reports would suggest otherwise.

We must continue to seek a negotiated solution to these conflicts, and UNITA remains a central factor in these negotiations. UNITA and the people it represents deserve to participate in the Government of Angola, and I have no doubt, will do so.

Many other questions need to be addressed before we intervene in Angola in this manner. We should debate them, we must debate them.

It is ironic: If constructive engagement had been more effective, South African troops would not be invading Angola and other states at will. And Angola, which has expressed interest in ridding itself of 30,000 Cubans, might be more willing to do so.

The United States, the most powerful and economically influential nation on Earth, has a lot more to offer small, developing nations such as Angola than Stinger missiles. The leaders of Angola may have no more interest in a long-term alliance with the Soviet Union than many other African states that have gone through this politically bankrupt and economically stagnating experience—and pulled away. In complex, Third World conflicts such as this, we have tremendous diplomatic and economic assets to use without turning to military force—overtly or covertly.

Whatever we decide to do, we certainly ought to talk about it—very soon.

Mr. LEAHY. Will the Senator yield?

Mr. MATHIAS. Yes.

Mr. LEAHY. Mr. President, I commend the distinguished Senator from Maryland for his statement. As usual, he shows a sense of history, a sense of conscience, and also does, as so often should be done in this body, point out to all of us on both sides of the aisle that we ought to determine just where we are going by our policies, asking those questions that unfortunately too often we ask after the fact when we wished we could have undone something we had done.

□ 1410

He has once more shown the wisdom that we are accustomed to in this body from him and that the people of Maryland are accustomed to from him.

Mr. President, I am concerned that we see this proliferation of so-called covert actions around the world, especially when we have covert actions that are announced at Presidential news conferences and are talked of openly by people in the administration. Those of us who have the responsibility of oversight in intelligence matters find, more often than not, that we read more facts about these intelligence matters on the front pages of the New York Times or the Washington Post or the Wall Street Journal in the morning than we ever do in intelligence briefings.

That is not the way to run covert operations. But it is worse than that. It is a policy whereby this country is more and more substituting covert action for a foreign policy. There has never been a time in the history of this Nation when we have successfully substituted covert action for foreign policy. It also, I think, puts in people's minds that all covert actions must be matters that we openly discuss and have on the front pages of the paper. I think that is creating an enormous problem for our intelligence agencies.

Obviously, the United States, as a major power in the world, will have secret actions, intelligence actions, covert actions around the world, which must, for our own national security and the national security of our allies, remain secret. So it does not make sense to me to have a White House that announces what they call a covert action and bring people to the White House—like Jonas Savimbi—talk to them, allow them to have $600,000 to hire Black, Hannaford & Stone, but then say, "This is secret, we cannot debate it." We can only talk about it when Black, Hannaford & Stone comes in, we can only talk about it when the White House wants to discuss it, we can only talk about it on backgrounders by the State Department or the White House for reporters, but do not debate it in Congress.

Our amendment, which I support, along with Senators MATHIAS, BRAD-

LEY, and SIMON, is identical to one proposed in the House of Representatives by Mr. HAMILTON, the chairman of the House Permanent Select Committee on Intelligence. The House version is also expected to be included in the fiscal year 1987 intelligence authorization bill that will be reported shortly by the House Intelligence Committee. In all likelihood, this provision will pass the House of Representatives as part of its intelligence bill.

Mr. President, I will not repeat again all the arguments for or against supporting the UNITA guerrillas of Jonas Savimbi in Angola.

The fact is that UNITA has continued as a guerrilla movement in Angola since before that country's independence in 1975. It remains locked in an interminable and bloody conflict with the winner in the struggle against Portuguese colonial rule in Angola—the MPLA.

It is no secret to anyone who reads the newspapers that the administration has decided to provide assistance to UNITA in its fight against the MPLA. The President, the Secretary of State, and senior officials in the State Department and other departments and agencies have all made repeated public references to this program. Then why not follow the suggestion of the Senator from Maryland. The President actually received Mr. Savimbi in the White House, and Savimbi subsequently expressed satisfaction with the assurances he had been given, apparently those covert assurances we cannot debate here. We have also been treated to the usual succession of deliberate leaks from executive branch sources promoting this involvement.

My strong view is that the United States should not help Savimbi continue his guerrilla war. It is simply not clear to me that United States support to UNITA would meaningfully advance United States interests in southern Africa. UNITA's conflict with the MPLA has raged for more than a decade and Savimbi has received support from a variety of outside sponsors over the years, including the Soviet Union, Cuba, China, South Africa, and lately, the United States. Basically, Savimbi will take aid from whomever will give it. In the 1970's when it was the Soviets and the Cubans paying the bills, he was a Marxist. Now, he has seen the light of capitalism. Savimbi understands us so well he is paying one of the best known lobbying firms in Washington $600,000 to sell the right image in the corridors of power on Pennsylvania Avenue and Capitol Hill.

The question of whether to aid Savimbi is a major policy issue for the United States. It is not something that can be tucked away in an intelligence budget. Only last year, Congress repealed the Clark amendment which prohibited assistance to factions within Angola, after the abortive U.S. involvement with the now-moribund FNLA group just after independence. Providing assistance to UNITA now would tend to align the United States with the Government of South Africa at very much the wrong time. It would in all probability make it more, not less, difficult to achieve fundamental United States goals in the region such as the withdrawal of Cuban troops from Angola, gaining the independence of Namibia, and inducing an end to apartheid and a process of peaceful change to majority rule in South Africa. It threatens to further alienate the United States from the black African states which are already upset with the administration's thoroughly discredited policy of "constructive engagement" with South Africa.

Assistance to UNITA is the latest expression of efforts by ideologues in the administration to commit United States power in so-called low-intensity conflicts in the Third World which they see as manifestations of global competition between the United States and the Soviet Union. We hear much about a "Reagan doctrine" of sponsoring insurgencies against Marxist regimes throughout the world. This is linked to another theory that the United States must engage in a period of "low-intensity warfare," which includes not only legitimate and necessary responses to international terrorism but also anti-Communist insurgencies throughout the world that would involve the United States both directly and indirectly.

Mr. President, supporters of aid to UNITA argue that the United States must more actively use its military power to resist and even to destroy Marxist regimes in the Third World. But even if one were to accept that such a doctrine made sense, to be sustainable it would have to have the support of Congress and the American people and serve clearly understood policy goals. Again, what we need is a foreign policy, not a covert action policy. As with the Contras in Central America, I fear that there are no such clear objectives for support to UNITA. Is it to pressure the Angolan Government to request Cuban withdrawal? If so, that is a most unlikely outcome of a policy which mounts an even greater military threat to the MPLA regime. Is it to reassure the South African Government that the conditions are right for granting real independence to Namibia? In that case, recent statements of the South African Government scarcely give cause for optimism. Is it to overthrow the MPLA regime? The current regime is widely recognized throughout the world, including in Africa, as the legitimate Government of Angola. Or is it simply to put pressure on that regime to reach an agreement with UNITA, consistent with U.S. objectives in the region? From all that I know, a reconciliation between the MPLA and UNITA, especially in the presence of Savimbi, is highly unlikely.

These issues cannot be resolved if the President were to rely on a secret aid program carried out without the express approval of Congress. Providing assistance to UNITA through covert channels would impede open discussion of the policy issues and preclude gaining informed public support. It also prevents full and informed congressional debate. And very important for this Senator, it would not make the elected representatives of the people stand up and vote, and be held accountable at the ballot box.

Everyone could go home and say, "Well, I have some strong views on this, very strong views. It is a very serious matter on both sides." "How did you vote, Senator?"

"Well, you know, that is covert action; we don't have to tell about that, we don't have to talk about it."

I do not think that is being responsible. Our amendment would insure accountability.

Mr. President, our amendment would ensure such discussion and accountability by requiring the President to acknowledge openly any proposed assistance to UNITA. It would provide for full debate by requiring a joint resolution in order to authorize such activities. The joint resolution procedure would not be unduly burdensome since the resolution could be attached to other legislation requiring the attention of the House and Senate.

I would urge my colleagues to consider carefullly the issues that are at stake in this matter, and to support the right of Congress and the public to participate in the resolution of this important issue.

Those are the issues. Mr. President, do we substitute covert action for foreign policy? Do we make it possible for the 100 Members of the U.S. Senate never to have to vote on this issue, one of the major foreign policy issues facing the country? Or do we openly debate it, openly discuss it, then let the majority rule? After all, that is really what our democracy is based on.

I applaud the Senator from Maryland for raising this question. I yield back to the Senator from Maryland.

Mr. HART addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. HART. Mr. President, I wish to join the Senator from Maryland in offering this amendment. Leaving aside the question of what one thinks our foreign policy in Africa, specifically in Angola, ought to be, the Senator from Maryland has put his finger on a very important tide and trend, a very disturbing trend in American foreign

policy in recent years. That is, as the Senator from Maryland says, covert operations without the open debate and support necessary to carry those operations out. I think one has to go back to Jefferson to understand the importance of public debate and public support and consensus for any policy in this country, particularly with regard to other nations in the world.

There is something sort of fishy, Mr. President, about a policy that cannot be brought to the floor of the U.S. Senate or taken to the American people overtly and publicly debated and consensus formed on a bipartisan basis to carry out that policy. If this approach, this overt-covert approach were being used in one country only, some argument might be made that there is a peculiar necessity, given the culture, history, or politics of that nation. But there is, as I say, a disturbing trend, even a tide running in American foreign policy in the United States in the 1980's that we are conducting more and more of our policy in that way. It is increasingly military. It is increasingly covert, but it is increasingly asking Members of Congress to support overtly a covert policy. I do not think we can have it both ways, whether we are talking about Angola or Central America or anywhere else. There is something therapeutic, there is something that is honest about a Chief Executive and Secretary of State coming to the Congress of the United States overtly declaring what our policy is and what its intentions and aims are and seeking overtly the conscious support of the American people through their elected representatives.

Leaving aside how one feels about the specifies of Angola or leaving aside how one feels about the specifies of Central America, I think this country will regain its honor in international relations when we feel strongly enough in terms of our own domestic politics about overthrowing some foreign government or supporting some insurgency force that we are willing to declare that support openly and provide that support openly and have a debate among the American people if that is in fact what they want their foreign policy to be. If there is some extreme necessity for some covert operation as far as the national security of the United States is involved, where lives of Americans are involved, and where those extraordinary circumstances prevail where we just cannot afford to have that kind of public debate, I think Members of Congress will understand that and the American people will understand that. That is not what we are talking about in Angola and it is not what we are talking about in Central America. That is overt foreign policies that are overtly debated and overtly supported by the United States and those are the policies that will stand this country in good stead and sustain a consensus over a number of months and years instead of seeing that support wax and wane.

I commend the Senator from Maryland on offering this amendment. I hope it becomes a hallmark of all of our foreign policy conducted throughout the world.

Mrs. KASSEBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, I should like to address for a moment the amendment offered by the Senator from Maryland [Mr. MATHIAS] and the interesting observations that have been made by the cosponsors, Senator LEAHY and Senator HART.

This amendment does address a very serious problem and a serious issue, and I think it is really a question of how and when we use covert aid as an instrument of our foreign policy. Tension on this particular facet of the debate has grown over recent years, and I think it is because it is between public policy which we made very visible and very articulate and our covert policy, and as these collide the tension has become very acute.

I think none of us would question the importance of covert activity as part of our policy. I think, though, that what we must debate and what we must fully understand is how we do indeed keep it covert, keep it accountable and responsible and specific to the issue before us.

Mr. President, regarding the amendment as presented today, however, I think it is the wrong time and the wrong place for us to have this debate. As we analzye the role of covert-overt activity in our foreign policy, we must be able to do it in such a way and in hearings over a period of time that are classified and closed so we can give some thoughtful and responsible attention to it.

The problem is not only in Angola, as has been stated before. It is in our overall approach to covert policy. I think that the answer really does not lie in discussing programs openly that are handled covertly, and the amendment before us, it really seems to me, is attempting to reinstate the Clark amendment which we repealed last year overwhelmingly by a vote of 63 to 34.

Our policy over the past couple of years I think is only serving to undermine the use of covert activity as a type of aid in our foreign policy, and if we cannot conduct a debate and analyze how we can use the two, covert and overt, without an open debate arguing whether it should be covert or overt, I think we fail on both counts. That is why I believe that raising this amendment, debating it to a certain extent, as we have today, is exceptionally useful and important.

I am wondering if the authors of the amendment, which I know feel a deeper review is important, would consider having a closed hearing in which this can be thoroughly explored. The chairman of the Foreign Relations Committee, Senator LUGAR, has authorized me to say that he would be prepared to schedule a classified briefing for the Committee on Foreign Relations on the kind, extent and duration of U.S. support for paramilitary operations in Angola, and I would like to add I think it is important perhaps for us to take it even beyond that in some thoughtful analysis of just exactly how we do handle overt support but covert strategy.

Mr. HART. Will the Senator yield for a question?

Mrs. KASSEBAUM. I am happy to yield.

Mr. HART. Why would that hearing have to be a classified hearing?

Mrs. KASSEBAUM. It seems to me that certainly part of it would have to be classified in order to hear reports and activity that is ongoing, that is important on which to have background information. I do not think all of it should be classified. I think certainly some of it should be, and I know it is the desire of the chairman of the Foreign Relations Committee to be able to have available all of the information that is possible.

Mr. HART. Is the distinguished Senator from Kansas aware of national security implications in Angola that cannot be discussed publicly before the American people—for instance, security of the United States?

Mrs. KASSEBAUM. I think there are some aspects of our policy which we should review as a committee that should be on a classified basis. I think it is essential it be done so that we can determine as a committee then what indeed can be openly and ultimately discussed. It is a very sensitive area and region, as the Senator from Colorado knows, and I think it is important for us in a responsible committee to be able to get a look at the classified material in such a way that it would be the basis for judgments of what should be part of an open hearing.

Mr. HART. I appreciate the customarily thoughtful response of the Senator from Kansas. I must say, as a veteran of the Armed Services Committee and a former member of the Intelligence Committee, I am aware of no fact having to do with our operations in Angola that somehow relate to the national security of this country that could not be discussed in open hearing.

Mrs. KASSEBAUM. I yield the floor.

Mr. SIMON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Mr. President, just very briefly, I strongly support this amendment. I think there are four points we ought to keep in mind. First, the United States should not be involved in overthrowing governments in other countries, period. If we try to overthrow the governments we do not like, that is about two-thirds of the governments on the face of the Earth. We are going to have our hands full. Second, what this does is to reinforce an image and get us into trouble in all kinds of other places. When the CIA and the United States in one way or another gets involved in these kinds of covert or overt attempts to overthrow governments and create problems within a country, it reinforces the image of the CIA being involved everywhere, and any time anything happens people say, "It's the CIA" and it becomes believable. We should not be involved in this kind of thing. Third, it hurts in Africa, everywhere.

□ 1430

Who is aligned with this group? Two countries—South Africa and the United States of America. I do not think that is the image we ought to be creating.

Finally, I had a discussion—after an article appeared in, I think, the Washington Post a week or 10 days ago, whenever it was—with one of my colleagues about some of the terrorist activities; and my colleague said—and these are his words: "Yes, but these are our terrrorists."

I do not want any terrorists on our side. I do not want to be involved in that. I do not think the American people do. I think it is a blunder. We ought to be using every possible diplomatic means to solve these problems, but let us not take this kind of action.

I strongly support this amendment.

Mr. THURMOND. Mr. President, I rise in opposition to the amendment offered by my distinguished colleague from Maryland. This is the second time that an amendment relating to possible U.S. covert activities has been brought up for debate on this bill.

It is clear that the intent of this amendment is to end aid for democratic resistance movements under what has become known as the Reagan Doctrine. The proper arena for a discussion of this kind is in the Intelligence Committee because it is in the best interest of our Nation that certain sensitive activities not be made public.

I regret that the sponsors of this amendment are advocating a measure to open intelligence activities to public scrutiny. This could ruin the effectiveness of these activities.

Mr. President, the intent of the amendment is not to show public support for democratic resistance movements, it is to destroy a very effective tool of our foreign policy. The freedom fighters in Angola will derive no benefit from this amendment. They already have the support of a majority of Americans.

Mr. President, I urge all of my colleagues to vote against the pending amendment.

NEED FOR DEBATE ON AIDING ANGOLAN INSURGENTS

● Mr. BRADLEY. Mr. President, U.S. involvement in an ongoing military conflict raises difficult and important issues for our foreign and national security policy. Any continuing covert assistance to insurgent forces in Angola is also likely to become highly controversial. It would commit American resources and prestige to one side in a long civil war. Yet, the Senate has not decided whether the United States should take sides in this war. Nor has it said what our aims should be if we do. Should we lead UNITA to rely on our continuing support without indicating clearly the extent or limits of our commitment? Should we allow South African authorities to identify the United States with their interests in Namibia or Angola? Would any covert assistance to UNITA serve U.S. interests in promoting peaceful change and progress toward democracy in southern Africa? These are among the questions that the Congress should address before enacting an important and potentially controversial covert paramilitary assistance program in Angola.

An open debate on these policy issues is not only essential, it is also feasible. The merits of a covert paramilitary assistance program can be discussed openly, as in the debate over U.S. support for the armed democratic resistance in Nicaragua. This debate did not impair U.S. policy in the region. Nor did it reduce the responsibility of the Senate Select Committee on Intelligence for overseeing the activities of the U.S. intelligence community. To the contrary, it has strengthened the basis for effective oversight. By classifying the aims and limitations of congressional support for the administration's program, open debate has instead helped the committee to develop standards for overseeing covert paramilitary support to the Nicaragua resistance. It has also helped to focus the administration on the requirements for greater economic assistance to strengthen the fragile democracies of Central America.

I believe a debate on any continuing covert assistance program of paramilitary support in Angola would serve similarly desirable goals. It would demonstrate whether or not there is enough support to sustain a program of assistance and if so, it would establish a framework for critical oversight. In the event Congress makes clear its lack of support for current policy, it would limit the costs and risks of deepening an unpopular and ultimately unsustainable engagement. So regardless of one's position on the merits of aiding UNITA—and I personally believe it to be wrong—an open debate on whether the United States should take sides in this war would clarify and promote U.S. interests in southern Africa.●

● Mr. KENNEDY. Mr. President, I commend Senator MATHIAS and Senator LEAHY for introducing this amendment, and I think the Senate should take special note that this amendment is being cosponsored by the ranking member of the Senate Select Committee on Intelligence, Senator LEAHY.

I support this amendment for two reasons: first, the issue of providing assistance to the UNITA forces inside Angola is of sufficient importance to the American people that it should not be decided in the back rooms and darkened corridors of the Central Intelligence Agency; it deserves full and open debate in the sunshine of the American democracy; and second, I believe that the idea of U.S. assistance to UNITA is so unwise and wrong headed that any full and open debate of this issue will inevitable result in its defeat.

I oppose U.S. assistance to UNITA because it will damage United States interests in severely Africa and because it will be counterproductive to our efforts to reduce and eliminate Cuban and Soviet influence in that area of the world.

Supporting UNITA will place us in a de facto alliance with South Africa. It will undermine U.S. efforts to assist the antiapartheid forces inside South Africa, pit us against all the other nations of Africa, and increase anti-American feeling throughout the African Continent. In July 1985, the heads of state of 51 countries in the Organization of African Unity issued a statement in which they said that any U.S. aid to UNITA would be considered a hostile act against the Organization of African Unity.

Supporting UNITA will force the Government of Angola into even greater dependence upon Soviet and Cuban military assistance.

Supporting UNITA will involve the United States in what could be an open-ended and expensive commitment in another distant civil war to a side that has no realistic prospect of military success—as U.S. intelligence estimates confirm.

There is no serious student of African affairs that believes that support for UNITA is wise policy. In fact, the Assistant Secretary of State for African Affairs, Chester Crocker, based his entire approach to Angola on the premise that the United States could play the role of mediator and honest broker between the parties. If we provide assistance to UNITA, that role is over. The most astonishing thing, perhaps, is Chester Crocker's apparent desire to carry on when his Southern

Africa policy—even with respect to Angola—is in such a shambles.

The energy behind the movement to provide assistance to UNITA comes from a small band of right-wing extremists that looks at the world through the prism of the East-West competition. They believe that, no matter who, no matter where, the United States should insert itself into the internal conflicts of other countries, and they warn that if we do not, the Soviet empire will only be expanded at our expense.

This of course is a simplistic and uninformed view of world affairs, and it should not be allowed to guide our foreign policy.

I ask that an article by Jay Peterzell that appeared last February entitled: "Angola: Reagan's Covert Action Policy VI" be included in the RECORD.

The article follows:

ANGOLA: REAGAN'S COVERT ACTION POLICY VI

(By Jay Peterzell)

Unlike old soldiers, some bad ideas neither die nor fade away. Instead, they become ludicrous. One such idea is that it is in the interest of the United States to send military aid secretly to insurgents in Angola.

America's last significant intervention in Angola, during that country's 1975-76 civil war, was criticized at the time as serving no compelling purpose, and Congress prohibited further covert paramilitary assistance to any faction in Angola with the enactment of the Clark Amendment. Last year, that restriction was lifted. Although senior officials assured Congress that they sought the repeal only as a matter of principle and did not plan to use the new authority, the Administration has now announced that it intends to provide a reported $10-15 million in material and military aid "covertly" to anti-government guerrillas of the Union for the Total Independence of Angola (UNITA). A presidential finding authorizing the aid was submitted to the House and Senate intelligence committees in December, and a decision to begin providing such support is said to have been made in late January by the White House during a visit to Washington by UNITA's leader, Jonas Savimbi. Officials have also indicated that they may seek congressional approval of a much larger program of as much as $200-300 million following this initial step. A number of conservative groups have said that securing effective U.S. support for UNITA will be their primary foreign policy goal this year and have vowed to make the issue a "litmus test" for future support to conservative politicians.

Advocates of aid to Savimbi all make one or more of the following assumptions:

UNITA deserves U.S. aid because, as Representative Jack Kemp wrote recently in a letter to Secretary of State George Shultz, the group shares "our commitment to democratic government and open political societies."

With American backing, UNITA can force, or at least exert pressure leading to, the withdrawal of Cuban troops that have been in Angola since 1976 at the request of the Angolan government.

Savimbi can overthrow the Angolan government, now dominated by the Popular Movement for the Liberation of Angola (MPLA), or can force the MLPA to share power with UNITA.

But the recent history of Angola suggests that none of these assumptions is true.

By all acounts, UNITA is ideologically indistinguishable from the MPLA. Its human rights record is somewhat worse than that of its rival.

Moreover, the main effect of U.S. aid to UNITA would not be to force Cuban troops to leave Angola but to disrupt the Reagan Administration's most promising diplomatic initiative to date: the State Department's unflagging effort to negotiate the withdrawal of Cuban troops from Angola in exchange for an end to South Africa's repeated invasions of Angola and to its decades-long military occupation of Namibia, which lies between Angola and South Africa. The Angolans have agreed on several occasions to send the Cubans home if South Africa withdraws from Namibia. The MPLA has also agreed to the other major element of the U.S. plan—an end to infiltration into Namibia by Angolan-based guerrillas of the South-West Africa People's Organization (SWAPO), which is fighting for Namibian independence, in exchange for an end to South African support for UNITA. The effect of a significant program of U.S. aid to Savimbi would be to threaten the government of Angola so that the MPLA will no longer be willing to ask the Cubans to leave. And even a smaller, less-effective program would end the United States' role as an independent broker in the region.

American aid to UNITA would also cast the U.S. as an ally of South Africa in two ways. First, by association: South Africa has for years been the major backer of UNITA and its troops now fight side-by-side with UNITA's in Angola. Second, by result: U.S. actions would inevitably be judged by their effect—that is, they would be seen as an effort to keep Cuban troops in Angola so that South Africa will have an excuse for continuing its occupation of Namibia.

Finally, it is unlikely that Savimbi will come to power through military pressure whether or not there is a regional settlement. Recent CIA and State Department analyses reportedly concluded that Savimbi has no chance of defeating the MPLA and no chance of joining a coalition government. (The Defense Intelligence Agency was more optimistic, apparently based on the notion that there could be a pro-UNITA coup within the MPLA.) Indeed, even Savimbi himself admits he cannot topple the current government in Angola by force of arms. If Cuban troops stay in Angola, they can effectively defend the current government. If they leave, it will be in connection with the departure of South Afican troops from Namibia. But this would cut off UNITA's access to the constant supply of South African petroleum, materiel and direct combat support that is responsible for much of its recent success—and for its ability to operate outside its traditional area of control in southeastern Angola. It might be argued that a South African withdrawal would leave UNITA too vulnerable and that the group would then need assistance from American or other sources in order to survive. But that development is in the future. And even if South Africa were to stop supporting Savimbi, it is not clear why he is an American responsibility.

Indeed, official and conservative support for UNITA probably has less to do with UNITA itself—the group's slogan is "Socialism, Negritude, Democracy and Nonalignment"—than with opposition to the United States' 1976 withdrawal from Angola. The Clark Amendment was arguably the clearest example of the "Vietnam syndrome" at work, and aid to Savimbi has become an important symbol for those who favor U.S. intervention against left-wing governments in the third world.

The appropriateness of such intervention on a global scale has been put forward recently by senior Administration officials, including the President. In his 1985 State of the Union address, President Reagan said: "We must not break faith with those who are risking their lives—on every continent, from Afghanistan to Nicaragua—to defy Soviet-supported aggression and secure rights which have been ours from birth." He became more specific in a speech before the United Nations last November, vowing to give "America's moral and material support" to resistance movements. And several weeks ago, in the 1986 State of the Union address, he combined the two pledges. "You are not alone, freedom fighters," the President said.

"America will support with moral and material assistance your right not just to fight and die for freedom, but to fight and win freedom—in Afghanistan; Angola; Cambodia; and Nicaragua."

Angola has thus become an early test for this emerging Reagan Doctrine.

A kind of institutional momentum may also be a factor in the U.S. government's attachment to Savimbi. A comprehensive review of domestic and foreign press reports since 1976 suggests that the option of resuming support to UNITA was deliberately kept alive by both the Carter and Reagan administrations and that modest U.S. assistance may have been provided to the group during this period in violation of the Clark Amendment.

BACKGROUND AND HISTORY OF THE ANGOLAN CIVIL WAR

One of the earliest European colonies in Africa, Angola was ruled by the Portuguese from the sixteenth century until 1975. Three guerrilla movements fought for Angolan independence in recent years and received backing from various outside powers.

The Popular Movement for the Liberation of Angola (MPLA), founded in 1956, is based ethnically in the Mbundu tribe of northern and central Angola and the mestizo population of Luanda, Angola's capital. Between 1957 and 1973, the MPLA received three-quarters of its outside aid from the Soviet Union. The group also received aid from the Organization of African Unity (OAU) and from Scandinavian countries.

The National Front for the Liberation of Angola (FNLA), founded in 1962, was based ethnically in the Bakongo tribe of northeast Angola, from 1961 to 1969, the leader of the FNLA, Holden Roberto, reportedly received funds and weapons from The CIA. After 1969, U.S. assistance to Roberto fell to a yearly stipend of $10,000 for "intelligence-gathering." In 1974, the CIA reportedly resumed funding of the FNLA for paramilitary operations, and the group became a major recipient of covert American aid during the 1975 Angolan civil war. Prior to 1975, the FNLA also received significant support from China and Zaire, as well as limited aid from the OAU, Yugoslavia, Tunisia, Nigeria, Algeria, India and Uganda. During the mid-1960's, Roberto also sought aid from the Soviet Union and Cuba.

The Union for the Total Independence of Angola (UNITA) was founded in 1969 by Jonas Savimbi. Originally a member of the FNLA, Savimbi broke with Roberto, denouncing him as an agent of the United

States and criticizing the FNLA for its refusal to cooperate with the MPLA. UNITA's ethnic base is in the Ovimbundu tribe of south-east and central Angola. Its main source of arms prior to 1975 was China, although in the 1960s Savimbi also sought assistance from the Soviet Union, North Korea and North Vietnam.

The decisive event in winning Angolan independence was a 1974 coup in which the Caetano government in Portugal was overthrown by a group of left-leaning military officers. In July, the new Portugese government set up a five-man junta to administer Angola's affairs pending independence. In January 1975, the MPLA, FNLA, UNITA and Portugal signed the Alvor Agreement establishing a coalition government in which the four parties were to share power, with elections to be held in October leading to full independence in November. But the prospects for peaceful political competition quickly broke down. In February 1975, the FNLA attacked the MPLA's headquarters in Luanda, and during the remainder of the year the United States, the Soviet Union, Cuba, South Africa and other outside powers intervened on a major scale in an attempt to decide by military means which faction would take power in Angola. In February 1976, the MPLA-led People's Republic of Angola which had been received by 28 African countries by then, became a member of the Organization of African Unity.

A great deal has been made of the breakdown of the Alvor Agreement. In the view of UNITA and its supporters in the United States, the MPLA government is illegitimate because it came to power outside the framework of this accord. According to UNITA's foreign minister Jeremias Chitunda, the problem of Angola.

"All started in 1975 when a Cuban expeditionary force was sent to install in power in Angola the MPLA, the long-time Moscow protege thereby torpedoing completely the orderly decolonization of Angola by Portugal. This decolonization process was already in progress and duly enunciated in the Alvor Agreement. . . .

"But the preliminary surveys having repeatedly indicated that the MPLA would receive no more than 20 percent of the votes . . . and the Soviets being naturally averse to pluralistic democracy, Moscow decided to put its protege . . . in power by force.[1]

Of course, the fragile 1975 Alvor Agreement has limited relevance as a basis for political legitimacy in a country with no history of independence or democracy—and the MPLA's alleged violation of the agreement would hardly justify U.S. intervention eleven years later. It is true, however, that—although Chitunda exaggerates the figures—UNITA was expected to win a plurality in the 1975 election. This was because the Ovimbundu, which UNITA represents, comprises nearly 40% of Angola's population and is the nation's largest ethnic group. It is also true that the Ovimbundu are now unfairly excluded from playing a significant role in the Angolan government. In fact, it is this exclusion, and not violations of the Alvor Agreement or the presence of Cuban troops, that forms the legitimate basis for Savimbi's complaint.

Nonetheless, the MPLA's alleged refusal to abide by the Alvor Agreement is frequently cited now as justifying outside intervention against the government of Angola. So it is important to understand why the accord broke down.

According to John Marcum's The Angolan Revolution, the Soviet Union suspended aid to the MPLA in 1973 because a bitter split had developed in the leadership of the organization. Soviet assistance to the MPLA did not begin again until this internal dispute was resolved in the fall of 1974.

According to John Stockwell's account of the CIA's role in the Angolan civil war, In Search of Enemies, the CIA resumed funding to Holden Roberto of the FNLA on July 7, 1974—several months before the Soviets began sending what Stockwell says the CIA believed to be "limited amounts of arms to the MPLA." He writes that the FNLA had also received significant supplies of arms and over 100 military advisers from China between 1973 and mid-1974.

Exactly a week after the Alvor Agreement was signed, Stockwell writes that the National Security Council committee responsible for covert action:

"Authorized the CIA to pass $300,000 to the FNLA, which was historically the most warlike of the movements and which was thought to have the largest army. In February 1975, encouraged by [Zaire's President] Mobutu and the United States, Roberto moved his well-armed forces into Angola and began attacking the MPLA in Luanda and northern Angola. In one instance in early March they gunned down fifty unarmed MPLA activists. The fate of Angola was then sealed in blood."

Indeed, Soviet escalation in Angola appears to have followed and not provoked American actions in the civil war. Stockwell says that significant Soviet arms shipments to the MPLA did not begun until March 1975, well after the U.S. had begun to provide large-scaled assistance to the FNLA. Moreover, in July, the NSC directed the CIA to provide an additional $30 million in aid, this time to be split evenly between the FNLA and UNITA, which by now had been drawn into the conflict against the MPLA.

The final report of the 1975-76 House Select Committee on Intelligence (the Pike committee), which had access to documents and testimony from the CIA, supports Stockwell's account. Describing the January 1975 aid package of $300,000 for the FNLA, the report notes that:

"Later events have suggested that this infusion of U.S. aid, unprecedented and massive in the under-developed colony, may have panicked the Soviets into arming their MPLA clients, whom they had backed for over a decade and who were now in danger of being eclipsed by the National Front."

The report also notes that the CIA substantially undervalued equipment the Agency provided in Angola (.45 automatic pistols were valued at $5.00, semi-automatic carbines at $7.55) and that the official total for the program of $31 million should at least be doubled.

Once full-fledged warfare was under way, the future of Angola was fought out on the battlefield. In July, the MPLA expelled its two rivals from the capital city of Luanda. Cuba did not begin sending combat troops to Angola in support of the MPLA until October. At about the same time, South Africa sent armored columns north into Angola in support of UNITA. In November, MPLA and Cuban troops routed the FNLA in the north, while South Africa and UNITA continued to make progress in the south. On November 11, scheduled to be Angola's independence day, Portugal refused to name any party as the country's legitimate government. But the MPLA in Luanda announced the establishment of the People's Republic of Angola, which was quickly recognized by more than 30 countries, UNITA and the FNLA in turn announced that they had formed a coalition government of their own; but it was recognized by no one. On December 19, the U.S. Senate passed the Tunney Amendment prohibiting the use of 1976 defense funds for military purposes in Angola. The measure passed the House on January 27 and was signed into law on February 9, 1976. The Clark Amendment later made the funding restriction permanent. In January, partly in response to the impending end of U.S. involvement, South African troops withdrew from the conflict. By late February, MPLA and Cuban troops had swept aside FNLA and UNITA resistance and were in control of most of Angola.

While it is difficult to untangle the thread of actions and reactions, it is clear that UNITA's version—that the Soviets sent Cuban troops to Angola to prevent the MPLA from losing an election—has little to do with what really happened. In fact, the Soviets may not have sent Cuban troops to Angola at all. In his book *Breaking With Moscow*, Arkady Shevchenko—the highest-ranking Soviet official ever to defect to the United States—notes that he visited Moscow in the summer of 1976 and worked on a senior group reviewing Soviet policy in Africa. Shevchenko, who at the time was Under-Secretary General of the United Nations and had already begun spying for the CIA in preparation for his defection, says he asked First Deputy Foreign Minister Vasily Kuznetsov how the Soviets had managed to persuade Castro to send troops to Angola. "He laughed," Shevchenko writes. "Kuznetsov told me that the idea for the large-scale military operation had originated in Havana, not Moscow. It was startling information. As I later discovered, it was also a virtual secret in the Soviet capital. "But presumably it was no secret to Washington—at least, not once Shevchenko returned to the U.N. that fall.

The Alvor Agreement and the riddle of Soviet intentions may have little to do with the struggle now going on in Angola; but Savimbi clearly hopes to use these issues as a key to unlock the U.S. Treasury.

SAVIMBI AND THE UNITED STATES: 1976-1985

There is some evidence that the United States kept alive the option of aiding Savimbi after 1975 and even provided assistance to UNITA and South Africa in violation of the Tunney and Clark Amendments.

In February 1976, Sen. John Tunney told a Senate subcommittee on Africa that two of his aides had met with UNITA and that UNITA sources in Lisbon told my investigators they were receiving funds from Saudi Arabia and Kuwait, indicating that the United States had served as a go-between on the deals. The amount from Saudi Arabia was $50 million, coming, curiously enough, after the Senate amendment cutting off American covert aid.

Arranging such a deal may not have violated the Tunney Amendment, which had not yet been signed into law. But it may have included understandings about future U.S. arms sales to the Saudis or other matters, in which case American actions were arguably illegal.

A similar case was brought to light through an investigation by the House subcommittee on Africa. According to a staff report, between 1976 and 1978, the Space Research Corporation of Vermont violated the U.S. arms embargo against South Africa by shipping 60,000 artillery shells for 155 mm guns and other equipment to the South African government. The study found that

the arms deal had probably been arranged by a CIA agent involved in the covert action program in Angola after a 1975 request from the South African government for 155mm shells for use in Angola had been turned down by a high-level interagency committee. "At the very least," the study concluded, "this episode suggests serious negligence on the part of the Agency. At most, there is a possibility that elements of the CIA purposefully evaded U.S. policy." Prof. Gerald Bender, a specialist in southern African affairs who had recently visited Angolia, told the House Foreign Affairs Committee in 1980 that the 155mm cannon "has been used by the South Africans over the past two years in their attacks on Angola." He said he had seen "continual evidence of South African ground and air attacks against the country" and that every building in the city of Mungo had been bombed.

In May 1978, an NSC official reportedly met with Senator Dick Clark to discuss the possibility of providing military aid to Savimbi despite the existence of the Clark Amendment. CIA Director Stansfield Turner was said to have briefed the Senate intelligence committee on a plan to supply arms to UNITA through France, which had also played a minor role in the 1975 civil war, recruiting mercenaries for the CIA program. Sen. Daniel Moynihan told The New York Times that the Administration had been saying for months that it wanted to support Savimbi. An Administration official later said that the proposal had been made by the NSC and had the support of the CIA but not of the State Department.

Although aid was apparently not sent at that time, Cuban President Fidel Castro said in June 1978 on Issues and Answers that "we know from very good sources that recently the CIA established contact with UNITA in Angola and . . . promised U.S. assistance." Asked about Castro's charge later that day, Rhodesian guerrilla leader Joshua Nkoma said that "the general talk" was that the CIA had continued to help Savimbi through South Africa. "Everybody feels that way," he added.

Similar contacts with UNITA were reportedly made in the first year of the Reagan Administration. During the 1980 presidential campaign, Reagan had said he was in favor of providing Savimbi with weapons. According to news reports attributed variously to UNITA officials, Angolan diplomats and South African diplomats, in mid-March 1981, a small team of American military experts visited a UNITA base, probably in Namibia, to assess the group's needs and to examine Savimbi's request for anti-tank and anti-aircraft missiles. In another version of the story contained in a March 27 communique issued by the Namibian independence movement SWAPO, a UNITA delegation had met with Secretary of State Alexander Haig and received an understanding from him that the U.S. would provide anti-tank and anti-aircraft missiles to UNITA if France still supported the plan following upcoming French presidential election. The reported meeting with Haig may have been a garbled account of a March 1981 meeting in Morocco between Savimbi and "a State Department official" later identified as then-assistant Secretary of African Affairs Lannon Walker. According to one State Department official, Walker did not make any promises of aid but the meeting was intended to send a signal to the Angolan government that the Savimbi option was open.

In light of the Carter Administration's 1978 proposal, it is not implausible that the U.S. was again contemplating joint action with France, which, until the election of the Mitterrand government in the spring of 1981, was a traditional American partner in covert operations in Africa. Indeed, the French may have been involved in Angola all along. According to a 1981 interview by the London Guardian with a former captain of South Africa's Battalion 32, which was composed of Angolans and other blacks, French and Israeli mercenaries continued to train the battalion and to accompany it on combat missions in southern Angola. The former officer later said that Battalion 32 sometimes operated out of uniform and passed off its activities as the work of UNITA. Savimbi claimed later in 1980 that France had never stopped giving him money.

In early 1981, the Reagan Administration also began an effort to repeal the Clark Amendment, although the arguments it made for lifting the ban focused on opposition to "single-country prohibitions" and not on the virtue of supporting UNITA. Indeed, a State Department official interviewed later that year insisted that "you would not find any but the most bloodthirsty hawks in the Administration—and there are some—who think the way to pursue U.S. objectives is to aid Savimbi." The measure repealing the Clark Amendment eventually passed the Senate but not the House. No further efforts were made to repeal the ban.

The Administration may have committed itself at this point to the State Department's diplomatic initiative in the region. On the other hand, it may have decided simply to ignore the Clark Amendment. In September 1981, the Portuguese daily Portugal Hoje reported that U.S. and South African representatives had met with a group called the Military Committee of the Angolan Resistance (COMIRA), composed of partisans of the old FNLA and headed by a former FNLA mercenary, that was attempting to unify UNITA and the miniscule Front for the Liberation of the Enclave of Cabinda (FLEC). The U.S. representative allegedly outlined the Reagan Administration's determination to change the government of Angola and bring Savimbi to power. In December, the pro-communist Diario de Lisboa claimed that COMIRA had some 2,000 armed men based in Zaire that were being trained by U.S., Israeli, Egyptian and Belgian instructors. The paper claimed that the group had "a DC-3 and a DC-4 provided by the Reagan Administration" that had been transporting supplies into Angola. The paper quoted diplomatic sources as saying that U.S. advisers had refused to permit the group to stage large-scale military operations in angola and that such attacks would occur "only if diplomatic efforts fail." Little has been heard about COMIRA since, and the group may not have ever existed.

Savimbi did, however, meet with Haig in December 1981 during a visit to Washington. A State Department spokesman said the meeting signified American recognition that UNITA was a "legitimate political force in Angola which must be taken into account." The London Observer later reported that "Savimbi was given to understand that, if necessary, ways and means would be found to by-pass the Clark Amendment, which forbids U.S. aid to any group in Angola by channelling money through a third country." Indeed, Savimbi confirmed that this was his understanding in a January 1982 interview with the conservative Portuguese weekly tempo, and even indicated that he was already receiving American assistance. "Material help is not dependent on, nor limited by, the Clark Amendment," he told the magazine. "A great country like the United States has other channels. . . . The Clark Amendment means nothing." In October, UNITA reprentative in London told Africa Now that the U.S. was not helping the group militarily but said that "the U.S. has friends and allies who are being influenced by the U.S. to help UNITA. "The report noted that Saudi Arabia had increased its aid to UNITA—after previously cutting it—following Savimbi's December 1981 trip to the United States. Indeed, earlier that year, The New York Times quoted a State Department policy paper that said Savimbi's cooperation with U.S. diplomatic plans could be expected because he was dependent on aid from "parties we can directly influence"—apparently a reference to nations like Saudi Arabia and Morocco.

These reports were largely ignored by the American press until Newsweek, in an October 1983 cover story about the resurgence of the CIA under William Casey, made the cryptic assertion that "Training, arms and financial assistance are also given to military forces in Ethiopia, Angola and the Sudan." In a letter to the magazine, Casey denied "the allegation that CIA is providing covert aid to the insurgents in Angola." He noted that such assistance "would be illegal, and CIA does not violate the law."

### SAVIMBI, SOUTH AFRICA AND SWAPO

South Africa's relationship with Savimbi apparently goes back to mid-1974, at which time the South African press began to support him as a "moderate" leader for Angola. In October 1975, after consulting several other African leaders, Savimbi invited South African troops into Angola, and UNITA fought alongside South Africa until the latter withdrew from the country in January 1976. Since that time, South Africa has kept UNITA alive as a signifcant military force in Angola, providing the mainstay of the group's material support including weapons, explosives, vehicles, petroleum, food and medical supplies.

South African troops based across the border in Namibia have also regularly provided UNITA with direct air and combat support and even acted as UNITA surrogates. The latter is generally done by Battalion 32, a unit of the South African Defense Force composed largely of former members of the FNLA and other black African soldiers. In 1981, a British mercenary who had fought with Battalion 32 told the Manchester Guardian that the unit often operated out of uniform in Angola. "While Battalion 32 was taking Savate" in southern Angola, for example, he said,

"Two representatives of UNITA were waiting at the tactical headquarters down the road—one white intelligence officer and one black soldier. When the battle was over, they came up to claim the town for UNITA. The point is that UNITA hangs around in the Southeast where their tribe is and they can probably defend themselves, but they can't go out and take somewhere like Savate. We do it for them because it improves their bargaining position."

Another former officer in Battalion 32, an Angolan named Jose Ricardo Belmundo, said the unit was also sometimes requested by UNITA "to help them out of trouble. . . as they do not have the same skills as we do.

I personally took part in such bailing-out operations."

This kind of surrogate operation still occurs. In fact, The New York Times reported on January 12, 1986 that "Wynand Petrus du Poit, a South African captain, recently tried to blow up a 1.6 million-barrel oil tank farm operated by the Chevron Corporation in Angola." The South African commando was captured carrying leaflets in which UNITA claimed credit for the attack. The same pattern may also have accounted for incidents in the summer of 1984 in which UNITA claimed credit for attacks on a Gulf Oil pipeline in the northern province of Cabinda and on two ships in Luanda harbor. If these actions were really conducted by UNITA, they represent a major increase in its ability to act outside its traditional region of strength in the southeast.

Battalion 32 and other South African Defense Force units also operate conventionally in Angola. Indeed, South Africa has invaded Angola at least twelve times since 1975, occupying provincial capitals in the south and sending air strikes and thousands of ground forces as much as 200 miles into Angolan territory. Although South Africa claims that these incursions are directed exclusively against SWAPO, which the MPLA allows to operate from Angola, the Angolan government, independent observers and former South African military officers say that purely Angolan targets are also often systematically attacked.

One price UNITA pays for South African support is service in South Africa's war against SWAPO. UNITA, which initially avoided contact with SWAPO, was reported in March, 1981 to have begun conducting military operations against the Namibian independence group. Later that year, a Washington Post reporter who visited Savimbi wrote that "detailed maps of SWAPO camps and units are kept up to date in UNITA's intelligence center." UNITA is also said to have infiltrated SWAPO and provided South Africa with information about the group. Savimbi regretfully told an American journalist in 1984 that SWAPO's leader Sam Nujoma had helped him slip into Angola once in the 1960s. "It was Sam Nujoma who gave me my first pistol," he said. "It's a shame he has gone over to the Soviets. I warned him, and now we are enemies."

WHO IS SAVIMBI?

At last month's meeting of the Conservative Political Action Conference, former U.S. Ambassador to the United Nations Jeane Kirkpatrick presented Jonas Savimbi with an award from the American Conservative Union and the Young Americans for Freedom. "Linguist, philosopher, poet, politician, warrior," she said, "Savimbi has admirers the world over, and I have long been one of them." She went on to call him "one of the few authentic heroes of our time" and to urge the Reagan Administration to send UNITA "real assistance . . . real helicopters . . . real ground-to-air missiles."

The irony of Savimbi's emergence as an anti-communist hero in the United States has often been pointed out. Indeed, the initial U.S. decision to support UNITA in 1975 was made despite the CIA's belief that UNITA and the MPLA were ideologically indistinguishable. As then-CIA Director William Colby told a House committee later that year:

They are all independents. They are all for black Africa.

They are all for some fuzzy kind of social system, you know, without really much articulation, but some sort of "let's not be exploited by the capitalist nations."

Rep. Les Aspin then had the following exchange with Colby:

Mr. ASPIN: And why are the Chinese backing the moderate group?

Mr. COLBY: Because the Soviets are backing the MPLA is the simplest answer.

Mr. ASPIN: It sounds like that is why we are doing it.

Mr. COLBY: It is.

It appears that Savimbi has managed to persuade American conservatives that his motivations are the same as their own—that he opposes the MPLA because it is supported by the Soviets and the Cubans. In fact, the opposite is true: Savimbi is opposed to the Soviets and Cubans in Angola, not on ideological or geopolitical grounds, but simply because they support his rivals in the MPLA.

"UNITA has never abandoned Marxism," one U.S. official commented in 1981. "It is manipulated very skillfully in the West. He [Savimbi] has the capacity to appear as the last hope of the West. But I believe he's more of a Marxist" than the leadership of the MPLA. When this official asked Savimbi how UNITA's economic policies would differ from those of the MPLA, Savimbi "thought for a moment and then he said, 'Not very much. Not very much at all.'" Indeed, UNITA's economic program still calls for the nationalization of major industries and social services.

In some respects, a UNITA government could be more hostile to the West than the current one. As then-Assistant Secretary of State for African Affairs Richard Moose told a House subcommittee in 1980, "The MPLA's appeal is national in character and, as such, is directed to a variety of racial and ethnic groups. UNITA, on the other hand, draws substantial support from the Ovimbundus." Indeed, Savimbi has traditionally been more bitter than his rivals about the white role in Angola; in the 1960s and 1970s, he called for an all-black politics and criticized the MPLA for the presence of whites and mulattos in its leadership. As the executive officer of a large U.S. corporation that operates in Angola told Prof. Bender: "Savimbi would be the worst socialist of the lot and would be much harder to do business with than the MPLA."

UNITA's human rights record is comparable to or worse than that of the MPLA. As a generally favorable 1984 article in the conservative Human Events noted, Amnesty International has reported that "UNITA representatives have on several occasions indicated that [UNITA] prisoners were being executed." The author of the article said Savimbi confirmed Amnesty's charge that

"UNITA agents explode bombs in public places (at markets, for example) in MPLA-controlled towns, including populous Luanda. When I asked Savimbi about such activities he told me that UNITA does very little of this—the MPLA often responds to such incidents with brutal reprisals against suspected UNITA abetters, he explained."

Indeed, during Savimbi's recent visit to Washington, UNITA announced that it had blown up a hotel in Angola at which a number of Bulgarian technicians were staying.

Savimbi also has a stated policy of kidnapping foeigners who are helping run Angolan economic enterprises. In 1984 and 1985, he kidnapped some 99 foreign workers at the Cafunfo diamond mines—including two American and nineteen British citizens—and threatened "serious repercussions on the captives" if any attempt was made to rescue them. The workers were apparently later released unharmed.

By contrast, Amnesty International's most recent report on Angola criticized the MPLA government primarily for detaining prisoners without charge—often for long periods—but did not say such prisoners were executed or abused. Most were said to be suspected UNITA combatants, and only one was cited as a purely political "prisoner of conscience."

Two other aspects of Savimbi's past are important to an understanding of his portrayal of himself as "the last hope of the West."

The first is his traditional anti-Americanism. According to State Department documents quoted by Gerald Bender, Savimbi marched into the U.S. Embassy in Bern, Switzerland in 1961 and introduced himself as "the future president of Angola." Apparently he did not get anything for his trouble. Indeed, Savimbi's bitter break with Holden Roberto and the FNLA in 1964 was based, he said, on his conviction that "no progressive action is possible with men who serve American interests . . . the notorious agents of imperialism." Throughout the following decade, Savimbi adopted what Bender describes as "a highly visible revolutionary, anticapitalist, and anti-American posture. He travelled around the world meeting famous revolutionaries, most of whom supported him: Gamal Abdel Nasser, Ahmed Ben Bella, Nguyen Giap, Che Guevara, and Mao."

Indeed, Savimbi's Maoism is the second element that is important to an understanding of his career. UNITA was created in 1966 as a result of Chinese training, arms and financial support, and China provided most of the group's limited outside aid until 1975. As Savimbi wrote in a recent article in Policy Review:

"From Mao and the Communists, I learned how to fight and win a guerrilla war . . . Today we who fight for [economic and cultural] freedoms are using the strategy and tactics of guerrilla warfare developed by the Communists."

He goes on to explain, in a section titled "Lessons From Chairman Mao," that he has adopted Maoist strategies but rejected Maoist policies in favor of Western ones. That may be. In any case, his commitment to Maoist strategy provides an important clue to the puzzle of Savimbi—a man who impresses those who meet him as a principled, charismatic leader but has made an unapologetic alliance with South Africa; who has declared war on his former allies in SWAPO but still insists that he is opposed to apartheid.

All this simply means that Savimbi has taken to heart Mao Tse-tung's theory of "primary and secondary contradictions." According to this theory, revolutionary leaders should form alliances, even with enemies of "secondary" importance, in order to bring all available force to bear on the "primary" conflict. This theory explained the Chinese Communist Party's temporary alliance with Chiang Kai-shek against the Japanese, as well as its resumption of civil war once the conflict with the Nationalists again became the "primary contradiction." Savimbi's political evolution seems to follow the same pattern. He believed in working with the MPLA against the Portuguese, and with South Africa—and even the United States—against the MPLA. As he told The Wall Street Journal in 1981, "If I am getting support from the U.S., it doesn't mean I sup-

port the U.S. I will get support where I can get it." His real loyalties—which are to himself and perhaps to the Ovimbundus—have never changed.

SAVIMBI AND U.S. DIPLOMACY IN SOUTHERN AFRICA

The United States has two major interests in southern Africa: the withdrawal of Cuban troops from Angola and an end to South Africa's occupation of Namibia.

South Africa initially took over the administration of Namibia (then called South-West Africa) under a 1920 League of Nations mandate. In 1966, the United Nations ended the arrangement, but South Africa has not been willing to leave Namibia. In 1978, the U.N. passed Security Council Resolution 435, providing for a withdrawal of South African troops, to be followed by U.N.-supervised elections for a Constituent Assembly which would write a constitution for an independent Namibia. A "Western Contact Group" composed of the United States, Britain, Canada, France and West Germany was created to oversee implementation of the U.N. resolution. But, although South Africa initially agreed to implement Res. 435, it has refused to do so.

Shortly after the Reagan Administration took office, Chester Crocker, the State Department's new Assistant Secretary for African Affairs, proposed a controversial policy of "constructive engagement" with South Africa. Crocker initially argued that the U.S. should establish a closer, more cooperative relationship with South Africa while encouraging the country to make progress in dismantling apartheid. But it was on the external issue of Namibia that "constructive engagement" proved most promising.

Crocker's view was that the South Africans might be persuaded to leave Namibia if their legitimate security concerns could be satisfied and if they understood that the Reagan Administration offered their best opportunity to settle an issue that would have to be solved eventually in any case. At the same time, as Crocker cautioned in a May 1981 memorandum for Haig:

"We cannot allow the South Africans to be disingenuous with us over Namibia. If they have no intention of pulling out of the territory under circumstances reasonably acceptable to the international community at large, we will want to opt out of the negotiation process rather than be subjected to an endless, meaningless charade."

In June, Deputy Secretary of State William Clark asked South African officials if they would be willing to move toward a Namibia settlement if the U.S. guaranteed the withdrawal of Cuban troops from Angola. They said they would.

Critics of this "linkage" between Namibia and Angola—including other members of the Western Contact Group—objected that South Africa should leave Namibia irrespective of developments in Angola and that in any case the Cubans were in Angola at the request of the legitimate government of that country. The U.S. took the position that, although this might be true, South Africa could not be forced to leave Namibia and that, as Alexander Haig put it, there was an "empirical" relationship between developments in the two countries. Neither the Cubans nor the South Africans could be expected to "go first," but there would have to be parallel withdrawals. Crocker also argued that a simultaneous Cuban withdrawal from Angola would make a South African withdrawal from Namibia politically possible by protecting the Botha government from charges by the South African right-wing that Prime Minister Botha had "sold out." The same consideration probably also applied to Crocker's efforts to sell his policy within the Reagan Administration.

The shape of an agreement emerged in the remaining months of 1981 and 1982. The Contact Group proposed a series of constitutional principles establishing a three-branch government in Namibia and guaranteeing property rights and fundamental human rights. South Africa agreed to negotiate a timetable for withdrawing from Namibia in exchange for parallel withdrawals of Cuban troops from Angola. Defending this "linkage" during a visit to Zaire, Vice-President George Bush said in November 1982 that the U.S. strategy depended not only on an effort to reassure South Africa. "We are pledged to the independence of Namibia. And obviously," he added,

"A part of what we're trying to do would mean that there would have to be guarantees of Angola's independence and Angola's security. And I want to make that point because some don't focus on that. And the United States, and I think every other country, would feel an obligation to be helpful in working out some arrangement for the security of Angola."

In December 1982, South African and Angolan officials met and agreed on a de facto cease-fire intended to lead to a formal disengagement pact. "We thought we had reached a real turning-point," a U.S. diplomat told The Washington Post. "We were talking specifics about a timetable for the mutual withdrawal of the Cubans and of the South Africans, and we thought we had the all-clear." But at a second meeting in February 1983, South Africa appeared to be less interested in an agreement. In the meantime, the South Africans began heavily arming Savimbi, who launched a major offensive in mid-1983 that he said was intended to force the Angolan government to negotiate with him and to force international negotiators to include UNITA in any regional settlement. In October, a "senior diplomat" told the Post that "the Angolans are sincerely convinced that, with the military situation as bad as it is now, sending the Cubans home would be committing suicide."

South Africa's attitude toward a settlement in Namibia and Angola is ambivalent at best—sometimes cooperative, sometimes obstructionist. But it is UNITA that simply does not fit into the diplomatic equation. This fundamental conflict between the objectives of the United States and those of UNITA was played out again in 1984. In January, Crocker announced a major U.S. drive to reach an agreement in the region. In February, both sides appeared to agree to a U.S. "package" providing for the following steps:

South Africa would agree to the Contact Group's plan for a Namibian settlement

Angola would indicate that South Africa's agreement to leave Namibia made it possible for Angola to ask the Cubans to leave Angola

South Africa would say that this in turn made it possible to begin implementing the Namibia withdrawal

The United States would announce that Angola's decision to send Cuban troops home made it possible for the U.S. to recognize Angola

A U.N. Truce Advisory Group would go to Namibia to monitor the South African withdrawal and the holding of elections.

Meanwhile, South Africa and Angola signed a pact in which South Africa agreed to withdraw from semi-permanent positions up to 100 miles inside Angola and Angola agreed to stop SWAPO infiltration into Namibia. UNITA pledged not to take military actions that would upset the delicate accord.

But within days, UNITA launched a major attack against the Cafunfo diamond mine in order to protest its exclusion from the proposed agreement. The following month, it attacked a provincial capital in western Angola. This attack, UNITA spokesmen explained, was a response to Angola's call for an end to outside aid to the guerrilla group as part of the regional "package" of agreements. UNITA vowed that the offensive was merely "a prelude to bloodier violence in Angola." That summer, UNITA took credit for a series of major economic sabotage actions. In November, Savimbi threatened to launch a major guerrilla offensive against Luanda if another effort was made to achieve a regional settlement that did not include him. UNITA would not permit the Cubans to leave Angola unless the guerrilla force was made a party to such a settlement, he said at a press conference on November 9. "UNITA will have to be a party to all negotiations whose objective will be to determine the future of Namibia and the corresponding withdrawal of Cubans from our country," Savimbi vowed.

"We insist that all the parties involved in the southern African conflict should recognize UNITA as a central factor with sufficient means to influence the [Cuban] withdrawal."

"I don't want to rock the boat," Savimbi added. "I want to be part of it."

America's diplomatic, strategic and commercial interests in southern Africa now appear to be hostage to Jonas Savimbi's ambitions. Following repeal of the Clark Amendment last July, the State Department initially opposed White House plans to renew U.S. aid to UNITA, though recently the Department gave way and asked only that any such aid be provided covertly. Chester Crocker has warned American corporations doing business in Angola that they are in danger of being attacked by UNITA. Apparently, the State Department is giving ground in hopes of limiting the damage and of continuing its efforts in southern Africa. But it is hard to see how these efforts can now have any honorable or realistic objective.

---

OAU SENDS URGENT APPEAL TO CONGRESS

Below is the text of a telegram sent by Ide Ounarou, Secretary General of the Organization of African Unity, to Senate Majority Leader Robert Dole (on November 15, 1985:)

Your Excellency, the Organization of African Unity has learned with great concern of certain moves that are now taking place in the United States Congress with a view to providing the UNITA bandit movement aid with more than $300,000,000. As your excellency may well know the eventual provision of such an assistance will not only be construed as a gross violation of the Angolan sovereignty and territorial integrity by the United States but would also go contrary to the spirit and letter of the assurances given by the State Department following the repeal of the Clark Amendment. Your excellency may recall that the policy of your government on provision of arms to elements in Angola as enunciated by the State Department in the wake of the repeal of the Clark Amendment is "any assistance for military or paramilitary operations in Angola should

be considered in the context of the prospects for the achievement of internationally recognized independence settlement in Namibia in accordance with U.N. Security Council Resolution 435." The Organization of African Unity is of the firm opinion that if the Congress goes ahead with the provision of the envisaged assistance to UNITA it will not only nullify the earlier assurances given by the United States administration but would also impede the attainment of independence by Namibia on the basis of Security Council Resolution 435. In view of this I wish to appeal to your excellency so that you may do everything in your power to stop according any kind of assistance to the UNITA bandits. Please accept, your excellency, the assurances of my highest consideration.●

Mr. MATHIAS. Mr. President, I do not think that in a quarter of a century in Congress I have seen an issue that has been handled in the way this has been handled, overtly and covertly. It would be ridiculous if it were not serious.

It calls to mind something that George Orwell wrote. He said that "when there is a gap between one's real and one's imagined aims, one turns to long words and exhausted idioms, like a cuttlefish squirting ink."

Covert aid might not meet Orwell's definition of long words, but it is a kind of tired cliché, and I think it is a signal for the United States that we have to observe.

It is obvious that this issue is not going to be settled this afternoon without a very prolonged debate. I know that the managers of the bill are anxious to get on.

The Senator from Kansas, the chairman of the African Subcommittee, has made a generous offer, on her own behalf and on behalf of the chairman of the Committee on Foreign Relations, to hold a hearing. I know we can have every confidence that these hearings will be held, and I think we can come to some conclusion as to whether or not they should be in executive or public hearings. Perhaps it will be necessary to have both. I think that is a generous offer, and I am willing to rely upon it.

I think, however, that this debate, calling up this amendment, serves a useful purpose.

Dr. Samuel Johnson used to say that "the best inducement to a clear conscience is the suspicion that someone is watching." Through this amendment and through this debate, it is perfectly clear that we are watching, and it is time to get on top of this issue.

In reliance on the assurance of the Senator from Kansas, I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

AMENDMENT NO. 2652

(Purpose: To revise the provisions establishing a Nuclear Weapons Council.)

Mr. DOMENICI. Mr. President, I have an amendment, which has the approval of the chairman and the ranking Democrat, with reference to the recommendations of the blue ribbon commission regarding the Department of Energy and the Department of Defense and their efforts with reference to nuclear weapons. I send to the desk the amendment, which I have worked on with the majority and minority staffs.

The PRESIDING OFFICER. Is there objection to setting aside the amendment of the Senator from California?

Mr. DOMENICI. I ask unanimous consent that the pending amendment be set aside for the purpose of considering this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI] proposes an amendment numbered 2652.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 335, strike out line 22 and all that follows through page 338, line 18, and insert in lieu thereof the following:

"§ 179. The Nuclear Weapons Council

"(a) There is a Joint Nuclear Weapons Council (hereinafter in this section referred to as the 'Council') composed of three members as follows:

"(1) The Director of Defense Research and Engineering.

"(2) The Vice Chairman of the Joint Chiefs of Staff.

"(3) One senior representative of the Department of Energy appointed by the Secretary of Energy.

"(b)(1) Except as provided in paragraph (2), the Chairman of the Council shall be the member appointed under subsection (a)(1).

"(2) A meeting of the Council shall be chaired by the representative appointed under subsection (a)(3) whenever the matter under consideration is within the primary responsibility or concern of the Department of Energy, as determined by majority vote of the Council.

"(c)(1) The Secretary of Defense and the Secretary of Energy shall enter into an agreement with the Council to furnish necessary staff and administrative services to the Council.

"(2) The Assistant to the Secretary of Defense for Atomic Energy shall be the Staff Director of the Council.

"(d)(1) The Council shall be responsible for the following matters:

"(A) Preparing the annual Nuclear Weapons Stockpile Memorandum.

"(B) Developing nuclear weapons stockpiles options and the costs of such options.

"(C) Coordinating programming and budget matters pertaining to nuclear weapons programs between the Department of Defense and the Department of Energy.

"(D) Identifying various options for cost-effective schedules for nuclear weapons production.

"(E) Considering safety, security, and control issues for existing weapons and for proposed new weapon program starts.

"(F) Ensuring that adequate consideration is given to design, performance, and cost tradeoffs for all proposed new nuclear weapons programs.

"(G) Providing broad guidance regarding priorities for research on nuclear weapons.

"(H) Preparing comments on annual proposals for budget levels for research on nuclear weapons and transmitting those comments to the Secretary of Defense and the Secretary of Energy before the preparation of the annual budget requests by the Secretaries of those departments.

"(I) Providing—

"(i) broad guidance regarding priorities for research on improved conventional weapons, and

"(ii) comments on annual proposals for budget levels for research on improved conventional weapons,

"and transmitting such guidance and comments to the Secretary of Defense before the preparation of the annual budget request of the Department of Defense.

"(e) The Council shall submit to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives a report on the actions that have been taken by the Department of Defense and the Department of Energy to implement the recommendations of the President's Blue Ribbon Task Group on Nuclear Weapons Program Management. The Council shall include in such report its recommendations on the role and composition of the staff of the Council. The Council shall submit such report to the Committees not later than March 1, 1987.".

(f) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"179. The Nuclear Weapons Council.".

(g) CHAIRMAN OF JCS TO SERVE ON COUNCIL IF THERE IS NO VICE CHAIRMAN OF JCS.—If on the date of the enactment of this section the position of Vice Chairman of the Joint Chiefs of Staff, or comparable position, has not been established by law, the Chairman of the Joint Chiefs of Staff shall be a member of the Nuclear Weapons Council established by section 179 of title 10, United States Code, as added by subsection (a). If the position of Vice Chairman of the Joint Chiefs of Staff (or comparable position) is established by law after the date of the enactment of this section, the Chairman of the Joint Chiefs of Staff shall remain a member of such Council only until an individual has been appointed vice chairman of the Joint Chiefs of Staff.

(h) REPEAL.—Section 26 of the Atomic Energy Act of 1946 (42 U.S.C. 2037) is repealed.

Mr. DOMENICI. Mr. President, I thank the distinguished ranking member of the committee, Senator NUNN, for his help and cooperation in working out this issue. I do not want to take up the time of the Senate unnecessarily so I will be brief. The committee bill contained a provision, section 3132, to implement the recommendations of the Clark panel on nuclear weapons program management. Included in this section were a number of provisions that pertained to conventional weapons. Mr. President, I cer-

tainly support the Senator from Georgia's efforts to improve our conventional weaponry, especially if it decreases our dependence on nuclear weapons. The committee bill also contained $34 million, which was earmarked for research on conventional weapons at the weapons labs. Again, Mr. President, I certainly support the idea of increasing the research effort into conventional weapons at the weapons labs. I think most Senators know that two of those labs are in my State. The reason I objected to this provision is that it authorized funding for conventional weapons in the Department of Energy section of the bill and provided that the Nuclear Weapons Council, established by this section, should address a number of matters relating to conventional weapons.

Mr. President, I do no think that the budget of the Department of Energy should be funding conventional weapons for the Department of Defense. Work of this nature performed at the labs should be funded on a reimbursable basis using funds appropriated to the Department of Defense. I would add that there is already quite a bit of work performed at the labs under this arrangement. It is a very important part of their workload. DOD is the biggest customer but there are other customers such as the NRC, NASA, the FAA, and others. I hope this kind of work will continue and will flourish, but I do not think it should interfere with the unique arrangement that this Nation has established to manage and oversee its nuclear activities. In short, I do not think the Department of Energy should be budgeting for research on conventional weapons.

I understand that the concerns of the Senator from Georgia who wants to improve the management and coordination of the nuclear weapons development activities of the Department of Defense and Energy. He is to be commended for taking the leadership in this area to implement the recomendations of the blue ribbon task group. We have worked out some revisions in the language that are mutually agreement. In addition, Senator NUNN has indicated that in the future, he will try to fund improved conventional weapons in the DOD portion of the bill.

I thank the distinguished Senator from Georgia for his help and cooperation in this matter.

Mr. President, I thank the distinguished manager of the bill and the ranking minority member.

First of all, in the bill before us, they tried to implement the recommendations of the blue ribbon commission, frequently referred to as the Warner Commission. They tried to implement that so as to get better coordination between the Department of Defense and the Department of Energy with reference to the Department of Energy's involvement in matters military.

I understand clearly what that blue ribbon commission recommended, and I have lauded its efforts on a number of occasions. But I did think that the language in the bill did not quite interpret their recommendations, at least as I saw it.

I am pleased to indicate that in working with the managers and their staffs, they have concurred that some changes are in order so as to make it clear that we do not intend to put more of the decisionmaking on the Department of Energy but, rather, that there is to be a coordinating effort between the Department of Energy and the Department of Defense, and the council has been set up to do that.

I had another concern that I think we have cleared up here, and that is, while we want the national laboratories, which are under the direction of the Department of Energy, not only to do the nuclear research, the nuclear safety, and manage the production of nuclear weapons, but also, we want them to engage themselves, to a maximum extent, in conventional research. They are good at it; they are doing some now.

As the distinguished Senator from Georgia has said on the floor and in the committee, and as reflected in this bill, we want to do more conventional weapons research, and we want the very best doing it. Therefore, he has been concerned that we make sure that our labs are not only doing that, but also, that they have an opportunity to be heard in the Department of Defense on what they think is the kind of research that ought to be done in these nonnuclear areas.

I think this amendment, which I hope will be adopted, preserves the recommendations of the blue ribbon commission in their entirety and sets some coordinating mechanism into play whereby our excellent laboratories will be intimately involved in doing the nonnuclear research, with suggestions and ideas and choices being made available to the Department of Defense so that they will nave their advice.

I did not want to give the Department of Energy more jurisdiction. I know the history. We do not want—I do not, and I do not think the Senator from Georgia wants—the Department of Energy and the Secretary of Energy involved more in matters military. That is not why they were set up. They were set up to take the place of the Joint Atomic Energy Committee, which isolated nuclear weapons from the Department of Defense, but we want to use their expertise. Yet, we do not want them to have the budget and appropriation responsibility for nonnuclear research.

I think we have struck a balance there whereby we will get what we expected, and yet not shift any of the defense burden by way of budgeting and appropriating over to the Department of Energy; yet, keep them intimately involved, as the distinguished Senator from Georgia wanted.

Mr. NUNN. Mr. President, I thank my colleague and friend from New Mexico. He has described this situation in words on which I cannot improve.

What we have tried to do in this bill is to create a high-level group between the Department of Defense and the Department of Energy to oversee overall policy for nuclear weapon procurement and acquisition. We have tried to do that without disrupting the Department of Energy's and the Department of Defense's own responsibilities.

We have also tried to do it in a way that gives adequate consideration to the design of nuclear weapons, to the tradeoffs between nuclear weapons and conventional weapons.

So the major thrust of what we have done is that we have created a high-level group between the two agencies and given this kind of oversight and jurisdiction.

□ 1440

The Senator from New Mexico has proposed an amendment which will improve what we were trying to do. I think the Senator from New Mexico has been concerned about some of the technical provisions about funding which can be very, very important in the overall scope of responsibilities. We have agreed with him on those.

He has agreed with us as he has already said about conventional weapons and the very important role the laboratories can play in development of conventional weapons.

It is my view that with the technology we have available today, we can, within the next few years, devise conventional weapons which can take the place of a number of our short-range tactical battlefield nuclear weapons. If we do that, we can improve the conventional capability of America and our allies and we can also reduce the likelihood of early use of nuclear weapons in the event of an outbreak of war.

The Department of Energy and the laboratories are charged with the safety of nuclear weapons. We do not want to disrupt that. That is something that we always look to the Department of Energy and the laboratories for.

We want to make sure that we have the checks and balances and safety that historically have been one of the reasons for having a separate Department with responsibility over nuclear weapons.

So we have worked out the amendment. The Senator from New Mexico has improved our amendment.

We urge its acceptance by the Senate.

Mr. GOLDWATER. Mr. President, we reviewed this amendment and it is perfectly all right.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (No. 2652) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I thank my friends from Arizona and Georgia. I think this is a very good resolution of the issue.

Mr. GOLDWATER. Mr. President, I am very happy to announce that Senator KENNEDY and Senator GRAMM have reached an agreement on the labor matter.

I apologize to my friend from Alaska whom I said might possibly have the floor next. But the Gramm-Kennedy matter was up and was undecided. Now it is decided. So the Senator from Alaska can go on about his business and I can call him later.

Mr. STEVENS. Yes. I thank the Senator very much.

Mr. KENNEDY. Mr. President, as a point of information for the Membership, I will send an amendment to the desk very shortly which will deal with the two labor provisions of the Defense authorization legislation related to the Davis-Bacon provisions and the service contract provisions.

I believe that we have worked out an arrangement with the Senator from Texas who is the proponent of these provisions to have a time for a discussion of both of these provisions and then to move to have individual votes on each of these provisions with the Service Contract Act provisions being voted on first and the Davis-Bacon second.

I will make a brief comment in support.

Mr. GRAMM. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. GRAMM. It is my understanding that this unanimous-consent request would send to the desk an amendment which would be divisible between part 1 and part 2, that it would give us an up-or-down vote on the Service Contract Act provision which the Senator from Massachusetts would strike and the Davis-Bacon provision which the Senator from Massachusetts would strike.

Those amendments will not be subject to amendment or tabling under the unanimous-consent request and we had agreed to 30-minute limitation on each of the two amendments as they would be divided.

Mr. KENNEDY. That would certainly be agreeable with me.

We do not have the majority leader and the minority leader on the floor. But perhaps until they come and until they are notified, we would proceed that way until they do come and finalize that agreement if they would propound it. That would certainly be agreeable with me.

Mr. GRAMM. If the Senator will yield further, the time, 30 minutes on the first amendment and 30 minutes on the second, obviously would be equally divided.

Mr. KENNEDY. That seems to me to make sense.

I would hope that we would then vote back to back on both of these provisions. The basic issues which are involved are common to both of the provisions. In terms of convenience of the Membership it would seem to me that would be the most satisfactory way to proceed.

Mr. HUMPHREY. Mr. President, will the Senator from Massachusetts yield for just a question?

Mr. KENNEDY. Yes, I am glad to yield.

Mr. HUMPHREY. Is the nature of his amendment simply to strike?

Mr. KENNEDY. Yes.

Mr. HUMPHREY. It is not to insert.

Mr. KENNEDY. Yes.

Mr. HUMPHREY. This is purely to strike.

Mr. KENNEDY. The Senator is correct.

Mr. HUMPHREY. I thank the Senator from Massachusetts.

AMENDMENT NO. 2653

Mr. KENNEDY. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is the Senator requesting consent to set aside the pending amendment?

Mr. KENNEDY. I ask unanimous consent that we temporarily set aside any of the pending amendments and ask consent this amendment be in order.

The PRESIDING OFFICER. Is there objection?

Is there an objection to the request to set aside the amendment?

Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY] for himself and Mr. METZENBAUM, proposes an amendment numbered 2653.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(1) Strike out page 186, line 15 through page 189, line 17, and page 190, line 18 through page 191, line 14.

(2) Strike out page 189, line 18, through page 190, line 17.

Mr. GRAMM. Mr. President, I ask that the amendment be divided between part 1 and part 2.

The PRESIDING OFFICER. The Senator has that right. The amendment is divided.

Mr. KENNEDY. Mr. President, we have a tentative understanding at least between Senator GRAMM and myself that we will proceed with the hour equally divided and I believe that I understand correctly that we will use the total hour to address both of the different divisions of it.

When we have the majority leader and the minority leader here or the chairman of the Armed Services Committee and the ranking member, if they would propound that request that would be agreeable to us, but following the general procedure, I am restrained to ask for that agreement at this time myself.

Mr. NUNN. Mr. President, I say the Senators from Massachusetts and Texas could propound an agreement at this point in time. I think we can clear it right now on the minority side. But we would need a proviso that if there is a division, neither amendment would be amendable.

Mr. GRAMM. And neither amendment could be tabled.

Mr. NUNN. We have not been agreeing to that. We refused that amendment last night. We get in a situation where everybody wants that.

So if either the Senator from Massachusetts or the Senator from Texas would propound that, I do not know about the majority side but I believe we can clear it right now.

Mr. KENNEDY. I ask unanimous consent, Mr. President, that on the Kennedy amendment there be a one hour time limitation, that time on that amendment be divided between the Senator from Massachusetts and the Senator from Texas in the usual form, that there be no further amendments or motions permitted or amendments to that particular amendment or division thereto.

Mr. GRAMM. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. GRAMM. We now technically have two amendments pending so perhaps the Senator would ask for 30 minutes on the first one and then 30 minutes on the second one, so that we would not commingle the time.

Mr. KENNEDY. I include that in my request.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. NUNN. Is it clear that the amendment has been divided by unanimous consent, and we have two

amendments, neither of which is amendable?

The PRESIDING OFFICER. The Senator is correct.

The agreement also states that no motions shall be in order.

Is there objection?

Mr. METZENBAUM. Does that include a motion to recommit will not be in order?

The PRESIDING OFFICER. Such a motion would not be in order under that agreement.

Mr. METZENBAUM. I thank the Chair.

The PRESIDING OFFICER. No motion would be in order. Is there objection?

Without objection, it is so ordered.

The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I yield myself such time as I might use.

□ 1450

Mr. President, I have been a member of the Senate Labor Committee since 1962. In that time and in that capacity, I have worked on literally hundreds of labor issues, and I am concerned that the Armed Services Committee has chosen to legislate in the jurisdiction of the Labor and Human Resources Committee.

The Armed Services Committee has reported out a bill that will raise the threshold on contracts to which the Davis-Bacon Act applies to $250,000 and will raise the threshold on contracts to which the Service Contract Act applies to $1,000,000. Seventy percent of the military construction contracts that now enjoy the protections of the Davis-Bacon Act would lose that protection. Ninety percent of the military service contracts to which the Service Contract Act applies would lose that protection.

Let me make clear at the outset the principle at stake: The money raised by taxing the working men and women of this country should not be used to force down their wages. The Davis-Bacon Act and the Service Contract Act do not promise or provide inflated wages to workers on Federal projects; the acts merely require that the Federal Government pay the prevailing wage in a locality when it builds or seeks services there. If the Federal Government, with its massive purchasing power, can come into a local area and buy labor on the cheap, it not only underpays the workers who are paid on that project, but it also forces down the wages paid to all workers in that locality.

That simple idea, that the power of the Federal Government should not be misused to impoverish its citizens, is the driving force behind the acts. Representative Bacon, a Republican, put it right 60 years ago:

> The Federal Government should not engage in construction work in any State and undermine the labor wages paid in that State. The least the Federal Government can do is to comply with the local standards of wages and labor prevailing in the locality where the building construction is to take place.

The intuitive, virtually self-evident rightness of this rule explains why the Davis-Bacon Act was passed unanimously in the Senate and by a vote of more than two-thirds of the Membership of the House. In 1965, the Service Contract Act was adopted by voice vote in both Houses.

But there are those who would eliminate these protections, and permit the people's government to impoverish the people by weighing in against workers in every labor it enters. The proponents of this measure profit by the illusion that there are construction and service workers who are getting rich by working on Federal contracts. That is a pernicious falsehood. Wages paid under these acts are an average of the wages paid for similar work in the same locality. These wages make a king out of no one. Consider construction workers, who are protected by the Davis-Bacon Act. Unemployment in the construction industry is 13 percent, among the highest in the Nation. The average construction worker earns less than $14,000 a year—the average union construction worker earns less than $17,000 each year.

Service workers, protected by the provisions of the Service Control Act, are often unable to organize for their mutual aid and protection. As a result, their wages are often distressingly low. And these workers are usually minorities, women and the young. A recent memorandum by the Department of Labor indicates that employment protected by the Service Contract Act "appears to be dominated by the types of workers intended to be protected by the law: janitors, cleaners, porters, guards, mess attendants, laborers, et cetera," 635,400 workers are presently covered by the Service Contract Act, and their number increases annually as the Government contracts out more of its service jobs—the Department of Defense has increased the number of workers subject to the protections of the act by 33 percent in the last 2 years.

Removing the protections of these two acts would be ruinous to thousands of workers. Approximately 100,000 service workers would lose the protection of the act if the threshold changes included in this bill became law. That represents 24 percent of all DOD service contracts, but which workers would this hit hardest? It hits those at the bottom of the economic ladder; 65 percent of all housekeeping contracts would lose protection; 62 percent of laundry contracts; 61 percent of custodial contracts, and 35 percent of food service contracts.

These workers are already paid wages near or below the poverty line. One out of every four families headed by service workers is already in poverty. One out of four of the heads of those families that are working men and women of this community are receiving a takehome pay that is below the poverty line. And with the continued provisions included in this defense authorization, we would be denying any protection for those particular heads of households.

We hear a great deal on this floor about protecting the family. Well, one of the protections for the American family is ensuring that there is going to be adequate income to provide for food and clothes and housing for each family. But, nonetheless, there are those that say, "That's too bad about them. We are going to just put the power in the Federal Government to deprive them of higher wages."

These workers are paid wages near or below the poverty line. One out of four families headed by a service worker is already in poverty, yet this is the group chosen to bear the burden of the Defense Department's cost cutting. For the Defense Department to claim that it is so financially strapped that it must take money from the wages of these workers is self-evidently obscene.

We will hear arguments out here that we are going to save the taxpayers because we are going to drive the wages down and that is going to save more money for national security and national defense. I hope those that make that argument on the floor this afternoon are going to be able to tell us how much more it is going to cost in terms of food stamps for which these families will be eligible? How much more is it going to cost in terms of Medicaid payments for which these families are going to be eligible? How much more is it going to cost to pay fuel assistance for which these particular families will be eligible and the whole range of social services? A study has never been done on that.

Well, the argument will be: "We are going to be able to cut these wages down even further and we have got all these economic CBO studies that show the savings."

Well, of course, when you look at the past CBO questions about savings on Davis-Bacon and other contracts, we find out how fraudulent they really are. But there will be a lot of talk about that here this afternoon, as well.

And what is the rationale for the proposal that we should not pay a decent wage, that we should not pay a wage that is the prevailing wage in the localities where the Federal Government needs construction or service workers? The argument is that removing these basic protections will save us

money. And few of us can disagree with the need for the Federal Government to spend its resources wisely and well, but there are limits on what we must be willing to do to save money. No one in this body would support repeal of the child labor laws because that would save us money; no one in this Chamber would support the idea that Federal Government should contract out all of its construction work to some Third World nation so that we can take advantage of the depressed labor conditions there. And when these acts were passed, no one in this Chamber thought that the Federal Government should impoverish its own citizens so that the Federal Government could save them some money.

Look at the estimated savings in the report of the Armed Services Committee. These estimates, made by CBO in 1986, are less than one-third the savings that CBO projected in 1983. This new estimate assumes that the Davis-Bacon Act raises the cost of Federal construction by 3.3 percent, and that raising the threshold as proposed will save $138 million over the next 3 years. But we know better than this. In 1971, the David-Bacon Act was repealed by Executive order for a time and more than a thousand contracts that had already been bid under the act were rebid.

That is the best test. We will hear all kinds of things about CBO estimates. We have already tried this in 1971. How much was saved? Was it 3.3 percent? No. the rebid contracts came in only six-tenths of 1 percent lower than when the Davis-Bacon Act applied. Based on experience and not on curbstone guesswork from CBO, the amount we can expect to save from the threshold change is less than 20 percent of the amount predicted by the Armed Services report. The savings came to all of $25 million over the next 3 years—and all of $1.6 million next year.

And what about the Service Contract Act? The committee relies on the same CBO estimate. But this estimate is based on a single study of service workers such as computer repair specialists who work on research and development contracts. From that study, CBO projects savings for contracts that cover janitors and housekeepers. And the study does not take into account any of the secondary effects of cutting these wages. It does not take into account all of the Federal workers who would have to apply for food stamps once their wages are bid to subpoverty levels. It does not take into account the tax revenue that will be lost as wages are cut. These are the men and women who are paying their taxes and we reduce their ability to make a decent income. I hope we are going to hear about what the tax loss is to the Federal Treasury. Nothing has been done on that. There was no presentation in the Armed Services Committee on how much is going to be lost in the Federal Treasury on that.

The study does not take into account any of the secondary effects of cutting these wages. It does not take into account the burden on Federal programs that will result if health coverage for any of these workers is lost. This is not a study—it is a back-of-the-envelope guess. That is what is being proposed here this afternoon in support of continuation of these provisions. And that is no way to make labor policy.

□ 1500

The inaccuracies so far are bad enough. But there is more. Dr. John Dunlop, former dean of the economics department at Harvard and Secretary of Labor under President Ford, has repeatedly testified that the studies of Federal workers and Davis-Bacon changes which fail to take account of the productivity differences between higher and lower paid labor are fatally flawed. The CBO studies of 1983 and 1986 both fail to take account of productivity differences; the GAO study fails to take account of productivity differences.

In fact, high wage labor has been found to be considerably more productive. Dr. Steven Allen's study—perhaps the most extensive study yet on the subject—found that union workers in construction are at least 29 percent more productive than nonunion workers because they are better trained and because unions can provide a ready pool of skilled labor, thereby reducing hiring and training costs. Another study by Professor Allen, published this January, found that union construction workers are 30 percent more productive than nonunion labor. Professor Mandelstamm's study of union and nonunion construction found that the higher wage costs of union workers was entirely offset by their higher productivity.

That is going to make a big difference in terms of savings for the Defense Department and for contractors. You have greater productivity. You are going to have a greater, higher degree of standards in terms of quality, and efficiency, but none of that is considered in the studies that are quoted.

The importance of these findings for those who hope to save money by driving down wages is that we don't save anything by driving down wages that isn't lost elsewhere by driving down productivity.

But the loss to the Federal Government caused by the loss of skilled labor may be even greater down the road—when a project built by unskilled labor starts to fall apart and the Federal Government must pay the maintenance costs on it. Prof. Daniel Mills, an expert in the field of construction industry labor relations suggests that repeal of Davis-Bacon "could result in greater total costs on Government projects by increasing industrial strife, and by facilitating awards to incompetent contractors competing only by virtue of low wages."

That is a fine how do you do. We are talking about the building of the runways for young Americans to be able to fly American jet planes. We are talking about the construction of facilities for our men and women who are serving in our Armed Forces. We are prepared evidently to say that we will put up with shoddy workmanship and shoddy performance for those individuals in order to allegedly save some resources for the defense.

The best and most recent evidence on the long-term costs of cheap wage short cuts comes from the Office of Inspector General of HUD. That office conducted a national and regional audit of the Department's Davis-Bacon enforcement program which found that failure to enforce the act is directly related to the employment of untrained labor and shoddy workmanship—resulting in higher costs to the taxpayer. The examples cited in the report are legion, including roofing short cuts that lead to leaking roofs, electrical short cuts that lead to short circuits and fires, carpentry short cuts that lead to extensive maintenance and repair costs.

Consider this example: Kanawha County, WV awarded the contract on a new courthouse roof to an out-of-State contractor which bid 50 percent lower than the local construction company. In the end, the contract was no bargain at all. It was no bargain to the workers who were underpaid by more than $150,000, and it was no bargain to the county when the roof sprung leak after leak, which flooded the courthouse, the judges' chambers and the lawbooks inside. Ceilings, walls, carpet, wall plasters, files, and documents were damaged or destroyed. I can give example after example, on Federal and local contracts, where the Government has learned again and again what the professors and the Inspector General have been telling us—construction short cuts short change the taxpayer.

This lesson should be especially important to the Defense Department. Shoddy workmanship on a public housing project or a courthouse roof is deplorable and expensive—on a missile silo it is indefensible. This June, the Congressional Budget Office reminded us that if the Army wants to meet its goals to improve the quality of its manpower, the Army will have to pay higher wages and bonuses. The study also stressed, however, that higher quality recruits have lower turnover, which saves money on training. No

one on the Armed Services Committee doubts that we get a better soldier with better pay, and the same rule applies to construction and service workers. Do we want shoddy construction at military facilities? Do we want the guards at Federal military installations to be the cheapest people that a contractor can find? Do we want safety inspectors and computer repairmen to be those who cannot find work at the prevailing wage in their communities? These questions answer themselves, but only people with background in labor issues or who have attended hearings on Federal contract reform know to ask them.

Mr. President, I have known these questions and their answers for some time because of my years on the Labor Committee. The Senate should oppose this shortsighted attempt by some members of the Armed Services Committee to save a buck for the bloated defense budget by taking it out of the pockets of our working people. The Armed Services Committee should not be trying to legislate as though it was the Labor Committee. The American worker and the American people deserve better.

Mr. President, how much time remains?

The PRESIDING OFFICER (Mrs. KASSEBAUM). The Senator has 40 seconds remaining on division 1.

Mr. KENNEDY. I reserve the remainder of my time.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, of course let me clarify for everybody where we are. We are going to have a vote on the service contract provision first. Then we are going to have a vote on the Davis-Bacon provision.

The distinguished Senator from Massachusetts would have us believe that the issue here is the working poor. The issue here is one of the strongest joint forces in the American political system. In fact, it is the most powerful troika in politics, and that force is waste, fraud, and abuse.

It never ceases to amaze me, Mr. President, that Members will jump up and down and talk about toilet seats that cost a lot of money, they will talk about wrenches that cost a lot of money, they will talk about coffee pots that cost a lot of money, but when the Armed Services Committee brings forward a real savings that saves more money than every toilet seat, every wrench, every coffee pot, ever bought by the Federal Government in the history of the Republic, we get all kinds of self-righteous outcries about wages.

What we are debating here is a blatant ripoff of the people who do the work, pay the taxes, pull the wagon, and make America work. They do not have the Halls full of people outside lobbying saying, "do not take away this free gift." They are at home working to pay the taxes. That is why they are not here. But the Armed Services Committee knew we were wasting money. That is why we adopted this amendment.

Let me outline what it does. The Service Contracting Act is a completely fraudulent and ridiculous provision that is aimed at preventing services from being contracted. The objective is to eliminate any advantage the private sector has in wages to prevent contracting out. What this provision does is not repeal the law. We should be repealing it. But it raises the threshold to a million dollars. That will exempt about 24 percent of all the dollars spent on services contracted out by the Federal Government.

GAO has done a study of the Service Contract Act, and in 1983 found that it produced wage inflation, ripping off the taxpayer of between 10 and 12 percent. Only 1 percent of all the service employees in America are covered by the Service Contract Act. But yet GAO found that they earned between 10 and 12 percent more because they are covered by this act.

The cost to the Federal taxpayer of not raising this threshold is $811 million. Let me set that in perspective.

Over 5 years CBO, which has no stake in this debate, finds that over $800 million could be saved by raising this threshold. We had a great debate on the space shuttle. This savings would pay for the space shuttle. We had a debate on drug enforcement. This savings would pay for drug enforcement. We had a debate on SDI. These savings would pay for the entire amount being debated on SDI.

What we have here is a simple amendment that tries to be efficient. It lets the Federal Government go into the marketplace and be competitive in buying services. It lets the small contractor who worked for the Federal Government, say a janitor who learned how the system worked, to quit, go into business, and be competitive. The provision of the Armed Services Committee bill is pro small business. It is pro minority in letting people come in and say, "Look, we want to be competitive. Let us bid." What the amendment that is pending before this body does is say you can be efficient in buying wrenches. In fact, we are going to jump up and down if you pay too much for wrenches. You had better be efficient buying toilet seats or we will bring them onto the floor of the Senate.

But if you want to rip the taxpayer off by $800 million, by not being competitive in buying labor since we have organized groups with political action committees, who are out lobbying in the hallway, that is all right. That is helping people. You can steal from the working men and women of America, if you do it for an organized group. You cannot do it on toilet seats and wrenches. But you can do it on labor.

(Mrs. KASSEBAUM assumed the Chair.)

I submit to the Members of the Senate that theft is theft, that waste, fraud, and abuse is waste, fraud, and abuse.

□ 1510

I am not sure whether we are going to win on Davis-Bacon. We may not win on this provision on the Service Contract Act. But I want to assure my colleague it is going to be back every year until the ripoff of the working men and women of America stops.

There is no logic to being inefficient and noncompetitive because some group has a political action committee or a lobbyist or has the ability to deliver votes. It is not right. It is waste, fraud, and abuse, just like paying too much for a wrench, just like paying too much for a hammer, just like paying too much for a toilet seat.

We may not have the votes here today, but this is going to be debated every year as long as I am a member of the Armed Services Committee.

I commend my colleagues to vote this amendment down. If you are concerned about waste, fraud, and abuse, show people you care about it when it hurts you politically. Vote against this amendment. Vote to save $800 million by using the system that built America: free enterprise. Let the free enterprise system work. Do not set an artificial wage scale and impose it on people who want to do business with the Federal Government. Let them be competitive like everybody else.

As far as that creating poverty, let me remind my colleagues that the free enterprise system has done more to destroy poverty than all the Government programs in all the whole history of mankind.

I reserve the remainder of my time.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. Does the Senator yield?

Mr. GRAMM. I am happy to yield.

Mr. HUMPHREY. How much time remains?

The PRESIDING OFFICER. There are 7½ minutes remaining.

Mr. HUMPHREY. Let me clarify. The question before the Senate is the Service Contract Act, which the Senator from Massachusetts seeks to strike. We have not yet gotten to Davis-Bacon. That should be the vote to follow. We are now debating the Service Contract Act. I have listened to all the rhetoric that flowed awhile ago in this Chamber and you get the impression that the Armed Services Committee is trying to repeal the Service Contract Act altogether. That is not the case. That is not the case at all.

The Armed Services Committee has laid before the Senate in the authorization bill now pending a reform, not a repeal, of the Service Contract Act, a reform, a needed reform, an overdue reform, a reform not a repeal, and, furthermore, a reform which will apply to the Service Contract Act as it touches the Department of Defense only. Only as it touches the Department of Defense. It does not apply Governmentwide.

Nonetheless, though this is only a reform and though it will only touch DOD contracts, it involves the savings of hundreds of millions of dollars in the next several years.

It is unfortunate that those who complain the loudest about Government waste and in particular military waste stand up to block the Armed Services Committee when we come forward with a reform that will reduce waste, reduce spending, and do so without diminishing at all military preparedness.

Madam President, this reform, the language before the Senate in the DOD authorization bill, is supported by the Office of Management and Budget. It is supported by the administration. It is supported by the General Accounting Office, by the Grace Commission, by Citizens Against Government Waste, by the U.S. Chamber of Commerce, by the National Federation of Independent Business, by the National Association of Manufacturers, by the Aerospace Industries Association, the Public Research Council.

This reform, if the Senate will leave in the language now before us and not strike it, will save us $811 million, over the next 5 years, according to CBO.

Let me briefly review what the Service Contract Act is all about, Madam President.

The Service Contract Act is in a way the cousin of Davis-Bacon. Where Davis-Bacon only deals with wages on federally funded construction projects, the Service Contract Act deals with wages paid to employees for contracts who perform things such as janitorial services, guard services, and so on.

Whenever the Federal Government seeks to privatize services, seeks to hire private sector workers under contract to perform services, before the Government can even announce the availability of such a contract, the Government has to go to the Department of Labor and obtain what is called a wage determination. That is a very imprecise way to determine what the prevailing wages are for those services in the community.

I would also mention that the Department of Labor is absolutely jammed with these wage determination requests that flow from all of these anticompetitive wage laws passed by Congress over the years, mostly at the behest of well-paid union lobbyists who are jampacked out in the hallway, protecting or trying to protect the sweetheart deals at the expense of the taxpayers of this country.

Furthermore, there have been so many inconsistencies in the interpretation of the Service Contract Act over the years that it has been now extended to cover technical workers.

The Senator from Massachusetts talked about those low-paid workers. He did not mention the fact that the Service Contract Act has been misinterpreted over the years to cover even technical workers who are rather well paid.

Who foots the bill on this excess? Who foots the bill for this anticompetitive excess? Who foots the bill for this sweeheart bill that the labor unions love so much? Some are sitting in the galleries and I hope more are watching on television.

The Armed Services Committee adopted five reforms to the Service Contract Act.

First, we raised the dollar threshold from $2,500 to $1 million. That will eliminate many of the smaller contracts. It will eliminate a lot of the red tape and paperwork associated with these smaller contracts, and, importantly, as the Senator from Texas pointed out, it will enable small businesses to bid on these who are not today bidding.

We raise the threshold from $2,500 to $1 million. Let me point out, that will still leave 77 percent of the dollar volume of DOD service contacts covered by SCA.

Second, we raised the personnel threshold from 5 to 25 employees for the same purpose. We remove the smaller contracts from SCA coverage and in so doing will encourage smaller contractors to bid in the bidding provided for in competitive contracts.

Third, we codified Department of Labor regulations such that SCA will apply only to contracts which only provide services.

Fourth, and this is a good one, one that is really overdue for reform, we eliminate the provision from SCA so that successor contracts must always pay the same wages as predecessor contracts. Once the wages get jacked up a new bidder on a new contract can never bid lower than those that obtained in the previous contract. That is called ratcheting up. That allows the taxpayers never to enjoy the advantages of competition in the private sector. Once they go up they stay there. They can only go higher. They can never come lower. Our reform will change that.

Fifth, we define the term prevailing wages.

Madam President, let me put things in perspective. The service industry I guess is today the largest industry. Maybe it is still second to manufacturing, I do not know. It is huge. There are literally tens of millions of Americans working in the service industry in the private sector. They do not have the advantage of this Service Contract Act. The vast bulk of the people in this country who work in service industries, whether they are guards or others, they do not come under the Service Contract Act. It is only that several hundred thousand, a small percentage in the total community, who happen to work for contractors doing business with the Federal Government who enjoy this sweetheart deal.

So it is not as though, as you might think from some of the rhetoric, we are making a massive attack on every service industry employee in the country. The fact is, we are dealing only with those who work for contractors with the Federal Government and we are talking about a couple hundred thousand. These reforms will save $811 million. I urge my colleagues to oppose the Kennedy amendment, to oppose the motion to strike, and to leave in the DOD a section that is badly needed, with modest reforms.

I thank the Chair.

The PRESIDING OFFICER. Who yields time? There are 34 seconds remaining to the proponents.

Mr. METZENBAUM. How much time remains to the opponents?

The PRESIDING OFFICER. Time has expired.

□ 1520

Mr. METZENBAUM, Madam President, in behalf of the proponents, I yield myself 5 minutes, including the additional time available with respect to the next amendment.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. That will be 34 seconds plus 4½ minutes.

Mr. HUMPHREY. Madam President, a parliamentary inquiry. Does that request require unanimous consent?

The PRESIDING OFFICER. No, it does not.

Mr. HUMPHREY. A further inquiry: This will count against the time of the proponents?

The PRESIDING OFFICER. The Senator from New Hampshire is right.

Mr. METZENBAUM. Madam President, I have no parliamentary inquiry of the Senator from New Hampshire but I want to be certain that while he was asking those questions, it was not charged against my time.

The PRESIDING OFFICER. No, it was not.

Mr. METZENBAUM. Madam President, I have heard the debate of those who oppose this amendment and frankly, it is disturbing to me that they would have the audacity—and that is about the only thing I can call it—to talk about paying working people for their time working on the

job, doing a day's work, and call that waste, fraud, and abuse. If ever there were a bill in which those sacred terms should not be used, it is this one because there is more waste, fraud, and abuse in the Department of Defense than in probably any other department of Government, and I never hear a peep, never hear a word, out of the distinguished Senator from Texas or the distinguished Senator from New Hampshire on that subject. Now we are talking about paying working people a minimum wage, practically speaking, under the service contract parts of the bill and under the other parts of the bill, paying them a very modest wage.

The acts' protective shield applies precisely as Congress intended they should. One of these bills has been in existence for 50 years. Another one has been in existence for 20 years. All of a sudden, this afternoon, in this Armed Services Committee, they are attempting to take away rights protected to the employees over a period of 20 or 50 years.

The jurisdictional question should be raised, What kind of propriety is there in totally going around the Labor Committee to revise the labor laws of this country in a bill having to do with the Department of Defense?

Madam President, Congress passed the Service Contract Act in 1965 to provide labor standards for employees engaged in the performance of Government service contracts. Congress acted because these service employees were—and still are—the poorest and most politically vulnerable members of our national work force.

The 700,000 employees covered by the Service Contract Act are, for the most part, cooks, cashiers, cleaners, custodians, window washers, trash collectors, and others similarly situated at the lower end of our national wage structure. They are overwhelmingly female and minority, and they generally have minimal technical skills and literacy. These are workers whose jobs are likely to be their point of entry into the American economy.

The Service Contract Act is designed to keep the Federal Government out of the business of exploiting these workers. It prohibits Federal service contractors from offering their employees wages and benefits below prevailing community rates. This prohibition effectively prevents contractors from using the shield of Federal contracts to engage in wage-busting acts.

The need for legislation emerged following the 1950's, when the Federal Government for the first time became heavily involved in contracting out these kinds of services. By the early 1960's, the combined effect of short-term contracts with the Federal Government and cut-throat competition among contractors had created a system of substandard wages and benefits. The practice of awarding service contracts to the low bidder without regard to the wages and working conditions imposed by that bidder on his employee inevitably meant that service workers toiled at appalling wages with no fringe benefits, job security or seniority rights; indeed with no voice whatever in their own destiny.

The same forces that led to exploitation of workers also hurt local communities. These communities were forced to deal with sudden surges in unemployment and diminished tax revenues that occurred frequently when labor-intensive service contracts were moved from one community to another in search of the lowest bidder.

The lack of stability in the service contract industry affected the quality of services as well. Higher quality and more productive enterprises too often were displaced by marginal managements and fly-by-night outfits.

Congress knew all of this in 1965. After holding a series of hearings, Congress overwhelmingly approved the Service Contract Act. When the act needed fine-tuning, in 1972 and 1976, Congress again understood the need to extend protections, and again acted by consensus. On all three occasions, the law was so uncontroversial that Senate approval came by voice vote.

Twenty years after passage, the Service Contract Act protects 700,000 workers and covers $10.3 billion in contract actions. And, as this administration is fully aware, the act's protective shield applies precisely as Congress intended it should. In a recent study of 368 contracts covered by the act, the Department of Labor found that covered employment appears to be dominated by the types of workers intended to be protected by the law: janitor, porter, cleaner, housekeeping aid, guard, mess attendant, food service worker, laborer, and supply clerk.

Who among us can actually say that they would like to move in and cut the wages of that class of employee in this country?

Let me tell you about a few of the workers protected by the Service Contract Act, workers who would be the victims of this repeal. Their stories are taken from the record of two recent administrative cases, but they are typical of hundreds of thousands of others.

At Altus Air Force Base in Oklahoma, the Air Force contracts for janitorial and housekeeping services at the base hospital. There are 12 women employed under this contract, performing cleaning and other housekeeping duties. Most of these employees are from minority groups. One worker, Ms. Marta Armendirez, is employed as a housekeeping aide. She cleans, picks up trash, and vacuums and buffs the hospital lab floors three times a week. She drives 92 miles round trip to work every day. She receives an hourly wage of $5.68; her take-home pay is $218 every 2 weeks.

Another employee, Ms. R.T. Flores, works with infectious patients, cleaning operating rooms before and after surgery. She is the sole support for her son. After 4 years at Altus, she takes home $376 every 2 weeks.

Tell those women that they are part of the waste, fraud, and abuse about which my colleagues have spoken.

Or go over to Fort Belvoir, VA.

At Fort Belvoir, VA, 150 workers are employed by an Air Force contractor to perform cleaning services at various base facilities. These employees, who are overwhelmingly female and minority, vacuum carpets, remove trash, sweep floors, wash windows, and sterilize operating and delivery rooms in the base hospital. A typical worker in this unit is Blanche Bishop, who works on the surgical ward and has been employed at Dewitt Army Hospital for 13 years. As of October 1984, she supported three teenage children on her biweekly take-home pay of $428. Her weekly take-home pay averages $214.

Oh, Mrs. Bishop, you certainly are one of those guilty of waste and fraud and abuse as you pick up the trash and you vacuum and you do the buffing of the floors. But it is Blanche Bishop and Marta Armendirez and thousands of others like them who supposedly are gouging the Federal Treasury, whose wages and benefits we are told must be dramatically reduced through unbridled wage competition.

What we are talking about this afternoon is the wages weapons makers pay to these impoverished people.

I find it appalling that this Senate would further impoverish these already poor Americans to feed the greed of Pentagon weapons-makers. Star wars and MX's should not be purchased at the expense of the dignity of janitors and housekeepers.

By effectively repealing the Service Contract Act, the Armed Services Committee would eliminate any meaningful chance for service workers to achieve stability and continuity in employment; to establish health and welfare funds; to have sick leave or holiday pay; to establish training programs; or even to accrue vacation benefits. I cannot believe that the U.S. Senate, in the year 1986, would put itself in this position of oppressor to 700,000 service employees.

Last week, the Joint Economic Committee of the Congress reported a dramatic increase in the concentration of wealth in the United States over the past two decades. Families in the lower 90 percent of those surveyed, a percentage where most service workers covered by this act fall, had only 20 percent of the wealth, versus 28 per-

cent in 1963. Surely, the Federal Government should not widen that tragic gap still further through its contracting policies.

Not only does the act's coverage operate just as Congress intended; but the core of the act—the wage determination by DOL—also is functioning just as Congress intended it should. Wage and benefit determinations conducted by the Department of Labor are an accurate reflection of locally prevailing wagers and benefits. In 1985, out of 52,000 requests for wage determinations under the SCA, only 46 were appealed to the Wage and Hour Administrator, only three went beyond that to the SCA Appeals Board, and not a single one was appealed to the Secretary of Labor. The virtual absence of controversy over DOL wage determinations confirms that the SCA has achieved widespread acceptance.

Against this background, the Armed Services Committee changes would emasculate the act. Defense Department contracts are by far the largest single group of contracts covered under the SCA. Over three-fifths of the dollar volume covered under the act is DOD contract work.

By raising the threshold on covered contracts from $2,500 to $1,000,000, the committee would exempt 94 percent of the contracts now covered. Under the Wage and Hour Division's own analysis, a $1,000,000 threshold would exclude 72 percent of the workers protected under the act. Even these sweeping statistics do not tell the whole story. Contracts valued at over $1,000,000 easily could be fragmented into smaller contracts in order to qualify for the new exemption. Once this occurs, the act would be reduced to little more than a shell.

In my own State of Ohio, 70 million dollars' worth of contracts would be eliminated overnight from SCA coverage, and 4,300 workers would lose the protections accorded by the act. Millions of Federal contract dollars would now be used to finance substandard wages and benefits for cafeteria workers, garbage collectors, mechanics, maintenance workers, cleaners, housekeepers and others at Ohio military installations.

Since 1965, the Consumer Price Index has risen by a factor of 2.4. The committee has totally ignored this modest increase in its headlong rush to increase Congress' original threshold by a factor of 400. No one should be under any illusions; this is an effort to gut the act.

The Armed Services Committee would eliminate the protections of current law in other ways as well.

By eliminating DOL wage determinations for contracts covering less than 25 employees, the committee would overturn action taken by Congress in 1972. Congress acted 14 years ago to require wage determinations for all contracts covering five or more employees because the then-existing cutoff of 25 failed to cover nearly two-thirds of all service workers.

A reversion to the higher threshold of 25 will injure small contractors who benefit substantially from an established wage structure. This is because larger businesses can use wage-busting practices to eliminate their smaller competition.

Indeed, a leading organization of small businesses that provide services to the Federal Government, the National Association of Government Service Contractors, is strongly opposed to the Service Contract Act changes in this bill. The association president testified at a House committee hearing last week that "any limitation on application of the Service Contract Act would seriously hamper our ability to compete in the marketplace."

The elimination of coverage for contractors with fewer than 25 employees also will deprive workers who most need the protections of the act, employees of small contractors. Many of these workers would not even be covered by the minimum wage provisions of the Fair Labor Standards Act if not for a Service Contract Act provision mandating such protection. Incredibly, this change would put the Federal Government in the position of sanctioning subminimum wages.

The Armed Services Committee further has directed the Secretary of Labor to ignore the wages and benefits being paid by an incumbent contractor when setting the prevailing rate for a successor contract. This change would mean that every time workers manage to secure improved wages or working conditions, the prevailing wage can be set at a rate below this newly obtained rate. The result, obviously, is that the incumbent contractor will lose his contract to anyone willing to underbid. This is exactly what happened prior to 1972, when Congress amended the law to protect worker-secured improvements.

There are other changes, such as new definitions of "prevailing rate" and "locality," that are intended to have the same restrictive impact on protections previously accorded under the SCA. Under the Armed Services Committee's concept of "prevailing rate," the Secretary of Labor would not look to the rate that is most prevalent. Rather, the Secretary would be required to accept the lowest possible rates, union or nonunion, minimum or subminimum, that were being offered anywhere within the county or city where the work was being performed.

When all is said and done, these changes—which are masquerading under the banner of SCA reform—amount to nothing less than repeal of the act.

I believe strongly that Congress must repudiate this effort to undermine the Service Contract Act. Unlike private sector employees, we are dealing here with workers who simply are not in a position to adjust to market forces in order to retain their jobs. When bids are opened, these workers find out that their employer has been replaced. They have no way of knowing in advance what other employers are bidding, where they are located, or what it would take to retain the work and keep their jobs.

Prevailing wage protection is all that stands between these men and women and the overnight loss of their livelihood through contractor turnover.

Ironically, the higher threshold strikes directly at the low-wage workers whom the act is meant primarily to protect. A threshold of $1 million would immediately exempt 68 percent of the Federal contract dollars spent on cleaning services; 66 percent of the contract dollars spent on laundry services; 62 percent of the dollars spent on housekeeping services; 42 percent of the dollars spent on guard services; and 36 percent of the dollars spent on food services. When the splitting of larger contracts to fit under the million dollar threshold is factored in, we can expect to see as much as 85 to 90 percent of these contract dollars exempted.

Women and minorities will be the primary victims of this unconscionable tampering with the act. The most common SCA-covered jobs—janitors, cleaners, housekeepers, food service workers, guards, laborers—are disproportionately filled by women, blacks and Hispanics. Depriving them of SCA protections would push tens of thousands of these workers below the poverty level.

As a matter of fundamental decency and equity, which is what Congress had in mind on three prior occasions since 1965, the armed services changes are an affront. If anything, there is a need to strengthen enforcement of the act with regard to DOD service contracts.

As far back as 1978, GAO found serious deficiencies in the administration of the act by the Air Force, the Army and the Navy. The GAO documented numerous instances of contracting agencies failing to request wage determinations from DOL, and obtaining wage determinations but then failing to include them in the service contracts. GAO also found that DOD often failed to pay back wages even after a violation of the Act was discovered. In 2 years during the mid-1970's, 29 percent and 34 percent of the wages due workers were never restored.

More recently, this noncompliance has been exacerbated by a dramatic decline in DOL enforcement. Since 1984, the rate of inspections and inves-

tigations has dropped by almost one-third. Even the absolute number of inspections has been plummeting—by 34 percent in Dallas in 1 year; by 19 percent in Philadelphia; by 26 percent in Seattle; by 16 percent in New York; by 53 percent in Kansas City.

The Changes in SCA coverage also could threaten the safety of hunderds of thousands of Americans. In the absence of a meaningful prevailing wage floor, contractors compete on the basis of low wages, not skill and efficiency. And while many SCA-covered jobs have little direct impact on public safety, there are dramatic exceptions.

In 1985, some 750,000 passengers traveled on airlines chartered by the Department of Defense. Last December, an Arrow DC-8 crashed in Gander, Newfoundland, killing all 248 servicemen and 8 crew members aboard. A contract aircraft mechanics who serviced this Arrow airplane during July and August of 1985 testified before a House subcommittee that he refused to sign the maintenance log because of the poor condition of the airplane.

Within the last month, a GAO report analyzing FAA data on airline safety inspections has made clear that the unsafe condition of this Arrow airplane was far from unique. The GAO concluded that military charter aircraft have much more serious problems complying with FAA safety regulations than other commercial airlines.

If we want to prevent the deaths of other American servicemen and women, we must ensure that military charter aircraft receive the highest quality mechanical and maintenance service available. At present, some of the employees who service military charters are covered by the SCA and others are not. But one thing is clear: once aircraft mechanics and maintenance crews are denied SCA protections against substandard wages, long hours, and poor working conditions, we can expect unqualified personnel and high turnover to be the rule rather than the exception.

At a time when the GAO has cited military charters for their poor safety records, and when the House Armed Services Committee's Subcommittee on Investigations has recommended that DOD periodically inspect each air carrier that contracts with DOD for charter air travel, do we really want to encourage the underbidding of prevailing wage rates in this area? I believe such encouragement, which is what we have before us now, is incompatible with our responsibility to protect the lives of American GI's.

It also bears mentioning that SCA coverage extends to Federal contract actions between NASA and the private sector that directly implicate the future of our Space Program. Let me cite just two examples. The Kennedy Space Center in Florida spent over $500 million in fiscal year 1985 on service contracts for maintenance and repair of space vehicles. And at the Marshall Space Center in Alabama, millions of dollars are spent each year on contracts that employ computer programmers, engineering technicians, environmental test facility operators, and other professionals covered under the Service Contract Act.

After what we have learned, at tragic expense, about the safety practices of our Space Shuttle Program, do we really want NASA to begin rewarding contractors who underbid prevailing wage rates? In my view, such behavior would be a gross dereliction of our responsibility as lawmakers.

I am well aware that the SCA changes included as part of the DOD authorization do not apply to NASA contracts. But let me remind my colleagues that last July, the DOD authorization approved by the Armed Services Committee contained dramatic revisions in the Walsh-Healey Act which also were supposedly limited to DOD contracts. By the time that authorization had been approved by House and Senate conferees, the Walsh-Healey changes applied across the board to all Federal contracts. If we allow the Service Contract Act to be emasculated for DOD contracts, which are over 60 percent of all Federal contracts, we will have opened a door that in all probability cannot be closed.

Finally, I would like to say a few words about the illusion that eliminating basic protections from the SCA will result in substantial Federal budget savings. The recent CBO analysis that asserts such savings is flawed in several major respects.

The CBO savings. Let us talk about that fictitious figure, because that is what it is, no longer applicable. Those savings, estimated at $160 million per year, are greatly exaggerated because they are based on a 1983 Department of Labor analysis of highly paid Department of Defense research and development workers. The Department of Labor itself has found these workers wholly atypical and the CBO estimates ignore that fact.

More important, the CBO study considers only the savings that the Federal Government may derive from paying lower wages. By ignoring the costs of wage competition to the Federal Government the report fails to give a true economic account of the impact of these SCA changes.

Substantial costs will result from this type of wage competition. There are start-up costs associated with more frequent contractor changes. There are cost associated with diminished productivity and quality of services. And there are costs associated with the dislocation of tens if not hundreds of thousands of workers.

Unlimited wage competition may result in as many as 25 percent of the workers covered by SCA being unemployed for 3 months of the year. The cost to Federal and State unemployment trust funds alone would be $45 million.

In addition, many unemployed workers will not find new jobs. If even 10 percent of these workers go on the welfare rolls, the cost to Government would be $42 million in added AFDC payments, based on an average monthly benefit of $346 for a family of three.

Further, most of these service workers, including those reemployed at lower benefits no longer will have health insurance. Assuming that even 1 percent of these newly exposed workers or their families require hospitalization at the average cost of $3,317—American Hospital Association, the result would be $12 million more in uncompensated care costs, which ultimately would be paid by Federal, State, and local governments.

Finally, individuals paying Federal taxes also pay State and local taxes. By cutting wages, we will be depriving all levels of government of millions of dollars in tax revenues.

The supporters of this Armed Services Committee change would have you believe that cost savings are as simple as subtracting a few thousand dollars from each worker's annual paycheck. But it just is not so. Once the costs associated with lower wages are taken into account, it is clear that this change fails even in its own economic terms.

Madam President, for over 20 years, Congress has spoken with one voice to protect the right to a decent minimum standard of living for millions of service workers in this country. I cannot believe that in 1986, this body will vote to put the Federal Government in the business of exploiting these service workers. We must reject the Armed Services Committee proposal.

Madam President, what we are talking about here this afternoon does not have to do with waste, fraud, and abuse. It has to do with whether the U.S. Senate recognizes the laws that have been on the books for 50 years in one case and 20 years in another case, or whether we are suddenly going to go way out of our way for the purpose of helping the weapons makers, the defense contractors, the poor defense contractors who do not pay any taxes though they make hundreds of millions or billions of dollars. This afternoon, we are told that we have to protect the poor defense contractors. And we have to do so, according to my distinguished colleagues on the other side of the aisle, at the expense of the working people who work in the defense industries and defense facilities of this country.

I say these two amendments should be adopted without further ado if there is any compassion at all left in this body.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Madam President, let me begin by responding to a couple of points made by the distinguished Senator from Ohio. First, the assertion that there has been no peep out of me about being efficient in defense procurement suggests that the distinguished Senator did not pay attention last year and this year. In fact, last year I coauthorized the most comprehensive reform of defense procurement in American history. It changed the way we do business with defense contractors. It put the burden on them in billing the Federal Government. It imposed penalties on them with treble damages if they falsebilled. If they submit a fraudulent claim, it is $1 million fine and they can go to jail. So I would prefer not to be lectured on this issue when I have taken a leadership role on it.

□ 1530

The difference is that waste with me does not stop with companies. It stops when we stop wasting the taxpayers' money. Tell me the logic of this. I have here four categories of wage scales in the area, one wage scale for private companies and one for the Federal Government set for service contracting that we require people who do business with the Government to pay. Master console operators, a computer operator, those are not poor people. In the private sector they make $8.95. That is the average wage. But when they work for a company doing business with the Federal Government, the law requires that they earn $11.05. Now, I remind the Senator from Ohio the average working person in this country does not earn $11.05. When the private sector can buy the same skill for $8.95, why should the taxpayer pay $11.05?

I could go down the scale looking at schedulers. The private sector pays $9.50, but if a company is doing business with the Federal Government they are required to pay $11.05. The average worker in America does not make $11.05. Why should that worker's money be used to pay a noncompetitive wage? There is no reason for that except waste, fraud, and abuse backed up by political power. That is the only excuse.

The second thing we are going to vote on here is Davis-Bacon. I am not going to debate whether Davis-Bacon made any sense in the depression, but it makes no sense today and everybody knows it. The American people are not deceived on the issue. We do not propose repealing Davis-Bacon, for which justice and logic cry out. All we are trying to do is to raise the threshold where smaller contracts up to $250,000 are exempt from Davis-Bacon. That covers only 12 percent of the dollars spent by the Federal Government. That should save the taxpayers $150 million over a 5-year period.

Now, in terms of public opinion, there is no doubt about it on this issue. A recent DMI poll found by a margin of 2 to 1 the American people believe we ought to repeal Davis-Bacon and have competitive wages in the construction industry. Even among union families, the ratio was 46 in favor of repeal, 42 opposed to repeal. But we are not repealing. All we are trying to do is to eliminate the provision on small contracts.

Now, let me remind my colleagues that Davis-Bacon, this false wage set by Government, covers only 20 percent of all contracting expenditures. The average person working in construction today earns $20,696. The average person working in manufacturing only earns $16,484. So if you were carried away by speeches about low-income people, forget it when you are talking about Davis-Bacon. We are not cutting anybody's wage. We are saying go out and buy competitively in the market, like General Motors, like any small manufacturer or construction firm anywhere.

Now, we have had numerous studies on this issue. No one surely could argue the facts here. In fact, in a comprehensive study done by Oregon State University, they found that Davis-Bacon produced a premium wage of between 26 and 37 percent. Why should the Federal Government, when we have something built, pay wages between 26 and 37 percent above the private sector that is building the same thing? Does anybody here argue the Federal Government builds things better than the private sector? Does anybody believe that? I submit not.

Why are we doing that? We are doing it because of the power of special interest. And it is a ripoff exactly like paying $500 for toilet seats is a ripoff.

Now, who is opposed to the Kennedy amendment? The Carter administration was opposed, and very much to their credit. The Reagan administration has hee-hawed around on this issue and did not take a position in favor of reform until they were shamed into it by an amendment that I offered in committee last year. That amendment was adopted in the Senate only to die in conference. But this is not a partisan issue. The last Democratic administration and now the current Republican administration says, amend this law. GAO and CBO have given us study after study, year after year, reports that we can save money by having the Federal Government in construction pay competitive wages.

The Conference on Small Business held this last year asked us to do this for small business. The National Association of Counties says, do this, "Do not let us be cheated in spending your money to build bridges and sewer systems." The National League of Cities says, "Reform this law; let us be efficient in spending Federal money."

Basically, this is an issue of economy, and it is also an issue that relates to small business and to minority contractors. If you have to keep two sets of books, pay two sets of wages, it is hard for a small contractor to be competitive. If you want to save the taxpayer money, if you want to help small business, if you want to help minorities get a stake in the future of America, vote no on the Kennedy amendment. I yield the remainder of the time to the distinguished President pro tempore of the Senate.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. I rise in support of the provisions in the Armed Services Committee bill that modify the Davis-Bacon Act, and I oppose the amendment offered by the distinguished Senator from Massachusetts. In the past, I have spoken many times on this floor recommending the repeal of the Davis-Bacon Act. It means billions of dollars in additional costs for federally financed construction. Nowhere is this burden felt more heavily than on military construction. While the committee's provision does not repeal the Davis-Bacon Act for military construction, it does allow significant modifications that will allow us to realize $150 million during the next 5 years.

One hundred and fifty million dollars can be saved here in the next 5 years if we will take what the Armed Services Committee put in this bill. If we would take what we ought to, we could save $150 million a year, but we are unable to get that. We are not even contesting that.

The principal provisions have been discussed, but let me just highlight a few. The committee provision will waive Davis-Bacon for military construction up to $250,000. Previously, the threshold was only $2,000. So we are raising the threshold from contracts of $2,000 to $250,000. The administration—and I might say the Secretary of Labor, the Secretary of Defense, and the Director of the Office of Management and Budget—recommends a threshold of $1 million. We are only making it $250,000.

Madam President, I cannot begin to tell you what a tremendous administrative burden existing law places on both the Government and the contractors for these relatively small contracts. In fact, it is estimated that at

the $250,000 threshold, while more than 70 percent of the contracts within the military construction budget fall in this category, only 12 percent of the contract dollars are affected. So it is only a very small percent.

Now, Davis-Bacon is applied to approximately 20 percent of national construction, and military construction is only 2 percent, and yet it will save $150 million in 5 years.

In 1985, military construction accounted for $7 billion in a $300 billion industry, representing slightly over 2 percent of the industry—only 2 percent. These changes do not even affect all military construction. Davis-Bacon provides a preferential treatment to a small—20 percent—portion of the construction industry.

□ 1540

Close to $300 billion per year is spent on construction, and 80 percent of this construction is done without Davis-Bacon involvement. I want to repeat: 80 percent is done without Davis-Bacon.

Davis-Bacon "protection" for the construction trades is no longer needed.

In 1981, construction workers earned an average of $398 per week, when manufacturing workers earned only $318 a week. Why should construction workers get $398 a week and manufacturing workers get only $318 per week? Why should be Government subsidize it? That is what the Government is doing—they are subsidizing the construction workers through the Davis-Bacon Act.

Davis-Bacon inflates the cost of building.

An Oregon State University study was made in this matter, and it showed that the cost of construction projects where Davis-Bacon applied was 26 to 37 percent higher than the equivalent private construction projects.

Here, the Government has a chance to handle this matter in private construction, and according to the study made it Oregon University, it will save 26 to 37 percent.

We talk about saving money and the budget being tight. Do we want to save money? Here is an opportunity. Are we going to pass it up? I hope not.

Davis-Bacon is hard to administer. Madam President, the time for preferential treatment at the taxpayers' expense is over. This is preferential treatment. It is nothing but preferential treatment if we give construction workers 26 to 37 percent more than other workers get. And why should they do it?

I think it is the responsibility of Congress to save every dollar we can and we ought to save this money.

One hundred and fifty million dollars is not chickenfeed. We can save $150 million in 5 years. We have cut it down. We thought there would be no opposition to this. The threshold has been raised from $2,000 to $250,000. They should not object.

Madam President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 1 minute and 36 seconds.

Mr. KENNEDY. Madam President, how much time do I have?

The PRESIDING OFFICER. Eight minutes and six seconds.

Mr. KENNEDY. I thought I was told I would have 11 minutes after the Senator from Ohio finished.

The PRESIDING OFFICER. The Senator from Ohio requested 3 additional minutes.

Mr. KENNEDY. That explains it. I did not expect that of my good friend.

Mr. METZENBAUM. You should not have left the floor. [Laughter.]

Mr. KENNEDY. I yield 5 minutes to the Senator from Illinois.

Mr. SIMON. Madam President, briefly, on the Davis-Bacon issue, I point out to my colleagues who may be undecided as to how to vote that the Secretary of Labor and the building trades have been negotiating raising the threshold. I do not know how this messes up those negotiations, but adopting this certainly would not help.

I think the basic question is, Should the Federal Government be involved in depressing wages in this country? I have come to the conclusion that the Federal Government should not.

Who is hit hardest by these changes? I am talking about the service contractor now, not Davis-Bacon. On a service contract, it is clear that it is the people at the bottom of the ladder. In Illinois, it is 3,900. Illinois has very few defense contracts. I cannot tell you how many it is in Kansas, South Carolina, Texas, or the other States represented here on the floor.

Who are the people? Let me give the numbers. This is from the Department of Labor.

Janitors, 111,000; housekeeping aides, 50,000; guards, 38,000; mess attendants, 24,000; food service workers, 225,000.

These are the people who are just barely getting by now, and the proposal is to depress their wages further. I cannot believe that the American people want us to do that.

How much are janitors getting now, on the average?—$6.07 an hour. And we want to say to them that we want to pay them less. Food service workers are getting $5.24 an hour; guards, $5.59 an hour. Should we be depressing those wages further? I do not think so.

Then I think we ought to be looking at the quality of work. For example, aircraft mechanics now get an average of $11.43 an hour, and there is already a problem of excessive turnover. If you depress those wages further, there is going to be more turnover, and we are going to have additional safety problems. There is the whole question of more and more turnover, and a poorer and poorer product.

Then, finally, two additional points that I think are important, points that we somehow have lost sight of as we discuss a variety of things here.

One is, what is happening not only in this bill but in a great many other things to the distribution of income in this country? Let me tell you what is happening. We are having fewer and fewer people who own homes in this country, for the first time since the Great Depression, a smaller and smaller percentage. We are having a shrinking middle class.

The disparity between the top 10 percent of our population in income and the bottom 10 percent of our population in income is now 14 to 1. It is 5 to 1 in West Germany; less than that in Japan. Do we want to increase that disparity? I do not think we should. I do not believe the American people want us to do it. Yet, that clearly is the thrust of this legislation.

Then, finally, my friend, the distinguished junior Senator from Texas, talks about the massive power of the unions. Well, the Senator from Texas made it pretty easily in the last election without having that massive power in his support.

I point out to my colleagues that there is not another Western industrialized nation that has a lower percentage of its work force that belongs to unions. While some Senators may view that as a healthy thing, I view it as a basically very unhealthy thing, because they are among the people who helped to build up that middle-income structure that helps the distribution of income in our country.

This is going to depress all that even more. This is not the direction in which we ought to be going.

If we want to save money, we can find some missiles we can knock out; we can stop a few underground tests that we do not need. There are a thousand and one ways to save money, without picking on the poorest people in our country. Yet, that is basically what we are being asked to do.

I hope we could use common sense and a little compassion and accept the amendments offered by the distinguished Senator from Massachusetts, and help people in our country who need help.

Mr. KENNEDY. Madam President, how much time remains?

The PRESIDING OFFICER. Two minutes and thirty-five seconds.

Mr. KENNEDY. Madam President, I think the Senator from Illinois and others have put their finger on the thrust of the argument.

□ 1550

It is interesting for me to stand on the floor and hear that those who really want to save the defense dollar cannot find anything in this massive defense budget of $300 billion to cut back on except on the wages of the lowest-paid individuals in America where a quarter of these families are making less than the poverty level and let us put them at risk.

Madam President, when one examines the most recent study—we have heard a lot about the studies here on the floor—take the HUD study of this administration in reviewing whether there has been compliance and noncompliance on the Davis-Bacon provision and they show where there has been noncompliance, that the contracting here has demonstrated shoddy construction and shoddy work with the increased cost of millions of dollars to the American taxpayer.

Then I hear my good friend from Texas talk about the confidence he has in CBO.

Yet when the Senator from Colorado this past year was quoting a CBO analysis showing favorable budget effects of the oil import fee, Senator GRAMM warned he spent most of his life working with studies and he knew exactly what goes into them. "Yours is a study written by people who want an easy source of revenue," he said, "There is no doubt about the fact that you get CBO to claim that the amendment will save money, but do not believe it."

I say that is about the same kind of judgment that we ought to give to his evaluation of these studies.

Neither the Senator from Texas nor the Senator from South Carolina had indicated what the additional costs would be to the Federal taxpayer with revenue loss by depressed wages, what will be the cost in terms of additional health care that is going to be paid for by the Government.

Madam President, what you are basically doing is saying to the poorest-paid people of this country, "Well, some study in CBO has said that we can squeeze some more money out of you in order to provide additional money for the Defense Department; even though it is a questionable study, we are going to do that."

Madam President, there are better ways, and we all know them, on how we can save taxpayers money.

We do not hear any assault on the major contractors in this debate and discussion. All we talk about is the neediest people and the working poor of our country.

I hope my amendment is successful.

Mr. GRAMM. Madam President, this is not a union issue versus nonunion. This is a taxpayer issue versus waste, fraud, and inefficiency.

The so-called beneficiaries of Davis-Bacon make more money than the average taxpayer who pays for this ripoff. That is the issue. Do not be deceived by all this rhetoric.

I yield the remaining time I have to the Senator from Indiana.

Mr. QUAYLE. Madam President, how much time do I have?

The PRESIDING OFFICER. The Senator from Indiana has 1 minute.

Mr. QUAYLE. Madam President, I would like to just make a straightforward proposal on the Davis-Bacon amendment. That will be the second amendment that the Senate will be voting on. I am always a bit surprised about how people on the Davis-Bacon rush in here and have to defend the status quo year after year after year.

Davis-Bacon came into existence and the $2,000 threshold was established in 1935. It has not been changed since 1935.

Believe me, common sense and logic would dictate that there ought to be a change in the threshold of Davis-Bacon.

In the Senate Armed Services Committee we started out at a $1 million threshold. The Senator from Indiana and others in the amendment I offered reduced that $1 million threshold to $250,000. The $1 million threshold basically repealed for all practical purposes Davis-Bacon. I felt that was wrong.

Madam President, this is absolutely imperative that at some time we have to change that threshold. Certainly, most Senators and I hope a good majority of Senators recognize that you just cannot year after year after year preserve something that was passed in 1935. This is 1986.

Mr. KENNEDY. The yeas and nays, Madam President.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. KENNEDY. I ask for the yeas and nays on the second division.

Mr. GRAMM. On both.

The PRESIDING OFFICER. Is there a sufficient second?

There is there a sufficient second?

The yeas and nays were ordered.

The question is on agreeing to division 1 of the amendment of the Senator from Massachusetts.

On the question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

□ 1610

Mr. ZORINSKY (after having voted in the negative). Madam President, on this vote I have a pair with the Senator from New Jersey [Mr. BRADLEY]. If he were present and voting, he would vote "aye." If I were at liberty to vote, I would vote "nay." Therefore, I withheld my vote.

Mr. SIMPSON. I announce that the Senator from Connecticut [Mr. WEICKER], is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 62, nays 34, as follows:

[Rollcall Vote No. 193 Leg.]

YEAS—62

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Zorinsky, against.

NOT VOTING—3

| | | |
|---|---|---|
| Bradley | Eagleton | Weicker |

So division 1 of amendment No. 2653 was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. (Mr. HECHT) The Senator from Arizona is recognized.

Mr. GOLDWATER. Mr. President, I think it is only fair that I inform my colleagues that we have 20 amendments left. Some of them are very, very involved. Unless we can get the authors of those amendments to agree not to introduce them, I am afraid we are going to be here tomorrow. There is no way in God's green world we can do 20 amendments between now and midnight. If you want to stay all night, we could probably get them done by 5 or 6 in the morning. That is the situation we are in.

My staff is working on it now to see if we cannot talk some of the Members out of their amendments. I do not want to ruin your afternoon, but that is it.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I agree with the Senator from Arizona. We have 20 amendments. Everybody is cooperating but everybody wants an hour. That is what we are running into now. We cannot get anybody to take less than an hour. We cannot get anyone to withdraw amendments.

Now we have heard there may be another amendment coming up that is going to precipitate at least three more amendments relating to the Midgetman missile. If that happens, that is another 5 hours we are not even counting on.

So we are talking about, as the thing is going right now, another 20 hours. I will go either way. I will stay all night and finish up, I think it will be 8 or 9 o'clock tomorrow morning if we stay all night, maybe 6 or 7 or we can go home tonight at 8 o'clock and come back, stay until midnight, 1, 2 o'clock on Sunday morning. We all have a stake in this important bill. Also I know you have amendments you want up. But if anybody wants to go home before Sunday morning about 4 or 5 o'clock, you are going to have to prevail on your colleagues to cut down the time, prevail on your colleagues to hold some of these other amendments to other bills, and prevail on your colleagues to withdraw some of them. It is just that simple. There is nothing more we can do. We are going to finish this bill some time between now and Monday.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts, division 2. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DECONCINI (when his name was called). Mr. President, I have a live pair with the senior Senator from New Jersey [Mr. BRADLEY]. If he were present and voting, he would vote "yea." He cannot be here. If I were permitted to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. SIMPSON. I announce that the Senator from Vermont [Mr. STAFFORD] and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 44, nays 51, as follows:

□ 1620

[Rollcall Vote No. 194 Leg.]

NOT VOTING—4

| | |
|---|---|
| Bradley | Stafford |
| Eagleton | Weicker |

So division 2 of amendment No. 2653 was rejected.

□ 1530

Mr. GRAMM. I move to reconsider the vote by which division 2 was rejected.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2651

(Purpose: To delete authority to establish alternative management systems for scientific, technical, and acquisition personnel)

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. It takes unanimous consent to lay aside the pending amendment.

Mr. STEVENS. I ask unanimous consent that the pending amendment be set-aside in order to consider this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] proposes an amendment numbered 2651.

On page 158 strike out line 8 and all that follows through page 181, line 18.

Mr. STEVENS. Mr. President, this is the first of three amendments. It deals with areas in the bill that are primarily the jurisdiction of the Governmental Affairs Committee. We will agree to a short timeframe limitation, whatever the distinguished Senator from Arizona wishes, 30 minutes or whatever it is—20 minutes.

Mr. GOLDWATER. I just want to ask how long the Senator thinks it will take.

Mr. STEVENS. I would be pleased to agree to a time limitation. It would be up to Senator QUAYLE and Senator BINGAMAN to agree to the time limitation. I would think a maximum of 30 minutes would be sufficient.

Mr. GOLDWATER. The Senator has three amendments.

Mr. STEVENS. Yes, Mr. President, this is the Quayle-Bingaman; the second is GSA; the third deals with entitlement provisions of the pay amendment.

Mr. KERRY. Would the Senator yield without losing his right to the floor?

Mr. STEVENS. Yes, Mr. President.

Mr. KERRY. I would like to follow up. I was discussing with the managers of the bill the possibility of entering into a consent agreement following the amendment of the Senator from Alaska.

Mr. GOLDWATER. That is the understanding, Mr. President, that is all right.

Mr. KERRY. Could we agree that my amendment would be next with a time limitation of 45 minutes, 25 minutes to this side, 20 minutes to the other? And no amendments be in order thereto.

Mr. STEVENS. Reserving the right to object, the Senator is talking about following my amendment?

Mr. KERRY. That is correct.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. QUAYLE. Mr. President, do we have a time agreement? I have no problem with entering into a time agreement, 30 minutes equally divided.

Mr. STEVENS. I am willing to do that. I ask unanimous consent that the time on this amendment be limited to 30 minutes equally divided and that no amendments be in order. It is a simple amendment to strike.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, this is an amendment to strike what is known as the Bingaman-Quayle bill in our committee from this defense bill. This amendment would put into effect a separate pay act for the Department of Defense.

□ 1650

The Department of Defense has a considerable number of civilian employees. Incidentally, the Bingaman-Quayle amendment applies only to the civilian employees of the Department

of Defense. Our committee now and the Government Affairs Committee has held five hearings on pay and personnel provisions that are covered by this amendment. I personally conducted some in California, both at China Lake and at San Diego. There has taken place at each of those locations a significant experiment in the pay area for the Federal Government. Both of those installations are industrial fund installations. They are not operated on the normal basis of just strictly appropriations. They are industrial fund entities.

I think the two experiments have been very good and from the two experiments we can draw a great deal of information.

This Bingaman-Quayle provision would extend a concept from these two experiments of an alternative personnel system for scientists, engineers and acquisition personnel. It deals with these problems as though all of the recruitment and retention problems of the Federal Government are confined to scientific and technical occupations in the Department of Defense, and that is just not true.

We have a considerable number of problems in the personnel system for civil service in the Federal Government. We are working on legislation to deal with all civilian employees. There are difficult problems in the civil service, there is no question about it. At Aberdeen Army Proving Ground in Aberdeen, MD, there is a turnover in civilian guards of 19 percent. In Boston, MA, at Hanscom Air Force Base there is a turnover of clerical employees of 30-percent annually. In Los Angeles, at the Corps of Engineers, the turnover rate is almost 20 percent. We have difficulty in filling jobs now. In one category, in voucher examiners, the delay in filling jobs is 146 days.

The problem of recruitment and retention, as I said, is not limited to the area of scientists, engineers and acquisition personnel, and yet the basic assumption of the Quayle-Bingaman approach or Bingaman-Quayle approach in this defense authorization bill deals with those people and leaves us in the position where the rest of the civilian work force and the problems of that work force are ignored.

Now, I believe that an alternative personnel system in a portion of the Department of Defense will lead to interagency competition in terms of acquisition of the very people we are talking about. This would give only the Department of Defense special powers to deal with scientists, engineers and acquisition personnel, and it will mean that they will have the effect of a suction, just a vacuum to bring out of the other portions of the Federal Government these people who we need throughout the Government.

I call your attention to the fact that the administration policy statement asked for the deletion of this alternative personnel system and states that fragmented agency authority is unacceptable in the view of the administration. They do have pending before our Government Affairs Committee recommendations dealing with the whole civil service.

Also, Mr. President, the Department of Defense itself has written us a letter, and I ask unanimous consent that it be made a part of the record, stating their opposition to this portion of this bill.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ASSISTANT SECRETARY OF DEFENSE,
*Washington, DC, July 29, 1986.*

Hon. TED STEVENS,
*Chairman, Subcommittee on Civil Service, Post Office and General Services, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: The Subcommittee on Civil Service, Post Office, and General Services is currently considering legislation which would provide for changes in the Government's personnel management system. The Department of Defense has a major interest in personnel management improvements and has been deeply involved in the Administration's effort in this area.

Office of Personnel Management Director Horner has recently submitted to the Congress a legislative proposal which would allow for gradual, controlled expansion of the alternative personnel system that has been successfully demonstrated for six years at two Navy laboratories in China Lake and San Diego, California. The Department of Defense believes strongly that this is the best approach to attain long-needed systemic improvements and would very much appreciate your support.

Among the suggestions that have been made is that additional studies and testing be conducted. The Navy demonstration project has been underway for six years and has been very successful. Its success has been widely recognized and its expansion has been supported in a variety of forums. The National Academy of Public Administration in its report on Deregulation of Government Management Project—Personnel Management dated October 1983 recommends expansion of the China Lake program to other government agencies. Most recently, the President's Blue Ribbon Commission on Defense Management, headed by David Packard, recommended extension of the system. We do not believe that additional testing or study is necessary, particularly since the expansion will be on a gradual and controlled basis.

Your interest in improving Federal personnel management is well known. The hearings that you recently held in California provide additional evidence of your continuing interest. The Department of Defense sincerely appreciates your efforts. Legislation which would expand the Navy demonstration project would be a significant step in the direction of achieving needed improvements. Your support would be greatly appreciated.

The Office of Management and Budget advises that there is no objection from the standpoint of the Administration's program to the submission of this report.

Sincerely,

CHAPMAN B. COX.

Mr. STEVENS. So the very department that the Bingaman-Quayle provision attempts to assist has indicated that it does not want a fragmented approach to the personnel system of the United States.

Now, I do not want to appear and I hope I am not interpreted as being critical of the efforts of Senators BINGAMAN and QUAYLE. They appeared before our committee. Senator BINGAMAN is on the Government Affairs Committee also, and he is working with me and the rest of the committee members on the subject of the entire civilian work force. I am sure they will say they place a higher priority on trying to settle the problems of the Department of Defense than the rest of the Government, or at least they believe that this is a vehicle for putting into effect a partial solution to a part of the problems of the Federal Civil Service.

But keep in mind that the Department of Defense now has almost one-half of the civilian employees of the Federal Government. This amendment deals with just a portion of them and leaves us in a position where, if the Bingaman-Quayle provision becomes law, the balance of the work force, both in the Department of Defense and throughout the rest of the executive branch, would be in effect punished because there will be special provisions and special incentives for but a portion of the scientific, engineering, and acquisition personnel currently employed by the U.S. Government.

I reserve the remainder of my time. Again, I do hope that Members will support my motion made on behalf of the Government Affairs Committee to strike this provision.

Mr. QUAYLE. Mr. President, I yield myself 5 minutes.

Mr. President, I have no disagreement with the Senator from Alaska in his assertion that this only deals with the Defense Department and the fact that it is not governmentwide. That statement is factually correct. The Senator implies that for some reason since the Senate Armed Services Committee has done a lot of work, we have had a lot of hearings on this issue to try to come up with an alternative personnel system within the Department of Defense, this is not right.

I might just point out to the Senator that we had made a parliamentary inquiry to the Parliamentarian as to where this amendment, if it was a freestanding measure, would be referred and, if it was a freestanding measure, it would have been referred to the Senate Armed Services Committee, so we do in fact have jurisdiction.

I also say to the Senator from Alaska that I hope to work with him to get a governmentwide program to deal with civil service reform. As a matter of fact, we specifically say that

the alternative personnel management system that is in our bill is good for 5 years or—and I think this is very important, Mr. President—until a governmentwide personnel system is adopted.

So once the Senator, who is a champion in the area of civil service reform and looks out for the rights of civil service employees like nobody else, and his committee and the Congress adopted a governmentwide reform, that would supersede what we have done. But the point is, Mr. President, we in fact cannot wait any longer.

One of the top priorities and one of the top recommendations of the Packard Commission was to deal with the idea of enhancing the quality of acquisition personnel. It said if you are going to deal with acquisition reform, what you are going to have to come to grips with is, how, in fact, can you increase and enhance that quality of acquisition personnel?

Let me just read one of the primary recommendations of the Packard Commission; that really was the incentive for us to move forward.

□ 1650

The Senator from New Mexico and I went to great lengths to testify before the Senator from Alaska's subcommittee. We have been very upfront about what we have done. We asked for their participation.

Now we are at this particular juncture—whether we are going to have any acquisition reform for personnel or not. I hope we will be able to keep this reform measure in, which allows for flexibility, which allows for a better type of assistant to train and support in the Department.

There are approximately 200,000 civilian employees in the Department of Defense. The Packard Commission spent a lot of time, as did our committee, in looking at the personnel side of it. You have the operational side and the structural side but also the people side.

Let me read a few statements from the Packard Commission that dealt with this. One question was how the Packard Commission could enhance the quality of acquisition personnel. Here is what they said:

DOD must be able to attract and retain the caliber of people necessary for a quality acquisition program. Significant improvements should be made in the senior-level appointment system. The Secretary of Defense should have increased authority to establish flexible personnel management policies necessary to improve defense acquisition. An alternate personnel management system should be established to include senior acquisition personnel and contracting officers as well as scientists and engineers. Federal regulations should establish business-related education and experience criteria for civilian contracting personnel, which will provide a basis for the professionalization of their career paths. Federal law should permit expanded opportunities for the education and training of all civiliam acquisition personnel.

I submit to the Senate that that is precisely what we are trying to do.

Mr. President, we are also learning from experience. We had a couple of very good examples of where a flexible personnel system worked to the advantage of getting better people into the Department of Defense, where you had better productivity, where you had good management, and where you had an overall better system.

One of the systems that is known to us, and it came before our committee, was the China Lake experiment in California, where they had the opportunity to introduce this more flexible type of a system.

I can tell the Senate that with the hearings we had, people came before that committee, referred to that China Lake experience, and said they had good results. Why did they have good results? Because they had flexibility in the system. They had a better promotional career path. They had a better pay situation. They had a better situation to reward people.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. QUAYLE. I yield myself 1 additional minute.

They had a system at China Lake that worked. It worked for the improvement of the management skills of these employees.

What we have attempted to do in our amendment that is before Senate, and in the Senate Armed Services Committee, was to try to go in that direction, to get an increase in the quality of personnel system, to recognize that if we are going to improve acquisition, we have to begin with the people. The people are a very important commodity in increasing the efficiency and the productivity of the acquisition system.

If we are going to demand efficiency, as we should, we ought to have a better system than the antiquated system we had before.

Once the Governmentwide program and the reforms come from the Senator from Alaska's committee, that would supersede this recommendation, and that would take place.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. QUAYLE. I yield 5 minutes to the Senator from New Mexico.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. BINGAMAN. I yield.

Mr. DOLE. Mr. President, as I understand it, there are to be cloture votes at 5 o'clock unless they are postponed.

The PRESIDING OFFICER. That is correct.

Mr. DOLE. I ask unanimous consent that they be postponed until 6 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I join the Senator from Indiana in opposition to the amendment of the Senator from Alaska.

It is clear to me that the issue here is, are we going to do something to improve the acquisition personnel system in the Department of Defense this year, or are we going to do nothing to improve that acquisition personnel system?

The provisions which are the subject of the Senator from Alaska's amendment are essentially the same or very similar to those that were introduced as a freestanding piece of legislation in the Senate by me and Senator QUAYLE, Senator WILSON, Senator GOLDWATER, Senator NUNN, Senator CHILES, Senator ROCKEFELLER, and Senator GORE.

I think there is general agreement in this body about the need to improve the quality of civilian acquisition work force in the Defense Department. There is general agreement that the China Lake demonstration project has worked very effectively and that the Naval Ocean System Center in San Diego experiment has worked effectively in providing additional flexibility in this system.

The thrust of these experiments, and the thrust of the provision we are here defending, is to try to apply more flexibility into the system, to try to allow the managers who are being held accountable for results—to give them the authority to manage their people, to reward people who do good work, and to refuse to reward those who do not.

As the Senator from Indiana pointed out, this provision was proposed by David Packard and his Commission. It is a major piece of their recommendation. It was proposed earlier in another report that Mr. Packard did on the National Laboratories in 1983, and he has carried forward with his efforts to get this done.

The legislation that is the subject of this debate was introduced because Mr. Packard came to Congress and came to me and many of the cosponsors and asked us to do what we are trying to accomplish today.

We tried to work with the Governmental Affairs Committee on the issue. We made an effort to accommodate their needs, but we find that, on one side, there are those in the Office of Management and Budget who essentially say: "If we cannot do everything, let us do nothing this year. If we cannot apply the China Lake system to the entire work force, let us not apply it in the Defense Department."

On the other side, we have a group that is comfortable with the status quo, and they do not want to see any major changes in the personnel system as it exists today.

Those of us who are defending this position and resisting the amendment being offered by the Senator from Alaska are trying to get something done this year and get this process started to upgrade the quality of the scientists in the work force that deals with acquisition in the Department of Defense.

Mr. President, I believe that all of us have demonstrated a willingness to work with the Governmental Affairs Committee. If this provision is left in, I am sure that accommodation can be made in the conference committee, to accommodate some of the concerns that the Senator from Alaska has. But I urge my colleagues to defeat this amendment. I urge the Senate not to reject this major initiative that Mr. Packard and his Commission came forward with.

If we allow the Civil Service bureaucracy to once again swallow up the recommendations that have been put forward by Mr. Packard and his colleagues——

The PRESIDING OFFICER (Mr. GARN). The Senator's 5 minutes have expired.

Mr. BINGAMAN. Mr. President, I request that I be allowed 1 additional minute.

Mr. QUAYLE. I yield the Senator 1 additional minute.

Mr. BINGAMAN. Mr. President, I believe if we allow the Civil Service bureaucracy to once again swallow up this kind of recommendation this year we will be making a very serious mistake. We need to give DOD acquisition managers the ability to manage their personnel and retain and recruit the top quality people we need in order to deliver the research and weapons systems that are needed for the Nation's defense.

Thank you, Mr. President.

I yield the floor.

Mr. STEVENS. Mr. President, I yield myself 5 minutes of the 7 minutes I have remaining. Is that correct?

The PRESIDING OFFICER. The Senator from Alaska is correct.

Mr. STEVENS. Mr. President, the Senate should know that the General Accounting Office appeared before our committee and specifically opposed the Bingaman and Quayle proposal because they said it is a selective treatment of employees and a proliferation of alternative personnel management systems. They went on to indicate that if alternative personnel systems are needed, they believe it preferable to establish them not on the basis of skills but on an agency-by-agency basis to eventually include all agencies with central control exercised by the Office of Personnel Management.

Incidentally, I might say parenthetically I think that what is holding up the defense authorization bill is the extension of the scope of jurisdiction of this committee by including provision after provision that is pending before other committees in the Senate.

In this regard, this legislation that is included in the defense bill would remove thousands of employees from the competitive service, eliminate the pay cap that applies to those employees only but at the same time remove from Civil Service competitive service. They would no longer have the rights of appeal to the Merit System Protection Board. It will extend the period for probationary employment from 1 to 3 years. They are denied procedural protection for removal, suspension, or other rates under the Merit System Protection Board during that period.

Mr. President, if we are going to have some changes in those they ought to be Governmentwide.

The net result, as I said before, if this Bingaman-Quayle approach applies only to scientists and engineers and these acquisition personnel in the Department of Defense, they will have the right to recruit from the rest of the Federal Government and the problems will proliferate. There will be greater problems in other areas.

Let me tell you, for instance, in the National Institute of Neurological and Communicative Disorders and Stroke, they waited 2 years to find someone who would take the positions that were available there. The noncompetitive salaries paid to physicians and to those involved in research for NIH have been inadequate. We know they are inadequate. We are trying to solve the problems across the board.

What this will do is this will turn over the extra money that is there to give incentive to hire people solely to the Department of Defense. By the way, built into this is a 5-percent pay increase in pay for the same jobs for the Department of Defense.

By the way, it is not funded. There is no money added to it.

You know what they do. They are going to take it away from the other people who work for the Department of Defense because there is no added money in this bill to fund the reforms that they believe ought to be put into effect.

We are working trying to get a generic bill to extend the experiments of China Lake and the San Diego installation. They were good experiments. But ask them.

Mr. President, I went out and asked them. They have industrial funding. When they want to expand their work force they go out and get additional jobs.

You do not get additional jobs if you have a security agency as they have up in Boston or if you have research like out here at NIH.

The impact of what the Bingaman-Quayle bill incorporated in this Department of Defense bill would do is to set up a separate system within the Department of Defense for civilians who the current managers wish they could pay more to their people. I do not know anyone who does not wish they could pay more to their people.

The problem is whether you have a system, a national system for civilian employment or a special one for the Department of Defense only.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. STEVENS. And I think this is wrong.

The PRESIDING OFFICER. Who yields time?

Mr. BINGAMAN. Mr. President, will the manager on our side yield me an additional minute?

Mr. QUAYLE. I yield the Senator an additional 1 minute.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, let me just ask unanimous consent that we print in the RECORD at this point an editorial dated May 16, 1986, entitled "China Lake" from the Wall Street Journal.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From The Wall Street Journal, May 16, 1986]

CHINA LAKE

Beginning in the late 19th century, U.S. reformers tried to build a federal civil-service system immune from interference by politicians. They succeeded quite well. In fact, the reformers of today are trying to knock a few bricks out of the structure to give federal managers room to breathe. The Reagan administration has just made a proposal along these lines. It is so good that opponents are already circling the baby, waiting for a chance to smother it when no one is looking.

President Jimmy Carter's 1978 Civil Service Reform Act recognized that the rigid federal work rules had to be changed. The act authorized experiments with the startling idea of paying people according to their work performance.

Merit-pay experiments were set up at two Navy scientific installations, one at the China Lake Naval Weapons Center in the Mojave Desert. The place was having tremendous trouble attracting and holding scientific and technical talent under the federal system of rigid job classifications and automatic wage increases.

The experiment gave managers more discretion in setting entry salaries and moving employees around within broad "pay bands." The money that usually goes for automatic pay increases was given to the managers to distribute according to employee performance.

The results are now in, and the new system has been a success. Employees like the new system better than the old one. The pay range for individual jobs has expanded. Better employees now want to stay in their jobs more than poor performers do. Managers are tickled, since the new rules cut the time they must spend on personnel matters.

There was a big exception to the good news: The experiment increased costs by 5 percent. The Office of Personel Management, which ran the experiment, says this is

partly because scientists are in very short supply, which is not true for most federal jobs. Also, certain automatic pay increases were grandfathered into the experiment. The Office of Management and Budget was not too impressed with the fiscal explanations, and has insisted that further efforts of this sort be revenue neutral.

The administration is now putting together a bill to allow other agencies to go to the China Lake system. Some interested observers in Congress and elsewhere like the idea, and even critcis don't want to stomp on it too hard. After all, the idea of taking home more pay for more work is as American as you can get.

So we are beginning to hear the criticisms that seesaw, fuzz the edges and change the subject. Some say that China Lake, with all its scientific personnel, is an exception. Others are backing Rep. Mary Rose Oakar's bill on pay reform, which calls for more studies on yet other possible changes. They say they prefer Rep. Oakar's "total" approach to the administration's "quick fix."

Or they say that if we want to attract good people to the civil service, we should first examine all of federal personnel policy for inconsistencies. For instance, the present House tax-reform package removes a big tax break on federal pensions. Able people will flee government service before this provision takes effect.

These ideas aren't crazy. We have built a federal personnel system so full of rules and preferential provisions that you can't fix one part of it without worrying about whether you're going to mess up another.

But the bottom line of all these objections is that you shouldn't do anything in the foreseeable future about the results of China Lake.

All of this policy chewing gum sticking to the shoes of this issue is a reason why the administration should get its bill into play fast and push for it hard. If there is one management principle that should not have to be defended again and again, it is the idea that a manager can perform only if he has some control over the incentive system of his organization. The federal system has violated this principle massively, and the results have been just as massively apparent to each and every American who has had to deal with the government bureaucracy.

Now, through painstaking experimentation in official channels, the U.S. government has rediscovered the wheel and actually means to get rolling on it. Those who resist will betray how little they care about encouraging government employees to do their best for the people they serve.

Mr. BINGAMAN. Let me just quote from that editorial if I could, Mr. President. It points out that:

If there is one managment principle that should not have to be defended again and again, it is the idea that a manager can perform only if he has some control over the incentive system of his organization. The federal system has violated this principle massively, and the results have been just as massively apparent to each and every American who has had to deal with the government bureaucracy.

That is the basis for us wishing to keep this provision in the law, Mr. President. I really do think the issue here——

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. BINGAMAN. Could I get an additional 30 seconds, Mr. President?

Mr. QUAYLE. I yield an additional 30 seconds.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, the issue here is are we going to do anything this year or are we going to put off doing anything on the theory that some day we will fix the whole problem?

The truth is we will not fix the whole problem. We need to go at it incrementally, and this is a good step in the right direction.

I urge defeat of the amendment by the Senator form Alaska.

Mr. STEVENS. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator form Alaska has 2 minutes and the Senator from Indiana has 3 minutes.

Mr. STEVENS. I yield 2 minutes to the chairman of our committee.

Mr. ROTH. Mr. President, I am pleased to join Senator STEVENS. I support his amendment as one who is concerned about the problems underlying our personnel. Nevertheless, what I am concerned about is that if we go ahead with the legislation as it now exists it will result in the establishment of a separate personnel system for individual Federal agencies. We cannot permit this to happen.

Mr. President, I join Senator STEVENS, chairman of the Subcommittee on Civil Service, Post Office, and General Services, in his effort to strike from the DOD authorization bill the provisions authorizing the creation of an alternative management system for scientific, technical, and acquisition personnel inside the Department of Defense.

As an original sponsor of the President's Blue Ribbon Commission on Defense Management and a strong supporter of its recommendations, I believe the Government must improve its ability to attract and retain those employees critical to our national security needs. Yet, I am very concerned about the standard and precedent that this legislation would set.

While I understand and am sympathetic to problems underlying the Packard Commission recommendations, I am very concerned about the establishment of separate personnel systems for individual Federal agencies. This bill would do just that. It would establish in the Department of Defense a separate management and pay system for acquisition, scientific, and technical personnel. In addtion, provisions contained in the legislation would permit alternative systems to be created along organizational lines, thus including a much larger group of individuals. Some estimates have placed this number at over 300,000.

This proposal comes at the same time the administration has released "The Civil Service Simplifaction Act of 1986"—a proposal for a comprehensive reform of the entire civil service system based on the China Lake and San Diego Naval Operations demonstration projects. Any effort to reform the civil service system should not focus on specific agencies or occupations, but instead take into account the entire Federal system.

The Office of Management and Budget, in a statement of administration policy, urged that this section of the bill be deleted for the same reason. "Fragmented agency authority is unacceptable" in a view of the administration's desire for comprehensive civil service reform, the statement said.

With the White House, Senator STEVENS, Congressman FORD, and myself all interested in pursuing comprehensive civil service reform legislation, it is important that we do not start to deal with individual agencies in a piecemeal fashion. This past year we worked long and hard at completing the civil service retirement reform legislation. It is inevitable that we will now turn to the current civil service to examine potential improvements in that system. The demonstration projects will be very helpful in evaluating alternative systems. Yet, creating a separate personnel system for acquisition, technical, and scientific personnel inside the Department of Defense could impede an orderly Governmentwide expansion of any comprehensive reform legislation.

In addition, I am concerned that technicians and scientists outside the Department of Defense would feel, legitimately, that they are being treated unfairly by the creation of this alternative system. it is difficult to understand why a scientist conducting cancer research at the National Institute of Health should be treated differently than a scientist working for the Department of Defense.

Because of these concerns, I support Senator STEVENS in his effort to strike from this legislation the portion creating a separate management personnel system inside the Department of Defense.

For these and other reasons, I urge the adoption of the Stevens amendment.

I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, let me conclude by saying that this new personnel system and the regulations and the implementation of it will be done in conjunction with the Director of OPM and the Secretary of Defense.

Furthermore, Mr. President, let me point out that of all the procurement dollars of the Federal Government, 80

percent of the procurement dollars go and are in the Department of Defense.

I believe that the issue that we have before us here today is are we going to try to reform and to improve our acquisition personnel system within the Department of Defense or are we not? Are we going to maintain the status quo, or are we not?

We have heard for years and months and seen all the revelations of the claw hammers and toilet seats and spare parts and all of this type of thing, and we have seen dramatic attention paid to the whole procurement process with the formation of the Packard Commission.

□ 1710

Now, you would think that the least that we could do is to begin to implement some changes in the area of personnel and improve the incentives in that personnel system. This amendment that we have in the Senate Armed Services Committee in the defense authorization bill begins to move in that direction.

So the choice is very clear. Either we want to say no—no reforms, no changes in the personnel system, do not worry about it—or we do want to change it and we do want to have better flexibility and we do want to have better management practices and we do what to have a quicker carrer path promotions and we what to have better pay and we do want to have a better system.

I hope that the Senate will reject this amendment which is the preservation of the status quo and will vote to table this amendment which will move in a direction of the Packard Commission and which many of the witnesses testified to see the enhancement of the quality of the acquisition personnel.

Mr. President, I move to table the pending amendment. I yield back the balance of my time.

Mr. STEVENS. Mr. President, has all time expired?

The PRESIDING OFFICER. The Senator from Alaska still has 1 minute.

Mr. QUAYLE. I withhold the tabling motion.

Mr. STEVENS. Mr. President, the real problem with this amendment is that it presumes that all of the problems concerning engineers and scientists and acquisition personnel are in the Department of Defense. I do not know why the Armed Services Committees has to take onto itself the problem of trying to solve the personnel problems of the civilian portion of our Government.

We are working on it. This is one of the basic problems that is involved. But if you solved just the Department of Defense and let them spend the vast amount of money available to the Department of Defense, how are we going to solve the rest of the problems where there is no surplus money? This is solving the Defense Department problems with money, but we do not have money for the rest of the departments.

The PRESIDING OFFICER. The time of the Senator from Alaska has expired.

Mr. QUAYLE. Mr. President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Indiana [Mr. QUAYLE] to table the amendment of the Senator from Alaska [Mr. STEVENS]. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Vermont [Mr. STAFFORD] and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from New Jersey [Mr. BRADLEY] are necessarily absent.

The PRESIDING OFFICER. (Mr. Gramm). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 44, nays 52, as follows:

[Rollcall Vote No. 195 Leg.]

NOT VOTING—4

| | |
|---|---|
| Bradley | Stafford |
| Eagleton | Weicker |

So the motion to table amendment No. 2651 was rejected.

□ 1730

Mr. STEVENS. Mr. President, I now move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2651) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TRIBLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I ask unanimous consent that the pending amendments be set aside for the purpose of offering a brief amendment which I believe has been cleared on both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2654

(Purpose: To require the Secretary of Defense to take action to implement certain goals with respect to the use of coal at defense facilities in the United States)

Mr. SPECTER. Mr. President, I send an amendment to the desk and ask for its immediate consideration. I send the amendment on behalf of myself, Mr. HEINZ, Mr. BYRD, Mr. ROCKEFELLER, and Mr. TRIBLE.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER], for himself, Mr. HEINZ, Mr. ROCKEFELLER, and Mr. TRIBLE proposes an amendment numbered 2654.

Mr. SPECTER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 296, line 16, insert "(A)" after "(1)".

On page 296, between lines 20 and 21, insert the following new subparagraph:

(B) The Secretary of Defense shall take such action as may be necessary to implement, at the earliest practicable date and with funds provided for such purpose by section 8110 of the Department of Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190; 99 Stat. 1222), the program proposed by the Department of Defense in a letter dated August 30, 1985, from the Assistant Secretary of Defense for Acquisition and Logistics to rehabilitate and convert current steam generating plants at defense facilities in the United States to coal burning facilities in order to achieve a coal consumption target of 1,600,000 short tons of coal per year (including at least 300,000 short tons of anthracite coal) above current consumption levels at Department of Defense facilities in the United States by fiscal year 1994. *Provided further,* That during fiscal year 1987, the amount of anthracite coal purchased by the

Department shall be at least 300,000 short tons.

Mr. SPECTER. Mr. President, if the oil embargo of 1973 taught America anything, it clearly proved that dependency on foreign suppliers for strategic commodities can engender economic and political vulnerability. As chairman of the Senate Coal Caucus, and Senator from a State rich in energy reserves, I believe we must maintain our Nation's energy independence through the use of coal and other domestic fuels for our energy needs.

In 1982, the Senate included a provision requiring the U.S. Department of Defense [DOD] to purchase and use American coal at its military installations in Europe. In addition, DOD was prohibited from converting coal facilities to another energy source, and was required to stockpile a 1-year supply of coal in case of supply interruption.

In this amendment to the defense authorization bill, we can continue our commitment to the American coal industry. This commitment is in current law. The amendment will require the Department of Defense to purchase 300,000 tons of anthracite coal in fiscal year 1987.

The Department of Defense purchase of U.S. anthracite and bituminous coal has proven economically efficient and effective. Any changes in this program must be preceded by substantial expert testimony and evidence that the U.S. coal producers, railroads, maritime industry, and our Nation's security will not be jeopardized.

I will continue to work for maintaining the use of American-produced coal for DOD energy needs at U.S. bases as a means of enhancing America's energy independence and increasing coal-related employment.

Mr. President, I believe this amendment is acceptable to the floor managers. I want to thank the Senator from South Carolina [Mr. THURMOND] for his understanding and help in working out this amendment.

Mr. HEINZ. Mr. President, I join my colleagues from Pennsylvania to offer this important amendment which enables the Department of Defense to implement the rehabilitation and conversion of steam generating plants to coal-burning facilities.

Our amendment confirms the importance of the continental U.S. Energy Rehabilitation and Conversion Program as stated in the 1986 defense appropriations bill. It is the result of years of discussions and planning by the Defense Authorizing and Appropriations Committees in both Chambers, and is important to the creation of a military that can depend upon a domestic source of energy. The program will enable coal consumption at 37 continental U.S. installations and will increase the level of consumption by $1.6 million short tons by fiscal year 1994.

Although I still have many deep reservations concerning the lifting of restrictions for conversion to district heat at United States installations in Europe, it is my belief that the amendment before us forces the Department of Defense to manage its energy program without crushing the American anthracite and bituminous coal industries.

Mr. President, the amendment before us mutually benefits the military and the U.S. coal producers by ensuring that our domestic continental U.S. installations can depend on a stable and reliable source of energy. The established targets of 1.6 million short tons of coal a year including the required purchase of at least 304,000 tons of anthracite will also guarantee a livelihood to some 2,000 to 3,000 coal miners in Pennsylvania. If the coal producers employing these miners were forced to close mines because the Department of Defense abandoned a policy directed at energy independence, the repercussions for our national security and the American coal industry can not be underestimated. Therefore, I ask for the support of my colleagues for this amendment.

Mr. BYRD. Mr. President, last November at my request, and with the assistance and support of the distinguished chairman of the Defense Appropriations Subcommittee—Mr. STEVENS—the committee report accompanying the fiscal year 1986 Department of Defense appropriation bill included language directing the Department of Defense to implement immediately its proposal to increase the domestic use of coal. This program was designed to promote greater reliance on domestic energy resources. The 7-year Department of Defense plan has submitted to the committee on August 30, 1985. It is designed to increase the use of bituminous coal at U.S. defense installations by 1.6 million short tons by 1994. In addition, the amount of anthracite coal was to remain at least at the current purchase level of 302,000 short tons.

Subsequently, on December 19, 1985, the House-Senate conferees approved an amount of $25 million to implement the plan. This provision became section 8110 of Public Law 99-190, and is quoted below:

SEC. 8110. Of the funds available in the Army Industrial Fund, $25,000,000 shall be available to be used to implement immediately, or to transfer to another appropriation account in this Act to be used to implement immediately, the program proposed by the Department in its letter of August 30, 1985, from the Assistant Secretary of Defense for Acquisition and Logistics, to rehabilitate and convert current steam generating plants at defense facilities in the United States to coal-burning facilities in order to achieve a coal consumption target of 1,600,000 short tons of coal per year above current consumption levels at Department of Defense facilities in the United States by fiscal year 1994: *Provided*, That anthracite or bituminous coal shall be the source of energy at such installations: *Provided further*, That during the implementation of this proposal, the amount of anthracite coal purchased by the Department shall remain at least at the current annual purchase level, 302,000 short tons.

The purpose of the amendment offered by Senators SPECTER, HEINZ, and myself is to incorporate a provision similar to section 8110 into the fiscal year 1987 Defense authorization bill so that there will be no misunderstanding or faltering by the Defense Department in the pursuit of this program in fiscal year 1987.

I urge the adoption of the amendment.

(Mr. ARMSTRONG assumed the Chair.)

Mr. THURMOND. Mr. President, the distinguished Senators from Pennsylvania [Mr. HEINZ and Mr. SPECTER] spoke to me about this matter. We are willing to agree to this amendment. I would like to give a little background.

Our defense bill contains certain provisions on this subject.

Permits conversion of heating facilities for U.S. installations in Europe from coal to district heat or gas or oil whenever it is cost effective or required by the host nation.

This provision will result in a major cost savings of $20 to $40 million per year in operating costs and $385 million in construction costs that would be needed to comply with German environmental laws.

This provision will reduce a major irritant between the United States and Germany. In letters from Bonn to DOD and State Department, German officials have expressed concern over local political fallout caused by United States refusal to permit bases to connect to cleaner, cheaper public utilities systems.

This provision will improve readiness by curtailing waste.

This provision is consistent with the President's goal of eliminating waste and encouraging competition and saving where we can.

The purpose of this amendment by the distinguished Senator from Pennsylvania [Mr. SPECTER]—and Mr. HEINZ is on it, too—is to permit an orderly transition from using coal in Europe to using coal in the United States in order to reach a consumption target of 1,600,000 tons annually by 1994.

The minimum purchase requirement of 300,000 tons of anthracite coal is only to apply to fiscal year 1987.

Mr. President, we have considered it and are willing to make that concession in order to get the big plan approved, which is so important on this question.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, I am not going to oppose the amendment here this afternoon because it is a step in the right direction. I simply want to remind my colleagues that in the name of domestic politics, we have literally been carrying coals to Newcastle. We have been buying coal of higher sulfur than we could buy domestically on the economy in Europe. We have been paying big premiums to take it over there, creating environmental and political problems when it gets there. It is absolutely absurd policy which cheats the taxpayer and creates tremendous problems with our allies. We are committing here to a compromise to buy 100,000 tons more of coal than we need and we are doing that to prevent doing something that is more absurd than we have been doing.

I submit, Mr. President, with all of the problems we have in defense, buying more coal than we know we are going to use as a compromise to not shipping coal to Newcastle may be an improvement, but it is plain wrong as far as foreign policy and defense are concerned. I just want to go on record here today that I intend in the future, if I am the only opponent, to actively fight this amendment. This ought to be stopped because it is an absolute outrage.

I do not expect this speech to make any difference but I just want to go on record. This is the last time that this individual Senator intends to compromise on this issue.

Mr. STEVENS. If the Senator will yield, I echo what the Senator from Texas says. We are now buying more coal than we need. If we do buy it, it will mean we reduce something else in the Department of Defense because these are outlays. These are 100 percent outlays we are talking about now, real dollars that are going to replace real jobs in production units. They are going to replace airplanes or replace some form of research that is necessary. As we get to the appropriations process, we are going to be bound by this. This is an entitlement. Let us make sure everyone understands.

I am not going to oppose it because the committee says they are going to accept it. But in terms of financing, it is a very poor way to deal with setting priorities in defense.

Mr. THURMOND. In response, Mr. President, I just want to say we are solving this German problem. It is recommended by Defense, recommended by the administration. It has been a very sensitive matter. We are saving $20 billion to $40 billion a year. Also, we are saving a cost of probably $500 million we would have to incur if we kept on with what we are doing in order to conform to the law in Germany. This is just a situation that we are trying to satisfy. The coal will not be wasted, the money will not be wasted. If that coal is not needed in 1 year, it will be used the next year. I think it is a good deal all around.

Mr. GOLDWATER. Will the Senator yield?

Mr. THURMOND. I am happy to yield.

Mr. GOLDWATER. Mr. President, the Senator from Pennsylvania spoke to me and said he had a statement to make. I did not know what it was. If this is the subject, I wish the Senator from South Carolina would explain to me how we are going to save money on it.

Mr. THURMOND. It will save $20 million to $40 million a year in Europe and it will save about $500 million we would have to spend in order to conform to the law over there because they have environmental protection laws as we do in this country. It will save millions and millions of dollars. The little coal we are buying here is just for 1 year. If they do not use it all in 1 year, they will use it the next year. That is all it is, just this 1 year.

Mr. GOLDWATER. I am no expert on coal, although we have the biggest deposit of shale coal left in this country in my State. Does not American coal have a high sulfur content?

Mr. SPECTER. The anthracite coal does not have a high sulfur content.

Mr. GOLDWATER. Does not American coal create more environmental problems than German coal?

Mr. SPECTER. I do not believe so.

Mr. THURMOND. We have been sending coal over there.

Mr. GOLDWATER. I know we have. But I have to say I do not think it is much of an idea.

Mr. SPECTER. Mr. President, I ask unanimous consent that Senator DENTON and Senator WARNER be added as cosponsors.

The PRESIDING OFFICER (Mr. GRAMM). Without objection, it is so ordered.

Mr. SPECTER. Mr. President, the purpose of this amendment has been stated in rather an abbreviated fashion but in light of some of the comments made on the floor, I shall take another moment or two to expand upon the matter. This program of having coal provide the energy needs of our installations overseas has been a policy adopted by Congress over many years in order to be sure of the energy supply. There have recently been objections made by the Government of Germany on the environmental issue and it is controversial as to whether they are right or wrong on it. In any event, the Department of Defense has undertaken a long-term program to convert domestic installations to coal so that the source of the coal may be maintained and the supplies may be maintained. It is necessary, if we are to maintain our coal sources and our coal supply, that there be an uninterrupted process for the coal to be available. This is a transition arrangement. We are going to maintain these purchases.

The objections which have been raised in abbreviated form here today, I believe, are well founded. I believe this money is well spent. As the distinguished Senator from South Carolina pointed out, there is stockpiling to the extent that it exists and the coal not used this year will be used in future years. It is a comprehensive approach to working out the program, in an orderly way.

Mr. THURMOND. Mr. President, I want to read one paragraph from a letter from the Secretary of Defense.

During the past three years the Department has been directed to spend increasing amounts of its European operating budget on unneeded coal programs.

That is what we are trying to eliminate.

Your amendment will reduce unnecessary operating costs in Europe by $20 to $40 million per year.

That is the figure I stated.

More importantly, it will keep DoD from having to request up to $400 million in Military Construction authority and funds to meet new German pollution abatement requirements by 1991.

So we are saving millions and millions of dollars and taking only a limited amount of coal for 1 year here. It it cannot be used for that 1 year, it can be used for the next year. There should not be any loss in that.

□ 1750

Mr. President, I ask unanimous consent to place this letter by the Secretary of Defense in the RECORD following my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE,
*Washington, DC, June 30, 1986.*

Hon. STROM THURMOND,
*Chairman, Subcommittee on Military Construction, Committee on Armed Services, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: I want to thank you for introducing your coal related energy amendments into the fiscal year 1987 Defense Authorization Bill During the past three years the Department has been directed to spend increasing amounts of its European operating budget on unneeded coal programs. Your amendment will reduce unnecessary operating costs in Europe by $20 to $40 million per year. More importantly, it will keep DOD from having to request up to $400 million in Military Construction authority and funds to meet new German pollution abatement requirements by 1991.

Commanders in Europe continue to advise us that German authorities are growing increasingly vocal about our forced use of coal when cheaper, more environmentally-acceptable alternatives exist. Both the Finance and Foreign Ministers of the Federal Republic of Germany have asked for the Administration's help this year. Under your

amendment, we will be able to comply with direction from these authorities to convert from thousands of antiquated, inefficient boilers—many still stoked by hand—to modern, reliable public steam utilities.

The best part is that the direct beneficiaries of your bill will be the troops themselves. Recent prohibitions on heating plant modernization or conversion will, if not corrected, result in substantial plant failures in coming years. Moreover, the costs of existing coal programs overseas come out of funds that would otherwise directly benefit our troops and their families through improved facility maintenance and repair. Cutting these costs is particularly critical in light of future funding limits.

Again, you have my personal thanks and those of the men and women who serve the United States in Germany.

Sincerely,

CASPAR W. WEINBERGER.

Mr. THURMOND. I also ask unanimous consent to place in the RECORD a letter by the Deputy Chief of the Army Corps of Engineers, Gen. Scott B. Smith, and he recites the same thing except he estimates the potential saving is $500 million in additional construction instead of $400 million as the Secretary said.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MAY 19, 1986.

Maj. Gen. RICHARD D. KENYON,
*Chief, Legislative Liaison, Office of the Secretary of the Army, Washington, DC.*

DEAR DICK: I am the Deputy Chief of Staff, Engineer, for the U.S. Army, Europe—the senior officer responsible for providing facilities and utilities service to support the half million U.S. Army soldiers and family members in Europe.

I am writing to inform you of the negative impact that the current Congressional restrictions on fuel use and district heating have on the U.S. Forces in Europe. The enforced use of U.S.-produced coal lies at the heart of one of the more significant problems faced by the U.S. Forces in Europe. The restrictions (contained in the FY 86 Appropriations Act) which promote use of U.S. coal have the potential of cause more than $500,000,000 in additional construction and operations funds to be used on the rehabilitation and operation of coal-fired heating plants in Germany over the next 25 years rather than on other essential military requirements. The restrictions have also become a serious political issue and fly in the face of recent German initiatives to reduce air pollutants and improve the quality of life for German citizens and guest alike.

The recent Associated Press (enclosed), printed in several papers including the Philadelphia Inquirer, clearly spells out the costly burden that the Congressional restrictions impose on the U.S. Forces and on American taxpayers. I would like to supplement the article with additional information regarding the U.S. Forces' heating systems, the Congressional restrictions, the growing environmental constraints in Germany, the cost of burning U.S. coal, and the available alternative in Germany—district heat.

After World War II, the U.S. Forces were left with a legacy of over 10,000 small, inefficient, labor-intensive boilers—half of which were hand-fired with coal. These boilers and their attendant heating distribution systems lacked controls to satisfactorily regulate the supply of heat to buildings, often leaving soldiers with either overheated or underheated working and living conditions. Since 1975, the Army in Europe has made great strides in modernizing heating systems through the automation and consolidation of boiler plants, connections to various municipal district heating systems, and the installation of automatic controls and insulation. This effort has greatly improved heating reliability and has cut heating energy use by 40 percent on a BTU-per-square-foot basis. But the modernization program is only half completed, and much more could be done if current Congressional restrictions on fuel use and district heating were removed so that the U.S. Forces could convert to lower-priced, more efficient energy sources (such as oil or natural gas) or could connect its facilities to municipal district heating systems.

For years, Congress has imposed stringent restrictions on fuel use and alternative heating sources for the U.S. Forces in Europe. In Fiscal Year 61, the U.S. Forces were required by Executive Order to use U.S. anthracite coal in heating plants originally designed to burn coke and to limit coal purchases to U.S.-source coal. Since Fiscal Year 72, Congress has prohibited the conversion of boilers from coal to other fuel. In Fiscal Year 85, Congress imposed restrictions on connections to district heating systems and mandated the purchase of 520,000 metric tons of U.S. coal for "strategic" reserves for the U.S. Forces in Europe. Finally, in Fiscal Year 86, legislation required the Department of Defense to purchase a mandatory 302,000 short tons of anthracite coal to be used Department of Defense-wide and required the Department of Defense to increase the total coal purchase to a level of 1,600,000 short tons per year above current consumption by Fiscal Year 94. Though the Congressional restrictions may provide some relief to the anthracite industry, the price to the U.S. Forces is high in terms of drawing financial and manpower resources from other needed military mission requirements and creating a volatile environmental issue with the German people.

The U.S. Forces in Europe have always maintained stockpiles of coal to cover contingencies. We keep between a six- and nine-month supply (104,000 to 155,000 metric tons) of U.S. coal on hand to accommodate interruptions or delays in shipments. We also have the option of purchasing readily-available European coal on short notice in the event of a crisis. The additional reserves required by the FY 85 Appropriations Act are not needed.

The most economical fuel sources for the U.S. Forces in Europe are oil, natural gas, and municipal district heating, based on current economic analyses. All these energy sources provide low-cost reliable heating and have the additional advantage of providing a significant cost avoidance impact in complying with air emission standards.

The three major factors conributing to the high costs of burning U.S. coal in Germany are the costs of the fuel; the capital costs of the boilers, coal handling systems and air pollution control equipment; and the plant labor and maintenance costs.

Every metric ton of U.S. anthracite coal shipped to U.S. Forces heating plants in Germany costs approximately $150. Each metric ton of U.S. bitumimous coal shipped to Germany costs $125. These costs are more than twice the costs of U.S. coal used in America, due to the shipping and handling costs of transporting the coal to Europe.

The capital costs for a new coal-fired plant designed to meet the current German air emission standards are approximately 3½ times that of an oil or natural gas-fired plant. Likewise, the costs of labor and maintenance of a coal-fired heating plant are approximately 2½ times that of an oil or natural gas-fired plant.

The Germans have recently documented the damage to their forests from air pollution. Their data show a startling spread of tree damage, from eight percent of the trees in 1982 to nearly 50 percent in 1985. They have reacted aggressively to reduce point source particulates, sulfur dioxides, nitrogen oxides and carbon monoxide emissions from industrial and commercial sources by imposing stringent standards which require costly environmental retrofit of existing boilers, and, in some environmental sensitive areas, by prohibiting the use of coal. These new German standards are much more stringent than U.S. standards for coal and No. 6 oil-fired plants in the 3-50 MBTU size range. The current estimate to retrofit the Army in Europe's existing boiler plants to meet the new German air standards is approximately $140 million. The retrofit work must be completed within five years. In a "free market" situation, the high cost of bringing coal-fired plants into compliance would cause us to convert boilers to more economical energy sources such as oil or natural gas or to connect to municipal district heating systems.

District heating, purchased like electricity and water from local municipalities, seems the most reliable, least costly heating option. Economic analyses prepared by the Army in Europe show that the 25-year life-cycle costs for district heat are approximately 20 percent below the cost of operating an Army-owned heating plant firing bituminous coal and 40 percent below the cost of operating an anthracite coal-fired plant.

If Congress were to allow conversion from coal-fired plants or connection of U.S. facilities to additional municipal district heating systems, approximately $65 million in environmental retrofit costs for existing boilers would be saved over the next five years. Also, district heat requires little or no initial capital investment costs to the U.S. Forces, eliminating operation and maintenance cost of boilers.

The special report to Congress on energy sources for the U.S. Army in Europe, prepared in 1984, showed that the Army could save over $500 million in 25-year life-cycle cost if Congress would remove the energy restrictions to enable conversion to the most economical energy sources—as U.S. military installations are able to do everywhere else in the world. Removal of the Congressional restrictions would also allow improved heating productivity and would greatly enhance the image of the U.S. Army in the eyes of the German government and its citizens. Likewise, good relations with Host Nations are our greatest assurance of gaining their support for the fielding of new weapons systems, the construction of new facilities, and the needed cooperation in realizing other common aims.

I would welcome your reaction, advice and assistance.

Sincerely,

SCOTT B. SMITH,
*Major General, U.S. Army.*

Mr. THURMOND. I also ask unanimous consent to place in the RECORD a letter from Gunther van Well, the Ambassador of the Federal Republic of Germany.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, DC,
*July 24, 1986.*

Hon. BARRY M. GOLDWATER,
*U.S. Senator, Senate Russell Office Building, Washington, DC.*

DEAR SENATOR GOLDWATER: I would like to ask for your support for an amendment by Senator Thurmond which would allow the Secretary of Defense to convert heating facilities at United States military installations in Europe, if the conversion is required by the government in which the facility is located. The amendment responds particularly to politically important concerns in the Federal Republic of Germany about the environmental impact of numerous U.S. Defense facilities' continued use of coal.

In his letter of April 21, 1986 to Secretary of Defense, Weinberger, Federal Minister of Finance, Stoltenberg, pointed out that U.S. agreement to using local district heating facilities would be in the common interest of maintaining and strengthening the cordial relations between the U.S. forces and the local population. Secretary Weinberger in his reply of May 12, 1986 shared this concern.

On June 2, 1986 Foreign Minister Genscher in a letter to Secretary of State Shultz also pointed out the importance of the heating issue for maintaining the good relations between the forces and the local population.

I would be grateful to you if you would support the amendment proposed by Senator Strom Thurmond allowing U.S. forces in Germany to be connected to local district heating facilities.

Sincerely yours,

GUNTHER VAN WELL,
*Ambassador,*
*Federal Republic of Germany.*

Mr. HEINZ. Mr. President, I join my colleague from Pennsylvania to offer this important amendment which enables the Department of Defense to implement the rehabilitation and conversion of steam generating plants to coal burning facilities.

Our amendment confirms the importance of the continental U.S. Energy Rehabilitation and Conversion Program as stated in the 1986 defense appropriations bill. It is the result of years of discussions and planning by the Defense Authorizing and Appropriations Committees in both Chambers and is important to the creation of a military that can depend upon a domestic source of energy. The program will enable coal consumption at 37 continental U.S. installations and will increase the level of consumption by $1.6 million short tons by fiscal year 1994.

The language in the Department of Defense authorization bill lifting restrictions for conversion to district heat at United States installations in Europe is very distressing and I believe that our amendment is an improvement to the existing language. It improves the language because it forces the Department of Defense to manage its energy program without crushing the American anthracite and bituminous coal industries.

In my opinion, the Department of Defense has been dragging its feet on converting continental United States installations while ignoring the cost and national security implications of allowing our forces in Europe to become dependent on off-site district heat. First, the cost of the estimated 45 connections could reach $250 million and the acquisition of district heat Btu's will be noncompetitive. Second, no official at the Department of Defense has, to the satisfaction of this Senator, explained why Americans should not be concerned that our military installations in West Germany are becoming dependent on the Soviet natural gas pipeline or that pipelines to our installations may invite terrorism.

On June 25 of this year I had the pleasure of hearing Mr. David Wigg speak before the Defense Energy Coalition. Mr. Wigg formerly advised President Reagan's National Security Advisor Bud McFarlane. In his remarks Mr. Wiggs addressed the distressing national security questions regarding U.S. military installation dependence on off-site district heat. Mr. President, I ask for unanimous consent that Mr. Wiggs remarks be inserted into the RECORD following my statement so that my colleagues and others will better understand the importance of an energy independent military in Europe.

Mr. President, the amendment before us does, however, ensure that at least the continental U.S. installations will be able to depend on a stable and reliable source of energy. In my view, the Conversion Program mutually benefits the military and the U.S. coal industry. The established target of 1.6 million short tons of coal per year by 1994 with a required purchase of 304,000 tons of anthracite for 1 year will guarantee a livelihood to some 2,000 to 3,000 miners in Pennsylvania and provide the Department of Defense with a dependable source of fuel. I believe the amendment we offer is a proper step toward building a military independent of foreign energy sources and is a restatement of America's belief in energy independence. I ask for the support of my colleagues.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

LUNCHEON REMARKS BY DAVID G. WIGG BEFORE THE DEFENSE ENERGY COALITION

Thank you, Senator Heinz, for your kind introduction. Your reference to Julius Caesar reminds me of a saying I coined at the NSC to the effect that with respect to U.S. dealings with Europe on technology transfer matters, it is crucial that, as with Caesar's wife, the United States be above reproach to avoid European claims of ulterior (commercial) U.S. motives as the hidden agenda behind our CoCom initiatives on East-West trade. The issue before us today—U.S. coal exports to U.S. military facilities in West Germany—is related to that ancient concept. Planned purchases by U.S. Army/Europe of Soviet natural gas as heating fuel is an ironic and incomprehensible policy that flatly contradicts extensive U.S. efforts to slow West European gravitation toward growing energy dependence on the Soviet Union.

Shortly after President Reagan was reelected in 1984, he asked then National Security Advisor, Bud McFarlane, to assemble an issues book to help guide policy formulation for his term in office. I was tapped to prepare the series of short papers dealing with international economic issues. One of those papers dealth with what I called possible U.S. policies to facilitate the "Revitalization of Western Europe". It involved a brief discussion of the endemic economic malaise then, and largely still prevalent in the region, and recommended policy options for the President's consideration.

One of the key elements in the paper involved our continued accute concern over the prospect of increased dependence on Soviet natural gas. Thus, it was with considerable pride that we learned of the recent preliminary agreement among natural gas producers and consumers in Western Europe to move ahead with exploitation of Norway's huge gas resources at the expense of increased dependence on Soviet gas. The Reagan Administration, and the President himself, had invested considerable political capital and incurred the wide-spread wrath of the business community during the East-West gas pipeline controversy, and U.S. pressure on Europe to minimize such dependency has continued to this day. Thus, this new agreement represents a vindication for the President and, I believe, it could prove to be one of his greatest foreign triumphs. The U.S. Army's efforts to shift to district heating partially sourced from Soviet gas at the expense of coal flies directly in the face of the recent positive momentum on this crucial issue and should be avoided if at all possible. Cost/benefit relationships on such a fundamental issue cannot be measured simply by the pricing of alternative energy.

The Army's decisions in this matter seem to be based on the presumption of continued peace in Europe rather than on contingency planning for potential conflict—presumably the sole reason for their presence there. While the West German focus on environmental quality is a laudatory goal, the safeguarding of West European peace and freedom is, one would hope, of higher priority. Indeed, as one leading European figure recently put it: "the role played by Europeans in NATO is 'pathetic'; American involvement is today more necessary than ever before". But the U.S. Army in West Germany seems to be on the run from various levels of German government. This implies to me that abundant U.S. leverage that clearly ought to exist given our role in NATO, is evidently being dissipated and not properly brought to bear on issues such as energy independence through U.S. coal consumption. The West Germans should bear their fair share of the costs of NATO preparedness . . . not blunt U.S. effectiveness by demanding only the benefits.

There would seem to be a simple rationale for maximizing U.S. Army/Europe energy independence:

The more self-sufficient our bases, the better they will be prepared to implement NATO strategic/tactical plans in the face of all possible adversity.

It follows then, that dependence for base heating on non-U.S. local, foreign or, worst of all, Soviet energy supplies may adversely affect their strategic performance over several months of the year (winter).

Any increase in dependence will aggravate a potential problem.

With respect to oil, a major source of heat on these U.S. installations, European dependence on Persian Gulf supplies has, for some time, been a matter of serious concern here, as well as among the affected governments and the International Energy Agency based in Paris. Iraq seems to have lost some of the initial advantage in its conflict with Iran attributed to it by Western analysts. In my view, the situation has, in fact, deteriorated in recent months, and our Arab friends in the region have voiced increasing concern. A sudden cut-off of Gulf Oil supplies could create serious problems if coincident, for example, with a wintertime East-West crisis in Europe.

There are a number of factors that warrant consideration in examining the potential for disruption of heating supplies to U.S. forces in West Germany. First of all, the U.S. Army/Europe is located in Southern Germany—coincidently a principal regional recipient of Soviet gas. Accommodation to German social, economic, and environmental concerns has complicated the ability of U.S. forces to maintain strategic preparedness. As one expert says, "urban sprawl and general environmental restrictions have separated many forward-deployed U.S. units from even their initial supplies of ammunition". The Soviets, meanwhile, are acutely aware of the importance of the U.S. role in girding NATO and a frontal attack by Warsaw Pact forces would be against West Germany. One of the Warsaw Pact's principal objectives in a conflict with NATO is "to break the enemy's will to fight", and sabotage and disruption are key tactical elements of this war plan, including the use of indigenous "assets", of which I believe there are many in West Germany.

Preparedness for Warsaw-Pact assault on Western Europe would almost certainly be preceded by a period of increasing political tension that could last for weeks or even months. It is common knowledge that the Soviets are shrewd and tough and will exploit weakness wherever it exists. Herein, I believe, lies the real problem—the potential combination of a wintertime East-West political crisis, Soviet disruption of gas supplies (a virtual certainty under such circumstances, even if they resort to merely having "problems" with the line), deliberate sabotage and terrorist acts against the domestic pipeline grid and (in my view) likely German failure to uphold the so-called priority allocation of fuel to U.S. military installations in time of acute fuel shortage, could all work to place severe hardship on U.S. forces and their dependents and could adversely affect performance. A simultaneous Persian Gulf oil cut-off would complicate the problem considerably. Clearly, independent coal burning capabilities would prove vital in such circumstances.

According to a source familiar with the subject, the winter weather would seem to be better suited to a Soviet frontal assault on West Germany than other times of the year. The prevalence of fog and low cloud cover under average German wintertime conditions is such that allied air and ground counterattack could be adversely affected.

Just for the sake of argument, let us say that the Yugoslav government collapses (a matter of growing concern to some) in January, and Soviet troops mass on the eastern border of both Yugoslavia and West Germany and warn us off. Tensions increase dramatically and NATO is on alert. Suddenly, the Soviets develop gas supply "problems" and indigenous agents and perhaps anti-U.S. civilians sabotage pipelines and district heat facilities.

Army dependence on off-base heat sources could prove to be a serious problem in such circumstances, particularly if local public opinion is against U.S./NATO intervention in Yugoslavia—a distinct possibility in light of recent problems over Libya.

Let me conclude by saying that U.S. installations in West Germany should, under no circumstances, become consumers of Soviet natural gas, and maximum independence from sources of energy beyond U.S. military control should be encouraged, consistent with fulfilling our NATO mandate. Thank you.

Mr. SPECTER. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the questions occurs on the amendment.

The amendment (No. 2654) was agreed to.

Mr. SPECTER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2655

(Purpose: To delete authority allowing the Secretary of a military department to carry out real property transactions)

Mr. STEVENS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Alaska [Mr. STEVENS] proposes an amendment numbered 2655:

On page 283 strike out line 1 and all that follows through page 288, line 15.

Mr. STEVENS. Mr. President, this amendment would delete section 2172 of this bill. That section will give special authority to the Department of Defense on properties that under existing law would be handled by the General Services Administration. This new section would significantly broaden the authority of the Department of Defense to deal with all military property, both excess and nonexcess, and allow DOD to handle the sale. The language could also include, as I said, not only excess but nonexcess property but also nonmilitary property that is located on defense installations. The cost of replacement facilities, relocation expenses, and sale costs would be covered by the sale of proceeds and 95 percent of the balance would go to the Treasury.

But what has happened is that the Department of Defense is getting so large now it wants to operate its own surplus or property disposal system. It will take this money and use it to build additional facilities or to relocate people and then it will put the balance into the Treasury. Currently, if a piece of property, real or otherwise, has to be disposed of or is to be disposed of by the Department of Defense, that goes through the surplus property procedure and other agencies of the Federal Government may use it. It is not sold necessarily. It is turned over to other agencies. If no other agency of the Federal Government wants it, under law, as we know, the local governments, the State and local governments in the country get a chance to take it.

Defense is getting just so big that it wants the authority of every agency of the Government tucked into the Department of Defense. Now, Mr. President, I spend a lot of my time trying to help the Department of Defense, but I cannot understand a proposal that bypasses the appropriations process. It bypasses and frustrates the congressional intent to establish priorities in the use of property that is not currently being used by the Department of Defense. This starts a concept that the Department of Defense owns it, not the Government but the Department of Defense. Once we put Federal money into a defense building or defense property, if that is no longer usable to the Department of Defense, they want to sell it and get the money and put it somewhere else. We ought to insist that rather than sell it out in some fire sale and get rid of it and use the money for something else, the rest of the Government see if it can use the equipment or the building or the real property.

I cannot understand this because it also says even if it is not excess to the Department of Defense needs, if one agency within the Department of Defense want to get rid of something, it could go sell it. The Air Force could sell it even though the Army might need it or the Navy or the Marines. And the net impact of this is to increase costs, in our opinion. It will circumvent the process that we have established to determine the most appropriate and cost-effective disposal method under the Property Act.

Now, the Property Act, I take to be something with which most of us are familiar. It does not allow the agency that currently has jurisdiction over property, be it real or personal, to make the determination of whether it is sold. It must be excessed. It is excessed into the GSA, the General Services Administration, which is our agency to manage assets of the Federal Government. No agency is allowed

to own anything. All of this belongs to the taxpayers of the United States.

VOTE ON CLOTURE MOTIONS POSTPONED TO 7 P.M.

Mr. GOLDWATER. Will the Senator yield for a unanimous-consent request? There is a time problem.

Mr. President, I ask unanimous consent that the cloture vote scheduled to occur on the Byrd amendment 2414 and the Dole amendment 2417 be postponed to occur at 7 p.m.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I would just observe that this now makes the fourth, fifth, sixth, seventh time—I know, I am not blaming the distinguished Senator from Arizona—this makes the seventh time that this vote has been delayed. I think the time has come to fish or cut bait and vote on cloture on South Africa, and so, Mr. President, I will not object to the 7 o'clock, but if there is going to be any thought of postponing it beyond 7 o'clock, then I believe that this Senator would object at that time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I do not want to belabor this because I hope every Member of the Senate will at least listen or try to understand what we are doing. We just want to take this provision out of the bill. It does not belong in here. If DOD has property that is excess or that one agency of DOD no longer needs, it should follow the procedures that are set forth in existing law for all agencies. No one has complained that this disposal process has put an undue burden on the Department of Defense. The purpose of the amendment in this bill is to increase the moneys that are available to the Department of Defense at the expense of other agencies, at the expense of the local governments, the State and local governments. I wish to cite some figures. The DOD properties compose 60 percent of the GSA excess and surplus property inventories.

Those properties satisfy other Federal agency needs, State and local public requirements or when none of those entities need them they are used to return moneys to the Treasury without giving any moving allowances or any replacement allowances or any other kind of allowances to the Department of Defense. It is improper, in our opinion, for the cost of replacement facilities and relocation expenses and sale expenses of the Department of Defense to be taken out of the return that they get for the sale of property that they believe ought to be sold. The DOD accounts for 55 percent of the property that was reported for excess this year alone, this year alone. I believe that the procedures we have now—and we have a whole entity here, GSA, to manage all of these properties. The net effect of this would be to take away from GSA approximately 50 percent of what they currently dispose of to other agencies and to State and local governments. Instead, it will result in additional hiring in the Department of Defense.

□ 1800

The Department of Defense will now have its own GSA. It currently has half of the civilian employees of the Federal Government, and this will give it another 10 percent. There is no question about that.

Mr. NUNN. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. NUNN. Mr. President, I think the Senator from Alaska makes a pretty persuasive argument here. I know we have this in our bill. The problem is that the GSA takes forever to dispose of property, and everybody gets frustrated. But I am not sure this is the right solution. I think this is a governmental affairs matter. It should go through the Committee on Governmental Affairs.

I am going to make a suggestion, and the Senators may disagree with it. They are managing this amendment, and I am managing this bill.

I suggest that the Senator from Alaska and the Senator from Delaware have some kind of hearing in the early part of next year about the time lag, to see if GSA can get the thing going in a more expeditious fashion. I would recommend to my colleagues that we accept the amendment, because it is a Governmental Affairs matter. I am on that committee, and I know we have had hearings. I know there are dangers in simply letting money go into an agency to be used by the Department and bypass the authorization and appropriation process.

Mr. STEVENS. I thank the Senator for his comments.

I say this about the GSA: The problem they have is that Congress has set up procedures it must follow before it can dispose of real property or those types of assets. Those requirements give each agency of the Federal Government a chance to review the property and then give every State and local government entity a chance to review the property and then require appraisal.

The net effect is that there are three circles they go through before they can sell property. I agree that we should have oversight to authorize GSA to eliminate some of those delays when it knows an asset has no utility for State and local governments.

I yield to the chairman of our committee.

The PRESIDING OFFICER (Mr. COCHRAN). The Senator from Delaware.

Mr. ROTH. Mr. President, I strongly agree that this is an area in which we should have hearings.

As a matter of fact, last night I suggested that to the distinguished Senator from South Carolina. I think it is the right way to handle this.

Let me point out why I am so concerned about letting an individual department or agency head out with its own policies in the area of land. There are certain policies that should be Governmentwide. I think earlier this evening Senator STEVENS made that point very eloquently on personnel policies. The same is true as to land.

It should be pointed out that land does not belong to the Pentagon. It does not belong to the State Department. It belongs to the Government as a whole, on behalf of the taxpayers.

If there is land that is no longer needed, then the procedure currently is that other agencies should have the opportunity to say whether or not they want to use it. If they do not, then GSA has the right to sell it. If this procedure is not working properly, then I strongly agree with the suggestion of the senior Senator from Georgia, that we ought to investigate and make whatever corrections there should be. But I would be deeply concerned if we let this agency, the Department of Defense, adopt its own policies. Then the State Department will want to do the same, and others will, and we lose control.

So I hope that the managers of this bill will agree with the suggestion of the Senator from Georgia, and I will be happy to hold hearings promptly on this matter.

Mr. GRAMM. Mr. President, I will be brief. I have no objection to removing the amendment.

There is one principal ingredient in this debate that has not been brought up. The problem with the current system is that it may be Government wide, but it is totally unworkable. It provides no incentives whatsoever to dispose of property. If you can dispose of it and not hurt your operation, you get nothing for it. It often goes out to State and local governments, and we end up giving away, for all practical purposes, valuable resources.

So I am not saying that each individual element of the Government should be able to sell assets that belong to the people. I am saying, however—and I say to the distinguished chairman of the Governmental Affairs Committee—that the current system is totally unworkable. It provides no incentives for the disposal of assets that are no longer needed. We have Government agencies—and the Department of Defense is one of the worst—that are holding huge amounts of resources

that they are never going to use, but they are not really giving up because they get nothing for it. They do not benefit from it. We are also giving away a lot of assets that could be sold.

Mr. ROTH. Mr. President, will the Senator yield on that point?

Mr. GRAMM. I yield.

Mr. ROTH. I think the Senator makes a valid point. There is a problem in this area. The various military commands do not want to give up land. The same is true in other agencies.

However, I do not think the solution to that is to permit a military commander to be able to sell that land for some project that is not approved by the duly organized committees of Congress, without going through appropriation. It seems to me that is the wrong kind of incentive.

I think the Senator is right. We have to look at some means to encourage various agencies to get rid of unnecessary property. I think that is what the distinguished Senator from Georgia is proposing—that we hold hearings.

Mr. GRAMM. I look forward to the hearings, and I look forward to testifying.

I thank the chairman for his interest in this problem.

Mr. THURMOND. Mr. President, the Subcommittee on Military Construction heard this matter—the distinguished Senator from New Mexico [Mr. BINGAMAN] and the other members of the committee—and we approved this, and I will discuss why. The full Armed Services Committee approved it. It was endorsed by the Defense Department; in fact, they prepared this amendment.

It would permit the Defense Department to better manage and control its real property assets and will provide incentive to do so.

It has been said that they do not want to get rid of anything. This would encourage the Defense Department, on marginally needed land, to dispose of it and use that money to build facilities which they really need, and any money left over would be turned over to the Treasury. So there is no waste there.

It provides base commanders with authority and responsibility to manage their resources as needs dictate, resulting in improved operation, readiness, and morale.

The construction dollars come from the proceeds of the sale of land in lieu of the DOD Milcon budget. Any profit from the sale of the land, over and above the cost to replace the facilities, is returned to the Treasury, to reduce the national debt.

The GSA is not working. I just finished a matter with them on which I have been working 4 or 5 years. Something has to be done to relieve this situation.

A lot of land is owned by the Army Corps of Engineers or others, and it is hard to dispose of. We feel that something must be done along this line.

□ 1810

Now, if the chairman of the committee will assure me that he will hold hearings on this promptly and go into the facets of it that should be heard, I am willing for the amendment to be stricken on that basis.

But we are going to come back again unless something is done. I am sick and tired of taking 4 or 5 years to do something that ought to be done in 3 months.

So on that basis, I am willing for it to be stricken at this time, if that meets with the approval of the distinguished Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I, of course, accede to the wishes of the chairman of the Military Construction Subcommittee and ranking minority member of the Armed Services Committee.

I think the problem here is a real one. I do believe we do need to do something to build an incentive to dispose of some of this land. Perhaps this solution is not exactly the right one, but I think that we need to get into it to get it fixed and I hope through these hearings that are contemplated that can be done.

Mr. THURMOND. Mr. President, I say that this procedure has been followed already, the very procedure that we are advocating here. It was followed in other cases and proved satisfactory.

Miramar Naval Air Station in California followed this procedure. Fort Huachuca in Arizona followed this procedure in the chairman's home State. March Air Force Base in California followed this procedure. Fort Jackson, SC, followed this procedure.

It has been successful and it has proved very fruitful and, as I stated, any money that is not used to build facilities from the sale of this marginal land goes back into the Treasury and reduces the debt.

I really think it is a good bill, but in order to save time and to give the Governmental Affairs Committee a chance to hold hearings, I am willing to cooperate to that extent provided the hearings can be held within a reasonable time.

The PRESIDING OFFICER. Is there further debate?

Mr. WILSON. Mr. President, I am sorry that I was off the floor.

I happen to disagree profoundly with the action that is about to be taken. I think Senator THURMOND has made compelling arguments for the change that is contained in this bill. I am jealous of the committee jurisdiction as the next person, and I understand the Senator from Alaska asserting the prerogatives of the Governmental Affairs Committee.

But I must say that I think there is something more important at stake here.

The Senator from South Carolina has correctly stated the existing procedures just do not work worth a damn. They take much too long. They are wasteful of money as well as time. And in a time when we are trying to save nickels and dimes in order to stretch them far enough to respond to real priorities within the military, the military construction consistently gets shortchanged. We defer for years the kinds of things that are necessary and we could significantly improve that situation and avoid those problems if we were to enact the kind of provisions that he has told you about here.

It is fair, it is equitable, it responds to the needs, the very great needs that we have for military construction. It does so in a far more expeditious way than is being proposed by the simple continuation of the status quo.

If this is going to happen, if we are in fact going to see hearings by the Governmental Affairs Committee, I hope that the Senator from Alaska will see that they have the highest priority because this is a real problem, a serious problem.

Long before I came to this body, I saw years go by and I saw important projects stymied for lack of a suitable process simply because of the bureaucratic stymie that was occurring.

I saw the logjam broken in a number of communities in my State in a way that benefited surrounding communities as well as the direct military communities.

So I think we are making a mistake in not going forward. If it were up to me, we would not make this mistake. But if, in fact, it be the judgment of this body, I can only hope that we will really not give lip service to this needed change but actually give it the kind of hearing that will bring it about.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I yield to my friend from South Carolina.

Mr. THURMOND. Mr. President, I want to quote from this bill, too.

> The Secretary of the military department may not carry out a transaction under this section involving the sale and replacement of property and facilities at $20 million or less until 21 days have elapsed from the date on which the Secretary submits the report of the facts concerning the proposed transaction to the Committee on Armed Services and on appropriations of the Senate and the House of Representatives and such report shall include—

and goes on to furnish all the information. In other words, it cannot take effect, they can stop it if they want to, until they meet all these require-

ments. They have to report back before they can go forward.

But, as I said, I am willing, in order to cooperate for hearings to be held, but I will be back again if we do not get satisfaction.

Mr. STEVENS. Mr. President, I look forward to that return engagement if that is the necessity because I shall oppose, so long as I am in the Senate, the right of the Department of Defense to decide what to do with property that has been purchased with taxpayers' money and turned over to the Department of Defense.

This is a principle, so far as I am concerned. It is not a jurisdictional matter for a committee.

There are plenty of instances that I can recall where the Department of Defense would have liked to have sold property, real and personal, in order that it could use the proceeds to do something else, when another Federal agency moved into that property and used it to the great savings of the taxpayers. I can think of instances, for instance, in Kodiak, AK, where the Navy moved out of Kodiak Naval Base. We made that available to the Coast Guard.

Other agencies, I can recall the FAA moving into some areas that were abandoned by the Department of Defense.

Sure there was a tremendous market in the private sector for these places. The Department of Defense could have made lots of money and they could use it to build something somewhere else.

But that is not the point. The point was that the taxpayers would have had to pay more for the facilities that were required by the other Federal agencies.

I am not doing this from the point of view of the Governmental Affairs Committee, and that is why I raised it rather than the chairman. We want to make sure we are talking about this from the point of view of principle, not jurisdiction.

I am prepared to have the vote on it or to have the amendment, if the amendment is considered, either one.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I suggest we go ahead and vote. The Senator from South Carolina has already agreed with the Senator from Alaska and the Senator from Delaware.

So it seems to me this is one we ought to move right on.

Mr. STEVENS. Yes. I ask for consideration of the amendment.

The PRESIDING OFFICER. Is there further debate?

Without objection, the amendment of the Senator from Alaska (No. 2655) is agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2656

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] proposes an amendment numbered 2656:

None of the provisions in this Act which provide for a mandatory or discretionary increase in the pay or allowances of a member of the armed forces shall be effective except in the manner or to the extent provided for in a subsequently enacted appropriation act.

Mr. STEVENS. Mr. President, this is the first time we get to the question of jurisdiction.

I hope to have the attention of my good friend from Arizona and my good friend from Georgia.

As we interrupt this bill that is before us now, it provides for a 4-percent pay increase for all military personnel commencing January 1. The budget that has already been approved provides for 3 percent for all Government personnel commencing January 1.

The impact of this difference means that we have to fund $1.1 billion more for the fiscal year 1987 than the budget that we have already approved would allow.

Incidentally, there is some question of whether the language is effective October 1 or January 1, but let us just assume it is January 1, the 4 percent, as we understand this authorization bill, is effective October 1, the pay raise for the Government in general under the budget is effective January 1.

Now, the way it is written in this bill, the Secretary of Defense is authorized to find the money to make the 4-percent pay raise from any funds available to the Department.

There is also new special pay for linguists, new special pay for psychologists, increased death gratuities, expansion of aviation career incentive pay, changes in aviation officer continuation pay, travel for military dependents receiving overseas military care, expansion of dislocation allowances, and overseas transportation of privately-owned vehicles, automobiles.

All of those, the way they are in this bill, are entitlements, Mr. President, unless this amendment is agreed to or unless we get an agreement here now on the record that I feel will be binding upon the committee that these matters can be dealt with in the appropriations process and as though they were not entitlements.

Now, I am prepared to accept that because my friends know that just as this bill has been written to have the ability to be interpreted as entitlements, we can write provisions in the appropriations bill to make sure that the entitlements exist but the moneys that can be paid are limited to the amount we have available under the budget.

If we have that understanding, I will withdraw that amendment. If we do not have the understanding, I think the Members of the Senate will have to decide whether they are going to support the budget which is 3 percent for everybody or support this bill which is 4 percent starting 4 months earlier than the others who get 3 percent.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I would like to pose a question to the Senator from Delaware, Senator ROTH, the chairman of the Governmental Affairs Committee, and maybe the Senator from Alaska can answer the question.

It has been my understanding that this has always been a matter for the Armed Services Committee and when we pass a pay raise bill that is in effect a binding bill on the Appropriations Committee. The Appropriations Committee determines how to finance it, whether it is prior year funds, whether it is supplemental, so forth.

I always understood that the same thing applies to the Governmental Affairs Committee in terms of civilian pay raise.

My question to my friend from Alaska, if this is going to apply to military and if the Appropriations Committee is going to insist on funding this as a discretionary program, are we going to do the same thing with the civil service?

□ 1820

And, if so, does the Senator from Delaware have any comment on that?

Mr. STEVENS. Mr. President, I would say the Senator from Delaware can answer the way he wants. But let me answer it this way for most of us who handle the appropriations portion of that question. We would fund civilian agencies as an entitlement up to the budget. We would not fund beyond the budget level because we are subject to a point of order if we do. In this instance, because of the way it is drawn, it is not pay like the civil service pay for each Department. This gives the Secretary of each Department the right to take money from any part of his Department to make up this difference without regard to how we put it in the appropriations bill, as I understand it. Under the appropriations bill we, from time to time, say we make available less money than the pay raise would call for and we require the Department to absorb the increase. Right?

Under this provision, the Department of Defense Secretaries are given

the authority to make this payment from any moneys that are available to them. We would never have that provision for a civilian agency. That is the difference in this instance.

The impact of that is the Senator is correct, as far as the entitlement provisions of the pay. In my judgment, because of the way this bill is written, there is special authority for this Department to go beyond the normal pay raise, which all the rest of the Government gets, 3 percent. This Department would get 4 percent and the difference would be made up by taking money from anywhere in the Department without regard to how much money we appropriated for pay.

Now, that, I think, is a distinction here that ought to be made. In the past 5 years, the domestic agencies have absorbed from 50 to 100 percent of the pay raises in each appropriations bill. The Department of Defense, as you know, was exempted from Gramm-Rudman-Hollings and did not have to absorb the pay increase in this year.

Mr. NUNN. I suggest to my friend from Alaska that perhaps if he would lay this amendment aside temporarily and let the staffs confer, there may be some way, some technical language in the way we drafted this is different from prior years. But my understanding is that the pay raise provisions are exactly the same thing we have done year after year after year and there is no deviation from that.

Mr. STEVENS. Let me ask the chairman of the Budget Committee—he and I were discussing this earlier—it is my understanding that the CBO has told our committee, the Appropriations Committee, that if this bill passes in its current form, we have no alternative, that this is an entitlement and the 4 percent must be paid and we cannot affect that.

Again, I will tell you that the problem with me is very acute, because your bill is $7 billion to $10 billion over the budget in terms of outlays. I understand that, because you are going to conference. I have no argument about it. I think you have to have that leeway. I am not saying anything about it.

But, knowing that exists, this $1.1 billion is the most sensitive $1.1 billion we have because it is very outlay sensitive. I am sure you would agree with that. A pay matter of $1.1 billion is going to spend out at about $1.1 billion in 1987.

That is going to reduce our leeway in terms of dealing with this bill, under the ceilings that exist, because of the Budget Committee jurisdiction, the jurisdiction of the distinguished Senator from New Mexico.

I would yield to him to answer the part of your question which, I think, comes from him rather than us.

Mr. NUNN. I would also say, would not the same exact thing apply to a civilian pay raise? I do not understand the distinction.

Mr. STEVENS. The difference, as I understand it, is the language you have in this bill that says the Secretary may use any funds available to him to make that increase.

Mr. DOMENICI. Did you ask me a question?

Mr. STEVENS. I asked the distinguished Senator from New Mexico if he would substantiate my assertion that this provision will require the expenditure of $1.1 billion in excess of the budget unless it is modified to give the appropriations process the opportunity to determine the level of the pay raise that shall be funded for the Department of Defense.

Mr. DOMENICI. Mr. President, let me respond to the Senator from Alaska. The answer to the specific question that he asked is yes. But I hope that there is no implication in my answer that I am also answering his previous implication that it is an entitlement and that CBO has called it an entitlement. Because if I were asked that, I would say, from my own standpoint, I do not believe it is an entitlement subject to a point of order under the Budget Act and I do not believe CBO has said that. If they have, they have not told the Budget Committee that.

I think the issue is not one of entitlement but rather that this bill, being an authorization bill, if everything within it were funded by the appropriators, it would clearly be over the allowable in the budget. They know that. The Senate, in voting on this bill, knows that. They are going to go to conference and then they are going to go to appropriations.

The way they have structured the language for the pay raise, as I understand it is, first, the way they have always done it; and second, they have left it substantively within the discretion of the Secretary.

Now, I understand that is not much discretion, because he wants to give the 4 percent. But they have really said, within the moneys appropriated, if you have enough money, you are to give a 4-percent pay raise. My interpretation is that that makes it not an entitlement on its face.

On the other hand, we have never interpreted authorized pay increases as entitlements, because they do not technically force the appropriators to appropriate budget authority in advance in their bill. It just has not been interpreted as forcing them to do that.

So there is an issue for the Senate. But the issue is: Do you want 4 percent 3 months early when, obviously, the rest of Government is not going to get that? But that is a policy issue, not a technical issue. I do not know where the Senate would come down on that.

Second, clearly, it is going to be more difficult to come in within the limits of the Budget Act which they intend to abide by to the extent that you have mandated pay. It will be more difficult. But I cannot say which of these you will pick and choose—pay raise or battleships or something else.

Mr. STEVENS. Mr. President, all I want is an agreement that we can require the Department of Defense to absorb the pay raise within the budget in the appropriations process. We do not want an entitlement to the point that we have to fund it.

Mr. WILSON. Will the Senator yield?

Mr. STEVENS. Yes.

Mr. WILSON. I think that there seems to be a misconception. We do not have a problem with that particular point. We do not contend that this is an entitlement in the budget sense of the word.

What we object to about your amendment is the fact that it is taking a decision on policy from the authorization committee and giving it to the appropriators. And, traditionally, it has been the decision and jurisdiction of the Armed Services Committee to determine what the rate of pay would be. The appropriators then determine whether or not they can fund that, how they can fund it.

But what we are doing is saying in the authorization bill that we think that is to be a priority. And if we have to take money from other things in order to fund it, that is a decision which we will make, But under the amendment being proposed by the Senator from Alaska, Mr. President, we have a situation that would prohibit the payment of raises until an appropriation act is enacted, even though an authorization bill has been enacted.

Mr. STEVENS. Mr. President, this is not that simple. I appreciate what my friend is saying. I do not want the policy decision. If we require the absorption of this pay, is the Budget Committee going to say we are still charged with $1.1 billon because it is 4 percent rather than 3 percent? Now, that is real. $1.1 billion is a lot of tanks and ships. And that is what I fear. If it is an entitlement we are credited $1.1 billion, even if we say to the Department of Defense "You absorb this, we are not going to give you any more money this year at all for pay."

The Senator from New Mexico knows what I am talking about.

Mr. DOMENICI. Yes, indeed.

Mr. STEVENS. I am fighting the outlay fight here, not the policy fight, of whether or not the pay raise should be 3 percent or 4 percent.

Mr. DOMENICI. Will you yield to the Senator for a response?

Mr. STEVENS. I am happy to yield.

Mr. DOMENICI. Obviously, I cannot speculate on what language people put in later bills. But let me say what the convention has been, and I state it here because we intend to follow it again this year.

I say to my friend from Alaska, so long as in the appropriations bill the U.S. Congress states the level and rate of pay absorption and it becomes law, you will get credit for the pay absorption against the outlay estimates for pay. Not only the $1.1 billion you speak of, but the entire pay increase will be modified by way of outlay reductions to the extent of the pay absorption.

□ 1830

I hope it will be reasonable because to the extent that it is unreasonable, it will come back to haunt us a few months later. But it has been as high as 50 percent for civilian, and sometimes as high as 70 percent. For defense, on average, it has been 30 to 36 percent. That is what I understand.

Mr. STEVENS. If my friends from the Armed Services Committee understand what I just heard, I think I understand it, and that is we will not be charged for outlays where we mandate that the absorption is within available funds notwithstanding the provisions of this bill. Then I do not have any argument with the Budget Committee or the Armed Services Committee. It is a policy decision that has to be made in the conference. The House provision is 3 percent. This is 4 percent. I am not arguing with that. I am arguing with the way it is written, and what it means to us.

If we are charged $1.1 billion beyond what our budget currently is notwithstanding the fact that we would say the Department of Defense has to absorb it, I am satisfied.

Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The Senator has withdrawn his amendment.

The PRESIDING OFFICER. Under the previous order, the Senator from Massachusetts [Mr. KERRY], is recognized.

Mr. KENNEDY. Mr. President, will my colleague yield?

Mr. GOLDWATER. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Arizona will state his inquiry.

Mr. GOLDWATER. What time does the Senator form Massachusetts have on this amendment?

The PRESIDING OFFICER. Forty-five minutes have been agreed upon. The allocation of time is 25 minutes to Senator KERRY, and 20 minutes to the opposition.

The Senator form Massachusetts, Senator KERRY, is recognized under the previous order.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator form Massachusetts.

Mr. KERRY. Mr President, I yield to the Senator from Georgia as long as it is not out of my time.

The PRESIDING OFFICER. Is there objection to the request of the Senator?

Mr. NUNN. I ask unanimous consent that I have 1 minute not charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Georgia is recognized.

Mr. NUNN. Mr. President, I thank the Senator from Massachusetts.

Mr. President, how long does the Senator from New Mexico contemplate?

Mr. DOMENICI. One minute.

Mr. NUNN. Mr. President, will the Senator from Massachusetts allow for 2 minutes for the disposition of this amendment without it being charged to either side?

Mr. KERRY. I am delighted to. I have no objection.

Mr. NUNN. Mr. President, I ask unanimous consent that we may have 2 minutes for the consideration, and hopefully disposition of the amendment of the Senator from New Mexico without it being charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2657

(Purpose: to provide that any new spending authority provided by specified sections of the bill shall be effective for a fiscal year only to such extent or in such amounts as are provided in appropriation Acts.)

Mr. DOMENICI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI] for himself and Mr. CHILES proposes an amendment numbered 2657.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following new section:

SEC. . LIMITATION ON NEW SPENDING AUTHORITY.

(a) IN GENERAL.—Any new spending authority (as defined in section 401(c)(2) of the Congressional Budget Act of 1974) provided by—

(1) any of the sections of this Act specified in subsection (b), or

(2) any amendment made by any such section,

shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

(b) SECTIONS SPECIFIED.—The sections to which subsection (a) applies are sections 611, 625, 631, 635, 636(f), 931, 1006, 1214, 2172, 2175, and 2183 of this Act.

Mr. DOMENICI. Mr. President, this is the amendment that the Senator from New Mexico made parliamentary inquiry of yesterday with reference to the fact that if this is adopted by the Senate there are no points of order lying against this bill because this has made all direct spending and all entitlements that we know of—and we have searched the bill—subject to annual appropriations.

With that, we are not aware of any points of order. I do not want anyone to confuse that with the levels of expected expenditures which are not points of order issues.

It is a question of what size the bill will ultimately be. This will cure the bill. I believe the manager and the ranking minority member understand it, and are willing to accept it.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, we thank the Senator from New Mexico. He has been enormously helpful in working out not just this problem but all the problems we have had with the Budget Act. No one could ask for more cooperation than we have received from the Senator from New Mexico, and the Senator from Florida has also been very cooperative.

This makes it clear, as I understand it, that any spending authorities in the act in question are not entitlement programs but subject to appropriation. Is that the intent?

Mr. DOMENICI. And contract authority.

Mr. NUNN. Mr. President, I have discussed this with the Senator from Arizona. We urge this amendment be accepted.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. DOMENICI. Mr. President, the amendment I have offered to the fiscal year 1987 DOD authorization bill is technical in nature. Several provisions of the committee-reported bill technically violate the Congressional Budget Act. A few sections create new contract authority. Section 401(a) of the Budget Act prohibits consideration of new contract authority unless it is made subject to appropriations. Some other sections of the bill technically provide new direct spending authority for fiscal year 1987.

Because the Armed Services Committee has not yet filed its section 302(b) allocations, any provisions providing direct spending or contract authority for fiscal year 1987 are subject to a section 302(c) point of order. My amendment would make these sections subject to appropriations, thereby

making clear that these sections of the bill are meant to be authorizing provisions, not spending authority. With this technical amendment to the bill, S. 2638 will be brought into compliance with the Budget Act.

Mr. NUNN. Mr. President, I thank the Senator from Massachusetts.

I yield back the time.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (No. 2657) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2658

(Purpose: To prohibit in connection with the Strategic Defense Initiative program, the test of a warhead, bomb, or other explosive device which uses fissionable material until the Soviet Union has conducted a test of a nuclear weapon)

Mr. KERRY. Mr. President, I send the following amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Massachusetts [Mr. KERRY] for himself, Mr. KENNEDY, and Mr. RIEGLE proposes an amendment numbered 2658.

Mr. KERRY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . PROHIBITION AGAINST NUCLEAR WEAPON TESTING IN CONNECTION WITH THE STRATEGIC DEFENSE INITIATIVE.

None of the funds in this act may be authorized to carry out, in connection with the Strategic Defense Initiative program, the test of a warhead, bomb, or other explosive device which uses fissionable material until the President certifies, using existing authority, to Congress that the Soviet Union has conducted, after the date of the enactment of this Act, a test of a nuclear weapon.

Mr. KERRY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KERRY. Mr. President, I yield 30 second to the Senator from Massachusetts, my colleague.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I wanted to announce to the Senate that earlier this afternoon the House of Representatives voted 234 to 160 on an amendment that was offered on the defense authorization bill to provide for a limitation on testing up to 1 kiloton pending either action by the Soviet Union or the President of the United States making a declaration that further testing was essential.

I think the Members of this body ought to be familiar with this very important and significant action.

Mr. KERRY. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator's point of order is well taken. There will be order in the Senate. Would Senators take their seats and staff members who are conversing in the Chamber please retire from the Chamber? The Senate will please be in order.

The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I thank my colleague for yielding for me to make this statement.

Mr. KERRY. I thank the Chair.

Mr. President, the amendment that I have sent to the desk is a very straightforward simple amendment that puts to test the question of whether or not the United States intends to adhere to the standards established by the President of the United States that star wars will be a nonnuclear defensive program. It seeks to impose a one item, a single item, ban on nuclear testing in the United States as long as the Soviet Union continues no nuclear testing of any kind whatsoever of any item. That is a tradeoff that is obviously more than favorable to the United States.

The item that we chose to ask not to continue test on is the x-ray laser bomb. And I would cite an article recently of the Washington Post on June 9, 1986, in which the headline says "Lab Creating a New Generation of Nuclear Arms." I will read very, very briefly from one portion of it where it says that:

The Nation's brightest young physicists are being recruited and old hands rhapsodize about the potential for "third generation nuclear arms," a greater advance over hydrogen bombs, they say, than H bombs were over atom bombs in the early 1950's. Physicists say dozens, perhaps hundreds, of new varieties of weapons could be developed keeping Livermore and its test site in Nevada busy for decades. The potential for these new weapons, nuclear powered directed energy weapons, is cited here and at the Nation's other nuclear weapons design laboratory in Los Alamos as the chief reason to resist a nuclear test ban treaty with the Soviet Union.

I quote from the article:

The new weapons could be used to destroy other missiles, to attack satellites, to incapacitate Soviet mobile missiles on the ground, to disrupt enemy communications for uncounted other missions, according to scientists here.

Mr. President, this Nation has been told again and again that Star Wars is nonnuclear. When the President stood up and announced this program, he said to the Nation "This is a program that I have a vision will make nuclear weapons impotent and obsolete."

The President has directly expressed his wishes that SDI be non-nuclear on at least 17 occasions, such as in his address before a joint session of the Congress following the summit on November 21, 1985.

On that date, the President described his negotiating sessions with Mr. Gorbachev.

President Reagan said the following to the Congress:

Mr. Gorbachev insisted that we might use a strategic defense system to put offensive weapons into space and establish nuclear superority. I made it clear that SDI has nothing to do with offensive weapons; that, instead, we are investigating non-nuclear defense systems that would only threaten offensive missiles, not people.

As the President made clear, he formally told the Soviet Union that the SDI Program and nothing to do with offensive weapons and was only investigating nonnuclear defenses. That is the formal United States position in negotiating with the Soviets.

In making this statement to Congress and to Mr. Gorbachev, the President was not being imprecise. He has said that SDI would be nonnuclear on many occasions, in writing as well as orally.

For example, in response to questions submitted by the Times of London on April 10 of last year, President Reagan said:

Our allies know the truth. We have consulted closely with them on the nature and purposes of SDI. They know that it is a research program designed to provide the technical basis that will allow a future President to decide whether to develop advanced systems to defend against ballistic missiles . . . The goal of SDI research is to find nonnuclear technologies which, if deployed, would strengthen stability and enhance our mutual security.

President Reagan made a similar statement on April 18 of this year to ABC of Spain. And in an interview in U.S. News & World Report published on November 18, he was directly asked the question "is your SDI system nonnuclear?" The President answered, "That's right. Yes."

So President Reagan has told not only the Soviets and the Congress but our allies and the American people as well that we are pursuing a nonnuclear program in order to render nuclear weapons impotent and obsolete.

Mr. President, sadly, that is not the case. The x-ray laser bomb that we are currently testing, which has been tested five different times, is a nuclear bomb. It is a new nuclear bomb. It is a new nuclear weapon.

What it does is supposedly harnesses the x ray or gamma rays of an explosion of nuclear power and takes those

x rays and places them into rods, harnesses their energy, and in the milliseconds of an atomic explosion, it is supposed to harness those x rays and direct them toward incoming vehicles. But it is only through the nuclear explosion itself that you gain the power to be able to harness the energy to direct it at the opposing forces, whatever they may be.

That, Mr. President, is a nuclear weapon, and it is at the center of SDI.

I do not believe the American people want a new nuclear weapon being the core of a system that is supposed to render nuclear weapons impotent and obsolete, especially if the development of that system is, in fact, the major stumbling block for the achievement of a comprehensive test ban treaty.

Press accounts are very, very clear on this, and they are nonclassified. There is no one who contests that that is the purpose of this bomb.

We are talking about money, in addition. The Armed Services Committee was asked to spend $534 million for this nuclear defense. They cut it to $356 million. But, Mr. President, $356 million is a tripling of the roughly $100 million that was spent the year before on nuclear SDI systems.

I believe that we have a responsibility to question this.

We have a responsibility to make sure that the SDI Program complies with the President's description of it to the Soviets, with his description of it to the Congress, to the allies and to the American people.

Now, I recognize the need for research to go forward in this area, as in other areas, to prevent Soviet breakout. But the kind of research that is permitted by the ABM Treaty, and the kind of research that we assume the Soviets are doing even now, is research short of nuclear testing. This amendment would not halt that research. That research could continue. It would only stop the nuclear testing already been done under our supposedly nonnuclear Star Wars Program. And it would only stop this testing, so long as the Soviets do not test.

You may ask why such an amendment is necessary, given the President's clear and repeated statements that the program is already nonnuclear.

The amendment is necessary because, as press accounts confirm, the United States is engaged in developing nuclear defenses under the SDI Program, and indeed, these nuclear defenses are being frantically pushed toward development, despite the President's directive.

This year, the President requested $534 million for the nuclear defense under SDI in the Department of Energy, a request which was cut to $356 million by the Armed Services Committee, a steep hike from the $282 spent last year, which was already nearly a tripling from the roughly $100 million spent the year before on nuclear SDI systems.

Despite the President's statements that his SDI is nonnuclear, and statements by the SDIO that the nuclear x-ray laser of the SDI Program is only to learn about what the Soviets might do with such a weapon, others working on the program have described the nuclear x-ray laser weapon as one part of an SDI deployment.

"We must prove we have nuclear strategic defense options, if needed," Richard L. Wagner, Jr., Assistant Secretary of Defense for Atomic Energy told the Baltimore Sun February 2.

As the director of the SDI Program, Lt. Gen. James Abrahamson admitted late last year to Defense Week, those working on strategic defenses "are all convinced that the x ray laser research program is one that should be accepted as quickly as possible, and, yes, we are trying to accelerate it."

Now there are some serious problems with the United States going forward with testing of the nuclear-driven directed energy for the purposes of strategic defenses.

While this project, the xray laser, is highly classified, it is no secret that the laser gets its destructive power through the detonation of a nuclear bomb in space—and that this new type of nuclear weapon may well be more effective for the offense than for the defense.

I know, and everyone knows, there are aspects of this that are classified, but Newsweek describes the xray laser in the following terms:

> The most significant recent advance in space-based-missile-defense research is the x-ray laser—and it may turn out to be more effective on offense than defense.
>
> Powered by a nuclear explosion, the x-ray laser would emit a lethal blast of x-ray beams in the milliseconds before the device destroyed itself. In the Star Wars defense scenario envisioned by physicist Edward Teller, the father of the hydrogen bomb, a phalanx of x-ray lasers born aloft by rockets would "pop up" at the first warning of a nuclear attack to shoot down enemy missiles. * * * But in fact, the x-ray laser might be even more effective against the Star Wars sattellites and space based battle stations, with their known and well-plotted positions, than against incoming missiles.

As Steven Rockwood, the Director of SDI research at Los Alamos, told Science Magazine last year, the x ray laser will inevitably be viewed by the Soviets as a nuclear weapon with the potential to be used offensively, as well as defensively.

"What would you think if this satellite is passing over Washington five times a day and you know it's carrying a nuclear weapon?" Dr. Rockwood asks. "Will you trust me that it's only a defensive weapon, and not something that can be dropped on your head without any notice or warning? I don't think the Soviets in their paranoid attitude will ever believe what we tell them."

As the Los Alamos scientist recognized, the key problem with the x-ray laser is that a nuclear weapon that is being developed for defense can also readily be a nuclear weapon which can be used for offense, just as the Soviets fear.

Already, physicists working for the SDI Program "rhapsodize about the potential for 'third generation' nuclear arms," which they think is "a greater advance over hydrogen bombs * * * than H-bombs were over atom bombs in the early 1950's," in the words of Fred Hiatt and Rick Atkinson of the Washington Post.

As Hiatt and Atkinson wrote in the Post on June 9, the Lawrence Livermore National Laboratory, fueled by millions of dollars in funding from SDI, is busy creating a new generation of nuclear arms. Physicists say that dozens, or perhaps hundreds of new varieties of nuclear weapons could be developed, keeping Livermore and its test site in Nevada busy for decades.

Indeed, the Livermore scientists say that the chief reason the United States should resist a nuclear test ban treaty with the Soviet Union is the potential for developing new nuclear weapons as part of star wars systems.

This is a strange result of a program that is supposedly nonnuclear. According to the scientists, the new weapons could be used to destroy other missiles, to attack satellites, to incapacitate Soviet mobile missiles on the ground, to disrupt enemy communications, in short, for countless military missions. In short, the scientists working on the nuclear programs in SDI don't think SDI is going to make nuclear weapons obsolete at all—they think SDI is going to allow us to build nuclear weapons for dozens of military purposes never before contemplated.

In other words, Mr. President, the SDI Program appears to be working to develop new kinds of nuclear weapons that might be used to try to allow the United States to fight and win a nuclear war.

President Reagan has said on many occasions that a nuclear war can never be won and must never be fought. I agree with that statement, Mr. President. That is why it is so important that we follow the President's wishes to ensure that the SDI Program does not continue to develop dangerous, new forms of nuclear weapons, such as the nuclear powered x-ray laser.

As the Los Angeles Times has editorialized, the x-ray laser is nothing less than a nuclear bomb, and the prospect of having such a weapon deployed in the skies is disburing indeed:

> Assuming that such a device can be built, there are practical objections.

The Times editorialized:

As generally perceived, a fleet of nuclear-armed laser devices would have to stand guard in permanent Earth orbit. Since the nuclear pump is really a bomb, we aren't sanguine at the prospect of dozens or hundreds of these bombs—some American, some Russian—whizzing around overhead. Critics also note that nuclear-pumped lasers would probably blow up other parts of a defense system that were anywhere near them. And nobody has explained why Livermore is spending more than $100 million a year on nuclear x-ray laser research when the President says that the defense shield should be nonnuclear.

Senator JOHNSTON has described the dangers that nuclear Chernobyls in space might pose as a result of the deployment in space of orbiting nuclear reactors to power weapons which are powered by controlled nuclear reactions. But if we continue to fund the x-ray laser, we are funding the development of nothing less than a weapon powered by a full-scale nuclear blast, to be popped up through the atmosphere into space, which when it explodes will send out radiation in all directions, even as it focuses some energy in the form of an x ray.

Are we prepared to tell the public that the strategic defensive initiative isn't nonnuclear, as the President told the Soviet Union and the Congress? Are we prepared to tell the public that the strategic defense initiative is developing technologies to put nuclear weapons in orbit?

It would be ironic, to say the least, if Congress were, while the Soviets retain the nuclear test moratorium, to fund further tests of strategic defenses aimed at placing nuclear bombs in space, contrary to the explicit statements of the President, while the goal of the SDI program is making nuclear weapons "impotent and obsolete."

Nor should we put ourselves in the position of suggesting to the Soviets, to our allies and to the American public that President Reagan is not telling the truth when he says that the SDI program is nonnuclear. Let us make the program comply with the President's description of it, at least for the period that we know the Soviets are not testing nuclear weapons.

Last winter, I asked this body to delete funds from the SDI program devoted to developing and testing strategic defenses which make use of nuclear weapons.

I said that if we continue to fund the x ray laser, we are funding the development of nothing less than a nuclear weapon in space. I asked whether we were prepared to tell the public that the strategic defensive initiative isn't nonnuclear, as the President told the Soviet Union, our allies and Congress.

The Senate choose to reject that amendment. Senator STEVENS, in arguing against that amendment, said we needed to push forward with the nuclear powered x ray laser because of the danger of Soviet development of such a device. Six months later, when the CIA has stated unequivocably that the Soviet Union cannot develop its own nuclear powered SDI systems without further testing, it seems clear to me that we should at least seek to take this minimal restraint on the development of this third type of nuclear weapon now.

It may be that the Senate will move forward with the funding of this new type of nuclear weapon, despite the fact that we could not deploy it without violating the ABM Treaty, signed by President Nixon, the limited Test Ban Treaty signed by President Kennedy and the Outer Space Treaty signed by President Johnson.

I cannot conceive of the United States ever moving to full-scale field testing of this kind of weapon, in violation of not one but three arms control treaties, including the first significant arms control treaty we signed with the Soviets more than a quarter of a century ago. If the Senate does not choose to stop the testing of this weapon now, I intend to return to this floor again and again until the day comes when we can achieve a mutual halt with the Soviets to the development of "third generation" nuclear weapons. In the view of this Senator, two generations of nuclear weapons have been threatening enough to our national security. I see no reason to rush headlong into developing a third.

I would ask my colleagues to stop and think about this one closely. I recognize there is a strong drive by many who want to research this program. Needless to say, a majority of Senators, myself included, believe we ought to research so we are not taken by surprise, so that the Soviet Union cannot break out, so that we will never be jeopardized in the event they have something that we do not.

But, Mr. President, it seems to me that it is a worthwhile trade-off for Americans to ask themselves, Are we willing to withhold testing on one single item that takes us into a whole new generation of nuclear weaponry? Are we willing to do that in exchange for the Soviet Union not testing any nuclear weapon?

More importantly, Mr. President, how can you possibly keep faith with the American people that we are supposedly developing a system to render nuclear weapons impotent and obsolete when in the core of the system itself is a new nuclear bomb?

That is not only inconsistent; it is fraudulent. I think we have an opportunity here not only to enhance the climate for arms control but to make certain that the promise of the President is a promise that is kept. I hope we will do that.

I think this vote is an important vote on which the American people ought to say, "How did my Senators vote? Did he or she vote to create a new generation of nuclear weapons? Did he or she vote to make SDI more of a lie, to put forward to the American people that it is OK to have a new nuclear weapon in space for the first time; that we will violate three different treaties: The Limited Test Ban Treaty, the Outer Space Treaty, and the ABM Treaty by the deployment of such a weapon?"

Mr. President, it is clear from the recent CIA reports and their testimony before the Energy Committee that the Soviet Union could not conceivably deploy such a system without further testing. If it is in our interest to prevent that, I would hope that my colleagues would join with me in voting for this prohibition.

Mr. President, I yield.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, before the Senator takes his seat, I wonder if I might ask him a question.

As I read his amendment, it is to prohibit any use of nuclear explosions in the context of our testing program unless the Soviets "have tested a nuclear weapon." How can we verify that they have not tested some low-level weapons which could not be distinguishable by background noises?

Mr. KERRY. There are two kinds. Ours is a prohibition only against our testing fissionable material. We obviously have the ability to determine whether or not we are doing that.

□ 1850

Mr. WARNER. I understand that, Mr. President.

Mr. KERRY. With respect to the Soviet Union, at the current moment, the most recent testimony we have had before the Foreign Relations Committee in the hearings which have been referred to on the floor says that we can discern a test and distinguish that test between an earthquake and a nuclear explosion below the level of about 1 kiloton. Anything less than that, it is believed, cannot provide any kind of assurance with respect to military capacity or any kind of development that would threaten.

Second, and I think this is very important—may I ask that the answer of this question be shared in time because we are so tight?

The PRESIDING OFFICER. Is there objection?

Mr. WARNER. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERRY. I thank the distinguished Senator for his generosity.

The second point I make is this: This is to give us the window of opportunity to be able to take advantage of the vote in the House today to cut off all funds for all tests and hopefully, to be able to move in the next months to

make up the ground on a protocol that would permit seismic implantation—site verification, and a total protocol which we would adhere to. But it is clear from the CIA that they do not believe that there have been any advancements that would permit the Soviet Union at this point to deploy any kind of system. They are satisfied that we are able to make that determination through our current technical means.

Mr. WARNER. Mr. President, we are on the fringes of some highly classified material. Listening carefully to my colleague from Massachusetts, he has responded as I had anticipated. We do not know for certain whether we can detect all Soviet testing of nuclear material beneath ground. As such, there may be low-level tests which could go right on and allow them to develop laser systems powered by the nuclear explosion.

For that reason and the added reason that I think it is imperative, as we design what is known as the architecture of SDI—in other words, what type of systems we should put up—we determine the feasibility of nuclear-powered explosions as a future means of attacking our systems. If we do not comprehend the full range of what can be done with a nuclear explosion in terms of destroying a possible architecture of SDI, then we are crippling the program at this point.

Lastly, I point out, as the Senator said just a moment ago, possibly this matter can be taken up in the context of arms control and why should the U.S. Senate prejudge that option that is in the hands at the moment of the President of the United States?

Mr. KERRY. If I could answer the Senator on one point, Mr. President, as the Senator knows—without touching on classified material, because there is an article in the Boston Globe that appeared on May 30, 1986, in which the CIA is publicly disputing claims on laser research and there was testimony before the Energy Committee and a report released by Representative MARKEY in the House from the CIA, all of which assert publicly what our ability is and is not to discern—the specific signature of a nuclear explosion is discernible as opposed to any other kind of explosion or other kind of movement down to, as I say, the level of 1 kiloton. When you get to the level of 1 kiloton you are not providing the kind of advancement with respect to nuclear weaponry that would give any kind of credence to a system.

I yield to my colleague from Massachusetts if I may.

The PRESIDING OFFICER. Does the Senator from Virginia yield the floor?

Mr. WARNER. I yield momentarily so my colleague from Massachusetts can join the debate.

Mr. KENNEDY. Mr. President, I rise to cosponsor this amendment which would prohibit the expenditure of funds for the testing of nuclear-driven directed energy weapons so long as the Soviet nuclear test moratorium continues.

Senator KERRY has done an excellent job of explaining what our amendment seeks to do. Let me just add several points.

Since March 23, 1983, when the Star Wars Program was first announced by President Reagan, it has been described to the American people as a means of rendering nuclear weapons impotent and obsolete. This is how the administration has attempted to sell Star Wars to America and to the world. On at least 17 different occasions, the President has described the strategic defense initiative as a "nonnuclear" defense.

Mr. President, contrary to that description, the managers of the Star Wars Program are pressing ahead with developing a whole new generation of nuclear weapons to be used in this mislabeled "nonnuclear" defense.

For my colleagues unfamiliar with this technology, one of the principal concepts being developed for this third generation of nuclear weapons is the nuclear-pumped x ray laser. This weapon would use a large nuclear explosion from a hydrogen bomb to focus the emitted rays into a concentrated laser beam directed at the intended target.

The Reagan administration has been conducting a number of nuclear tests to develop this weapon. Despite the technical difficulties encountered by scientists working on the x ray laser, program managers are intent on finding a role for this weapon in a star wars system.

In fact, over this past year, the SDI has actually accelerated nuclear research and testing and added money to the program by taking money out of other more deserving aspects of SDI research. This acceleration in nuclear star wars testing was, according to press reports, the direct result of a meeting between Dr. Edward Teller, father of the H-bomb, and President Reagan in which Teller asked the President to add more dollars to the nuclear star wars budget.

General Abrahamson, the SDIO Director, has also admitted this is the case. Stated General Abrahamson:

> We are all convinced that the x ray laser research program is one that should be accelerated as quickly as possible and, yes, we are trying to accelerate it.

General Abrahamson also pointed out that this would include "speeding up the number of those tests" of the nuclear-pumped x ray laser.

Mr. President, the amendment being offered by Senator KERRY, myself, and Senator RIEGLE is simply trying to ensure that the SDI program is carried out as the President intends: To conduct research into nonnuclear weapons that might render nuclear ballistic missile ineffective.

Our amendment will not require that the United States cease all nuclear tests. While I have long been an advocate of a total ban on nuclear testing, I believe that such a ban needs to be negotiated in a formal agreement with the Soviet Union which incorporates effective verification measures. Last night, the Senate again reaffirmed its support for negotiations toward that objective.

Nor is our amendment unilateral. It remains in effect only so long as the Soviet Union continues to refrain from all nuclear testing. We cannot verify with high confidence what kinds of weapons the Soviets are developing if they conduct a nuclear test. So, if the Soviets begin to test again, we could go ahead with tests of the x ray laser and other NDDE weapons.

The CIA has stated, for the record, that it does not believe that the Soviet Union can deploy nuclear driven-directed energy weapons without conducting additional nuclear explosive testing. So long as both sides refrain from testing of x-ray lasers, neither side could deploy such a weapon.

We are told that we need to test x-ray lasers in order to better understand Soviet capabilities in this area. But if neither side can test, then neither side would have sufficient confidence to deploy these weapons. Moreover, while our amendment would ban testing of these weapons, research and lab experiments could go forward to help us better understand their potential applications.

We are also told that the Soviets are way ahead in the development of these weapons and have had a program for at least 15 years. This is one of Dr. Teller's favorite claims.

In fact, as a senior official in the SDI organization has stated, this claim is "5-percent information and 95-percent conjecture." It is not at all certain that the Soviets are ahead in this area. And in any case, as the CIA has stated, they could not deploy a weapon without a substantial amount of testing.

If the United States elects to proceed with development, testing, and deployment of nuclear-driven directed energy weapons, it will generate a requirement for many additional nuclear tests.

Dr. Hans Bethe, Nobel Laureate, former director of Los Alamos Theoretical Division, and one of the individuals chiefly responsible for development of the first atomic weapon, testified last spring before the Armed Services Committee that development of this weapon would require at least 30 to 40 tests. But he also acknowledged that Dr. Robert Selden, a physicist at

Los Alamos who is more knowledgeable about the program, believes it will require hundreds of tests. I ask that Dr. Bethe's reply to my question on testing requirements for the x-ray laser be included in the RECORD.

One final point. Any deployment of the nuclear-pumped x-ray laser would violate three international arms control agreements to which the United States is a party: The 1972 Anti-Ballistic Missile Treaty, the Limited Test Ban Treaty, and the Outer Space Treaty. These security-enhancing accords will be rendered useless if SDI nuclear tests proceed unconstrained.

Mr. President, I urge my colleagues to support Senators KERRY, RIEGLE, and myself and vote to approve this amendment.

Mr. President, if either the Soviet Union or the United States moves to develop the x-ray laser as a weapons system, large-yield nuclear tests would be required. I understand from the testimony that has been made available to the Senate that development of such a weapon would require large yield nuclear tests. Therefore, I can't agree with those who suggest that this could somehow be done surreptitiously.

What we are saying is that we would like the SDI Program to conform with the stated position of the President of the United States.

I believe I am correct in this conclusion about the implications of this amendment.

Mr. KERRY. I thank my senior colleague, who has been working on the issue of a test ban for many, many years, for pointing out to me and to our colleagues what he has. Indeed, he is absolutely correct. All of the tests of the x-ray laser or x-ray bomb and all the tests of the Soviet Union do require high yield—there is no mistake about it.

Second, and I think perhaps equally important, this is not unilateral. It is mutual. The Soviet Union cannot test any weapon for this prohibition to exist, any weapon at all of nuclear notion.

All we are doing is saying, "Mr. President, if we are going to have a nonnuclear program, let us not lie to the American people. Let us not tell the American people we have a nonnuclear program that will render nuclear weapons obsolete, that will make you safer, when we are developing a whole new generation of nuclear weapons, even that we intend to put in space, the one threshold that has not been crossed."

I thank my senior colleague.

Mr. KENNEDY. Mr. President, under this amendment, we would still be permitted to go ahead in pursuing x-ray laser research. Even with considerable testing, the Soviets are a long way from deploying any x-ray laser weapon. So these arguments which suggest that they might suddenly have some kind of test explosion and would then be able to move right from that phase to deployment of an x-ray laser weapon is extremely far-fetched.

Finally, I wonder if the Senator would object to my having printed in the RECORD the various statements that have been made both by the President and by other administration officials which indicate their assertions that the SDI is pursuing a nonnuclear defense. This has been stated time in and time out. Over the past several years. I do think these statements help to support the very important point that my colleague made earlier in his presentation, about the representations which have been made by the President that we would be pursing a nonnuclear defense. If we are going to conform with what the President says, I do not see any reason why this amendment should not be embraced. If we are not pursing a nonnuclear defense, we should have the right to expect a definition or explanation from the administration.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENTS BY ADMINISTRATION OFFICIALS ABOUT SDI AS A NONNUCLEAR RESEARCH PROGRAM

ATTACHMENT 1

All of you know that we're researching nonnuclear technologies that may enable us to prevent nuclear ballistic missiles from reaching U.S. soil or that of our allies.—Ronald Reagan, Conservative Political Action Conference, March 1, 1985.

We're not discussing a concept just to enhance deterrence, but rather a new kind of deterrence; not just an addition to our offensive forces, but research to determine the feasibility of a comprehensive nonnuclear defensive system.—Ronald Reagan, National Space Club Luncheon, March 29, 1985.

The goal of SDI research is to find nonnuclear technologies which, if deployed, would strengthen stability and enhance our mutual security.—Ronald Reagan, Response to questions submitted by the Times of London, April 10, 1985.

SDI is examining technologies which may make possible nonnuclear defenses against ballistic missiles.—Ronald Reagan, Response to questions submitted by ABC of Spain, April 18, 1985.

A nonnuclear strategic defense makes good sense.—Ronald Reagan, Strategic Defense Initiative, Radio Address to the Nation, July 13, 1985.

Who is threatened if Western research and Soviet research, that is itself well-advanced, should develop a nonnuclear system which would threaten not human beings but only ballistic missiles?—Ronald Reagan, Address before the 40th Session of the General Assembly, United Nations, October 24, 1985.

[I will] do everything within my power to move forward with research and testing of a high-tech nonnuclear defensive system, so that the world in which you raise your children in will be safe and secure and free.—Ronald Reagan, Speech at Thomas Jefferson High School, Annandale, Virginia, reported in Washington Post, February 8, 1986, p. B7.

The ideal method that we very much hope we can get and have reason to believe we may be able to get would be a method of destroying them [missiles] outside the atmosphere without using nuclear weapons or nuclear means to do so.—Caspar Weinberger, Secretary of Defense, Interview with newsmen, August 8, 1985.

So the President believes that we have to ask the question, Isn't there an alternative?, and that might be non-nuclear defensive systems.—Robert C. McFarlane, Assistant to the President on National Security Affairs, Interview on This Week With David Brinkley, ABC, September 22, 1985.

What we saw last summer at Kwajalein was an experiment that proved one important thing: that we could intercept a ballistic missile without using a nuclear warhead by using super-high precision, modern homing electronics. It was important to show that we are no longer talking about nuclear systems.—George C. Keyworth, Jr., Science Adviser to the President, Interview in the San Diego Union, May 19, 1985.

The SDI puts primary emphasis on technologies that do not use nuclear weapons.—Kenneth W. Dam, Deputy Secretary of State, Remarks to the Foreign Policy Association, New York, January 14, 1985.

I thank my colleague. I commend him for the leadership he has provided on this issue. I am delighted to join with him in cosponsoring this amendment.

Mr. KERRY. I thank my distinguished colleague.

VOTE ON CLOTURE POSTPONED UNTIL 8 P.M.

Mr. WARNER. Mr. President, will the Senator yield for purposes of a unanimous-consent request?

Mr. KERRY. I will, on the Senator's time.

Mr. WARNER. I ask unanimous consent that the cloture votes scheduled to occur today on the Byrd amendment No. 2414 and the Dole amendment no. 2417 be postponed to occur at 8 p.m. tonight.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Massachusetts.

Mr. KERRY. Mr. President, a point of inquiry: How much time remains?

The PRESIDING OFFICER. The Senator has 4 minutes and 5 seconds remaining.

Mr. KERRY. Mr. President, I yield and reserve such time as I have remaining.

The PRESIDING OFFICER. Who yields time?

Mr. WARNER. Mr. President, I yield to the Senator from California.

Mr. WILSON. I thank the Chair. A parliamentary inquiry: How much time remains to the opponents?

The PRESIDING OFFICER. The opponents to the amendment have 17 minutes.

Mr. WILSON. I thank the Chair. I shall use but little of the time of the distinguished manager to make two basic points.

First, the major nuclear directed energy program within the SDI is the x-ray laser.

□ 1900

Without violating any classified information, obviously I think we all know that the Soviet Union has a very significant x-ray laser program of its own. We used to know more about it than we know now because they used to write of it openly in their literature. Significantly, that is no longer true. So we are compelled, if we are to be able to accurately assess a threat, to conduct research and testing of our own. Without such testing we are not in a position to really gain any realistic assessment of the Soviet x-ray laser program.

The second point I make, Mr. President, is simply that I think there is a distinction to be made, quite properly, between the threat from detonation of a nuclear device which has as its purpose the actual impact radiation kind of blast effect that would produce casualties and instead the kind of detonation that is used to power a device that will injure no human but will instead power devices that can kill incoming satellites or incoming missiles.

Now, I think that is a significant if a simple distinction and I commend it to the attention of those who are concerned with a nuclear-directed energy weapon in the context of the strategic defense initiative. What we are talking about is using, if at all, a nuclear device to power perhaps other kinetic means to kill incoming nuclear missiles which are intended by the Soviets to produce massive civilian casualties. That it seems to me, Mr. President, is a very important distinction. It is one that I think fully justifies our being involved in this kind of research and testing. It is too bad that we must be, it is too bad that we must be involved in a defense authorization bill, but it is not a perfect world.

I thank the distinguished manager.

The PRESIDING OFFICER. Who yields time?

Mr. WARNER. Mr. President, I yield such time as the Senator from Georgia may require.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. WARNER. Mr. President, before that is done do I understand from the proponent of the amendment that there is a technical change that he desires to make at this time?

Mr. KERRY. I thank the Senator and indeed there is a technical change. I ask unanimous consent that the text "Warhead, bomb, or other explosive device" be paralleled at the end where it says "nuclear weapon."

The PRESIDING OFFICER. The Senator has a right to modify his amendment. The amendment is so modified. Will the Senator send the modification to the desk.

The amendment, as modified, is as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . PROHIBITION AGAINST NUCLEAR WEAPON TESTING IN CONNECTION WITH THE STRATEGIC DEFENSE INITIATIVE.

None of the funds in this act may be authorized to carry out, in connection with the Strategic Defense Initiative program, the test of a warhead, bomb, or other explosive device which uses fissionable material until the President certifies, using existing authority, to Congress that the Soviet Union has conducted, after the date of the enactment of this Act, a test of a warhead, bomb, or other explosive device which uses fissionable material.

Mr. NUNN. Mr. President, I do not need to take up much time. I do not support the amendment. I agree with the arguments made by the Senator from Virginia. I know the President has said that this is a nonnuclear program. The President has also said that this is a program that is going to render nuclear weapons obsolete. He said that this is a program that we are going to use to terminate all nuclear weapons in the world and he said when we get through developing it we are either going to give it or sell it to the Soviets. I am not buying the President's definition on the first part, and I do not really buy the part on SDI being nonnuclear. I hope it can be a nonnuclear system, but no one knows that. So really the President has misdescribed this program. That is part of the problem with SDI. That is one of the major things we have a problem with, because SDI has not been properly defined in concept. I believe it would be a mistake to eliminate x-ray lasers or other nuclear devices as possibilities in this area. One thing we know, the Soviets have conducted extensive research in this area and if they develop a strategic defense system, in my view it is very likely to have nuclear components. Just from the point of view of knowing what they may have, it is important for us to have this kind of capability. In conclusion, I understand where the Senator from Massachusetts is coming from on this. The President has said several times, or insinuated several times that SDI would be a nonnuclear program. However, we have to get beyond the rhetoric on SDI. We have to try to get the administration to put the rhetoric behind them and begin to define SDI in realistic terms. That is what we have tried to do in the committee. We believe we have a good definition. We believe we have a good overall conceptual framework, and we believe that the nuclear part of it has to be a part of SDI at this early stage in this massive research program.

Mr. WARNER. Mr. President, I thank the distinguished Senator from Georgia. I think he had cleared up another point I was concerned with. There was some reference that the President lied and I think it was clear that the President speaking about the SDI research program we now have under way said his intention is not to contain any nuclear force that is to be disposed above ground.

Mr. NUNN. The Senator did not think that I had said that?

Mr. WARNER. No. I believe there was mention made on the foor earlier.

Mr. NUNN. I certainly did not.

Mr. WARNER. No, I said the Senator clarified it.

Mr. NUNN. I thank the Senator.

Mr. WARNER. And relieved me of the burden of doing so further. If there are no other Senators desiring recognition in opposition to the amendment, we are prepared to yield back such time as we have and it would be my intention to move to table.

Mr. KERRY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. I yield 1 minute to the distinguished Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, development of the x-ray nuclear laser not only is inconsistent with the President's assurances relative to SDI, but development of this weapon has also become the largest obstacle to a comprehensive test ban because of the nuclear test requirement to create this weapon. The Senate last night again spoke very clearly. We want to negotiate a comprehensive test ban, a mutual test ban. Adopting the Kerry amendment today will be a concrete step toward carrying out that desire. The CIA has said that "The Soviet Union can deploy nuclear driven energy weapons only by conducting additional explosive tests." The Soviets have not conducted a test in a year and without tests again they cannot develop this weapon, nor can we. The world will be better off if neither of us have a weapon to militarize space.

We are now debating whether to proceed with research on a nuclear weapon, the x-ray nuclear laser, whose principal purpose would involve its presence in outer space in violation of the Outer Space Treaty signed by us and acceded to by over 100 nations. There are grave doubts whether this weapon could work even in outer space to attack boosters before they deploy their warheads, to attack satellites, or for midcourse discrimination of decoys and warheads. But what is clear is that if the weapon is to be most effective, it needs to be located in orbit, in outer space, in violation of a treaty which has been honored by the Soviets and everyone else.

We have allowed the scourge of nuclear weapons into our airways, onto our prairies, under our oceans. Let there be one last place our children

can look, up into the night sky, without wondering whether it is indeed a star they make their wishes on, or in fact an x-ray nuclear laser in orbit. We have an opportunity here not to develop yet a third generation of nuclear weapons. The first two stages of our nuclear history, the A-bomb and H-bomb eras, should convince us not to go down this road.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. I inquire, how much time is remaining?

The PRESIDING OFFICER. The Senator has 2 minutes and 30 seconds.

Mr. KERRY. Mr. President, I appreciate the remarks of the distinguished Senator from Virginia, and I want to make it clear that this Senator is not alleging that anybody is lying in this debate, but what I am saying is that if you look at where the American people, the people we represent, are on this issue, every single indication overwhelmingly shows that the only reason they support the concept of an SDI or of defense is because it is linked inexorably to the notion that that is how we will get rid of nuclear weapons, that it will make them safer, that it will not put them at greater risk.

Now, that is at the center of this debate. If we are going to continually hear from the leading spokesperson and creator of this program that it is nonnuclear and will do this while at the same time we hear from scientists working on it that it will do a whole different set of things, then I would be remiss if I did not ask why the discrepancy between the rhetoric and reality.

Now, all I can say is leave out the issue of confirmation between what the President says and what is really happening. Look beyond that to the question of do we as Senators want to vote unilaterally for the creation—because it is unilateral. If we proceed ahead on this, there will be no alternative for us but to follow—of a new set of weaponry. Now, the people working on it themselves, and I quote them for the last time in this debate, say, "The new weapons would be used to destroy other missiles, to attack satellites"—that is not defensive; that is offensive—"to incapacitate Soviet mobile missiles on the ground"—that is offensive—"to disrupt enemy communications or any uncounted other missions according to scientists here."

□ 1910

What would distinguish this generator type weapon? It is the nuclear aspect of it.

Mr. President, I do not want some nuclear weapon popped up and violating the Space Treaty as well as the ABM treaty. I certainly do not want it in orbit. To even get there, you would have to be in violation of the treaty. So we are talking about not only pushing treaties, but common sense, and I hope my colleagues will join me.

The PRESIDING OFFICER (Mr. TRIBLE). The time of the Senator from Massachusetts has expired.

Mr. WARNER. Mr. President, I yield such time as the distinguished Senator from Mississippi desires.

Mr. COCHRAN. I thank the distinguished Senator from Virginia for yielding.

Mr. President, the Senate should be aware of what would happen if we adopt this amendment. We would say to the Soviet Union: "We are going to leave this entire area completely in your hands for decision as to how much research is done, the extent to which weapons systems are developed which will threaten the security of the entire world, and we are not going to do anything. We are going to unilaterally get out of the business of trying to find out what the modern technologies are, how they can be harnessed to protect security of our Nation."

I think that would be an unwise step to take. It would threaten, in effect, everybody's security, not only of our country but also throughout the free world.

I hope the Senate will reject this amendment.

Mr. WARNER. Mr. President, the managers of this bill are unanimous and have a joint position, as stated by both. Therefore, I move to table the amendment.

The PRESIDING OFFICER. Does the Senator yield back his remaining time?

Mr. WARNER. I do.

Mr. KERRY. Mr. President, I ask unanimous consent that I may have an additional minute.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. COCHRAN. Mr. President, will the Senator state the unanimous-consent request?

Mr. KERRY. I ask unanimous consent that I be granted an additional 1 minute to speak.

Mr. COCHRAN. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard

Mr. KERRY. Mr. President, I believe the yeas and nays have been requested.

Mr. WARNER. I requested the yeas and nays on the motion to table the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the Kerry amendment, as modified. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Vermont [Mr. STAFFORD], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from New Jersey [Mr. BRADLEY] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 61, nays 33, as follows:

[Rollcall Vote No. 196 Leg.]

YEAS—61

| | | |
|---|---|---|
| Abdnor | Exon | Mattingly |
| Andrews | Ford | McClure |
| Armstrong | Garn | McConnell |
| Bentsen | Glenn | Murkowski |
| Bingaman | Goldwater | Nickles |

|---|---|---|
| Bradley | Mathias | Stafford |
| Eagleton | Pressler | Weicker |

So the motion to lay on the table amendment No. 2658 was agreed to.

□ 1930

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GORTON. Mr. President, it has come to my attention that a serious shortcoming in the military procurement process has been failure by the Defense Logistics Agency's Defense Industrial Supply Center at Philadelphia to observe the requirements of the Military Cargo Preference Act of 1904. That act requires all ocean transportation of supplies bought for use by the armed forces to be on U.S.-flag vessels unless the President finds that the freight rates charged by those vessels is excessive or otherwise unreasonable. No such finding has been made, yet

suppliers of foreign-origin steel to that supply center for several years disregarded the mandate of the Act with impunity. It was not until the Fall of 1985, after repeated prodding by the Maritime Administration to enforce the law, that the supply center mandated adherence of its large-purchase contractors to the U.S.-flag preference requirement of the 1904 act and implementing provisions of the Federal Acquisition Regulations. There may be very valid reasons not to prosecute the violations of law prior to the recent notice being sent. But there is clearly no justification for continued violations since that time. Most contractors promptly complied, but I understand that a major supplier to the Philadelphia center has refused to do so, and continues to be awarded substantial contracts for steel products which officials at that center know are being transported on foreign vessels in violation of the law.

This is simply inexcusable conduct on the part of the supplier, and the inexplicable acquiescence of the military authorities involved must be called to account. Not only is the law being violated, but other suppliers that base their contract bids on compliance with the law are placed at a serious competitive disadvantage.

Moreover, U.S.-flag vessel operators are being deprived of cargo that is rightfully theirs at a time when severe overtonnaging and depressed freight rates in our ocean trades are threatening the viability of this nation's merchant marine and its role as the fourth arm of defense. That cargo cannot be recaptured, but certainly sanctions are in order for illegal carriage that has taken place since suppliers were served notice last fall to comply with the U.S.-flag preference requirement.

The Maritime Administration has on several occasions brought this matter to the attention of the Defense Department, and has several times served written notice on the supplier of its continued violations. Nevertheless, payments have continued and are continuing to be made to the supplier by the Defense Logistics Agency, even on shipments known to have been made on foreign flag vessels.

Is it too much to ask, Mr. President, that moneys appropriated under the legislation we are now considering be expended in a manner that complies with the law, rather than ignores it? Opinions may differ on a number of defense items, but there can be absolutely no question that military purchases transported by sea, by law, must be carried on vessels of the United States and that this mandate must be vigorously enforced. I trust the Defense Department will address this issue promptly.

Mr. DOLE. Mr. President, if I could have the attention of my colleagues.

The PRESIDING OFFICER. The Senate will be in order. Senators are asked to take their seats.

The majority leader.

AGENDA

Mr. DOLE. Mr. President, I have been visiting with the managers of the bill. Earlier today, they felt they would go to about 8 o'clock and then take a look at it. I think there seems to be a preponderance of opinion that if there is any way to finish this at a reasonable hour it ought to be done so that Members with commitments tomorrow can get home by 2 a.m. and get up at 4 and get on the plane. That is sort of where we are.

I am advised by the managers that they are really down to about 16 amendments and only 4 of those are going to require, maybe going to require rollcalls. Maybe that is too optimistic; maybe more than that, maybe 6 or 8.

But I think what we would like to do now, if there is no strenuous objection and the managers are willing to do this, is to go ahead and proceed and take a look at it at about 9 o'clock and if it looks like we are within striking distance and announce to Members we might be here until 12 or 1 o'clock, unless someone has some strenuous objection.

I also indicate to the managers that we are going to need about an hour, I would think, if we get the unanimous-consent agreement, which I believe is nearly complete, and then there would be a vote on the debt ceiling. So that has to be cranked in.

Mr. GOLDWATER. Tonight?

Mr. DOLE. Hopefully.

I guess what we are suggesting is that if anybody can live without their amendments, it would be very helpful to the managers.

Mr. METZENBAUM. Will the majority leader yield for a question?

Mr. DOLE. I am happy to yield to the Senator from Ohio.

Mr. METZENBAUM. In talking about making another determination around 9 o'clock, would the majority leader think we might have a stacking of votes at 9 o'clock, or thereabouts, whatever the managers want to do, so we might go out and have a window?

Mr. DOLE. I would have no objection to that. May I say, I think the Senator from Ohio makes a reasonable request, particularly in view of the fact this is a very special day for him. I would hope we could accommodate that.

Mr. BOSCHWITZ. What is the day?

Mr. DOLE. He agreed with me on something. [Laughter.]

No, it is his wedding anniversary, No. 40.

Mr. METZENBAUM. I would like to go out to dinner with my wife. It is my 40th anniversary. Nothing more complicated.

[Applause.]

Mr. NUNN. Mr. President, we have a number of amendments. While we have everybody here, if we could have a few of them read off and see if we can get time agreements on them right now, it would be very helpful. The Senator from Idaho has an amendment.

Mr. McCLURE. Will the Senator yield?

Mr. NUNN. I yield.

Mr. McCLURE. Mr. President, I send my amendment to the desk and ask for its immediate consideration.

Mr. NUNN. Mr. President, before we get into the amendment, though, if the Senator would allow me to go down this list, if I have got the list right.

Mr. BUMPERS. Mr. President, we cannot hear back here.

The PRESIDING OFFICER. The Senate is not in order. We will not proceed until order is restored.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. All Senators will suspend.

Mr. NUNN. If I could go down the list.

The PRESIDING OFFICER. All Senators will suspend. The Senate is not in order. We will not continue until the Senate is back in order. Senators walking in aisles are asked to take their seats or retire to the cloakroom. Those Senators engaged in animated conversation are also respectfully requested to retire to the cloakroom.

The Senator from Georgia.

Mr. NUNN. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Georgia has been recognized by the Chair.

Mr. McCLURE. Mr. President, I sent an amendment to the desk.

The PRESIDING OFFICER. It is not appropriate to consider an amendment at this time. The question recurs on the Wilson amendment.

Mr. NUNN. Mr. President, I would be glad to yield to the Senator. We have a pending amendment.

What I would like to do is go down this list and see if we can expedite matters. I think it would be in the interest of all of us. And I would certainly join the Senator from Arizona in trying to stack votes so we would be able to give you an hour or an hour-and-a-half until 9 o'clock.

□ 1940

First of all, we have a Glenn amendment on the strategic defense initiative. Is there a way we can get that amendment preferably withdrawn, or have a time agreement?

I will go down the list. I do not see the Senator from Ohio on the floor.

We have a McClure amendment on the stockpile. Would the Senator indicate whether we could get a time

agreement, and perhaps stack the vote?

Mr. McCLURE. As far as I am concerned, I need 10 minutes.

Mr. NUNN. I know the Senator from New Hampshire is going to be in opposition to this amendment. Can we say stack that vote, and vote on that by 9 o'clock if we have to have a vote?

Mr. McCLURE. I am perfectly amenable to do that. I would like to go next, if I can, to the present amendment. I have no objection to stacking the vote.

Mr. NUNN. The next amendment is the Wilson amendment on the small ICBM.

Mr. WILSON. Mr. President, I am pleased to enter into a time agreement. This should take a very little time. From the standpoint of the proponents, I think we can probably handle it in 15 minutes.

Mr. NUNN. The Senator from Tennessee?

Mr. GORE. If the Senator from Georgia will yield, I think there are some arguments that need to be made on the Wilson amendment because it would essentially kill the Midgetman and give veto power to the Secretary of Defense.

I think the arguments ought to be brought out. I would not, however, want to drag this out. I would want to just have a fair chance to make the argument. However, let me say this: In the event a motion to table—which I hope will succeed—does not succeed, I will then have an amendment to apply the same criteria of the Wilson amendment to the MX to prevent any deployment above the present program, unless it meets the same criteria.

Mr. NUNN. I understand I believe the position of the Senator from Tennessee.

If I can go on down the list, it seems to me there is not much need to try to get a time agreement on that at this point. If I can go on down the list, I understand that. The Senator from Tennessee has two amendments on the same subject. I think we should not try to get a time agreement on those.

Mr. GORE. Mr. President, let me say I would be prepared to withhold the other two amendments I have on the list concerning the same subject if the amendment of the Senator from California was withheld. If not, I would want to go forward.

Mr. NUNN. I thank the Senator from Tennessee.

We have then a foreign language proficiency pay amendment by the Senator from Illinois, Senator SIMON.

Mr. SIMON. Mr. President, I would want 15 minutes on that. The opponents may want 15 minutes.

Mr. NUNN. Mr. President, if I can propound a unanimous-consent request on that amendment, I ask unanimous consent that there be 30 minutes on the Simon amendment, which relates to the foreign language proficiency pay, to be equally divided with no amendment in order thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Then we have the amendment that is known by some as the "fuel of freedom amendment" which is the alcohol amendment by the Senator from North Dakota, Senator ABDNOR. Can we get a time agreement on that? He is not on the floor.

Mr. President, does the Senator from Arizona want to give his permission to have an agreement on that?

Mr. GOLDWATER. Yes.

Mr. NUNN. Does the Senator from Michigan desire to speak on that amendment?

Would anyone object to having a 20-minute agreement on that amendment, 10 minutes on each side equally divided?

Mr. HUMPHREY. Mr. President, will the Senator yield? What amendment are we referring to?

Mr. NUNN. The alcohol amendment by the Senator from North Dakota.

Mr. President, I ask unanimous consent that the amendment of the Senator from North Dakota dealing with alcohol have a 20-minute time limit equally divided between the proponents and the opponents with no amendment in order thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, we have an amendment on the National Guard Armory by the Senator from Arkansas. Does the Senator from Arkansas desire a time agreement?

Mr. BUMPERS. Ten minutes, equally divided.

Mr. GOLDWATER. Mr. President, I already told the Senator no. But if he wants to have it, it is all right with me.

Mr. NUNN. If he will take the Senator's no, that is fine with me. If he wants to vote on the amendment——

Mr. BUMPERS. Mr. President, I would like 30 minutes. [Laughter.]

Mr. NUNN. Mr. President, I ask unanimous consent that the amendment of the Senator from Arkansas have a 20-minute time limitation equally divided between the proponents and the opponents with no amendments pertaining thereto in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, we have amendments being added. I am not sure this is productive.

The next amendment is another one by the Senator from Arkansas on the Little Rock fuel dock. Can the Senator give us an idea on that one?

Mr. BUMPERS. Mr. President, I would like 3 minutes on that, and then I will withdraw the amendment. I will agree to withdraw the amendment.

Mr. NUNN. I certainly agree to that. We do not need a time agreement on that one. We will certainly give the Senator time on that one.

The Fort Riley School by the majority leader.

Mr. DOLE. It will be a study.

Mr. NUNN. We do not need a time agreement on that.

Then we have the strategic defense initiative amendment by the Senator from Arkansas, Senator BUMPERS.

Mr. BUMPERS. What is that amendment?

Ten minutes, equally divided. That amendment simply continues language that was in the bill last year on SDI contracts to our NATO allies.

Mr. NUNN. I believe that one will be accepted. We do not need an agreement on that.

Mr. BUMPERS. I am sorry. It is acceptable?

Mr. NUNN. We have indications it will be. We will have to take another look at it.

Mr. BUMPERS. It is identical to the language last year.

Mr. NUNN. Mr. President, we have an amendment by the Senator from West Virginia on the B-1, an advanced technical bomber.

Mr. BYRD. Yes. I would not anticipate a need for a great deal of time on that. We have had a discussion of it every year I think for the last 3 or 4 years. I understand there may be an amendment in the second degree that would be offered by the distinguished Senator from Ohio, Mr. GLENN. I am not sure. In that case, I do not know. He is not on the floor at the moment.

Mr. NUNN. It might be wise not to try to get an agreement on that one at this time.

I thank the minority leader.

Mr. BYRD. I have another amendment.

Mr. NUNN. Would the Senator like to get a time agreement on that one?

Mr. BYRD. I would be delighted to. I am not sure.

Mr. NUNN. Perhaps we ought to withhold that one.

Mr. BYRD. I thank the Senator.

Mr. NUNN. The next one is the multiyear procurement amendment by the Senator from Florida, Senator CHILES.

Mr. President, I ask unanimous consent that the amendment of the Senator from Florida, Senator CHILES, on multiyear procurement have a 20-minute time agreement with 10 minutes equally divided between the proponents and the opponents with no amendments in order thereto.

Mr. QUAYLE. Mr. President, reserving the right to object, I hope that we——

Mr. NUNN. Mr. President, may we have order, please? We are making some progress.

Mr. QUAYLE. I hope we will be able to get that amendment worked out. I

really have some strong reservations about some of the requirements that are mandated by that legislation. Hopefully we will be able to work it out. If we cannot, I will be more than willing to do what the Senator is suggesting. I think we can work it out.

Mr. NUNN. Mr. President, will the Senator agree to a time agreement if we do not work it out?

Mr. QUAYLE. No; because I need a lot more time.

Mr. NUNN. Mr. President, I withdraw that.

Mr. QUAYLE. Why do we not skip over that?

Mr. NUNN. I withdraw that suggestion.

There is an amendment by the Senator from California, Senator WILSON, on payments to defense personnel in foreign countries. Will that be accepted?

Mr. WILSON. That will be accepted.

Mr. NUNN. That will not need a time agreement.

Mr. WILSON. However, while the manager is seeking to make progress, I will be happy to assist further. I did not hear any solicitation of the time agreement with respect to the other amendment. I did hear the junior Senator from Tennessee say that he would subsequently offer an amendment relating to the cost effectiveness on the margin to the MX missile. I will save time, and save him the trouble. We can incorporate both. We can talk about the small missile and the MX, and the cost effectiveness at the margin. I stand ready. In fact, I have already modified my amendment to achieve that. But I think it would be a good thing if we could get a time agreement.

Again, it will require no more time. We can have 15 minutes on our side.

Mr. GORE. Mr. President, will the Senator yield?

Mr. NUNN. I yield for an observation or question.

Mr. GORE. The amendment noted by the Senator from California, Mr. President, referred to cost effectiveness at the margin and survivability against a responsive threat.

Is the Senator from California prepared to accept an amendment saying that the MX cannot be deployed unless it is certified as survivable?

Mr. NUNN. Mr. President, there is a very comfortable sofa right back there in the back of the room. Perhaps they can go outside.

Mr. WILSON. We do not need to do that. The answer is yes.

Mr. GORE. I will accept the suggestion of the Senator from Georgia because I have some other concerns as well. I will be glad to visit with my colleague.

Mr. WILSON. I may not be entirely accommodating.

Mr. NUNN. Mr. President, there is an amendment by the Senator from North Carolina, Mr. HELMS, on pornography. I understand we should not propound an agreement on that.

There is an amendment by the Senator from Maine, Senator COHEN, on the special operation forces.

□ 1950

Mr. COHEN. Will the Senator yield?

Mr. NUNN. Yes.

Mr. COHEN. If I could have the attention of the body, I might explain the purpose of the request to the Senator from Georgia.

Yesterday, this body adopted an amendment offered by myself and the Senator from Georgia dealing with special operations forces. I might point out to the Chamber that originally I was going to offer the amendment as a sense-of-the-Senate resolution. Following the testimony heard before the Armed Services Committee, Senator NUNN and I decided that it was important that we go forth with legislation as opposed to a sense-of-the-Senate resolution.

During the course of redrafting, we had sent the sense-of-the-Senate resolution back to legislative counsel and they left out a paragraph. So the measure that was adopted left out a provision that would have created an Assistant Secretary of Defense for Special Operations Forces and Low-Intensity Conflict.

I had intended to offer a unanimous-consent request after we had voted on the amendment, but there was an objection to that.

Mr. NUNN. Can the Senator indicate whether or not it would be possible to get a time agreement on that?

Mr. COHEN. For my part, it would take no more than 5 minutes.

Mr. WARNER. Mr. President, this is a matter in which I have been involved. We have been talking about it during the course of the day. The Senator knows of my interest in this matter. I indicated I would interpose an objection if it were to be brought up in the nature of a technical correction because the paragraph left out creates an Assistant Secretary of Defense. I failed to see how that would be in the nature of a technical correction. I would hope that the Senator from Maine, the Senator from Rhode Island, and I might discuss this further.

Mr. COHEN. Senator NUNN and I both represented to the body that this was in the amendment. The legislative counsel left it out inadvertently, so, in fact, it was a technical error on the part of the legislative counsel.

Mr. WARNER. But the Journal reflects the action of the body and the Journal did not contain that paragraph.

Mr. NUNN. Mr. President, I do not want to interrupt——

Mr. WARNER. I yield the floor.

Mr. NUNN. Mr. President, I had yielded to the Senator from Maine.

The PRESIDING OFFICER. The Chair did not recognize the Senator from Virginia. The Senator from Georgia is recognized.

Mr. NUNN. Mr. President, there is an amendment on child nutrition sponsored by the Senator from Florida, Senator HAWKINS. Can we get a time agreement on that?

We have an objection on our side so we will not be able to get an agreement.

There is a leasing agreement by the Senator from South Carolina, Senator THURMOND.

Mr. THURMOND. Mr. President, I do not think it will take over 2 or 3 minutes. I think it will be accepted.

Mr. NUNN. Then we do not need an agreement on that.

Mr. LEVIN. Will the Senator yield for a question?

Mr. NUNN. Yes.

Mr. LEVIN. On the list, I did not hear an amendment which I have at the desk which Senator CHAFEE cosponsors. It simply reincorporates in this bill last year's language relative to the fact that in authorizing funds for SDI research it does not mean we are saying an intent to violate the ABM Treaty. This has been cleared on our side. I do not know whether it has been cleared on that side. Since it restates last year's language, I do not know whether there would be objection to it.

Mr. CHAFEE. We would have to examine that first before we can answer.

Mr. NUNN. We will add that to our list and hopefully we can have some agreement on it.

Mr. President, I am informed that 9:30 will be the time we would have our first vote. We would have a window from now until 9:30. We can stack votes until then, if it is agreeable to the majority leader.

Mr. DOLE. Let me indicate, that is not going to slow anything up. It just accommodates a number of Senators on each side. We will have back-to-back votes, if there are back-to-back votes.

CLOTURE VOTES POSTPONED UNTIL 10 P.M.

Mr. DOLE. Mr. President, at this time I ask unanimous consent that the cloture vote scheduled to occur today on the Byrd amendment No. 2414 and the Dole amendment No. 2417 be postponed to occur at 10 p.m.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. We have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2663

(Purpose: To provide for the establishment by law of the requirements for strategic and critical materials to be stockpiled in the National Defense Stockpile, and for other purposes)

Mr. McCLURE. Mr. President, I ask unanimous consent that any amendment pending be temporarily set aside that I may send an amendnent to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Idaho [Mr. McCLURE], for himself, Mr. WARNER, Mr. BINGAMAN, Mr. BENTSEN, Mr. STEVENS, Mr. DOMENICI, Mr. DECONCINI, Mr. LAXALT, Mr. BAUCUS, Mr. EXON, Mr. GARN, Mr. MELCHER, and Mr. SYMMS, proposes an amendment numbered 2663.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike Title XI and insert in lieu thereof the following:

TITLE XI—NATIONAL DEFENSE STOCKPILE

SECTION 1101. SHORT TITLE.

This Act may be cited as the "Strategic and Critical Materials Stock Piling Amendments Act of 1986".

SEC. 1102. STOCKPILE REQUIREMENTS.

(a) PURPOSE OF STOCKPILE.—Section 2 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98a) is amended by adding at the end the following new subsection:

"(c) It is the intent of Congress—

"(1) that the National Defense Stockpile be used to serve the interest of national defense only and not be used for economic or budgetary purposes; and

"(2) that the quantities of materials stockpiled under this Act should be sufficient to sustain the United States for a period of not less than three years in the event of a national emergency.".

(b) ESTABLISHMENT OF STOCKPILE REQUIREMENTS BY LAW.—Section 3 of such Act (50 U.S.C. 98b) is amended to read as follows:

"ESTABLISHMENT BY LAW OF STOCKPILE REQUIREMENTS

"SEC. 3. (a) The materials that are strategic and critical materials for the purposes of this Act, and the quality and quantity of each such material to be acquired for the purposes of this Act and the form in which each such material shall be acquired and stored, shall be established by law.

"(b) Such materials when acquired, together with the other materials described in section 1104, shall constitute and be collectively known as the National Defense Stockpile (hereinafter in this Act referred to as the 'stockpile').

"(c) Determinations under subsection (a) shall be known as 'stockpile requirements'.".

"(c) INITIAL LEVEL OF STOCKPILE REQUIREMENTS.—The determinations in effect as of October 1, 1984, under section 3(a) of the Strategic and Critical Materials Stock Piling Act shall be the stockpile requirements for the purposes of such section, as amended by this Act, until otherwise provided by law.

SEC. 1103. TRANSFER OF CERTAIN STOCKPILE FUNCTIONS TO THE SECRETARY OF DEFENSE.

(a) IN GENERAL.—Sections 5, 6, 10, and 11 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98d, 98e, 98h–1, 98h–2) are amended by striking out "President" each place it appears and inserting in lieu thereof "Secretary".

(b) Definition of Secretary.—Section 12 of such Act (50 U.S.C. 98h-3) is amended by adding at the end the following new paragraph:

"(3) The term 'Secretary' means the Secretary of Defense.".

(c) TECHNICAL AMENDMENT.—Section 11(b) of such Act (50 U.S.C. 98h-1) is amended by striking out "each year" and all that follows through "the next fiscal year" and inserting in lieu thereof "each year, at the time that the Budget is submitted to Congress pursuant to section 1105 of title 31, United States Code, for the next fiscal year,".

SEC. 1104. ANNUAL RECOMMENDATION OF STOCKPILE REQUIREMENTS BY SECRETARY OF DEFENSE.

The Strategic and Critical Materials Stock Piling Act is amended by adding at the end the following new section:

"ANNUAL RECOMMENDATIONS BY SECRETARY OF DEFENSE

"SEC. 14. (a) IN GENERAL.—In order to assist Congress in establishing stockpile requirements under section 1103, the Secretary shall submit to Congress an annual report on stockpile requirements. Each such report shall be submitted with the annual report submitted under section 11(b) and shall include—

"(1) the Secretary's recommendations with respect to stockpile requirements; and

"(2) the matters required under subsections (b) through (e).

"(b) NATIONAL EMERGENCY PLANNING ASSUMPTIONS.—Each report under this section shall set forth the national emergency planning assumptions used in determining the stockpile requirements recommended by the Secretary. Assumptions to be set forth include assumptions relating to each of the following:

"(1) Length and intensity of the assumed emergency.

"(2) The military force structure to be mobilized.

"(3) Losses from enemy action.

"(4) Military, industrial, and essential civilian requirements to support the national emergency.

"(5) The availability of supplies of strategic and critical materials from foreign sources, taking into consideration possible shipping losses.

"(6) Domestic production of strategic and critical materials.

"(7) Civilian austerity measures.

"(c) CONSIDERATION OF MATERIALS BASED ON NET IMPORT RELIANCE.—

"(1) IN GENERAL.—In determining the materials to be recommended to Congress under subsection (a)(1) as strategic and critical materials (and the quantity and quality of such materials to be recommended), the Secretary shall consider—

"(A) whether each of the materials determined under paragraph (3) should be recommended as a strategic and critical material; and

"(B) in the case of any such material, whether the quantity determined under paragraph (5) with respect to such material is the appropriate quantity of such material to be established by Congress as the stockpile requirement for that material.

"(2) MATTERS TO BE INCLUDED IN REPORT.—In each report under this section, the Secretary shall identify—

"(A) each material determined under paragraph (3); and

"(B) the quantity determined under paragraph (5) with respect to each such material.

"(3) MATERIALS TO BE IDENTIFIED.—The Secretary shall identify each material that the Secretary determines is necessary for the security of the United States, essential to the economy of the United States, and obtained from foreign sources.

"(4) CLASSIFICATION OF MATERIALS BASED ON NET IMPORT RELIANCE.—Each of the materials identified under paragraph (3) shall be classified by the Secretary for the purposes of this section as follows:

"(A) CLASS A MATERIALS.— A material shall be classified as a class A material if—

"(i) the material is not produced in the United States or is produced in the United States in limited quantities; and

"(ii) the net import reliance of the United States for the material is greater than or equal to 65 percent.

"(B) CLASS B MATERIALS.— A material shall be classified as class B material if—

"(i) the material is produced in the United States but is not available in sufficient quantities in the United States; and

"(ii) the net import reliance of the United States for the material is greater than or equal to 30 percent but less than 65 percent.

"(C) CLASS C MATERIALS.— A material shall be classified as a class C material if—

"(i) the material is produced in substantial quantities in the United States; and

"(ii) the net import reliance of the United States for the material is less than 30 percent.

"(5) QUANTITY TO BE DETERMINED.—For each material identified under paragraph (3), the Secretary shall determine the following:

"(A) CLASS A MATERIALS.— In the case of a material classified under paragraph (4) as a class A material, the Secretary shall determine the quantity of such material equal to three years' net import of such material.

"(B) CLASS B MATERIALS.—In the case of a material classified under paragraph (4) as a class B material, the Secretary shall determine the quantity of such material equal to two years' net imports of such material.

"(C) CLASS C MATERIALS.—In the case of a material classified under paragraph (4) as a class C material, the Secretary shall determine the quantity of such material equal to one year's net imports of such material.

"(6) DETERMINATION OF NET IMPORTS.—For purposes of paragraph (5), a year's net imports of a material is the quantity of the material equal to the amount by which—

"(A) the sum of—

"(i) the average annual imports of such material into the United States during the base period; and

"(ii) the average annual shipment of such material from the stockpile as excess material during the base period; exceeds

"(B) the average annual exports of such material from the United States during the base period.

"(7) BASE PERIOD DEFINED.—For purposes of paragraph (6), the term 'base period' means the most recent period of five calendar years for which data is available.

"(d) EFFECT OF ESTABLISHING STOCKPILE REQUIREMENTS IN ACCORDANCE WITH DETERMINATIONS UNDER SUBSECTION (c).—The Secretary shall include in each report under this section an analysis of the effect (including the cost and the impact on world markets) of establishing the stockpile requirements in accordance with the materials, and the quantities of materials, identified under subsection (c).

"(e) DIFFERENCES BETWEEN RECOMMENDATIONS AND NET IMPORT RESULTS.—When the stockpile requirements recommended by the Secretary in a report under this section differ from the materials and quantities that are identified under subsection (c), the Secretary shall also include in the report a detailed explanation for such differences, including—

"(1) a description of the assumptions used to determine the recommended stockpile requirements; and

"(2) a detailed analysis supporting the recommended quantity and quality for each material recommended as a strategic and critical material.

"(f) Periodic Review.—The Secretary shall conduct a detailed review of the stockpile requirement for each strategic and critical material at least once every five years. If the Secretary determines at any time that the stockpile requirement for a material should be revised, the Secretary shall submit to Congress a report that—

"(1) notifies Congress of that determination;

"(2) sets forth the Secretary's recommended stockpile requirement for that material; and

"(3) sets forth the assumptions used by the Secretary in determining that recommended requirement.".

SEC. 1105. STOCKPILE MANAGEMENT.

The Strategic and Critical Materials Stock Piling Act is amended by adding after section 14 (as added by section 1104) the following new sections:

"INTERAGENCY AGREEMENTS

"SEC. 15. (a) AUTHORITY TO ENTER INTO AGREEMENTS.—The Secretary may enter into an interagency agreement with the head of any other department or agency for the performance of functions of the Secretary relating to section 1106.

"(b) REIMBURSEMENT.—The Secretary shall reimburse the head of any such agency for expenses incurred by that agency in the administration of functions relating to the stockpile assigned to that agency by the Secretary under such an interagency agreement.

"APPROPRIATIONS TO BE MADE TO DEPARTMENT OF DEFENSE

"SEC. 16. Appropriations for the operation and management of the stockpile and for deposit to the National Defense Stockpile Transaction Fund shall be made as part of appropriations made to the Department of Defense for the military functions of the Department.".

SEC. 1106. EXTENSION OF USES OF STOCKPILE TRANSACTION FUND AND CODIFICATION OF REVOLVING FUND PROVISIONS.

(a) IN GENERAL.—Section 9(b) of the strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h(b)) is amended—

(1) by striking out the second sentence of paragraph (1); and

(2) by striking out paragraphs (2) and (3) and inserting in lieu thereof the following:

"(2) Subject to section 5(a)(1), moneys covered into the fund under paragraph (1) are hereby made available (subject to such limitations as may be provided in appropriation Acts) for—

"(A) the acquisition of strategic and critical materials under section 6(a)(1);

"(B) transportation, storage, and other incidental expenses related to such acquisition;

"(C) development of current specifications of stockpile materials and the upgrading of existing stockpile materials to meet current specifications (including transportation related to such upgrading);

"(D) testing and quality studies of stockpile materials; and

"(E) other reasonable requirements for management of the stockpile.

"(3) Moneys in the fund shall remain available until expended.".

(b) CONFORMING AMENDMENT.—Section 110 of Public Law 97-377 (96 Stat. 1911) is amended by striking out "Notwithstanding" and all that follows through "That during" and inserting in lieu thereof "During".

(c) APPLICABILITY OF AMENDMENTS.—The amendments made by subsection (a) apply with respect to funds covered into the National Defense Stockpile Fund before, on, or after the date of the enactment of this Act.

SEC. 7. MISCELLANEOUS TECHNICAL AMENDMENTS.

(a) TECHNICAL AMENDMENTS.—Section 4(a) of Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98c(a)) is amended—

(1) by striking out "on the day before the date of the date of the enactment of the Strategic and Critical Materials Stock Piling Revision Act of 1979" in paragraphs (1) and (3) and inserting in lieu thereof "on July 29, 1979", and

(2) by striking out "on or after the date of the enactment of the Strategic and Critical Materials Stock Piling Revision Act of 1979" in paragraph (2) and inserting in lieu thereof "after July 29, 1979".

(b) CLARIFYING AMENDMENT.—Section 6(a)(3) of such Act (50 U.S.C. 98e(a)(3)) is amended by striking out "the form most" and inserting in lieu thereof "a form more.".

Mr. McCLURE. Mr. President, this amendment is presented not only by myself but also by Senators WARNER, BINGAMAN, BENTSEN, STEVENS, DOMENICI, DECONCINI, LAXALT, BAUCUS, EXON, GARN, MELCHER, and SYMMS.

This amendment I will describe very shortly and I will reserve a detailed explanation if anybody wants a detailed explanation of what it does.

This amendment simply would take from the executive branch the authority to establish those goals.

Mr. President, the reason this is necessary, and it is an old, old problem, is that the objectives for the critical materials stockpile have varied so dramatically and wildly as to defy any logical interpretation of the bases upon whch they are made.

Various administrations over the last several years have made such great changes in it that the Congress from time to time has stepped in and said, "We do not understand what is going on. We do not agree with what is happening. We are going to set those stockpile goals ourselves."

We are operating under such a restriction today that says there shall be no disposal from the stockpile in spite of the fact that this administration has submitted a budget request indicating such a disposal will take place.

Indeed, it is so obvious that that is needed that if you will refer to pages 194 and 195 of this bill that is before us, you will see that the committee itself has recognized it, and though we have not adhered to the suggestions of the administration, there is a long list of targets established by the bill.

Mr. President, this bill has in it one additional feature. That is in an attempt to rationalize the stockpile goal setting, it provides for a study and report to the Congress based upon the comparison or ratio between domestic consumption and domestic production in order to guide the Congress with respect to decisions that Congress would make with respect to individual stockpile goals.

The Senate should also be aware of the fact that there are three specific materials that have already been addressed. One was by an amendment by the Senator from Illinois with respect to disposal of fluorospar. There is a special provision and a special amendment to take care of one special condition that exists in the State of Illinois.

That amendment was offered by the distinguished Senator from Illinois and accepted by the committee and is now a part of the bill.

This particular form of this amendment is a result of several years of deliberation. I do not recall now how many times I have appeared before the subcommittee to testify with respect to the need to change the existing system. I do recall at least two occasions in the last 5 years, one last year. I have filed statements upon numerous occasions as well. We have had a number of discussions between Members of this body and members of the appropriate committee in the other body that resulted in an agreement earlier this year between myself and Representative BENNETT, as the chairman of the appropriate subcommittee in the House, to meld the provisions which he believed appropriate with the provisions I have been urging for some time—for about 5 years, as a matter of fact.

That agreement that we arrived at after this 5-year discussion has been adopted in the committee in the House by a unanimous vote, if I recall correctly, when offered by Representative BENNETT and is in the House bill which is before us. The amendment that I am offering is identical to the provision in the House-passed legislation. It would at least provide both a rational guide, but not a binding guide, and a means by which we would have finally established what has become the practice. That is a decision by the legislative branch of what the stockpile goals should be.

Lest anyone believe that this is simply a fight between myself and one or two others, it has broad, widespread support and has had for many years.

Lest anyone believes it is only a reaction to this administration's efforts to gain some money to go into the Treasury to reduce the deficit and to hell with the consequences on critical materials, just look at what has happened in the radical variations in stockpile goals established over the last several years in both directions under various administrations.

Lest anyone believe that this is not the case today, remind yourself that current law requires acquisitions to the stockpile which would total a value of stockpile of $16 billion.

The administration's proposal in the face of the current law is to suggest that we reduce from $16 billion to $700 million. If anyone has looked at the needs of this Nation with respect to materials that would be necessary for our industrial complex to produce in the event of war, they must certainly know that a $700 million objective for the stockpile is ridiculous—absolutely, totally, beyond any stretch of the imagination not supported by any rational evaluation of the needs of critical materials.

Mr. President, that is not just my opinion. Earlier, I asked the GAO to make an investigation of the methodology used in setting these stockpile goals. They have not completed their findings, but their preliminary certification was that indeed there was no basis—this is their preliminary conclusion and not a final conclusion—that there is no basis for the setting of the stockpile goals as transmitted to us.

They stated in their preliminary findings that:

. . . The NSC study does not appear to provide a sufficient basis for setting stockpile goals or for other U.S. mobilization planning.

At another point, they stated:

. . . The study report did not adequately reflect major disagreements among study participants with regard to key assumptions.

. . . The study did not adequately show that it's results could vary greatly with changes in its assumptions.

Study participants and industry and economic experts have expressed serious concerns about study assumptions, methodology, and results.

Mr. President, I regret that this is not simply, by acclamation, made part of this bill because it does have widespread support and has had lengthy discussion over many years. I shall not belabor the subject further, but I shall be happy to respond to any questions which any Members may have.

I urge the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I want to begin by pointing out that this amendment is very strenuously opposed by the administration, and I state further that the majority leader intends to speak out against it before the conclusion of this debate.

The proposal put forth by the Senators from Idaho is fairly complex, but its most important element is this: The Senators propose to withdraw from the President the authority to determine what materials should be in the national stockpile and in what quantity and in what quality, to withdraw that authority which the President now has and which Presidents have had for a very long time in their responsibility for defense planning, both civil and military, to withdraw that responsibility and authority from the President and to vest it in Congress.

Let me read that language because there can be no confusion on the point. I read from the amendment, section 3(a):

SEC. 3. (a) The materials that are strategic and critical materials for the purposes of this Act, and the quality and quantity of each such material to be acquired for the purposes of this Act and the form in which each such material shall be acquired and stored, shall be established by law.

Who makes the laws around here? It is not the President; it is not the Supreme Court; it is Congress. Section 3(a) says the President will no longer have the authority he now has; instead, that authority will rest in Congress.

Mr. President, the Senator from Idaho is correct in his criticisms of past management of the stockpile by various administrations, both Republican and Democratic. It has not been a record we can point to with pride. But if it is true that we have had trouble with present and former Presidents, what kind of trouble are we asking for if we turn over this authority to determine what shall be in the stockpile and in what quantity?

We propose to turn that over to 535 Members of Congress, each of whom often thinks he is President in any case. This is an invitation to chaos, an invitation to disaster, it is an invitation to parochial manipulation of the stockpile in order to boost prices for this commodity or that that is important to this State or that State.

That is nothing new. Even with the authority vested in the President where it is today and has been for years, we have seen efforts on the part of Members of Congress to require purchase of certain items and to block the sale of other items, the basic purpose being to influence the price of commodities so as to benefit the economy of the State or region involved.

Make no mistake about it, I say to my colleagues, this is a very important amendment. It sounds fairly innocuous, sounds kind of boring and dry, but this is a momentous decision we are about to make. The question is, Do we want to take this authority from the President, who is responsible for overall civil and military planning for defense purposes, and give it to Congress; thus, in the view of this Senator, at least, opening a Pandora's box and sending out engraved invitations to 535 Members of Congress to get involved and invest in the stockpile management for the benefit of their own economies?

Mr. President, there is one other feature of the amendment I want to address. Let me first digress for just a moment. I assure my colleague from Texas and others who are anxious to get on with this that I shall not be long.

I alluded to attempts by Members of Congress to manipulate the strategic stockpile.

□ 2010

One example is this. The sales of silver from the stockpile have been blocked since 1982 by a Senate amendment which has been adopted in conference. Notwithstanding the fact that we have a $732 million surplus in the stockpile, notwithstanding the fact that we need to sell surplus materials in order to raise money to buy things that are short, notwithstanding the need to raise money, notwithstanding the fact that we have surpluses in silver that we can sell, certain Members have blocked the sale of silver some 6 years now. That is one example.

It is certainly not unique. There have been many, many others. Another example, for instance, a Member of this body obtained an upgrade for chrome and manganese produced by a company—where? In his home State. Why? Because the company, if it could get it upgraded, then the material would be eligible for purchase by the stockpile.

It happens that that company was on the verge of bankruptcy, and the Senator's action, which succeeded, brought about the sale of those materials which had been considered subpar materials and lo and behold benefited the firm in such a way that it avoided bankruptcy.

There are many other examples involving copper. I think Senators know full well what I am saying is quite true.

The other principal proposal of the amendment that I want to address is this. In addition to taking authority away from the President and giving it to the Congress for setting the materials and the quantity at this time in which they are to be purchased, the amendment would shift the management, day-to-day operations and management of the stockpile from the Na-

tional Security Council which farms it out to GSA to the Defense Department. The Defense Department does not want it. It should not be forced to accept this responsibility to resolve interdepartmental conflicts, to resolve civilian military conflicts with respect to planning for civil and military defense contingencies.

This responsibility should remain in the Executive Office. It should remain in the National Security Council where it belongs.

Mr. President, I shall wrap it all up now. I stated what I regard as the principal flaws and dangers in this bill. First is a very great flaw and danger. We are on the verge of making a very important decision. In addition I pointed out that the National Security Adviser, Admiral Poindexter, has written a letter dated just yesterday strenuously opposing the amendment. In addition to that, the Reserve Officers Association of the United States, in a letter dated today, has likewise stated its opposition to the proposal without further extensive hearings on its likely effect.

Now, let me just say this finally in conclusion. This is not an academic matter for two reasons. First of all, it involves the very important and monumental and in my view dangerous transfer of authority from the President to the Congress. Not only that, but this vote is very important for this reason. This is not a vote that is immaterial. I want my colleagues to know that this language which is now before the Senate is already in the House Department of Defense authorization for fiscal year 1987. It was inserted in subcommittee. It was not voted upon at any point. It was inserted in the subcommittee as original language. It was not discussed at any great length. There have been no votes, either recorded votes or voice votes on this thing. It sort of just snuck into the House bill, and now this vote, which we are about to have, is the vote that is going to make the difference because it is in the House bill. If the Senators from Idaho succeed in this, then it is not going to be a conferenceable item so this is the last chance that interested parties have to block this proposal.

If it succeeds here, the President loses, the country loses, and the proponents gain something that they feel strongly about but which I feel is not wise.

Mr. President, I ask unanimous consent that the letters from Admiral Poindexter and Maj. Gen. Evan L. Hultman, U.S. Army, retired, executive director of the Reserve Officers Association of the United States, be printed in the RECORD. These are the letters in opposition to the pending amendment.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

RESERVE OFFICER ASSOCIATION
OF THE UNITED STATES,
*Washington, DC, August 8, 1986.*

Hon. GORDON HUMPHREY,
*Chairman, Subcommittee on Preparedness, Armed Services Committee, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: The Reserve Officers Association (ROA) strongly opposes any amendment to the DoD Authorization Bill, S. 2683, which would alter the Presidential National Defense Stockpile goal-setting authority without fully exploring what impact such a change would have on national defense.

The ROA was chartered by Congress for the express purpose of insuring an adequate national security. The more than 125,000 members of the association are concerned that any legislation which would transfer stockpile goal-setting authority from the President to Congress would abet special interests and could jeopardize national security. Decisions relating to the National Defense Stockpile should be made in the interest of defense, and the stockpile should not be used with the purpose of subsidizing domestic producers. Shifting the responsibility for the stockpile from the National Security Council to the Department of Defense would surely create management problems and reduce scarce funds available for higher priority defense needs.

The ROA encourages change to the goal-setting or management of the National Defense Stockpile be made only after conducting in-depth studies and hearings. Your consideration of ROA concerns will be greatly appreciated.

Sincerely,

EVAN L. HULTMAN,
*Major General, AUS (Ret.), Executive Director.*

---

THE WHITE HOUSE,
*Washington, DC, August 5, 1986.*

Hon. GORDON HUMPHREY,
*Chairman, Subcommittee on Preparedness, Armed Services Committee, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: The Administration strongly opposes S. 2645, "A bill to provide for the establishment by law of the requirements for strategic and critical materials to be stockpiled in the National Defense Stockpile," sponsored by Senator McClure and Symms. I would appreciate your support in opposing this bill.

The most critical flaw of S. 2645 is that it would repeal Presidential stockpile goal-setting authority which could seriously compromise our national preparedness. The President, as Commander-in-Chief, is responsible for all U.S. mobilization planning which must encompass both military and civilian mobilization considerations. Our National Defense Stockpile should not be treated in a vacumm.

Further, S. 2645 would result in goals of over $15 billion. This $15 billion would provide significant domestic minerals and materials production subsidies—not national security protection—at the expense of other higher priority defense needs. The goals established initially by the bill would be those in effect in October 1984. These are the same goals that the President concluded were significantly overstated after an exhaustive two-year stockpile study.

In the future, this bill would allow goals to be adjusted using a peacetime imports-based formula that would act as an automatic domestic industry subsidy. Stockpile goals based on the "imports" formula would increase whenever domestic production levels decline and import levels rise. When combined with "Buy American" provisions, the result is an automatic and very costly domestic subsidy. Manipulation of the stockpile to provide domestic subsidies is tantamount to using the stockpile for economic purposes which is explicitly prohibited by the Strategic and Critical Materials Stock Piling Act.

Once again, I strongly urge you to oppose S. 2645.

John M. Poindexter.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, I rise in opposition, in fact strong opposition, to this amendment, I know it is late, and I know everybody looks at amendments related to the Minuteman and they think they are important. I think they are important. But I believe this is one of the most important amendments we are going to vote on tonight, and I want to make as strong an argument as I am capable of making against this amendment. I have the highest regard for the distinguished senior Senator from Idaho, but we all have bad ideas, and I believe this is one.

Now, Mr. President, I am not going to argue that Presidents of the United States do not make mistakes. Everybody knows they make mistakes. I am not going to argue that our stockpiling policy has always been rational or has always been stable. It has often been none of those things.

I would economically argue that we have tended to do more than we should have rather than less. But what I will argue, Mr. President, and argue very strongly, is that the President at least is the one person elected by all the people and given by the Constitution very specific powers related to national defense.

While Presidents have been right or wrong about stockpiling of commodities necessary to fight a war, I submit that there is reason to believe that by representing all 50 States they are less prone than are Members of Congress to try to promote some individual objective through stockpiling.

Now, this amendment basically takes the setting of the stockpile goal away from the President, though Congress has in the past and does now set limitations on it—for political reasons related to commodity prices and the production of resources in one State or another. This amendment proposes taking that power away from the President and giving it to the Congress.

Now, I think I can make my case very briefly. We just voted earlier today on a voice vote with great relief

to most Members to buy 100 million tons of coal more than virtually every Member of this body—in fact, every member of the committee—knows that we need.

Now, why, Mr. President, were so grateful to squander the taxpayers' money by buying 100 million tons of coal more than we knew we needed? Well, the reason we were so delighted is that we were being cheated much less than we were the year before. The year before we were forced by an amendment, which Members voted for to help out a colleague or a region or an industry, that in reality did something we all learned as children in the cliche "sending coal to Newcastle."

In fact, with the amendment adopted last year, which we moved away from this year, we shipped high sulfur, high cost, high transportation cost coal to Europe and burned it, creating pollution problems for the Europeans and massive losses for the American taxpayer.

Now, why have we sent "coal to Newcastle," at great expense to the taxpayer, at great loss, spending three or four times more for every job in the coal industry and that we might have generated more than the people got for producing the coal? Why did we do that?

We did it because of the logrolling buddy system that somebody wanted to do something to help their region. It was only the taxpayer paying for it, so we all looked the other way. We created international problems with the Germans by forcing the burning of high-sulfur coal when they had low-sulfur coal. We created the absurdity of paying a higher price for coal, then paying huge transportation costs and coming over and burning it on the very site that we could have bought cheaper coal with no transportation cost and lower sulfur. And we did that because the Congress was micromanaging resources and we had political logrolling going on.

□ 2020

Today, we have a great victory. We stopped doing that, and the price we paid was to agree to buy 100 million tons of coal we do not need as our payoff to stop doing the absurdity that we all learned as children.

The issue here is, do you really want to let Congress set the goal for the stockpile, when each of us has in our own State some resource that we know is critical to the national good; that we know the Nation cannot live without, because it is produced in our States? Each of us, with great self-righteousness, can claim that the stockpile is too low.

Mr. President, I urge my colleagues not to make this mistake. We do not need more coal going to Newcastle. We do not need more 100-million-ton ripoffs of the taxpayer. We are already almost $10 billion over budget on this bill.

We came to the floor thinking people were going to be trying to cut out defense. They have cut out defense, but they have drowned the bill in porkbarrel. Do we want to bring more pork bellies to burst this bill at the seams? I say no.

I urge my colleagues: Reject this amendment. Let the President decide the policy.

Let me remind Senators how it works. The President makes a decision about stockpiling. He notifies the authorizing committee. We review it. He waits 30 days, and then it goes into effect.

That is not a perfect system. The President makes mistakes. We, who have 30 days, more often than not have other things to do and may or may not get to it. But if we are going to set this goal—and every Senator is going to have a product in his State that we will have to stockpile—we are going to squander billions of dollars we do not have. Every dollar we add to the stockpile is going to come out of here, and we are going to build fewer planes and fewer tanks and have fewer people to serve in uniform.

If you think 100 million tons of coal that we are going to stack up somewhere is going to keep Ivan back from the gate, I submit that Ivan is unlikely to be deterred from aggression by a stockpile of coal.

Mr. President, we currently have, in $6.7 billion worth of stockpiles, the ability to fight a 3-year global, conventional conflict. That does not mean that we can consume at the same level that we are consuming now. Obviously, we are going to have to reduce luxury uses of these metals if we end up in a conflict.

In fact, the administration wants to sell $3 billion out of the stockpile, but we are not going to let them do that. We are not going to let them do that because some people think we should not do it. Some people produce commodities they would sell, and they do not want them sold because it would hurt their State. We are not going to do it because, when you get down to it, there are not a lot of people willing to stand up and yell that the taxpayers are losing $3 billion.

If we adopt this amendment, I submit that we are going to have more pork barrel in the setting of our stockpiles than ever before, and we are going to squander billions of dollars buying resources, for political reasons, at the very time when we desperately need to spend the money on defense.

I urge my colleagues to vote "no" on this amendment.

Mr. McCLURE. Mr. President, let me respond in a brief manner to my friend, the junior Senator from Texas, who described the senior Senator from Idaho as his good friend. But even good friends can sometimes be wrong. That certainly is true, and the Senator from Texas has just illustrated it, because he is wrong on his facts; he is wrong on his politics.

What he says, in effect, is that you can trust the President of the United States, who will never make a mistake, or might occasionally make a mistake, but you can trust him more than Congress, who certainly will make a mistake.

I have a vague suspicion that the Senator from Texas has a great respect for the President of the United States, both this one and past ones; yet, those goals have gone up and down, with no rational explanation, under the situation that he describes as being not perfect but next to perfect.

The Senator from New Hampshire referred to the letter from Admiral Poindexter. Admiral Poindexter is out of the country. He did not sign the letter.

I mention that only because it is not a question of Ronald Reagan making a decision, because we all know that that decision is delegated. I will show you the Executive order if you doubt it. It is delegated to someone else. To whom was it delegated? The Federal Emergency Management Agency.

What did the Federal Emergency Management Agency say to the Director of OMB? He said: "You have deprived me of the ability to manage this. I don't have the personnel or the funds to manage it, so you take it."

What was done? Instead of first taking it, they sent it to the National Security Council.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. McCLURE. I will yield in a moment.

What happened there was that a man who used to be in OMB, who is now at the National Security Council, did what you might expect him to do. He took OMB's position right in the National Security Council and writes a letter and sends it here and says, in effect, that that is the opinion of the President of the United States.

You and I know that the President of the United States did not see that and did not make that decision.

What you are arguing for is the substitution of a bureaucrat's decision as being more nearly perfect than that of the Congress of the United States.

This bill, as a matter of fact, says that the stockpile requirements would be established by law. That does not cut the President of the United States out of it. It reserves the process in which, under the current process, the President of the United States delegated to somebody in his administration the authority to make a recommendation to Congress; and Congress, having the right to accept or veto it—no dis-

cussion of the Chadha decision—the right to take action in contravention of that recommendation.

This bill says that Congress of the United States will suggest in a law what the stockpile goals shall be, and they will be sent to the President for his approval or his veto—a constitutional process.

It is suggested that the President of the United States is the supreme commander and, therefore, he, and he alone, should have control. It seems to me that that is what this whole exercise in the DOD authorization bill is.

□ 2030

We do not delegate to the President of the United States to make every security decision for this country. He has a responsibility. He makes a recommendation to Congress. The appropriate committees of Congress take a look at those recommendations and Congress decides what the objective should be.

Let us see what the result of that is in this system that is supposed to be so good today. It has been so bad that, as a matter of fact, the administration's authority has been suspended by law and the administration does not have the authority now to dispose of those stockpiles because Congress said, "You are not exercising that authority responsibly and we want to hold that back until we have a chance to look."

What are we doing? If you look down through the list of critical materials, what are critical materials anyhow? The Senator from Texas has indicated that we have enough materials to fight a 3-year war and that is plain balderdash. Why is it that when we have a broader conflict and a more intensive industrial basis for the conflicts today then in the past we have half the capacity we had once before when another President, exercising nearly impecable authority, nearly unchallengable discretion certainly to save the taxpayers' money, suggested that our stockpile requirements should be doubled what they are today, and now we are being told we ought to reduce it to 700 million from 16 billion.

Mr. President, even with the current inventories that we have and the inadequacy of those inventories to meet the industrial needs of our country in the event of war, there are no stockpile goals for chromium, none, zero. We are dependent upon imports for 73 percent of the chromium used, and that is absolutely essential to the war effort.

We get the balance of our 73 percent from places like South Africa, Zimbabwe, Yugoslavia, and Turkey, all very secure places in the event of a war.

Cobalt, 95 percent of our total consumption in this country is imported today. There are zero stockpile goals. Why would we have no stockpile goals for cobalt? Because of the 95 percent we get come from such secure places as Zambia, Zaire, and the Soviet Union.

Let us look at manganese. We are 100 percent dependent on imported supplies for manganese, 100 percent. And where do we get that manganese? We get it from South Africa, Brazil, and Gabon, and in spite of the fact that we are 100 percent dependent upon new production for imports, we have no stockpile goals today under this system the Senator from New Hampshire suggests it so nearly perfect.

Nickel, 68 percent dependent upon imports, and our stockpile goals zero, and where do we get it from, Botswana and Australia.

I would suggest to you that we do not have enough secure Navy to guarantee secure sealanes of communication, nor should we be tying up shipping in the event of a war in order to get supplies from across the oceans of things upon which we are 100 percent dependent. That is a security requirement.

Let us take a look at the platinum group, 92 percent dependent upon imports. And where do we get our imports of the platinum group metals? From South Africa and U.S.S.R.

We will be early next week, I hope, and I think our distinguished majority leader hopes that we will, indeed have a vote on sanctions against South Africa. I will oppose those sanctions. Part of the reasons I will oppose those sanctions are the very facts that I have been elucidating here of our dependence upon materials that are critical to the defense of this country, not just pork barrel for individuals. I would say to my friend from Texas there are none of these materials I have been listing here that are produced in my State, none. There is a possibility of cobalt, but not at current market prices and not for quite a little while is that likely to occur.

So this is not a parochial matter for the Senator from Idaho.

I am not suggesting that we buy silver for the stockpile and the suggestion is made by Admiral Poindexter in the letter my friend from New Hampshire has circulated that somehow a Buy American provision is going to exacerbate the problem. As a matter of fact, there is no Buy American provision in current law.

Mr. HUMPHREY. Mr. President, will the Senator yield on that point?

Mr. McCLURE. Yes; I will be happy to yield without losing my right to the floor.

Mr. HUMPHREY. I truly believe that the Senator from Idaho is mistaken on that point.

I want to read from the appendix to the budget for fiscal year 1986. This is in reference to the continuing resolution for that year Public Law 98-473. "During fiscal year ending September 30, 1985 not more than $185 million in additional amounts previously appropriated to remain available until expended may be obligated from amounts in the national defense stockpile transaction, provided that"—this is the important part—"provided that none of the funds appropriated by this paragraph may be used to purchase any strategic and critical materials for the national defense stockpile that are not mined and refined in the United States."

That is Buy America. That applies to $185 million that is still unexpended that needs to be spent.

Mr. McCLURE. Let me suggest to the Senator from New Hampshire what he is looking at is a specific provision with respect to a specific amount of money that was made available, and I would also say to my friend from New Hampshire there are unexpended funds in the stockpile that are not subject to any such limitation at all.

Mr. HUMPHREY. But these funds must be expended first and these are Buy America stipulations.

Mr. McCLURE. They may have to be spent first, and I am not prepared to argue that point, but the money that is there in the unexpended balances of the stockpile funds have no Buy America provision. That is an absolute red herring and, frankly, I resent the distortion of the record.

People are entitled to their opinion but they are not entitled to their own facts.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. McCLURE. I do not yield at this point. I will be happy to yield later.

Mr. HUMPHREY. He is welcome to read it. I will give him my copy.

Mr. McCLURE. The fact of the matter is, Mr. President, that this change is badly needed as evidenced by the fluctuation of the last several years and there is no one who has spoken on the floor this evening with respect to this provision who has not admitted that the administration and management of that stockpile funds and the establishment of the goals has not been badly managed in the past.

I will not burden the RECORD. I know that we are trying to get done tonight, and I am not going to spend the time to go through all of the charts, but I would invite you if you have any interest at all in whether or not it is politically motivated or manipulated today to look at the charts on the fluctuations of stockpile goals year by year.

It was suggested a moment ago that somehow it was wrong for the Senator from West Virginia to offer an amendment to require the upgrading of chrome and manganese. It is perhaps also wrong for us to have taken action

to get the consent of the administration to upgrade the stockpile of beryllium. Why did we do that? Because beryllium is absolutely essential to the SDI Program and the stockpile that we have is not of an appropriate grade to use in that program. So we asked them to allow that that substance be refined and upgraded so that that which is in the stockpile would be usable in event of a war.

Yes; there is a domestic refiner who benefits from that action. Is the reason we did it to benefit that particular refiner who is not in my State? No. It is because we want to have in the stockpile a stock of beryllium that could be used in the event of a war.

That is not pork barrel any more than ordering a tank or a ship or an airplane or any other procurement for a defense system is pork barrel.

It is possible to distort those goals. It is possible in any system that we have to attach to it a parochial interest. But to indicate that because it may happen in a particular State indicates, per se, it is pork barrel is ridiculous.

I support the strategic petroleum reserve. That happens to benefit the State of Texas where the Senator from Texas is located, representing his constitutents. I do not believe that a person from an oil-producing State should have to apologize for believing that it is necessary to have a reserve supply of something that is critical as petroleum to be used in the event of a cutoff of that supply. I do not accuse any Member of this body or the other who voted in favor of the strategic petroleum reserve or its funding who happens to come from a producing State saying that it is simply pork barrel politics. It is not.

It is prudent for this country to try to have within its stockpile of critical materials those things which are absolutely vital to the industrial strength of this country.

I do not mean to belabor the subject and perhaps I have spoken too long already, but I am old enough to remember and to have observed what happened at the beginning of World War II when we converted our industrial capacity into a miracle of production for the war effort. We could not have whipped the Axis—Germany, Italy, and Japan—on the basis of the military equipment that we had on hand at the beginning of the war. We won the war because we had productive capacity which we could turn to the production of instruments of war.

□ 2040

I submit to you that we do not have and we should not have now that level of preparedness that has on hand all the materials of war that have to be consumed during a 3-year war at the beginning of the war. But we had better have available to us the industrial capacity and the critical materials that are needed to fuel that industrial capacity or we will not win the next one unless it is, indeed, a 2-week war that is settled by nuclear exchange at the outset. We all pray it will not be that.

But there is no rational basis upon which anyone can allege that the stockpile today is sufficient to all of the production needs for a 3-year war. And the GAO study, while not final, will indicate that indeed the stockpiles, the methodology, the supporting documentation, and the materials that are necessary to confirm the findings and the latest recommendation, which is so dramatically different from earlier ones, is simply inadequate to the task.

Therefore, in my judgment, and I think in the judgment of many others in this body, and certainly in the judgment of the other body that has already adopted this position, we ought to make this change at this time.

Mr. RUDMAN. Mr. President, I will speak for about 1 minute and 30 seconds, so the managers can relax.

I want to say that my friend from Idaho makes an interesting case, as does my senior colleague and the Senator from Texas. I just want to make an observation.

This amendment essentially will have the Congress, in a sense, managing something else—in this case, managing, if you will, the levels of the strategic stockpile.

Mr. President, it is quarter to 9 on a Friday night. We have been here every night until 11, 12, 1 o'clock in the morning. This Congress cannot even manage what time it is supposed to have supper. We cannot manage our time. We cannot manage anything. The majority leader has been trying to get a unanimous-consent agreement. It has taken more time to get that than it took to draft the Declaration of Independence.

We have got here tonight an amendment offered in good faith by the Senator from Idaho that says we are now going to give the Congress the power to manage the levels of strategic stockpiles. It is a bad idea.

I can see what will happen. We will get here to the floor and the Armed Services Committee will make a logical, reasoned, rational judgment on what that ought to be, because I believe the committee will do that. We will then get to the floor and we will have meetings in the Democratic Cloakroom, in the Republican Cloakroom, in the Marble Room, trying to figure out which amendments we are going to offer to what to see that the stockpile will be the way we want it.

Mr. President, if we cannot manage things around here, we ought not to manage this. If the President is not managing it well, then let us change the law and make him manage it better than he does, have it properly in FEMA or in OMB. Let us put it someplace else. But let us not go and ask this Congress to manage anything. We know better. We cannot manage ourselves, let alone the strategic stockpile.

Mr. President, I yield the floor.

Mr. McCLURE. Will the Senator yield?

Mr. RUDMAN. I yield the floor.

Mr. McCLURE. Mr. President, the Senator says if they are not managing it well, let us change the management. That is one of the provisions in the amendment, to say it ought to be managed by the Department of Defense, who has both the knowledge and the ability to determine how that stockpile ought to be managed.

Mr. RUDMAN. Well, if the Senator will yield for one moment, I would simply respond to that, that I do not mind DOD managing it, but we would be managing the establishment of the policy. I do not think we are constitutionally able to do that, and I do not use that in the legal term, but the figurative term.

Mr. McCLURE. If the Congress of the United States is not supposed to establish policy, who is? Get back to read the Constitution.

● Mr. BINGAMAN. Mr. President, I would like to offer my strong support for the defense stockpile amendment offered by the distinguished chairman of the Committee on Energy and Natural Resources, Mr. McCLURE and I am pleased to be a cosponsor of this measure. The amendment is needed to ensure the viability of the stockpile and it is necessary to act on it at this time. I understand that similar language has already been added to the House DOD authorization bill by Congressman BENNETT and I encourage the adoption of the McCLURE amendment by the Senate at this time.

The National Defense Stockpile was established as a reservoir of essential minerals and materials to safeguard the country against a supply emergency. It is considered necessary to maintain a stockpile to guarantee that military, industrial and essential civilian needs will be met in times of war or other declared national emergency. However, despite the importance of the stockpile, it and our national security have been compromised recently as a result of mismanagement and poorly conceived administration policies. In order to ensure our security so that we do not fall prey to a predatory world market situation, or an even worse situation where we are unable to secure strategic materials at all, we must take action to maintain the stockpile.

In recent years stockpile goals have been unclear and congressional guidance has been ignored. The administration has called for underfunding the stockpile and requiring disposal of

critical materials to reduce our budget deficit. Despite critically low supplies, at many times in the past materials that were sold as surplus needed to be required at a higher cost, thus imposing a substantial burden on the taxpayers.

Last year the administration proposed a plan to "modernize" the National Defense Stockpile. However, in point of fact, this plan proposed to reduce dramatically many goals that have been established in the past for minerals and materials in the stockpile. The proposal would have sharply diminished the stockpile's size. The 1979 act creating the stockpile mandated that it should be sufficient to sustain the United States for a period of not less than 3 years in the event of a national emergency. But the President's proposal would reduce the level to just over 1 year for some materials and to just 3 days' worth of copper. I fear that the real motivation behind the administration's revised stockpile goals was OMB's desire for short-term deficit reduction.

In fact, these misguided policies have created undue hardships for much of our domestic mining industry. Copper, in particular, has direct military uses and was one of three critical materials needed during World War II and the Korean war. At this time the copper industry along with a number of other domestic mining industries are at all-time low ebbs. Poor stockpile management further exacerbates these problems and serves to further erode our national security in this area.

The McClure amendment will reverse many of these policies. It will bring stability to the stockpile program and calls for establishing stockpile requirements in statute. These provisions will eliminate the budgetary and political manipulations of the stockpile and reestablish its original purposes and policies.

I urge the adoption of the McClure amendment.●

Mr. NUNN. Mr. President, it is now a quarter of 9 o'clock. We have votes stacked until 9:30. If the debate is concluded—and I hope it is—on this amendment, then I would certainly move, at the appropriate time, to table this amendment. I hope we could get another debate going.

The problem with windows is that it is hard to manage the windows. What we have now is we have 45 minutes left and debate on this amendment has been thorough and I think we have had enough debate on this amendment.

So can we get the Senator from North Dakota on the alcohol amendment or can we get the Senator from Ohio on the SDI amendment, If we can get someone over here we can have a debate. Otherwise, in the next 45 minutes, I guess we are just going to be sitting here.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. NUNN. I yield the floor to the majority leader.

Mr. DOLE. Mr. President, I strongly urge my colleagues to oppose this amendment. The most critical flaw of this legislation is that it would repeal Presidential stockpile goal-setting authority which could seriously compromise our national preparedness. President Reagan, as Commander-in-Chief, is responsible for all U.S. mobilization planning which must encompass both military and civilian mobilization considerations. The national defense stockpile is an integral part of these mobilization plans and is vital to our Nation's sustainability in times of extended conflict.

AUTHORITY TRANSFER

The transfer of stockpile goal-setting authority from the President to Congress could possibly prove a tempting morsel—so to speak—since over half of the stockpile's materials are produced in 25 different States. This bill would also allow future goals to be adjusted using a peacetime "imports-based" formula which, under certain circumstances, could result in very costly domestic subsidies.

MANAGEMENT TRANSFER

I would also challenge the merits of transferring management of the entire stockpile to the Department of Defense from the NSC since it would be totally inappropriate for that agency to be resolving the many interagency differences.

CONCLUSION

I have complete confidence that our Armed Services Subcommittee on Preparedness will resolve any existing stockpile management deficiencies during their scheduled hearings this fall. I strongly urge that we allow them to fulfill their responsibilities—and allow President Reagan to retain his.

Mr. President, I do not know anything about the facts. I am not going to try to get into the facts. But I do know there is strong opposition to the amendment from the White House. That was indicated to me this afternoon. I may or may not be correct. I do not know whether Mr. Poindexter signed the letter or not.

Mr. HUMPHREY. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. HUMPHREY. I am glad the Senator raised that again because I tried to be recognized on that earlier.

The Senator from Idaho is quite correct. The National Security Adviser is out of town. But I want to assure my colleagues that the letter was read to the National Security Adviser on the phone and he authorized his signature and it is a perfectly valid letter.

Mr. DOLE. Mr. President, I would say, I do not think the Senator from Idaho would be here unless there is some deficiency. I agree with that. We ought to try to correct the deficiency. I think that is the argument made by the distinguished Senator from New Hampshire, and also the distinguished Senator from Texas, Senator GRAMM.

I am not going to offer a motion to table. That is going to be offered on the other side.

I want to express what was indicated to me as recently as 4 hours ago, and that is that there was strong opposition to this amendment—not to Senator MCCLURE, but to the amendment. They have great respect for the senior Senator from Idaho, as we all do.

Mr. MCCLURE. Mr. President, I am grateful to know that the administration is not opposed to me. I am not opposed to them, either. But I think they are wrong. I think the studies indicate it. I think our experience indicates it.

I am amazed that, as a matter of fact, there can be the kind of opposition that has been expressed here tonight when the change is so obviously needed. I would say to my good friend, the majority leader, that I think Senator WARNER knew the administration was opposed to it and is opposed to it and he is a cosponsor. I think Senator BINGAMAN knows that, and he is a cosponsor. I think Senator BENTSEN is aware of the fact that the administration would like to close down the stockpiles, virtually, by their action, and he is opposed to it. Senator STEVENS is certainly aware of the fact that the administration opposes it, and he is a cosponsor.

And I could go down the list, Mr. DOMENICI, Mr. DECONCINI, Mr. LAXALT, Mr. BAUCUS, Mr. EXON, Mr. GARN, Mr. MELCHER, Mr. SYMMS, all of these gentlemen know the administration is opposed to it.

That budget submission has been before us for quite a little while. But we do not simply rubberstamp administration proposals in other areas. I see no reason why we should here, either.

Mr. NUNN. Mr. President, I see the Senator from Texas is on his feet. We have a chance to do another amendment, a real amendment, and I believe we are going to be through with it in a few minutes.

Mr. GRAMM. Mr. President, if I could have 30 seconds, I would feel awfully good about it and I will sit down.

Mr. NUNN. I yield the floor.

Mr. GRAMM. Mr. President, the distinguished Senator from Idaho has given a great response to a speech that I did not give. I made it very clear that administrations have made terrible mistakes on stockpiling, but in this case the cure is worse than the ailment. Congress is not always wrong,

but individual Members always have individual concerns.

□ 2050

The President can veto the bill because this provision is in it or because some bad stockpiling provision is in it. But the President is not going to veto this bill. We all know it is because there are so many things in it that he wants. If he had a line item veto, I would not worry about this amendment. But he does not. He is probably not going to have it. That is why this is a mistake.

I hear discussion of materials that we are not supposed to need. And as I look at the stockpile, we have $538 million worth of cobalt. We hear Congress has intervened because the President was doing a bad job. The only thing I am aware of that we have intervened on has been silver in terms of a specific commodity.

Obviously, Congress has suspended the President's ability to sell the stockpile because people do not want to sell the stockpile.

I yield the floor.

Mr. NUNN. Mr. President, we have a chance now to do three amendments. I believe we can do that in the next 7, 8, or 10 minutes.

Mr. McCLURE. Mr. President, could we then indicate that debate on the McClure amendment has been completed?

Mr. NUNN. That would be fine if we could temporarily set it aside.

Mr. McCLURE. I think it might expedite business if we can complete the debate, and move to third reading, and then set aside the vote.

Mr. NUNN. That would be a wonderful move.

Mr. McCLURE. I move adoption of the amendment.

Mr. NUNN. Mr. President, I move to table the amendment, and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. NUNN. Mr. President, there is an understanding that the vote will be at 9:30.

The PRESIDING OFFICER. That will require a unanimous consent.

Mr. DOLE. I ask unanimous consent that the vote occur at 9:30.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, will the majority leader withhold that unanimous-consent request on the vote at 9:30? The minority leader had asked to be on the floor to make sure it was technically correct.

Mr. DOLE. Yes; let me withhold that. I do not think he has any problem with that.

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. If the Senator will withhold that, there is a motion to table pending.

Mr. DOLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

M. NUNN. Mr. President, the Senator from Rhode Island has a statement that has nothing to do with the amendment. We can do that right now, and save a little time.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized, without objection.

Mr. PELL. I thank my colleague, the Senator from Georgia.

THE TRIDENT PROGRAM

Mr. PELL. Mr. President, I wish to record my strong support for one very important feature of the 1987 defense authorization bill, and that is its provision for the continuing procurement of *Ohio* class submarines, better known as the Trident submarines.

The bill authorizes the full budget request of $1.4 billion for procurement of one Trident submarine, and an additional $146.4 million for advance procurement. If approved, this will be the 14th of 20 Trident submarines scheduled for deployment by the year 2000. Seven have already been delivered to the Navy and six are presently under construction by the electric boat division of General Dynamics Corp.

Particularly in view of the failure of the House Armed Services Committee to authorize this request—an ommission which I am glad to note has since been rectified by the House Appropriations Committee—and also in view of possible future reductions in defense expenditures under the Gramm-Rudman process, I would like to remind the Senate of the prime importance of maintaining the momentum of the Trident submarine program. I do so not only because some thousands of Rhode Islanders earn their livelihood at the electric boat shipyards, but also because the Trident program has a significance which vastly transcends any local interest. The Trident submarine is in many ways the keystone of our national defense.

The technology of warfare has advanced at such a pace that we tend to take for granted the revolutionary breakthrough which occurred when the submarine grew out of its traditional role as a hunter of other ships and became a submersible platform for launching strategic missiles. When that occurred, the missile-launching submarine became a vital component of our strategy of deterrence.

The whole theory of deterrence is based on the premise that significant U.S. strategic forces would survive an initial enemy attack with a capability to retaliate conclusively. The Trident submarine, and its predecessor Poseidon, provide that capability because they are designed for survivability and endurance. They are virtually invulnerable to preemptive attack. As recently described in a Wall Street Journal article entitled "Quiet Threat", the Trident operates in such ghostly silence that it can become "a black hole in the ocean" in the words of one Trident commander.

Because the Trident thus is the most resiliant element in our national defense it has been described as "the strategic system of the future." To my mind, it is the capital ship of the modern Navy.

The Trident also has been regarded as a stabilizing influence in the nuclear age, insofar as it discourages our adversaries from contemplating a first strike, knowing as they do that we have an assured second strike capability. Moreover, the original Trident I missile, while capable of awesome retaliation, is not capable of mounting an assured preemptive strike against hardened military targets, so it does not pose an offensive threat.

I would add, Mr. President, that many arms control experts fear that the new missile with which the Navy plans to arm the Trident submarine, the so-called Trident II missile, will disrupt this delicate balance. I share those concerns and believe we should examine these dangers carefully before proceeding with deployment of the Trident II missile.

However, whatever questions there may be about the Trident II missile, there is no disagreement about the wisdom of proceeding with the programmed construction of the full Trident submarine fleet. The Trident will be the bulwark of our national security well into the 21st century. I am delighted that the bill before us maintains the momentum of the construction program and urge that all steps be taken to continue that momentum in the future.

Finally, Mr. President, I ask unanimous consent that the article entitled "Quiet Threat" from the July 28, 1986, edition of the Wall Street Journal be reprinted in the RECORD.

There being no objection, the material was ordered to be printed in the Record, as follows:

[From the Wall Street Journal, July 28, 1986]

TRIDENT SUBS, SILENT, ELUSIVE AND DEADLY, CHANGE NUCLEAR GAME

(By Tim Carrington and John J. Fialka)

ABOARD THE USS ALASKA.—After 18 years as a submariner, Lt. Cmdr. Thomas Fursman says he is so used to the silence of the ocean depths that the sunlit, bustling world

above "seems unnatural." As the executive officer of the Alaska, the seventh of about 20 Trident submarines slated for deployment, Lt. Cmdr. Fursman remains submerged for 70 days at a time.

Although the Alaska is as long as the Washington Monument, it is designed to lurk undetected and unthreatened by Soviet trackers. It can become "a black hole in the ocean." Capt. Charles Chotvacs, its commanding officer, boasts.

Almost-monastic silence is enforced aboard the Alaska. A nuclear reactor quietly drives large turbines, and dozens of "sound-whiting" features muffle the usual ship's clamor. Rubber pads doors and equipment; pipes and other metal fixtures hang from decks to prevent sound from traveling. The goal is to prevent noise from reaching the hull and giving away the sub's position.

ESCAPING DETECTION

During Navy war games when smaller attack submarines try to find such ballistic-missile subs, Tridents always escape detection unless they deliberately provide clues. "If you said to somebody go hide and don't get detected, nobody's going to find him," one Alaska officer says.

Silence is also the Trident's hallmark in the noisy realms of Washington budget politics. The Trident is the nation's most expensive weapons system; the 20 or so subs, made by General Dynamics Corp., and their missiles, made by Lockheed Corp., will cost about $100 billion. Yet the Trident program has attracted relatively little controversy so far. While peace activists and budget cutters were slashing the administration's MX missile program, the Trident program glided through the budget wars largely untouched. Similarly, the public arms-control debate has centered on space weapons and European missiles; but it is the Tridents—each carrying 24 missiles bearing an average of eight nuclear warheads apiece—that are changing the nuclear balance.

The MX and other land-based intercontinental ballistic missiles are vulnerable to both strategic and political attack. Deployed in stationary silos, land-based ICBMs are easily tarteted by the Soviets and often not welcomed by localities. Submarine-launched ballistic missiles, in contrast, are a less visible, more acceptable deterrent. And the Navy is preparing to make the Trident even more deadly. By the end of this decade, a new Trident II SLBM, called the D-5 by the Pentagon, will begin replacing the current Trident I.

SIGNIFICANT CHANGE

War planners generally consider existing SLBMs "second-strike" weapons that would be launched only against Soviet cities in response to a nuclear attack; they lack the accuracy to mount a preemptive "first strike" against hardened military targets, such as ICBM silos and command posts. As long as Soviet cities face destruction from invulnerable SLBMs, strategists figure that Moscow won't attempt a preemptive first strike. But Trident II missiles should be accurate enough to level the most hardened targets, enabling the U.S., in theory at least, to launch a first strike from submarines.

Official U.S. policy holds that the Soviets needn't worry about this threat because the U.S. would never start a nuclear war. Unofficially, however, some U.S. analysts fear that the Soviets may respond with a "launch on warning" policy that would send Soviet missiles aloft at the first hint that they might be under attack.

The Trident II could provoke such a hair-trigger approach because it "will only make them more nervous about the short time they will have to lauch," says Robert S. Norris, who is writing a book on the Soviet nuclear arsenal for the Natural Resource defense Council.

IRONIC OBSCURITY

As a result, many arms experts view as ironic the relatively scant attention directed to the D-5 in the debate over the nuclear-arms race. "The MX is child's play compared to the D-5," says William Martel, a Rand Corp. specialist.

Such strategic considerations aren't a big concern to the 165-man crew on the Alaska. They spend much of their time at sea checking the missile systems. Beginning a simulated launch, Capt. Chotvacs orders that the submarine be brought into a hovering position, using computers to modulate the water levels in buoyancy tanks. Then, over the speaker system, comes a series of beeps similar to those that would sound if the captain received an order, relayed from the president, to begin an actual launch.

"Battle stations: missiles," Capt. Chotvacs barks over the speaker system. He adds: "This is the captain. This is an exercise." Next, Lt. Cmdr. Fursman repeats this same command, one of a series of redundant steps required for any missile launch, simulated or real. When the missiles are ready, Capt, Chotvacs gives the order, "Initiating fire."

While the Alaska's weapons officer squeezes a red trigger below, Capt. Chotvacs watches a control-room screen showing each of the 24 missiles moving through a progression of stages—"denote," "prepare" and, finally, "away." In a real launching, the "away," light would flash when the missile had been fired.

Because of its quiet financing successes, together with the problems afflicting other defense programs, the Trident has become "the strategic system of the future," one admiral says. Others in the Pentagon apparently agree. "It's becoming a more important part of the deterrent," says Richard Perle, the assistant secretary of defense for international security policy.

Soviet war planners are deeply concerned about the Trident—probably more so than about the more publicized MX missile system or the near-term prospects of the Strategic Defense Initiative. The Trident II missile, which is scheduled for deployment in 1989, will be the most expensive and most destructive nuclear weapon ever deployed by the U.S.

CHANGING PLANS

The D-5's improved accuracy, plus the Trident's stealth, is believed to be pushing changes in strategic war plans on both sides. U.S. analysts have begun to worry that when the Soviets build their own D-5, it will be an unprecedentedly lethal first-strike weapon. Fired close to American shores, such missiles could knock out U.S. bomber and missile bases simultaneously with only a few minutes of warning.

But Mr. Perle dismisses fears that, with the Trident, the U.S. is riding into an ever more hazardous nuclear world. "It would indeed be a dangerous situation for the Soviet alone to have the hard-target kill capability," he says, referring to Soviet land-based missiles believed to have accuracy equivalent to the D-5's.

Moscow hopes to stop the Trident II missile. Soviet nuclear-weapons experts accompanying Mikhail Gorbachev to the Geneva summit last November lectured reporters at length about the D-5. "This is one bird that must be put back in its cage," one Soviet academician asserted.

SOVIET MANEUVERS

In a recent exchange of arms-control proposals dealing with intermediate-range nuclear weapons based in Europe, the Soviets even tried to pervent the export of new U.S. technology to Europe. They were seeking to block the planned sale of the D-5 to the British. U.S. analysts also believe that the looming deployment of the D-5 is spurring the rapid development of two new Soviet ICBMs, the SS-24 and the SS-25, both of which are mobile and therefore less vulnerable to surprise attack.

The Trident system, though generally ignored by the U.S. public, drew some attention about five years ago when the Navy was wrangling with General Dynamics, the sub's prime contractor, over surging costs and delievery delays. These problems have been largely cleared up, however, and the Navy is currently trying to bring in Newport News Shipbuilding, a Tenneco Inc., unit, as a second producer of the ship. (It is called a ship, rather than a boat as other subs are, because the Navy felt it was too large to be a "boat.")

Meanwhile, submarine specialists estimate that, for at least 10 years, Russian detection methods won't threaten the Tridents' ability to hide. Navy officials are still analyzing whether the Walker spy scandal resulted in technological leaks that would significantly reduce this advantage; some Navy officials say, however, that much of the informations delivered by the Walkers has been surpassed with the Trident technologies.

EVENTUAL DANGER

But planners still worry that the giant submarines may someday cease being black holes to Soviet detection systems. Russian laboratories have been pouring funds into researching nonacoustic means of tracking U.S. submarines. If that research every pays off, U.S. strategists warn, the Pentagon will have to rely more on the other legs of the nuclear triad—the bombers and land-based missiles.

But for the time being, the Trident remains a formidable weapons system. It produces its own power, fresh water and air, and it carries ample supplies for its typical 10-week deployments. Each ship has two alternating crews to enable it to spend as much time as possible at sea.

The crews live a rigorous life. Submariners experience not only long separations from home, like other sailors, but also separations from any firm sense of time and place. During a deployment, the enlisted men aboard the Alaska generally can't say whether it is off the coast of Scotland or in the South Pacific. Equally cut off from the cycles of day and night sailors say they often learn the time of day only when they see what sort of food is served in the mess.

There is little talk of the deadly mission the Trident may someday be asked to carry out. Following the simulated launch, conversation quickly turns to food, computers or the next scheduled movie. Standing amid the giant canisters on the missile deck, one sailor, James Alexander, dismisses the worries of hair-trigger tensions between the nuclear superpowers. "It doesn't bother me," he says, "because I don't think they'll ever be used."

Mr. DOLE. Mr. President, I renew my request that the vote on the motion to table occur at 9:30.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE and Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

AMENDMENT NO. 2664

(Purpose: To authorize the Secretary of the Navy to lease certain real property at the Naval Weapons Station, Charleston, South Carolina, to the South Carolina State Ports Authority)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND] proposes and amendment numbered 2664.

Mr. THURMOND. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 317, after line 22, insert the following new section:

SEC. 2192. LEASE OF PROPERTY AT THE NAVAL WEAPONS STATION, CHARLESTON, SOUTH CAROLINA.

(a) IN GENERAL.—The Secretary of the Navy is authorized to lease to the South Carolina Ports Authority approximately 118 acres of land, together with improvements thereon, at the Naval Weapons Station, Charleston, South Carolina.

(b) TERM OF LEASE.—The lease entered into under subsection (a) may be for such term as the Secretary determines appropriate, but in no event to exceed 25 years.

(c) CONSIDERATION.—In addition to the fair rental value to be paid by the South Carolina Ports Authority for the premises leased pursuant to this section, such Authority shall pay for the cost of replacing certain facilities on the leased premises. The replacement facilities shall be constructed in a manner and at a site determined by the Secretary.

(d) AUTHORITY TO DEMOLISH AND CONSTRUCT FACILITIES.—The Secretary may, under the terms of the lease, authorize the South Carolina Ports Authority to demolish existing facilities on the leased land and to construct new facilities on such land for the use of such Authority.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I rise to propose an amendment to the Defense authorization bill to authorize the Navy to lease approximately 118 acres of unused land to the South Carolina Ports Authority in Charleston, SC for a fair price.

A lease agreement has already been reached between the Navy and the South Carolina Ports Authority. However, the Navy needs congressional authority to grant this lease, which requires the ports authority to pay for the cost of replacing certain facilities on the leased premises.

Mr. President, I have been working with the Navy and the ports authority for the past 3 years to agree on the terms of the lease agreement. This has now been accomplished, except for some minor provisions. The point has now been reached to grant the Navy authority to make this lease.

This lease for the ports authority will allow for an expansion of shipping and docking operations at the Charleston Port. It will be an economic boost to Charleston and to South Carolina. The increased import and export capabilities of the Charleston Port have been an objective of my State for many years. It will mean jobs and economic growth.

Mr. President, I might say that we are paying the full, fair rental for the property. In addition they are paying to replace the facilities there.

I have cleared this on both sides. As far as I know, there is no objection.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from South Carolina.

The amendment (No. 2664) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2665

(Purpose: To require that certain estimates be provided to Congress regarding the future costs associated with the SDI program)

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the Senate will lay aside the pending amendment, and the clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE] proposes an amendment numbered 2665.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, between lines 18 and 19, insert the following new section:

SEC. 206. REPORT ON PROJECTED COSTS OF SDI PROGRAM.

Subsection (b) of section 223 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 613), is amended to read as follows:

At the end of subsection (b) add the following:

"(c) The Secretary shall specifically include in such report the following information:

"(1) The cost goals or cost objectives for the production and deployment of a Strategic Defense Initiative System determined on the basis of capabilities expected to be developed in the future and the cost goals or cost objectives for the individual components of such system (determined on the basis of capabilities expected to be developed in the future).

"(2) The estimated cost for the production and deployment of the Strategic Defense Initiative System referred to in subparagraph (1) and determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report and the estimated cost for the production and deployment of the individual components of such system (determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report)."

Mr. PROXMIRE. Mr. President, it is my understanding that this amendment has been cleared on both sides.

Mr. President, the amendment I am offering amplifies on a reporting requirement that was contained in last year's fiscal year 1986 DOD Authorization Act.

This amendment would simply require the Strategic Defense Initiative Organization to supply Congress with additional information on the cost estimates it plans to provide in the future on various SDI systems.

In other words this amendment represents only a follow-on to a reporting requirement the Department of Defense is already in the process of fulfilling. It will simply enable Congress to have more relevant details on the cost estimates the SDI Organization will be preparing.

In the fiscal year 1986 Authorization Act, there was a requirement that "the Secretary of Defense shall submit to Congress a report on the cost estimates for procurement and deployment of strategic defense initiative programs. The report shall be submitted as soon as possible, but not later than submission of the budget request of the Department of Defense for fiscal year 1989."

Let me say that I am very pleased that reporting requirement was put in the fiscal year 1986 authorization. Congress simply is going to have to get a firm grip on what this star wars system would cost this Nation.

We cannot continue to make major decisions about the direction of this program unless we get a clear and realistic picture of what the final bill will be.

During this year, General Abrahamson, the director of SDI, has been telling Congress that his organization is working up cost figures that it plans to send up next year.

But there is a catch to this. General Abrahamson has been telling Congress

he plans to send up cost goals and objectives for SDI.

This is what he told a Senate staff briefing earlier this year, which was documented in the SDI staff report submitted to Senator JOHNSTON, Senator CHILES, and myself.

That staff report noted that "rather than give an estimate of SDI's total cost based on current information, General Abrahamson said he is working to develop what SDI should cost if it is to be affordable and meet the cost-effective-at-the-margin criteria, as posed by Ambassador Paul Nitze. Within a year, the SDI organization hopes to begin establishing cost objectives for its weapons."

On March 5, in testimony before the Defense Appropriations Subcommittee, General Abrahamson repeated that one of the "management challenges" he has established for his organization "is to try to have set the cost goals on these key SDI elements that will be required over the next year."

On March 25, in testimony before the Armed Services Committee, General Abrahamson repeated that he planned to give Congress a set of cost goals for the various SDI weapons systems.

As an example, he said the cost goal for the ERIS missile interceptor, which would be fired at Soviet warheads, is for each missile to cost less than $1 million.

In another briefing for Senate staff, SDI officials said, for example, that their cost goal for space transportation is to be able to lift material into space for $200 to $400 a pound.

In other words, the SDI organization plans to present Congress the costs it hopes to achieve for these star wars weapons based on future technological breakthroughs and future cost efficiencies.

Now it is all well and good for Congress to have these cost goals. It is nice to know that SDI wants to get the cost of an ERIS interceptor down to less than $1 million a copy and the cost of space transportation down to $400 a pound or less.

But it is also nice to know what these weapons would cost based on our current manufacturing capabilities and based on the current cost efficiencies we can now achieve.

For example, based on past history and our current capabilities, an ERIS interceptor would now cost about $5 million to $10 million a copy.

And currently it costs anywhere from $1,500 to $3,000 to lift a pound of material into space.

At today's prices and capabilities, one of those space battle stations firing rockets might cost as much as $500 million a copy. The cost goal for this battle station, however, might be $50 million a copy so star wars can be cost effective.

Now, can SDI drive down the costs of these huge systems by tenfold or more? That remains to be seen.

It remains to be seen whether SDI can achieve this economic revolution in the defense industry so we can have these complex star wars systems at miraculously low prices.

But for the moment, if Congress is to receive from SDI what it hopes these star wars weapons will cost based on future capabilities, then Congress should also get from SDI what these weapons would cost today based on current capabilities.

In other words, it is nice to find out what SDI hopes star wars will cost. But it also helps to find out what star wars would cost now.

That way Congress can assess how far SDI has to go to achieve these cost goals. Or put another way, how much dreaming SDI is doing.

That is the purpose of my amendment, Mr. President.

It would require that in fulfilling the fiscal year 1986 DOD authorization requirement—that is, in reporting to Congress on the cost of procuring and deploying star wars—SDI not only would give its cost goals and objectives for the star wars weapons systems, it would also give Congress figures on what these star wars weapons systems would cost based on current capabilities.

This should not be that difficult a reporting requirement for SDI. If SDI says it plans to give Congress estimates of what it hopes star wars weapons will cost in the future, it certainly can give Congress estimates of what star wars weapons would cost now.

In estimating future costs of star wars, SDI would certainly have to use its current cost as a starting point.

Therefore, I do not think it would be too difficult for SDI to estimate what a star wars weapon would cost now, particularly if it can estimate what it would cost in the future.

I, therefore, urge the adoption of this amendment. It will give Congress valuable points of comparison as it receives this cost information from SDI.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. NUNN. Mr. President, it is my understanding that the majority has cleared this amendment, and the minority side, the Democratic side, urges its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment [No. 2665] was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2666

(Purpose: To require the Secretary of the Navy to conduct a study on production line techniques applicable to the overhaul of Los Angeles class submarines.)

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mr. HUMPHREY. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is laid aside, and the clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Hampshire [Mr. HUMPHREY] proposes an amendment numbered 2666.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

AMENDMENT NO. 2666

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. SUBMARINE OVERHAUL STUDY.

The Secretary of the Navy shall conduct a detail study and investigation on the desirability and feasibility of applying production line techniques for the overhaul of Los Angeles class submarines. The Secretary shall submit the results of such study and investigation, together with such comments and recommendations as he determines appropriate, to Congress not later than May 1, 1987.

Mr. HUMPHREY. Mr. President, the amendment has been agreed to on both sides. It is noncontroversial. I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New Hampshire.

The amendment [No. 2666] was agreed to.

Mr. HUMPHREY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2667

(Purpose: To provide that funds made available for transportation of humanitarian relief supplies to Afghan refugees will remain available until expended)

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the pending amendment be laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Hampshire [Mr. HUMPHREY] proposed an amendment number 2667.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

AMENDMENT NO. 2667

On page 23, between lines 16 and 17, insert the following:

(e) AVAILABILITY OF FUNDS.—Amounts appropriated pursuant to the authorization in subsection (a) shall remain available until expended, to the extent provided in the appropriation Acts.

Mr. HUMPHREY. Mr. President, again, this amendment has been discussed by both managers on both sides. They are prepared to accept it.

Mr. NUNN. Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New Hampshire.

The amendment [No. 2667] was agreed to.

Mr. HUMPHREY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2668

(Purpose: to require the Secretaries of Defense and Education to conduct a joint study of certain needs of dependents' educational facilities on military installations, and to require the submission of an advance notice to Congress before the Department of Defense closes, transfers, or relocates the Fort Riley correctional facilities.)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is laid aside, and the clerk will report.

The legislation clerk read as follows:

The Senator from Kansas [Mr. DOLE], for himself and Mrs. KASSEBAUM, proposes an amendment numbered 2668.

□ 2100

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 306, between lines 6 and 7, insert the following:

SEC. 218a. STUDY OF NEEDS OF DEPENDENTS' EDUCATIONAL FACILITIES ON MILITARY INSTALLATIONS.

(A) IN GENERAL.—The Secretary of Defense and the Secretary of Education shall conduct a joint study for the purpose of determining the needs for construction, extension, remodeling, and rehabilitation of dependents' educational facilities on military installations in the United States and shall develop a joint policy to meet those needs.

(b) REPORT.—(1) Not later than April 1, 1987, the Secretaries of Defense and Education shall submit to Congress a report containing—

(1) a description of the needs determined under subsection (a);

(2) the joint policy developed to meet such needs; and

(3) any recommendations for legislation the Secretaries consider necessary or appropriate to meet such needs.

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. CORRECTIONAL FACILITIES AT FORT RILEY, KANSAS.

The correctional facilities at Fort Riley, Kansas, may not be closed, transferred, or relocated unless—

(1) the Secretary of Defense has transmitted to Congress a written notice of the intent to close, transfer, or relocate such facilities, as the case may be; and

(2) the 180-day period beginning on the date on which Congress received such notice has expired.

Mr. DOLE. Mr. President, the amendment my colleague from Kansas and I are offering would require the Departments of Defense and Education to put their heads together and assess the real needs of school facilities on military bases.

In addition, it would require the Secretary of Defense to provide written notification to the Congress prior to closing or transferring the correctional facility at Fort Riley, KS; and further, that no action to close or transfer the facility could occur for 180 days following that notification.

Mr. President, the first problem was brought to my attention due to a situation at Fort Riley, KS. Currently, the junior high school facilities for students consist of seven relocatable trailers that have deteriorated to such an extent that they are about to be condemned. The seven relocatables must be replaced by a permanent structure as soon as possible.

The overcrowding situation has been caused by two major factors: First, Federal mandates for special education, and second, the fact that the base is trying to provide educational services to more students than the school was originally built to serve. The relocatables were designed to be temporary, but have somehow become permanent. Despite prudent maintenance efforts, they have now deteriorated to the point of no return.

In cases where financial need is justified, neither Department seems to be willing to accept responsibility. Both Departments pass the buck back and forth. As a consequence, the children of military families are suffering.

Mr. President, the Fort Riley situation brings to the forefront the larger issue of quality of life for military families. We ask these families to relocate frequently and present DOD officials acknowledge that education on military bases has been an ongoing problem. For the most part, facilities and services are inadequate and underfunded.

Congress must have some assessment of the real problems and needs, in order to be able to provide a rational response. The Fort Riley situation is only one example of what is a very widespread problem.

Mr. President, the second part of this amendment addresses the correctional facility at Fort Riley, KS.

This amendment will provide tangible help both to a region hard hit economically—the Fort Riley, KS area—and to the Army's judicial system.

In addition, it would: not add money to the DOD budget, and very possibly save the Army some money down the line.

For background, the Army has undertaken a study of whether or not to move the correctional facility at Fort Riley, KS to another location. They key word is "move."

There is no question that the Army needs an excellent, central location for this facility, like the one that already exists at Fort Riley. It is certainly more centrally located than the alternate site under consideration.

Despite these facts, the Army continues to seriously consider closing the Fort Riley facility, paying to dismantle it, paying to move it, and paying for new personnel in a much higher pay area to staff the facility.

Meanwhile, the cost of the Fort Riley community would be devastating. Well over 100 civilian jobs would be lost and the local economy would suffer the consequences.

The move makes no sense, either in terms of the Army's needs, the cost of the move, or the impact on the Fort Riley area.

Mr. President, I urge all of my colleagues to support this simple, effective, cost-saving amendment.

Mr. THURMOND. Mr. President, as chairman of the Military Construction Subcommittee of the Armed Services Committee, I support the amendment of the distinguished Senator from Kansas.

I am sympathetic to the situation that Senator DOLE describes. In my own State I have several schools that fall in that same situation. Several Senators have come to me during our review of the fiscal year 1987 Defense budget expressing concern for schools for dependent children at our Conus bases.

I believe a study by the Department of Defense and the Department of Education will help resolve this important matter.

Mr. NUNN. Mr. President, I support the amendment and urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment (No. 2668) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2317

(Purpose: To clarify authority relating to the payment of certain expenses of defense personnel of foreign countries)

Mr. GOLDWATER. Mr. President, on behalf of Mr. WILSON, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendments are laid aside. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Arizona [Mr. GOLDWATER], for Mr. WILSON, proposes an amendment numbered 2317.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 228, beginning with line 1, strike out all down through line 4 and insert in lieu thereof the following:

"(c) In addition to the expenses authorized to be paid under subsection (a), the Secretary of Defense may pay such other expenses in connection with any such conference, seminar, or similar meeting as the Secretary considers in the national security interests of the United States.

"(d) The authority to pay expenses under this section is in addition to the authority to pay certain expenses and compensation of officers and students of Latin American countries under section 1050 of this title.".

Mr. WILSON. Mr. President, section 1218 authorizes the Secretary of Defense to pay certain expenses of defense personnel from developing countries in connection with their attendance at bilateral or regional meetings where such participation is in the national security interest of the United States. Under the 1960 Latin American Cooperation Act, similar authority currently exists for defense personnel from Latin America.

It has been brought to my attention that section 1218, as currently drafted, raises the question of dual coverage for Latin America.

The committee's intent during consideration of this provision—and I welcome Senator NUNN's comments on this point—was to extend coverage similar to that which currently exists under the Latin American Cooperation Act to other regions of the world. We did not intend this provision to replace the program which has successfully been in existence for years under the Latin American Cooperation Act.

The clarifying amendment that I have proposed would make the minor changes necessary to bring this provision in line with the committee's intent. It would make clear that section 1218 would be operative for all regions of the world except Latin America, where the Latin American Cooperation Act would remain the legal authority.

It is my understanding that this amendment has been agreed to by the minority.

Mr. GOLDWATER. Mr. President, this has been cleared on both sides. I move its adoption.

Mr. NUNN. Mr. President, I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2317) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN. Mr. President, we have handled five amendments in the last 5 minutes. If we can do that for the next 30 minutes with the remaining amendments, we will be through.

Mr. DOLE. We can table all the rest of them. [Laughter.]

Mr. NUNN. At 9:30 p.m. we do have a tabling motion to be voted upon. I would urge Senators to come over to the Chamber if they have amendments. In the next 30 minutes we can handle five or six amendments. The Senator from Ohio has two amendments. I hope he will be coming soon. The Senator from North Carolina has an amendment. If we can debate those by 9:30, we can have them voted on after 9:30.

AMENDMENT NO. 2669

(Purpose: To impose certain restrictions on the obligation of funds for the small mobile ICBM program)

Mr. WILSON. Mr. President, I ask unanimous consent that the pending amendments be temporarily laid aside in order that I may send an amendment to the desk.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

Mr. WILSON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California [Mr. WILSON] proposes an amendment numbered 2669.

Mr. WILSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, between lines 18 and 19, insert the following:

SEC. 206. SMALL INTERCONTINENTAL BALLISTIC MISSILE PROGRAM.

Mr. WILSON. Mr. President, I send a perfecting amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair will advise the Senator that he has the right to modify his amendment but he cannot offer a perfecting amendment.

Mr. WILSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WILSON. Mr. President, having temporarily laid aside the pending Wilson amendment, having sent a subsequent amendment to the desk, we may not offer a perfecting amendment?

The PRESIDING OFFICER. The Senator cannot send an amendment to his own amendment, but he does have the right to modify his own amendment.

Mr. WILSON. Then, Mr. President, I send a modification to the desk.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

On page 19, between lines 18 and 19, insert the following:

SEC. 206. SMALL INTERCONTINENTAL BALLISTIC MISSILE PROGRAM.

None of the funds appropriated pursuant to an authorization contained in this Act may be obligated or expended in connection with the full-scale engineering development of the small mobile intercontinental ballistic missile or the hard mobile launcher for such missile or for the deployment of more than 50 MX missiles until the Secretary of Defense has certified to the Committees on Armed Services of the Senate and the House of Representatives that the small mobile intercontinental ballistic missile system, including the associated basing mode, and the second deployed 50 MX missiles is cost effective on the margin and is survivable against a responsive threat.

□ 2110

Mr. WILSON. Mr. President, this amendment may not be self-explanatory. I like to think it would be after we have in the past few days devoted a great deal of time to the subject of cost-effectiveness at the margin and survivability to responsive threat, but let me try to explain as quickly and simply as I can.

This amendment envisions a full-scale engineering development of either the small intercontinental ballistic missile known as Midgetman or the hard mobile launcher or the deployment of the remaining 50 MX mis-

siles until such time as the Secretary of Defense certifies to the House and Senate Armed Services Committees that these weapons systems meet the test of being cost-effective at the margin and the test of survivability to responsive threat.

Mr. President, what is meant by cost effective at the margin? The phrase has been used a great deal in recent days, particularly in the context of the debate on the proper level of funding for the strategic defense initiative. What it means is explained in the CONGRESSIONAL RECORD. The junior Senator from Tennessee employed the phrase, attributing it correctly to Ambassador Nitze, distinguished American arms control negotiator and diplomat. His definition is found at page 18955 of the CONGRESSIONAL RECORD of August 4. It says:

> Ambassador Paul Nitze, perhaps the most distinguished strategic thinker in this administration, has said we should not go forward with SDI unless it proves to be cost-effective at the margin. I take that to mean unless it is cheaper to deploy an increment of defense than it is to deploy an increment of offense necessary to overwhelm that increment of defense.

That is a useful definition. To put it in simpler terms, we might say this phrase of being cost-effective at the margin asks the question, What does an enemy need to do to defeat a particular weapons system and how much does that effort cost him? Does it cost him more or less than it costs us to deploy the weapon that he is attacking?

It is a perfectly good question, Mr. President. it is not the only question, but it is a useful question, because it has to do with survivability. It has to do with whether or not we can afford to produce enough of a particular kind of weapon or defense that it can in fact be survivable and achieve its purpose.

In the case of the small missile, the small mobile missile, the so-called Midgetman, we have one of the most costly weapons systems in history. It is currently estimated to cost over $50 billion for some 500 warheads. Its chief advertised benefit is its survivability because of its mobility. I think that there is some value in that theory, although I think we should be aware of the differences between the Soviet Union and the United States with respect to basing because of the difference in the land mass. The Soviet Union spans 11 time zones. It is easy to hide mobile missiles in the Soviet Union. We are acknowledged to have only 28,000 acres in which we can deploy a mobile missile. Nevertheless, there is some utility to the concept of mobility.

The point, really, that Ambassador Nitze was making and that others have made is that we should not spend $50 billion or any other large sum of money on either a small missile or any other weapon that can be easily and cheaply defeated by countermeasures.

This is especially critical for international ballistic missiles since their offensive value depends upon their survivability. In fact, it depends not only on how vulnerable they are to attack from incoming offensive missiles; it also has to do with their ability to penetrate Soviet defenses if in fact any of them survive that incoming attack, that Soviet first strike.

The suggestion is made—at least it is implicit—that if they are not sufficiently cost-effective at the margin, then perhaps they should not be built because they cannot meet the test of surviving and achieving their purpose. We have heard from any number of eminent Senators on this floor and very recently the necessity to apply this criterion. Indeed, the junior Senator from Tennessee [Mr. GORE] took about 6 pages in the CONGRESSIONAL RECORD in a colloquy with the distinguished chairman of the Strategic Subcommittee, the distinguished Senator from Virginia [Mr. WARNER].

He asked him a number of questions in order to make the point as to the wisdom and virtual necessity of applying the standard of being cost-effective at the margin and survivable to responsive threat in these questions to Senator WARNER.

Senator WARNER, for his part, did not object to application of that standard. To the contrary, he acknowledged that he thought that being cost-effective at the margin was a perfectly proper consideration.

He did remind the Senator from Tennessee that it was a bit premature to try to apply it with any specificity because we were dealing with a research program. Indeed, that has been the criticism of both opponents and proponents of the SDI Program. It is a little difficult at this stage, when we do not know precisely what kind of defensive system we are talking about, what the particular technology may be, to simply do more than broadly say, yes, that is an applicable standard.

Again, the distinguished ranking member of the Senate Armed Services Committee [Mr. NUNN] made the suggestion to Senator QUAYLE, when the Senator offered his amendment seeking to advance the cause of near-term technologies, within the strategic defense initiative that any report from the Secretary having to do with near-term advances rather than the longer term or comprehensive defensive solution should include an application of the criterion of whether or not near-term development and deployment of tangible—not remote—defensive technologies were in fact cost-effective at the margin.

Once again, Senator QUAYLE did not resist that suggestion from Senator NUNN. He readily accepted it. I think in both cases, Senators WARNER and QUAYLE were wise to accept what is in fact an acceptable set of criteria.

The point, very simple, is that what we are proposing here is to apply to the small missile and to the MX missile, the two U.S. intercontinental ballistic missiles, the test that Ambassador Nitze has proposed and that Senator GORE, Senator NUNN, and others have warmly endorsed.

Indeed, I do not know who it is who opposes that particular set of criteria. It was said by the junior Senator from Tennessee that the effort to apply these criteria to the small missile, the mobile missile, as well as to SDI was an intention to bring up a killer amendment. I am sorry that there is that misapprehension. I am sure that the Senator from Tennessee did not intend to kill SDI when he insisted to Senator WARNER that cost effective at the margin be a standard applied to SDI. Indeed, I know the Senator from Tennessee did not intend that because he told us so. He said he thought there should be generous support of this research program—perhaps not as generous as the rest of us would like to see, but it is clear that he had no intention of killing it.

□ 2120

Mr. GORE. Will the Senator yield?

Mr. WILSON. I will be pleased to yield in just a moment. In fact, I look forward to responding to the question.

Mr. GORE. Since the Senator used my name in that particular regard, when he has a chance I would like to respond.

Mr. WILSON. I look forward to the question and to the opportunity to respond.

Indeed, the point really is that when Senator NUNN proposed to Senator QUAYLE that he could perfect his amendment by also including a requirement that the Secretary come back, having applied to even this near-term deployment of SDI the same standard proposed by Ambassador Nitze of being cost-effective at the margin, it was not Senator NUNN's intention to kill the proposition that Senator QUAYLE was advancing. Very much to the contrary. I believe that Senator NUNN is enthusiastic about finding out whether or not we can bring about near-term development and deployment and whether or not it is cost-effective at the margin. It is not intended as a killer amendment. It is intended to get the kind of facts that are necessary.

Now, having said that, let me just add that cost effectiveness at the margin may be a bit like beauty. It may exist to a degree in the eye of the beholder. It has utility as a broad concept. If you then say, "Could you define more precisely what that means in respect to a particular weapon

system?" It is clear that the precise test is going to vary with the circumstances attendant to different weapons systems. That is logic and it is true.

For example, with respect to SDI the question has been put, "Can offensive missiles overwhelm it?" The question with respect to the small missile has been asked, and indeed the junior Senator from Tennessee had in his colloquy with Senator WARNER the other day proposed to answer that, "Can it be overwhelmed with offensive missiles?" I would ask the additional question, "Can it survive? Can it then survive and penetrate Soviet ABM defenses?" And, finally, with respect to the MX missile, if not couched in precisely these terms we have had abundant discussion on this floor, and properly so, as to whether or not, based as it is in silos or some different basing that may be offered in the future, the MX is survivable and whether or not it is cost-effective at the margin, whether it will cost the enemy less to defeat it than it will us to preserve its offensive capability.

Mr. President, we are not seeking to kill but rather to answer questions, proper questions, by no means the only questions. With respect to the small missile we may one day add to the equation, what happens if we defensively deploy in order to protect that small missile which can deploy in only 28,000 square miles, not across 11 time zones. And when we do, the circumstances will greatly change, the equation will be dramatically changed. So the question should be asked; it should be answered; it is by no means the only question. But I would have to say, Mr. President, to those who would oppose this amendment and who would oppose the application of these two standards to any weapons system, that any weapons system, be it SDI, be it the small missile, be it MX, that cannot meet the test of being cost-effective at the margin or that cannot be adjudged survivable, perhaps, perhaps, should not be built. But then again there are other factors to be taken into consideration. But if we are afraid to ask this question about any weapons system when we have been so freely and willingly applying it to others, there is more than an inconsistency. There is I think reason to doubt and certainly to ask why not.

Now, the opponents of this will attempt to answer those questions. I do not think we need a great deal of debate on this. It is a rather simple proposition. Those who have proposed the application of cost effective at the margin and survivability against responsive threat have properly done so. They should not be unwilling to apply those same criteria to any weapons system, certainly not to any intercontinental ballistic missile, certainly not to the MX, certainly not to the small missile.

Mr. GORE. Will the Senator yield?

Mr. WILSON. Mr. President, before I yield to the Senator for a question, I would like to ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. GORE. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. Will the Senator withhold? Is there a sufficient second?

Mr. WILSON. What was the inquiry?

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator will state the inquiry.

Mr. GORE. Is an amendment in the second degree to the Wilson amendment now in order?

The PRESIDING OFFICER. It is.

Mr. GORE. And such an amendment could be proposed by any Senator; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. GORE. Mr. President, I have an amendment which I will send to the desk.

Mr. WILSON. Mr. President, parliamentary inquiry.

Mr. GORE addressed the Chair.

Mr. WILSON. I believe I still have the floor.

The PRESIDING OFFICER. The Senator from California has the floor. The Chair recognized the Senator from Tennessee only for the purposes of a parliamentary inquiry. The Senator from California.

Mr. WILSON. Mr. President, I have a parliamenatary inquiry as well. I suggest perhaps, if it is agreeable, I would ask unanimous consent that we institute a quorum call for the purpose of resolving this parliamentary inquiry with the Senator from Tennessee.

Mr. NUNN. Mr. President, will the Senator yield for a brief question in the form of perhaps an observation? We have a vote at 9:30 by unanimous consent. It is my understanding the Senator from Maine is opposed to the amendment of the Senator from California. I oppose the amendment. It is my understanding the Senator from Maine will be moving to table that amendment after this other vote. The Senator from Tennessee would always have the privilege of offering that amendment or two or three other amendments, but I think if it is offered now we are going to get in a real tangle and it could be offered after a motion to table failed.

Mr. GORE. Will the Senator yield? Mr. President, I will be delighted to withhold on that basis. I would certainly have no intention at all of dragging this thing out and I would like to withhold at this time.

Mr. WILSON. Mr. President, parliamentary inquiry. There is, as I understand it, a vote scheduled at 9:30?

The PRESIDING OFFICER. That is correct.

Mr. WILSON. And in order to accommodate that, we will be required to lay this aside?

The PRESIDING OFFICER. The Senator is correct.

Mr. WILSON. In that case I will be happy to yield to the Senator from Tennessee for a question for what time remains before the hour of 9:30 arrives.

Mr. GORE. Mr. President, I suggest we just go ahead and vote on the tabling motion. I am prepared to go ahead without further delay.

Mr. NUNN. Mr. President, did the Senator from Maine want to debate this?

Mr. COHEN. Well, I thought I would have more than a minute and a half but I would be happy to take the next minute and a half.

Mr. NUNN. Mr. President, I would propose without the majority leader being here—and if anyone objects I will not propose it—that we have approximately 10 minutes to debate this and at that stage we could then get two back-to-back rollcall votes if that is satisfactory to the Senator from California.

Mr. WILSON. Most agreeable.

Mr. GLENN. Mr. President, I reserve the right to object. This is a very important matter he is bringing up. I do not want to delay this. I know we want to get through with this tonight, but I also do not want to see a vote occur without some points being made. If this would happen to pass, then that would be it. I think it would be tragic if we passed this.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I say to the Senator from Ohio there is going to be a motion to table this amendment. If that motion fails, the amendment is debatable.

□ 2130

So there will not be foreclosure of opportunity to debate. It seems to me that we can greatly expedite it and see where the votes are.

Mr. GLENN. Then, if it is not tabled, we will continue with the debate. Is that correct?

Mr. GORE. Mr. President, may I take up the suggestion of the Senator from Ohio? It seems to me that the most logical way to proceed at this point—I ask unanimous consent that the vote be delayed for 1 minute and that I be recognized for 1 minute.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

Mr. GORE. Mr. President, I suggest that the most orderly way to proceed at this point is to go ahead and have the vote that is scheduled at this time. Then the Senators who are away from the Chamber at this point will be back for the vote.

I am prepared to limit debate on either side on a tabling motion, if it is made, reserving my right to offer amendments to the amendment, after disposal of the tabling motion, in the event it is not successful.

Mr. NUNN. Mr. President, I think that is a reasonable suggestion, so we could go ahead at this time with a rollcall vote. I do not think we need unanimous consent now. I believe both sides would be willing to debate for about 5 minutes and then go to the tabling motion on this amendment and debate it after that, if it is not tabled.

The PRESIDING OFFICER. The Chair, as a Senator from New Hampshire, suggests the absence of a quorum.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MOTION TO TABLE AMENDMENT NO. 2663

The question is on agreeing to the Nunn motion to table the McClure amendment. On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Vermont [Mr. STAFFORD], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from New Jersey [Mr. BRADLEY] are necessarily absent.

The PRESIDING OFFICER (Mr. EVANS). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 69, nays 25, as follows:

[Rollcall Vote No. 197 Leg.]

YEAS—69

| | | |
|---|---|---|
| Armstrong | Glenn | Lautenberg |
| Biden | Goldwater | Leahy |
| Boren | Gore | Levin |
| Boschwitz | Gorton | Long |
| Broyhill | Gramm | Lugar |
| Chafee | Grassley | Matsunaga |
| Chiles | Harkin | Mattingly |
| Cochran | Hatfield | McConnell |
| Cohen | Hawkins | Metzenbaum |
| Cranston | Heflin | Mitchell |
| D'Amato | Heinz | Moynihan |
| Danforth | Hollings | Nickles |
| Denton | Humphrey | Nunn |
| Dixon | Inouye | Packwood |
| Dodd | Johnston | Pell |
| Dole | Kassebaum | Proxmire |
| Durenberger | Kasten | Pryor |
| Evans | Kennedy | Riegle |
| Ford | Kerry | Rockefeller |
| Roth | Simon | Trible |
| Rudman | Specter | Wallop |
| Sarbanes | Stennis | Wilson |
| Sasser | Thurmond | Zorinsky |

NAYS—25

| | | |
|---|---|---|
| Abdnor | Domenici | Melcher |
| Andrews | Exon | Murkowski |
| Baucus | Garn | Quayle |
| Bentsen | Hart | Simpson |
| Bingaman | Hatch | Stevens |
| Bumpers | Hecht | Symms |
| Burdick | Helms | Warner |
| Byrd | Laxalt | |
| DeConcini | McClure | |

NOT VOTING—6

| | | |
|---|---|---|
| Bradley | Mathias | Stafford |
| Eagleton | Pressler | Weicker |

So the motion to table amendment No. 2669 was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. NUNN. I move to lay that motion on the table.

Mr. GOLDWATER. Mr. President, could we have a little order, please?

The PRESIDING OFFICER. The Senate will be in order. Will all those conversing in the aisle and in the well please take their seats?

Mr. GOLDWATER. Mr. President, as we see it now, there will be one more rollcall vote tonight on the Wilson amendment. We have decided that it might be the better part of judgment to call it off at that time and go home and come back at 9 o'clock tomorrow morning and finish the bill. We have about 5 rollcalls looking us in the face and that adds up to about 2½ hours.

So I offer that as a suggestion to the majority leader.

Mr. DOLE. Mr. President, if the Senator will yield, I appreciate the suggestion. I think what we might do is have this vote on the Wilson amendment and see what happens there—I do not have any knowledge about what may happen—and then make that judgment.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. If the Senators will withhold, the Chair would remind the majority leader that there is a cloture motion vote scheduled for 10 p.m.

Mr. GORE. Would the majority leader yield?

Mr. DOLE. Yes.

Mr. GORE. If I may make a suggestion, I think we could limit debate on a tabling motion which is going to be made to maybe 6 minutes on a side, something of that kind, and have the tabling motion and that would be the end of that particular debate, and then go to whatever the majority leader wishes. But it might clear up the way for actually finishing this bill tonight, which I am sure many Senators would like to see.

The PRESIDING OFFICER. The Chair continues to remind the majority leader and others that there is a cloture motion set for 10 p.m.

ORDER TO POSTPONE CLOTURE VOTE UNTIL 11 P.M.

Mr. DOLE. Mr. President, I ask unanimous consent that the cloture vote scheduled for 10 o'clock be postponed until 11 o'clock.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. Reserving the right to object, if the majority leader will yield, why can we not just take it down? I understand the unanimous consent has been worked out. Why can we not just take it and get it over with? Is it because the majority leader believes we can actually finish this bill?

Mr. DOLE. It is sort of a combination. Plus there is one little area that I think Senator BOREN and Senator BOSCHWITZ have been working on—as far as I know, it has not been fully resolved—on the so-called Boren amendment. So we are working on that. And I agree with the Senator from Iowa that we need to get that done.

The PRESIDING OFFICER. Is there objection?

Mr. STENNIS. Would the Senator yield? We are just getting started now for the day. Why can we not keep going? [Applause.]

The PRESIDING OFFICER. There is a pending unanimous-consent request.

Mr. ANDREWS. Reserving the right to object. We have been waiting for about 2 days to offer an amendment that had a rollcall vote and passed in this body 1 year ago by a vote of better than 2 to 1. We have agreed to a 20-minute time limit.

It is the desire of the leader and the managers of the legislation that we postpone it until tomorrow? If so, we are totally willing, but we would like to know. Otherwise, we would be ready to take it up on a very strict time limitation. I would hope other proponents of amendment would do the same.

Mr. DOLE. Mr. President, I think that is why we would like to take one more snapshot after this next vote and see where we are.

The PRESIDING OFFICER. I remind the Senate that the unanimous-consent request is to postpone the pending cloture vote, which is scheduled for 10 p.m., until 11 p.m.

Mr. ANDREWS. That is the reason for my reserving the right to object, because we can take up our amendment. I understand Senator GRAMM is on the other side, and Senator BENTSEN; Senator ABDNOR and I are on the positive side. We can get it done in that window of opportunity and short-

en the time we have to remain when you look at that snapshot.

But, if that is the feeling of the manager of the bill, then we can certainly take it up tomorrow. It makes no difference whatsoever.

The PRESIDING OFFICER. Is there objection? Hearing no objection, it is so ordered.

AMENDMENT NO. 2669

Mr. WILSON. Mr. President, I believe the pending business is the Wilson amendment.

The PRESIDING OFFICER. The Senator is correct. The pending amendment is the Wilson amendment No. 2669, as modified.

AMENDMENT NO. 2670

Mr. WILSON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from California [Mr. WILSON] proposes an amendment numbered 2670 to amendment numbered 2669.

Mr. WILSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

Strike out all after the word "MISSILE" on line 3 and insert in lieu thereof the following:

"PROGRAM

"None of the funds appropriated pursuant to an authorization contained in this Act may be obligated or expended in connection with the full-scale engineering development of the small mobile intercontinental ballistic missile or the hard mobile launcher for such missile or for the deployment of the second 50 MX missiles until the Secretary of Defense has certified in writing to the Committees on Armed Services of the Senate and the House of Representatives that the small mobile intercontinental ballistic missile system, including the associated basing mode, and that the deployment of the second 50 MX missiles are effective on the margin and is survivable against a responsive threat. If such certification is not submitted by March 1, 1987, the Secretary shall submit a report to such Committees explaining why.

The PRESIDING OFFICER. The Senate will be in order. The Senator deserves to be heard.

Mr. WILSON. Mr. President, I request the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WILSON. Mr. President, it was suggested a moment ago by the Senator from Tennessee that in the prospect of a tabling motion there be a unanimous consent propounded to limit debate upon that tabling motion. I am quite agreeable to that. Six minutes per side, I believe he said. I had some requests for others to be heard in support of this amendment. Perhaps 10 minutes, but I really do not care. I am agreeable.

At this point, I ask unanimous consent that we split the difference and we afford 8 minutes per side on the tabling motion, if a tabling motion is to be made, as I am led to believe.

□ 2200

Mr. EXON. Mr. President, reserving the right to object.

Mr. COHEN. Reserving the right to object.

The PRESIDING OFFICER. Objection is heard.

Mr. GORE. Mr. President, I believe that the Senator from Maine reserved the right to object, if I may say. If the Senator from California wishes to let me propound the same unanimous-consent request, a technical tabling motion, I will be glad to yield for a question.

The PRESIDING OFFICER (Mr. RUDMAN). The Chair would ask the Senator from Nebraska to restate what he said.

Mr. EXON. The Senator from Nebraska said "I reserve the right to object."

The PRESIDING OFFICER. I thank the Senator from Nebraska.

Mr. EXON. Then I heard the Chair say "Objection is heard." I assumed it was some other Senator who objected. Was the Chair assuming that the Senator from Nebraska objected?

The PRESIDING OFFICER. The Chair was mistaken. The Senator from Nebraska reserves the right to object.

Mr. EXON. Mr. President, it seems to me that during these times when we are all anxious to get moving ahead we are talking and talking about debating in an extremely limited amount of time an overriding issue of whether or not we are going to cancel the Midgetman missile.

The PRESIDING OFFICER. If the Senator will suspend, the Senator cannot be heard. The Chair would instruct the staff in particular if they want to carry on conversations to leave the Chamber.

Mr. EXON. Mr. President, it seems to me——

Mr. KENNEDY. The Senate is not in order.

The PRESIDING OFFICER. The Senate is not in order. The Senator from Massachusetts is correct.

The Senator from Nebraska.

Mr. EXON. Mr. President, it seems to me that on a matter such as the MX missile to have a debate of 15 minutes equally divided which is about what we have had thus far when this Senator was not on the floor, and I suspect many other Senators were not, I would suggest to this body that that is not the most deliberative action in the world.

Mr. GORE. Mr. President, will the Senator yield on his reservation?

Mr. EXON. Mr. President, I yield without losing my right to the floor.

Mr. GORE. Mr. President, I appreciate the Senator yielding. I would just recapitulate the situation.

If the tabling motion is not agreed to, the pending amendment would still be open to unlimited debate, and unlimited amendment. So the Senator's rights to be heard on the question before the Senate will be preserved. Many Senators, however, are anxious to get to a vote on the tabling motion.

And after the matter is disposed of on that vote, then the Senator presumably would not be concerned. If it is not, the Senator would be able to debate this matter at his pleasure.

Mr. EXON. I thank my friend from Tennessee. That is exactly the position that the Senator from Nebraska maintains.

It seems to me if we want to move this matter expeditiously forward on the very limited debate that we have had on whether we should cancel out the Midgetman, which I strongly oppose, I think it is not wise to grant now additional time to debate the amendment by the Senator from California on canceling out the Minuteman.

I would suggest that we go ahead with the vote that was scheduled to start 10 minutes ago, and vote that up-or-down and then there will be those of us who object to the amendment offered by the Senator from California. We would have our day in court then. I hope that will not be necessary. Therefore, I object to any further time being allowed to debate the motion in front of us.

The PRESIDING OFFICER. Objection is heard.

Mr. NUNN. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. What is the pending business, and what is the vote scheduled?

The PRESIDING OFFICER. The pending business is the second-degree amendment offered by Senator WILSON. No motion to table has been made.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN I move to table the amendment.

Mr. NUNN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Maine to lay on the table the amendment of the Senator from California. On this question,

the yeas and nays have been ordered, and the clerk will call the roll.

Mr. HEINZ. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Pennsylvania makes a parliamentary inquiry.

Mr. HEINZ. Is the motion to table is to table the first- or the second-degree Wilson amendment?

The PRESIDING OFFICER. The motion to table is to table the Wilson second-degree amendment.

The clerk will proceed.

Mr. GORE. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. GORE. Is it not the case that the second-degree amendment is the substance of the amendment of the first-degree amendment essentially so that the question before the Senate is whether or not we table the substance of the amendment offered by the Senator from California?

The PRESIDING OFFICER. The Chair cannot make that judgment. The amendments are at the desk for all Senators to inspect.

Mr. NUNN. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, it was the intent, I believe, that the motion was to table the underlying amendment. If it is not the underlying amendment, we may have to have two rollcall votes, which seems to me an exercise in futility.

I ask unanimous consent the rollcall vote be on the underlying Wilson amendment, which will tell us where we are.

The PRESIDING OFFICER. Is there objection?

Mr. WILSON. Reserving the right to object.

The PRESIDING OFFICER. The Senator from California reserves the right to object.

Mr. WILSON. Let me inquire of the Senator from Georgia.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. HART. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. HART. Mr. President, had a rollcall not begun?

The PRESIDING OFFICER. There was a quorum call in progress. Does the Senator wish to call that off to make his inquiry?

Mr. HART. Mr. President, I ask unanimous consent that the request for the quorum call be dispensed with.

Mr. WILSON. Objection.

Mr. KENNEDY. Regular order, Mr. President. A quorum call is not in order. Regular order. A rollcall was in progress.

The PRESIDING OFFICER. I would advise the Senator from Massachusetts who calls for regular order that the rollcall had not yet started, and at that time a call for a quorum was requested. Therefore, the quorum is in effect.

Mr. GORE. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. There is a quorum in progress.

Mr. GORE. I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Is there objection.

Mr. WILSON. Objection.

Mr. QUAYLE. Objection.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be suspended so that parliamentary inquiry may be addressed.

Mr. QUAYLE. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILSON and Mr. NUNN addressed the Chair.

Mr. NUNN. Mr. President, I yield to the Senator from California for a question.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Mr. President, a moment ago the junior Senator from Tennessee made a proposal which I thought was quite reasonable, and to which I acquiesce. The proposal advanced by the junior Senator from Tennessee was that, to benefit those like the Senator from Nebraska who were off the floor during the time of the debate on this matter, that there be a brief debate on the tabling motion. I indicated that I was more than willing to do that, and suggested that we might have 8 minutes per side. If it is the desire of the body to vote without the debate, we can do that. I will say that I am sorry that those who wish to hear it will not get that opportunity.

I thank my friend from Tennessee and my friend from Georgia for trying.

The PRESIDING OFFICER. The Senator from Georgia has the floor.

Mr. NUNN. Mr. President, it seems to me at this point in time that it would be in order for the Senator from Maine if he would secure the floor to renew the motion to table the underlying amendment.

We will have a vote, and if the motion to table is not agreed to, it is open to further amendment.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. I move to table the underlying Wilson amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GORE addressed the Chair.

The PRESIDING OFFICER. For what purpose does the Senator from Tennessee seek recognition?

Mr. GORE. I ask unanimous consent that there be 1 minute on each side prior to the vote on the tabling motion.

The PRESIDING OFFICER. Is there objection?

Mr. GOLDWATER. I object.

Mr. GARN. I object.

The PRESIDING OFFICER. Objection is heard.

The question is on agreeing to the motion of the Senator from Maine to lay on the table the amendment of the Senator from California. On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON announced that the Senator from Maryland [Mr. MATHIAS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Vermont [Mr. STAFFORD], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

Mr. CRANSTON announced that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 64, nays 30, as follows:

[Rollcall Vote No. 198 Leg.]

YEAS—64

| | | |
|---|---|---|
| Andrews | Ford | Long |
| Baucus | Garn | Matsunaga |
| Bentsen | Glenn | Melcher |
| Biden | Gore | Metzenbaum |
| Bingaman | Gorton | Mitchell |
| Boren | Grassley | Moynihan |
| Boschwitz | Harkin | Nunn |
| Broyhill | Hart | Packwood |
| Bumpers | Hatfield | Pell |
| Burdick | Heflin | Proxmire |
| Byrd | Heinz | Pryor |
| Chafee | Hollings | Riegle |
| Chiles | Humphrey | Rockefeller |
| Cochran | Inouye | Sarbanes |
| Cohen | Johnston | Sasser |
| Cranston | Kassebaum | Simon |
| Danforth | Kennedy | Specter |
| Dixon | Kerry | Stennis |
| Dodd | Lautenberg | Stevens |
| Durenberger | Laxalt | Zorinsky |
| Evans | Leahy | |
| Exon | Levin | |

NAYS—30

| | | |
|---|---|---|
| Abdnor | Hawkins | Quayle |
| Armstrong | Hecht | Roth |
| D'Amato | Helms | Rudman |
| DeConcini | Kasten | Simpson |
| Denton | Lugar | Symms |
| Dole | Mattingly | Thurmond |
| Domenici | McClure | Trible |
| Goldwater | McConnell | Wallop |
| Gramm | Murkowski | Warner |
| Hatch | Nickles | Wilson |

NOT VOTING—6

| | | |
|---|---|---|
| Bradley | Mathias | Stafford |
| Eagleton | Pressler | Weicker |

So the motion to lay on the table amendment No. 2669 was agreed to.

□ 2220

Mr. COHEN. I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. GORE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, if I may have the attention of my colleagues for just about 5 minutes, we can make a determination what we should do. I have been asked by the managers, and the distinguished minority leader is on the floor so we can work together on this, to see if we can lock in the amendments so that no further amendments will be in order.

That would be a big step in the right direction. Then, if we could find out how many of the remaining amendments that are on the list are going to require rollcalls, I think we can very quickly make a judgment whether we can try to complete action tonight, which I think is very doubtful, or whether to come back in tomorrow morning.

The first amendment listed, going down in that order, is the B-1 ACM amendment by the distinguished minority leader, which I understand will be accepted.

There will be a rollcall vote on that amendment.

Then the pornography amendment by Senator HELMS. Will that require a rollcall?

Mr. HELMS. Yes.

Mr. DOLE. That will be a rollcall vote.

The ABM Treaty, Senator LEVIN; I think that is some language. As I understand it, that will be accepted.

□ 2230

Will there be a rollcall vote required?

Mr. LEVIN. I believe that has been worked out.

Mr. DOLE. That has been resolved.

Mr. WARNER. I think it has been worked out.

Mr. DOLE. Then there is an SDI amendment by the distinguished Senator from Arkansas (Mr. BUMPERS).

Mr. WARNER. Mr. President, in the form I saw that amendment I would recommend our side accept it.

Mr. NUNN. I believe that will be accepted.

Mr. DOLE. And then there is Booneville Armory, Senator BUMPERS. I think he indicated earlier he would take 20 minutes, 10 minutes on a side. So let us assume there will be a rollcall on that one just for bookkeeping purposes. The Little Rock fuel dock, as I understand, he would talk about that for 5 minutes and then pull it away. The fuel for freedom or fuel of freedom amendment by Senator ANDREWS is what, 10 minutes on a side?

Mr. ANDREWS. That is not fuel for freedom. That is a matter of purchasing storage from local States. It was adopted by a 2-to-1 rollcall vote before.

Mr. DOLE. No editorials.

Mr. ANDREWS. No. We will be glad to take it without a vote if you accept it or we will put it to a vote. We can do it in 20 minutes of time.

Mr. NUNN. I say to the majority leader that will require a rollcall vote.

The PRESIDING OFFICER. The Chair advises the majority leader that on the amendment he just captioned there is a time agreement 20 minutes to a side with no amendments in order.

Mr. DOLE. Right.

NYR contracts, Senator CHILES.

Mr. CHILES. I think that is acceptable now and I anticipate just a couple minutes.

Mr. DOLE. I have two SDI amendments, Senator GLENN. Both of those will be offered?

Mr. GLENN. They will be offered, and I want votes on both of them also, rollcall votes.

Mr. DOLE. How much time on each?

Mr. GLENN. We agreed to 40 minutes evenly divided. I do not think it will take quite that much time, but I want to reserve that time because they are controversial.

Mr. DOLE. Foreign language proficiency pay, Senator SIMON. Will that require a rollcall?

Mr. SIMON. That will require a rollcall.

Mr. DOLE. Outlay slip. That means there was a mistake. No vote. That may take a rollcall?

Child nutrition.

Mrs. HAWKINS. I do not need a rollcall vote if we can work it out. We have the votes. We have the cosponsors, but we will have a rollcall vote if that is required.

Mr. DOLE. Let us just say that may not require a rollcall.

And then the RAM amendment, Senator WILSON. That will not require a rollcall. So there are many rollcalls?

Mr. EXON. We may have a rollcall vote on the RAM amendment unless we can work something out which has not been agreed to as yet.

Mr. DOLE. That will be nine rollcall votes. That is quite a bit of time. Then you have to get to the rollcall votes. I do not think we can hold out any hope we are going to finish this this evening.

Mr. NUNN. I think the Senator is correct. What I think would really help us is two things, both of them very important. If we could ask for unanimous consent no more amendments be in order, except these amendments now with the exception of the Helms amendment which, from our side, would have to be open to second-degree amendments. Then if we could also ask there be a time certain for final passage of the DOD bill. If we got those two things locked up, then people would know when they were going to be able to go home.

Mr. DOLE. Mr. President, are there any other amendments to be added on either side?

Mr. BYRD. Mr. President, I may have one amendment in addition to the one I have listed. It would be a national security trade amendment. It would take some time, and I have a feeling that it would require a rollcall vote. I am not sure I will call it up, but I would want it listed.

Mr. DOLE. I thank the distinguished minority leader. The Senator from New Mexico.

Mr. DOMENICI. When the amendments are all finished, I would have a technical amendment. To the extent that there are any entitlements or contract, direct contracts, we would want to make sure it is not subject to a point of order by making it subject to appropriations.

Mr. DOLE. That would not require a rollcall.

Mr. DOMENICI. No.

Mr. NUNN. That would be accepted. We already agreed.

Mr. DOLE. The Senator from Montana, Mr. MELCHER?

Mr. MELCHER. I thank the majority leader for yielding. Somewhere in the middle of that list there are two amendments I have and I did not hear them read. I believe they will require rollcall votes.

Mr. NUNN. I am informed those will both take rollcall votes.

Mr. DOLE. Is the Senator from Georgia aware of those amendments?

Mr. NUNN. I am informed they will both take—I am not cognizant of them personally, but I understand both of them will require rollcalls.

Mr. DOLE. Could the Senator from Montana identify the amendments?

Mr. MELCHER. I think they are identified, are they not, I ask the Democratic manager of the bill? Are they identified on the list?

Mr. DOLE. Reduction in R&D and reduction in unobligated balance.

Mr. MELCHER. Right. That is right.

Mr. DOLE. Anyone else?

Mr. MOYNIHAN. Mr. President, I will have an amendment on national security and trade which will require a rollcall.

Mr. DOLE. National security and trade? It will require a rollcall.

Mr. MOYNIHAN. It will.

Mr. KASTEN. Will the majority leader yield? I may have an amendment which just recently came up having to do with minesweepers.

I do not believe it will require a record vote, but I want to be part of the list.

Mr. DOLE. Are there any other amendments?

Mr. NUNN. Mr. President, I have an amendment that will not require a rollcall. I think it will be one that everyone will accept.

Mr. DOLE. And there will be, as I understand, a committee technical amendment.

Mr. NUNN. The amendment I have would be an education amendment relating to science and math, and I would not anticipate any opposition. If there is, then I would withdraw the amendment. But it needs to be listed.

Mr. DOLE. The Senator from Kentucky.

Mr. FORD. We are working on a technical amendment on MilCon. I do not think there will be any problem with it. I would just like to get my order in.

Mr. GLENN. On a colloquy or anything like that, does the majority leader want a list of those? We have about a 5- or 7-minute colloquy that we have planned. We could probably enter that into the record if someone insisted upon it.

Mr. DOLE. I do not believe we have to list that.

Mr. GLENN. I tend to agree with that.

Mr. DOLE. Mr. President, I ask unanimous consent that only those amendments that have been identified be in order and that the amendment by the distinguished Senator from North Carolina be subject to a second-degree amendment.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. There would be objection to that one not being amendable from our side. I do not know what the second-degree amendment will be, but I would say that we probably should specify. It would be a Metzenbaum second-degree amendment.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, I do not think we can get an agreement on that amendment and leave open the second-degree amendment. I understand there may be more than one second-degree amendment to that amendment depending upon how things go and what the outcome might be. So that one I do not think we can agree to.

Mr. NUNN. Perhaps we could make an exception of that amendment and just leave it and see if we can work something out.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

□ 2240

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate will be in order.

The majority leader is recognized.

Mr. DOLE. Mr. President, we have been discussing the pornography amendment with the distinguished Senator from North Carolina. I understand that the amendment is identical to a bill that has been pending in the Judiciary Committee for some time. It is my further understanding that if he could get that bill voted on in the Judiciary Committee, he might be willing to withdraw that amendment and not offer it on the DOD authorization bill.

Mr. HELMS. There would be no question about it, in the event Mr. METZENBAUM will agree that he will not try to block a vote.

Mr. THURMOND. It is about fifth on the agenda, and we should be able to get to it in September.

I just talked to Senator METZENBAUM and Senator DECONCINI, and as far as we see now, we can give the Senator a vote on it in September, as soon as we get it up.

Mr. METZENBAUM. Mr. President, I want to be certain what the understanding is.

The Senator from South Carolina has indicated that he is going to seek a vote in the Judiciary Committee with respect to this matter. The Senator from South Carolina has been concerned as to having an opportunity to have it brought to a vote in the Judiciary Committee. The Senator from North Carolina has made some indication about being provided assurance that it would be voted out. I do not think he meant that.

Mr. HELMS. I do not have any great concern about the vote, if the Senator from Ohio will agree that there be a vote on it.

Mr. METZENBAUM. Provided the matter proceeds in its normal course of proceedings in the Judiciary Committee, I have no desire to filibuster or anything of that kind, whatever the Senator is talking about in the committee. If the votes are there, at the appropriate time, if it is voted out, I see no problems with that. Sometime in September, as I understand it, it would probably occur, according to the chairman.

Mr. HELMS. I would like assurance from the majority leader that he would call it up.

Mr. METZENBAUM. I did not hear that.

Mr. DOLE. The question was whether I would try to get it to the floor, and the answer is that I would.

Mr. METZENBAUM. If we start making some conditions about calling it to the floor, that is not the understanding. The Senator from North Carolina is concerned about having a vote in the committee. I have no problem about that, in the normal course of events. But with respect to the matter of when the majority leader decides to bring it to the floor, that is a matter to be decided at a later point; and if there is to be something specific about that this evening, then I say it is off.

Mr. DECONCINI. Mr. President, will the Senator yield?

Mr. DOLE. I think what the Senator from North Carolina was requesting was that I would try to get it up on the floor, with no specific agreement so far as this Senator is concerned.

I yield to the Senator.

Mr. DECONCINI. Mr. President, I do not want to leave an inference that the Senator from Ohio might do this, but he has indicated that he would not filibuster the bill of the Senator from North Carolina that would be before the Judiciary Committee. There are several items on the agenda before that, and I think that the Senator from North Carolina ought to be aware that there may be something that some Senator on the Judiciary Committee might want to hold up for a number of weeks, and we have only a few weeks left when we come back.

Mr. HELMS. Mr. President, I did not hear what the Senator from Arizona said. I ask him to repeat it.

Mr. DECONCINI. The Senator from North Carolina might be fortunate that he could not hear what I said, according to the Senator from Illinois.

Some Senator—the Senator from Ohio or some other Senator—might use procedural efforts to hold up some other legislation from coming to a vote, which would prevent the legislation of the Senator from North Carolina coming to a vote, and I think the Senator should be aware of that.

Mr. HELMS. That is a risk I have to take. But that, of course, will not preclude me from offering "must" legislation.

In any case, I will not pass judgment on the amendment. I understand the parliamentary procedure. All I want the majority leader to do is to assure me that if, as, and when it is reported out of the Judiciary Committee, it goes to the calendar and he would at least move to call it up and get a rollcall vote on that.

Mr. DOLE. I would be willing to do that. I assume there would be a motion to proceed.

Mr. METZENBAUM. It would be a debatable motion.

Mr. DOLE. That is correct.

Mr. METZENBAUM. It would give us the opportunity to be here in November.

Mr. HELMS. Or a motion to table.

Mr. METZENBAUM. It would be an opportunity to speak.

Mr. HELMS. I will take a chance on that.

Mr. DOLE. That is the way most things work around here.

Is it all right to withdraw the amendment from the list, with those assurances?

Mr. HELMS. The alternative to that would be to have it stated and identify the nature of the second-degree amendment. I think it is a little unusual. I am willing to say that I am willing to withdraw it.

Mr. DOLE. I thank the distinguished Senator from North Carolina. That means there is one less amendment.

I again renew my request that the amendments identified be the only amendments in order to the DOD authorization bill.

□ 2250

Mr. GLENN. Mr. President, reserving the right to object, I would assume the majority leader is about to also make a request there be no secondary amendments.

I reserve the right to make an amendment in the second degree to Senator BYRD's B-1 amendment.

Mr. NUNN. Mr. President, I know the Senator from West Virginia would not permit any agreement to go through without identifying the second-degree amendment. He is not on the floor. I am sure he would want to identify the second-degree amendment. He is on the floor.

Mr. GLENN. I will be glad to get the amendment here in a couple minutes if the Senator wants to read it. It will be restrictive on the B-1 to prevent in any way, shape, or form one single dollar being spent to even continuing the line open in case we had problems with the Stealth bomber. We had it in the committee and debated there. I would like to offer it.

Basically, what it does is track what the House did on the other side which permits some money just to keep it open and this gets into classified areas I do not think we really can debate here this evening. That is basically what it will do.

Mr. NUNN. No objection.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER addressed the Chair.

Mr. DANFORTH. Mr. President, reserving the right to object, two Senators indicated that they might offer amendments relating to trade and national security. That is all I know about those proposed amendments.

I would like to reserve the right to offer a second-degree amendment to each of those two amendments which would be germane to the amendment.

Mr. DOLE. Germane. Any objection to that?

Mr. BYRD. Mr. President, I have no objection if the Senator wants to offer the amendment to the amendment I call up, if I call it up, as long as it is germane or relevant.

Mr. MELCHER. Mr. President, will the majority leader yield?

Mr. DOLE. Yes.

Mr. MELCHER. Am I on the list?

Mr. DOLE. The Senator is on the list twice.

Mr. MELCHER. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, would the majority leader at least let us make an effort here to see if we can get a time certain for final passage of this bill?

Mr. DOLE. We cannot do it.

Mr. President, I doubt that we could get that at this time. But I do believe we can lay down an amendment that we are going to have a rollcall vote on and come in at 9 o'clock so we know we are going to have a vote by 9:30. Then we will be in good shape. I would think by 2 o'clock we might be out of here tomorrow.

Mr. STEVENS. Mr. President, will the Senator yield at that point? Will the majority leader yield at that point?

Mr. BYRD. Mr. President, if the majority leader will yield, that is the most optimistic note I heard around here in a long time.

Mr. DOLE. There are only 12 rollcall votes. There are actually 13 because we will get the agreement tomorrow afternoon and then there will be a vote on debt ceiling to sort of round it off.

Mr. STEVENS. Mr. President, will the Senator yield a minute?

Mr. DOLE. I am happy to yield. I will yield the floor.

Mr. STEVENS. Mr. President, the Senate has been in session now 6 out of the last 7 days for more than 13 hours a day. We are about ready to have a Saturday session tomorrow. Our staff takes at least an hour to get ready in the morning and takes an hour after we leave at night. They are here an hour in the morning to at least an hour after we finish.

We are looking at a time next week from Monday, Tuesday, Wednesday, Thursday, Friday, and probably Saturday that will equal this week at least in terms of time.

I just want to back up what the majority leader says and ask everyone to think about the time factor tomorrow.

These people are entitled to some time with their families over the weekend and to be able to get rested up for next week.

I noticed here earlier tonight the tempers getting a little frayed. I get a little temper once in a while.

Mr. DOLE. I never noticed that.

Mr. STEVENS. I have not done it yet.

I urge that the Senators listen to the majority leader and tomorrow see if we cannot finish within a reasonable time because I do believe it is time that we thought about these people who we really kept here now last week—a week ago tonight it was almost 1 o'clock.

We started this morning at 8:45 a.m. It will be well near midnight before we finish even tonight and they will be here an hour after that.

I think the majority leader's request for tomorrow shortening down this time and trying to get through some of these and see if he can waive having votes on some of these amendments would be highly in order.

Mr. DOLE. I thank the distinguished Senator from Alaska.

The one way we can do that tomorrow is if we can get rolling. After the first 15-minute vote I will make the request in the morning other votes will be 10 minutes each and we stick to the 10 minutes.

I have been reminded by the Senator from Arizona that he said we spent days just on overtime.

Mr. GOLDWATER. Nine days.

Mr. DOLE. Just on overtime waiting for one Member to show up.

If we can all work tomorrow, I think we can all be out by 3 o'clock.

Mr. NUNN. Mr. President, will the majority leader indicate the schedule for tomorrow? What time will we come in and get on this bill?

We can lay down the Glenn amendment tonight and that would require a rollcall tomorrow morning.

Mr. DOLE. Then we will start at 9 o'clock in the morning.

Do the managers like 9 or 9:30?

Mr. NUNN. On this bill or——

Mr. DOLE. Come in at that hour and be on the bill 30 minutes later, 10 or 10:30.

We will come in at 9:30 and be on the bill by 10.

Mr. NUNN. We will be ready for the bill at 9:30.

Mr. GOLDWATER. I might expect we come in at 9 and have no special orders. Let us get to work—we hear enough talking all week—without special orders.

Mr. KENNEDY. Have special orders after the last vote.

Mr. NUNN. Nine or 9:30, whatever the preference of the leadership.

Mr. DOLE. We will stand in recess, not right now, until 9:30 in the morning.

Mr. GOLDWATER. I did not win.

Mr. DOLE. You get a little sleep. We worry about you.

Mr. GOLDWATER. I do not need sleep; you do. [Laughter.]

AMENDMENT NO. 2671

(Purpose: To prohibit the Department of Defense from entering into contracts with foreign governments and foreign firms for the purpose of carrying out research in connection with the Strategic Defense Initiative that could be reasonably performed by a United States firm)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN] proposes an amendment numbered 2671.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, between lines 18 and 19, insert the following new section:

SEC. . PROHIBITION AGAINST CERTAIN CONTRACTS

(a) In General.—Funds appropriated pursuant to an authorization contained in this or any other Act to or for the use of the Department of Defense may not be used for the purpose of entering into or carrying out any contract with any foreign government or any foreign firm if the contract is to provide for the conduct of research, development, test, or evaluation in connection with the Strategic Defense Initiative program unless the Secretary of Defense certifies to the Congress in writing that the work to be performed under the contract cannot be reasonably performed by a United States firm.

(b) EXCEPTIONS.—The prohibition in subsection (a) does not apply to—

(1) funds used to carry out any contract entered into before the date of the enactment of this Act; or

(2) funds appropriated specifically for research, development, test, or evaluation in connection with antitactical ballistic missile systems.

(b) DEFINITION.—As used in subsection (a), the term "foreign firm" means a business entity owned or controlled by one or more foreign nationals or a business entity in which more than 50 percent of the stock is owned or controlled by one or more foreign nationals.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION OF THE AOE-6 FAST COMBAT SUPPORT SHIP

Mr. SPECTER. Mr. President, I have decided not to propose an amendment to the fiscal year 1987 defense authorization bill to restore full funding for the AOE-6 fast combat support ship because of an understanding I have reached with Senator COHEN, chairman of the Subcommittee on Sea Power and Force Projection.

Mr. President, the amendment would have restored full funding for the AOE-6 which has been requested by the administration and fully authorized by the House Armed Services Committee.

This logistics station ship is used to resupply the aircraft carrier battle group with fuel, stores, and ammunition. The need for the AOE is significant. While the importance of combatant ships and submarines is obvious, supply ships are often neglected with a resulting loss in logistical capability. Although we cannot fight a war without underway replenishment—for which the AOE-6 is designed—every few days.

Current station ships cannot meet this need because there are too few and they are too old and slow. The Navy currently has 11 station ships for its 13 carrier battle groups. With plans to expand the number of carrier battle groups to 15, the deficit of station ships will reach 4. In addition, 7 of the 11 station ships presently deployed, the AOE's, can only cruise at 20 knots, whereas the carrier group routinely sustains speeds of 26 to 30 knots.

Moreover, the AOE-6 is extremely cost effective. According to the Navy and the Department of Defense, the estimated fiscal year 1987 price of the AOE-1 meeting the Navy's requirements as fully as the AOE-6 does should be $665 million. At $612.7 million, the AOE-6 is a modern station ship at a moderate price.

Mr. HEINZ. Mr. President, I would like to commend the distinguished Senator from Pennsylvania, Senator SPECTER, in his efforts to authorize funding for this important combat support ship. Senator SPECTER has already outlined the crucial role this ship must play with the aircraft carrier battle group and the dangerous situation we will face in the event of war with our naval logistics capabilities. I would urge my colleagues to review this program and support the full $612.7 million authorization for this ship.

Mr. COHEN. Mr. President, the AOE-6 is a worthwhile project and there is a significant need for station ships to support carrier battle groups.

Those of us on the Subcommittee on Sea Power and Force Projection of the Senate Armed Services Committee were faced with the unpleasant task of making significant reductions in the Navy's shipbuilding and conversion account. The committee recommended against authorizing the AOE-6 ship to comply with budget constraints. Our decision resulted from an overall assessment of shipbuilding needs and war-fighting priorities.

I would like to provide an authorization for this important program. If funding permits in conference, then I would certainly support authorization for the AOE.

Mr. SPECTER. Mr. President, I thank the distinguished Senator from Maine for his agreement to support this project in conference if funds can be found.

Mr. HEINZ. Mr. President, I would also like to thank Senator COHEN for his support for the AOE-6. I am hopeful that sufficient funding can be found in conference.

Mr. GRASSLEY. I was prepared today to offer an amendment to strike the section in this bill which repeals the work measurement provision we enacted into law in last year's DOD authorization bill. I understand I would be opposed in that effort by the Armed Services Committee chairman and ranking member as well as the Acquisition Subcommittee chairman and ranking member.

Since this provision was enacted, the Department of Defense Inspector General has issued a draft report of a study he conducted on this very subject to determine its beneficial effects to the DOD procurement system. That report identifies specific elements that would be helpful in a work measurement system which are not addressed in the statute, as well as some problem areas in the current law. Because we need time to review those IG recommendations, I would be willing to withdraw my amendment, if I may first clarify something with the committee and subcommittee chairs and ranking members.

Mr. President, I wonder if the chairman, Senator GOLDWATER, and the ranking member, Senator NUNN of the Armed Services Committee and the chairman, Senator QUAYLE, and the ranking member, Senator LEVIN, of the Subcommittee on Acquisition could agree that prior to the conference on the DOD authorization bill, they will be willing to identify problem areas in 10 U.S.C. 2406, the current work measurement statute, as expressed in comments that may be informally presented to the Armed Services Committee and that they will consider the possibility of appropriate changes which could be made to refine the intent and effect of the law.

Mr. GOLDWATER. I would be happy to agree to the request of Senator GRASSLEY.

Mr. NUNN. I see no problem with meeting the Senator from Iowa's request.

Mr. QUAYLE. While I remain convinced that the current statutory language is unworkable and not cost effective, I would, of course, be willing to review any comments interested parties may have on this issue.

Mr. LEVIN. Mr. President, I, too, would do what I can to meet the request of the Senator from Iowa. I know of his strong commitment to this

issue, and I respect his fortitude. But the statute as presently written is not workable. I would be pleased, however, to comply with Senator GRASSLEY's request.

Mr. GRASSLEY. In light of these assurances, then, Mr. President, I will withdraw my amendment to strike the repeal of 10 U.S.C. 2406.

THRESHOLD REQUIREMENTS FOR CONTRACTING OUT STUDIES

Mr. GRAMM. Let me ask a question of Senator WILSON, the chairman of the Manpower and Personnel Subcommittee. It is my understanding that the language in Senate Report 99-331, accompanying the bill, S. 2638, regarding the provision raising from 40 to 50 the threshold for full-cost comparison studies of contracting out contains two errors, which are in conflict with the intent of the bill. Specifically, that language refers to comparing the Federal employees performance cost to a "contractor bid" and the language refers to civilian workyears. I further understand that under simplified cost comparisons, there is, in fact, no "contractor bid" utilized, but rather there is an estimate made of contractor performance costs. Do you agree with that?

Mr. WILSON. I agree with everything my good friend has said so far.

Mr. GRAMM. I further understand that it was not the intent of the committee bill to change the practice of utilizing an estimate of contractor performance costs in simplified cost comparisons and that the report reference to a "contractor bid" was simply included in error.

Mr. WILSON. The Senator is absolutely correct. The committee bill is to have no effect on the procedure used when full-cost comparisons are not required. Rather, the bill will change only when such full-cost comparisons are required.

Mr. GRAMM. Now, let me ask one other question. That same report language contains several references to "civilian workyears" when, in fact, the bill language addresses only "civilian personnel." Is it the Senator's understanding that the term "workyears" used in the report is in error, and, in fact, the committee bill only raises from 40 to 50 the number of civilian personnel who may be performing a function being studied for contracting out without utilizing a full-cost comparison?

Mr. WILSON. The Senator is absolutely correct. There is no intent to change the threshold measurement in these matters from the number of personnel involved to the number of civilian workyears involved.

DEFENSE CONTRACT AUDITS

Mr. ROTH. Mr. President, I rise to express my strong concern about the implications of a provision in S. 2638, the National Defense Authorization Act, assigning contract audit policy responsibilities to the new Under Secretary of Defense (Acquisition). In accordance with the recommendations of the Packard Commission, this new Under Secretary is to have broad powers relating to acquisition, including "establishing all policies for acquisition, procurement, research and development, logistics, testing, contract audit, and contract administration for all entities of the Department of Defense."

I was responsible for the Packard Commission having been established in the first place as a result of my amendment to an earlier Defense authorization bill. I have great respect for David Packard, and I support the recommendations of the Commission he chaired. But I also chair the Governmental Affairs Committee which oversees audit operations across Government, and I know the value of strong, independent audits in reducing fraud and waste and in protecting taxpayer interests. In this particular case, the Commission may have gone one step too far in consolidating acquisition functions.

COMMISSION RECOMMENDATIONS

Specifically, the Packard Commission recommended that, among his other responsibilities, the new Under Secretary of Defense (Acquisition) should:

First. Oversee DOD-wide establishment of contract audit policy, particularly policy for audits conducted in support of procurement and contract administration;

Second. Except for criminal investigations and DOD internal audits, supervise establishment of policy for all DOD oversight of Defense contractors, including oversight performed by procurement and contract management organizations; and

Third. Recognize established GAO and professional auditing standards.

To optimize the use of available oversight resources, the Commission also recommended eliminating undesirable duplication of official effort through a contract audit policy which should be designed to:

First. Delineate clearly respective responsibilities and jurisdictions of DOD oversight organizations;

Second. Develop guidelines and mechanisms for DOD oversight organizations to share contractor data and otherwise to rely more estensively upon each other's work; and

Third. Improve audit strategies for the conduct, scope, and frequency of contract auditing. These strategies are to reflect due consideration for contractors' past performance, the proven effectiveness of their internal control systems, the results of prior and ongoing reviews conducted by DOD organizations and by contractors themselves, and relative costs and benefits.

A reading of the Packard Commission reports indicates that the apparent basis for recommending the transfer of contract audit policy responsibilities to the USD(A) was to eliminate duplicative DOD oversight of contractors' operations. The conclusion on the existence of duplicative oversight was based on two studies. One was done for the Packard Commission by the national public accounting firm of Arthur Andersen and Co. and the other was an independent survey by the Office of the Inspector General, DOD. The Inspector General survey was completed prior to the Arthur Andersen study.

Both of the studies arrived at identical conclusions as to the systemic causes of the duplicative oversight. These were:

Their efforts lack advance planning and coordination.

Their respective responsibilities are ill-defined.

They are unwilling to rely on each other's work.

They are reluctant to share information.

The duplicative oversight reviews identified by the Inspector General involved 13 DOD contract audit, contract administration and procurement organizations, the General Accounting Office, and a prime contractor. The studies noted that the duplicative reviews involving DCAA were not due to improper actions by DCAA. On the contrary, DCAA was responding to requests from contracting officers or fulfilling duties assigned to them by DOD regulations. For example, DCAA performed a review of a contractor proposal at the request of the contracting officer. Subsequently, the Defense Logistics Agency conducted another review of the same proposal. The Army was not satisfied with the prior two reviews and conducted a separate review.

DEFINITION OF CONTRACT AUDIT POLICY

The Packard Commission does not provide a definition of what constitutes "contract audit policy." However, the Commission did recognize that this function was currently assigned to the Inspector General, DOD.

From the viewpoint of the Office of the Inspector General, DOD, contract audit policy involves the implementation and interpretation of auditing standards and policies issued by the Comptroller General, AICPA, and OMB covering the performance of audit work and reporting of audit results as it relates to audits of DOD contracts.

DOD POSITION

The DOD has consistently opposed the transfer of contract audit policy functions to the USD(A) in correspondence to OMB and the Congress. This position is shared by the Secretary and Deputy Secretary of Defense. I am also informed that in informal discussions with the Deputy Inspector

General, DOD, the Comptroller General did not agree with the transfer of the audit policy responsibilities.

CONCERNS ABOUT TRANSFER OF CONTRACT AUDIT POLICY RESPONSIBILITIES

I have several concerns about changing the current assignment of contract audit policy responsibilities. Moreover, the assignment of such responsibilities to the USD(A) would degrade the effectiveness and independence of the DCAA.

First, the Inspector General Act of 1978, as amended, provides the Inspector General, DOD, with responsibilities for the policy direction and oversight of all DOD internal audit, contract audit, and internal review organizations. After extensive deliberation, the Congress decided not to include DCAA as part of the Inspector General organization. In lieu thereof, the Inspector General was given policy and oversight responsibilities for DCAA. The implementation of the Packard Commission recommendations on contract audit policy could seriously hamper the Inspector General in fulfilling his responsibilities for coordinating audit activities and assuring effective coverage of DOD programs and operations.

Second, contract audit policy responsibilities apparently do not involve and are not necessary to eliminate duplication in the oversight of contractors' operations. Most of the duplication involved organizations other than audit agencies. The USD(A) should have authority to assign oversight responsibilities, require sharing of contract data, provide for coordination between DOD oversight organizations, and clearly define specific responsibilities of the DOD oversight organizations. None of this deals with policies, procedures, and techniques involved in conducting an audit. Moreover, DOD acquisition management already has such administrative oversight policy responsibilities.

Third, one of the most important and basic auditing standards of the Comptroller General is the one dealing with independence. Without the independence of freedom to conduct audits, the integrity and quality of the audit work becomes questionable. This standard requires that both the audit and audit organization must be free from external or organizational impairments to independence and must maintain an independent attitude and appearance.

The assignment of contract audit policy to the USD(A) could place the DCAA under the de facto control of the USD(A) and could be in violation of the Comptroller General's standard on independence. The Packard Commission recommends that the USD(A) control the scope, conduct, and frequency of audits conducted by DCAA. This risk impairment to the independence of DCAA and which would be contrary to the Comptroller General's standards.

The need to maintain the contract audit function separate from the control of acquisition management has long been recognized as essential to ensure effective contract audits. In 1969, Congressman Mahon, speaking for the House Appropriations Committee, stated:

"The committee has always strongly believed that the effective audit of Defense contractors can be achieved only through audits made by organizations and individuals completely independent of the procurement process, including both the negotiation and administration.

In 1970, a blue ribbon panel of representatives from the American Institute of Certified Public Accountants indicated that it was "extremely important that the DCAA remain an independant organization, and that it should not be administered by the procurement function." In 1980, the task force on evaluation of audit, inspection and investigative components of the Department of Defense concluded that, "The DCAA's independence must be retained so that the agency can objectively assist acquisition officials * * * while simultaneously serving as an internal control mechanism in the acquisition process to ensure more economic, efficient, and effective defense procurement."

An important role of the contract audit function is to provide a check and balance or internal control mechanism in the procurement process. We risk weakening this role by transferring the contract audit policy function to the USD(A).

NEED FOR VIGILANCE

In reporting S. 2638, the Armed Services Committee attempted to clarify the USD(A)'s audit policy role on page 255 of its report as follows:

In establishing an office with such broad powers and responsibilities, it is important that certain checks and balances that have proven so effective over the years not be lost. The Under Secretary of Defense for Acquisition will establish appropriate overall policy for the administrative oversight of defense contractors. The Under Secretary of Defense for Acquisition will also establish policy with respect to the need for audit services required in various contracting situations, cost principles applicable to Government contracts, and the procedures for obtaining necessary audits to assure that DOD's oversight of contractor performance is effective. *The Defense Contract Audit Agency will continue its role as an independent agency responsible for determining the nature and scope of audit necessary to comply with the standards for audit of government organizations, programs, activities, and functions issued by the Comptroller General of the United States and the generally accepted auditing standards established by the American Institute for Certified Public Accountants.* (Emphasis supplied.)

This provides us some assurance that the USD(A) will not overstep its bounds on audit policy. Still, my first preference would be to retain this function in the IG's office. Given the legitimate need to consolidate acquisition functions and eliminate duplication in the oversight of Defense contracts and my high respect for the work of the Packard Commission, I have chosen not to offer an amendment striking this provision. However, please be assured, Mr. President, that the Government Affairs Committee will be keeping close tabs on how this provision is implemented, and it will not hesitate to act if there is an infringement of audit independence in DOD.

Mr. BENTSEN. Mr. President, I am pleased to support the amendment proposed by the distinguished majority leader to study and report on some of the important issues involving schools run by the Defense Department. I congratulate him for his initiative on this matter.

I am particularly aware of problems in the San Antonio area, where three school districts located entirely on military bases need additional classroom space in order to conform to Texas State law and to maintain accreditation. Since those school districts have no tax base of their own, they cannot raise the funds needed for the extra rooms. Unfortunately, the Defense Department is trying to pin responsibility on the Department of Education, which has no funds requested for such purposes.

At the San Antonio bases, the commanders have identified military construction projects which would meet the new educational standards. These projects, however, have not been given high enough priority to win inclusion in the official budgets. I gather that the Armed Services Committee is also not especially favorable to such projects.

Mr. President, I hope that the study proposed by the distinguished majority leader will provide the information needed to evaluate these school construction issues in a broader context. In my judgment, failure to fund these quite small construction requests—less than $2 million total for the three bases in San Antonio—risks jeopardizing the quality of education available to the children of military personnel and thus may undermine the confidence of military parents in the Defense Department's regard for their dependents' needs.

SMALL INTERCONTINENTAL BALLISTIC MISSILE

● Mr. LEVIN of Michigan. Mr. President, I reluctantly voted to table the Wilson amendment. I have serious reservations about the small intercontinental ballistic missile [Midgetman], and I supported the decision of the Senate Armed Services Committee to slow down the development program for this major new strategic weapons system until a variety of questions have been adequately addressed by the

Congress and the Pentagon. However, the Wilson amendment would have the effect of delegating entirely to the Secretary of Defense the decision as to whether the Midgetman is cost effective at the margin and survivable against a responsive threat. The sponsor of this amendment has made clear his belief that in order to meet these criteria the Midgetman missile would have to undergo major restructuring. He would like to see this relatively small missile designed to carry a single warhead greatly increased in size so that it could carry two or three warheads with perhaps penetration aids as well. Survivability and cost effectiveness are two important tests that seem reasonable to require the program to pass, but assuming we decide to proceed with Midgetman at all, I fail to see why the Congress should not participate in assessing whether or not those tests are met. I also cannot believe it is wise to apply such tests to this program after literally only a few minutes of debate on the floor in a chaotic conclusion to a long, day's work and without any opportunity for hearings by the Armed Services Committee. Under these circumstances, I voted to table.●

THE AQUILA REMOTELY PILOTED VEHICLE

Mr. ROTH. Mr. President, I would like to engage in a brief discussion with the chairman of the Senate Armed Services Committee about the Army's Aquila remotely piloted vehicle [RPV]. I am planning to offer an amendment but shall not offer it if I can get some assurances from the committee chairman.

The amendment I am thinking of offering will place long overdue restrictions on the funding for the Army's Aquila remotely piloted vehicle [RPV]. The Aquila is a small unmanned air vehicle designed to perform target acquisition and designation, aerial reconnaissance, and artillery adjustment missions. The vehicle, including its mission payload, is controlled from a ground control station, and video imagery and target location are returned via a jam-resistant data link.

Mr. President, the Aquila has been in development for nearly 11 years, with research and development costs totaling more than $600 million dollars. After many years of development and significant funding, the costs totaling more than $600 million. After many years of development and significant funding, the Aquila is still experiencing fundamental performance problems. The General Accounting Office reports that in 1978, the total program acquisition cost for Aquila was approximately $563 million. Due to added requirements, and reliability and technical problems, the cost has catapulted to $2.2 billion today, a cost increase of $1.7 billion.

Mr. President, I want to explain the provisions of my amendment. I ask unanimous consent that the full text of the amendment be printed in the RECORD at the conclusion of our colloquy.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. The provisions are simple. First, the amendment will prohibit any further research and development funds for the Aquila if the Army cannot certify to Congress that the Aquila is ready for operational testing by January 1987. The Army has scheduled operational tests to begin this September. The amendment therefore will allow some flexibility if the Army delays the scheduled tests this September. However, should the Army fail to certify to Congress that the Aquila is ready for operational tests by January 1987, then the program will no longer receive funding.

This requirement is in the amendment to avoid any further delays by the Army in preparing the Aquila for operational tests. It is a fish-or-cut-bait requirement, Mr. President. After 11 years of research and development and over $600 million, the Aquila is ready or it is not ready for operational tests. The program should be terminated if it is not ready.

Second, the amendment will prohibit any funds for production for the Aquila until:

First, the Secretary of Defense has certified to the Congress that the Aquila system has satisfactorily demonstrated that it meets or exceeds all performance criteria established for the system by the Army; and

Second, the Director of Operational Test and Evaluation has completed a comprehensive assessment of the Aquila system.

Mr. President, the amendment is written in such a way that funding necessary for ongoing and upcoming tests is not prohibited. The Army will have the necessary funding it needs to carry out the collective training exercise which is going on now, and it will have the funding to carry on operational tests if the system is ready and the Army certifies the Aquila is ready for the tests.

I want to congratulate the Senate Armed Services Committee because the committee did put language in the bill prohibiting production of the Aquila until the system successfully passes operational tests and the Secretary of the Army certifies to Congress that the Aquila meets or exceeds all performance criteria.

I felt the language did not go far enough. Therefore, my amendment prohibits further R&D funding if the Army cannot certify the Aquila for operational tests by January 1987 and it requires the Secretary of Defense instead of the Secretary of the Army to certify the Aquila's successful completion of operational tests.

Mr. President, I think it is important to note that the Aquila Program has been criticized by both House and Senate defense authorizing committees for its high cost and gold plating. I want to point out that the House Armed Services Committee refused to authorize any funds for the Aquila Program in fiscal year 1987. This is the second year in a row the House Armed Services Committee refused funding for the program.

Some might say this is a wise idea. I believe we should let the Aquila go through operational tests and require the Army to put their money where their mouth is. If the Aquila fails operational testing then it is about time the Defense Department terminate the program and salvage the $600 million already invested to acquire other RPV's.

In addition to the House action, Mr. President, I want to read an excerpt from the Senate Armed Services Committee report to S. 2638 regarding the Aquila Program:

> The committee notes that in the face of dramatic program cost growth and following congressional direction, the Army has restructured the Aquila Program. The number of battery sets has been reduced from 13 to 9, the number of air vehicles dropped from 543 to 376 . . . despite these dramatic reductions in quantities, the procurement estimate has declined only $100 million from $1.2 billion to $1.1 billion. The committee considers such a price for the reduced Aquila quantities to be unacceptable.
>
> The responsibility for the unsatisfactory history of the Aquila Program is shared equally by the Army and the prime contractor. In eight years the Army has had six program managers purportedly managing the program, and just recently, the Army transferred the management oversight from the Army's aviation systems command to the Army's missile command. The prime contractor's management efforts have been equally disjoined and undistinguished. The committee believes that in order to preserve the potential benefits of the Aquila, and to ensure some return on more than $600 million already invested, certain actions should be taken . . . before approving the release of production funds, the committee will require that the Aquila meet all system operational test criteria established by the Army and complete a successful assessment by the Director of Operational Test and Evaluation, Office of the Secretary of Defense.

Mr. President, I believe we need RPV's in our Armed Forces. They are valuable militarily and can save lives. Just look at the reports on the Israeli's use of RPV's in the 1982 war with Syria. Israeli forces were able, largely with the help of RPV's, to eliminate 54 Syrian aircraft and 19 missile batteries, while losing only one Israeli jet.

I believe it is time to stop one costly delay after another with the Aquila Program. Performance problems, program mismanagement, and significant cost growth are convincing evidence that an amendment with the condi-

tions I have described in my statement is necessary. I would like to get the response of the Senator from Arizona to my comments if he is willing.

Mr. GOLDWATER. Mr. President, I appreciate the concern of the Senator from Delaware about the Aquila RPV and thank him for his congratulatory remarks about the restrictions on the Aquila put in the defense authorization bill.

I recognize that the Senator's amendment would expand on the bill language in S. 2368 prohibiting production of the Aquila until it successfully passes operational tests.

I wonder if the Senator will consider a number of assurances from me about the upcoming schedule for Aquila. Many of the assurances have to do with the provisions of his amendment, and with these, he will consider not offering his amendment.

First, I want to assure the Senator from Delaware that the committee feels the same way he does about the acquisition strategy for the Aquila system. The program has experienced significant cost growth, and after many years of development and more than $600 million dollars in funding, the Aquila is still experiencing performance problems. The Senator's statements about the program's mismanagement are correct and I am glad he read the committee's report language illustrating the committee's dissatisfaction with the Aquila Program.

Second, let me assure the Senator that our bill is only going to make funds available to the Army for the collective training exercise going on now, the upcoming operational tests for Aquila scheduled to begin this September, and research and development in fiscal year 1987 on subsystem components.

My staff informs me that should the Army delay the scheduled operational tests, they will require additional research and development funds for the program in fiscal year 1987. The Army will have to ask the Congress, specifically the Armed Services Committee, for those additional funds. Let me assure the Senator that if there are delays, the Committee will demand a full explanation from the Army why they cannot get the Aquila ready for operational tests, why the Army needs more R&D funds, and why the Armed Services Committee should not kill the program.

Let me next assure the Senator from Delaware that the Secretary of Defense will be reviewing the evaluation of the Aquila's operational test results of the Aquila.

The Senator mentioned that one of the requirements in our bill is that the Director of Operational Test and Evaluation complete a comprehensive assessment of the Aquila system.

The Senator from Delaware knows the director's report on his evaluation of operational tests is required by law to be submitted to the Secretary of Defense and to the Congress. Therefore, I believe the Senator's concern about getting the Secretary's Attention about the Aquila system is taken care of.

With these assurances from me and with the bill language in S. 2638, I wonder if the Senator will withhold from offering his amendment.

Mr. ROTH. I thank the Senator from Arizona for his assurances on the Aquila Program. I am pleased to see his interest in the program and the need to start thinking about terminating this program if the Army cannot prepare the vehicle for operational tests and if the mismanagement and cost growth continue.

If there are further delays and more cost growth with the Aquila, not only will the armed services be asking the Army why but I will demand an explanation and ask why the Congress should not terminate the program.

The Army has indicated the Aquila will begin operational tests this September. I know the Director of Operational Test and Evaluation will be evaluating the test results and sending the report to the Secretary of Defense and to Congress.

I am also pleased to see language in the bill requiring the Secretary of the Army to certify the Aquila has satisfactorily demonstrated that it meets all performance criteria established by the Army.

Mr. President, I am not going to offer the amendment but I want to put everyone concerned on notice that I will be closely watching the upcoming tests of the Aquila. I will be expecting the Director of Operational Test and Evaluation to take a very hard look at this program and provide a thorough and frank assessment of the Aquila's performance in operational tests.

Mr. GOLDWATER. I thank the Senator for his decision.

Mr. ROTH. I thank the Senator from Arizona and appreciate the assurances he has given me on this program.

The text of the amendment is as follows:

On page 3, strike out line 9 and all that follows through line 2 on page 4, and insert in lieu thereof the following:

(b) AQUILA REMOTELY PILOTED VEHICLE.—None of the funds appropriated to the Army pursuant to an authorization in this or any other Act may be obligated or expended for the procurement of the Aquila remotely piloted vehicle system until the Secretary of the Defense has certified in writing, to the Committees on Armed Services and Appropriations of the Senate and the House of Representatives, the following matters:

(1) The Aquila system meets or exceeds all operational test requirements prescribed by the Department of the Army for such system.

(2) The Director of Operational Test and Evaluation of the Department of the Defense has determined that—

(A) the operational capabilities of the Aquila system are satisfactory considering—

(i) the capability for recovery of the Aquila vehicle;

(ii) the overall system reliability;

(iii) the flight reliability;

(iv) the mission reliability;

(v) the overall system operating proficiency, including software enhancements to ensure the overall operation proficiency of the system;

(vi) the modular integrated communication and navigation system hardware reliability;

(vii) target detection, recognition, and identification capabilities;

(viii) target tracking capabilities;

(ix) target designation capabilities;

(x) the electromagnetic interference capabilities;

(xi) electromagnetic capabilities;

(xii) built-in test equipment reliability;

(xiii) automatic test equipment reliability;

(xiv) the sight and laser stabilization capabilities; and

(xv) such other criteria as the Director considers appropriate; and

(B) appropriate goals have been established for the Aquila system by the Department of the Army relating to system operator skills proficiency, including goals relating to training provided for ground control station console operators and crew in target detection, tracking, and designation.

On page 13, between lines 5 and 6, insert the following:

(f) AQUILA REMOTELY PILOTED VEHICLE.—(1) Except as provided in paragraph (2), none of the funds appropriated to the Army pursuant to an authorization in this or any other Act may be obligated or expended for research, development, test, and evaluation of the Aquila remotely piloted vehicle system until the Secretary of the Army has certified in writing, by January 1987, to the Committees on Armed Services and Appropriations of the Senate and the House of Representatives, the following matters:

(A) The army has completed the testing of the Aquila system in the Army Collective Training Program.

(B) The Aquila system is ready for operational testing.

(C) The Aquila system meets or exceeds the following requirements specified in the contract awarded by the Army under the Aquila program:

(i) The system reliability requirements.

(ii) The modular integrated communication and navigation system hardware reliability requirements.

(iii) The target tracking requirements.

(iv) The electromagnetic interference requirements.

(v) The built-in test equipment reliability requirements.

(vi) The requirements for overall operating proficiency, including the requirements relating to system software enhancements that ensure that such system meets the overall operating proficiency requirements.

(vii) The sight and laser stabilization requirements.

(D) The Army has achieved the goals relating to system operator skills proficiency established for such system by the Department of the Army, including the goals relating to training furnished to ground control station console operators and crew members in target detection, tracking, and designation.

(2) Subsection (a) does not limit the obligation or expenditure of research, development, test, and evaluation funds for testing the Aquila remotely piloted vehicle system in the Army Collective Training Program.

## ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 11:15 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SUPPORT OF NATIONAL HUNGARIAN FREEDOM FIGHTER DAY

Mr. DOLE. Mr. President, I would like to commend Senator RIEGLE for his initiative in introducing Senate Joint Resolution 385, of which I am a cosponsor, designating October 23, 1986, as "National Hungarian Freedom Fighters Day."

This resolution is intended to commemorate a day, 30 years ago, when thousands of freedom-loving Hungarians sought to liberate their country from the domination of the Soviet Union. We cannot forget the significance of October 23, and the gallant group of individuals who gave their lives for the freedom of their country. Further, we need to remember that the mission of these liberators and those who survived has not been achieved—their goal of a free and democratic Hungary is blocked by the political and economic domination of the Soviet Union.

I am pleased we are taking this opportunity to honor the efforts of the Hungarian freedom fighters and paying tribute to their sacrifices. Our respect for them is being best expressed by letting the peoples of Hungary know that we have not forgotten their heroes and that we share their pride in the gallantry of their fallen countrymen. This Congress should pay tribute by commemorating the 30th anniversary of the Hungarian revolution.

Mr. President, I am honored to have been asked by Congressman HORTON, of the House of Representatives, chairman of the 30th anniversary Committee To Commemorate the 1956 Hungarian Revolution, to serve with him as honorary cochairman along with House Speaker O'NEIL. I ask that my exchange of letters with Congressman HORTON on this matter be included in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

HOUSE OF REPRESENTATIVES,
*Washington, DC, April 22, 1986.*

Hon. ROBERT DOLE,
*Majority Leader, U.S. Senate, Washington DC.*

DEAR BOB: 1986 marks the 30th anniversary of the Hungarian Revolution. Americans from all walks of life will commemorate this event during the year. These remembrances will take place under the sponsorship of the Committee to Commemorate the 1956 Hungarian Revolution. Similar Committees were formed to sponsor commemorative events of the 10th, 15th, 20th, and 25th anniversaries.

As the Chairman of this committee, I invite you to serve as an Honorary Cochairman (with Speaker O'Neill) of the Committee to Commemorate the 1956 Hungarian Revolution.

I am convinced that the principles, the gallant actions and the impact on the history of the Hungarian freedom fighters are worthy to be recalled, remembered and cherished. The message of 1956 is still very relevant, its lessons not fully realized. I hope that you will join with me in honoring and commemorating this revolution. By doing so we will help the world to remember, and to learn.

I look forward to your positive response on this matter. If you have any questions, please do not hesitate to contact me or Michael Marvin of my staff at x54916.

Thank you in advance for your consideration.

With kindest personal regards,
Sincerely,

FRANK HORTON.

---

AUGUST 6, 1986.

Hon. FRANK HORTON,
*House of Representatives, Rayburn Building, Washington, DC*

DEAR FRANK: Thank you for your invitation to serve as an Honorary Cochairman of the Committee to Commemorate the 1956 Hungarian Revolution.

I would consider it an honor to serve in such a position.

On August 1, Senator Riegle proposed a joint resolution designating October 23, 1986, as "National Hungarian Freedom Fighters Day." As I am a cosponsor of this resolution, you can be assured of my appreciation of the honor of this solemn and historical event.

Sincerely,

BOB DOLE.

## SOUTH AFRICAN PROGRESSIVE LEADER OPPOSES UNITED STATES SANCTIONS

Mr. PRESSLER. Mr. President, as we approach the debate next week on South Africa sanctions legislation, it would be useful for our distinguished colleagues and the American people to be aware of what South African political reformers and progressives think about United States economic sanctions against their nation.

The argument has been heard with increasing frequency in recent weeks that those who favor radical transformation of the political and economic system of the Union of South Africa support sanctions. This is clearly a distortion of reality. Some of South Africa's leading reformers and opposition party officials, who have long battled for an end to apartheid, have argued persuasively that disinvestment from the South African economy would produce extremely harmful results. They make a good case that sanctions would hurt most the people the sanctions legislation is supposed to help.

Among these leaders is Helen Suzman, an outspoken opposition party parliamentarian in South Africa since 1953. Mr. President, I ask unanimous consent that her excellent article from the New York Times Magazine of August 1, 1986, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD as follows:

[From the New York Times Magazine, Aug. 3, 1986]

WHAT AMERICA SHOULD DO ABOUT SOUTH AFRICA

(By Helen Suzman)

What should the United States do about South Africa? This is a simple question to which there is no simple answer, if there is an answer at all. Of course, if the desire to distance the United States from a morally repugnant system is paramount and if the objective is to punish South Africa for its glaring sins of omission and commission, regardless of the consequences, then sanctions and disinvestment spring readily to mind. And if political expediency is also part of the picture, then calling for economic sanctions must surely be irresistible.

I realized this in November 1984 when I was in the United States and watched on television the landslide victory of Ronald Reagan in the elections. The following morning, I received a call from the New York corespondent of the South African evening newspapers. He asked for my reaction to the election, and I told him I had no doubt that champagne corks were popping in Pretoria. I also said the celebrants were making a great mistake because I believe that the Democrats would seek a rallying cause—and South Africa was going to be it.

I did not need a crystal ball to make that prediction. During visits to the United States over the past seven years, I had observed the buildup of the anti-apartheid campaign in the United States, on campuses in particular. Year after year in the South African Parliament, I had warned that unless the Government began to dismantle apartheid, which is legally sanctioned racial discrimination, and to desist from some of its more abhorrent practices—such as detention without trial and the forced removal of helpless black communities—South Africa would be faced with severe punitive measures. My warnings fell on deaf ears. Events in South Africa throughout 1985 triggered an anti-apartheid explosion in the West.

Day after day, scenes of ugly police brutality, of mass funerals of victims of police shootings in black townships, appeared before horrified American and European television viewers. (Such scenes were not shown on South African television, which is state controlled, although the horrendous black-on-black violence frequently appeared on the screen.) With relentless regularity, newspaper headlines abroad proclaimed the rising death rate, the enormous number of people detained without trial, torture at the hands of the security police, the hordes of children arrested and imprisoned.

By mid-1985, the South African issue had been reduced to a simple equation in the United States: "If you are against sanctions and disinvestment, you must be a racist—Q.E.D." The response was of tidal-wave proportions. In July 1985, Chase Manhattan, followed by other banks, pulled the rug from under South Africa's financial system by refusing to roll over loans; as a result, the value of the rand plummeted. Many colleges and universities divested themselves of stocks in companies doing business in South Africa. Cities and states "cleansed" their pension-fund investments of South African connections.

Last year, unable to withstand the hassle factor at home, fearful of boycotts of their products in the United States and nervous about political and economic instability in South Africa, 28 American companies (according to the American Chamber of Commerce in Johannesburg) withdrew from South Africa. Others have followed suit this year.

In September 1985, hoping to forestall more severe Congressional action, President Reagan, long an opponent of sanctions, signed an executive order that prohibited most new loans to South African businesses. The order also banned the sale of most nuclear-related technology to South Africa and the sale of the Krugerrand, the South African gold coin, in the United States.

Across the Atlantic, the other stalwart opponent of sanctions, Prime Minister Margaret Thatcher of Britain, was experiencing even greater pressures. She was forced to agree to limited measures against Pretoria at the Commonwealth conference in the Bahamas in October 1985. The final report of the Eminent Persons Group—a seven-member mission appointed at the Bahamian conference to conduct an in-depth investigation in South Africa—brought no comfort. The mission originally put forward a "possible negotiating concept" to the South African Government, one calling for steps toward ending apartheid. They included the suspension of violence by both the Government and the African National Congress (A.N.C., the most prominent of exiled groups against apartheid); the release of Nelson Mandela, the black leader who has been in prison for 24 years, and other political prisoners; the removal of the Government's military forces from black townships; the legalization of the A.N.C. and Pan African Congress, another black political organization, and a ban on detention without trial.

Instead of accepting these very reasonable proposals, which have long been advocated by myself and by other opposition politicians in South Africa, the Pretoria regime, as is its wont, embarked on a course of action that could only strengthen the sanctions lobby. Last May, while the Commonwealth mission was still in South Africa and was in the process of preparing its final report, the South African Defense Force carried out raids on Lusaka, Gaberone and Harare, the capitals of three neighboring Commonwealth countries. The official reason given was "to take out" A.N.C. bases. But the gains appeared to be minimal. Politically aware South Africans ascribed the raids to a Government attempt to prove to militant right-wing elements inside the country that the Government had not "gone soft" on the A.N.C. and was not succumbing to outside pressures.

Not surprisingly, diplomatic reaction abroad was totally hostile. The Commonwealth mission was understandably outraged and its final report made this clear. Shortly afterward, negotiations broke down and the group reported to the Commonwealth heads of government their "reluctant but unequivocal judgment that further talks would not lead anywhere in the current circumstances."

Paradoxically, it was during this tumultuous time that the most far-reaching reforms yet introduced by the South African Government in the direction of dismantling apartheid were enacted. As a result of pressures from inside and outside the country, during the recent Parliamentary session, the Government offered to restore citizenship to those permanent residents in the republic who ceased to be South African citizens when the four black homelands became "independent." (Even with citizenship, however, the blacks in South Africa will not have Parliamentary voting rights.)

The Government also opened the central business districts in major cities to all races. It made property ownership available to blacks in the townships. Most significant of all, it abolished the hated pass laws and influx control, and replaced the old pass book with a common nonracial identity document. (The pass laws have for many decades inhibited the mobility of blacks and their right to lead family lives. Millions of people have been arrested for infractions of these laws, which have bedeviled the relationship between the police and the black community.)

Although many vital issues remain to be addressed—redistribution of land and the disproportionate living standards of white and black South Africans—there is no doubt that the reforms signify a change of direction: away from apartheid. The recent reforms will undoubtedly have a positive effect on the future well-being of black South Africans. In fact, had these changes taken place five years earlier, the impact would have been far greater among blacks. As it is, they have been totally overshadowed by the reimposition of a state of emergency, the detention of thousands of people and the ongoing violence in the black townships.

The reforms have evoked little reaction in decision-making circles in the United States and Europe. (Ten years ago, they would probably have been considered significant, particularly in the United States, which at the time might still have been harboring vivid recollections of its own civil rights struggle of the 1960's.)

This response—or lack of it—to changes the South African Government considers to be of major importance has not only increased its intransigence, but confirmed what it has long suspected: that the failure of the West to define precisely what it means by "dismantling apartheid" is part of a ploy to move the goal posts as each demand is met; ultimately, the Government fears, the West will insist on the total transfer of power to the black majority. This is simply not under consideration by the South African Government.

Those who believe that a quick fix is likely to follow the imposition of sanctions, and that the Pretoria regime will collapse within a short time thereafter, are sadly misinformed. Certainly, if I believed in such a possibility, I would back sanctions to the hilt. Far more likely is a retreat into a siege economy, more oppression and more violence. There will be a long-drawn-out confrontation between a well-armed military force shoring up the Government and a popular movement backed by the masses and using Irish Republican Army-type tactics in urban and rural areas. The latter strategy has already been put into effect.

The Reagan Administration's policy of "constructive engagement" may well be dismissed in a great many circles in the United States and elsewhere. It has, at least, aimed for attainable objectives: to prevent forced removals of black communities; to extend funds from the Agency for International Development (A.I.D.) to civil-rights organizations and drought-stricken areas; to press for the release of anti-apartheid detainees. Moreover, together with the Sullivan principles, it encouraged American businessmen and, by example, their South African and European counterparts, to be socially responsible.

Nowadays, the Sullivan principles are also in the doghouse. Drafted almost a decade ago by the Rev. Leon Sullivan, a black Baptist minister from Philadelphia, the code calls for the desegregation of workplaces, equal employment practices, training for nonwhites, social services for black workers and the promotion of trade unionism. The code has been adopted by about 65 percent of the 260 or so American companies now doing business in South Africa. But many black South Africans feel that too much lip service has been paid to the code and not enough action taken.

While realizing that I lay myself open to the accusation of paternalism, I have to say that I have more respect for the American companies that have, so far anyway, remained in South Africa (and have set aside millions of dollars for the education, training and housing of their black employees) than for those that have left the country. The companies that have left have taken with them what influence they could have had inside South Africa, thereby abandoning desperate, jobless breadwinners in a country with no social security safety net, no dole and no food stamps.

The moral outrage and desire for punitive action is something I understand very well, but the reality that will come as a result of a grievously afflicted economy will not be seen by those living thousands of miles away. That reality, compounded by decades of unequal employment opportunities and oppression, is bleak beyond belief. True, many black South Africans say they approve of disinvestment and sanctions, despite the additional hardships they will endure as a result. They fall into four categories: those who have no jobs and nothing to lose; those who have jobs in "sheltered" employment and will lose nothing; those who want everyone to lose everything (therefore, "roll on the revolution"), and, finally, those who believe that the South African Government will crack at the first (or, at worst, second) sign of sanctions. The last category brings to mind a former British prime minister who predicted that it would take "weeks rather than months" to bring down Ian Smith's Unilateral Declaration of Independence in Rhodesia. In the event, it took another 15 years and 30,000 dead.

There are also leaders of the neighboring black states who advocate sanctions against South Africa, despite the fact that southern Africa is one economic unit. Whatever harm is done to South Africa's economy will certainly harm the economies of the country's neighbors, which are dependent on South Africa for jobs, markets and transportation.

The former High Commission territories of Botswana, Lesotho and Swaziland are part of a customs union with South Africa from which they derive substantial revenues; Botswana and Lesotho also belong to

the rand monetary area. South Africa's Electricity Supply Commission is an important source of power for these countries, which also depend entirely on routes through South Africa for trade. Zaire, Zambia and Zimbabwe are heavily dependent on South African transport and ports for their import and exports.

More than 250,000 foreign blacks work in South African mines alone, earning almost 1 billion rand (about $400 million) a year, at least half of which is repatriated. A further 170,000 foreign blacks are employed in other occupations in South Africa, not to mention an estimated one million "illegals." The neighboring states cherish the hope that the Western nations will pick up the tab to make good the substantial losses they will sustain after they cut their links with South Africa. Unfortunately, this hope is probably unfounded.

Unpalatable as it may seem to the sanctions lobby, the most practicable way to get rid of apartheid and to achieve a nonracial democratic society in South Africa is through an expanding, flourishing economy. The process of intergrating blacks as skilled workers into such an economy would be expedited. Their economic muscle would then, through increased trade-union action, be a potent force not only in the workplace but also in the sociopolitical sphere. Strike action and consumer boycotts—both of which can be used as temporary expedients, unlike disinvestment and mandatory sanctions—are the most powerful weapons for blacks to use to resolve important issues like political power-sharing.

Indeed, consumer boycotts have already been used to great effect in some parts of the country, such as the eastern Cape Province, where many white-owned shops were brought to the brink of bankruptcy. Conversely, if blacks are unemployed and have nothing to spend, such boycotts would be meaningless. It is astonishing to me that those advocating punitive actions do not realize that, if successful, they will have undermined the most significant power base that blacks could acquire.

Certainly, this approach presupposes a longterm strategy and blacks, especially young blacks, want liberation now. No one should underestimate the fierce spirit of resistance that pervades the black townships, but while incremental change is certainly attainable, the replacement of the white minority government by a black majority government is simply not within reach, even though many blacks believe that the era of white domination is about to end.

Those calling for sanctions and disinvestment often overlook two important factors.

First, while the present white minority Government is South Africa has no pretensions to democratic rule, there are also no guarantees that it would be replaced by a nonracial democracy respecting the rule of law, a free press, free association, free elections and an independent judiciary, not to mention an economy free of state control.

Second, South Africa does not consist only of an oppressed black majority and right-wing white oppressors. Indeed, 250,000 white voters (20 percent of the white electorate) in the last general election in 1981 cast their ballots for the official opposition in the House of Assembly—the Progressive Federal Party, which has for years advocated the ending of apartheid and the establishment of a truly representative government with protection for the legitimate rights of minorities. Although the percentage of those who voted against apartheid is small, it is nonetheless significant. It may be well to remember that from 1961 to 1974 I was the only Membr of Parliament elected on such a platform.

Indications of support for such an alternative government from powerful nations like the United States would certainly encourage many more white South Africans to cast their votes against the Pretoria regime at the next election, due at the latest in three years' time. At the very least, there could be a Parliamentary realignment.

It may well be that all such arguments fall on deaf ears, and that they are advanced in a lost cause. Nevertheless, they deserve to be made in the interest of millions of moderate South Africans of all races who abhor apartheid, who have long fought the abominable practices of race discrimination and who are striving for a peaceful transition to a nonracial democracy. For them, at least, it is surely not too much to ask that they be spared the violence and misery of a scorched earth policy.

It is not at all certain whether President Reagan can stave off Congressional imposition of harsh punitive sanctions, as he tried to do in his recent speech on American policies toward South Africa. But if he does—and it is a big if—it is vital that the Pretoria Government use the time so won to accelerate the dismantling of apartheid, to provide better housing and education and, most important, to extend political rights to blacks. The release of Mandela as a prerequisite for negotiations is an obvious first step, as are the release of all persons detained without trial and an end to the state of emergency.

The United States should keep up its condemnation of apartheid. The system of apartheid is an affront to people concerned with civilized values throughout the world. Its eradication would be an important gain for the civil-rights movement and would increase the sum of human freedom worldwide. The United States should exert pressure on apartheid, but not impose punitive measures that will wreck the South African economy. That is the strategy of despair that will destroy the inheritance which blacks will inevitably share.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Emery, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## MESSAGES FROM THE HOUSE

At 1:45 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate.

H.R. 5294. An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1987, and for other purposes.

### ENROLLED BILL SIGNED

At 4:02 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 4184. An act to authorize appropriations to the National Science Foundation for the fiscal year 1987, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore [Mr. THURMOND].

---

At 5:10 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 256. Joint resolution designating August 12, 1986, as "National Neighborhood Crime Watch Day."

The message also announced that the House agrees to the amendments of the Senate to the following joint resolution.

H.J. Res. 377. Joint resolution to designate December 5, 1985, as "Walt Disney Recognition Day."

## MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 5294. An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1987, and for other purposes; to the Committee on Appropriations.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MCCLURE, from the Committee on Energy and Natural Resources, without amendment:

H.R. 3005. A bill to direct the Secretary of the Interior to convey certain lands, withdrawn by the Bureau of Reclamation for townsite purposes, to the Huntley Project Irrigation District, Ballantine, MT. (Rept. No. 99-386).

By Mr. MURKOWSKI, from the Committee on Veterans' Affairs:

Special Report on Budget Allocations of the Committee on Veterans' Affairs (Rept. No. 99-387).

By Mrs. HAWKINS (for Mr. HATCH), from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 2515. A bill to reauthorize the Rehabilitation Act of 1973, and for other purposes (Rept. No. 99-388).

By Mr. ROTH, from the Committee on Governmental affairs, without amendment and with a preamble:

S.J. Res. 190. A joint resolution to establish greater productivity in Federal Government operations as a national goal of the United States.

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GORTON:

S. 2728. A bill to extend the terms of leases that may be entered into by the Tulalip Tribes without the approval of the Secretary of the Interior; to the Select Committee on Indian Affairs.

By Mr. HEINZ:

S. 2729. A bill to temporarily exempt the duty on single-headed latch needles and hosiery knitting needles; to the Committee on Finance.

By Mr. STEVENS:

S. 2730 A bill entitled the "Child Protection Forfeiture Amendments Act of 1986".

By Mr. BIDEN (for himself, Mr. BOREN, Mr. HEFLIN and Mr. HOLLINGS):

S. 2731. A bill to provide the opportunity for farmers in areas affected by natural disasters to defer the payment of principal and interest due on Farmers Home Administration loans; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. NUNN (for himself and Mr. MATTINGLY):

S. 2732, A bill to amend title 28, United States Code; to the Committee on the Judiciary.

By Mr. THURMOND (for himself and Mr. HOLLINGS):

S. 2733. A bill to designate the U.S. Courthouse in Aiken, SC as the "Charles E. Simons, Jr., Federal Courthouse"; to the Committee on Environment and Public Works.

By Mr. CRANSTON:

S.J. Res. 390. A joint resolution to authorize and request the President to proclaim the week of November 23, 1986, to November 30, 1986, as "American Indian Week".

## SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SIMON:

S. Res. 462. A resolution expressing the intention of the Senate not to confirm a new Ambassador to South Africa until certain conditions are met, and for other purposes; to the Committee on Foreign Relations.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GORTON:

S. 2728. A bill to extend the terms of leases that may be entered into by the Tulalip Tribes without the approval of the Secretary of the Interior; to the Select Committee on Indian Affairs.

EXTENSION OF TULALIP INDIAN TRIBES LEASING AUTHORITY

● Mr. GORTON. Mr. President, I am introducing legislation today on behalf of the Tulalip Tribes of Washington that will first, authorize the tribe to lease its valuable residential, commercial, and industrial lands for longer periods of time; and second, permit the tribal leadership to exercise a higher level of self-determination in the area of leasing.

The Tulalip Reservation is located 30 miles north of Seattle and is adjacent to a major interstate highway. This is a high-growth area where prime sites for leasing purposes are at a premium. The tribe's 22,000-acre reservation includes the largest tract of undeveloped lands in the area. Over the years, the tribe has derived substantial income from residential and industrial leasing programs. Given the strategic location of the reservation, the best use of most of its lands lies in the area of residential, commercial, and industrial leasing.

Under existing law and policy, the Secretary of the Interior must approve a variety of leases entered into between Indian tribes and private individuals or entities. The Tulalip leadership has discovered that the existing authority is inadequate to accommodate major developmental leases that require a long period of time for debt retirement purposes. Although the tribe has been granted authority to lease its lands for terms not to exceed 99 years, such leases require Secretarial approval for every transaction. Moreover, the regulations governing this authority are overly cumbersome and contrary to Indian self-determination and tribal self-governance.

I am pleased to support the progressive Tulalip tribal leadership by introducing this legislation. Specifically, my bill amends Public Law 91-274 to permit the tribe to enter into leases not to exceed 75 years, with no option to renew. The tribe, however, would be required to develop a new regulatory scheme for the extended leasing authority. This legislation will permit the tribe to pursue its goal of economic self-sufficiency. This bill will give the Tulalip tribes the flexibility to work out profitable leasing arrangements, flexibility that is needed to allow development of commercial, industrial, and residential properties in Washington State.

Mr. President, I ask that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2728

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That subsection (b) of the first section of the Act of August 9, 1955 (25 U.S.C. 415(b)) is amended to read as follows:

"(b) Any lease by the Tulalip Tribes under subsection (a), except a lease for the exploitation of any natural resource, shall not require the approval of the Secretary of the Interior if—

"(1) the term of the lease does not exceed 30 years, with no option to renew, or

"(2) the term of the lease does not exceed 75 years and the lease is executed pursuant to tribal regulations approved by the Secretary of the Interior before the execution of the lease.".●

By Mr. STEVENS:

S. 2730. A bill entitled the "Child Protection Forfeiture Amendments Act of 1986"; to the Committee on the Judiciary.

CHILD PROTECTION FORFEITURE AMENDMENTS ACT

● Mr. STEVENS. Mr. President, today I am introducing legislation to strengthen the Child Protection Act of 1984. In addition, the bill's secondary purpose is to reimburse to some degree the U.S. Postal Service for the significant expenditures required in their investigations of violations of the Child Protection Act.

The Child Protection Act of 1984 determines which actions constitute sexual exploitation of children. Individuals who are involved with the production of the exploitative material, as well as those who are involved in its distribution, are subject to the penalties designated by this act. These penalties include property forfeiture, criminal fines ranging up to $200,000, and prison sentences which may not exceed fifteen years.

The bill would make it clear that property subject to seizure and forfeiture under the Child Protection Act includes motor vehicles and other property used to effect a violation of the statute without regard to whether such property moved in interstate or foreign commerce.

The bill would also substantially improve enforcement of the statute by authorizing the Postal Service to exercise the authority presently vested exclusively in the Attorney General to conduct civil forfeitures of property under section 2254(a) of title 18. The Postal Service presently exercises a major investigative role in enforcement of the statute. The forfeiture authority granted to the Postal Service under the bill would cover any property subject to forfeiture but would only be exercised in cases where the violations included use of the mails, which is prohibited by the Child Protection Act.

The bill would also make amendments to title 39 to allow the Postal Service to retain forfeited amounts, including proceeds from the sale of forfeited items. This is in recognition of the fact that the Postal Service will incur costs of over $3 million a year in investigating violations of, and conducting forfeitures under, the Act which are funded by postal revenues rather than funds appropriated from the General Treasury.

Mr. President, I ask unanimous consent to print at the end of my remarks the entire text of the legislation.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2730

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SEC. 1. SHORT TITLE.

This Act may be cited as the "Child Protection Forfeiture Amendments Act of 1986."

SEC. 2. TITLE 18 AMENDMENTS.

Section 2254 of title 18, United States Code, is amended—

(1) by striking out the word "chapter," in subsection (a)(3) and inserting in lieu thereof: "chapter, including any property, real or personal, tangible or intangible, which was used or intended to be used, in any manner of part, to facilitate a violation of this chapter,";

(2) by inserting in subsection (b) "or the Postal Services" immediately following "the Attorney General"; and

(3) by adding at the end thereof:

"(c) The authority of the Postal Service under subsection (b) shall be exercised only where the conduct with respect to which such seizure or forfeiture occurs includes use of the mails in violation of this chapter.".

SEC. 3 TITLE 39 AMENDMENT.

Section 2003(b) of title 39, United States Code, is amended—

(1) by striking out "and" at the end of clause (5);

(2) by striking out the period at the end of clause (6) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof:

"(7) amounts (including proceeds from the sale of forfeited items) from any forfeiture conducted by the Postal Service pursuant to title 18.".●

---

By Mr. BIDEN (for himself, Mr. BOREN, Mr. HEFLIN, and Mr. HOLLINGS):

S. 2731. A bill to provide the opportunity for farmers in areas affected by natural disasters to defer the payment of principal and interest due on Farmers Home Administration loans; to the Committee on Agriculture, Nutrition, and Forestry.

EMERGENCY DROUGHT CREDIT RELIEF ACT

● Mr. BIDEN. Mr. President, Delaware farmers received word last week that the entire State qualifies for emergency disaster assistance because of the drought. This came as no surprise. The effects of the drought are obvious to all—midget corn, stunted soybeans, puny peaches, brown pastures. As we are all aware, conditions are even worse in other Southern States.

The Secretary of Agriculture moved quickly to approve the disaster declaration, and I commend him for his action. However, I have some conerns that the assistance the Secretary is offering to many farmers will not prove to be helpful.

I talked to farmers when the request for disaster assistance was still under review by the Secretary of Agriculture. I supported the State's request along with the rest of the congressional delegation. But when I talked to farmers about this help, they were less than enthusiastic about the expected form of the help coming their way. The reason for this is simple—the assistance for many of them will come in the form of loans. As these farmers pointed out, the last thing they need is more debt. They are not unappreciative, they just rightly questioned whether the loans will really be effective in this situation.

Like that around the country, farmers in the drought-stricken region are already burdened with debt because of years of falling market prices for their crops. Compounding this situation, the Department of Agriculture has made it clear that emergency loans will be made under rather stringent standards. Thousands of farmers will not qualify for the assistance under these standards, and may lose their farms.

Mr. President, there is a cost-effective option available that will help prevent widespread dislocation. The Secretary of Agriculture has the authority under current law to defer interest and principle payments on Farmers Home loans. The Secretary should use this authority to allow farmers threatened with the loss of their farm to restructure their loans.

The bill I am introducing will allow farmers to defer payments on their Farmers Home loans for 1 year if they can demonstrate that they would not be in financial trouble if it were not for the drought. This does not create new authority for the Secretary of Agriculture, it only directs him to use what he already has. It does not require a loan writeoff or a forgiveness of principle. Payments may be deferred for 1 year and spread over the life of the loan, allowing farmers to handle the devastating financial effects of the drought.

Mr. President, under more normal economic conditions the use of low-interest loans to help farmers through droughts or other natural disasters would be the appropriate step. However, for many farmers already straining under a heavy debt burden, the use of additional loans is clearly the wrong solution. The Secretary has another tool available, and the extraordinary circumstances demand that he use it.

There is a precedent for the use of this authority for agricultural loans, but a better example of the use of this type of leniency is provided by this administration. Loans to many foreign countries, which we all know are too far in debt and lagging far behind in payments, have been restructured with the encouragement and assistance of this administration. The bill I have introduced today extends to our Nation's farmers the same opportunity that our Government seems willing to make available to huge international borrowers. It would seem to be a better investment of taxpayer money.

This type of action is needed to give farmers suffering from drought conditions a little breathing room. Farmers who can show the managerial ability to make it will have the chance to stay on their land. I urge my colleagues to join in cosponsorship of this measure to give farmers that chance.●

---

By Mr. NUNN (for himself and Mr. MATTINGLY):

S. 2732. A bill to amend title 28, United States Code; to the Committee on the Judiciary.

REQUIRING THE PRESENCE OF DISTRICT MARSHALS AT ANY COURT SESSION

● Mr. NUNN. Mr. President, today I offer a bill which provides a simple amendment to title 28 section 569(a) of the United States Code of Laws. This amendment has a straightforward and worthwhile purpose. That is, to emphasize that the courts of this land are empowered to require the presence of the district marshals at any court session and to eliminate any prospect that the discretion granted to the courts under section 569(a) can be altered by administrative fiat or any agency interpretation thereof.

For almost 200 years since the two were created under the Judiciary Act of 1789, the district courts and the district marshals have enjoyed the most harmonious relationship. The U.S. marshals have always been officers of the article III courts. This is still true notwithstanding the limited supervision of the marshals by the Attorney General. The status of the marshal as an officer of the court supervised by the Attorney General is no anomaly. The U.S. attorneys and their assistants are officers of the court in which they practice. The presence of the marshals and their career deputies during court proceedings serves to assure the dignity, formality, and respect for Federal court proceedings which the public is entitled to expect.

In recent years, subtle and pervasive changes have occurred in the U.S. marshals service and in court administration. Among these are administrative agreements which purport to limit the judicial discretion granted by the Congress in 28 U.S.C. section 569(a) to the courts so that they may require the presence of marshals at court sessions. Certainly, there is a need for economy in all phases and branches of governmental operations. Nevertheless, the dignity, authority, and independence of Federal courts and their proceedings are beyond price. It is necessary to clothe the article III courts of this Nation with an unmistakable grant of authority on matters touching court security so that no one will presume to alter the clear expression of the Congress in this regard.

The language of the proposed amendment is clear, unequivocal, and strong. Such a provision will underscore the finality and immediacy of the order. However, it does not lead to the absence of appeal for the abuse of judicial discretion. This amendment will permit a remedy in those few instances where a court exceeds its authority, acting on impermissible grounds. Similar language is familiar in the Federal law. It appears in title 28 in sections 1334(c)(2), 1452(b), 1471(d), 1478(b), and 2906.

The language of the amendment should not be construed to provide that a deputy marshal must be in attendance during all court proceedings. Such is left to the discretion of the courts. Section 569(a), as amended, will simply provide that the marshals will be on hand when the judges of our article III courts require their presence in the exercise of sound judicial discretion.●

---

By Mr. THURMOND (for himself and Mr. HOLLINGS):

S. 2733. A bill to designate the U.S. Courthouse in Aiken, SC, as the "Charles E. Simons, Jr., Federal Courthouse"; to the Committee on Environment and Public Works.

CHARLES E. SIMONS, JR., FEDERAL COURTHOUSE

Mr. THURMOND. Mr. President, I rise today to introduce legislation to name the U.S. Courthouse in Aiken, SC, after one of the most distinguished jurists ever to have served on the Federal bench in South Carolina—Charles E. Simons, Jr.

Judge Simons was born in my home county of Edgefield 70 years ago this month. He was a Phi Beta Kappa graduate of the University of South Carolina in 1937. He also received his law degree there in 1939.

He began the practice of law in Aiken, SC, in 1939. In 1942, his legal career was interrupted by his military service in the Navy, where he served on the staff of Admiral Nimitz. In 1946, Judge Simons returned to his Aiken law practice.

He was elected to serve in the South Carolina General Assembly from 1947 to 1948, and again from 1960 to 1964. As Governor of South Carolina in 1948, I appointed Judge Simons to the South Carolina Revision Committee.

In 1964, President Johnson appointed Simons to be a U.S. district judge. He became chief judge of the U.S.-District Court for the District of South Carolina in 1980.

In addition to his demanding schedule on the Federal bench, he has been active in the United States Judicial Conference. He has served as the fourth circuit district judge representative; on the Advisory Committee on the Codes of Judicial Conduct; and as chairman of the Subcommittee on Federal Jurisdiction. Judge Simons has also always found time to devote himself to church, civic, and community service. He and his lovely wife, Jean, have four fine children and several grandchildren.

Throughout our State, Judge Simons is deeply respected for his legal knowledge, his fairness, and his integrity. Judge Simons has consistently demonstrated these qualities during the course of our long friendship. After over 22 years on the Federal bench, Judge Simons is assuming senior status later this month.

Mr. President, based on the contributions of Charles E. Simons, Jr., to his State and Nation, I believe it is appropriate that the U.S. Courthouse in Aiken, SC, be named the "Charles E. Simons, Jr., Federal Courthouse." I urge my colleagues to support this legislation and request that the text of the bill be printed in the RECORD at the conclusion of these remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2733

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the United States courthouse located at 223 Park Avenue Southwest in Aiken, South Carolina, shall be known and designated as the "Charles E. Simons, Jr., Federal Courthouse". Any reference in any law, regulation, document, record, map, or other paper of the United States to such courthouse is deemed to be a reference to the "Charles E. Simons, Jr., Federal Courthouse".

● Mr. HOLLINGS. Mr. President, I rise today to join Senator Thurmond in introducing legislation to name the U.S. Courthouse in Aiken, SC, after one of South Carolina's most distinguished jurists—Charles E. Simons, Jr.

Judge Simons' assumption of senior status later this month, after 22 years on the Federal bench, culminates almost 50 years of service to the State of South Carolina as both a State legislator and a Federal judge.

In 1942 Judge Simons was elected to the South Carolina House of Representatives from Aiken County, but resigned to serve in the U.S. Navy on the staff of Admiral Nimitz. Upon completing active duty as a lieutenant in 1946, he returned to the House of Representatives and served from 1947 to 1948 and again from 1960 to 1964.

President Johnson appointed Simons to be a U.S. district judge in 1964. He became chief judge in 1980. While serving on the court, Judge Simons has been fourth circuit district judge representative to the Judicial Conference of the United States; a member of Advisory Committee on Codes of Conduct of the Judicial Conference; and chairman of the Subcommittee on Federal Jurisdiction.

Judge Simons was born in Edgefield County, SC, in 1916. He was graduated Phi Beta Kappa from the University of South Carolina in 1937, and received his law degree there in 1939. He and his wife, Jean, have four children and several grandchildren.

Judge Simons is respected throughout the State for his honesty, integrity, and fairness and his long years of service to our State and Nation. Based on these contributions, I believe that it is fitting that the U.S. Courthouse in Aiken, SC, be named the Charles E. Simons, Jr., Federal Courthouse. I look forward to the speedy passage of this bill.●

---

By Mr. CRANSTON:

S.J. Res. 390. Joint resolution to authorize and request the President to proclaim the week of November 23 to 30, 1986, as "American Indian Week"; to the Committee on the Judiciary.

AMERICAN INDIAN WEEK

Mr. CRANSTON. Mr. President, today I am pleased to introduce a Senate joint resolution honoring those Americans whose ancestors were here to greet those of our forefathers who arrived from overseas to "discover" them. My resolution designates the Thanksgiving week, November 23 to 30, as "American Indian Week."

I think this resolution is especially apropos this year. The recent restoration of the Statue of Liberty and the July 4 ceremonies gave us the opportunity to recognize our largely immigrant heritage and the courage of those ancestors who made the long journey to America. During "Liberty weekend" many ethnic groups and some selected individuals were honored for their significant contributions to our country.

But the first Americans, who contributed so much to our heritage, our language, and our culture, were left out.

Even our unique form of government and the principles enunciated in our Declaration of Independence and Constitution owe much to American Indian models and influence on those of our forefathers who drafted them.

The Thanksgiving season is a perfect time to honor the contributions Native Americans have made. In the face of tremendous hostile pressure to assimilate—many Native Americans would say "disappear"—into the melting pot, much of it resulting from official policies of our Government, American Indians have hung tenaciously onto their tribal culture and roots in this land, trying to preserve what remains of their way of life.

I hope this resolution reminds all Americans of the many contributions and sacrifices Indian tribes and individuals have made and continue to make for our Nation.

For example, Native Americans not only shared their knowledge of medicinal herbs and plants with our forefathers, they shared their food harvests and agricultural knowledge with them. That knowledge, history tells us, al-

lowed America's earliest immigrants to survive their first winter in a new land. The Iroquois Confederacy was a model for the Articles of Confederation, our first form of government as a new nation, and the source of such revolutionary concepts as the idea that one purpose of government was to insure to all individuals the opportunity to pursue happiness. American Indians also taught the early immigrants a game—one which still very much endures—lacrosse. Lacrosse remains an Indian tribal game as well as a very popular sport in many of our colleges and universities.

I have mentioned only a few contributions. But one needs only to drive through any American city to recognize the influence of American Indian names and language on the rest of our culture.

I hope that this resolution will spark all Americans to think about the many positive contributions American Indians have made to American life.

I am pleased to sponsor this resolution in the Senate, and urge my colleagues to join me in seeking its early adoption.

## ADDITIONAL COSPONSORS

At the request of Mr. MOYNIHAN, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 15, a bill to authorize the Secretary of Health and Human Services to make grants to States for the purpose of increasing the ability of States to provide drug abuse prevention, education, treatment, and rehabilitation, and for other purposes, to authorize the Attorney General to make grants to States for the purpose of increasing the level of State and local enforcement of State laws relating to production, illegal possession, and transfer of controled substances.

S. 670

At the request of Mr. PELL, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 670, a bill to amend the National Labor Relatios Act to give employers and performers in the performing arts rights given by section 8(e) of such act to employers and employees in similarly situated industries, and to give to employers and performers in the performing arts the same rights given by section 8(f) of such act to employers and employees in the construction industry, and for other purposes.

S. 1569

At the request of Mr. BINGAMAN, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 1569, a bill to amend title XVIII of the Public Health Service Act to encourage health promotion and disease prevention through the implementation of a coordinated national nutrition monitoring system.

S. 1583

At the request of Mr. D'AMATO, the names of the Senator from Arizona [Mr. DECONCINI], and the Senator from Massachusetts [Mr. KERRY] were added as cosponsors of S. 1583, a bill to provide additional funding for comprehensive drug enforcement, prevention, and treatment.

S. 1806

At the request of Mr. BOREN, the name of the Senator from Wisconsin [Mr. PROXMIRE] was added as a cosponsor of S. 1806, a bill to amend the Federal Election Campaign Act of 1971 to change certain contribution limits for congressional elections and to amend the Communications Act of 1934 regarding the broadcasting of certain material regarding candidates for Federal elective office, and for other purposes.

S. 1820

At the request of Mr. DECONCINI, the name of the Senator from Florida [Mrs. HAWKINS] was added as a cosponsor of S. 1820, a bill to provide financial assistance to State and local educational agencies for the development and expansion of demonstration chemical substance abuse prevention programs in the public elementary and secondary schools of such agencies, and for other purposes.

S. 1917

At the request of Mr. BRADLEY, the names of the Senator from Nevada [Mr. LAXALT], and the Senator from Kansas [Mr. DOLE] were added as cosponsors of S. 1917, a bill to amend the Foreign Assistance Act of 1961 to provide assistance to promote immunization and oral rehydration, and for other purposes.

S. 2479

At the request of Mr. TRIBLE, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 2479, a bill to amend chapter 39 of title 31, United States Code, to require the Federal Government to pay interest on overdue payments, and for other purposes.

S. 2536

At the request of Mr. HATCH, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 2536, a bill to provide for block grants to States to pay for the costs of immunosuppressive drugs for organ transplant patients.

S. 2585

At the request of Mr. HECHT, the names of the Senator from Idaho [Mr. SYMMS], the Senator from Indiana [Mr. QUAYLE], the Senator from Michigan [Mr. RIEGLE], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Indiana [Mr. LUGAR], the Senator from Arizona [Mr. DECONCINI], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Utah [Mr. GARN], the Senator from Mississippi [Mr. COCHRAN], and the Senator from Pennsylvania [Mr. SPECTER] were added as cosponsors of S. 2585, a bill to authorize the President of the United States to award a Congressional Gold Medal to Red Skelton in recognition of his lifetime commitment in service of Americans and to authorize the Secretary of the Treasury to sell bronze duplicates of such medal.

S. 2678

At the request of Mr. BENTSEN, the name of the Senator from Montana [Mr. MELCHER] was added as a cosponsor of S. 2678, a bill to provide a comprehensive national oil security policy.

S. 2717

At the request of Mr. QUAYLE, the names of the Senator from South Dakota [Mr. ABDNOR], and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of S. 2717, a bill to amend the Agricultural Act of 1949 to require the Commodity Credit Corporation to pay producers for on-farm storage of commodities, and for other purposes.

SENATE JOINT RESOLUTION 112

At the request of Mr. PELL, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of Senate Joint Resolution 112, a joint resolution to authorize and request the President to call a White House Conference on Library and Information Services to be held not later than 1989, and for other purposes.

SENATE CONCURRENT RESOLUTION 136

At the request of Mr. GRASSLEY, the name of the Senator from Oregon [Mr. PACKWOOD] was added as a cosponsor of Senate Concurrent Resolution 136, a concurrent resolution entitled "Volunteers are the Importance of Volunteerism."

SENATE CONCURRENT RESOLUTION 154

At the request of Mr. D'AMATO, the names of the Senator from California [Mr. WILSON], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of Senate Concurrent Resolution 154, a concurrent resolution concerning the Soviet Union's persecution of members of the Ukrainian and other public Helsinki Monitoring Groups.

SENATE RESOLUTION 435

At the request of Mr. MOYNIHAN, the names of the Senator from Florida [Mrs. HAWKINS], and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of Senate Resolution 435, a resolution to recognize Mr. Eugene Lang for his contributions to the education and the lives of disadvantaged young people.

AMENDMENT NO. 1729

At the request of Mr. DOMENICI, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of amendment No. 1729 intended to be proposed to S. 1004, a bill to authorize and direct the Secretary of

Energy to establish a program to provide for reclamation and other remedial actions with respect to mill tailings at active uranium and thorium processing sites.

AMENDMENT NO. 2355

At the request of Mr. MATHIAS, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of amendment No. 2355 proposed to S. 2638, a bill to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

AMENDMENT NO. 2570

At the request of Mr. PRESSLER, the names of the Senator from Alaska [Mr. MURKOWSKI], the Senator from South Dakota [Mr. ABDNOR], the Senator from Nevada [Mr. LAXALT], the Senator from Montana [Mr. MELCHER], and the Senator from North Carolina [Mr. BROYHILL] were added as cosponsors of amendment No. 2570 intended to be proposed to S. 2701, a bill to provide a comprehensive policy for the United States in opposition to the system of apartheid in South Africa, and for other purposes.

## SENATE RESOLUTION 462—RELATIVE TO THE CONFIRMATION OF A NEW AMBASSADOR TO SOUTH AFRICA

Mr. SIMON submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 462

Whereas the President has declared that—

(1) apartheid is morally wrong and politically unacceptable and must be dismantled; and

(2) the United States cannot maintain cordial relations with a government that denies rights to a majority of its people based on race;

Whereas the President has stated that the following steps are necessary to achieve progress toward political peace in South Africa:

(1) A timetable for elimination of apartheid laws should be set.

(2) All political prisoners should be released.

(3) Imprisoned African National Congress leader Nelson Mandela should be released to participate in the country's political process.

(4) Banning orders should be lifted from black political movements.

(5) Both the Government of South Africa and its opponents should begin a dialogue about constructing a political system that rests on the consent of the governed, where the rights of majorities and minorities and individuals are protected by law, and such dialogue should be initiated by the Government of South Africa itself;

Whereas Americans believe that all men are created equal and are endowed by their creator with inalienable rights;

Whereas Americans believe a basic tenet of the Bill of Rights under the United States Constitution is the maintenance of freedom of the press:

Whereas the freedom of the United States press in South Africa is being abrogated by the restrictions imposed on it by the Government of South Africa under the state of emergency declared on June 12, 1986, which prohibits reporting of any and all stories regarding domestic violence, security, and the state of emergency, and bars journalists from any and all areas of unrest; and

Whereas pursuant to article II, section 2, of the United States Constitution, it is the responsibility of the Senate to give its advice and consent with regard to all ambassadorial appointments: Now, therefore, be it

*Resolved,* That the Senate does not intend to give its advice and consent to the appointment of any individual holding the rank of ambassador to serve as chief of the United States diplomatic mission to South Africa until the chairman and ranking member of the Committee on Foreign Relations of the Senate have certified to the Senate that each of the following conditions have been met:

(1) timetable for elimination of all apartheid laws has been set.

(2) All individuals imprisoned, detained, banned, or in exile for their opposition to apartheid have been identified and released.

(3) Nelson Mandela has been released from confinement to participate in the political process of South Africa.

(4) Banning orders have been lifted from all black political movements.

(5) The Government of South Africa has initiated a dialogue with domestic opposition groups about constructing a political system that rests on the consent of the governed, where the rights of majorities and minorities and individuals are protected by law.

(6) Emergency restrictions on the freedom of the United States press in South Africa have been lifted.

(7) The state of emergency has been terminated.

● Mr. SIMON. Mr. President, the administration is reportedly considering a number of individuals to replace Herman Nickel as our Ambassador to South Africa. Recently a leading candidate for the post of Ambassador, Terence Todman, was quoted as saying that the United States should not name an envoy to South Africa until we develop a more effective and coherent policy toward that country.

Today I am introducing a resolution, expressing the sense of the Senate that it should not consider the nomination of any new U.S. Ambassador to South Africa until certain steps have been taken by the South African Government to end apartheid.

In downgrading our diplomatic representation in South Africa, the United States sends a clear and unmistakable message to the Government in Pretoria that, in the words of President Reagan" We cannot maintain cordial relations with a government that denies rights to a majority of its people based on race."

This resolution substantiates the position taken by the President in his July 22 speech in which he cited certain steps as necessary to achieving political peace in South Africa.

This resolution suggests that the steps called for in the President's speech should be taken before the United States resumes full diplomatic relations with South Africa.

Specifically, before the President submits to the Senate for confirmation the name of a new Ambassador to South Africa, the Botha government should:

First, set a timetable for elimination of the Apartheid laws.

Second, identify and release all political prisoners (defined as those who have been imprisoned, detained, banned or in exile for their opposition to apartheid.

Third, release imprisoned ANC leader Nelson Mandala from confinement to participate in the country's political process.

Fourth, lift the banning order from black political movements.

Fifth, initiate a dialog with domestic opposition groups about constructing a political system that rests on the consent of the governed and which protects the rights of all the citizens of South Africa.

Sixth, an additional requirement is that the South African Government terminate the current state of emergency and lift the emergency restriction imposed on the United States press operating in that country.

In urging the South African Government to take these steps the Senate will echo the call which has been made by our own President, the Emminent Persons group, and by respected black leaders including Bishop Desmond Tutu and Rev. Allan Boesak in South Africa.

During the last several months the United States has had no Ambassador in Pretoria. Vacating our Ambassador, while it would send an important signal, would not totally remove our diplomatic presence from that country or diminish the effectiveness of remaining consular staff.

The United States must register its objection to apartheid in South Africa with the same force that it responded to the events in Afghanistan and Poland. When the Soviet Union invaded Afghanistan and when martial law was imposed in Poland, we responded by withdrawing our Ambassador. Our response to the events occurring daily in South Africa must be no less emphatic.

Within the past 24 months, Canada, France, Australia, and Argentina have withdrawn their Ambassadors from South Africa, and I believe that the United States must do the same.●

## AMENDMENTS SUBMITTED

## DEPARTMENT OF DEFENSE AUTHORIZATION ACT FISCAL YEAR 1987

### ROTH (AND OTHERS) AMENDMENT NO. 2647

Mr. ROTH (for himself, Mrs. KASSEBAUM, Mr. PRYOR, Mr. CRANSTON, and Mr. EAGLETON) proposed an amendment to the bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes; as follows:

On page 126, line 11, strike out "He" and insert in lieu thereof "Except as provided in section 136a of this title, the Under Secretary".

Strike out section 914 of the bill and insert in lieu thereof the following:

SEC. 914. DIRECTOR OF OPERATIONAL TEST AND EVALUATION TO REPORT TO SECRETARY OF DEFENSE.

Section 136a of title 10, United States Code, is amended—

(1) in subsection (b)—

(A) by inserting ", the Under Secretary of Defense for Acquisition," in clause (2) after "Secretary of Defense"; and

(B) by striking out "Secretary of Defense and to" in clause (5) and insert in lieu thereof "Secretary of Defense, the Under Secretary of Defense for Acquisition, and";

(2) by striking out subsections (c) and (d) and inserting in lieu thereof the following:

"(c) Each report of the Director required under subsection (b)(5) shall be submitted to the Secretary of Defense, the Under Secretary of Defense for Acquisition, and the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives without intervening review or approval and without any change or revision by any other officer or employee. The Under Secretary of Defense for Acquisition may submit such comments regarding the report as he considers appropriate to the Secretary of Defense and the Committees referred to in the preceding sentence. The Secretary of Defense may also submit such comments regarding the report as he considers appropriate to such Committees.

"(d) The Director reports directly, without intervening review or approval, to the Secretary of Defense. The Director shall consult with, but the Director and the Director's staff are independent of, the Under Secretary of Defense for Acquisition and all other officers and employees of the Department of Defense responsible for acquisition or reseach and development. The Director shall keep the Under Secretary of Defense for Acquisition fully and currently informed of his activities with respect to his duties under this section and any recommendations made in carrying out those duties."; and

(3) in subsection (g)(1)—

(A) by inserting ", the Under Secretary of Defense for Acquisition," after "Secretary of Defense" in the second sentence; and

(B) by inserting "of Defense and the Under Secretary of Defense for Acquisition" after "Secretary" in the last sentence.

### ROTH (AND OTHERS) AMENDMENT NO. 2648

Mr. ROTH (for himself, Mr. DIXON, Mr. DENTON, Mr. HATCH, Mr. NICKLES, Mr. RIEGLE, Mr. DECONCINI, Mr. LEVIN, Mr. ZORINSKY, and Mr. D'AMATO) proposed an amendment to the bill S. 2638, supra as follows:

At the appropriate place, insert the following:

That (a) the Foreign Missions Act is amended by adding at the end thereof the following new section:

"APPLICATION TO CERTAIN COMMUNIST COUNTRIES

"SEC. 214. (a) Notwithstanding any other provision of this title, the Secretary shall apply to each foreign mission in the United States of the German Democratic Republic, Hungary, Czechoslovakia, Poland, Bulgaria, Rumania, and Cuba the same terms, limitations, restrictions, and conditions which are applied under this title to the foreign mission in the United States of the Soviet Union unless the Secretary determines and so reports to the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives that national security and foreign policy circumstances require that this section be waived in specific circumstances with respect to such country.

"(b) The Secretary shall prepare and transmit to the Select Committee on Intelligence and Committee on Foreign Relations of the Senate and the Permanent Select Committee on Intelligence and Committee on Foreign Affairs of the House of Representatives a report describing—

"(1) not later than thirty days after date of the enactment of this section, the plans of the Secretary for implementing this section; and

"(2) not later than six months thereafter, the actions taken pursuant to these plans.".

(b) Section 202(a)(4) of the Foreign Missions Act is amended—

(1) in the text above clause (A) by inserting ", including Government activities involving international trade," after "governmental activities"; and

(2) in clause (A), by inserting "or any instrumentality thereof" after "foreign government".

### ROTH (AND DIXON) AMENDMENT NO. 2649

(Ordered to lie on the table.)

Mr. ROTH (for himself and Mr. DIXON) submitted an amendment intended to be proposed by them to the bill S. 2638, supra, as follows:

At an appropriate place in the bill add the following:

SEC. .

That section 794 of title 18, United States Code, is amended—

(1) in subsection (a), by—

(A) inserting "(1)" after "(a)";

(B) striking out "any term of years or for life" and by inserting in lieu thereof "a term of 20 years to life"; and

(C) inserting at the end thereof the following:

"(2) The sentence of death may not be imposed for an offense under this subsection occurring during a period other than war or when the United States Armed Forces are engaged in hostilities outside the territory of the United States, its possessions and territories unless the jury or, if there is no jury, the court finds that the offense directly concerned—

"(A) nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large-scale attack;

"(B) war plans;

"(C) communications intelligence or cryptographic information;

"(D) sources or methods of intelligence or counterintelligence operations; or

"(E) any other major weapons system or major element of defense strategy.";

(2) in subsection (b), by—

(A) striking out "any term of years or life" and inserting in lieu thereof the following "a term of 20 years to life"; and

(3) by inserting after subsection (c) the following:

"(d)(1) A person shall be subjected to the penalty of death for the offense prohibited by this section only if a hearing is held in accordance with this subsection.

"(2)(A) If, in a case involving an offense described in this section, the attorney for the government believes that the circumstances of the offense are such that a sentence of death is justified under this subsection, he shall, at a reasonable time before the trial, or before acceptance by the court of a plea of guilty, or at such time thereafter as the court may permit upon a showing of good cause, sign and file with the court, and serve on the defendant, a notice—

"(i) stating that the government believes that the circumstances of the offense are such that, if the defendant is convicted, a sentence of death is justified under this chapter; and

"(ii) setting forth the aggravating factor or factors that the government, if the defendant is convicted, proposes to prove as justifying a sentence of death.

The court may permit the attorney for the government to amend the notice upon a showing of good cause.

"(B) If the attorney for the government has filed a notice as required under subparagraph (A) and the defendant is found guilty of an offense described in this section, the judge who presided at the trial or before whom the guilty plea was entered, or another judge if that judge is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. Prior to such a hearing, no presentence report shall be prepared by the United States Probation Service, notwithstanding the provisions of Rule 32(e) of the Federal Rules of Criminal Procedure. The hearing shall be conducted—

"(i) before the jury that determined the defendant's guilt;

"(ii) before a jury impaneled for the purpose of the hearing if—

"(I) the defendant was convicted upon a plea of guilty;

"(II) the defendant was convicted after a trial before the court sitting without a jury;

"(III) the jury that determined the defendant's guilt was discharged for good cause; or

"(IV) after initial imposition of a sentence under this section, reconsideration of the sentence under this section is necessary; or

"(iii) before the court alone, upon the motion of the defendant and with the approval of the attorney for the government.

A jury impaneled pursuant to clause (ii) shall consist of twelve members, unless, at any time before the conclusion of the hearing, the parties stipulate, with the approval of the court, that it shall consist of a lesser number.

"(C) At the hearing, information may be presented as to any matter relevant to the sentence, including any mitigating or aggravating factor permitted or required to be considered under paragraphs (3) and (4). Information presented may include the trial transcript and exhibits if the hearing is held before a jury or judge not present during the trial. Any other information relevant to a mitigating or aggravating factor may be presented by either the attorney for the government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that information may be excluded if its probative value is substantially outweighted by the danger of creating unfair prejudice, confusing the issues, or misleading the jury. The attorney for the government and the defendant shall be permitted to rebut any information received at the hearing, and shall be given fair opportunity to present argument as to the adequacy of the information to establish the existence of any aggravating or mitigating factor, and as to the appropriateness in the case of imposing a sentence of death. The attorney for the government shall open the argument. The defendant shall be permitted to reply. The attorney for the government shall then be permitted to reply in rebuttal. The burden of establishing the existence of any aggravating factor is on the government, and is not satisfied unless the existence of such a factor is established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless the existence of such a factor is established by a preponderance of the information.

"(D) The jury, or if there is no jury, the court, shall consider all the information received during the hearing. It shall return a special finding as to each mitigating and aggravating factor, concerning which information is presented at the hearing, required to be considered under paragraphs (3) and (4). The jury must find the existence of a mitigating or aggravating factor by a unanimous vote, although it is unnecessary that there be a unanimous vote on any specific mitigating or aggravating factor if a majority of the jury finds the existence of such a specific factor.

"(E) If an aggravating factor is found to exist under paragraph (4), the jury, or if there is no jury, the court, shall then consider whether all the aggravating factors found to exist sufficiently outweigh all the mitigating factors found to exist to justify a sentence of death, or, in the absence of a mitigating factor, whether the aggravating factors alone are sufficient to justify a sentence of death. Based upon this consideration, the jury by unanimous vote, or if there is no jury, the court, shall return a finding as to whether a sentence of death is justified.

"(F) In a hearing held before a jury, the court, prior to the return of a finding under subsection (e), shall instruct the jury that, in considering whether a sentence of death is justified, it shall not consider the race, color, national origin, creed, or sex of the defendant. The jury, upon return of a finding under subsection (e), shall also return to the court a certificate, signed by each juror, that consideration of the race, color, national origin, creed, or sex of the defendant was not involved in reaching the juror's individual decision.

"(3) In determining whether a sentence of death is to be imposed on the defendant, the jury, or if there is no jury, the court shall consider whether at the time of the offense—

"(A) the defendant had the capacity to appreciate the wrongfulness of his conduct;

"(B) the capacity of the defendant to conform his conduct to the requirements of law was significantly impaired, but not so impaired as to constitute a defense to the charge;

"(C) the defendant was under unusual and substantial duress, although not such duress as constitutes a defense to the charge; and

"(D) the defendant was a principal (as defined in section 2(a) of this title) in the offense, which was committed by another, but his participation was relatively minor, although not so minor as to constitute a defense to the charge.

The jury or, if there is no jury, the court, may consider whether any other mitigating factor exists.

"(4) In determining whether a sentence of death is to be imposed on the defendant, the jury, or if there is no jury, the court shall consider whether—

"(A) the defendant has been previously convicted of another offense involving espionage or treason for which either a sentence of life imprisonment or death was authorized by statute;

"(B) in the commission of the offense, the defendant knowingly created a grave risk of substantial danger to the national security; and

"(C) in the commission of the offense, the defendant knowingly created grave risk of death to another person.

The jury, or if there is no jury, the court, may consider whether any other aggravating factor exists.

"(e) The court shall not impose a sentence of death on the defendant if the jury or, if there is no jury, the court finds that at the time of the offense the defendant was under the age of eighteen.

"(f) Notwithstanding any other provision of law, the court shall not place on probation or suspend the sentence of any person convicted of a violation of this section, nor shall any term of imprisonment imposed under this section run concurrently with any other term of imprisonment. No person sentenced to a term of years under this section shall be eligible for parole during the term of imprisonment imposed.".

---

## KERRY (AND OTHERS) AMENDMENT NO. 2650

Mr. KERRY (for himself, Mr. CHAFEE, Mr. MATHIAS, Mr. SIMON, Mr. HATFIELD, Mr. STAFFORD, Mr. HART, Mr. LEAHY, Mr. CRANSTON, Mr. MITCHELL, Mr. PROXMIRE, Mr. METZENBAUM, Mr. RIEGLE, Mr. KENNEDY, Mr. BURDICK, Mr. SARBANES, Mr. HARKIN, Mr. PELL, Mr. HEINZ, and Mr. BIDEN) proposed an amendment to the bill S. 2638, supra, as follows:

On page 19, between lines 18 and 19, insert the following new section:

SEC. 206. PROHIBITION AGAINST ANTI-SATELLITE WEAPON TESTING

None of the funds are authorized in this Act to carry out a test of the Space Defense System (anti-satellite weapon) against an object in space until the President, using existing authority, certifies to Congress that the Soviet Union has conducted, after the date of the enactment of this Act, a test against an object in space of dedicated anti-satellite weapons.

---

## STEVENS AMENDMENT NO. 2651

Mr. STEVENS proposed an amendment to the bill S. 2638, supra, as follows:

On page 158 strike out line 8 and all that follows through page 181, line 18.

---

## DOMENICI AMENDMENT NO. 2652

Mr. DOMENICI proposed an amendment to the bill S. 2638, supra, as follows:

On page 335, strike out line 22 and all that follows through page 338, line 18, and insert in lieu thereof the following:

"§ 179. The Nuclear Weapons Council

"(a) There is a Joint Nuclear Weapons Council (hereinafter in this section referred to as the 'Council') composed of three members as follows:

"(1) The Director of Defense Research and Engineering.

"(2) The Vice Chairman of the Joint Chiefs of Staff.

"(3) One senior representative of the Department of Energy appointed by the Secretary of Energy.

"(b)(1) Except as provided in paragraph (2), the Chairman of the Council shall be the member appointed under subsection (a)(1).

"(2) A meeting of the Council shall be chaired by the representative appointed under subsection (a)(3) whenever the matter under consideration is within the primary responsibility or concern of the Department of Energy, as determined by majority vote of the Council.

"(c)(1) The Secretary of Defense and the Secretary of Energy shall enter into an agreement with the Council to furnish necessary staff and administrative services to the Council.

"(2) The Assistant to the Secretary of Defense for Atomic Energy shall be the Staff Director of the Council.

"(d)(1) The Council shall be responsible for the following matters:

"(A) Preparing the annual Nuclear Weapons Stockpile Memorandum.

"(B) Developing nuclear weapons stockpiles options and the cost of such options.

"(C) Coordinating programming and budget matters pertaining to nuclear weapons programs between the Department of Defense and the Department of Energy.

"(D) Identifying various options for cost-effective schedules for nuclear weapons production.

"(E) Considering safety, security, and control issues for existing weapons and for proposed new weapon program starts.

"(F) Ensuring that adequate consideration is given to design, performance, and cost tradeoffs for all proposed new nuclear weapons programs.

"(G) Providing broad guidance regarding priorities for research on nuclear weapons.

"(H) Preparing comments on annual proposals for budget levels for research on nuclear weapons and transmitting those comments to the Secretary of Defense and the Secretary of Energy before the preparation of the annual budget requests by the Secretaries of those departments.

"(I) Providing—

"(i) broad guidance regarding priorities for research on improved conventional weapons, and

"(ii) comments on annual proposals for budget levels for research on improved conventional weapons.

and transmitting such guidance and comments to the Secretary of Defense before the preparation of the annual budget request of the Department of Defense.

"(e) The Council shall submit to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives a report on the actions that have been taken by the Department of Defense and the Department of Energy to implement the recommendations of the President's Blue Ribbon Task Group on Nuclear Weapons Program Management. The Council shall include in such report its recommendations on the role and composition of the staff of the Council. The Council shall submit such report to the Committees not later than March 1, 1987.".

(f) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"179. The Nuclear Weapons Council.".

(g) Chairman of JCS To Serve on Council if There Is No Vice Chairman of JCS.—If on the date of the enactment of this section the position of Vice Chairman of the Joint Chiefs of Staff, or comparable position, has not been established by law, the Chairman of the Joint Chiefs of Staff shall be a member of the Nuclear Weapons Council established by section 179 of title 10, United States Code, as added by subsection (a). If the position of Vice Chairman of the Joint Chiefs of Staff (or comparable position) is established by law after the date of the enactment of this section, the Chairman of the Joint Chiefs of Staff shall remain a member of such Council only until an individual has been appointed Vice Chairman of the Joint Chiefs of Staff.

(h) REPEAL.—Section 26 of the Atomic Energy Act of 1946 (42 U.S.C. 2037) is repealed.

---

## KENNEDY (AND METZENBAUM) AMENDMENT NO. 2653

Mr. KENNEDY (for himself and Mr. METZENBAUM) proposed an amendment to the bill S. 2638, supra; as follows:

(1) Strike out page 186, line 15 through page 189, line 17, and page 190, line 18 through page 191, line 14.

(2) Strike out page 189, line 18, through page 190, line 17.

---

## SPECTER (AND OTHERS) AMENDMENT NO. 2654

Mr. SPECTER (for himself, Mr. HEINZ, Mr. BYRD, Mr. ROCKEFELLER, Mr. TRIBLE, Mr. DENTON, and Mr. WARNER) proposed an amendment to the bill S. 2638, supra, as follows:

On page 296, line 16, insert "(A)" after "(1)".

On page 296, between lines 20 and 21, insert the following new subparagraph:

(B) The Secretary of Defense shall take such action as may be necessary to implement, at the earliest practicable date and with funds provided for such purpose by section 8110 of the Department of Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190; 99 Stat. 1222), the program proposed by the Department of Defense in a letter dated August 30, 1985, from the Assistant Secretary of Defense for Acquisition and Logistics to rehabilitate and convert current steam generating plants at defense facilities in the United States to coal burning facilities in order to achieve a coal consumption target of 1,600,000 short tons of coal per year (including at least 300,000 short tons of anthracite coal) about current consumption levels at Department of Defense facilities in the United States by fiscal year 1994. *Provided further,* that during fiscal year 1987, the amount of anthracite coal purchased by the Department shall be at least 300,000 short tons.

---

## STEVENS AMENDMENT NOS. 2655 AND 2656

Mr. STEVENS proposed two amendments to the bill S. 2638, supra, as follows:

AMENDMENT No. 2655

On page 283 strike out line 1 and all that follows through page 288, line 15.

AMENDMENT No. 2656

None of the provisions in this Act which provide for a mandatory or discretionary increase in the pay or allowances of a member of the armed forces shall be effective except in the manner or to the extent provided for in a subsequently enacted appropriation act.

---

## DOMENICI (AND CHILES) AMENDMENT NO. 2657

Mr. DOMENICI (for himself and Mr. CHILES) proposed an amendment to the bill S, 2638, supra, as follows:

At the appropriate place in the bill, add the following new section:

SEC. . LIMITATION ON NEW SPENDING AUTHORITY

(a) In General.—Any new spending authority (as defined in section 401(c)(2) of the Congressional Budget Act of 1974) provided by—

(1) any of the sections of this Act specified in subsection (b), or

(2) any amendment made by any such section, shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

(b) Sections Specified.—The sections to which subsection (a) applies are sections 611, 625, 631, 635, 636(f), 931, 1006, 1214, 2172, 2175, and 2183 of this Act.

---

## KERRY (AND OTHERS) AMENDMENT NO. 2658

Mr. KERRY (for himself, Mr. KENNEDY, and Mr. RIEGLE) proposed an amendment which was subsequently modified, to the bill S. 2638, supra, as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . PROHIBITION AGAINST NUCLEAR WEAPON TESTING IN CONNECTION WITH THE STRATEGIC DEFENSE INITIATIVE

None of the funds in this act may be authorized to carry out, in connection with the Strategic Defense Initiative program, the test of a warhead, bomb, or other explosive device which uses fissionable material until the President certifies, using existing authority, to Congress that the Soviet Union has conducted, after the date of the enactment of this Act, a test of a warhead bomb, or other explosive device which has fissionable material.

---

## DOLE AMENDMENT NOS. 2659 THROUGH 2661

(Ordered to lie on the table.)

Mr. DOLE submitted three amendments intended to be proposed by him to the bill S. 2638, supra, as follows:

AMENDMENT No. 2659

On page 306, between lines 6 and 7, insert the following:

SEC. 2186a. STUDY OF NEEDS OF DEPENDENTS' EDUCATIONAL FACILITIES ON MILITARY INSTALLATIONS

(a) IN GENERAL.—The Secretary of Defense and the Secretary of Education shall conduct a joint study for the purpose of determining the needs for construction, extension, remodeling, and rehabilitation of dependents' educational facilities on military installations in the United States and shall develop a joint policy to meet those needs.

(b) REPORT.—(1) Not later than April 1, 1987, the Secretaries of Defense and Education shall submit to Congress a report containing—

(1) a description of the needs determined under subsection (a);

(2) the joint policy developed to meet such needs; and

(3) any recommendations for legislation the Secretaries consider necessary or appropriate to meet such needs.

AMENDMENT No. 2660

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. CORRECTIONAL FACILITIES AT FORT RILEY, KANSAS

The correctional facilities at Fort Riley, Kansas, may not be closed, transferred, or relocated unless—

(1) the Secretary of Defense has transmitted to Congress a written notice of the intent to close, transfer, or relocate such facilities, as the case may be; and

(2) the 180-day period beginning on the date on which Congress received such notice has expired.

AMENDMENT No. 2261

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. WICHITA METROPOLITAN STATISTICAL AREA

The Director of the Office of Management and Budget shall include in the area designated as the Wichita Metropolitan Statistical Area the County of Harvey, Kansas.

---

## HAWKINS (AND OTHERS) AMENDMENT NO. 2662

(Ordered to lie on the table)

Mrs. HAWKINS (for herself, Mr. DOLE, Mr. BOSCHWITZ, Mr. HARKIN, Mr. LEAHY, Mr. LUGAR, Mr. COCHRAN,

Mr. MCCONNELL, Mr. MELCHER, Mr. SIMON, Mr. DANFORTH, Mr. WILSON, Mr. ANDREWS) submitted an amendment intended to be proposed by them to the bill S. 2638, supra, as follows:

At the end of the bill at the following:

REAUTHORIZATION OF CHILD NUTRITION PROGRAMS

SEC. . SUMMER FOOD SERVICE PROGRAM FOR CHILDREN

Section 13(p) of the National School Lunch Act (42 U.S.C. 1761(p)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. . COMMODITY DISTRIBUTION PROGRAM.

Section 14(a) of the National School Lunch Act (42 U.S.C. 1762(a)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. . STATE ADMINISTRATIVE EXPENSES.

Section 7(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1776(i)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. . SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN.

Section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786) is amended—

(1) in subsection (c)(2), by striking out "Subject to" and all that follows through "1984" and inserting in lieu thereof "Subject to amounts appropriated to carry out this section under subsection (g)";

(2) in subsection (g)—

(A) by designating the first and second sentences as paragraphs (1) and (3), respectively; and

(B) by amending paragraph (1) (as so designated) to read as follows:

"(1) There are authorized to be appropriated to carry out this section $1,570,000,000 for the fiscal year ending September 30, 1986, such sums as may be necessary for each of the fiscal years ending September 30, 1987, and September 30, 1988, and $1,782,000,000 for the fiscal year ending September 30, 1989."; and

(3) in subsection (h)(2), by striking out "1984" and inserting in lieu thereof "1989".

SEC. . NUTRITION EDUCATION AND TRAINING PROGRAM.

The first sentence of section 19(j)(2) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(2)) is amended by striking out "1984" and inserting in lieu thereof "1989".

TITLE II—SCHOOL LUNCH AND BREAKFAST PROGRAMS

SEC. . BASIS OF COMMODITY ASSISTANCE.

Section 6(b) of the National School Lunch Act (42 U.S.C. 1755(b)) is amended—

(1) in the first sentence, by striking out "May 15"and inserting in lieu thereof "June 1"; and

(2) in the second sentence, by striking out "June 15' and inserting in lieu thereof "July 1".

SEC. . INCLUSION OF WHOLE MILK AS A SCHOOL LUNCH BEVERAGE.

Effective July 1, 1986, section 9(a) of the National School Lunch Act (42 U.S.C. 1758(a)) is amended—

(1) by designating the first, second, and third sentences as paragraphs (1), (3), and (4), respectively; and

(2) by inserting after paragraph (1) (as so designated) the following new paragraph:

"(2) In addition to such other forms of milk as the Secretary may determine, the lunches shall offer whole milk as a beverage.".

SEC. . AUTOMATIC ELIGIBILITY FOR CERTAIN PROGRAMS.

Effective July 1, 1986, section 9(b) of the National School Lunch Act (42 U.S.C. 1758(b)) is amended by adding at the end thereof the following new paragraph:

"(6)(A) A child shall be considered automatically eligible for a free lunch and breakfast under this Act and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.), respectively, without further application or eligibility determination, if the child is a member of—

"(i) a household receiving assistance under the food stamp program authorized under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.); or

"(ii) an AFDC assistance unit (under the aid to families with dependent children program authorized under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.)), in a State where the standard of eligibility for the assistance does not exceed 130 percent of the poverty line (as defined in section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2))).

"(B) Proof of receipt of food stamps or aid to families with dependent children shall be sufficient to satisfy any verification requirement imposed under paragraph (2)(C).".

SEC. . LIMITATION ON MEAL CONTRACTING.

Effective July 1, 1986, section 9 of the National School Lunch Act (42 U.S.C. 1758) is amended by adding at the end thereof the following new subsection:

"(e) A school or school food authority participating in a program under this Act may not contract with a food service company to provide a la carte food service unless the company agrees to offer free, reduced-price, and full-price reimbursable meals to all eligible children.".

SEC. . CHANGE IN TUITION LIMITATION FOR PRIVATE SCHOOLS.

(a) SCHOOL LUNCH PROGRAMS.—Section 12(d)(5) of the National School Lunch Act (42 U.S.C. 1760(d)(5)) is amended—

(1) in clause (A) of the first sentence, by striking out "$1,500" and inserting in lieu thereof "$2,000"; and

(2) by adding at the end thereof the following new sentence: "On July 1, 1988, and each July 1 thereafter, the Secretary shall adjust the tuition limitation amount prescribed in clause (A) of the first sentence of this paragraph to reflect changes in the Consumer Price Index for All Urban Consumers during the most recent 12-month period for which the data is available.".

(b) SCHOOL BREAKFAST PROGRAMS.—Section 15(c) of the Child Nutrition Act of 1966 (42 U.S.C. 1784(c)) is amended—

(1) in clause (A) of the first sentence, by striking out "$1,500" and inserting in lieu thereof "$2,000"; and

(2) by adding at the end thereof the following new sentence: "On July 1, 1988, and each July 1 thereafter, the Secretary shall adjust the tuition limitation amount prescribed in clause (A) of the first sentence of this paragraph to reflect changes in the Consumer Price Index for All Urban Consumers during the most recent 12-month period for which the data is available.".

(c) APPLICATION.—(1) The amendments made by subsections (a)(1) and (b)(1) shall apply for the fiscal year beginning on October 1, 1986, and each school year thereafter.

(2) The amendments made by subsections (a)(2) and (b)(2) shall apply for the school year beginning on July 1, 1988, and each school year thereafter.

SEC. . USE OF SCHOOL LUNCH FACILITIES FOR ELDERLY PROGRAMS.

Section 12 of the National School Lunch Act (42 U.S.C. 1760) is amended by adding at the end thereof the following new subsection:

"(i) Facilities, equipment, and personnel provided to a school food authority for a program authorized under this Act or the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) may be used, as determined by a local educational agency, to support a nonprofit nutrition program for the elderly, including a program funded under the Older Americans Act of 1965 (42 U.S.C. 3001 et seq.).".

SEC. . PILOT PROJECTS FOR ADMINISTRATION OF CHILD NUTRITION PROGRAMS BY CONTRACT OR DIRECT DISBURSEMENT.

(a) PILOT PROJECTS.—Section 20 of the National School Lunch Act (42 U.S.C. 1769) is amended by striking out subsection (d) and inserting in lieu thereof the following new subsection:

"(d) The Secretary may conduct pilot projects in not more than three States in which the Secretary is currently administering programs to evaluate the effects of the Secretary contracting with private profit and nonprofit organizations to act as a State agency under this Act and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) for schools, institutions, or service institutions referred to in section 10 of this Act and section 5 of the Child Nutrition Act of 1966 (42 U.S.C. 1774).".

(b) CONFORMING AMENDMENT.—The first sentence of section 20(c) of the National School Lunch Act is amended by striking out "except for the pilot projects conducted under subsection (d) of this section,".

SEC. . DEPARTMENT OF DEFENSE OVERSEAS DEPENDENTS' SCHOOLS.

(a) SCHOOL LUNCHES.—Section 22(d) of the National School Lunch Act (42 U.S.C. 1769b(d)) (as added by section 1408(a) of the Education Amendments of 1978 (92 Stat. 2368)) is amended by striking out "and for" and all that follows through "reduced-price lunch".

(b) SCHOOL BREAKFASTS.—Section 20(d) of the Child Nutrition Act of 1966 (42 U.S.C. 1789) is amended by striking out "and for" and all that follows through "reduced-price breakfast".

SEC. . RESTORATION OF CERTAIN KINDERGARTENS TO THE SPECIAL MILK PROGRAM

Effective October 1, 1986, section 3(a) of the Child Nutrition Act of 1966 (42 U.S.C. 1772(a)) is amended—

(1) in the first sentence—

(A) by inserting "(1)" after the subsection designation;

(B) by redesignating clauses (1) and (2) as subparagraphs (A) and (B), respectively; and

(C) in subparagraph (A) (as so redesignated), by inserting "except as provided in paragraph (2)," after "and under,";

(2) by designating the second through eighth sentences as paragraphs (3) through (9), respectively; and

(3) by inserting after paragraph (1) (as so designed) the following new paragraph:

"(2) The limitation imposed under paragraph (1)(A) for participation of nonprofit schools in the special milk program shall not apply to split-session kindergarten programs conducted in schools in which children do not have access to the meal service program operating in schools the children attend as authorized under this Act or the

National School Lunch Act (42 U.S.C. 1751 et seq.).".

SEC. 210. IMPROVEMENT OF BREAKFAST PROGRAM MEAL PATTERN.

(a) ADDITIONAL ASSISTANCE.—Effective October 1, 1986, section 4(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1773(b)) is amended by adding at the end thereof the following new paragraphs:

"(3) The Secretary shall increase by 3 cent the annually adjusted payment for each breakfast served under this Act and section 17 of the National School Lunch Act (42 U.S.C. 1766). These funds shall be used to assist States, to the extent feasible, in improving the nutritional quality of the breakfasts.

"(4) Notwithstanding any other provisions of law, whenever stocks of agricultural commodities are acquired by the Secretary or the Commodity Credit Corporation and are not likely to be sold by the Secretary or the Commodity Credit Corporation or otherwise used in programs of commodity sale or distribution, the Secretary shall make such commodities available to school food authorities and eligible institutions serving breakfasts under this Act in a quantity equal in value to not less than 3 cents for each breakfast served under this Act and section 17 of the National School Lunch Act.

"(5) Expenditures of funds from State and local sources for the maintenance of the breakfast program shall not be diminished as a result of funds or commodities received under paragraph (3) or (4).".

(b) NUTRITION REQUIREMENTS.—(1) The Secretary of Agriculture shall review and revise the nutrition requirements for meals served under the breakfast program authorized under the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) and section 17 of the National School Lunch Act (42 U.S.C. 1766) to improve the nutritional quality of the meals, taking into consideration both the findings of the National Evaluation of School Nutrition Programs and the need to provide increased flexibility in meal planning to local food authorities.

(2) Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall promulgate regulations to implement the revisions.

SEC. . EXTENSION OF OFFER VERSUS SERVE PROVISION TO THE SCHOOL BREAKFAST PROGRAM.

Section 4(e) of the Child Nutrition Act of 1966 (42 U.S.C. 1773(e)) is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end thereof the following new paragraph:

"(2) At the option of a local school food authority, a student in a school under the authority that participates in the school breakfast program under this Act may be allowed to refuse not more than one item of a breakfast that the student does not intend to consume. A refusal of an offered food item shall not affect the full charge to the student for a breakfast meeting the requirements of this section or the amount of payments made under this Act to a school for the breakfast.".

SEC. . STAFFING STANDARDS.

Section 7 of the Child Nutrition Act of 1966 (42 U.S.C. 1776) (as amended by section 103) is further amended—

(1) by striking out subsection (b); and

(2) by redesignating subsections (c) through (i) as subsections (b) through (h), respectively.

TITLE III—SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN

SEC. . COSTS FOR NUTRITION SERVICES AND ADMINISTRATION.

(a) DEFINITIONS.—Section 17(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(b)) is amended—

(1) by striking out paragraph (1);

(2) by redesignating paragraphs (2), (3), and (4) as paragraphs (1), (2), and (3), respectively; and

(3) by inserting after paragraph (3) (as so redesignated) the following new paragraph:

"(4) 'Costs for nutrition services and administration' means costs that shall include, but not be limited to, costs for certification of eligibility of persons for participation in the program (including centrifuges, measuring boards, spectrophotometers, and scales used for the certification), food delivery, monitoring, nutrition education, outreach, startup costs, and general administration applicable to implementation of the program under this section, such as the cost of staff, transportation, insurance, developing and printing food instruments, and administration of State and local agency offices.".

(b) CONFORMING AMENDMENTS.—Section 17 of such Act is amended—

(1) by striking out "administrative funds" each place it appears in subsections (f)(11), (h)(2), (h)(3), and (h)(4) and inserting in lieu thereof "funds for nutrition services and administration"; and

(2) by striking out "administrative costs" each place it appears in subsection (h) and inserting in lieu thereof "costs for nutrition services and administration".

SEC. . STATE ELIGIBILITY FOR WIC FUNDS.

(a) ELIGIBILITY.—Section 17(c) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(c)) is amended by adding at the end thereof the following new paragraph:

"(4) A State shall be ineligible to participate in programs authorized under this section if the Secretary determines that State or local sales taxes are collected within the State on purchases of food made to carry out this section.".

(b) APPLICATION.—The amendment made by subsection (a) shall apply to a State beginning with the fiscal year that commences after the end of the first regular session of the State legislature following the date of the enactment of this Act.

SEC. . PARTICIPATION REPORT.

(a) BIENNIAL REPORT.—Section 17(d) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(d)) is amended by adding at the end thereof the following new paragraph:

"(4) The Secretary shall report biennially to Congress on—

"(A) the income and nutritional risk characteristics of participants in the program;

"(B) participation in the program by members of families of migrant farmworkers; and

"(C) such other matters relating to participation in the program as the Secretary considers appropriate.".

(b) USE OF EVALUATION FUNDS FOR REPORT.—Section 17(g)(3) of such Act (as amended by section 104(2)(A)) is further amended by inserting "preparing the report required under subsection (d)(4)," after "health benefits,".

SEC. . PLAN OF OPERATION AND ADMINISTRATION.

(a) PLAN.—Paragraph (1) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(1)) is amended to read as follows:

"(1)(A) Each State agency shall submit annually to the Secretary, by a date specified by the Secretary, a plan of operation and administration for a fiscal year.

"(B) To be eligible to receive funds under this section for a fiscal year, a State agency must receive the approval of the Secretary for the plan submitted for the fiscal year.

"(C) The plan shall include—

"(i) a description of the food delivery system of the State agency and the method of enabling participants to receive supplemental foods under the program, to be administered in accordance with standards developed by the Secretary;

"(ii) a description of the financial management system of the State agency;

"(iii) a plan to coordinate operations under the program with special counseling services, such as the expanded food and nutrition education program, immunization programs, prenatal care, well-child care, family planning, alcohol and drug abuse counseling, child abuse counseling, and with the aid to families with dependent children, food stamp, and maternal and child health care programs;

"(iv) a plan to provide program benefits under this section to, and to meet the special nutrition education needs of, eligible migrants and Indians;

"(v) a plan to expend funds to carry out the program during the relevant fiscal year;

"(vi) a plan to provide program benefits under this section to unserved and underserved areas in the State, if sufficient funds are available to carry out this clause;

"(vii) a plan to provide program benefits under this section to eligible persons most in need of the benefits and to enroll eligible women in the early months of pregnancy, to the maximum extent practicable; and

"(viii) such other information as the Secretary may require.

"(D) The Secretary may permit a State agency to submit only those parts of a plan that differ from plans submitted for previous fiscal years.

"(E) The Secretary may not approve any plan that permits a person to participate simultaneously in both the program authorized under this section and the commodity supplemental food program authorized under sections 4 and 5 of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note).".

(b) APPLICATION.—The amendment made by subsection (a) shall apply to a plan submitted by a State agency under section 17(f)(1) of the Child Nutrition Act of 1966 for the fiscal year ending September 30, 1987, and each fiscal year thereafter.

SEC. . PUBLIC COMMENT.

Paragraph (2) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(2)) is amended to read as follows:

"(2) A State agency shall establish a procedure under which members of the general public are provided an opportunity to comment on the development of the State agency plan.".

SEC. . AVAILABILITY OF PROGRAM BENEFITS.

Paragraph (8) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(8)) is amended to reas as follows:

"(8)(A) The State agency shall, in cooperation with participating local agencies, publicly announce and distribute information on the availability of program benefits (including the eligibility criteria for participation and the location of local agencies operating the program) to offices and organizations that deal with significant numbers of potentially eligible persons (including health and medical organizations, hospitals

and clinics, welfare and unemployment offices, social service agencies, farmworker organizations, Indian tribal organizations, and religious and community organizations in low income areas).

"(B) The information shall be publicly announced by the State agency and by local agencies at least annually.

"(C) The State agency and local agencies shall distribute the information in a manner designed to provide the information to potentially eligible persons who are most in need of the benefits, including pregnant women in the early months of pregnancy.".

SEC. . REPAYMENT OF CERTAIN BENEFITS BY RECIPIENTS.

Effective October 1, 1986, section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)) is amended by adding at the end thereof the following new paragraph:

"(15) If a State agency determines that a member of a family has received an overissuance of food benefits under the program authorized by this section as the result of such member intentionally making a false or misleading statement or intentionally misrepresenting, concealing, or withholding facts, the State agency shall recover, in cash, from such member an amount that the State agency determines is equal to the value of the overissued food benefits, unless the State agency determines that the recovery of the benefits would not be cost effective.".

SEC. . PRIORITY FUNDS FOR WIC MIGRANT PROGRAMS.

(a) PRIORITY FUNDING.—Effective October 1, 1986, section 17(g) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(g)) (as amended by section 104(2)(A)) is further amended by inserting after paragraph (1) the following new paragraph:

"(2) Of the sums appropriated for any fiscal year for programs authorized under this section, not less than nine-tenths of 1 percent shall be available first for services to eligible members of migrant populations. The migrant services shall be provided in a manner consistent with the priority system of a State for program participation.".

(b) ACCOUNTABILITY.—To the extent possible, accountability for migrant services under section 17(g)(2) of the Child Nutrition Act of 1966 (as added by subsection (a)) shall be conducted under regulations in effect on the date of the enactment of this Act.

SEC. . IMPROVING STATE AGENCY ADMINISTRATIVE SYSTEMS.

Section 17(g)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(g)(3)) (as amended by sections 104(2)(A) and 303(b)) is further amended by inserting "providing technical assistance to improve State agency administrative systems, after "subsection (d)(4),".

SEC. . PAPERWORK REDUCTION.

Section 17(h)(1) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(1)) is amended by adding at the end thereof the following new sentence: "The Secretary shall limit to a minimal level any documentation required under the preceding sentence.".

SEC. . ALLOCATION STANDARDS.

Section 17(h)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(3)) is amended—

(1) in the second sentence, by striking out ", which satisfy allocation guidelines established by the Secretary"; and

(2) by striking out the last sentence.

SEC. . ADVANCE PAYMENTS.

Effective October 1, 1986, section 17(h)(4) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(4)) is amended by striking out "shall" and inserting in lieu thereof "may".

SEC. . AVAILABILITY OF FUNDS.

(a) AVAILABILITY.—Section 17(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(i)) is amended—

(1) by designating the first, second, third, fourth, and fifth sentences as paragraphs (1), (2), (4), (5), and (6), respectively; and

(2) by inserting after paragraph (2) (as so designated) the following new paragraph:

"(3)(A) Notwithstanding paragraph (2)—

"(i) not more than 1 percent of the amount of funds allocated to a State agency under this section for supplemental foods for a fiscal year may be expended by the State agency for expenses incurred under this section for supplemental foods during the preceding fiscal year; or

"(ii) not more than 1 percent of the amount of funds allocated to a State agency for a fiscal year under this section may be expended by the State agency during the subsequent fiscal year.

"(B) Any funds made available to a State agency in accordance with subparagraph (A)(ii) for a fiscal year shall not affect the amount of funds allocated to the State agency for such year.".

(b) APPLICATION.—Section 17(i)(3)(A)(i) of the Child Nutrition Act of 1966 (as amended by subsection (a)) shall not apply to appropriations made before the date of enactment of this Act.

## TITLE IV—OTHER NUTRITION PROGRAMS

SEC. . HEARINGS ON FEDERAL AUDIT ACTIONS UNDER THE CHILD CARE FOOD PROGRAM.

Section 17(e) of the National School Lunch Act (42 U.S.C. 1766(e)) is amended—

(1) by striking out "The" and inserting in lieu thereof "(1) Except as provided in paragraph (2), the"; and

(2) by adding at the end thereof the following new paragraphs:

"(2) A State is not required to provide a hearing to an institution concerning a State action taken on the basis of a Federal audit determination.

"(3) If a State does not provide a hearing to an institution concerning a State action taken on the basis of a Federal audit determination, the Secretary, on request, shall afford a hearing to the institution concerning the action.".

SEC. 402. BASIS FOR NUTRITION EDUCATION GRANTS.

Section 19(j)(2) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(2)) is amended by striking out "$75,000" each place it appears and inserting in lieu thereof "$50,000".

SEC. . EXTENSION OF ALTERNATIVE MEANS OF ASSISTANCE.

Section 14 of the National School Lunch Act (42 U.S.C. 1762a) is amended by adding at the end thereof the following new subsection:

"(g)(1) As used in this subsection, the term 'eligible school district' has the same meaning given such term in section 1581(a) of the Food Security Act of 1985.

"(2) In accordance with the terms and conditions of section 1581 of such Act, the Secretary shall permit an eligible school district to continue to receive assistance in the form of cash or commodity letters of credit assistance, in lieu of commodities, to carry out the school lunch program operated in the district.

"(3)(A) On request of a participating school district (and after consultation with the Comptroller General of the United States with respect to accounting procedures used to determine any losses) and subject to the availability of funds, the Secretary shall provide cash compensation to an eligible school district for losses sustained by the district as a result of the alteration of the methodology used to conduct the study referred to in section 1581(a) of such Act during the school year ending June 30, 1983.

"(B) There are authorized to be appropriated $50,000 to carry out this paragraph, to be available without fiscal year limitation.".

SEC. . NATIONAL DONATED COMMODITY PROCESSING PROGRAMS.

In accordance with the terms and conditions of section 1114(a)(2) of the Agriculture and Food Act of 1981 (7 U.S.C. 1431e(a)(2)), whenever a commodity is made available without charge or credit under any nutrition program administered by the Secretary of Agriculture, the Secretary shall encourage consumption of the commodity through agreements with private companies under which the commodity is reprocessed into end-food products for use by eligible recipient agencies.

## TITLE V—TECHNICAL CORRECTIONS

SEC. . OBSOLETE PROVISIONS.

(a) NUTRITION PROGRAM STAFF STUDY; TRUST TERRITORY APPROPRIATIONS.—(1) Sections 18 and 19 of the National School Lunch Act (42 U.S.C. 1767 and 1768) are repealed.

(2) The first sentence of section 3 of such Act (42 U.S.C. 1752) is amended by striking out "sections 13, 17, and 19" and inserting in lieu thereof "sections 13 and 17"

(b) STUDY OF MENU CHOICE.—Section 22 of such Act (42 U.S.C. 1769c) (as added by section 9 of the Child Nutrition Amendments of 1978 (92 Stat. 3623)) is repealed.

(c) CONFORMING AMENDMENTS.—(1) The National School Lunch Act (as amended by sections 207 and 208(a) and subsection (b)) is further amended by redesignating sections 20, 21, and 22 (42 U.S.C. 1769, 1769a, and 1769b) as sections 18, 19, and 20, respectively.

(2) Clause (3) of the first sentence of section 6(a) of such Act (42 U.S.C. 1755(a)) is amended by striking out "section 20" and inserting in lieu thereof "section 18".

SEC. . OBSOLETE REFERENCES TO HEALTH, EDUCATION, AND WELFARE.

(a) REFERENCES IN NATIONAL SCHOOL LUNCH ACT.—Clause (1) of the sixth sentence of section 17(a) of the National School Lunch Act (42 U.S.C. 1766(a)) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(b) REFERENCES IN CHILD NUTRITION ACT OF 1966.—(1) The Child Nutrition Act of 1966 is amended by striking out "Health, Education, and Welfare" each place it appears in section 4(a) (42 U.S.C. 1773(a)), subsections (b)(6), (b)(13), (e)(2), (k)(1), and (k)(2) of section 17 (42 U.S.C. 1786), and subsections (d)(2) and (d)(3) of section 19 (42 U.S.C. 1788) and inserting in lieu thereof "Health and Human Services".

(2) Section 19(j)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(3)) is amended by striking out "Office of Education of the Department of Health, Education, and Welfare" and inserting in lieu thereof "Department of Education".

SEC. . CONFORMING AMENDMENTS.

(a) DEFINITION OF SECRETARY.—Section 12(d) of the National School Lunch Act (42 U.S.C. 1760(d)) is amended by adding at the end thereof the following new paragraph:

"(8) 'Secretary' means the Secretary of Agriculture.".

(b) REDESIGNATION OF SUBSECTION.—Section 19 of the Child Nutrition Act of 1966 (42 U.S.C. 1788) (as amended by sections 105, 402, and 502(b)(2)) is further amended by redesignating subsection (j) as subsection (i).

---

## McCLURE (AND OTHERS) AMENDMENT NO. 2663

Mr. McCLURE (for himself, Mr. WARNER, Mr. BINGAMAN, Mr. BENTSEN, Mr. STEVENS, Mr. DOMENICI, Mr. DECONCINI, Mr. LAXALT, Mr. BAUCUS, Mr. EXON, Mr. GARN, Mr. MELCHER, and Mr. SYMMS) proposed an amendment to the bill S. 2638, supra; as follows:

Strike Title XI and insert in lieu thereof the folowing:

### TITLE XI—NATIONAL DEFENSE STOCKPILE

SECTION 1101. SHORT TITLE.

This Act may be cited as the "Strategic and Critical Materials Stock Piling Amendments Act of 1986".

SEC. 1102. STOCKPILE REQUIREMENTS.

(a) PURPOSE OF STOCKPILE.—Section 2 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98a) is amended by adding at the end the following new subsection:

"(c) It is the intent of Congress—

"(1) that the National Defense Stockpile be used to serve the interest of national defense only and not be used for economic or budgetary purposes; and

"(2) that the quantities of materials stockpiled under this Act should be sufficient to sustain the United States for a period of not less than three years in the event of a national emergency.".

(b) ESTABLISHMENT OF STOCKPILE REQUIREMENTS BY LAW.—Section 3 of such Act (50 U.S.C. 98b) is amended to read as follows:

"ESTABLISHMENT BY LAW OF STOCKPILE REQUIREMENTS

"SEC. 3. (a) The materials that are stratetic and critical materials for the purposes of this Act, and the quality and quantity of each such material to be acquired for the purposes of this Act and the form in which each such material shall be acquired and stored, shall be established by law.

"(b) Such materials when acquired, together with the other materials described in section 1104, shall constitute and be collectively known as the National Defense Stockpile (hereinafter in this Act referred to as the 'stockpile').

"(c) Determinations under subsection (a) shall be known as 'stockpile requirements'."

(c) INITIAL LEVEL OF STOCKPILE REQUIREMENTS.—The determinations in effect as of October 1, 1984, under section 3(a) of the Strategic and Critical Materials Stock Piling Act shall be the stockpile requirements for the purposes of such section, as amended by this Act, until otherwise provided by law.

SEC. 1103. TRANSFER OF CERTAIN STOCKPILE FUNCTIONS TO THE SECRETARY OF DEFENSE.

(a) IN GENERAL.—Sections 5, 6, 10, and 11 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98d, 98e, 98h-1, 98h-2) are amendment by striking out "President" each place it appears and inserting in lieu thereof "Secretary".

(b) DEFINITION OF SECRETARY.—Section 12 of such Act (50 U.S.C. 98h-3) is amended by adding at the end the following new paragraph:

"(3) The term 'Secretary' means the Secretary of Defense.".

(c) TECHNICAL AMENDMENT.—Section 11(b) of such Act (50 U.S.C. 98h-1) is amended by striking out "each year" and all that follows through "the next fiscal year" and inserting in lieu thereof "each year, at the time that the Budget is submitted to Congress pursuant to section 1105 of title 31, United States Code, for the next fiscal year,".

SEC. 1104. ANNUAL RECOMMENDATION OF STOCKPILE REQUIREMENTS BY SECRETARY OF DEFENSE.

The Strategic and Critical Materials Stock Piling Act is amended by adding at the end the following new section:

"ANNUAL RECOMMENDATIONS BY SECRETARY OF DEFENSE

"SEC. 14. (a) IN GENERAL.—In order to assist Congress in establishing stockpile requirements under secton 1103, the Secretary shall submit to Congress an annual report on stockpile requirements. Each such report shall be submitted with the annual report submitted under section 11(b) and shall include—

"(1) the Secretary's recommendations with respect to stockpile requirements; and

"(2) the matters required under subsections (b) through (e).

"(b) NATIONAL EMERGENCY PLANNING ASSUMPTIONS.—Each report under this section shall set forth the national emergency planning assumptions used in determining the stockpile requirements recommended by the Secretary. Assumptions to be set forth include assumptions relating to each of the following:

"(1) Length and intensity of the assumed emergency.

"(2) The military force structure to be mobilized.

"(3) Losses from enemy action.

"(4) Military, industrial, and essential civilian requirements to support the national emergency.

"(5) The availability of supplies of strategic and critical materials from foreign sources, taking into consideration possible shipping losses.

"(6) Domestic production of strategic and critical materials.

"(7) Civilian austerity measures.

"(c) CONSIDERATION OF MATERIALS BASED ON NET IMPORT RELIANCE.—

"(1) IN GENERAL.—In determining the materials to be recommended to Congress under subsection (a)(1) as strategic and critical materials (and the quantity and quality of such materials to be recommended), the Secretary shall consider—

"(A) whether each of the materials determined under paragraph (3) should be recommended as a strategic and critical material; and

"(B) in the case of any such material, whether the quantity determined under paragraph (5) with respect to such material is the appropriate quantity of such material to be established by Congress as the stockpile requirement for that material.

"(2) MATTERS TO BE INCLUDED IN REPORT.—In each report under this section, the Secretary shall identify—

"(A) each material determined under paragraph (3); and

"(B) the quantity determined under paragraph (5) with respect to each such material.

"(3) MATERIALS TO BE IDENTIFIED.—The Secretary shall identify each material that the Secretary determines is necessary for the security of the United States, essential to the economy of the United States, and obtained from foreign sources.

"(4) CLASSIFICATION OF MATERIALS BASED ON NET IMPORT RELIANCE.—Each of the materials identified under paragraph (3) shall be classified by the Secretary for the purposes of this section as follows:

"(A) CLASS A MATERIALS.—A material shall be classified as a class A material if—

"(i) the material is not produced in the United States or is produced in the United States in limited quantities; and

"(ii) the net import reliance of the United States for the material is greater than or equal to 65 percent.

"(B) CLASS B MATERIALS.—A material shall be classified as a class B material if—

"(i) the material is produced in the United States but is not available in sufficient quantities in the United States; and

"(ii) the net import reliance of the United States for the material is greater than or equal to 30 percent but less than 65 percent.

"(C) CLASS C MATERIALS.—A material shall be classified as a class C material if—

"(i) the material is produced in substantial quantities in the United States; and

"(ii) the net import reliance of the United States for the material is less than 30 percent.

"(5) QUANTITY TO BE DETERMINED.—For each material identified under paragraph (3), the Secretary shall determine the following:

"(A) CLASS A MATERIALS.—In the case of a material classified under paragraph (4) as a class A material, the Secretary shall determine the quantity of such material equal to three years' net imports of such material.

"(B) CLASS B MATERIALS.—In the case of a material classified under paragraph (4) as a class B material, the Secretary shall determine the quantity of such material equal to two years' net imports of such material.

"(C) CLASS C MATERIALS.—In the case of a material classified under paragraph (4) as a class C material, the Secretary shall determine the quantity of such material equal to one year's net imports of such material.

"(6) DETERMINATION OF NET IMPORTS.—For purposes of paragraph (5), a year's net imports of a material is the quantity of the material equal to the amount by which—

"(A) the sum of—

"(i) the average annual imports of such material into the United States during the base period; and

"(ii) the average annual shipment of such material from the stockpile as excess material during the base period; exceeds

"(B) the average annual exports of such material from the United States during the base period.

"(7) BASE PERIOD DEFINED.—For purposes of paragraph (6), the term 'base period' means the most recent period of five calendar years for which data is available.

"(d) EFFECT OF ESTABLISHING STOCKPILE REQUIREMENTS IN ACCORDANCE WITH DETERMINATIONS UNDER SUBSECTION (c).—The Secretary shall include in each report under this section an analysis of the effect (including the cost and the impact on world markets) of establishing the stockpile requirements in accordance with the materials, and the quantities of materials, identified under subsection (c).

"(e) DIFFERENCES BETWEEN RECOMMENDATIONS AND NET IMPORT RESULTS.—When the stockpile requirements recommended by the Secretary in a report under this section differ from the materials and quantities that are identified under subsection (c), the

Secretary shall also include in the report a detailed explanation for such differences, including—

"(1) a description of the assumptions used to determine the recommended stockpile requirements; and

"(2) a detailed analysis supporting the recommended quantity and quality for each material recommended as a strategic and critical material.

"(f) PERIODIC REVIEW.—The Secretary shall conduct a detailed review of the stockpile requirement for each strategic and critical material at least once every five years. If the Secretary determines at any time that the stockpile requirement for a material should be revised, the Secretary shall submit to Congress a report that—

"(1) notifies Congress of that determination;

"(2) sets forth the Secretary's recommended stockpile requirement for that material; and

"(3) sets forth the assumptions used by the Secretary in determining that recommended requirement.".

SEC. 1105. STOCKPILE MANAGEMENT.

The Strategic and Critical Materials Stock Piling Act is amended by adding after section 14 (as added by section 1104) the following new sections:

"INTERAGENCY AGREEMENTS

"SEC. 15. (a) AUTHORITY TO ENTER INTO AGREEMENTS.—The Secretary may enter into an interagency agreement with the head of any other department or agency for the performance of functions of the Secretary relating to section 1106.

"(b) REIMBURSEMENT.—The Secretary shall reimburse the head of any such agency for expenses incurred by that agency in the administration of functions relating to the stockpile assigned to that agency by the Secretary under such an interagency agreement.

"APPROPRIATIONS TO BE MADE TO DEPARTMENT OF DEFENSE

"SEC. 16. Appropriations for the operation and management of the stockpile and for deposit to the National Defense Stockpile Transaction Fund shall be made as part of appropriations made to the Department of Defense for the military functions of the Department.".

SEC. 1106. EXTENSION OF USES OF STOCKPILE TRANSACTION FUND AND CODIFICATION OF REVOLVING FUND PROVISIONS.

(a) IN GENERAL.—Section 9(b) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h(b)) is amended—

(1) by striking out the second sentence of paragraph (1); and

(2) by striking out paragraphs (2) and (3) and inserting in lieu thereof the following:

"(2) Subject to section 5(a)(1), moneys covered into the fund under paragraph (1) are hereby made available (subject to such limitations as may be provided in appropriation Acts) for—

"(A) the acquisition of strategic and critical materials under section 6(a)(1);

"(B) transportation, storage, and other incidental expenses related to such acquisition;

"(C) development of current specifications of stockpile materials and the upgrading of existing stockpile materials to meet current specifications (including transportation related to such upgrading);

"(D) testing and quality studies of stockpile materials; and

"(E) other reasonable requirements for management of the stockpile.

"(3) Moneys in the fund shall remain available until expended.".

(b) CONFORMING AMENDMENT.—Section 110 of Public Law 97-377 (96 Stat. 1911) is amended by striking out "Notwithstanding" and all that follows through "That during" and inserting in lieu thereof "during".

(c) APPLICABILITY OF AMENDMENTS.—The amendments made by subsection (a) apply with respect to funds covered into the National Defense Stockpile Fund before, on, or after the date of the enactment of this Act.

SEC. 1107. MISCELLANEOUS TECHNICAL AMENDMENTS.

(a) TECHNICAL AMENDMENTS.—Section 4(a) of Strategic and Critical Materials Stock Piling such Act (50 U.S.C. 98c(a)) is amended—

(1) by striking out "on the day before the date of the date of the enactment of the Strategic and Critical Materials Stock Piling Revision Act of 1979" in paragraphs (1) and (3) and inserting in lieu thereof "on July 29, 1979", and

(2) by striking out "on or after the date of the enactment of the Strategic and Critical Materials Stock Piling Revision Act of 1979" in paragraph (2) and inserting in lieu thereof "after July 29, 1979".

(b) CLARIFYING AMENDMENT.—Section 6(a)(3) of such Act (50 U.S.C. 98e(a)(3)) is amended by striking out "the form most" and inserting in lieu thereof "a form more".

---

## THURMOND AMENDMENT NO. 2664

Mr. THURMOND proposed an amendment to the bill S. 2638, supra, as follows:

On page 317, after line 22, insert the following new section:

SEC. 2192. LEASE OF PROPERTY AT THE NAVAL WEAPONS STATION, CHARLESTON, SOUTH CAROLINA.

(a) IN GENERAL.—The Secretary of the Navy is authorized to lease to the South Carolina Ports Authority approximately 118 acres of land, together with improvements thereon, at the Naval Weapons Station, Charleston, South Carolina.

(b) TERM OF LEASE.—The lease entered into under subsection (a) may be for such term as the Secretary determines appropriate, but in no event to exceed 25 years.

(c) CONSIDERATION.—In addition to the fair rental value to be paid by the South Carolina Ports Authority for the premises leased pursuant to this section, such Authority shall pay for the cost of replacing certain facilities on the leased premises. The replacement facilities shall be constructed in a manner and at a site determined by the Secretary.

(d) AUTHORITY TO DEMOLISH AND CONSTRUCT FACILITIES.—The Secretary may, under the terms of the lease, authorize the South Carolina Ports Authority to demolish existing facilities on the leased land and to construct new facilities on such land for the use of such Authority.

---

## PROXMIRE AMENDMENT NO. 2665

Mr. PROXMIRE proposed an amendment to the bill S. 2638, supra, as follows:

On page 19, between lines 18 and 19, insert the following new section:

SEC. 206. REPORT ON PROJECTED COSTS OF SDI PROGRAM.

Subsection (b) of section 223 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 613), is amended to read as follows:

At the end of subsection (b) add the following:

"(c) The Secretary shall specifically include in such report the following information:

"(1) The cost goals or cost objectives for the production and deployment of a Strategic Defense Initiative System determined on the basis of capabilities expected to be developed in the future and the cost goals or cost objectives for the individual components of such system (determined on the basis of capabilities expected to be developed in the future).

"(2) The estimated cost for the production and deployment of the Strategic Defense Initiative System referred to in subparagraph (1) and determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report and the estimated cost for the production and deployment of the individual components of such system (determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report)."

---

## HUMPHREY AMENDMENT NOS. 2666 AND 2667

Mr. HUMPHREY proposed two amendments to the bill S. 2638, supra, as follows:

AMENDMENT No. 2666

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. SUBMARINE OVERHAUL STUDY.

The Secretary of the Navy shall conduct a detail study and investigation on the desirability and feasibility of applying production line techniques for the overhaul of Los Angeles class submarines. The Secretary shall submit the results of such study and investigation, together with such comments and recommendations as he determines appropriate, to Congress not later than May 1, 1987.

---

AMENDMENT No. 2667

On page 23, between lines 16 and 17, insert the following:

(e) AVAILABILITY OF FUNDS.—Amounts appropriated pursuant to the authorization in subsection (a) shall remain available until expended, to the extent provided in appropriation Acts.

---

## DOLE (AND KASSEBAUM) AMENDMENT NO. 2668

Mr. DOLE (for himself and Mrs. KASSEBAUM) proposed an amendment to the bill S. 2638, supra, as follows:

On page 306, between lines 6 and 7, insert the following:

SEC. 218a. STUDY OF NEEDS OF DEPENDENTS' EDUCATIONAL FACILITIES ON MILITARY INSTALLATIONS.

(A) IN GENERAL.—The Secretary of Defense and the Secretary of Education shall conduct a joint study for the purpose of determining the needs for construction, extension, remodeling, and rehabilitation of dependents' educational facilities on military

installations in the United States and shall develop a joint policy to meet those needs.

(b) REPORT.—(1) Not later than April 1, 1987, the Secretaries of Defense and Education shall submit to Congress a report containing—

(1) a description of the needs determined under subsection (a);

(2) the joint policy developed to meet such needs; and

(3) any recommendations for legislation the Secretaries consider necessary or appropriate to meet such needs.

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. CORRECTIONAL FACILITIES AT FORT RILEY, KANSAS.

The correctional facilities at Fort Riley, Kansas, may not be closed, transferred, or relocated unless—

(1) the Secretary of Defense has transmitted to Congress a written notice of the intent to close, transfer, or relocate such facilities, as the case may be; and

(2) the 180-day period beginning on the date on which Congress received such notice has expired.

---

## WILSON AMENDMENT NO. 2669

Mr. WILSON proposed an amendment, which was subsequently modified, to the bill S. 2638, supra, as follows:

On page 19, between lines 18 and 19, insert the following:

SEC. 206. SMALL INTERCONTINENTAL BALLISTIC MISSILE.

None of the funds appropriated pursuant to an authorization contained in this Act may be obligated or expended in connection with the full-scale engineering development of the small mobile intercontinental ballistic missile or the hard mobile launcher for such missile or for the deployment of more than 50 MX missiles until the Secretary of Defense has certified to the Committees on Armed Services of the Senate and the House of Representatives that the small mobile intercontinental ballistic missile system, including the associated basing mode, and the second deployed 50 MX missile is cost effective on the margin and is survivable against a responsive threat.

---

## WILSON AMENDMENT NO. 2670

Mr. WILSON proposed an amendment to amendment No. 2670 proposed by him to the bill S. 2638, supra, as follows:

Strike out all after the word "missile" on line 3 and insert in lieu thereof the following: "program".

None of the funds appropriated pursuant to an authorization contained in this Act may be obligated or expended in connection with the full-scale engineering development of the small mobile intercontinental ballistic missile or the hard mobile launcher for such missile or for the deployment of the second 50 MX missiles until the Secretary of Defense has certified in writing to the Committee on Armed Services of the Senate and the House of Representatives that the small mobile intercontinental ballistic missile system, including the associated basing mode, and that the deployment of the second 50 MX missiles are effective on the margin and is survivable against a responsive threat. If such certification is not submitted by March 1, 1987, the Security shall submit a report of such Committees explaining why.

---

## GLENN AMENDMENT NO. 2671

Mr. GLENN proposed an amendment to the bill S. 2638, supra, as follows:

On page 19, between lines 18 and 19, insert the following new section:

SEC. . PROHIBITION AGAINST CERTAIN CONTRACTS.

(a) IN GENERAL.—Funds appropriated pursuant to an authorization contained in this or any other Act to or for the use of the Department of Defense may not be used for the purpose of entering into or carrying out any contract with any foreign government or any foreign firm if the contract is to provide for the conduct of research, development, test, or evaluation in connection with the Strategic Defense Initiative program unless the Secretary of Defense certifies to the Congress in writing that the work to be performed under the contract cannot be reasonably performed by a United States firm.

(b) EXCEPTIONS.—The prohibition in subsection (a) does not apply to—

(1) funds used to carry out any contract entered into before the date of the enactment of this Act; or

(2) fund appropriated specifically for research, development, test, or evaluation in connection with antitactical ballistic missile systems.

(b) DEFINITION.—As used in subsection (a), the term "foreign firm" means a business entity owned or controlled by one or more foreign nationals or a business entity in which more than 50 percent of the stock is owned or controlled by one or more foreign nationals.

# ADDITIONAL STATEMENTS

---

## HOW SOUTH AFRICA CIRCUMVENTS THE ARMS EMBARGO

● Mr. KENNEDY. Mr. President, the Senate is about to debate legislation that would impose additional economic sanctions against South Africa. As we begin that debate, it is important to understand the ways in which South Africa has attempted—frequently with success—to circumvent already existing sanctions that prohibit the sale or export of arms and munitions to South African military forces.

In an extraordinary analysis of the history of the arms embargo against South Africa, Thomas Conrad has described the ways in which the South African authorities have successfully obtained technology and weaponry from U.S. corporations, thereby avoiding the embargo. In an article that appeared in the March issue of the Bulletin of Atomic Scientists, Mr. Conrad cites a series of examples, including South Africa's acquisition of a nuclear-capable howitzer, a laser rangefinder, a new family of grenade launchers, a new series of mine-resistant counter-insurgency vehicles, and new sonar electronics systems. Mr. Conrad concludes:

Direct sales to South African weapons manufacturers have persisted despite the U.N. embargo. Direct exports to ARMSCOR (the South African State-owned arms conglomerate) are now prohibited under U.S. regulations but the South Africans have apparently been able to keep the supply lines open.

One of the loopholes in the arms embargo is to be found in the licensing process. Certain items on the State Department's munitions list have been decontrolled for sale to South Africa, and munitions list exports have jumped dramatically. According to Conrad:

In virtual secrecy, the State Department licensed over $27.9 million worth of technology on the munitions list for export to South Africa from 1982 to 1984.

Conrad bases this report on information obtained under the Freedom of Information Act. Conrad states that:

The sales included encryption equipment, navigation gear, image intensifiers, and technical know-how. The users were private firms and two government-owned research installations, both of which do military work.

In addition to imposing new economic sanctions against South Africa, it will be important for the Senate to close some of these loopholes. The United States should not continue to allow the South African Government—either openly or surreptitiously—to procure weapons systems or weapons technology which is then used to maintain the brutal apartheid system.

I ask that the article by Thomas Conrad entitled "South Africa Circumvents Embargo" be printed in the RECORD.

The article follows:

SOUTH AFRICA CIRCUMVENTS EMBARGO

(By Thomas Conrad)

In October 1984, two Malaysian warships steamed into Simonstown Naval dockyard—South Africa's largest—for a 24-hour refueling and revictualing stopover. What for other countries would be a routine event was a rare moment to be savored for the South Africans. It marked a tiny symbolic breach in Pretoria's international military isolation: the two frigates were the first military ships to call at a South African port since 1981.

The Malaysian Navy's courtesy call on South Africa seemed odd and incongruous. Since the imposition of the mandatory United Nations ban on sales of "arms and related material" to South Africa in 1977, most foreign military establishments have officially held Pretoria at arm's length. Public contracts are few and far between. In 1982, South Africa was thrown out of an international arms show in Athens when it was discovered that its state-owned weapons conglomerate, ARMSCOR, was quietly—but publicly—exhibiting its wares. Just two years later, the Chilean government allowed ARMSCOR to exhibit South African-made missiles, ordnance, and military electronics at the "FIDA '84" arms bazaar in Santiago.

---

Footnotes at end of article.

For whatever reason, the Chilean and Malaysian military establishment have been willing to be publicly identified with no South Africans. While most countries are more discreet, South African military athletes have turned up at sporting events in West Germany, and Pretoria's crack team of military skydivers has been invited to participate in jumps in Israel and Switzerland. Most of the publicized contacts have remained at such low levels. As popular revulsion to apartheid grows, no military establishment wants to be seen keeping company with Pretoria. Indeed, the South African military's official parish status in the world community is one of the main achievements of the arms embargo.

Sanctions have long been used as foreign policy tools, even though their effectiveness has been hotly debated. For example, President Reagan in January broke all economic ties with Libya after previously imposing limited sanctions on that North African nation. The United States also maintains an embargo on the sale of arms and high-technology goods to the Soviet Union and has placed Cuba, Iran, Eastern Europe, Kampuchea, and other nations on various embargo lists.

Unlike sanctions and trade restrictions aimed by one nation, bloc, or region against another, the U.N. ban on sales of arms and related material to South Africa transcends ideological and regional differences, uniting the international community in what for the United Nations is a fairly explicit and binding course of action. And the principal success of the embargo lies in the fact that it has stopped the flow of official government-to-government arms transfers to South Africa. In the case of the United States, for example, most government weapons exports are handled under the Pentagon's Foreign Military Sales program or the Military Assistance Program. These transactions are potentially subject to public scrutiny. The official record shows that there have been no such shipments to South Africa for several years; the same appears to be true for government-to-government arms sales by other nations.

The real record, however, is mixed, in large part due to the failure of the United States and other Western nations which are deeply and directly involved in the South African economy to strictly and resolutely implement the embargo. South Africa, a nation shunned worldwide and thought to have lost its access to outside military technology, has itself grown to be the world's tenth-largest arms manufacturer.

Pretoria has added several new locally manufactured products to its arsenal. A relatively well-known one is the G-5 155-millimeter howitzer and its variant, the G-6, two spinoffs of a system developed in the late 1970s by the U.S.-Canadian-South African firm, Space Research Corporation. Other less well-known systems include the Kukri V3 missile, an innovative frequency-hopping tactical communications system, a laser rangefinder, a new family of grenade launchers, a new series of mine-resistant counterinsurgency vehicles, and new sonar electronics systems.

The fact that South Africa has been able to design, develop, and field these new systems points up one of the major failures of the arms embargo: Pretoria continues to have commercial access to a vast array of advanced foreign products, including systems with direct military applications, dual-use commodities, and "precursor technologies" vital to whole generations of arms. These commodities—foreign-supplied computers, software, laser technology, electronics, communications technology, and components—are the building blocks of modern weaponry.

Evading the embargo usually evokes images of back-alley gun-running and clandestine deals with international arms merchants. While South Africa undoubtedly still engages in covert transactions when necessary, Pretoria can usually simply purchase what it needs to make weapons directly from multinational corporations doing business in South Africa or from their distributors. These commercial exports are licensed by the Departments of Commerce and State.

Direct sales to South African weapons manufacturers have persisted despite the U.N. embargo.

Mohawk Data Systems equipment is used by Kentron, the ARMSCOR subsidiary that makes guided missiles; Eloptro, which specializes in military electro-optics; and Somchem, which outfits the South African Defense Force with propellants and explosives.[1] Another affiliate, Naschem, was on record as using a Hewlett-Packard Company computer in 1982,[2] and the Reagan Administration authorized the sale of a Sperry computer to ARMSCOR's Atlas Aircraft in 1983.[3] Direct exports to ARMSCOR are now prohibited under U.S. regulations, but the South Africans have apparently been able to keep the supply lines open.

In addition to these sales, Burroughs Corporation, Hewlett-Packard and Digital Equipment Corporation machines are used by other civilian-owned companies that do work for the South African Defence Force.[4] IBM Corporation, Control Data, and Amdahl Corporation have been the primary suppliers of computer hardware to South Africa's largest government research agency, the Council for Scientific and Industrial Research (CSIR), which has been involved in several security-related projects such as missile design, the development of fingerprint storage systems, target acquisition, and signal processing research. The CSIR also helped design the Caspir counter-insurgency vehicle which has been used in sweeps through Soweto and other townships.[5]

Advanced computers licensed for sale by the U.S. government have played a key role in Pretoria's ability to manage the African, "coloured," Asian, and Indian populations. Since at least 1970, IBM equipment has been used at the Department of the Interior to store details for the "Book of Life," an internal identity document for Asians, "coloureds," Indians and whites.[6] IBM bid on the passbook system for blacks in 1965 but lost to its British competitor, International Computers, Limited (ICL).[7] Sales to the passbook agency and the Department of the Interior have been curtailed, but U.S. companies such as NCR Corporation, Control Data, IBM, Burroughs, and Sperry have outfitted other agencies including the Department of the Prime Minister, Department of Statistics, and a large number of local government bodies that serve as the administrative shock troops of the apartheid system.[8]

U.S. technology has also played a role in expanding surveillance of the black population at the workplace. A microprocessor made by the U.S. electronics manufacturer Ontel Corporation functions as the electronic brain of a locally assembled worker-monitoring network which has been installed in over 25 mines. The "Labor Information System," which reads workers' electronically coded identification cards, "provides full information on every worker, from his ethnic group to his merit rating, and also keeps tabs on where every worker is at any one time."[9]

Other commercial sales involve civilian aircraft acquired by Bophuthatswana and Ciskei, two desolate homelands that South Africa has declared independent states and outfitted with puppet armies. In March 1982, the Bophuthatswana air wing procured two U.S.-made Helio Courier planes. The transaction was simple: the homeland military force simply acquired the aircraft from a civilian source in South Africa. The aircraft had apparently been cleared for export to South Africa despite the fact that the U.S. Air Force uses them for counterinsurgency missions.

The following month, the force acquired an Italo-West German police surveillance aircraft powered by a U.S.-made engine which is supposedly subject to U.S. export controls.[10] Likewise, the Ciskei military forces obtained light aircraft made by the U.S.-based Mooney Company via a source in Israel.[11] Such examples are not uncommon. In Namibia, the First Southwest Africa Squadron, a 100-man commando unit, has always used civilian aircraft for counterinsurgency patrols.[12]

Although U.S. companies are a driving force in South Africa, they are not Pretoria's only source of vital technology. The British firm Plessey has outfitted South Africa with mobile military radar and participated in a state-sponsored venture to develop strategic custom electronic chips.[13] Japanese computer imports to South Africa have doubled since 1982.[14] Although Japanese computer companies do not have subsidiaries in South Africa, their sales are discretely managed by local distributors. West German technology has found its way into several systems in Pretoria's arsenal. For example, ARMSCOR's new 155-millimeter artillery system uses a power pack from the West German firm, Magirus-Deutz.[15] Unimog supplied the chassis for South Africa's 127-millimeter Valkiri missile system, and Siemens and MAN (Maschinenfabrik-Augsburg-Nürnberg) teamed up to outfit one of the homeland military forces with a sparking new mobile military communications center.[16] South Africa's naval fast-attack craft are reported to contain Israeli electronics and guns from Italian and Swiss companies.[17] Pretoria has allegedly used technology and information from Israel, West Germany, and the United States to develop nuclear weapons capability.[18]

Whether of European, Japanese, or U.S. origin, imported parts, components, and subassemblies have played a key role in South Africa's drive for military self-sufficiency. Regardless of who the purported end-user is, once foreign technology is exported to South Africa, it is virtually impossible to prevent it from finding its way into the hands of the government, the military, or weapons-makers. "Most of the imported parts still used by ARMSCOR are components that are freely available on the commercial market, making it unnecessary for ARMSCOR to produce them locally," according to a South African military journal.[19]

The arms embargo has not fared well under the Reagan Administration. During Reagan's first term, the Administration relaxed a ban on sales to the regime's security

Footnotes at end of article.

forces, authorized the export of a large computer to ARMSCOR, and permitted the shipment of 2,500 electric shock batons to South Africa.[20] Since then, public outcry and the threat of congressional sanctions forced the Administration to expand export controls slightly. Yet, the Administration was victorious even as it appeared to concede to public pressure last fall: in net terms, the new sanctions were a defeat for Congress, and they will be little more than a mild irritant to Pretoria.

One of the most troubling weak spots in implementing the embargo is the licensing process, which involves the Departments of State and Commerce. Most sales to South Africa are licensed by the Commerce Department, which is responsible for overseeing commercial exports of general commodities as well as dual-use equipment that is on the "Commodity Control List"—a special catalogue of strategic technology with military and civilian applications such as computers and spares, communications equipment, electronics, and other high-technology products. The scope of such sales is significant. In 1984, U.S. companies outstripped the competition with $185 million in computer sales alone—more than British, Japanese, West German, French, and Italian data-processing companies combined.[21]

The State Department licenses the commercial export of weapons and military equipment, designated as "arms, ammunitions and implements of war" on the State Department's "Munitions List." Such sales wound down during the Carter Administration, which interpreted the arms embargo to ban all sales of any commodities on the Munitions List to any end-user in South Africa. But a result of Reagan's "constructive engagement" policy has been the decontrol of certain items on the Munitions List for sale to South Africa. "The . . . munitions list encompasses many articles not covered by the embargo, and the United States will only consider applications for such items not covered by the embargo," a U.S. official stated at the United Nations on October 23, 1983. Munitions List exports have therefore jumped dramatically.

In virtual secrecy, the State Department licensed over $27.9 million worth of technology on the Munitions List for export to South Africa from 1982 to 1984, according to information obtained by the American Friends Service Committee under the Freedom of Information Act. The sales included encryption equipment, navigation gear, image intensifiers, and technical know-how.[22] The users were private firms and two government-owned research installations, both of which do military work. After this information was published, the State Department said that the sophisticated encryption technology was destined for use in automatic banking machines but did not explain the other sales.[23]

The State Department's apparent belief that Munitions List commodities would not be put to military or repressive use flies in the face of reality. Once U.S. products—whether military or dual-use—reach South Africa, they are potentially available to the government, the military, ARMSCOR, or commercial weapons-makers. U.S. companies have acknowledged this. A September 21, 1978, cable from then Secretary of State Cyrus Vance said: "In most cases, [the U.S. corporations] contend that they are unable to control the distribution of the commodities or the products of their technical data once these commodities or products reach South Africa." The only way to prevent embargoed government agencies from gaining access to military technology is to prevent it from being exported in the first place—a prospect which appears dim under the Reagan Administration.

Last November 18, the Commerce Department published carefully crafted new export controls implementing the presidential order on sanctions against South Africa. The regulations forbid sales to the security forces, ARMSCOR, and certain "apartheid-enforcing agencies," and are likely to reduce shipments under blanket licenses. On balance, however, they seem designed more to quiet public criticism than to implement the international arms embargo. The regulations have several blind spots:

A "Contract Sanctity" clause permits sales to certain apartheid agencies which were negotiated before the measures were published. It is highly probable that the South Africans signed advance contracts with U.S. suppliers expressly to evade any new controls.

U.S. technology may be incorporated into larger foreign-assembled systems destined for apartheid agencies as long as the U.S.-supplied parts make up less than 20 percent of the total purchase cost.

Sales to the CSIR and to commercial arms-makers who work with ARMSCOR and supply the security forces and the government are not totally banned.

Sales of many items on the commodity Control List are permitted, and exports of items on the Munitions List are not completely banned.

Perhaps the most fundamental flaw in the regulations is the assumption that South Africa will simply comply with them. "Sanctions-busting" is a time-honored tradition in South Africa that is fostered by the government, and ARMSCOR has vowed to "fight dirty" to keep its access to foreign technology.[24] While South African companies will likely humor U.S. licensing officials by giving them the required assurances to get export permits for computers and other high-technology equipment, such assurances mean virtually nothing.

When necessary, local laws permit the government simply to expropriate the technology it needs and prohibit companies from disclosing any information about such seizures. The regime can also invoke the Business Protection Act or any of several other statutes to prevent parent companies or the U.S. embassy from investigating how U.S. technology is being used. A U.S. government investigation of CGS Thermodynamics, which was suspected of diverting semiconductor equipment, apparently foundered when the South Africans refused to furnish information.[25] A multi-year investigation of Mobil Oil Corporation and Caltex Petroleum Corporation by the U.S. Treasury Department for alleged violations of the Rhodesian oil boycott fell on its face, it was announced last December, when the South African government prevented company representatives from supplying relevant information for the inquiry.[26]

Some observers insist that the arms embargo is a merely symbolic gesture of revulsion at apartheid by the world community. As conceived by the United Nations, however, the arms embargo was not only intended to express international moral outrage; it was intended to be effective. Ironically, U.S. policymakers are least interested in enforcing the one set of sanctions that have the most chance of success.

Though flawed and inadequately enforced, the arms embargo is beginning to have a negative effect on South Africa's military potential. The regime seldom misses the opportunity to declare the U.N. arms embargo a failure and point to South Africa's growing arms self-sufficiency—undoubtedly to bolster flagging morale at home and to promote South Africa's attempts to market its weapons overseas. But the capacity of the growing indigenous arms industry spawned by the embargo is severely limited. Its weapons gains in some areas notwithstanding, much of South Africa's equipment is obsolete and overworked: In 1984, the defense force was forced to retire its fleet of aged maritime surveillance aircraft without replacement. Pretoria urgently needs new submarines, other naval craft, and helicopters. Its jet fighter force is antiquated and there are no replacements in sight. Spares for highly sophisticated equipment in the South African Air Force have been a severe problem. The embargo has forced South Africa to accept a decline in its net military capacity that no other industrialized nation of comparable size would countenance.

South Africa's military establishment is far from the brink of collapse. But because Pretoria needs greater visible infusions of weapons and arms-related technology from outside suppliers, the arms embargo against South Africa will undergo its most severe test over the next few year. At this point, there is little reason to believe that the United States and the other nations that have traditionally supplied South Africa will resume official government-to-government arms transfers to South Africa. The pivotal question is whether policy-makers in the United States and other countries will stop winking at strategic commercial trade with Pretoria. The answer lies in their willingness to act in unison to stop commercial sales of arms and spare parts, high-technology equipment with military applications, and advanced technologies that South Africa needs to manufacture its own weapons. Ultimately, the most vital ingredient of a successful arms embargo is the political will to make it work.

### Computer Companies Comment on Sales to South Africa

When the *Bulletin* contacted U.S. computer firms doing business in South Africa, all were quick to deny connections to apartheid enforcement.

IBM equipment is used by South Africa's Department of the Interior, Council for Scientific and Industrial Research (CSIR), and Defense Force, charges *Automating Apartheid*, written in 1982 by National Action Research on the Military-Industrial Complex (NARMIC). However, IBM spokesman Richard Coyle told the *Bulletin*, "We've investigated allegations of this kind . . . We don't sell to the military, police, or any agencies that support apartheid. To the best of our knowledge, no awful or illegal use of IBM equipment" is made in South Africa. Coyle emphasized that IBM does not sell "passbook systems or military systems." (As Thomas Conrad mentions in the accompanying article, IBM bid on the passbook system for blacks in 1965, but lost the contract to International Computers, Limited [ICL].

Naschem, a subsidiary of South Africa's national arms-manufacturing conglomerate, uses a Hewlett-Packard Company controller. "We don't have any idea where they got it," said Hewlett-Packard spokeswoman Barbara Kommer. "We're aware they have it only because of [a feature in] *Machine Tools and Product Engineering.*" Kommer emphasized that the controller "could only loosely be called a computer . . . it has to be linked to another machine." The *Bulletin* asked about Hewlett-Packard's role in lobbying for less restrictive sanctions against South Africa. "When Congress was considering various pieces of legislation, we did provide a lot of information on how our computers are used in South Africa and why we felt it was inappropriate to ban sales to any entity of the South African government," Kommer said. "We were deeply concerned that other government-run agencies such as hospitals and educational institutions wouldn't have access to U.S. computers under [the stricter proposed] House legislation."

Ontel, a subsidiary of Visual Technology, sold a computer system to South Africa in the late 1970s which is still used to monitor the actions of mine workers. "A general-purpose computer could have many applications," said John Emmerich of Ontel. "We don't have knowledge of what they use it for." Ontel stopped selling equipment to South Africa in 1980 when the company arranged for a South African firm to manufacture the computer. Sanctions against South Africa had nothing to do with Ontel's decision, he affirmed.

Robert Kramer of NCR Corporation said that his company has not sold to the South African government since the 1978 embargo and "has followed the letter and spirit of the law in every way." Jim Kenyon of Burroughs Corporation said, "Since we haven't been selling to military or police agencies since 1978, the [September 1985] sanctions haven't really affected us." Both men said their employers sold only to private companies in South Africa.

Control Data Corporation has sold mainframes to CSIR, South Africa's Council for Scientific and Industrial Research, spokeswoman Kristine Heine confirmed. CSIR is known for weapons research, but uses Control Data equipment for "research on agriculture, housing, water purification, and medicine," Heine maintained. She emphasized that Control Data systems were used in three universities for blacks and that graduates of South Africa's racially integrated Control Data Institute "were the first black programmers to enter the market, in 1979."

Have the September 1985 restrictions on computer sales to South Africa affected Control Data? "We placed the same restrictions on ourselves long before they were enforced under executive order," Heine said. "We don't sell to the police, military, prison systems, or apartheid-enforcing agencies." Yet Datamation magazine lists Control Data as one of the principal computer lobbists for a weaker set of sanctions against South Africa. Heine demurred, "I wouldn't want to distinguish between weaker and tougher [sanctions]. We were just trying to educate members of Congress on computers in South Africa." As for Control Data's sale of disk drives to Britain's ICL, which incorporated them into a mainframe sold to the national police force, Heine said her firm notified the British company that it expected them to comply with U.S. regulations of sales to South Africa, and that Control Data cooperated with the Department of Commerce's investigation into the sale. The department fined ICL and its South African subsidiary $15,000, although it did not find "probable cause" against Control Data.

---

### Behind The Lobbying Effort for Weaker Sanctions

"Computers have become instruments for enforcing apartheid," Representative Howard Berman, California Democrat, told the Bulletin. Berman had proposed a congressional ban on computer sales to all South African government agencies and their supportive bodies—a ban which would also require U.S. firms to break existing contracts with the South African government. "But the companies were successful in diluting the [official U.S.] sanctions," he said. "Their major argument was that South African government agencies will be able to get computers elsewhere, so why punish U.S. companies." Lobbyists also argued that they "were bound by contracts to continue to service and maintain their equipment," and that the government "shouldn't interfere with existing contracts," Berman added. "[Computer companies] joined with others in the business community in saying you don't fight apartheid through economic pressure but through persuasion and . . . 'constructive engagement'."

While the House was debating proposed sanctions in the spring of 1985, representatives from IBM, Control Data Corporation, Hewlett-Packard Company, and the Computer and Communications Industry Association made the rounds of congressional offices, according to Marianne Spiegal, Berman's legislative director. "[The lobbyist said] 'We want to be able to sell to South Africa' but we don't want to sell to apartheid-enforcing agencies," she explained. "We said, the problem is that one [South Afircan] department is across the street from another . . . What kind of safeguards did they have to assure they aren't used for military purposes—especially Control Data, which had made the controversial sale to CSIR? They never got back to me on that or on the compromise language of legislation."

"The major loophole in the current legislation" allows companies to continue servicing equipment sold to any agency before the sanctions were imposed. Spiegal said. "But when we cut off everything for Libya, we cut off everything for Libya, whether it was subject to previous contract or not". Similarly harsh embargos were imposed on Nicaragua, she added.●

## AFTER THE TEXTILE VETO, THE NEXT STEP

● Mr. HART. Mr. President, the problems of the textile and apparel industries are more severe than any recitation of unemployment of falling market share statistics can convey. The human cost is being paid in broken families, lost homes, educations cut short, and productive lives shortchanged. And this tragedy affects industries across this land.

Workers in steel, machine tools, electronics, automobiles, and others are paying the price for the absence of national leadership on trade. The problem is not limited to manufacturing workers—our Nation's farmers face a trade crisis that is costing their livelihoods and their land.

Today, the House of Representatives declined to override the President's veto of the textile bill. But the issue does not end here. We still must formulate a policy to ensure a competitive textile and apparel industry in the future. We still must replace this administration's laissez faire trade policy with an active commitment to make all sectors of the economy competitive in world trade.

We still need to address the hardship faced by farmers, workers, and their communities. But, in my judgment, protectionism is not the right response to our trade woes. The right way to get tough is to get competitive.

What steps are needed to get competitive in the textile industry? First

and foremost, we need to stop making our textile, apparel and other trade sensitive industries pay for the irresponsible fiscal policies of the past 5 years. The overvalued dollar has taxed our exports and subsidized our competitors. The current, long overdue decline in the value of the dollar will help some, but as long as the fundamental problem—sky high deficits—remain, we will be leaving ourselves open to repeating the recent past.

We need other economic reforms as well. The international monetary system needs to be restructured. The debt crisis faced by the developing world has stymied all American exporters, including the textile and apparel industries. Indeed, while much attention has been paid to the problem of rising textile and apparel imports, many fail to note that exports of American textile and apparel products have dropped by 40 percent since 1981. And the developing world accounts for more than half of the export market. Until these markets are freed of a debt burden that forces them to sell their products here at cut rate prices and prevents them from buying ours, we will see trade problems grow in industry after industry.

We need to streamline and enforce current trade laws. This means establishing a clear definition of what constitutes an unfair trade practice and then making enforcement automatic. Perhaps most important for the textile and apparel industries, it means increasing funds for the Custom Service, not slashing them in the haphazard manner contemplated by Gramm-Rudman I or II.

I have laid out this general trade strategy in the Competitive America Trade Act, cosponsored by my colleagues, Senators BRADLEY and NUNN. This approach will help ensure that free and fair trade can continue to grow.

The textile and apparel industry would benefit greatly. Clear and strong enforcement of streamlined trade laws would bring the worst abuses of our market to a quick halt. New technologies can continue to be developed with the assistance of joint business government research. Training programs can be designed to ensure that technology leads to better jobs, not the unemployment line, for current textile and apparel workers. But this may not be enough.

We need a coordinated policy toward the textile and apparel industries. An Office of Textile Enforcement under the Special Trade Representative could serve as a useful focus point. The National Science Foundation and the National Bureau of Standards should be engaging in cooperative research with the industry. Pursuing real reforms in the MFA and GATT treaties is critical.

What is needed is a positive program. We must make clear to the President that we do not subscribe to laissez faire, "let it happen," economic theology. We believe in aidez faire—which means, literally, "to make it happen." We need a policy to help us master the forces of economic change and to those forces to America's advantage.

Trade policy is a key aspect of international relations and foreign policy.

This Senator recently delivered three lectures on the broad scope of foreign policy and made the following observation:

If our alliances and friendships are to survive the next few decades, we must remember this: protectionism is isolationism—no less dangerous to our people or our alliances or our collective security than the isolation of the 1930's. The economic pain that many of our people feel because of trade is real, as are the flaws in the world's trading system. But we must address these flaws directly, not paper them over with * * * trade restrictions that would suffocate prosperity and alliance.

Mr. President, I urge all Senators, regardless of their position on the textile bill, to work cooperatively on the trade issue. We can establish a competitive trade policy for this country that will be good for workers, consumers, trade sensitive industries and the foreign policy of the United States.●

## COOLEY'S ANEMIA FOUNDATION, INC.

● Mr. D'AMATO. Mr. President, the Cooley's Anemia Foundation, Inc., of New York City has just announced the award of $150,000 to 10 scientists, each of whom will receive $15,000 research awards for their work in genetic therapy and oral chelation drugs.

The Cooley's Anemia Foundation is a small, but very efficient and hard-working foundation which has been of inestimable value to patients suffering from Cooley's anemia. In addition, the foundation has proven to be a source of support and activity for families of those afflicted by the disease. The 10 research awards represent thousands of hours of fund-raising by a dedicated band of volunteers and staff at dinners, golf tournaments, bingos, and fashion shows, among other projects. The efforts of the members of the foundation represent American voluntary "get up and go" at its finest.

I am encouraged by the efforts of this fine organization, and I would like my colleagues to be made aware of the organization's impressive efforts. I, therefore, ask that the text of the press release of the Cooley's Anemia Foundation be printed in the RECORD.

COOLEY'S ANEMIA FOUNDATION AWARDS $150,000 FOR RESEARCH

Ten scientists have been selected to receive $15,000 research awards from the Cooley's Anemia Foundation, for their work in genetic therapy and oral chelation.

The Cooley's Anemia Foundation Research Fellowships have been awarded annually for the past thirty years, making the program one of the oldest in the United States, supported solely by member contributions. The awards are given for research of Cooley's anemia and related clinical studies.

According to the National Institutes of Health, the study of Cooley's anemia and the insights gained in that research, has led to the development of new approaches and understanding to genetic disease in general. Cooley's anemia, known also as Thalassemia and Mediterranean anemia, is a genetic blood disorder which, until recently, was thought to afflict only those who trace their ancestry to the Mediterranean area. Today, this inherited blood disorder is found in over forty countries worldwide.

The awards were selected by a committee of leading scientists chaired by Dr. Arthur Bank of Columbia University. Reviewing Committee members: Dr. W. French Anderson of the National Institutes of Health; Dr. Sergio Piomelli of Columbia Presbyterian Medical Center; and Dr. Ronald Rieder of Downstate Medical Center, N.Y.

These are the awardees and the institutions where they will be working:

Kiran K. Chada, Ph.D., Columbia University.

Tariq Enver, Ph.D., University of Washington.

Paolo Fortina, M.D., Children's Hospital of Philadelphia.

Victor Gordeuk, M.D., Cleveland Metropolitan General Hospital.

Walter J. Gray, M.D., Jewish Hospital.

Norma Lerner, M.D., Columbia University.

Hong-Yuan Luo, M.D., McMaster University.

Mark W. Rixon, Ph.D., Fred Hutchinson Cancer Research Center.

Arlene Solomon, M.D., Cornell University Medical College.

Christian J. Stoeckert, Jr., Ph.D., University of Pennsylvania School of Medicine.●

## EUGENE METHVIN ARTICLES REVEAL ORGANIZED CRIME PRESENCE IN FOUR UNIONS

● Mr. NUNN. Mr. President, Eugene H. Methvin, a senior editor of the Reader's Digest, is a respected and resourceful reporter on the subject of organized crime. Since his days on the now defunct Washington Daily News some 20 years ago, Mr. Methvin had kept his readers informed on the workings of organized criminals—and the successes and failures of law enforcement in combatting them.

Two recent Digest articles by Mr. Methvin are especially informative because they reveal the lengths to which organized crime figures have gone to infiltrate four international unions.

In "The Devil and Roy Williams," which appears in the June 1986 issue, Mr. Methvin recounts the tragic career of former Teamsters President Roy Lee Williams, a much-decorated World War II artillery sergeant who returned from Europe to his truck driving job in Kansas City to begin his rise in the hierarchy of the union, a rise sponsored in substantial part by

Jimmy Hoffa and organized crime figure Nick Civella.

Williams, who was a fifth amendment witness before the Permanent Subcommittee on Investigations in 1980 when I was chairman, was convicted of attempted bribery in 1985 and is now serving a 10-year prison sentence. He was the third Teamsters Union president to go to prison.

Similarly, Mr. Methvin's "It's Time to Put Labor Racketeers Out of Business," appearing in the July 1986 issue, documents the presence of organized crime figures in the Teamsters and three other unions—the International Longshoremen's Association, the Hotel Employees and Restaurant Employees International and the Laborers' international.

Mr. President, I ask to have printed in the RECORD at this point both of Mr. Methvin's articles from the Reader's Digest.

The articles follow:

THE DEVIL AND ROY WILLIAMS

(By Eugene H. Methvin)

As president of the nation's largest union, the 1.7-million-member International Brotherhood of Teamsters, Roy Lee Williams seemed untouchable. He ruled supreme in the union's palatial marble headquarters at the foot of Capitol Hill, and in 1981 he became the first labor leader to be invited to the White House to consult with President Reagan.

But on December 3, 1985, Williams began a ten-year sentence in a federal prison in Springfield, MO. At age 70, sticken with emphysema and dependent on a wheelchair, he now faces the prospect of ending his days behind bars, a fitting finale to a deadly bargain he made with the Mafia devil more than 30 years ago.

Precisely when Williams sold his soul even he doesn't know. "I got myself in a web before I really knew what was going on," he says.

WHAT NICK WANTS

Williams began driving a truck in 1935 at age 20. Although husky and hot-tempered, he was, a fellow Teamster recalls, "really good-hearted." In World War II, he was a field-artillery sergeant who fought across Europe. He single-handedly captured 41 Germans in a church by bluffing them into thinking he had a whole platoon behind him.

Coming home with a chest full of medals, including the Silver Star, he returned to his truck-driving job in Kansas City and rose rapidly in the Teamsters. He had two powerful mentors: Floyd Hayes, longtime ruler of Kansas City's Local 41, and a tough Detroiter named Jimmy Hoffa, then the rising boss of the Teamsters' multi-state Midwest conference.

Hoffa tapped Williams to take over a troubled Wichita local. Later, when Hayes' grip on Local 41 began to slip, Hoffa decided to make Williams his successor.

Hayes, a typical 1930s-era union brawler, took kickbacks on "sweetheart" deals and embezzled union funds. But he fiercely opposed mob gangsters. "Let those guys get their tentacles on you," he warned Williams, "and they'll run this union and you too."

Williams disregarded Hayes's advice. While representing the Teamsters in Kansas City's turbulent Democratic Party politics, he began working with Nick Civella, who represented a large Italian-American political club and was already in the upper levels of Kansas City's Mafia hierarchy. He and Williams became "close personal friends."

In 1952, according to the FBI, Williams attended a secret Chicago meeting of Midwest mob leaders, where it was agreed that Williams would run the Kansas City Teamsters and in turn "cooperate with the syndicate." Williams discussed all major union problems with Civella before making decisions. If they disagreed, orders came from Hoffa: "Do what Nick wants."

PLAYING FOR KEEPS

At first Williams did not seem to understand the deadly grip of his syndicate alliance. He was soon enlightened. According to FBI testimony, in 1956, when Williams resisted buying a costly outpatient-care package for Local 41 members, he was visited by two of Civella's gangsters. "Buy the medical plan," the goons warned, "or we'll kill your children and your wife. You go last."

Williams broke into anguished tears as he told Hayes what had happened. Convinced that the program would devastate their union financially, the two men flew to Detroit to consult Hoffa, who met them with two mobsters at his elbow. "Buy the plan," Hoffa ordered, "and raise dues to cover it." They did.

Repeated dues hikes generated rank-and-file opposition. One critic, Jake Henderson, especially irritated Williams, who could be as tough as anyone in defending his union control. According to FBI testimony, Williams told Hayes he was going to have Henderson shot—just to scare him. One night in 1959 a shotgun blast tore through Henderson's living-room window, peppering his legs with 65 pellets.

Williams played a key role when the Hoffa-Mafia alliance completed its takeover at the Teamsters' 1957 Miami convention. He chaired the credentials committee and engineered the seating of delegates who Senate investigators concluded were chosen improperly, some from "paper locals" created by the syndicate.

Hoffa had already rewarded Williams by making him a trustee of the new Central States Pension Fund (CSPF), into which employers in 25 states poured millions of dollars for their union employees. For Hoffa and his Mafia allies, the CSPF became a rich lode from which to mine payoffs and kickbacks.

By the mid-1970s, the mob was brazenly siphoning millions each year out of Las Vegas casinos bought with "loans" from the CSPF. But Justice Department prosecutors were powerless to crack the Teamster-Mafia combine without witnesses—and mob "hit men" ruthlessly sealed the lips of all who might testify.

One such was Floyd Hayes. In 1962 the FBI filed a case against Hayes, Williams and their cohorts for embezzling more than $200,000 in union funds. Although Hayes and others were convicted, Williams was acquitted when witnesses at the trial proved mysteriously vague about his role. The G-men visited Hayes, who agreed to become a government witness. He spent four days in a Chicago hotel room telling the FBI about Williams, Hoffa and their Mafia "connection," and detailing the casino skimming operation.

As a government witness, Hayes was now a prime Mafia target. He built a high fence around his home, floodlighted the yard and kept roaming watchdogs. But in June 1964, gangsters caught up with him in a parking lot and riddled him with bullets. They also wounded his wife. "They didn't have to shoot her," Hayes' FBI contact says. "That was a message"—to anyone else who might get out of line.

SEE MY FRIEND

As Williams rose through union ranks, he was always under Civella's control. Civella assigned a top associate, Sam Ancona, as his "messenger" to Williams. Ancona occupied an adjoining office in Teamster Hall and became an official in a joint council overseeing more than 20,000 union members in two states. Even after Williams became Teamster president in 1981, Civella's "messenger" traveled with him wherever he went.

Mobsters in other cities sought to cut deals directly with Williams, but Civella ordered him to refuse. And Williams did. "You know where you've got to go," he always responded. "Go see my friend in Kansas City."

One businessman who went through his friend in Kansas City was Allen Glick, a San Diego real-estate developer. In 1974 Glick sought a $63-million Teamster loan to buy two Las Vegas casinos. Chicago Teamster officials referred Glick to Milwaukee Mafia boss Frank Balistrieri, who then contacted Civella; with Williams signing off, Glick got his loan. Glick next hired Balistrieri's two sons as "legal retainers" for a fee of over $100,000 and gave them an option to buy a half-interest in the casinos for a mere $25,000. He also agreed to hire as his manager reputed Chicago Mafia assoicate Frank Rosenthal.

But Glick quickly found that he was a mere figurehead. Millions were skimmed from his casinos, and cash flowed monthly to Mafia bosses in Kansas City, Milwaukee, Chicago and Cleveland. From this money, Civella gave Williams $1500 a month. (Although 11 people were eventually convicted in the skimming, Rosenthal was never charged, and the Balistrieri sons, though indicted, were never convicted.)

The chain of events leading to Roy Williams's downfall began after Hayes's murder, when the FBI put a new agent, Bill Ouseley, on Civella's trail. Using a court-authorized wiretap, Ouseley eaves-dropped on Civella's bookie for weeks. Finally, he struck gold. On a 1970 weekend, Civella himself called his bookmaking headquarters for a report on the wagering. His conviction for conspiracy to violate interstate gambling laws was enough to send him off to his first prison term in 1977.

About the time Civella was paroled in 1978, a wave of mob murders persuaded Kansas City's federal judges to authorize new electronic surveillance. Ouseley and his colleagues recorded Civella and his brother Carl plotting to use the Mafia to promote Williams as Frank Fitzsimmons's successor in the Teamster presidency. When Fitzsimmons died in 1981, the Mafia "shadow government" quickly named Williams.

The G-men also uncovered a plan involving Williams in the sale of valuable Teamster real estate in Las Vegas to Sen. Howard Cannon (D., Nev.), then chairman of the Senate Commerce Committee. The sale was to be in return for a commitment to delay trucking-deregulation legislation. One night Ouseley also monitored the Civella brothers coolly discussing whether to bring in outside killers to murder a gangland enemy. That conversation was enough for a federal judge

to send Civella back to prison. (He died a few days after his release in 1983.)

VIEW FROM THE DARK SIDE

As the surveillance evidence accumulated, Ouseley and his colleagues decided to make their move. On February 14, 1979, they grabbed Civella's courier arriving at the Kansas City airport with two $40,000 packages of stolen casino cash. That was the signal for FBI teams with dozens of search warrants to raid the homes of the Civellas and six other mobsters, as well as Las Vegas casino offices. The G-men seized a bonanza of evidence: guns, bulletproof vests, and coded records of casino-cash payoffs to Teamster and Mafia figures.

Williams, another former pension-fund trustee, a current trustee and two Mafia figures were convicted of conspiracy to bribe Senator Cannon. The Senator was never indicted, but in 1982, with the trial making headlines, Nevada's voters defeated his bid for a fifth term.

Last October Roy Williams took the stand in Kansas City to testify against his erstwhile Mafia allies. For the first time, the American people heard inside testimony confirming the mob's reign of terror over the nation's largest union. Williams told how, during the years he spent climbing the Teamster hierarchy, one union member had been murdered and left in a car trunk and another shot in the head and tossed on his father's grave. "I was afraid, yes, sir," said Williams.

Why was he testifying? "I decided I would come up with the truth that I had been withholding for many years," Williams answered. "I'm seventy years old, sir, and when you get on the dark side of the cloud, you think a little different."

One month later the prison doors clanged shut on Roy Williams, the ultimate payoff for his 30-year alliance with the devil.

Today the $7-billion CSPF is under federal-court supervision and its investing is supervised by independent professional managers. But hundreds of other Teamster benefit funds have no such protection. Williams alleges that during his years with the Teamsters, every major Teamster local had "some connection with organized crime" and that his successor as Teamster president, Jackie Presser, is as controlled by the mob "as I was."

[From the Reader's Digest, July 1986]

IT'S TIME TO PUT LABOR RACKETEERS OUT OF BUSINESS

(By Eugene H. Methvin)

Joe Teitelbaum, owner of a Miami stevedoring company, became so fed up in 1975 with shakedowns by the International Longshoremen's Association (ILA) that he turned to the FBI. The G-men were ecstatic to have an industry insider bold enough to wear secret tape recorders and introduce undercover agents to his business.

A federal probe lasting five years uncovered a massive, Mafia-managed cartel stretching from Boston to Houston. The racketeers sold labor peace on the docks where delays can cost shipowners $35,000 a day, rigged bids on ship repairs, orchestrated fraudulent workmen's-compensation claims, shook down employers for payoffs and fingered cargoes for truck hijackers. Dockworkers even had to pay a daily kickback to get work.

The FBI's biggest catch was the ILA's No. 3 officer, Anthony Scotto, boss of Brooklyn Local 1814. FBI electronic surveillance captured irrefutable evidence that Scotto was a capo in the Gambino gang, one of New York's top crime families. The Gambino organization controlled the docks as far south as Norfolk, Va., while the Genovese gang—another major New York crime family—ran the ILA locals farther south.

By 1981 Justice Department prosecutors had convicted 52 union officers and 58 company executives and corporations. Despite the convictions, little changed. The FBI subsequently recorded Gambino boss Paul Castellano boasting, "It's our International." Last January the President's Commission on Organized Crime reported, "Life on the docks today remains much as it was."

BAD FOUR

The frustrating result of this, the most successful labor-racketeering probe the FBI ever mounted, underlines a national scandal: four major American labor unions, with a total of nearly three million workers, are dominated by La Cosa Nostra, the crime syndicate, and its allies. The "Bad Four" are:

The International Brotherhood of Teamsters (IBT), whose 1.9 million members range from airline pilots to truck drivers. The IBT has been under the mob's thumb for three decades. Former president Roy Williams, imprisoned for conspiring with Mafia leaders to bribe a U.S. Senator, acknowledged under oath that every major Teamster local "had some connection with organized crime" and his successor, Jackie Presser, is as controlled "as I was."*

The ILA, representing 116,000 dockworkers on the East Coast, the Gulf Coast and the Great Lakes. Through this union, reports FBI Director William Webster, the mob imposes a "racket tariff" on all goods shipped through U.S. ports. Syndicate-managed thefts at Miami docks alone total $2 billion a year—costs that are passed directly to shippers and consumers.

The Hotel Employees and Restaurant Employees International (HERE), whose 400,000 members are "owned" by the Chicago Mafia, according to Congressional testimony and the FBI. In nine years the union's assets have dropped from $21.4 million to less than $14 million. Millions have been siphoned away in "loans" to gangsters and associates.

The Laborers' International (LIU), whose 509,000 members are concentrated in heavy construction and the building trades. In addition to extorting kickbacks and payoffs, LIU leaders rig bids, fix prices and order contractors to buy supplies from mob-controlled firms. By one authoritative estimate, the Mafia monopoly adds 20 percent to construction costs in New York City.

The presidents of all four of these unions have invoked the Fifth Amendment in refusing to answer official inquiries about criminal activities. Though AFL-CIO policy prohibits officials who take the Fifth from holding union office, the presidents of the three AFL-CIO unions continue to sit on the parent body's executive board. (The Teamsters were expelled from the AFL-CIO for corruption in 1957.)

NEGLECTED WEAPONS

Federal law-enforcement authorities, for their part, have ample legal power to clean up these unions, particularly with two weapons Congress gave the Justice Department in the 1970 Racketeer Influenced & Corrupt Organizations statute (RICO).

Legislators provided in RICO both criminal and civil sanctions for those engaged in a "pattern of racketeering." To imprison them, prosecutors must produce "proof beyond a reasonable doubt." But in a civil proceeding, government prosecutors or private parties need only supply a "preponderance of evidence." Then a jury or judge can impose triple damages. A judge can dissolve or seize racketeers' companies, oust them from their union posts or welfare-fund trusteeships, and ban them for life from specified business or union activity.

The late Sen. John L. McClellan (D., Ark.), the legislation's author, predicted the civil RICO law would assure the "wholesale removal of organized crime from our organizations and forfeiture of their ill-gotten gains."

But in 15 years, the Justice Department's organized-crime strike forces have brought just 68 criminal RICO prosecutions, with a distinct minority of those against union racketeers. These cases yielded only $1.1 million in fines and $3.2 million in forfeited assets. The neglect of the civil RICO weapon has been even worse: a mere six cases in 15 years, only one against a union racket.

By contrast, states that have adopted their own RICO statutes have put Washington's record to shame. Florida has had its statute only nine years, yet its attorney general has won $8.3 million in 39 civil RICO cases against racketeering enterprises as diverse as pornography, prostitution, theft, fraud and drug smuggling. In six years Arizona has brought 75 RICO prosecutions and chalked up judgments exceeding $16 million.

RARE VICTORY

Clearly, there is a great deal more to do on the federal level. Indeed, one of the few outstanding federal civil attacks on labor racketeering shows what can be accomplished by an all-out offensive.

In New Jersey, Mafia capo Tony Provenzano and his family ruled a Teamster empire, embracing 35 locals and 90,000 members, by sheer terror. In his own Local 560, two members who dared oppose Tony Pro were murdered—one gunned down as he left home the morning after speaking out at a union meeting.

The Provenzano group bilked Teamster welfare funds and oversaw Mafia loan-shark activities. They also infiltrated legitimate trucking companies to perpetrate a series of frauds and inside thefts, bleed the firms white and force them into bankruptcy. To avoid labor troubles, employers were compelled to make wholesale payoffs and hire ghost employees.

Justice Department prosecutors sent Tony Pro to prison for extortion. Yet he continued to run the union from his prison cell, his brothers assuming his official posts in Local 560. When Provenzano was finally put away for life for murdering a Teamster worker, his successor was none other than his 23-year-old daughter.

Then on March 9, 1982, Newark Strike Force chief Robert C. Stewart filed the first-ever civil RICO suit against a union. After a four-month trial, he won a resounding victory. Federal Judge Harold Ackerman declared that the evidence revealed "how evil men engaged in a multifaceted orgy of criminal activity," and he ordered the removal of the entire Local 560 executive board and the appointment of his own trustees to run the union. An appeal of his order is pending.

RICH POTENTIAL

Stewart's New Jersey triumph had strong reverberations in Washington. Assistant Attorney General Stephen S. Trott told Congress, "The Local 560 case has opened our

eyes to the potential of civil RICO. Future cases along the lines of Local 560 will be instituted."

Months passed, and nothing happened. Last March, the President's Commission on Organized Crime scored Justice Department inaction and called for a nationwide strategy "to bankrupt individual mobsters and to discourage union officers, employers and public officials from accommodating organized crime." But an effective federal assault will have to overcome these longstanding obstacles:

1. Lack of political will. Busting union rackets has never been popular work in Washington. Explains one former Labor Department investigator: "The rank-and-file union members are powerless, while their leaders can make campaign contributions, provide telephone banks and move voter blocs—the muscles that win elections."

Thus, ILA vice president Scotto marched Brooklyn dockworkers to cheer candidate Jimmy Carter, and President Carter invited him to lunch—even after FBI agents had recorded incontrovertible proof of his Mafia membership and union piracy.

President Reagan has entertained Teamster leaders Williams and Presser at the White House. In 1980 top LIU officers trooped to the White House to have their picture taken with Vice President Walter Mondale and present him with a campaign contribution. In the last two Congressional campaigns, the Bad Four collected $4.7 million to aid favored candidates.

Declares the President's Commission: "When corrupt union leaders are seen joining hands with politicians it conveys a message that political leaders are beholden to the union. Such contacts can erode public confidence and dampen the desire to end racketeering. Organized crime is aware of this and purposefully seeks to cultivate and benefit from political influence."

2. Anemic enforcement. Congress has never provided enough personnel and funds to enforce the laws it has passed to safeguard union members' rights. "I have fewer than two hundred people to oversee fifteen thousand federally protected union pension and welfare funds containing billions of dollars in trust for millions of workers," complained Deputy Assistant Secretary of Labor John J. Walsh before he quit in 1984. (The union funds are in addition to the 700,000 other private pension plans that the Department oversees.) The DOL has only 89 investigators to help the Justice Department combat labor racketeering. A veteran prosecutor told me, "I could use more than that in Manhattan alone."

The racket-busters' principal antagonist is Robert J. Connerton, a lobbyist and LIU's longtime general counsel. Lawyers in Connerton's firm wrote a law-journal article denouncing DOL corruption fighters as a "national police force with little accountability"—without noting that one of their firm's major clients is the racket-ridden LIU. Connerton spearheaded an AFL-CIO lobbying drive that sank a Reagan Administration effort to persuade Congress to provide 150 more DOL investigators.

*3. Bureaucratic bumbling and bickering.* For decades, lethargy and rivalry have dogged federal anti-racketeering efforts. When the Justice Department indicted Florida LIU official Bernard G. Rubin for embezzling $400,000, for instance, prosecutors moved to place union funds under trusteeship. After DOL declined to assist, pleading "lack of manpower," the Justice Department abandoned the effort. Rubin was convicted (he is appealing), but Senate investigators found he embezzled an additional $2 million before he went to jail.

DOL's 89 crime investigators do not have the authority to carry guns, execute search warrants or make arrests. When a DOL agent wants to bust a racketeer, he has to hunt up an FBI agent to accompany him. Sen. Sam Nunn (D., Ga.) has introduced remedial legislation, but a turf-jealous Justice Department has stalled it for almost three years.

*4. Inadequate planning, analysis and pursuit.* The FBI, its agent strength cut by nearly ten percent between 1976 and 1980, has lacked the manpower to mine its vast lode of surveillance tapes of top mobsters. The G-men in Chicago, for example, recorded thousands of hours of criminal conversations between Teamster president Roy Williams and his cohorts, but harvested only a single case.

"I know what those tapes contained, and it's a shame only a single prosecution came out of it," one FBI agent told me.

Proper planning and analysis could pyramid such intelligence bonanzas into seizures of racketeers' property, expelling them from office and placing their unions under court supervision. Scores of FBI veterans are retired at age 55, when they're considered too old to "work the streets." Why not use them as intelligence analysts to pore through the files and plan strategic long-range strikes?

5. Neglect of corporate racketeers. While businessmen are often unwilling victims, they may also be eager customers for the mob's chief product: muscle to terrorize workers and keep them quiet while corrupt union and corporate executives strike sweetheart deals.

The Commission on Organized Crime heard from one self-styled mob "leg breaker" who described how corrupt Teamster leaders conspired with Fortune 500 company executives to cut wages and welfare benefits, and jettison safety rules. The Justice Department prosecuted only seven defendants—not one of them a Fortune 500 executive.

Every American, whether union member or consumer, has a direct stake in ending the mobster empire of labor racketeering. When your Congressmen and Senators ask for your vote this autumn, ask them these questions: What have you done to root out racketeers and get the Justice Department moving to break the Mafia stranglehold on key unions? Are you accepting campaign contributions or endorsements from the "Bad Four" unions?

Meanwhile, write Chairman Don Nickles (R., Okla.), Senate Labor Subcommittee, 428 Senate Dirksen Office Bldg., Washington, D.C. 20510; Chairman William L. Clay (D., Mo.), House Labor-Management Relations Subcommittee, 2451 House Rayburn Office Bldg., Washington, D.C. 20515; or Attorney General Edwin Meese III, U.S. Justice Department, Washington, D.C. 20530. Tell them it's time to put labor racketeers out of business, now.●

## NEW STUDY PROVES SUCCESS OF TRADE ADJUSTMENT ASSISTANCE FOR FIRMS

● Mr. HEINZ. Mr. President, the operation of our trade adjustment assistance programs for workers and firms has been a subject of considerable controversy over the past few years. There has been opposition both to the concept of such assistance for workers and firms impacted by imports and to the actual operation of the programs in law.

Over the years I have consistently made clear my belief that the Government needs to provide an adjustment assistance program as an alternative to protection and my support for our current programs. I was also pleased to be a cosponsor of the Roth-Moynihan proposal of last year that would have significantly reformed and extended current programs and provided a permanent means of funding them. I regret we were unable to secure the enactment of that entire proposal in last year's reconciliation bill, but I look forward to the next round in that fight.

Even among those of us who support these programs, however, there has been criticism of their actual operation. The Roth-Moynihan proposal, in part, addressed some of those criticisms, particularly with respect to the program for workers.

One area where criticism has been particularly misplaced, in my judgment, has been with regard to the program for firms. Much of that criticism revolved around a high default rate for direct loans made during the Carter administration, and I believe much of that problem has been solved, first by better management and transfer of the program to the International Trade Administration from the Economic Development Administration, and more recently by removal of lending authority.

Unfortunately, some have also seen fit to criticize the operation of the technical assistance portion of the firm program, and there appears to be under way right now within the Commerce Department an effort to destroy the effectiveness of the program by terminating many of the expert contractors who operate the Trade Adjustment Assistance Centers and replace them with less experienced people. In fact, this small program—less than $15 million for technical assistance for the entire country—is filled with success stories. They are small companies, small businesses, and therefore have not often attracted much public or media attention, but the successes, in terms of increased employment, production, profits, and often simple survival of hard-pressed companies simply cannot be ignored. I believe that Commerce Department officials should be called to account for what appears to be nothing less than a deliberate effort to subvert and discredit this program.

I recently reviewed a study that provides graphic evidence of the success of this program, notwithstanding the bureaucratic difficulties the Commerce Department has imposed upon

it. That study, which the Department commissioned but has failed to release, finds that of the firms receiving technical assistance, 34.6 percent had adjusted and two-thirds of the remainder were still in business. It also makes clear that the more assistance firms received from the program, be it in developing their adjustment proposals, conducting diagnostic surveys or receiving direct loans, the more likely the firms were to adjust.

The definition of adjustment used in this study was not an easy one to achieve. To qualify as adjusted a firm had to have begun work on a majority of the remedial tasks specified in its TAAC-approved adjustment proposal and have shown significant increases in profits, sale or employment, such sales or profitability increases being equal to or above the average performance of similar firms on that sector—so that a general improvement in sectoral conditions would not be misconstrued as an adjustment success.

Mr. President, this study makes clear in dramatic terms that this program works and works well at a very low price. We are talking about $15 million for the entire program—$28 million when direct loans were being made—certainly one of the most cost-effective programs in the Government based on its results. I regret this study has not received more attention. The Commerce Department should be bragging about it instead of burying it. It demonstrates that there are effective alternatives to protection out there, alternatives we should be promoting and nurturing rather than hiding.

[Graphs and charts mentioned in the study not reproducible in the RECORD.]

I ask that a copy of the study, along with a clarifying letter by its authors, be printed at this point in the RECORD.

The material follows:

[Final Report]

EVALUATION OF THE ADJUSTMENT OF FIRMS ASSISTED BY THE TRADE ADJUSTMENT ASSISTANCE PROGRAM: ECONOMIC EXPERIENCE OF CLIENT FIRMS SINCE 1981

(Study Prepared by: HCR, Washington, DC.

This report was prepared as the final product of a study conducted under contract with the U.S. Department of Commerce. The contents of the report do not necessarily reflect the official views or opinions of the Department, but rather represent the research and analyses done by HCR.

The study was conducted during the period of May 23, 1984 to May 31, 1985. Assistance in data collection was also provided by the Trade Adjustment Assistance Centers located in the 13 regions.

Louise Woerner, President of HCR, Barbara Robinson, Project Director, Hillard Davis and Leon Hunt, Statisticians, supervised preparation of the report. Administrative support was provided by HCR staff. Vera Jenkins typed the drafts and prepared the report for distribution.

EXECUTIVE SUMMARY

This is a report of the economic adjustment of firms receiving technical assistance through the Trade Adjustment Assistance Program (TAAP) since 1981. The objective of the study is to assess the effectiveness of the TAAP in helping firms that have been adversely affected by imports.

*A. Findings*

Given below is a summary of findings resulting from our evaluation of the TAAP Program. These findings are based on a respondent sample of 127 firms.

Overall, 34.6 percent of the firms had adjusted as of December 31, 1984. Of the remaining 65.4 percent that have not satisfied the three criteria for adjustment, two-thirds are still in business. See page 30.

Of the 127 firms in the sample 100 or 78.7 percent were still in business. See page 30.

Of the 122 sample firms for which no outcome data were available, 81.1 percent are estimated to still be in business, thus increasing the likelihood that the rate of firms satisfying the adjustment criteria in the future will increase. See page 39.

Larger firms, those with more than $1 million in total sales adjusted at a much higher rate (87.1 percent) than the smaller firms, those with less than $1 million in total sales (19.4 percent). The out-of-business rate for the smaller firms is nearly twice as great as those for the larger firms (32.3 percent compared to 20 percent). See page 31.

Firms in the sample that had their adjustment proposal accepted within the last 12 months had a lower adjustment rate (28.6 percent) than those with longer periods of time; 36.0 percent for the 12-17 months; 40.7 percent for the 18-23 months; and 33.3 percent for the 24-plus months. This may be a reflection of not enough time to implement their adjustment proposal. As expected the out-of-business rate reached a maximum for the 24-plus month group (33.3 percent). See page 32.

Firms receiving OTAA direct loans adjusted at a rate of 66.7 percent compared to those receiving other types of loans (44.8 percent). Firms receiving no financial aid (loans) adjusted at a rate of 30.0 percent compared to an adjustment rate of 52.3 percent for those who received any type of loan. See page 37.

Firms within industries identified as critical to the U.S. industrial base adjusted at essentially the same rate (33.3 percent) than others (34.9 percent). See page 38.

Firms with government contracts had a higher adjustment rate (41.7 percent) than those without (33.0 percent). See page 38.

Firms receiving assistance from the TACs on developing their adjustment proposals adjusted at a much higher rate (38.0 percent) than others (7.1 percent). However, only 14 out of the 127 firms did not receive assistance in developing their adjustment proposals. See page 35.

Firms receiving assistance from the TAACs to conduct diagnostic surveys adjusted at a much higher rate (37.0 percent) than firms that did not. Approximately 91.3 percent of all firms received TAAC assistance in developing diagnostic surveys. See page 34.

*B. Background of the Trade Adjustment Assistance Program (TAAP)*

The TAAP was authorized by *Public Law 93-168: Trade Act of 1974.* This Act authorized the Secretary of Commerce to provide technical and financial assistance to firms hurt by import competition. Over time, financial assistance has been de-emphasized in favor of technical assistance.

Within the Department of Commerce, the program is currently administered by the Office of Trade Adjustment Assistance (OTAA) of the International Trade Administration. Prior to September, 1981, the Economic Development Administration (EDA) had this responsibility.

The firm assistance program is operated through a network of 13 Trade Adjustment Assistance Centers (TAACs) located throughout the United States and Puerto Rico. The TAACs are not federal agencies but receive federal funds to support the services they provide to client firms. Assistance to firms is provided on a cost sharing basis with assisted firms paying a minimum of 25 percent of the total cost. The TAACs are staffed by business experts who provide technical assistance, disseminate information, participate in seminars and assist firms in developing petitions for certification, diagnostic surveys and adjustment proposals. While most firms use TAACs to assist them in their application, it is not necessary and a firm can make a request directly to OTAA. The interactions of the various elements of TAAP are shown in Figure 1.

After a firm has been certified, the TAAC helps the firm develop a diagnostic survey to identify problems and to determine changes which need to be made. An adjustment proposal designed to ameliorate the firm's performance is then prepared. If the adjustment proposal is accepted by ITA, the TAAC may also help the firm implement the recovery strategy. The TAAC also assists the firm to obtain financing to implement the strategy which may include help in preparing an application for a Trade Act loan.

During the life of the TAAP a number of evaluations have been performed by both a non-government contractor and the General Accounting Office. For the most part, these have been process evaluations designed to examine the administration of the program and not to assess its effectiveness in improving the client firms' economic health. These evaluations have shown that TAAP operations are being continually improved, especially its administration. However, there have been criticisms of loan servicing and loan application review.

This study covers approximately 500 firms submitting adjustment proposals between June 1, 1981 through April 24, 1984, and their economic performance through December 31, 1984. Earlier history of the program is shown in Figure 2.

Under the criteria of the Trade Act of 1974, the first firm was certified as being negatively affected by foreign trade in May, 1975. As of April 30, 1984 an additional 2,102 firms had been certified. Of this number, 1,265 were certified before the program was administered by ITA beginning October 1, 1981.

*C. The firm assistance process*

For a firm to receive assistance certain procedures must be followed. These procedures are required to insure that only firms that meet the criteria set by the Trade Act of 1974 are accepted in the program.

The major components of the process to gain assistance are: Submission of petition and qualify for certification, preparation of a diagnostic survey, submission and acceptance by OTAA of an adjustment proposal, and assistance implementing the adjustment proposal.

Most firms that obtain assistance go through these four components. A brief description of each is given below.

*1. Certification.*—Firms receiving assistance under the TAAP must first become certified by the OTAA as having been harmed by imports. To become certified a firm must submit a petition to the OTAA requesting certification and demonstrating that increased imports of "like or directly competitive" articles contributed importantly to the decline in a firm's sales or production and of the actual or threatened separation of a significant portion of the firm's workers. To support the petition the form must describe the business and its economic history, identify its owners and any affiliates, subsidiaries, and parent firms, define the articles produced and sold and provide data on sales, production and employment. The petition is required to provide a list of customers who may be called to determine whether they have shifted their purchases to foreign sources. Supporting documents, including financial statements and state unemployment tax returns also accompany the petition.

OTAA reviews the petition and supporting documents and notifies the firm within five working days of receiving the petition whether it is complete and acceptable for investigation. Incomplete and otherwise unacceptable petitions are rejected and the firm is notified by telephone followed by a letter. If the petition is acceptable, OTAA begins an investigation and normally completes its work and either certifies the firm or denies its petition within 60 days. However, during the investigation, if OTAA finds the petition is incomplete, inaccurate or misleading, it may terminate the investigation.

If the firm cannot be certified, it is allowed to withdraw without prejudice and resubmit its petition whenever its management thinks that it can meet the eligibility criteria. If the firm does not agree to withdraw and certification is denied on the merits of the case, the firm may not submit another petition for one year. A firm whose petition has been denied by the OTAA may appeal its denial to the Assistant Secretary for Trade Development.

There is no limit on how large or small a firm can be to qualify for certification. Firms that are realizing a profit or firms that have recently shut down or are operating under bankruptcy proceedings can still petition for certification and obtain assistance.

Once a firm is certified it has two years from the date of certification to submit an acceptable adjustment proposal, which is the first step in applying for implementation technical assistance and/or financial assistance. If the adjustment proposal is not accepted and the two-year period has expired, the firm must petition again for certification and be recertified before it may apply for assistance again.

*2. Diagnostic survey.*—The diagnostic survey is used to review the current position of the firm. It is through this device that the firm's strengths, weaknesses, resources and problems are highlighted. The survey also provides a succinct analysis of the difficulties that must be overcome if the firm is to develop an acceptable adjustment proposal for survival.

The preparation of a diagnostic survey is required for every firm seeking assistance unless a waiver is given in writing. Such waivers are given only in those rare instances when the firm's position is clearly and completely understood and the preparation of such a document would be redundant.

Preparation of the diagnostic survey is usually done with TAAC assistance although that is not required. In rare instances firms use outside consultants in developing diagnostic surveys.

The adjustment proposal is usually developed and structured using the results of the diagnostic survey. Therefore it is very important that the diagnostic results reflect the true condition of the firm.

*3. Adjustment proposal.*—An adjustment proposal is a document prepared by a certified firm, usually with assistance from a TAAC, to explain briefly the strategy and plan of action the firm intends to employ to adjust to the impact of imports, and what type of assistance it intends to seek under the Trade Act to carry out the plan. Before a firm is authorized to seek implementation technical or financial assistance under the Trade Act, it is required to submit and receive acceptance of an adjustment proposal.

After an adjustment proposal is received by OTAA it is reviewed by the Adjustment Proposal Review Committee. This committee recommends action on the adjustment proposal to the Deputy Assistant Secretary for Trade Adjustment Assistance. This proposal is usually reviewed and a decision made within five to ten working days. If the Deputy Assistant Secretary finds the proposal to meet the criteria of the Act, he or she may accept the proposal and authorize the submission of the balance of the application for implementation technical assistance and/or financial assistance. If the adjustment proposal is found not to meet the criteria of the Act, the firm is informed of non-acceptance. In some cases, an adjustment proposal is accepted based upon crucial conditions being required to be satisfied before all or part of the assistance can be provided. Also, the firm must apply for the assistance outlined in the adjustment proposal within six months or a new adjustment proposal will be required.

*4. Implementation of the adjustment strategy.*—Once the adjustment proposal has been accepted by OTAA the firm is eligible to apply for assistance in implementing the plan. This is usually in the form of technical assistance. Such assistance is an integral part of the firm's adjustment proposal and may consist of market studies, studies to improve productivity, assistance in installing management controls, system designs for new products or helping a firm prepare an application for a loan or loan guarantee under the Trade Act or other available programs.

In some instances OTAA requires firms receiving Trade Act loans to agree to receive technical assistance in carrying out the adjustment proposal. Such assistance generally consist of monthly or quarterly visits by TAAC staff whose services have been agreed to by the firm, the TAAC and OTAA. The purpose of these visits are to review progress in accomplishing the firm's recovery and to uncover any problem which could impede implementation of the firm's recovery strategy. Such visits may lead to recommendations for additional technical or financial assistance.

### *D. Study methodology*

The purpose of the TAAP is to assist import-impacted firms achieve economic adjustment. While the idea of adjustment is clear—it suggests a return to economic health—it is not explicitly defined either in the legislation or TAAP administrative guidelines. Therefore considering the definition of adjustment was the initial task in this research.

It is clear that an evaluation of the TAAP should include several elements. First, there must be a connection between the assistance rendered by a TAAC and subsequent behavior of its client firms. In other words, a TAAC must not only advise an impacted firm, but there must be an indication that its advice has been understood and followed. A firm's implementation of an OTAA accepted adjustment proposal is evidence that the TAAC's advice is being taken.

Secondly, the TAAC's prescriptions must be effective. They must, if implemented, actually have some beneficial effects on the client firm. The clearest indication of such effectiveness is improvement in a firm's income statement sheet: increased sales and/or profits. Furthermore, since one of the goals of the TAAP is to preserve jobs, the increase in a firm's employment is a positive economic effect.

There also remains the question of attribution: is a firm's progress *due* to the TAAC's intervention or is it simply the result of the changing fortunes of the industrial sector? If the client firm has not done as well as its Standard Industry Code (SIC) classification average, we might conclude that its performance is unrelated to the TAAC's assistance, since it is relatively worse off than its peer firms which have not been assisted.

We used these three considerations to construct an operational definition of adjustment. To be adjusted, a firm must have:

Begun implementation of a majority of the tasks specified by its adjustment proposal.

Shown improvement in sales or profitability or increase in employment *after* TAAC assistance.

Increased its sales or profit equal to or exceeding the average performance for similar firms (in the same 4-digit SIC with approximately equal sales).

We selected a random sample of 249 firms from a total of 426 firms which had completed diagnostic surveys and/or adjustment proposal since 1981, and collected, for each firm, routine administrative data necessary to evaluate the three preceding adjustment criteria. Outcome data on approximately 51 percent of the sampled firms were obtained and used in this evaluation.

### *E. Conclusions*

The results from the study suggest that the TAAP has had a beneficial economic effect on their clients of import-impacted firms. While our estimate of a 35 percent adjustment rate may be too high, because of response bias (a greater tendency for successful firms to respond), the success rate would still be about 18 percent if no other firms in the total sample of 249 had adjusted successfully.

However, if less stringent criteria of adjustment are used, the rates would be even higher. The effect of alternative definitions are discussed in the study results on pages 25 and 41.

### *F. Recommendations*

Based on the findings of this study, the following recommendations are offered:

The state-of-the-art of predicting economic performance is such that, with comparative ease, OTAA can predict which firms are most likely to be successful in achieving adjustment and which would not. In the future, OTAA should consider using this type of algorithm.

A reporting system is basic to the monitoring, evaluation and management of a program. As a tool in achieving these ends, a management information system that could be used to obtain and process the type of information needed should be developed and implemented. This system need not be extensive but include key indicators needed to monitor performance of a client firm.

Since the TAAP has had at a minimum a moderate success rate, a cost-benefit analysis should be performed to show what overall benefits have accrued from the program. That is, added data and factors could form the basis for estimating numbers of jobs retained, taxes paid, salaries paid, *etc.*

I. STUDY DESIGN

*A. The study population: Firms entering the TAAP between June 1981 and April 1984*

For purpose of this evaluation, the population consisted of all firms receiving technical assistance and Trade Act certification between June 1, 1981 and April 24, 1984. The reason for selecting this starting date rather than the beginning of the program was to evaluate the program as it is currently structured. During June, 1981, substantial program changes were initiated in anticipation of the imminent transfer of the program from the Economic Development Administration to the International Trade Administration. This transfer did not take effect until September, 1981. Because of this transfer, OTAA was able to implement changes in the operating procedures, guidelines and administrative management necessary to strengthen the assistance program in place before that date.

To identify the population from which a sample of firms would be selected, HCR used a list supplied by OTAA of all certified firms which had submitted adjustment proposals and received technical assistance during the dates given above. The list contained the names of 487 firms. It represented firms from all 13 regions of the United States and Puerto Rico and those firms that sent their petitions directly to OTAA. Some of the firms were listed more than once because they submitted more than one adjustment proposal and received assistance under each plan. After eliminating multiple listings, there were 426 different firms in the population of certified firms.

HCR considered the inclusion of a control group of firms for comparison purposes. This group was to have included matched firms that received no assistance from OTAA. A feasibility study was conducted which demonstrated that it is not practical to compare TAAC clients to matched controls in a quasi-experimental design. There are two problems: A client firm may be genuinely unique-such as firm x,[1] the sole remaining U.S. manufacturer of a mechanical device, and therefore, incomparable; and a client firm may have a unique product mix, with substantial volume in several 4-digit SICS, such as firm y[1] which makes blister packaged hardware, shopping carts, T.V. antenna parts, and auto accessories.

In principle, it would be possible to compare unique companies to future competitors in their new product line after adjustment. For example, firm x is developing a unique product which will compete both with imports and with U.S. producers. So far, however, few such situations appear to have developed far enough to warrant evaluation.

For companies with unique product mixes, it might be possible to compare them to competitors by SIC for each major product, but there is no assurance that any competitor will be like the client. For instance, firm y with $7 to $8 million in sales competes directly with larger companies which are 10 times its size.

We therefore concluded that a quasi-experimental design, in which TAAP client firms were compared to a matched control group of unassisted firms, was not feasible because reasonably similar controls could not be found. We were obliged to resort to statistical controls—a comparison between TAAP clients and the average behavior of similar firms in their four-digit SIC as described below.

Table 1 shows the distribution of firms in the population and sample by region. In the population the Midwest region has the largest percentage (13.5), followed by the New Jersey region with 13.4 percent and Metro New York with 12.0 percent. The three most recently established regions, Rocky Mountain, Puerto Rico and Great Lakes were established after September, 1981 and did not become operational until after mid-year 1982. This is reflected in the small number of firms listed for those regions. For example, since being established, the Rocky Mountain, Great Lakes and Puerto Rico TAACs have assisted eight, three and four firms, respectively.

Firms in the evaluation sample were classified into 20 different two-digit SIC sectors. These were as diverse as the production of agricultural products to the manufacture of high technology products.

Approximately 22.8 percent of the assisted firms were involved in the manufacture of apparel products (Table 2). This is more than twice as many as any of the other SIC categories listed. Nine of the 13 TAACs had a majority, or equal number, of assisted firms classified in this category. Only the Great Lakes, New York State and New England TAACs differed.

The second most frequent category of firms which were certified was in fabrication of electrical machinery and supplies (11.3 percent). A majority of the firms from the Great Lakes and New York State TAACs, 66.7 and 21.2 percent respectively, were classified in this category.

It has been approximately three-and-a-half years since the first firm was certified after ITA assumed management of the program. This means that the firms in the sample frame have had a maximum of three-and-a-half years to implement their plans and show adjustment. Table 3 indicates the length of time between the date the Adjustment Proposal Review Committee met and December 31, 1984, the last possible quarter for which performance data were available. This table shows how much time the firms have had to implement their adjustment proposals which is also the length of time on which their adjustment can be assessed.

Approximately 50.9 percent of the firms have had two or more years to implement their plans while 84.5 percent have had one or more years. When time interval is compared to type industry, the difference in interest over time can be seen; for example, 28.5 percent of the firms that have been in program for more than 24 months were apparel product firms compared to 16.8 percent of those with less than one year of participation.

*B. Study sample*

This evaluation was based on results from a random stratified sample of firms. Certain criteria were imposed to insure selection of firms with characteristics that were of interest to the evaluation. These characteristics defined the sampling strata.

| 28—Chemical and allied products | 2 | 3.0 | 1 | 1.4 | 2 | 2.8 | 3 | 1.4 | 8 | 1.9 |
| 30—Rubber and miscellaneous products | 3 | 4.5 | 2 | 2.8 | 0 | 0 | 4 | 1.8 | 9 | 2.1 |
| 31—Leather and leather goods | 6 | 9.1 | 3 | 4.2 | 2 | 2.8 | 19 | 8.8 | 30 | 7.0 |
| 32—Stone, glass, concrete products | 0 | 0 | 5 | 7.0 | 3 | 4.2 | 2 | .9 | 10 | 2.3 |
| 33—Primary metals industry | 2 | 3.0 | 3 | 4.2 | 1 | 1.4 | 5 | 2.3 | 11 | 2.6 |
| 34—Fabricated metals, excluding machinery | 8 | 12.1 | 7 | 9.9 | 3 | 4.2 | 19 | 8.8 | 37 | 8.7 |
| 35—Machinery, excluding electrical | 4 | 6.1 | 5 | 7.0 | 13 | 18.0 | 12 | 5.5 | 34 | 8.0 |
| 36—Electrical machinery, equipment | 7 | 10.6 | 7 | 9.9 | 8 | 11.1 | 26 | 12.0 | 48 | 11.3 |
| 37—Transportation equipment | 1 | 1.5 | 1 | 1.4 | 1 | 1.4 | 7 | 3.2 | 10 | 2.3 |
| 38—Measuring, analyzing instruments | 0 | 0 | 3 | 4.2 | 1 | 1.4 | 6 | 2.8 | 10 | 2.3 |
| 39—Miscellaneous manufacturing industries | 7 | 10.6 | 7 | 9.9 | 9 | 12.5 | 16 | 7.4 | 39 | 9.2 |
| Total | 66 | 100.0 | 71 | 100.0 | 72 | 100.0 | 217 | 100.0 | 426 | 10.0 |

The following guidelines were used in selecting the sample:

All regions should be represented in the sample.

All firms must have submitted either a diagnostic survey or an adjustment proposal.

Twenty-five of the included firms must have completed diagnostic surveys, but not adjustment proposals.

Some firms must have submitted adjustment proposals that were not acceptable to OTAA.

Several firms must have completed diagnostic surveys and adjustment proposals without TAAC assistance.

At least 50 of the sample firms must be government suppliers.

A total sample of 249 firms was chosen from all firms entering the program since 1981.

Since the inclusion of firms with diagnostic surveys but no adjustment proposal was an important condition, all firms meeting this condition were taken from the population, stratified by region and a sample of 25

was selected. Ten of the 13 regions had firms that met this condition.

The remainder of the population was then stratified by region, type industry and year certified and a sample of 224 firms selected.

*C. Description of sample*

Table 1 shows the relative number and percent of firms selected by region. Except for differences caused by satisfying the conditions given above, the distribution of firms in the sample was similar to that of the population. As in the study population, the New Jersey and Midwest TAACs had the largest proportion of firms.

Table 4 below shows the source of the diagnostic survey, adjustment proposal and technical assistance for the assisted firms. Assistance in these three areas of intervention can originate from the TAAC, non-TAAC sources, a combination of the two or none at all.[1]

TABLE 4.—SOURCE OF DIAGNOSTIC SURVEY ADJUSTMENT PROPOSAL AND TECHNICAL ASSISTANCE AMONG SAMPLE FIRMS

| Source | Diagnostic survey | | Adjustment proposal | | Technical assistance | |
|---|---|---|---|---|---|---|
| | Number | Percent | Number | Percent | Number | Percent |
| TAAC | 169 | 67.9 | 178 | 71.5 | 193 | 77.5 |
| Non-TAAC | 18 | 7.2 | 15 | 6.0 | 17 | 6.8 |
| Both | 22 | 8.9 | 6 | 2.4 | 5 | 2.0 |
| Not done | 7 | 2.8 | 29 | 11.5 | | .0 |
| Undetermined | 33 | 13.2 | 21 | 8.5 | 34 | 13.7 |
| Total | 249 | 100.0 | 249 | 100.0 | 249 | 100.0 |

TAACs provided the majority of assistance in all three areas, approximately 68 percent for the diagnostic survey, 72 percent for adjustment proposal and 78 percent of the implementation of technical assistance. The large Not Done category under adjustment proposal represents an intentional sampling of firms where no adjustment proposal was done. If a determination of the source of the diagnostic survey, adjustment plan or technical assistance could not be made, it was then classified as "undetermined."

In instances where both TAAC and non-TAAC assistance were received in performing the diagnostic survey or developing the adjustment proposal the source was classified as both.

Table 5 shows the number and percent of the sampled firms classified by their two-digit SIC code. The distribution of firms in the sample is very similar to that in the population.

TABLE 5.—NUMBER AND PERCENT OF SAMPLED FIRMS BY INDUSTRY TYPE AND TWO-DIGIT SIC CODE

| Industry sector | SIC Code | Number | Percent |
|---|---|---|---|
| Agric. production crops | 01 | 6 | 2.4 |
| Agric. production livestock | 02 | 2 | .8 |
| Fishing, hunting, and trapping | 09 | 1 | .4 |
| Bituminous mining | 12 | 1 | .4 |
| Food & kindred products | 20 | 6 | 2.4 |
| Textile mill products | 22 | 17 | 6.8 |
| Apparel products | 23 | 60 | 24.1 |
| Lumber & wood products | 24 | 6 | 2.4 |
| Furniture & fixtures | 25 | 9 | 3.6 |
| Chemical & allied products | 28 | 5 | 2.0 |
| Rubber & misc. products | 30 | 5 | 2.0 |
| Leather & leather goods | 31 | 15 | 6.0 |
| Stone, glass, concrete products | 32 | 6 | 2.4 |

[1] Records of the Technical Assistance Division, OTAA, indicate higher proportions of TACC-assisted activity, suggesting that respondents may have misunderstood this source classification and that the information in Table 4 may be unreliable.

TABLE 5.—NUMBER AND PERCENT OF SAMPLED FIRMS BY INDUSTRY TYPE AND TWO-DIGIT SIC CODE—Continued

| Industry sector | SIC Code | Number | Percent |
|---|---|---|---|
| Primary metals industry | 33 | 8 | 3.2 |
| Fab. metals, exc. machinery | 34 | 22 | 8.8 |
| Machinery, exc. electrical | 35 | 22 | 8.8 |
| Electrical machinery, equipment | 36 | 26 | 10.5 |
| Transportation equipment | 37 | 8 | 3.2 |
| Measuring, analyzing instruments | 38 | 6 | 2.4 |
| Miscellaneous mfg. industries | 39 | 17 | 7.2 |
| Total | | 249 | 100.0 |

Approximately 24.1 percent of the sample firms were classified as apparel industry compared to 22.8 percent in the population. Similar comparisons for other SIC categories are seen between the sample and the population.

Firms in critical industries were another important group. Of the 249 firms in the sample, 47 (18.5 percent) were classified as critical. The criteria for making this determination were contained in an OTAA paper.[2]

Types of financial assistance other than that provided for technical assistance were also of interest for the evaluation. Approximately 67 percent of the sampled firms received no financial assistance and 17 percent received either direct loans or loan guarantees by OTAA, and 16 percent received financial assistance from private sources or SBA (Table 6).

TABLE 6.—NUMBER AND PERCENT OF FIRMS RECEIVING FINANCING BY SOURCE

| Source of financing | Number | Percent |
|---|---|---|
| None | 141 | 66.8 |
| Trade Act direct by OTAA | 23 | 10.9 |
| Trade Act guarantee loan | 13 | 6.2 |
| SBA | 4 | 1.9 |
| Private | 30 | 14.2 |
| Total | [1] 211 | 100.0 |

[1] Financial assistance status of 38 firms could not be determined.

*D. Data collection*

The major issues of concern in this study were:

Extent of adjustment by firms in the program;

Differences in firm adjustment based upon size of firm, industry, TAAC versus non-TACC assistance and firms receiving Trade Act financial assistance;

Extent and effectiveness of trade adjustment technical and financial assistance received;

Extent and effectiveness of non-Trade Act financial assistance received;

Relationship between date adjustment proposal was accepted and likelihood of long-term adjustment;

Extent diagnostic surveys helped firms formulate their areas of opportunity;

Cost reductions resulting from assisting Government suppliers; and

Effect of the program on firms in critical industries.

Measures developed to address these issues were classified into four different areas. These were:

Descriptive Measures:

Type Firm (SIC Code);

Location of Firm (State and Region);

Whether Government Supplier (Information Obtained from TAACs);

Whether Critical Industry;

Size of Firm (Number of Employment, Amount of Sales).

Pre-Certification Performance Measures:

Economic Performance Prior to Certification (Sales, Profits, Employment, etc., by Year).

Intervention Measures:

Date Certified;

Source of Diagnostic Survey;

Date Adjustment Proposal Accepted;

Type and Cost of Assistance Provided;

Operational Areas Reviewed During Diagnostic Survey Process;

Operational Areas Receiving Attention During Adjustment; Proposal Implementation;

Length of Time Between Acceptance of Adjustment Proposal and December 31, 1984.

Outcome Measures:

Economic Performance After Development of Adjustment Proposal;

Current Status of Firm;

Extent of Adjustment.

To collect this information the files of the individual firms were reviewed and were available, the data were extracted. Where data could not be obtained from the files, TAACs were asked to supply whatever they had in their files or contact the firm directly to try and obtain the needed data. Where this was impossible, HCR contacted or tried to contact the firms directly. Performance information on 110 firms were obtained by TAACs and 17 by HCR.

One of the limiting factors of the data collection procedures was the requirement of using routine administrative file data rather than a standardized data collection instrument, which would have made the collection of data uniform for all firms in the sample.

Another limiting factor was lack of authority to require firms to supply post-intervention economic performance data for the evaluation. Some firms would not cooperate, especially those that received only assistance in developing the diagnostic survey or an adjustment proposal from OTAA, which limits inferences to firms that would cooperate in supplying the information.

It is quite possible that since a firm would not provide performance data, its performance was either better or worse than those firms willing to divulge this information. The degree to which this bias may influence our results is discussed below.

Every effort was made, within the time and financial constraints, to collect as complete a set of data as possible. Some of the firms had gone out of business, and since performance data after the acceptance of the adjustment proposal are not routinely collected by OTAA or the TAACs, it was not possible to collect these data. It could be assumed, however, that the performance of the firms that went out of business was not good. Other firms refused to participate.

*E. Data processing*

Data were coded and put on a computer disk and checked for consistency and out-of-range values. The intent was to insure that the data were of the highest quality possible.

The veracity of the data obtained from the firm could not be checked except for consistency. Whether or not a firm falsified its records to show that its stated performance was different from its actual performance, for whatever reason, could not be determined by our procedures if the data provided were internally consistent.

[2] Gren, Jeffrey. "Analysis of the Injury by Foreign Trade of Critical Industries." May 10, 1984; U.S. Department of Commerce, ITA/OTAA.

Frequency distribution of each of the variables were run to check for outliers and out-of-range values. If inconsistent values were found they were re-checked and, where possible, corrections were made.

Data were analyzed using the SPSS (Statistical Packages for the Social Sciences) micro-software package. Cross tabulation, frequency distributions and statistical tests were performed.

## II. STUDY RESULTS

The purpose of this study was to determine how effective the TAAP has been in helping import-impacted firms to recover their economic health. This process of recovery is often called "adjustment", and adjustment has a variety of definitions, all of which fall into one of two general classes:

*Process definitions of adjustment* which are based on activities a firm undertakes to improve its condition. For example, a process definition might include such goals as improving marketing strategy or strengthening management controls by implementing a management information system. Here adjustment is achieved when the troubled firm has completed the processes which are regarded as necessary to solve its problems.

*Outcome definitions of adjustment* depend on more or less objective and measurable indices which reflect the economic status of the firm. For instance an outcome definition might include increased sales by 10 percent and/or show a profit. Here adjustment is accomplished by showing such balance sheet or similar improvements.

Whatever definition one chooses to adopt, it is clear that both process changes and objective outcomes are important. Obviously if a firm has difficulties, it should do something different from what it is currently doing (process changes), and such changes should ultimately result in objective improvements in balance sheet items, or else their relevance is questionable.

To satisfy both requirements, we developed a three-part test of economic adjustment for TAAP client firms. A firm is counted as having adjusted when it achieves all of the following goals:

It has begun work on a majority of the remedial tasks specified in its TAAC-approved adjustment proposal.

It shows significant increases in profits, sales or employment over the period prior to its entry into the TAAP.

Its sales or profitability in the second bullet above are at least equal to the average performance of similar firms in its industrial section (four-digit SIC).

Goal 1 above tries to establish a link between the activities of the TAAC and the subsequent success or failure of a client firm in Goal 2. Obviously if a firm ignores the results of the TAAC's diagnostic survey and fails to act on the adjustment proposal, the TAAC is not responsible for its failure or its success. The test of Goal 3 intends to separate the performance of the client firm from changes in the overall economic climate affecting its particular type of business. The narrowest index of specific economic climate is Robert Morris Associates annual averages of sales, *etc.* by four-digit SIC, for firms of similar size (by sales volume). We compared client firms' performance to these averages to see if any improvement were equal to or greater than those of their peer firms.

### *A. Response rate and representativeness of respondent sample*

One hundred twenty-seven of the 249 firms sampled provided sufficient data to be analyzed for adjustment, a final response rate of about 51 percent. We would like to use this sample to draw inferences about adjustment in the entire population. To do so, we must examine the respondents to see if there is any obvious bias in this group which systematically differentiates them from the overall population.

We compared respondents to the total population in terms of three characteristics, then tested the respondent subsample to see if they were statistically like the parent distributions. The characteristics were:

Duration of experience in TAAP since certification,

TAAC, and

SIC (two-digit).

Tables 7, 8 and 9 show the parent population and corresponding respondent distributions of these three characteristics. Chi-Square tests suggest that the respondents are not precisely representative of the overall population, except for the SIC code. However, there is no reason to suppose that adjustment rate is greatly influenced by these variations between sample and parent population.

TABLE 7.—COMPARISON BETWEEN PARENT POPULATION AND FIRMS ON WHICH OUTCOME DATA WERE AVAILABLE BY TIME SINCE ADJUSTMENT PROPOSAL ACCEPTED

| Length ot time (months) | Parent population | | Outcome data available | |
|---|---|---|---|---|
| | Number | Percent | Number | Percent |
| <12 | 66 | 15.5 | 21 | 16.5 |
| 12 to 17 | 71 | 16.7 | 25 | 19.7 |
| 18 to 23 | 72 | 16.9 | 27 | 21.3 |
| 24 plus | 217 | 50.9 | 54 | 42.5 |
| Total | 426 | 100.0 | 127 | 100.0 |
| $\times^2 = {}^1 3.92$ | d.f. = 4 | | significance = .40 | |

[1] $\times^2$ (Chi-Square) is a statistical measure which, in this and subsequent cases, compares the percentages in two or more categories to see if they are alike. For example, in Table 8 the percentages from the parent population and the firms yielding the outcome data are so different that there is little chance the outcome firms represent a random sample of the parent population by area. However, in Table 9 it is virtually certain that outcome firms are a random sample by SIC.

TABLE 8.—COMPARISON BETWEEN PARENT POPULATION AND FIRMS ON WHICH OUTCOME DATA WERE AVAILABLE BY TAAC AREA

| Area | Parent population | | Outcome data available | |
|---|---|---|---|---|
| | Number | Percent | Number | Percent |
| Mid-Atlantic | 40 | 9.4 | 11 | 8.7 |
| Great Lakes | 3 | .7 | 2 | 1.6 |
| Mid-America | 19 | 4.5 | 8 | 6.3 |
| Metro-New York | 51 | 12.0 | 17 | 13.4 |
| Midwest | 58 | 13.6 | 14 | 11.0 |
| New England | 45 | 10.6 | 18 | 14.2 |
| New Jersey | 57 | 13.4 | 9 | 7.1 |
| Northwest | 14 | 3.3 | 10 | 7.9 |
| New York State | 33 | 7.7 | 3 | 2.4 |
| Puerto Rico | 4 | .9 | | |
| Rocky Mountain | 8 | 1.9 | 3 | 2.4 |
| Southeast | 33 | 7.7 | 10 | 7.9 |
| Western | 42 | 9.9 | 17 | 13.4 |
| Other | 19 | 4.5 | 5 | 3.9 |
| Total | 426 | 100.1 | 127 | 100.2 |
| $X^2 = 42.13$ | d.f. = 14 | | significance = 0.00 | |

TABLE 9.—NUMBER AND PERCENT OF FIRMS ON WHICH OUTCOME DATA WERE AVAILABLE BY SIC CODE

| SIC | Parent population | | Outcome data available | |
|---|---|---|---|---|
| | Number | Percent | Number | Percent |
| 01 | 11 | 2.6 | 2 | 0.9 |
| 02 | 3 | .7 | | |
| 09 | 1 | .2 | | |
| 12 | 1 | .2 | 1 | .9 |
| 20 | 8 | 7.5 | 1 | .9 |
| 22 | 32 | 7.5 | 9 | 6.6 |
| 23 | 97 | 22.8 | 31 | 19.8 |
| 24 | 11 | 2.6 | 5 | 3.8 |
| 25 | 16 | 3.8 | 2 | 3.8 |
| 28 | 8 | 1.9 | 2 | 1.9 |
| 30 | 9 | 2.1 | 2 | 2.8 |
| 31 | 30 | 7.0 | 8 | 6.6 |
| 32 | 10 | 2.3 | 3 | 2.8 |
| 33 | 11 | 2.6 | 5 | 4.7 |
| 34 | 37 | 8.7 | 13 | 9.4 |
| 35 | 34 | 8.0 | 12 | 10.4 |
| 36 | 48 | 11.3 | 13 | 11.3 |
| 37 | 10 | 2.3 | 3 | 3.8 |
| 38 | 10 | 2.3 | 2 | 1.9 |
| 39 | 39 | 9.2 | 13 | 10.2 |
| Total | 426 | 100.0 | 127 | 100.0 |
| $\times^2 = 9.30$ | d.f. = 20 | | significance = 0.98 | |

There are other ways in which the respondent sample might be biased with respect to adjustment. Since our purpose is to determine adjustment rate (percentage of firms achieving economic adjustment), we must ensure that the respondent sample, even if otherwise representative, is not biased in favor of more successful firms or against unsuccessful ones. For instance, TAACs might have consciously or unconsciously discouraged responses from firms they knew to be failures.

To test this possibility, we divided respondents into two groups—those sampled by the TAACs and those contacted directly by HCR. If the TAACs had (consciously or inadvertently) selected the better firms and encouraged their response while ignoring their less well-off clients, then we might suppose that the adjustment rate would be significantly higher in the TAAC-sampled group.

Table 10 shows that adjustment rates in firms sampled by HCR and by the TAACs are virtually identical (both about 35 percent). Therefore we conclude that the TAACs themselves did not contribute to any response bias in favor of successful firms.

TABLE 10.—RELATIONSHIP BETWEEN SOURCE OF OUTCOME DATA AND ADJUSTMENT STATUS

| Source of outcome data | Adjustment status | | | |
|---|---|---|---|---|
| | Adjustment criteria satisfied | Adjustment criteria not yet satisfied | Out-of business | Total |
| HCR: | | | | |
| Number | 6 | 8 | 3 | 17 |
| Percent | 35.3 | 47.1 | 17.6 | 13.4 |
| TAAC.s: | | | | |
| Number | 38 | 48 | 24 | 110 |
| Percent | 34.5 | 43.6 | 21.8 | 86.6 |
| Total: | | | | |
| Number | 44 | 56 | 27 | 127 |
| Percent | 34.6 | 44.1 | 21.3 | 100.0 |
| $\times^2 = 0.16$ | d.f. = 2 | significance = 0.92 | | |

In general, we cannot conclude that the respondent sample is perfectly representative of the total study population. However, whatever biases exist seem to be relatively unimportant to adjustment rate. Moreover, we will be able to show that there is a substantial minimum adjustment rate which is unaffected by any response bias.

*B. Analysis of Respondent Data*

*1. Extent of Adjustment.*—Approximatley 35 percent of the 127 respondent firms were classified as adjusted, having met all three of the adjustment criteria. Forty-four percent did not meet all criteria and 21 percent were out of business.

TABLE 11.—NUMBER AND PERCENT OF FIRMS ADJUSTED

| Adjustment status | Number | Percent |
|---|---|---|
| Adjustment criteria satisfied | 44 | 34.6 |
| Adjustment criteria not yet satisfied | 56 | 44.1 |
| Out of business | 27 | 21.3 |
| Total | 127 | 100.0 |

Adjustment may obviously depend on a number of factors including size, length of time since certification, type of industry, etc. For example, firms that have received assistance within the last year have had less time to adjust than firms with longer durations. Conversely, these firms have had less time to fail (go out of business) than the older firms.

Many of the respondent firms met some of the adjustment criteria but not all three. Table 12 shows the percentage passing each of the individual adjustment criteria (or sub-criteria), broken down according to whether they were completely adjusted or not.

TABLE 12.—PERCENTAGE OF FIRMS PASSING EACH ADJUSTMENT CRITERIA

| Adjustment criteria | Firms satisfying | | Total percent for criterion |
|---|---|---|---|
| | All adjustment criteria (percent) | Not all criteria (percent) | |
| Progress on majority of adjustment proposal tasks | 44 | 28 | 72 |
| Increased sales | 39 | 13 | 52 |
| Increased profit | [1] 29 | [1] 2 | [1] 31 |
| Increased employment | [1] 30 | 8 | 38 |
| Exceeded SIC performance | [1] 31 | 1 | [1] 32 |

[1] These rates are lower than overall adjustment rates because they were based on a subsample of respondents.

For example, 72 percent had made progress on a majority of the goals required by their adjustment proposals. Of these, more than a third (28 percent) had not yet met all the other criteria, but presumably might do so sometime in the future. Therefore there is a possibility that overall adjustment rates might increase if this same sample of firms were analyzed at a later date.

Table 13 also demonstrates that the most rigorous criteria in our adjustment definition are the balance sheet test—increased profitability—and comparative performance with respect to similar-size companies in the same four-digit SIC group. In other words, it is really absolute and relative profit ability that control the observed adjustment rates under our definition.

*2. Size of Firm.*—To classify firms by size, the total dollar sales just prior to certification were used. Firms were classified into less than $1 million sales, $1-5 million sales and more than $5 million sales categories. Firms with less than $1 million in sales where much less likely to adjust than those with more than $1 million in sales. They were also more than twice as likely to go out of business than the large firms (Table 13).

TABLE 13.—NUMBER AND PERCENT OF FIRMS ADJUSTING BY FIRM'S SALES VOLUM

| Size of firm (total dollar sales) | Adjustment status | | | |
|---|---|---|---|---|
| | Adjustment Criteria satisfied | Adjustment criteria not satisfied | Out of business | Total |
| Less than 1 million: | | | | |
| Number | 6 | 15 | 10 | 31 |
| Percent | 19.4 | 48.4 | 32.3 | 100.1 |
| 1–4.999 milion: | | | | |
| Number | 25 | 21 | 3 | 49 |
| Percent | 51.0 | 42.9 | 6.1 | 100.0 |
| 5 plus million: | | | | |
| Number | 13 | 18 | 5 | 36 |
| Percent | 36.1 | 50.0 | 13.9 | 100.0 |
| Total [1]: | | | | |
| Number | 44 | 54 | 18 | 116 |
| Percent | 37.9 | 46.6 | 15.5 | 100.0 |

$X^2 = 13.77$ d.f. = 4 significance = 0.01

[1] Sales volume for 11 firms could not be determined.

*3. Time Since Adjustment Proposal Accepted.*—To assess the effect of time on adjustment, the time interval between date of acceptance of the adjustment proposal and December 31, 1984 were used. These intervals were then classified into <12, 12–17, 18–23 and 24+ month categories. The majority of firms (54) fell into the 24+ months group with the other categories having about equal numbers.

There appears to be a tendency for adjustment rates to increase with greater time intervals (Table 14).

TABLE 14.—RELATIONSHIP BETWEEN TIME SINCE ACCEPTANCE OF ADJUSTMENT PROPOSAL AND ADJUSTMENT STATUS

| Time since acceptance of adjustment plan (months) | Adjustment status | | | |
|---|---|---|---|---|
| | Adjustment criteria satisfied | Adjustment criteria not yet satisfied | Out-of-business | Total |
| Less than 12: | | | | |
| Number | 6 | 14 | 1 | 21 |
| Percent | 28.6 | 66.7 | 4.8 | 100.1 |
| 12 to 17: | | | | |
| Number | 9 | 13 | 3 | 25 |
| Percent | 36.0 | 52.0 | 12.0 | 100.0 |
| 18 to 23: | | | | |
| Number | 11 | 11 | 5 | 27 |
| Percent | 40.7 | 40.7 | 18.5 | 99.9 |
| 24 plus: | | | | |
| Number | 18 | 18 | 18 | 54 |
| Percent | 33.3 | 33.3 | 33.3 | 99.9 |
| Total: | | | | |
| Number | 44 | 56 | 27 | 127 |
| Percent | 34.6 | 44.1 | 21.3 | 100.0 |

$X^2 = 12.31$ d.f. = 6 significance = 0.06

The <12 months interval has a rate of 28.6 percent compared to 40.7 percent for the 18–23 months interval. The "adjusted" and "not yet-adjusted" are identical for the 18–23 and 24+ months intervals (except the out-of-business category increases). However, if the overall adjustment rates for firms under 18 months and 18 or greater are compared, the difference is not statistically significant at the 95 percent level ($z=0.37$, $p=0.36$)

Table 14 however, gives a biased picture of the effect of time on adjustment rate, because different time periods contain differing proportions of SICs (See Table 3). Since some SICs have been more successful overall at achieving adjustment than others, these differences distort the rates in Table 14.

Table 15 takes account of SIC differences by weighting each SIC equally and computing an average adjustment rate as if each SIC were equally represented in the periods less than and greater than 18 months. The averages for these two periods are about the same—30 and 32 percent—suggesting, as found above, that so far adjustment rates has not increased with duration in the program.

TABLE 15.—ADJUSTMENT RATE BY TIME SINCE ADJUSTMENT PROPOSAL ACCEPTANCE FOR MAJOR SIC'S

| SIC [1] and industry | Percent adjusted (number) | | | |
|---|---|---|---|---|
| | Less than 18 mos. | | 18 mos. and longer | |
| 22—Textile mill products | 67 | (6) | 67 | (3) |
| 23—Apparel products | 13 | (8) | 30 | (23) |
| 24—Lumber & wood products | 33 | (3) | 0 | (2) |
| 31—Leather & leather goods | 50 | (2) | 33 | (6) |
| 33—Primary metals industry | 0 | (3) | 0 | (2) |
| 34—Fab. metals, exc. machinery | 20 | (5) | 13 | (8) |
| 35—Machinery, exc. electrical | 60 | (5) | 57 | (7) |
| 36—Electrical machinery, equipment | 0 | (4) | 44 | (9) |
| 39—Miscellaneous mfg. industries | 25 | (4) | 44 | (9) |
| Overall rate (equally weighted SIC's) | 30 | (40) | 32 | (69) |

[1] For SIC's containing 5 or more firms.

*4. Source of Diagnostic Survey and Adjustment Plan.*—Approximately 91.3 percent of the diagnostic surveys and 89.0 percent of the adjustment proposals of the 127 firms were developed using TAAC technical assistance.

TAAC assisted firms adjusted at a rate of 37.0 percent while non-TAAC assisted firms adjusted at a rate of 11.1 percent (Table 16).

TABLE 16.—RELATIONSHIP BETWEEN SOURCE OF DIAGNOSTIC SURVEY AND ADJUSTMENT STATUS

| Source of diagnostic survey | Adjustment status | | | |
|---|---|---|---|---|
| | Adjustment criteria satisfied | Adjustment criteria not yet satisfied | Out-of-business | Total |
| TAAC: | | | | |
| Number | 40 | 50 | 18 | 108 |
| Percent | 37.0 | 46.3 | 16.7 | 100.0 |
| Non-TAAC: | | | | |
| Number | 1 | 2 | 6 | 9 |
| Percent | 11.1 | 22.2 | 66.7 | 100.0 |
| Both: [1] | | | | |
| Number | 3 | 3 | 2 | 8 |
| Percent | 37.5 | 37.5 | 25.0 | 100.0 |

| Number | 1 | 5 | 3 | 9 |
| Percent | 11.1 | 55.6 | 33.3 | 100.0 |
| Total: | | | | |
| Number | 44 | 56 | 27 | 127 |
| Percent | 34.6 | 44.1 | 21.3 | 100.0 |
| $X^2 = 40.37$ | d.f. = 34 | significance = 0.20 | | |

[1] Both TAAC and Private Source participated in the development of adjustment proposal.

*5. Type Firm.*—Most two-digit SIC categories did not contain sufficient numbers of firms to permit inferences about each particular group. Groups where eight or more firms responded included textile mill products (66.7 percent), leather and leather goods (37.5 percent), machinery excluding electrical (58.3 percent) and miscellaneous manufacturing industries (38.5 percent). These groups showed results above the average of 34.9 percent (Table 18). Fabricated metal excluding machinery (15.4 percent) and electrical machinery (30.8 percent) showed less than the average adjustment rate.

TABLE 18.—RELATIONSHIP BETWEEN 2-DIGIT SIC CODE FIRMS AND ADJUSTMENT STATUS

| Percent | 44.8 | 51.7 | 6.8 | 100.0 |
| Total (Number) | 23 | 18 | 3 | 44 |
| Percent | 52.3 | 40.9 | 6.8 | 100.0 |
| $X^2 = 4.75$ | d.f. = 2 | significance = 0.09 | | |
| Private loans: | | | | |
| Number | 9 | 11 | 0 | 20 |
| Percent | 45.0 | 55.0 | 0 | 100.0 |
| Other loans: | | | | |
| Number | 14 | 7 | 3 | 24 |
| Percent | 58.3 | 29.2 | 12.5 | 100.0 |
| Total (Number) | 23 | 18 | 3 | 44 |
| Percent | 52.3 | 40.9 | 6.8 | 100.0 |
| $X^2 = 4.65$ | d.f. = 2 | significance = 0.10 | | |
| No financial assistance: | | | | |
| Number | 21 | 29 | 20 | 70 |
| Percent | 30.0 | 41.4 | 28.6 | 100.0 |
| Loan: | | | | |
| Number | 23 | 18 | 3 | 44 |
| Percent | 52.3 | 40.9 | 6.8 | 100.0 |
| Total (Number) | 44 | 47 | 23 | 114 |
| Percent | 38.6 | 41.2 | 20.2 | 100.0 |
| $X^2 = 9.81$ | d.f. = 2 | significance = 0.01 | | |

*6. Firms Receiving Financial Assistance.*—Firms receiving loans adjusted at a rate of 52.3 percent compared to 30.0 percent for those that did not. Non-financially assisted firms had an out-of-business rate of more than four times that of financially assisted firms (Table 19).

Firms that received OTAA direct loans adjusted at a rate of 66.7 percent compared to a 44.8 percent rate for those receiving other types of loans.

*7. Critical Industry and Government Supplier.*—Tables 20 and 21 show the effects of being a critical industry and government supplier on adjustment. There is no basic difference between adjustment rates for critical (33.3 percent) and non-critical (34.9 percent) industry.

Government suppliers (41.7 percent) do, however, adjust at a higher rate than do non-government suppliers (33.0 percent). Non-government suppliers also go out of business at a much higher rate than do government suppliers (25.3 percent versus 4.2 percent).

*8. Still in Business Status.*—To better understand what has happened to three classes of firms for which little or no outcome data were available, the Dun & Bradstreet Credit Rating Reference Book [3] was used. The three classes of firms of interest were: firms with no adjustment plans, firms with no outcome data and firms that had not yet satisfied the adjustment criteria.

To determine the percent of the three classes of firms that were still in business it was assumed that any firm listed in these books is still in business and that those not listed are those for which Dunn & Bradstreet has not received a credit rating request within the last 18 months and might be out of business. The results of this exercise are shown in Table 22.

Table 22 shows that a very high percentage of all three classes of firms are still in business. Firms that have not yet satisfied the adjustment criteria have a "still in business" rate of 87.5 percent compared to 81.1 and 74.1 percent for the "no outcome data available" and no adjustment proposal submitted groups, respectively. For the group on which outcome data was available 21.3 percent were out of business (Table 10). The means that a large percentage of firms that have not yet met the adjustment criteria still have a chance to achieve that result. However, firms that have satisfied the adjustment criteria might reverse their experiences in the future, resulting in the same rates given in Table 10.

### III. CONCLUSIONS

These results suggest that the TAAP has had success in aiding trade-impacted firms. About 35 percent of the respondents appeared better off than they were before entering the program, and, so far as it is possible to determine, their turnaround was associated with following the advice of the TAAC embodied in their adjustment proposals and the implementation technical assistance and financial assistance they received. Clients who we determined to be adjusted as a result of the TAAP have out-performed their industrial sector counterparts.

There are two qualifications that must be considered in interpreting these findings. First, the TAAP is selective and discourages certified firms in particularly weak financial condition from seeking assistance. Furthermore, firms that cannot develop viable recovery strategies are not eligible to receive implementation technical assistance or financial assistance. Therefore the 35 percent adjustment rate applies only to a subpopulation of trade-impacted businesses and not to all firms applying or hurt by foreign imports. In other words, if all companies having financial problems resulting from foreign trade had received help under the TAAP, the adjustment rate might have been lower. Therefore, the TAAP has been successful in mitigating trade impact problems in a special sense: it has helped suitable firms.

The second qualification is statistical. With a response rate of 51 percent, the adjustment status of many of the firms is unknown. Although the respondents appear reasonably similar to the whole population of the TAAP clients in some respects, it is not clear that response was not biased in favor of business success or vice versa. That is, more successful firms might have been more likely to respond. On the other hand, the adjustment rate may be understated since successful firms might not want to give the TAAC credit for their success, especially if they do not need further TAAP assistance.

However, even if all non-respondents were counted as unadjusted, the minimum value of adjustment rate demonstrated by this study would still be 44/250, or about 18 per-

[3] Dun & Bradstreet. Credit Rating Reference Book: May, 1985.

cent. Conversely, if all non-respondents still in business are counted as adjusted, the adjustment rate would be as high as 79 percent. We are therefore confident that the TAAP has succeeded in significantly improving the economic status of somewhere between 18 and 79 percent of its client firms.

Since there is a tendency for adjustment rates to increase slightly with the firm's duration in the program, the observed rate of 35 percent may rise somewhat as more time passes. There is a great likelihood that this will occur since a large percentage of the firms that have not yet met the adjustment criteria are still in business. However, what is really important in these results is not the exact value of the adjustment rate (since, in any case, it is the rate corresponding to an arbitrary definition of adjustment). What is crucial is that a substantial fraction—at least a fifth to a third—of the trade-impacted client firms have been helped to stay in business, and that this rate is not 1 or 2 percent, on one hand, nor is it approaching 90–100 percent on the other. This is the most precise conclusion available from such rough data.

TABLE 20.—RELATIONSHIP BETWEEN BEING CLASSIFIED AS A CRITICAL INDUSTRY AND ADJUSTMENT STATUS

| Critical industry status | Adjustment status— Adjustment criteria satisfied | Adjustment criteria not yet satisfied | Out-of-business | Total |
|---|---|---|---|---|
| Noncritical industry: | | | | |
| Number | 37 | 46 | 23 | 106 |
| Percent | 34.9 | 43.4 | 21.7 | 100.2 |
| Critical industry: | | | | |
| Number | 7 | 10 | 4 | 21 |
| Percent | 33.3 | 47.6 | 19.0 | 99.9 |
| Total: | | | | |
| Number | 44 | 56 | 27 | 127 |
| Percent | 34.6 | 44.1 | 2.4 | 100.0 |

$X^2 = 0.04$ d.f. = 2 significance = 0.93

TABLE 21.—RELATIONSHIP BETWEEN BEING A GOVERNMENT CONTRACTOR AND ADJUSTMENT STATUS

| Contractor status | Adjustment status— Adjustment criteria satisfied | Adjustment criteria not yet satisfied | Out-of-business | Total |
|---|---|---|---|---|
| Nongovernment | | | | |
| Number | 34 | 43 | 26 | 103 |
| Percent | 33.0 | 41.7 | 25.3 | 100.0 |
| Government: | | | | |
| Number | 10 | 13 | 1 | 24 |
| Percent | 41.7 | 54.2 | 4.2 | 100.1 |
| Total: | | | | |
| Number | 44 | 56 | 27 | 127 |
| Percent | 34.6 | 44.1 | 21.3 | 100.0 |

$X^2 = 5.17$ d.f. = 2 significance = 0.08

TABLE 22.–PERCENT AND NUMBER OF FIRMS "STILL IN BUSINESS" BY STATUS OF FIRM

| Status | Still in business | | Out of business | | Total | |
|---|---|---|---|---|---|---|
| | Number | Percent | Number | Percent | Number | Percent |
| No adjustment plan submitted | 20 | 74.1 | 7 | 25.9 | 27 | 100.0 |
| No outcome data available | 99 | 81.1 | 23 | 18.9 | 122 | 100.0 |
| Not yet satisfied adjustment criteria | 49 | 87.5 | 7 | 13.5 | 56 | 100.0 |

HCR,
*Rochester, NY, April 17, 1986.*

Mr. AUGUST G. FROMUTH,
*Deputy Assistant Secretary for Trade Adjustment Assistance, U.S. Department of Commerce, International Trade Administration, Washington DC.*

DEAR MR. FROMUTH: As per the request from Mr. Jeffrey Gren, Technical Assistant Specialist on our staff, HCR has adjusted the data on financial assistance in its report on the Trade Adjustment Assistance Program. Mr. Gren provided new statistical information, which differed from that gathered in our research conducted in coordination with the TAACs. The results given in Table 19 on page 37 of the report and the conclusions based on those results are affected.

The net effect of these changes is that fewer firms received Trade Act direct assistance than is stated in the report. In the report, 15 firms were reported as having received direct assistance, when in fact only nine did. The interpretation of the percentages is not meaningful statistically because of the very small sample. A small change in the numbers, as requested, produced radical changes in the percentages.

This affected the results of the study as follows:

Percent of firms that received Trade Act direct loans and adjusted decreased from 66.1 to 44.4.

Percent of firms that received Trade Act direct loans and had not yet satisfied adjustment criteria increased from 20.0 to 33.3.

Percent of firms that received Trade Act direct loans and were out-of-business increased from 13.31 to 22.3.

Percent of firms that received no financial assistance, Trade Act or other, increased from 30.0 to 33.8.

Another change that we suggest to be made to the report is to the conclusion we made in the second paragraph on page 43. This conclusion might be misleading and cast doubt on the precision of the results. Consequently, we suggest that this entire paragraph be deleted. We also suggest that the phrase, "at least a fifth to a third," and the sentence, "This is the most precise conclusion available from such rough data," in the last paragraph on page 42 be deleted.

In order to make these changes, HCR went back into its computer files and modified the data base. We revised Table 19 and made the necessary changes to the text. These changes were made and copies of the report were prepared at a cost of approximately $2,400, leaving about $19,400 left in the contract.

While we have made the requested changes, we have not verified the data provided, nor attempted to determine why the new data differed from that collected from the TAACs during the data-gathering phase of the contract effort. Further, because of programmatic changes in the TAACs, it is impossible for HCR to verify the information at this point. We have, however, been assured by Mr. Jeffrey Gren that his information, and not that originally collected, is correct.

Yours truly,

LOUISE WOERNER,
*President.*●

## NAUM AND INNA MEIMAN: PHYSICIANS JOIN INTERNATIONAL CANCER PATIENT SOLIDARITY COMMITTEE

● Mr. SIMON. Mr. President, my friends Naum and Inna Meiman desperately want to emigrate from the Soviet Union so they may seek alternative medical treatment for Inna who is suffering from cancer.

This past June, Naum and Inna helped found the International Cancer Patient Solidarity Committee with two other refusenik cancer patients. Tatiana Kheifets-Bogomolaya and Benjamin Charny, to publicly seek support for their release.

Several medical scientists and physicians have since formed committees in Montreal, New York, Boston, Detroit, Chicago, Los Angeles, Edmonton, Vancouver, London, and Tel Aviv to support the rights of Soviet cancer patients denied exit visas.

I submit for the CONGRESSIONAL RECORD a letter of their endorsement.

I strongly urge the Soviet authorities to allow the Meimans exit visas to Israel.

FACULTY OF MEDICINE,
UNIVERSITY OF TORONTO,
*Toronto, Ontario, July 28, 1986.*

His Excellency MIKHAIL S. GORBACHEV,
*Secretary-General of the Communist Party, Kremlin, Moscow, Union of Soviet Socialist Republics.*

DEAR MR. SECRETARY-GENERAL: We, Canadian and American physicians and medical scientists, urge you to intervene personally in the cases of Tatyana Bogomolny, Rimma Bravve, Benjamin Charny and Inna Meiman. All four of these people were stricken with potentially lethal forms of cancer and other serious illnesses while awaiting permission to leave the Soviet Union. For years all of them have been trying to rejoin their close relatives outside the U.S.S.R. Now may be their last chance for reunification.

As physicians and medical scientists we deeply sympathize with the plight of all cancer patients. Separation from their families only aggravates the tragedies of their illnesses. We appeal to you to assist Tatyana Bogomolny, Rimma Bravve, Benjamin Charny and Inna Meiman by granting their wish to be reunited with their relatives abroad.

Permitting reunification of these families is a humanitarian action which will be greatly appreciated by people everywhere. A positive response by the Soviet Government in these tragic matters of life and death will contribute greatly to mutual understanding and better relations between our countries.

Thank you for your consideration of the cases of these unfortunate people.

Yours sincerely,

FREDERICK H. LOWY, M.D.,
*Dean of Medicine,*
*University of Toronto.*

## PREVENTING ILLITERACY

● Mr. ZORINSKY. Mr. President, today I would like to share with my colleagues another letter which I have received supporting my view that emphasis should be placed on the prevention of illiteracy, rather than on remediation.

The letter follows:

MAY 26, 1986.

Senator EDWARD ZORINSKY,
*U.S. Senate,*
*Washington, DC.*

DEAR SENATOR ZORINSKY: I appreciate your efforts on behalf of improving the methodology that is used in the teaching of beginning reading.

I have taught for the last seventeen years, mostly on the first grade level. It has been my experience that a phonetic approach in the teaching of reading, primarily the approach espoused in the Lippincott Teacher's Manual, is the most effective approach. Not only has the effectiveness of this approach been confirmed by my own experience; it has also been confirmed by a major research project entitled "A three year look at i.t.a., Lippincott, Phonics and Word Power, and Scott, Foresman," by Robert B. Hayes and Richard C. Wuest (The Reading Teacher, Volume 22, No. 4, January, 1969), and in Jeanne S. Chall's books, Learning to Read: The Great Debate (1967) and Stages of Reading Development (1983), among others.

I agree with your position that the emphasis in education should be placed on the prevention of reading difficulties, rather than on remediation. Unfortunately, in spite of the evidence supporting the teaching of phonics, not enough attention is given to the systematic use of phonics in beginning reading instruction in our schools. Most attention to phonics is incidental, rather than central, to the teaching of beginning reading.

Certainly there is a need for remediation of reading problems. If a child has difficulties in learning to read, and these difficulties are not corrected or in the process of being corrected by third grade, the prognosis for his academic success is poor. It is hoped that with the use of the most effective methodology in beginning reading, the number of cases requiring remediation would be reduced. Remediation remains a more expensive proposition than prevention and is more painful for the recipient. Hence, my support is for a central focus to be placed on effective teaching of reading and prevention of reading problems, rather than remediation.

Thank you for your interest in, and attention to, this important educational issue.

Sincerely yours,

LINDA S. BRESCH.●

## PROF. ANATOLY RABEN

● Mr. JOHNSTON. Mr. President, I wish to bring to light the plight of yet another Soviet family who has been denied its right to emigrate from the Soviet Union. It is important that we speak out and be aware of the Soviet Government's infringement on human rights. Only by speaking out can we hope to prompt the Soviet Government into letting these people move about freely.

Today, I would like to call attention to Prof. Anatoly Raben and his family. In 1979, Anatoly applied for a visa to join relatives living in the West. Because he applied for the visa, 25 years of research and practice in the field of dermato-venerology and dermato-oncology was abruptly brought to an end. He was forced to resign from his positions at the Moscow Cancer Research Center, the Institute of Industrial Hygiene and Occupational Diseases, and from his numerous editorial posts. He did not learn that his application was denied until early 1982—3 years after the fact. The sole reason for the refusal was that he had "no grounds to apply for an emigration visa."

It is no wonder that Anatoly applied for a visa, with the history of conflict he and his family have had with the Soviet Government. In 1932, his father, Solomon, was arrested and sentenced to 10 years in prison. But in 1936, he was released. Then, again in 1937, Solomon was arrested but this time he was executed.

In 1950, Anatoly was arrested and accused as the "son of an enemy of the people." He was tortured and held prisoner in Lubyanka and Butyrka because he would not sign a confession. He was sentenced to 10 years in a labor camp. Two weeks after his arrest, his mother was arrested and accused as a "socially dangerous person." She was exiled for 8 years in northern Kazakhstan. She was released and rehabilitated in 1954. Until July 1954, Anatoly was in a special camp for political prisoners. In August 1954, he was released and a few months later rehabilitated.

Anatoly is married and has two children, both of whom have children. His older daughter, Nina Raben-Belenky, is a physician and microbiologist. Simply because her father had applied for an exit visa, Nina is unable to find employment. By applying for this visa, all of their lives were affected. Why should the whole family be punished because Anatoly wishes for a better life with freedom of movement as well as religion, for himself and his family?

Mr. President, as a country with freedom of religion, speech, and movement, it is hard for us to imagine the suffering Soviet dissidents experience through the denial of their rights. By speaking out against and being aware of those countries that have little value for human rights, we may eventually be able to stop this atrocity.●

## TRIBUTE TO GEORGE O'BRIEN LATE A U.S. REPRESENTATIVE

● Mr. HOLLINGS. Mr. President, on July 17 of this year, Illinois lost one of her most effective Representatives, the Nation lost a dedicated public servant and we in the Congress lost a distinguished and valued colleague. Many words have been written about George O'Brien extolling his warmth, his congeniality, and his valiant struggle during the last several months. Each of us who knew George have our own personal memories which we will cherish. My own are of meetings of the Conference Committee on Appropriations through the years. I have often thought sessions like these test the true mettle of a person, particularly a politician. There are no television cameras, no reporters, and no constituents present. In short, it is a place for thrashing out differences, a task which often seems thankless as well as terribly time-consuming. George was always there, always participating and always able to cool tempers by providing a practical approach to thorny problems and at times a ready quip (or even one of his renowned bad jokes) to clear the atmosphere. All of us in public life have had the privilege of meeting a great number of people. Naturally, some impress more than others. And occasionally, one stands out as the epitome of a fine human being. This was George O'Brien and I will truly miss him.

To his beloved Mary Lou, their daughters, and grandsons, I extend deepest sympathy. May their warm and loving memories of this truly outstanding gentleman sustain them in this time of sorrow as our remembrances sustains us, his friends.●

## MARIE McMILLAN—AVIATION SPEED RECORD HOLDER

● Mr. LAXALT. Mr. President, on July 22, 1986, it was my pleasure to present to Mrs. Marie McMillan, of Las Vegas, NV, a plaque for a world aviation speed record. She was also honored by the National Aeronautic Association and the Aero Club of Washington in recognition of holding the greatest number of aviation records ever set by one individual. Mrs. McMillan currently holds 326 world speed records.

Most of the records were established by flying a F33A Bonanza between cities in the United States, Mexico, and the Carribean Islands during the past 2 years. She also holds a speed record for turboprop powered light aircraft which was set during the Reno Air Races in 1985.

I would like to share with my colleagues the text of the U.S. plaque which was presented to her.

The National Aeronautic Association—representing in the United States of America the Federation Aeronautique Internationale—awards this Certificate of Record to Marie McMillan for a U.S. National Speed Record, Las Vegas, Nevada to Hermosillo, Mexico, Class C-1 and C-1c, Piston Engine Light Airplanes. Beechcraft Bonanza F33A, N23534. Elapsed Time: 3 hours 19 minutes 13 seconds. Speed: 162.19 mph. Date: January 31, 1984.

In responding, Mrs. McMillan responded how happy she was to have established this remarkable series of records and to have set targets which would surely bring about major advances in aviation. She is also proud of the fact that her 326 world records and 326 national records help make the United States the world leader in this field with a total exceeding that of all other countries combined.

The State of Nevada is very proud of Mrs. McMillan and her many contributions to her country.●

□ 1100

The PRESIDING OFFICER (Mr. HATFIELD). Who seeks recognition?

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDERS FOR SATURDAY

### RECESS UNTIL 9:30 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that, once the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. on Saturday, August 9, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

### RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I further ask unanimous consent that, following the recognition of the two leaders under the standing order, there be special orders in favor of the following Senators not to exceed 5 minutes each: Senator HAWKINS and Senator PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

### ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PROGRAM

Mr. DOLE. Mr. President, following routine morning business, the Senate will resume consideration of S. 2638, the DOD authorization bill. Rollcall votes can be expected throughout the day on Saturday. In fact, there is an indication that there will be 12 rollcall votes on the DOD authorizaton.

I believe I stated earlier that we would not get the agreement which contains another vote on the debt ceiling until tomorrow afternoon. I think I will revise that for the RECORD. We may try to get the agreement tomorrow morning. But all Members will be on notice. It is an agreement that we have been working on for a number of days, but there may be some Senators who, properly, want to raise questions about the agreement. It involves South Africa, aid to the Contras, and, in addition, it permits us to move to the debt ceiling quickly and have final disposition of that.

So there will be at least a dozen rollcalls, and perhaps one additional one.

I am reminded that the unanimous-consent agreement also contains an agreement concerning the so-called Boren political action committee amendment. So it is a rather very important agreement and I urge my colleagues to be on notice.

## RECESS UNTIL 9:30 A.M.

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move we stand in recess until the hour of 9:30 a.m., Saturday, August 9, 1986.

The motion was agreed to; and, at 11:07 p.m., the Senate recessed until Saturday, August 9, 1986, at 9:30 a.m.

## NOMINATIONS

Executive nominations received by the Senate August 8, 1986:

### EXECUTIVE OFFICE OF THE PRESIDENT

William R. Graham, of California, to be Director of the Office of Science and Technology Policy, vice George A. Keyworth II, resigned.

### DEPARTMENT OF ENERGY

James Allen Wampler, of Illinois, to be an Assistant Secretary of Energy (Fossil Energy), vice Helmut A. Merklein, resigned.

### IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3040(b), to be appointed as Assistant Surgeon General/Chief, Dental Corps, U.S. Army:

Brig. Gen. Billie B. Lefler, [redacted], U.S. Army.

The following-named officers for appointment in the Regular Army of the United States to the grade indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

*To be brigadier general*

Col. William J. Meehan II, [redacted], U.S. Army.
Col. Neal T. Jaco, [redacted], U.S. Army.
Col. William J. Mullen III, [redacted], U.S. Army.
Col. Craig A. Hagan, [redacted] U.S. Army.
Col. Frank A. Partlow, Jr., [redacted], U.S. Army.
Col. Edison E. Scholes, [redacted] U.S. Army.
Col. Philip Y. Browning, Jr., [redacted], U.S. Army.
Col. Gerald H. Putman, [redacted] U.S. Army.
Col. Sidney Shachnow, [redacted] U.S. Army.
Col. Henry F. Drewfs, Jr., [redacted], U.S. Army.
Col. James D. Starling, [redacted] U.S. Army.
Col. Marc A. Cisneros, [redacted] U.S. Army.
Col. Paul E. Menoher, Jr., [redacted], U.S. Army.
Col. Arthur E. Williams, [redacted] U.S. Army.
Col. Robert L. Ord III, [redacted] U.S. Army.
Col. Waldo D. Freeman, Jr., [redacted], U.S. Army.
Col. Theodore G. Stroup, Jr., [redacted], U.S. Army.
Col. John F. Sobke, [redacted] U.S. Army.
Col. John P. Herrling, [redacted] U.S. Army.
Col. James A. Musselman, [redacted], U.S. Army.
Col. James B. Taylor, [redacted] U.S. Army.
Col. Ronald H. Griffith, [redacted] U.S. Army.
Col. Charles R. Hansell, [redacted] U.S. Army.
Col. Floyd L. Runyon, [redacted] U.S. Army.
Col. Samuel E. Ebbesen, [redacted] U.S. Army.
Col. James R. Ellis, [redacted] U.S. Army.
Col. Peter T. Berry, [redacted] U.S. Army.
Col. Walter J. Bryde, [redacted] U.S. Army.
Col. Walter B. Moore, [redacted] U.S. Army.
Col. Terence M. Henry [redacted] U.S. Army.

Col. Joseph T. Ellis, xxx-xx-xxxx U.S. Army.
Col. Larry R. Capps, xxx-xx-xxxx U.S. Army.
Col. James T. Scott, xxx-xx-xxxx U.S. Army.
Col. Ernest J. Harrell, xxx-xx-xxxx U.S. Army.
Col. Donald L. Scott, xxx-xx-xxxx U.S. Army.
Col. Dennis V. Crumley, xxx-xx-xxxx U.S. Army.
Col. Jerry R. Rutherford, xxx-xx-xxxx U.S. Army.
Col. John E. Miller, xxx-xx-xxxx U.S. Army.
Col. Frank Cunningham III, xxx-xx-xxxx U.S. Army.
Col. Paul T. Weyrauch, xxx-xx-xxxx U.S. Army.
Col. Jon D. Collins, xxx-xx-xxxx U.S. Army.
Col. Jay M. Garner, xxx-xx-xxxx U.S. Army.
Col. David L. Cole, xxx-xx-xxxx U.S. Army.
Col. John M. Thomson, xxx-xx-xxxx U.S. Army.
Col. Eugene L. Daniel, xxx-xx-xxxx U.S. Army.
Col. David Bramlett, xxx-xx-xxxx U.S. Army.
Col. Alfred J. Mallette, xxx-xx-xxxx U.S. Army.
Col. Joseph Raffiani, Jr., xxx-xx-xxxx U.S. Army.
Col. Thomas W. Robison, xxx-xx-xxxx U.S. Army.
Col. John H. Tilelli, Jr., xxx-xx-xxxx U.S. Army.
Col. Paul J. Vanderploog, xxx-xx-xxxx U.S. Army.
Col. Clyde A. Hennies, xxx-xx-xxxx U.S. Army.
Col. John P. Otjen, xxx-xx-xxxx U.S. Army.
Col. Henry H. Shelton, xxx-xx-xxxx U.S. Army.
Col. Barry J. Sottak, xxx-xx-xxxx U.S. Army.
Col. Robert L. Stewart, xxx-xx-xxxx U.S. Army.
Col. George A. Bombel, xxx-xx-xxxx U.S. Army.

# EXTENSIONS OF REMARKS

## TRIBUTE TO DR. HAROLD R. CHANDLER

### HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. LEWIS of California. Mr. Speaker, I would like to take this opportunity to pay tribute to a truly remarkable man, Dr. Harold R. Chandler. Dr. Chandler's former students and close friends will honor him at a dinner in San Bernardino, CA, on September 2 of this year.

Dr. Chandler attended school in Texas, including Baylor University and Texas A&M from which he received his B.A. and master's degrees respectively in endocrinology. He was awarded his Ph.D. in this field from the University of California at Los Angeles in 1949. Later he went on to study radiation biology in 1960 at the University of Washington.

Dr. Chandler has made many contributions to his field. Early in his career, he was the curator of insects at Baylor University, and later he researched cotton insects for the U.S. Department of Agriculture. Also, he has written and published works in the areas of health education, entomology, and endocrinology.

For the past 39 years, Dr. Chandler has been a professor at San Bernardino Valley College. He has taught a wide variety of subjects, including biology, anatomy, physiology, microbiology, and zoology. Also during those years of instruction, he performed the duties of head of the zoology department, chairman of the life sciences division and dean of the evening college.

Although he has been quite occupied with his education and career goals, he ably served his country in the U.S. Navy from 1944 to 1946 and again from 1950 to 1952 and was active with the U.S. Naval Reserve for 20 years. In addition to his military service, Dr. Chandler has contributed to his community in numerous ways. He has been involved with the Arrowhead United Way, the Inland Adolescent Clinic, the Humane Society of San Bernardino Valley, the Desert Protective Council, and the animal advisory commission for the city of San Bernardino, as well as many other organizations.

Dr. Chandler is also a member of many professional organizations, including the New York Academy of Sciences, the Humane Society of the United States, and the National Association of Biology Teachers.

It is important to note that as a teacher, Dr. Chandler instilled tremendous desire to succeed academically in the classroom. In fact, professional schools have reached a point where they look forward to admitting students with a letter of recommendation from him, for his students have a good history for excelling in and finishing their graduate work. Indeed, most graduate in the top of their classes. Dr. Chandler also stressed to his students the importance of contributing to your country, State, and community by sharing one's skills through community involvement, and most have been known to follow that advice by becoming active leaders in their communities.

Mr. Speaker, I ask that you join me in recognizing Dr. Harold Chandler. I think we can all agree that Dr. Chandler's unselfish dedication to his country, State, and community has served as a fine example of the type of service we all should strive to emulate. It is with great pride and respect that I pay tribute to him today.

## THE 11TH ANNIVERSARY OF THE HELSINKI ACCORDS

### HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. FORD of Michigan. Mr. Speaker, August 1, 1986, marked the 11th anniversary of the signing of the Helsinki accords. This was a day for the United States to reaffirm our commitment to human rights and encourage leaders of the Warsaw Pact nations to begin compliance with this political statement agreed upon by 33 nations in 1975.

For many people in Europe and North America the word "Helsinki" has come to symbolize hope for human rights and peace. Unfortunately, the Warsaw Pact nations' performance in the areas of human rights, freedom of religion and the rights of minorities has been highly deficient since the signing of the Helsinki accords 11 years ago.

Beginning in 1976 numerous monitoring groups concerned with violations of the Helsinki accords were formed to counter the direct violations and to encourage their governments to bring human rights practices into line with the pledges made in the accords. Because of an exorbitant increase in arrests and pressure from government authorities in their respective countries, many of the monitoring groups have disbanded. Some groups still have carried on the difficult and discouraging work of attempting to bring about reform while bearing witness to human rights abuse.

The blatant disregard of the Helsinki accords by the Soviet Union Government is crushing its citizens' faith in the Helsinki process. I have appealed to the Soviet Government on behalf of individuals wishing to emigrate, although most continue to be repeatedly denied permission. Despite these setbacks, I believe contact with the Soviet Government and celebrations such as our "Helsinki Human Rights Day" service to remind the Soviet Union that we are constantly aware of their practices and that human rights are a major concern for us. We must continue to encourage compliance by the Warsaw Pact nations with the Helsinki accords. Achieving this goal will greatly strengthen the goals for world peace that we all seek.

## A VISIT TO SOUTH AFRICA

### HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. UDALL. Mr. Speaker, South Africa is the scene of a great human tragedy. News accounts, both here and abroad, have focused on the recent rioting and the continued intransigence of the South African Government. Given the high drama that now exists in that country, we sometimes overlook the day-to-day discrimination that lies at the heart of the Government's apartheid policy.

Bhupinder Singh Liddar, a Canadian writer, recently traveled to South Africa. In an article that appeared in International Perspectives, a Canadian journal on world affairs, he describes his impressions of a country that South African President Botha has declared, "a symbol of the expansion of freedom." He looks at the rigid discrimination that permeates every aspect of the society, and looks behind the reforms so loudly trumpeted by the Government. And finally, he warns that unless Western nations persuade the Government to accept a negotiated settlement soon, "South Africa is poised on the brink of a bloodbath unlike any yet seen on the continent."

At this point, I am inserting the article in the RECORD and urge our colleagues to read it:

VISIT TO SOUTH AFRICA

(By Bhupinder Singh Liddar)

In a world where freedom is becoming increasingly rare, our country today is a symbol of the expansion of freedom, of the upholding of freedom of religion and free enterprise, sustained by equal rights before an independent judiciary.

This statement by the State President of South Africa, P.W. Botha, at the opening session of the "Parliament" boggles the mind, filled as it is with the television images of violence, riot and general unrest that has gripped that unhappy country. The President was not speaking to the foreign news media but to the elected white parliamentarians of the Republic of South Africa.

Referring to the victims of violence and unrest, the State President further stated in that same speech, "Allow me once again to express my sympathy with the suffering of all those affected"—knowing full well that more than half of those were Blacks killed by police.

These are some examples of what has come to be termed double-speak or "Botha-speak!"

An opportunity presented itself to me recently to travel to this land where Botha-as-freedom contrasts sharply with Black unrest. Where does the reality lie? Having been born in Kenya and having spent many

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

years there, as well as in independent Zimbabwe, I felt a compelling desire to seek an answer to this question. I knew I did not have to go to South Africa to know what "apartheid" was all about. We experienced shades of it in Kenya and up until recently Rhodesia operated the same regime under Ian Smith. Separateness along racial lines—separate schools, separate residential areas, separate cemeteries, separate hospitals, and disparities such as higher wages for the Whites than non-Whites for the same job—and certain jobs (including that of writing parking tickets) reserved for Whites!

The most deceptive argument presented by the prostatus quo South Africa observers is that the situation is "complicated," and that one really has to go to South Africa to fully understand it. This line of appeal was used to invite Canadian parliamentarians and business leaders to show them the "good" life of the African. Many were convinced of the "civilizing" efforts of the South African regime and of its righteousness.

TOURIST IN SOUTH AFRICA

It was from Harare that I flew to Johannesburg by Air Zimbabwe. There are frequent daily flights by Air Zimbabwe and South African Airways between the major cities of these neighboring states. An active South African commercial office exists in Harare in a building decked with a South African flag. There is also considerable cooperation between the railways of the two countries, because of geohistorical factors.

The man who sat next to me was a young white student of pharmacy in South Africa who had been visiting friends and relatives in Zimbabwe. He and his family belong to those who, upon Zimbabwe attaining independence, decided to pack up and head south. He seemed concerned that about 3,500 Whites were leaving South Africa every month as a result of recent unrest. What were his impressions of Zimbabwe? He was impressed with the progress Zimbabwe had been able to make and the cordial race relations that existed. A number of South African Whites were concerned about being conscripted into the army to fight yet another liberation army and were contemplating returning to Zimbabwe. A familiar experience of talking with white South Africans outside their country is the degree of misinformation they can accumulate and disseminate.

This young white pharmacy student told me confidently that all universities were open to all races. Technically he was right, except that a non-White who wishes to attend a predominantly white university has to obtain a ministerial permit. A couple of days later I read in the papers that the Minister of Education had declared four universities now open to all races, thereby dropping the permit requirement to gain entry. There remain other universities, however, to which non-Whites still cannot gain-admission. Discrimination permeates education at the primary and secondary school levels too. For instance in the 1983-84 fiscal year, per capita spending was approximately $992 for Whites, $653 for Indians, $341 for Coloreds and $141 for Blacks. This disparity in spending on education leads to obvious results released recently on illiteracy rates for South Africans over the age of fifteen: 33 percent for Blacks, 15.5 percent for Coloreds, 7.6 percent for Indians and 0.72 percent for whites. While this progressive announcement was being made, another report appeared alongside, stating that "the quota system which pegs the number or percentage of other race's students which may be admitted to white universities will still remain in force."

The South African government has strategically designated residential areas along racial lines, so that it makes it easy for the government to argue against mixed schools. The government, of course, has no intention of integrating schools, but can use the pretext of geographical proximity of schools to residential areas to pursue the policy of separateness.

In Kenya, prior to independence, and in Zimbabwe under the Smith regime, a similar policy of separation of schools on racial lines was pursued. Upon attaining independence or majority rule schools in both countries were made multiracial. This greatly contributed to racial harmony. Policies of racial segregation were practised by the English in Kenya and Rhodesia. In Rhodesia's case one could not find a more English-sounding name to lead the country than "Smith." It is, therefore, ironic when one hears English-speaking apologists in South Africa blaming the Dutch settlers or Afrikaners exclusively for the ills of apartheid. After all, the English-speakers make up 40 percent of the white population.

APARTHEID EVERYWHERE

Now back to arrival at Johannesburg airport. A British Airways jumbo was landing, and departures to Mauritius, Malawi, Botswana, Luxembourg and France were listed for the day. From the plane one gets into the bus driven by a white woman in her forties. The Immigration Officer points out that since I have a visa stamped to visit Kenya during the onward journey he would not stamp it, but affix one of the stick-on visas. This is to avoid any complication in being allowed into Kenya.

The Immigration and Customs Officers are Whites, while the bag-handlers and porters are Blacks. The bank where I cash travellers' cheques is staffed by Whites only. I board the airport bus to Johannesburg driven by a Black with all shades of people on board.

Into Johannesburg—a bustling metropolis. We go past the exhausted gold mines, now packed away into neat rectangular piles. These piles of dust that were once gold seemed to symbolize the exhaustion of the ruling regime.

Once in downtown Johannesburg one begins to notice the double-decker buses (not painted red!) with white passengers and single blue-grey colored buses carrying black passengers and driven by Blacks. The sidewalks are shared by all races—on equal footing for once!

Whites and Blacks mingle freely in downtown stores. Only Whites are allowed to own businesses in the downtown area known as the CBDA, Central Business District Area. This is the case with all major centers. These were the areas effectively boycotted during last Christmas season. White shopkeepers became aware of their reliance on the spending-power of the Blacks as a result of this exercise. You hardly met any store-owner who did not feel the pinch. An extended and a more effective boycott at Christmas this year is being feared by businessmen. One does, however, run across a shop or two being operated by an Asian. How did he manage to secure the store in this restricted area? Well, he bought it in the name of a White and paid him a nominal fee for the use of his name! There is no manifestation of hatred or violence in the streets but there is certainly a sense of nervousness and bitterness. There is tension.

SEPARATE BUSES, BUT SHARED TRAINS

One day I decide to visit an acquaintance in Pretoria, who once was stationed in Ottawa. There are regular bus and train connections between Johannesburg and Pretoria, the seat of the executive branch of the government. (The legislative capital is Cape Town.)

I go down to the Johannesburg train station to inquire about train departures and to obtain a ticket to Pretoria. I buy a newspaper from the vendor and engage in a conversation about changes that are being brought about. The charming newspaper vendor points to the pedestrian mall adjoining the railway station. It was once forbidden territory to non-Whites but they can now walk there. In our brief encounter he nervously tells me that the Townships (areas where Blacks live) are very politicized and there is a lot of political activity there. He points to a restaurant across the street where he was not allowed to enter because of the color of his skin. He hopes that will change—though he does not sound as though it will happen soon. I go past a coffee shop in the railway station complex which has a prominently displayed sign "Whites only." As I enter the train station, I realize that the place is divided on racial lines. There are separate entrances to the station for Whites and non-Whites. Inside the railway station is another coffee shop with a sign hanging in the window (like the closed and open sign) which states "Whites only." Someone, probably a black man, washes that window everyday with that hideous sign hanging as an ugly reminder of the rules of the game. As I proceed towards the information desk I encounter another sign over a door "General Waiting Room—Whites Only!"

On to the information counter staffed by Whites. Asked to proceed to the ticket counter. Staffed by Whites. I buy my ticket to Pretoria and proceed to the turnstiles manned by tough-looking white women. I run down the stairs to the platform. As usual, I think I shall miss the train. It is departure time. As soon as I get to the platform I am confronted by a string of coaches each clearly marked "Whites only." What do I do? I say to myself, "I am not White." I have made it so far because the authorities must have bestowed upon me the dubious honor of being a Mediterranean!

There are only Whites in the coach I am in. Even the ticket examiner is White. Nothing seems to have changed since the days of Gandhi! We are on our way to Pretoria. At every station I notice toilet facilities marked "Men—White only." Later on after one of our stops at a suburban station I see a few Blacks on the platform. I stick my head out of the window and notice that the front section of the train is for Blacks—and they even have a black ticket examiner! The Whites and Blacks enter and leave the train through separate entrances and exits. At one station a black woman runs to board the train. She misses the train not because she is too far from it, but because she is too far from the coaches for the Blacks up front. She dared not have jumped into the coaches for the Whites. Here she is in a country where her people make up 71 percent of the population of 32.5 million, but a mere 17 percent (the Whites) are dictating the lives of the rest of the population and making laws affecting every little detail of their lives. Colored (mixed race) make up 9 percent of the population, while Asians account for 3 percent.

GETTING AN EARLY START

At one train station we pick up a large number of school children—boys and girls in their late teens. I wondered about these white children and their world-view. They live in white suburbs, socialize with white families only, board a train with "Whites only" coaches to school, attend exclusively white schools, play with white friends, attend church with white congregations and their only contact with a black African is with their gardener or cook at home or the nanny who brought them up! The Whites do not only want to maintain their exclusivity but also their social superiority. Yet they want to be known as Africans. They have, however, never lived as though they belong to Africa. The school children could have been coming out of any British public school. They are Africans of convenience. The color of their skin assures them a secure job after graduation.

The same pattern of separate waiting room for "Whites" is repeated at Pretoria railway station. I walk down to see the acquaintance at the Government's Bureau of Information. It is a 7-story building in downtown Pretoria. From the time I enter and the time I leave I do not see a single non-White in the building. My acquaintance talks about the universities being open to all races. He mentions universal citizenship being extended to all South Africans. It is merely an attempt to cover up the failure of the policy of establishing "independent" homelands with respective citizenships. The Blacks are now being restored their right to citizenship of South Africa. The homelands of Transkei, Bophutatawans, Venda and Ciskei were merely labor pools for South Africa and not economically viable entities.

The Immorality Act forbidding interracial marriages has been scrapped. The question arises: if an interracial couple were to get married and want to settle down, where would they live? In a black area? A white area? While my acquaintance rattles off the government record, I casually mention my dilemma earlier in the afternoon when I stood facing a coach marked "Whites only" and having the option of either hopping the train or missing it altogther—in which case I would not have seen him at the appointed time. He shyly informs me that the railway system is still segregated along racial lines.

On my way back to the bus station I walked into a government building to inquire for directions to the bus terminal. I see one black man among hordes of Whites leaving the building. I encounter a young soldier at the front desk who, having also finshed the day, volunteers to walk with me for a few blocks towards the bus terminal. He is young looking. He tells me he had been in the army for six years. He is concerned about the "terrorist" activity of the ANC (African National Congress) reaching the urban centres. Only last year the ANC had struck a sub-power station in Pretoria.

Urban political violence has many Whites worried. Once the downtown business areas become vulnerable to bomb attacks the white community will no longer feel that it is invincible.

While Pretoria is a clean and organized city there is an air of distance from reality. As in Ottawa, civil servants pour out in droves, form lines at the bus stops and within a short period the city core begins to look deserted. At the bus stops the city core begins to look deserted. At the bus stops there are benches marked "WHITE BUS PASSENGERS ONLY." The buses are exclusively for Whites and driven by white bus drivers!

AN ASIAN VIEW

One evening we drive south from Johannesburg to Lenasis—Land of Asia! This place is home to about 200,000 Asians. Asians working in downtown Johannesburg have to make about a 30-kilometre trip each way by car or take the train. As one drives along the highway to Lenasia one sees the signs for Soweto. Immediately one is filled with images of funerals, rock-throwing and clenched fists. One becomes a little nervous. We approach closer. One sees rows of neatly arranged houses. Smiling children. No funeral or a demonstration today. One crosses the highway to Lenasia and one sees opulence. This is no Soweto. One sees street lights, while back across the highway there are those overhead lights that light up whole areas. The meaning is clear: the Asians are the buffer zone between the Blacks and the Whites. The display of material well-being is a daily reminder to residents of Soweto across the highway, while the luxury of the Whites is hidden away in the northern parts of Johannesburg.

I spend the evening with an Asian family. The sons tell me that a growing number of Asians, especially the young ones, are identifying with the political goals of the ANC and the black majority. I am told once again that the House of Delegates for Asians does not have the confidence of the Asian community. Only 4 percent of the eligible voters cast their votes.

A tricameral Parliament was created under a new Constitution which came into force in late 1984. Under the new arrangement Whites are represented by a House of Assembly, Coloreds by a House of Representatives and Asians by a House of Delegates. The majority of the population—the Blacks—have no elective chamber.

The Lenasia family informs me that no substantial reforms have taken place. There is a lot of talk to appease the international community, but no action is being taken on the domestic front. One of the sons went to watch a rugby match with some of his white coworkers earlier this year. He, not being White, was turned away from sitting with his white coworkers.

There is almost universal feeling that the situation in South Africa is going to get much worse before it improves. There is no immediate danger of civil war but it is approaching. The feeling is that unless the international community—especially the West—undertakes to bring about a negotiated settlement through the aegis of an international constitutional conference, South Africa is poised on the brink of a bloodbath unlike any yet seen on the continent.

## HOUSE FOREST ROAD CONSTRUCTION BUDGET ON TARGET

### HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. FOWLER. Mr. Speaker, on July 31, the House passed the fiscal 1987 appropriations bill (H.R. 5234) for the Department of the Interior and related agencies.

I am pleased that the House has taken a fiscally responsible and environmentally desirable step in the right direction in amending the budget request for the U.S. Forest Service. H.R. 4234 reduces the Forest Service's nationwide budget for new road construction by $44 million from what was requested by the administration. The report on the bill points out that "the Forest Service continues to exceed its planned and funded goals for road construction and reconstruction, despite funding reductions, as it has in each of the past 5 years."

I agree strongly with the House action, and I think it is high time we put the skids to this costly and excessive waste of the taxpayers' money. While I will continue to support a reasonable level of timber harvesting in our national forests and in the Chattahoochee National Forest in my home State, in these times of fiscal austerity we need to minimize Federal expenditures where possible. The Forest Service's budget for new timber roads can and should be reduced without interfering in a major way with its future timber sales program.

The report on H.R. 5234 specifically states this reduction in road building funds will not affect the fiscal year 1987 timber sales program, and it will allow reconstruction of multipurpose and recreation roads to continue at the budgeted level. I urge the Senate to agree to the House action on this important issue.

## DROPOUT PREVENTION AND REENTRY ACT

### HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. GARCIA. Mr. Speaker, today the House passed H.R. 3042, the Dropout Prevention and Reentry Act. I am a cosponsor and strong supporter of this very important piece of legislation.

The dropout rate in this country is alarmingly high. In New York City, it has reached crisis proportions. While the overall rate for the city is 35 percent, there are five high schools in my district alone that have dropout rates of over 50 percent.

There is no one cause and no easy answers to the dropout problem. Nonetheless, both the public and private sectors must work together to find solutions. Recently, three major New York banks established a program to provide educational assistance to five Brooklyn high schools with high dropout rates as well as jobs to those students who graduate, have less than five absences, have basic skills, and show a willingness to work. I hope that this program and others like it will be implemented in other parts of New York City and the Nation.

In conjunction with these private sector initiatives, H.R. 3042 clearly shows that a strong Federal commitment is needed and exists to end this crisis and provide real opportunities to our most disadvantaged students. I commend my colleagues, Representative HAYES, Representative HAWKINS, and the other members of the Education and Labor Committee for their efforts.

## THE NASA REFORM ACT OF 1986

### HON. F. JAMES SENSENBRENNER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. SENSENBRENNER. Mr. Speaker, the members of the Committee on Science and Technology, of which I am a member, has spent a great deal of time dealing with the problems associated with the *Challenger* accident. The process has been arduous but insightful.

We have all learned that NASA has serious management problems which must be corrected to avoid future tragedies. The Rogers Commission addresses these shortcomings. I feel it's imperative Congress makes certain the Commission recommendations become policy at NASA. The NASA authorizing legislation must be amended to ensure the Commission recommendations are followed.

For that reason, I have introduced the NASA Reform Act, H.R. 5349, which takes the Rogers Commission recommendations and makes them law.

In addition to legislating the Commission's recommendations, the NASA Reform Act will strengthen the hand of Congress by allowing for greater oversight of the space agency. During the course of the Commission's investigation, many press reports claimed the virtual "blank check" Congress gave NASA in recent years was partially responsible for the internal management problems at NASA. Lack of congressional oversight had created a "NASA knows best" atmosphere in which accountability for the agency's actions was sometimes lost. To correct this situation, H.R. 5349 requires the Administrator to report to Congress on Space Shuttle Program management changes and flight rates.

Mr. Speaker, this legislation will help NASA return to safe space flight and allow this Nation to retain its familiar position of leadership in space. There coiuld be no more fitting tribute to the *Challenger* crew and their families, than the support by the membership of this bill.

## NATIONAL BACK TO SCHOOL—BACK OFF DRUGS MONTH

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. BIAGGI. Mr. Speaker, there is a deadly cancer ruining the lives of our Nation's young people and it's called drug abuse. I want to personally commend you for the strong leadership you have demonstrated in responding to this crisis. Today, I want to supplement the comprehensive legislative effort you have inspired with a resolution of my own designating the month of September as National Back to School—Back Off Drugs Month.

I am pleased to note that this resolution has broad bipartisan support. Among the original cosponsors are our distinguished majority leader, Mr. WRIGHT; the chairman and ranking minority member of the Education and Labor Committee, Messrs. HAWKINS and JEFFORDS; and the chairman and ranking minority member of the Select Committee on Narcotics Abuse and Control, Messrs. RANGEL and GILMAN.

We are attacking the drug market vigorously, and as a 23-year law enforcement veteran I fully support those efforts. However, far too little is being done to diminish the demand for drugs. My legislation seeks to bolster this vital part of the drug abuse prevention puzzle.

Mr. Speaker, as a ranking member of the Education and Labor Committee, I am proud to observe that our committee plans to mark up a comprehensive drug abuse education and prevention measure next week, as part of our contribution to the Omnibus Drug Abuse Prevention Act that is now on a fast track as a result of your deep concern and strong leadership. The final product expected to come out of the Education and Labor Committee will do a great deal to bolster existing drug abuse education and prevention efforts. However, the improvements that it will make will not occur until after the new school year begins. I would suggest that we will miss a valuable opportunity to educate our young people about drug abuse if we don't get to them right from the start. By getting to them as soon as they walk through the school doors this September with the message that they should say no to drugs, they will realize the strength of our resolve. Hopefully, they will take the message a little more seroiusly as a result, and above all else, we may just prevent some of those young people from taking the first step toward drugs.

That is why I am proposing to designate the month of September, which marks the start of the new school year, as National Back to School—Back Off Drugs Month. With the formal support from Congress and the President, and the coordination that such a resolution could provide, it would be difficult for a school system to ignore the challenge of attacking the drug abuse problem head on with a full-fledged education and prevention campaign.

Under my resolution, the following activities during the month of September are recommended:

First, a message by the chief administrator of all schools to their students concerning the dangers of drug abuse and the specific penalties that exist for drug abuse in the school;

Second, the introduction of comprehensive and long-term drug education and prevention programs in the schools, with a particular focus on grades kindergarten through sixth;

Third, the use of audiovisual education tools to show the destructive effects of drug abuse;

Fourth, the use of role models—such as sports, religious, public safety, political, or cultural figures—to reinforce the need to stay drug free; and the formalization of agreements between students, parents, teachers, law enforcement, and school administration officials about the role each will play in the drug abuse education and prevention process, including the reporting of drug use and sales in or around the schools.

I am proud to point out, Mr. Speaker, that I have modeled this legislation after policies that have proven very successful in my home city of New York. I would like to focus particular attention on the program New York City has established called SPECDA—the School Program for the Education and Control of Drug Abuse. This 2-year-old program includes an 8-week course for fifth- and sixth-grade students who are taught by a drug counselor and a law enforcement officer about the dangers of drugs. This program utilizes positive role models, such as police officers and professional athletes, to teach kids to say no to drugs.

In addition, they conduct parent workshops, where the roles of the parents, teachers, school administrators, and the local police are defined in relation to the drug abuse education and prevention process. It is a program worthy of replication on a national basis and I want to commend the city of New York, particularly Mayor Koch, the New York Board of Education, and the police department, for the leadership they have demonstrated in responding to the drug abuse epidemic that is devastating our young people.

Mr. Speaker, a major theme throughout New York City's drug abuse prevention process is that the educational process must start at the earliest possible age, beginning with kindergarten. There is good reason for this strategy. In fact, statistics show that the earlier we begin the drug education process, the better, because after today's children reach junior high school, the decision of whether or not to use drugs has often already been made. Consider that nearly two-thirds of all high school seniors report illicit drug use and nearly one-third of all seventh graders report having used drugs before entering that grade. Further, a recent survey by the Weekly Reader revealed that 25 percent of all fourth graders feel peer pressure to use drugs. That is a terrifying thought, but it helps us to get to the root causes of the problem. Another recent survey of 27 cities showed that in 1985 13,038 young people between the ages of 6 and 17 were admitted to hospital emergency rooms for reasons related to drug abuse.

Mr. Speaker, I know that this Congress is dead serious about stopping drug abuse and I am proud to be associated with that effort. I would suggest that the legislation I am introducing today is totally consistent with that effort and I would hope that it will be given the prompt and favorable consideration that it deserves.

At this time, I would like to submit the full text of my resolution:

H.J. RES. —

Resolution designating the month of September 1986, as "National Back to School—Back Off Drugs Month"

Whereas elementary, secondary, and post-secondary students will be returning to school in the month of September;

Whereas the drug abuse problem among our young people has reached epidemic proportions;

Whereas surveys show that nearly two-thirds of all high school seniors report illicit drug use, and nearly a third of all seventh graders report having used drugs before entering that grade;

Whereas a recent survey of 27 cities showed that, in 1985, 13,038 young people between the ages of 6 and 17 were admitted to hospital emergency rooms for reasons related to drug abuse;

Whereas drug abuse is a significant factor among the estimated 750,000 students who drop out of school each year;

Whereas the cocaine-based drug, crack, is making the drug abuse problem among young people even worse because it is relatively inexpensive and highly addictive;

Whereas, in 1984, persons under the age of 18 committed 67,211 drug abuse violations; and

Whereas a minimal amount of Federal, State, and local resources have been targeted toward drug abuse education and prevention, despite strong evidence that education and prevention efforts at an early age are the most effective means to address the drug abuse problem: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the month of September 1986, is designated as "National Back to School—Back Off Drugs Month" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate activities, including—

(1) a message by the chief administrators of all schools to their students concerning the dangers of drug abuse and the specific penalties that exist for drug abuse in the school;

(2) the introduction of comprehensive and long-term drug education and prevention programs in the schools, with a particular focus on kindergarten through the sixth grade;

(3) the use of audio visual education tools to show the destructive effects of drug abuse;

(4) the use of role models (such as sports, religious, public safety, political, and cultural figures) to reinforce the need to stay drug free; and

(5) the formalization of agreements among students, parents, teachers, law enforcement officials, and school administration officials about the role each will play in the drug abuse education and prevention process, including the reporting of drug use and sales in or around schools.

## INTRODUCTION OF JOINT RESOLUTION OF DISAPPROVAL—DOE URANIUM ENRICHMENT CRITERIA

### HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. RICHARDSON. Mr. Speaker, I am pleased today to introduce a resolution along with eight original cosponsors disapproving the uranium enrichment criteria supplied to Congress by the Department of Energy on July 24. These criteria appear in the July 29 Federal Register on pages 27132–27146. Under section 161v. of the Atomic Energy Act, DOE must submit its criteria to Congress for 45 days' review prior to effectiveness. DOE's criteria by law must also provide for recovery of all properly attributable costs and for the viability of the domestic uranium industry. These requirements protect, among other things, interests of taxpayers and DOE customers, as well as U.S. energy security and independence. Unfortunately, DOE's new criteria do not appear consistent with either of these requirements. On the one hand, the administration, DOE, and GAO all agree that the criteria embody a writeoff of costs to be recovered. Nuclear utilities, on the other hand, feel that the criteria provide for excessive recovery of costs. Moreover, although DOE admits that the domestic uranium industry is nonviable, the agency continues to refuse to impose enrichment limitations as specifically required by section 161v. This has seriously and adversely affected U.S. national security and energy independence, left domestic uranium producers susceptible to foreign subsidies and other unfair trading practices, increased U.S. dependency on South African uranium, and resulted in 7,000 to 8,000 unemployed workers in New Mexico alone. There are other features of the criteria which do not comport with GAO's reading of the law, and which may potentially harm DOE customers, taxpayers, and raw material producers. Nuclear utilities, for example, have expressed concern about discrimination by DOE among its customers under the agency's new approach. Uranium producers have noted problems with DOE's policies relating to disposal of Government stockpile uranium.

Mr. Speaker, Congress has an obligation to provide effective oversight of DOE's uranium enrichment program. This resolution is an appropriate demonstration to DOE that this obligation is and will be discharged. There may be reasons, as DOE suggests, that the law should be changed. However, if this is the case, DOE should present its proposals to change the law in the form of legislation. The agency should not engage in administrative actions which all agree are inconsistent with various existing statutory requirements.

Mr. Speaker, I support a strong U.S. enrichment enterprise. This may require some changes in the law. Indeed, I am certain that we are all prepared to consider appropriate changes. But we would be derelict in our duties to accede to DOE's actions to date, which if we do not act will undoubtedly result in continued litigation, confusion, and turmoil for years to come.

## EXCHANGE LANDS IN ALASKA

### HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. YOUNG of Alaska. Mr. Speaker, I am today introducing, legislation, H.R. 5353, which seeks to resolve a dilemma faced by the Haida Village Corp. in southeast Alaska. The Haida Village Corp. is an Alaska Native village corporation constituted through the Alaska Native Claims Settlement Act of 1971 [ANCSA]. Because of the impact of a certain provision of ANCSA upon the Haida Corp., it was the only corporation in southeast Alaska subject to selection of lands which were insufficient to grant them a timber base which would meet their long-term needs. The unique application of this provision to Haida in Southeast and subsequent events have placed them in the difficult position of facing the distinct and immediate loss of their lands granted them by the United States in settlement of their claims as Alaska Natives.

The legislation is designed to enable the corporation to use a portion of their lands in order to save the rest of their lands, and also set in motion negotiations with the Secretary of Agriculture regarding a possible exchange of lands which would enhance their viability as a corporation. Through this measure, Haida would receive credits which would apply toward U.S. Forest Service timber sales in exchange for magnificent Goat Island, which they received as part of their selection under ANCSA. Although Haida would be forfeiting part of their entitlement, the sale of this recreational asset to the United States would enable them to satisfy creditors, thereby escaping the loss of lands through Chapter 7 bankruptcy proceedings.

## HELMS RIGHT ON THIS ONE

### HON. WILLIAM W. COBEY, JR. HON. BILL HENDON

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. COBEY. Mr. Speaker, once again the senior Senator from our State, the Honorable JESSE HELMS, is under attack from the entrenched bureaucracy, this time on the issue of our relationship with Chile. Why do they continue to attack him? Simply because Senator HELMS is a man of deep conviction and extraordinary courage—a man who is not afraid to be honest with people and who does his job to the best of his ability.

In this case, his job is to carry out his duties as chairman of the Subcommittee on Western Hemisphere Affairs of the Senate Committee on Foreign Relations.

In the past, time and time again, Senator HELMS has faced his accusers and proved them to be wrong. For example, he warned us that the Sandinistas in Nicaragua were trouble and he was right.

The State Department doesn't and shouldn't have the last word in foreign affairs. We in Congress must provide the needed oversight.

A man of Senator HELMS' stature deserves to be trusted and to be heard. That is the least that can be expected.

The following is an editorial that appeared in the Mooresville Tribune of Morresville, NC. I do not claim to be an expert on Chile, but I think this editorial merits careful consideration. Let's not rush to conclusions on this issue. Let's hear and respect all of those, including Senator HELMS, who care deeply about our neighbors to the south.

[From the Mooresville (NC) Tribune, July 23, 1986]

HELMS RIGHT ON THIS ONE

(By Lee Sullivan)

Sen. Jesse Helms has always been on the cutting edge of controversy and his unwavering hard-right views can alienate people on one issue and befriend them on another. In the white-hot debate concerning Chile, however, Helms deserves more allies than enemies.

Helms is right in saying that Chile is one of the last barriers to communism in Latin America. Helms is also one of this country's

few elected officials with the guts to stand behind a government the United Staes helped put into power.

Very few clear details have been uncovered about the tragic death of Rodrigo Rojas, who was fatally burned during an anti-government rally in Chile, and only through assumption have newspapers and television stations in this country reached the conclusion that the disguished, uniformed figures responsible for Rojas' death were governmental soldiers and not terrorists posing as soldiers.

It seems strange that out of the group of young people, only Rojas, an American resident, and his companion were attacked. If supporters of communism wanted to make sure the United States came down hard on Chile President Augusto Pinochet, killing an American and blaming it on the government is definitely the best way. And, on the other hand, if Pinochet is the terrible despot Americans are told he is, why would he be so stupid as to kill an American to direct even more attention to his actions?

The theory that terrorist are to blame is not that far fetched. Communist activity in the country has increased since the paperwork for a general election in 1989 was approved. Young people and college students, just like young people in this country, are opposed to many government policies and voice that opposition through protests. These protests have paved the way for the influx of communist groups. But communist supporters, who are able to rally the students by promising change without precisely defining that change, realize if a takeover isn't completed by 1989 it will be too late.

Critics of Helms' statements are correct in saying that in 1989 the only choice the people of Chile will have is to vote for or against a single candidate selected by the country's four-member Junta—which was appointed by Pinochet. But if the people vote against the candidate in 1989, the Chilean constitution states that Pinochet will serve for one more year until a general election is held in 1990.

By 1991, according to the constitution, a president and a general assembly elected by the people will be in office. That would seem to be exactly what the United States would want in a South American country with Chile's strategic location.

But in countries with cultures different from our own, we have a habit of opposing whatever government is in charge while, like the students supporting the communist groups, forgetting to consider what the replacement will be. We've done it time and time again and, however tragic, we seem to be on the verge of doing it again.

While his comments concerning Ambassador Harry C. Barnes may have been too strong, Helms' position is the right one. Pinochet's government is combating a growing communist threat and while Pinochet has been in charge of the country, the foundation for Democracy has been prepared.

Chile, as Helms said, is on an orderly path to Democracy. The job of the United States—the self-appointed preserver of personal freedom and democracy—is to let the people of Chile determine their own fate. Pinochet has been in power for 13 years, why intrude now when the first step to democracy is less than three years away?

Unlike the picture painted by the press in the United States, people in Santiago and throughout Chile enjoy many of the same freedoms as people in the United States. Oppression seems to be an out-of-place criticism coming from a country that burned "witches," put American citizens with Japanese heritage into concentration camps during World War II and conducted political witch hunts under the direction of Sen. Joseph McCarthy.

It's time the United States learned that we do not have the perfect ideals to inject into every culture. Helms is right in saying that democracy in Chile will not be like democracy in the United States, and it shouldn't be. If the true goal of the United States is personal freedom, how can we achieve that by forcing our beliefs down the throats of the Chilean people.

The cultures are different and will always be different. We can forcibly change the government but we can't change the people.

If the United States really wants to help Chile, commercial investment is the best bet, not verbal abuse. If you've wondered why the administration of President Ronald Reagan has targeted its assaults on Chile instead of other countries throughout the world, the answer is business. The U.S. has very little commercial interests in Chile so Reagan has very little to lose in attacking the Chilean government.

The entire Chilean affair, as Helms has pointed out, is another example of the U.S. media building an issue to a degree where the U.S. government has to take a stand. And this time, just like so many times in the past, the media has also dictated which stance the government should take.

Helms is out on a limb because byline-hunting reporters and headline-hungry politicians want to emphasize every bad aspect of the Chilean situation without considering any positive elements of a country trying—despite its location and national history—to development a democratic form of government.

If the bad press and jumping-on-the bandwagon ritual continues, the United States government will, once again, use the comments and influence of a few as excuses to venture where it really doesn't belong.

The people in the United States would not stand for governmental strongarming from a foreign country, yet when we demand that other countries change to suit our ideals that is exactly what we do to them. In Chile, it's the wrong answer and Helms seems to be one of the few in Washington's power circles willing to oppose the stylish trend and say so.

## TRIBUTE TO NORMAN S. GLADWELL

### HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. MARTINEZ. Mr. Speaker, I rise today to honor my constituent, Norman S. Gladwell, as he celebrates his 50th anniversary with the Kiwanis.

Mr. Gladwell has lived in San Gabriel since 1938 in a house he and his father built together. He lives there with his wife, Alberta, who he has been married to for 52 years. He has one daughter and two grandchildren.

After graduating from high school in Alhambra, Mr. Gladwell worked at the Alhambra Blue Print Co., which he owned and managed until his retirement. Through all these years, he has been a member of the Kiwanis, an organization dedicated to helping the community. He has served as president and on almost every committee. After 50 years of service, he continues to contribute to his community by tutoring children and volunteering on many other Kiwanis projects. I commend Mr. Gladwell for his dedication and contribution to community service. We are truly honored to have such a model citizen in our district.

## INDIA'S STRIDES FORWARD

### HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. GARCIA. Mr. Speaker, this past Sunday, the New York Times ran an article by M.J. Akbar, the editor of a Calcutta newspaper, the Telegraph.

Mr. Akbar discusses the progress that India has made over the years politically and economically. As Mr. Akbar rightly points out, trouble in the Punjab has clouded the many strides made by the Indian Government, particularly in the area of agriculture. I find Mr. Akbar's arguments about India's progress to be very convincing. I'm not surprised, however, that this is the case. After all, India is led by a dynamic, young leader with a sense of vision and purpose for his nation's future.

It is my sincere hope that along with India's continued progress and prosperity will come a stronger and better relationship with the United States. After all, as many of my friends in the Indian American community have pointed out to me, both of our nations have a great deal to gain from increased ties between our countries.

I am submitting Mr. Akbar's article for the RECORD. I urge my colleagues to take a minute to read his fine essay.

[From the New York Times, Aug. 3, 1986]

A VOICE FROM CALCUTTA: "WE DON'T NEED PITY, INDIA CAN LOOK AFTER ITSELF

(By M.J. Akbar)

CALCUTTA, INDIA.—The gunfire in Punjab has sent up a smokescreen that is hiding much of the truth about India's ability, self-confidence and perception of its future. Bad news, as we all know, drives out the good, not because journalists are a satanic breed, but because readers find good news boring after a very short while.

Be that as it may, Punjab has kept out of attention a most significant Indian achievement of the last four years. Almost half of India has been undergoing a massive drought, necessitating relief on an enormous scale. If this had been the India of the 60's, it could have required more than the combined efforts of many Bob Geldofs and Mother Teresas to prevent starvation.

ELEMENT OF MATURITY

But not only did India manage an enormous problem alone, she also did it without any fuss. (The second element is a characteristic of maturity). It was not just a case of having the surplus food thanks to the green revolution. Much more impressive was the creation of an infrastructure to take this food to the remotest village, and then not to hand it over as alms but to make it into wages for a development project of some sort or the other—the building of a road or the sinking of a well.

The rains have now come, abundantly, and the fields are going to be gloriously fertile again, so the last chance of this story coming to any significant attention is probably gone, but that is probably a good thing.

We don't need pity any more. This is an India that can look after itself, without patronage, thank you. Help, yes, and on a level of respect and equality. Patronage, no. The new confidence is the legacy of many things—self-sufficiency in food production, a victory in a major war with Pakistan.

But the most important element is the coming of age and to power of a post-independence generation. It is different in its perceptions from even the generation of Indira Gandhi, which spent its life in the political consolidation of the country after partition, and the creation of the industrial and agricultural base from which India could make her leap into prosperity. That base has been achieved to a great extent.

AMBITIONS AND RIVALRIES

The ambition of the new generation is simple, to make India the pre-eminent power of the second world by the turn of the century. (I define the second world not as the Communist bloc, but as that set of nations just below the superpowers and the members of the Organization for Economic Cooperation and Development.) It may seem a fantastic ambition, but if anyone had suggested in 1965, after the deaths of the Bihar famine and that simpering draw with Pakistan in the autumn war, that in about five years India would not only have successfully overcome its historic food problem but liberated Bangladesh by an overwhelming victory on the battlefield, it would surely have sounded equally fantastic.

In this context, one might add, that those who instinctively club India and Pakistan in comparative analyses are missing the point.

India sees itself in competition not with Pakistan but with China. And if India feels a threat strong enough to force her to spend on modern weaponry, it is because of the presence of an effective China-Pakistan axis whose goal in South Asia is to create a ring of hostile neighbors around the mother country of the region.

LAST WAR OF THE 40'S

In a region swarming with populations and languages that spill across recently manufactured borders, suspicion is the easiest of things to generate. Moreover, America, in its pragmatic somersault vis-a-vis China, may have forgotten that a Communist country swallowed an independent and large nation long before Soviet troops reached Afghanistan, but India has not forgotten Tibet yet.

So where does violence-beset Punjab enter such a rosy picture? The war between the two ideas which created two nations in 1947 has not run its course yet. If it is true that a minority in the Hindu-majority Indian subcontinent cannot live as an equal, then further disintegration is likely. On the other hand, the evidence is far greater that strength lies in the idea which created India's democratic—secular unity.

It is the theocracy called Pakistan that has neither been able to write an acceptable constitution or protect its national integrity. But there are those who still believe that religion is a sufficient basis for nationhood, against all the evidence of history (not only in this subcontinent but in Arabdom and Christendom).

The theocrats of Pakistan (as opposed to the democrats there) are nourishing their ideological comrades in Punjab, because they know that if democratic and secular India thrives, there will be a fallout in Pakistan. Punjab, in a sense, is the last war of the 1930's and 1940's. The secessionists of today have one distinct advantage over their predecessors: the technology of terror has never been as sophisticated.

But there is also the new steel in the Indian will. It may flicker for a while, since no one can obliterate terrorism completely, but the current excesses will be controlled. This outburst is probably the last blaze. Americans should know better than anyone that the voice of excess is far, far louder than the decibel level of the silent majority. they must also be aware, by their own experience, which is stronger.

## RESOLUTION ON EL SALVADOR

### HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. WEISS. Mr. Speaker, after 6 years of war and over $2 billion in United States aid, elements of the Salvadoran Government continue to kill, kidnap, and abuse citizens of El Salvador. Though the absolute number of violations has declined since the mass killings of the early 1980's, some 20 to 25 Salvadoran citizens per month continue to die in targeted killings by Government security forces or death squads linked with the Government. Salvadoran workers and trade unionists have been particular targets of this repression. The situation in El Salvador therefore deeply concerns many trade union members here in the United States.

I commend to my colleagues' attention the attached resolution, which was passed on July 14, 1986, by the New York Area Labor Committee in Support of Democracy and Human Rights in El Salvador.

RESOLUTION ON EL SALVADOR

Whereas, the living standards of Salvadoran workers has dropped 54 percent in the last five years, inflation this year is rising at the rate of 36 percent, and workers have not seen real wage increases,

Whereas, the Duarte government, with U.S. aid, continues to conduct saturation bombing in civilian area in El Salvador,

Whereas, Amnesty International has continued to receive reports of arbitrary arrests, death squad killings and disappearances,

Whereas, unions such as ASTTEL (the Salvadoran Telecommunications Workers Union) have faced firings, military occupation of their worksites, takeover of their offices, and the management of ANTEL has set up a company union, ASTA, and has affiliated it with the Communication Workers International (PTTI) in an effort to derail international support,

Whereas, garment, electronics and other plants continue to be closed down here as U.S. companies flee to Latin America and other areas where they can exploit cheap labor,

Whereas, the Salvadoran labor movement has formed a broad labor federation—UNTS (Unidad Nacional de Trabajadores Salvadorenos) and recently organized a demonstration of over 80,000 people to call for a settlement of the civil war through negotiations,

Whereas, under the government of Salvadoran President Jose Napoleon Duarte, repression of trade union rights continues despite his promises of democratic changes,

Whereas, a free, democratic society cannot exist without trade unions and respect for human rights: Therefore, be it resolved that trade unionists in the United States:

Continue to oppose U.S. military and economic aid to the Salvadoran government,

Call and write their Congressional representatives urging them to discontinue such aid,

Send letters immediately to President Duarte urging him to respect trade union rights and to pressure the government-run telecommunications agency (ANTEL) to negotiate with the ASTTEL workers, re-hire the fired workers and respect trade union rights, and release the sons of union leader Centno from prison.

Pass resolutions in support of the ASTTEL workers,

Urge the sending of a Congressional-Labor delegation to El Salvador to investigate trade union repression and human rights abuses,

Call upon PTTI to disaffiliate ASTA and recongize ASTTEL as the legitimate union,

Escalate pressure on the Duarte government for a peaceful, negotiated end to the war.

## SUPPORTING ASAT TEST BAN STILL THE BEST COURSE

### HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. COUGHLIN. Mr. Speaker, for the last 2 years the House has supported a moratorium on the testing of antisatellite [Asat] weapons against targets in space. Last year, after tough negotiating with the Senate, the House-supported ban on this testing finally became law. Since that time, a de facto United States-Soviet moratorium on Asat testing has worked exactly as planned. It will continue through October 1, 1986—but it must be extended through 1987 if we want to ensure reaping the benefits of this arrangement in the future.

All of the arguments that persuaded the House to support the Asat ban last year and the year before are just as compelling today. We continue to be more dependent on our military satellites that the Soviets are on their satellites. The Soviet Asat weapon is a year older and a year closer to total obsolescence. Allowing United States testing of the F-15 launched MHV Asat will more than ever mean all bets are off on any future United States-Soviet negotiations to end the Asat arms race.

In addition to these compelling reasons to preserve the Asat test moratorium, there are several important new factors to consider. First, we now have no way of launching replacements for our most important satellites into orbit. With the *Challenger* disaster and the grounding of our Delta and Titan heavy lift rockets, it is dubious whether we could respond effectively to a crisis requiring the deployment of new military satellites. It is unclear when any of these key launch systems will be on-line again.

Yet allowing tests of our Asat device to go forward in October will only pressure the Soviets to undertake new efforts to enhance their current inadequate Asat capabilities. Prior to 1982, when they conducted their last test, the Soviets had a relatively dismal Asat record. That could change if we give them carte blanche to perfect an advanced Asat weapon, however. Right now—while we can launch neither replacements for existing satellites nor new satellites able to counter any advanced Soviet Asat weapon—is absolutely not the time to open the door to further Soviet tests and enable them to make strides toward perfecting an Asat weapon.

Beyond our current launch vehicle crisis is another important new consideration—the ban itself is now law. This year, for the first time ever, we have had an Asat test moratorium. At least the arms race is not escalating in the anitsatellite weapons arena. That is a major accomplishment, and one that did not come easily. Now is not the time to abandon this hard-won arms control victory. The Asat test moratorium—a de facto United States-Soviet agreement—is serving us well and is one of only a few superpower arms control arrangements still being abided by. It is the only arms control measure realized since 1979.

Mr. Speaker, the Asat test moratorium has worked exactly as we hoped it would. Since the time it was enacted last year nothing has changed. If it is allowed to lapse, our national security may be subject to grave new dangers. I urge my colleagues to support the Brown-Coughlin Asat test ban amendment during consideration of the DOD authorization next week.

## MID-SESSION REVIEW OF THE 1987 BUDGET

### HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. OBEY. Mr. Speaker, after the last 5 years, it is difficult to call any document emanating from the Office of Management and Budget remarkable. But I urge the Members to closely examine the little jewel which OMB dropped on the country yesterday.

In their Mid-Session Review of the 1987 Budget they describe how unexpectedly slow economic growth, coupled with farm and bank failures, have resulted in a surprise—the deficit for fiscal 1986 will be another record smasher, $28 billion larger than the administration anticipated in January and $51 billion bigger than they predicted last August. Of course, it was not possible a year ago or even 6 months ago to foresee that we were not entering a new era of remarkable growth. Therefore, there was no way of knowing that we would be facing deficits of this size.

OMB's Mid-Session Review also looks at the economy and the budget for fiscal 1987 and lo and behold, we find where all that growth and prosperity that we were expecting in fiscal 1986 went. It moved to 1987.

Since January, OMB has been under attack for rigging the 1987 deficit numbers by projecting growth considerably higher than the Federal Reserve, the blue chip consensus forecasters of the Congressional Budget Office. Their 4-percent real growth prediction in January allowed the President to claim his budget had a deficit more than $15 billion smaller than it actually had if the consensus forecast had been used. So now OMB, while announcing a $30 billion goof in counting the 1986 deficit because of missed growth projections, will be shamed into more reasonable predictions about fiscal year 1987, right? Wrong. They now claim that growth in 1987 will be even stronger than they had earlier anticipated. They move their real growth forecast from 4 to 4.2 percent and themselves even further out of line with private forecasters.

Mr. Speaker, the problem with feel good economics and feel good budgeting is that it does not feel very good after the real numbers come in and you find that you have yet another new record setting deficit, that your country has had to go into the bond market again and borrow tens of billions more from the Japanese that your kids will have to pay off with taxes taken from every paycheck they will earn for their entire working lives. The longer it takes this White House to get a grip on reality the less likely it is that we will be able to come up with reasonable strategies to turn the situation around. Things are rapidly getting further out of control and the White House seems to be doing everything possible to make the "gloom and doom artists," they so despise, the soothsayers of our times.

## READSBORO, VT, BICENTENNIAL

### HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. JEFFORDS. Mr. Speaker, Readsboro—a tiny, quiet hilltop town in my home State of Vermont—is ready to strike up the band this weekend to observe its 200th birthday.

The town has a total population of only 638, but that small population reflects some very big values that are treasured throughout Vermont.

We live in extremely changing times, and change has not left either Vermont or its tiny Readsboro untouched. Yet both retain a pristine beauty that has been their heritage and their joy.

When the townspeople of Readsboro celebrate their bicentennial, they will be celebrating the passage of 200 years that has left in tact the charm that has always accompanied the town's history.

That history includes an original charter granted in 1764 to a Capt. Robert Rogers, who in the end never got a chance to settle on his chartered lands because he went off to Canada to fight with the British. In 1770, yet another charter was granted to John Reade and 29 of his associates for 30,000 acres of a township to be known as Readsborough. The town, however, was never actually organized under that charter either, probably because of hostilities and tensions that existed at the time between Vermont and two of its now-friendly neighbors.

It wasn't until 1785, in fact, that Daniel Henry Davidson, a veteran of the 1759 expedition against Crown Point, gathered with others to settle down about mile north of Readsboro Village.

The town of Readsboro, which recently merged with its village, is observing its bicentennial in 1986 because it was in an "86" that the first Readsboro town meeting was held—on March 17, 1786.

Mr. Speaker, the Vermont General Assembly adopted a resolution earlier this year saluting the town, its residents, and its founders on the occasion of their bicentennial celebration. I join wholeheartedly in that salute.

## TRIBUTE TO POLICE OFFICERS

### HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. McGRATH. Mr. Speaker, I would like to take note of the accomplishments of two distinguished officers of the Nassau County Police Department, Capt. Andrew "Mel" Kenny and Detective Robert Cuccinello. Captain Kenny has been recognized as the Law Enforcement Man of the Year and Detective Cuccinello as Detective of the Year. Their service to the public is in the finest tradition of the law enforcement profession.

Captain Kenny is one of the foremost managers and administrators in the N.C.P.D. He has earned several degrees and he has completed specialized seminars and courses in hostage negotiation, antiterrorist tactics, and a wide variety of other areas. Perhaps more important, is Captain Kenny's ability to transfer that knowledge to his fellow officers in training sessions and in the county police academy. This type of dedication often goes unnoticed, however, it is essential to the foundation of a modern law enforcement agency.

Detective Cuccinello is an undercover officer in the narcotics squad. His efforts have been concentrated on ridding our communities of the terrible scourge of drugs. In the course of his activities, Detective Cuccinello has been assaulted and shot at by drug dealers. He has literally put his life on the line on numerous occasions to arrest and help convict those who have invaded our streets, schools, and parks to sell dangerous narcotics. Cuccinello has also participated in other major criminal investigations including a well-publicized attack on an area college student.

Television and movie accounts of police activities tend to make us believe that every case ends with a few days work and no risk or injury to the officers involved. Little attention is devoted to the perseverance and actual investigative work needed to solve a crime or build a case against a suspect. Nothing is mentioned about the endless hours spent on training activities, development of enforcement strategies, and crime prevention.

The residents of the Fifth Congressional District are truly fortunate to enjoy the protection offered by these two police officers and their colleagues. I know that every Member of this House will join me in congratulating them for their outstanding work and wishing them well as they continue their careers.

## IMPORTS OF KIWIFRUIT

### HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. MATSUI. Mr. Speaker, I am introducing legislation which would place a de minimus duty of one-tenth of a cent per pound on imports of kiwifruit.

California is in the process of developing a kiwifruit industry. There are currently an estimated 1,000 growers in California who account for over 98 percent of the U.S. production. Until recently, imports of kiwifruit primarily from New Zealand, helped to supply, the domestic market during the domestic growers' off season. Recently, however, these imports have been significantly expanded and have begun to overlap domestic production and marketing.

In 1982, for example, over 4 million pounds of kiwifruit were imported from New Zealand. During 1985, imports of kiwifruit from New Zealand totaled over 17 million pounds. This dramatic surge in imports and market penetration has depressed domestic growers' prices in the market.

The surge in imports of kiwifruit is of concern because it is believed that the New Zealand Government subsidizes exports of kiwifruit to the United States.

Domestic growers should have the opportunity to compete on an equitable basis with imports.

This legislation, by setting a de minimus duty, would recognize the problems of surging imports and the difficulty agriculture has had historically in seeking relief from the ITC. It should be noted that historically there has been a duty on imported kiwifruit. The duty was removed on the basis that imports were small in volume, relatively high in price, and not directly competitive with any domestic product. The situation has changed dramatically with the development of a domestic industry and with the New Zealand subsidy programs.

## KEYNOTE SPEECH TO ALL-AFRICA CONFERENCE

### HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. SCHEUER. Mr. Speaker, One of the more optimistic signs coming from the recent All-Africa Conference of Parliamentarians on Population and Development was the fact that virtually all the expertise was provided by African experts.

In the short time since independence, Africa has developed home-grown knowledge and professional expertise of a high order of excellence that will be essential in developing solutions to uniquely African problems in a uniquely African way.

One of the most brilliant of these African experts is Dr. Frederick Sai, senior population adviser to the World Bank in Washington, who has consistently campaigned for rational population policies in Africa.

I strongly recommend his thoughtful address to the Conference on Population and Development in Harare to my colleagues' attention:

AFRICA'S PARLIAMENTARIANS AND POPULATION [1]

Mr. Chairman, honorable ministers, distinguished parliamentarians, ladies and gentlemen:

This is a very historic occasion which few of us in the population field could have foreseen just a few years ago. Certainly a meeting of African parliamentarians discussing the issues of population and family planning in Africa by the turn of this century would not have been forecast at Bucharest in 1974.

It is indeed an honor for a person like me who has devoted his life to public health—principally to issues of population and nutrition with particular attention to Africa—someone who almost had the feeling only eleven years in Bucharest that he had to run away from the African delegations and his peers because they considered him a traitor, someone who in Dar es-Salaam in 1974 was called an Uncle Tom by a young South African simply for trying to advocate the cause of population and development. It is so gratifying to note the progress made. Yet a lot remains to be done and we still have the unconvinced to deal with. In the last couple of years the old arguments about population growth and development have been given new prominence. Some are even using the simple population and land resource argument to say Africa needs more people today and not less. It is a cruel deception.

I think we sometimes let ourselves be deceived or trapped into a complacent mood when we think of our land, our paradise, our garden of Eden with its dreams of plenty. We keep on with this dream as we remember the words of the Lord when he said to the original couple, "Go ye forth into the world and multiply". Sometimes people use this particular phrase as if the Lord had issued a command. But it was not a command—it was a blessing; one that we have long since fulfilled.

What's more, when the good Lord was saying this, he was talking to two people who had the whole world in front of them. Today we are clearly in a different world, a world dense with confrontations—nuclear confrontations, food confrontations, trade confrontations, and so on. And we in Africa have to accept the stark fact that we are in confrontation with problems as severe in their impact as they are difficult to solve.

Sometimes when we look at the leaders of our people and at the number of developmental necessities in which we are bogged down and which had to be completed, as it were, yesterday, we want to throw up our hands and say, 'It's impossible. Africa cannot make it!" And yet it was not for nothing that the preacher decribed the human being as a pilgrim of the impossible. To dream the impossible dream and to bring it to fulfillment is what the human spirit is all about.

So in Africa we should have a new spirit arising. This is a matter to think through during this historic All-Africa Conference of Parliamentarians on Population and Development, a conference of lawmakers who are conceiving fresh and interesting approaches to the issues of population and development.

This is the spirit that was shown in Mexico at the International Conference on Population. It was very much the spirit among the Parliamentarians who were present there. The Parliamentarians at the Conference appeared in retrospect to have formed a critical mass to which some of the credit should be assigned for what the conference achieved.

And—as we may ask—what did the conference achieve? As a delegate from Ghana, I had the privilege of serving as Chairman of the Main Committee, the Committee which—as some of you know—spent many hours, night and day, trying to shape up the revisions and refinements to the World Population Plan of Action. The resolutions that had been set to Mexico, had gone through two readings in New York, and thanks to my knowledge of the UN system, I was optimistic enough to think that we were not going to have too much trouble going through those recommendations in Mexico. For the benefit of those of you who do not know how they got there, let me say that these recommendations had been culled by the UN Secretariat from expert group reports. There had been four expert groups—one on fertility and the family, one on population distribution and migration, one on resources and the environment and one on mortality and health policy.

The first draft was debated in January, 1984, with another meeting in March to complete the debate. After that we thought we would have few issues of real contention. As it turned out, even when we sent the issues of contention to other committees, the work of the Main Committee itself had to go deeply into certain subjects—and this was good, as it turned out, because it was an educational process for all of us. And in the end, we won through and passed a Plan of Action which in most respects attained its purposes and which is and will remain for some time a good basis for what we in Africa hope to do in population.

To me, the difference between Mexico and Bucharest was that Bucharest had been convened by the developed countries to look at their own population problems, to review where the world stood, to examine the activities that have been undertaken, to consider what sort of report we would need to proceed on the path to solutions. Now we must begin to ask ourselves what exactly governments are doing with the Plan of Action which Mexico produced.

In Mexico, the developing world spoke almost as one. This was the voice of countries embracing 90 percent of the world's poor. It spoke in total awareness of its population problem, in an understanding of its severity, in a determination to do something about it. It took but a few moments to realize that at the heart of the major dynamics going on at the conference was a sizeable group of parliamentarians at work. Those who produced a trenchant and aggressive Plan of Action included African lawmakers. Among them were some of the distinguished delegates at this conference today.

Mexico offered African lawmakers an opportunity to discuss issues of population and development with their fellow legislators from other regions of the world. They had a chance to hear how others had addressed their problems of development and population. They could capture the thinking of those who had joined the Global Committee of Parliamentarians on Population and Development. These discussions and encoun-

[1] Keynote speech at the All-Africa Conference of Parliamentarians and Development, Harare, May 12-10, 1986.

ters maintained the impulses generated in Mexico and kept events in motion after the parliamentarians had returned home. They bring about preliminary meetings and workshops—as well as the present All-Africa Conference of Parliamentarians on Population and Development.

I personally believe that the linking of development with population is a good thing. it helps us to think in terms that go well beyond the problems of population growth, however important these problems may be. Essentially, it helps to shift the emphasis in development from mere material production—from the GNP-orientation to development—and direct the emphasis to people, to their needs, their aspirations, and how these are to be satisfied. It is to recognize that if our people are healthy, educated, well nourished, properly encouraged and sufficiently stimulated, they themselves will produce all the development that our nations and the world require. It is for the health and well-being of our people that we wish to restrain an excessive growth rate of the population, and not for many abstract reasons of demography or even of economic development per se. It is because we care that we want to see a slowing down in the numbers we add to our population each day, each year.

Now, each of us approaches the intersection of population and development in his or her own way. As a young doctor practising medicine in Ghana, my concern was originally created by the malnourishment I found among the children of the poor. In observing these children and attempting to treat them, I was led to wonder what it would take to assure an adequate diet to all our children. The kwashiorkor and marasmus that I encountered only too frequently in Accra and in its surroundings led me to consider the environment that produced such tragic results. I looked at the neighborhood in which the children lived. And from there I was brought to inevitably to consider the general condition of the city, the situation of Ghana itself, of Africa, and of the world.

I looked at their home surroundings and it was possible to see how one child coming too quickly after another had something to do with the conditions I found. It was easy to see how a mother dying in childbirth or soon after, or too ill to breast-feed, injured and blighted an infants future. One child with a swollen stomach and brittle sticks for legs became for me a kind of accusation against the state of the world and occasion for wondering what had gone wrong and what might be done about it.

Now what is it that might be done? All All-Africa Conference, like yours, will seek to reach agreement on a full Plan of Action, one that applies in a general sense to the continent as a whole, I would hope. The elements of the Plan have started to emerge from the pre-Conference consultations and workshops. What will be the goal and the aim of the Plan of Action? Many years ago, I would have answered this question from the local and limited perspective I had then. I would have said that the Plan of Action should aim at ridding the children of Ghana of undernourishment and assuring them all an adequate diet, good health care and opportunities for education.

But let us for the moment accept that local perspective and see what would be involved in achieving its limited goals. We know that a Plan of Action would have to specify a wide range of actions if it really intended to banish malnourishment—even in just one country, or in a part of one country for that matter. It would support family planning for its benefits to the health of mothers and their offspring—because the children of smaller families and children who are properly spaced have a better chance of being adequately fed. It would aim at the protection of children and their health through immunizations, early treatment of diarrhea and health education of the family urging measures to prevent child neglect and abandonment.

With the terms "neglected and abandoned", one is not restricting oneself to the child who has been thrown out into the street. Children are neglected and abandoned in large numbers within homes. Fathers running away, turning alcoholic, fathers at home who do not provide for their children's upkeep, mothers who are busy in the field or ill with no one to look after the children—all of this means a degree of abandonment and neglect of children. These are realities that can be found everywhere, and they are situations that we must seek to correct.

We should try to ensure an education for all—as a critical means of preventing malnutrition in the next generation. We should pay particular attention to the education and advancement of women as the most important single factor in preventing undernourishment and promoting good health of children, as our studies have come to show. We should be concerned that the number of years of childbearing to which we subject our women is almost 20 years compared to the 4 or 5 years of their sisters in Europe and America. All that, of course, begins to compose a rather broad plan of action, involving, as it does, education, the advancement of women, health and family planning and rural development. And it is unlikely that a country like Ghana could carry it through all by itself. It would have a much better chance of achieving it if Ghana were sharing improvements in the quality of life that were taking place in all of Africa.

And should it succeed in improving nourishment for our children, it would of course do much more than that. It would speak to the interests of all of us and further all our separate aims. Thus we see how, starting from the goal of nourishing a few children in one country, we are led on to understand how all our problems are interrelated. To provide a good diet to all our children, changes must be made that reach into all aspects of our social and economic life. Like so many issues, good diet for children is one that is seen finally to lie squarely on the intersection between population and development.

And indeed, to achieve even limited goals, our plan will aim at reducing rates of population growth wherever they are excessive. They will aim at helping families plan their numbers. This is a problem that Africa must confront squarely, without quibbling or evasion. In most of our countries, our children are not going to be properly fed until our population growth rates are brought down to where increases in our numbers are in balance with our possibilities for providing our people with the resources they need. A recent major study of the U.S. National Academy of Sciences concluded that there are very few countries that would not do better with a slower rates of population growth. Few will be unhappy to see our countries continue to grow at a reasonably moderate rate. Nor at the moment do we perceive our danger to lie in our absolute numbers alone. Where we see the arch-villain is in excessively rapid growth, creating a condition in which even the most astounding development never catches up with exploding needs, as subsequent speakers will demonstrate.

The population of Africa has the distinction right now of growing faster than that of any other region in the world. Nay, it has the distinction of growing faster than any group of human beings has ever grown in all of human recorded history. Three percent a year is the average growth rate—and going up. It sounds like not very much. Yet, when you look at the growth rate of Europe at the time it was growing most rapidly, it was rarely more than one percent on the average. A higher growth rate obtained in some places, for example, it was 1.5 percent in some parts of Russia. And yet Africa has a growth rate three times as high as Europe's was—and in Kenya, it is four times as high. The numbers may not sound like much, but those of you who are financiers know what it means to change the interest rate by one percent when we are dealing in terms of millions. And that is precisely what we are dealing with. With millions, with hundreds of millions. At 470 million today our numbers will reach 1 billion in under a decade and there is little we can do to stop that.

There are people who talk to politicians about the beauties in economies of scale—and they go on to tell them that the larger the population base, the bigger the market they have. To these people, parliamentarians ought to put a few questions. Such as: "Sir, it looks like you are trying to convince me that the little motorcycle, the Moped, because it uses gasoline, and the articulated truck, because it uses gasoline, both present the same management problem. I don't believe they do. A four percent growth rate is like an articulated truck when compared with a one percent growth rate—which is more like a simple motor bicycle that two people can lift and carry away when they can't find a parking space."

Another thing you should ask them: "Sir—or madam—when Europe was growing most rapidly, did everybody expect European governments to provide free education to all, to make free health services available to all, to carry out a vast range of development actions and all at the same time?"

Finally you should ask them what happens to the millions caught in the gap while development is catching up with population growth, why should we ignore such a high and dangerous social cost. There are good reasons why when you examine supply, you must also consider demand. And so it turns out that no country in Europe can provide us an example of a country growing at three percent per year that is also developing rapidly. So we have no historical precedent for our situation, and we should not be misguided into thinking that we are going to attain our developmental goals simply with some changes in technology and a few inputs into agriculture, believing that with such measures alone we can accommodate our present growth rates.

Many countries that have adopted free and compulsory education see at present a prospect of no free, compulsory education in Africa. And countries that once swore politically to provide free health services for all are having second thoughts about the possibilities of paying for such services, and these include some of the richest countries on earth. Even they are caught in the problems that demand creates for supply.

The fact is that even if we were to halt the growth rate of our African populations and bring the total fertility rate to replace-

ment—2.2 children per woman—or even if we were immediately to reduce our growth rates to one percent per year, a momentum is built into our population age structures that will ensure the continuance of enormous growth. This is because our population are young—in most African countries, 45-50% of the population are under 15 years of age—and these young people will all move into the reproductive age. This kind of momentum means that no matter what we do, in each of the early years of the century to come, we will inevitably be adding more children to the African population than we are adding today. It means that there is absolutely nothing that we can do to prevent that. I am not sure that even a catastrophic war could prevent Africa's population from doubling within the next 20 or so years.

We hear it said that Africa has the potential to feed a billion or more people. I would be the first one to say that this is undoubtedly true. But it is an equation that involves a number of deceptions. First, that a tropical rain forest in the center of the continent is suitable for easy conversion into croplands. Second, that vast resources of new lands now lying idle can easily be made productive. The fact is that Africa's potential will be realized primarily by increasing the productivity of the land already in use, this to be achieved by the wide application of conservation measures and by the intensive styles of agriculture that are characteristic of full development.

What is most deceptive in that equation is the way it offers distant possibilities as the solution to present realities—those realities in which people are actually trapped. To the people in Ethiopia, to the people in the Sahel, the statement that Africa can grow food to feed a billion people must sound like a cruel joke. To tell the children of Burkina Faso who today do not go to school that when the country grows and becomes properly organized—15 or more years in the future—all the children will be going to school, is a cruel way of trying to placate their present feelings of inadequacy. Feelings that will be with those children all the rest of their lives.

While Europe was growing most rapidly, that growth was part and parcel of a rapid development within Europe's civilization. So it was easily absorbed into the structure of European society. What was more, in every direction, Europeans could perceive empty lands. They could see a whole continent of Australia beckoning. And a part of the United States open to them. Today—as I think Mauritians can tell us—when the people of Mauritius recognized that they were growing too rapidly, one thing they turned their attention to was the possibility of emigration. Yet within a mere ten years they came to realize that emigration was no solution to their problem. Alas, we must all face the fact that out-migration will not be possible as a solution to Africa's population problem. Even where there are empty lands today, people are no longer accepting people from other countries to come and live with them. Today we hear Nigeria raising its head to say, "Aliens, go home!" We never know when Ivory Coast, with a fourth of its population coming from outside the country, will face an economic squeeze and say, "We're finished with you visitors. Kindly go home!" All across the continent, it is plain that the days of hospitality are approaching their end.

So if we have nowhere to turn, nowhere to send our surplus people, what then are we called on to do? Our growth, so much faster than Europe's, requires progress in development that is much more rapid than anything that Europe enjoyed. This shows us that we must view our growth rate—in terms of its relationship to development—as abnormal and pathological. From my medical point of view, it has some of the characteristics of an epidemic. It is out of step with all other aspects of our lives. And out of step also with the needs and wants of our communities and our families.

Since we do not intend to return to the death rates of the past, we must make modern methods of birth control part and parcel of our approaches to death control. After all, our abnormal growth is the result of imported bio-medical technologies. As we make technologies for controlling reproduction available to all, we will make reference to the World Population Plan of Action where it says: "The World Population Plan of Action recognizes as one of its principles the basic human right of all couples and individuals to decide freely and responsibly the number and spacing of their children."

You, as lawmakers, including those who strengthened the Plan of Action by insisting on such phrasing as that, will acknowledge the role of government in this matter, bringing to the attention of your fellow legislators the wording in the Plan of Action at Mexico: "Governments should, as a matter of urgency, make universally available information, education and the means to assist couples and individuals to achieve their desired number of children."

The people of Africa, like people in the rest of the world, will be helped to that condition in which they are able to have the children they want, those they can love and care for, and those they can help develop with the support of their communities and their nations. Africa's parliamentarians will see to that. Our parliamentarians will want to recognize this human right and the responsibility of governments in our African Plan of Action to come from this Conference. They will wish to observe this amidst their statements of concern for health, and especially the health of mothers and children, for the protection and proper nourishment of children, for the advancement of women, for rural development, and for education of all.

Widespread access to family planning has a favorable demographic impact and helps reduce populaton growth rates that are excessive. In Mexico, it became clear that after decades of quibbling, this is now almost universally recognized in the developing world.

The declarations contained in the Kilimanjaro Plan of Action show that Africans have also come to recognize this. What was said at Arusha also gave recognition to the enormous health benefits of family planning. We want to make family planning accessible to all, make it inexpensive, make it part and parcel of a people-oriented development approach. These are the issues that are emerging at the heart of a practical and innovative approach to development. The parliamentarians in the global movement for population and development have taken the lead in giving expression to these new ways of thinking.

You—and by "you" I mean you, the parliamentarians here—you are thinking of ways of helping people to help themselves. You are the ones who understand that the obstacles must be removed that hinder people from expressing their inborn drive and ingenuity. In the end, it is our people who will provide our development. In good health, decently educated, given the tools they need, having gained control of their lives—because they have learned to control the first essential, the size and timing of their families—our people, supported by their representatives in parliament, will themselves advance our countries and bring this continent in full vigor into the 21st century.

To conclude: What do we, the people, expect of you, our representatives in parliaments? Amongst other things, we expect leadership, both public and personal. We expect you in the parliamentary movement to form centers for information, for planning, and for exchange. We expect you to create mechanisms which will carry education to governments, to administrations, which will let them know what they have to do to make things happen. We expect you to carry education to the people, to help people understand what they need to understand for their own good. We expect you to analyze legislation and to do away with legislation that inhibits effective approaches to health and family planning. We expect that you will introduce legislation that will encourage people to take advantage of their highest possibilities. We expect that you will help demystify family planning technology, as if family planning technology were something apart from other human advances. We expect you to speak out fearlessly for the rights of all the necessary information, education and services to help them avoid being entrapped at young ages by ignorance and bigotry.

Above all, ladies and gentleman, we expect that you will not keep silent about these fateful issues. Because with these particular issues, silence does not mean consent. Silence here means you are saying, "No!"

## A DEMOCRATIC SOCIETY IN CHILE

### HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. BEREUTER. Mr. Speaker, as many of my colleagues know, this Member has strong views on the return of democracy to Chile and all the nations of this hemisphere. The United States has sent a courageous Ambassador to Chile, Harry Barnes. He makes known our displeasure and despair with the continued brutality of the Pinochet regime. As an American, I am proud of Ambassador Barnes' work.

This Member sees little movement toward a democratic resurgence in Chile. General Pinochet apparently does not want democracy restored because he distrusts it. Therefore, Mr. Speaker, it becomes very important to create a groundswell of support and demand for democracy at all levels of the population.

Oftentimes, cooperatives are a grass roots example of democracy. It is a reason why this Member has consistently supported the cooperative movement both in our country and abroad because of their democratic character. Therefore it was a pleasure to receive a copy of a speech by Ambassador Barnes to a meeting of 250 Chilean cooperative leaders in Santiago. Importantly, this meeting occurred only a few days after the tragic death of Rodrigo Rojas de Negri, the young Washington

resident burned to death in Chile a few weeks ago.

While the Ambassador's speech is an excellent one that deserves to be read in full, it is too long to place in the RECORD. This Member would be glad to offer my colleagues a copy if they so desire. As a substitute this Member commends to the attention of the House a press release by the U.S. Overseas Cooperative Development Committee on the meeting between our Ambassador in Chile and Chilean cooperative leaders. It only reinforces the need for our strong support of the U.S. cooperative movement's work overseas.

U.S. COOPERATIVES ADVANCE HUMAN RIGHTS IN CHILE

In his first public remarks since the incendiary killing of American college student Rodrigo Rojas in Santiago, U.S. Ambassador to Chile Harry Barnes called for a strengthened commitment to the development of cooperatives as a proven means to "guarantee human dignity" and "inculcate the concept of democracy."

Cooperatives demonstrate "it is possible to have a society in which man is not a slave but rather a master of economic forces. . . . True cooperatives teach us the worth of democracy by advocating the free association of individuals and families with common interests," the Ambassador told 250 Chilean and international cooperative leaders attending a conference on "Cooperatives and Development," July 14-18, at the United Nations Center in Santiago.

While he did not refer directly to a nationwide strike July 2-3 or to the subsequent death of Chilean-American Rojas July 6, four days after he reportedly was set ablaze by soldiers, Barnes strongly underscored themes of individual liberty and free association as basic human rights.

In speaking, he shared the podium with Chile's head of government, Ricardo Garcia, Minister of the Interior. Garcia unexpectedly announced the Pinochet Government will seek cooperatives' viewpoint on new laws affecting them.

The conference was sponsored by U.S. and international cooperative organizations and the United Nations as an expression of growing concern over the political and economic situation in Chile and its adverse effects on cooperatives. Impetus for the session came from the U.S. Overseas Cooperative Development Committee, a group of seven U.S. cooperative development organizations active in providing technical assistance overseas.

The meeting was "historic" because Chilean cooperative leaders from diverse economic sectors and competing political ideologies sat down together for the first time and agreed "to get on with the business of creating cooperatives in the private sector," according to Ted Weihe, OCDC's executive director. Twice as many Chilean cooperatives were represented at the session as had been expected. Several specific actions were taken, among them to strengthen ties with the international cooperative community and jointly to develop cooperative banking, insurance, and housing ventures.

The conference was headlined in news reports throughout Chile and proves for the first time that "U.S. cooperatives can intervene successfully, under the most trying political circumstances, and in a totally private-sector approach, to create and strengthen democratic institutions." says Weihe.

Chilean leaders used a local idiom in describing the actions of the international cooperative leaders. "You arrived like a winter white horse," Weihe was told. When he asked for a translation, they said: "You helped us do things we couldn't have done on our own."

Wallace J. Campbell, permanent representative of the International Co-operative Alliance (ICA) at the U.N., announced at the conference that ICA had just accepted the Chilean Cooperative Confederation into the 500 million-member world today.

## SCHOOL-BASED ADOLESCENT HEALTH SERVICES BILL

### HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. MILLER of California. Mr. Speaker, I am pleased to join my colleagues, Mr. WAXMAN and Mr. ATKINS, in introducing the School-Based Adolescent Health Amendments of 1986. This legislation would fund 4-year demonstration grants to public and private agencies which choose to provide preventive and primary adolescent health care within or adjacent to schools.

Teenagers may be the most medically underserved and medically neglected segment of our population. The health problems of low-income teens, in particular, are not being addressed in a manner likely to provide for their healthy development.

The evidence is clear:

Teens have a higher rate of acute medical conditions than any other age group, but they have the lowest physician visit rate of any age group. In fact, a national survey indicates that a significant portion of adolescents do not see a physician at all during a year, and 1 out of 10 teens between the ages of 12 and 18 have no regular source of health care at all.

Confirming the national data, a recent schoolwide survey in Kansas City found that half of the respondents had no regular physician, and nearly 20 percent could not remember the last time they had seen a doctor.

A study of low-income teenagers entering the Job Corps found that only one-third of those with vision problems had ever been treated; and 1 in 10 young women, and 1 in 5 young men wre suffering from iron deficiency anemia.

Many teens in low-income families have no regular source of care because they are uninsured. More than 20 percent of teens 12-18 are uninsured or insured only part of a year. Among children under age 18 who depend on Medicaid, teens age 12-18 are the least likely to have full coverage.

Teens engage in risk-taking behavior, such as alcohol and drug abuse, at very high rates and are therefore at increased risk of serious health problems. A 1985 national survey of drug use among high school students reported that a steady 4-year decline in illicit drug use among high school seniors came to a halt in 1985. Nearly two-thirds of all seniors reported illicit drug use at some time in their lives. One in 20 smokes marijuana daily, and 20 percent are daily cigarette smokers. One in 20 seniors drinks alcohol daily, and 37 percent have had five or more drinks in a row at least once in the prior 2 weeks. A recent telephone survey of police departments in 27 major cities indicates increases in cocaine use, especially by youth between the ages of 15-25. Reports of younger children using crack—a purer, more rapidly addictive form of cocaine—are also increasing. Declining mental health among teens is identified in the tripling of teen suicides in the last 25 years.

The evidence is also clear that school-based health programs may provide the only source of health care for many teens. Almost two-thirds of the students who receive services from a Kansas City school-based health program say they would not have sought treatment elsewhere. Most school-based clinics have enrollment rates between 70 percent and 90 percent of the student body, indicating the high acceptance rate.

As a result of being the primary or sole health care provider for many of the students, school-based health programs in major cities like Chicago, Dallas, and St. Paul also report finding previously undetected yet significant health problems. These problems range from hypertension, diabetes, and asthma, to heart murmurs and vision problems. In addition, students are using these services for a wide variety of unmet needs.

The West Dallas Youth Clinic found previously undetected health problems, including previously undetected heart murmurs, in 20 to 30 percent of its student population.

During the first month the Chicago DuSable school clinic was open, 50 students using the clinic were found to have vision problems that required glasses, and undetected cases of diabetes, hypertension, and heart murmurs. After the first 10 months of the program, more than 1,500 student visits had been for treatment of chronic or acute medical conditions. About 10 percent of student encounters with clinic staff were for mental health counseling. Less than 20 percent of student visits were for family planning, prenatal, or other gynecological care.

At the school-based clinics in four St. Paul high schools, 25 percent of the visits during school year 1984-85 involved minor-acute illnesses, and preventive health services including throat cultures, immunizations, and physical exams—50 percent of the visits were primarily for nutritional counseling or visits with the social worker.

Because students are so willing to use these services, where available, school-based health programs have had an important effect on prevention:

A program in a Native American community in New Mexico offers an effective peer prevention program to reverse the tragic increase of injuries and deaths related to drinking and driving among teens on the reservation.

In Kansas City, not one of the students who completed the school-based clinic's treatment program for alcohol and drug abuse was cited again for disciplinary action.

The hospitalization rates for 15-to-18-year olds who are users of the West Dallas Youth Clinic are consistently 70 to 80 percent lower than the rate for other 15-to-18-year olds in the west Dallas area.

In schools where health programs exist, absentee and dropout rates have also been significantly reduced:

During the 3 years of clinic operation in Kansas City, the greatest decline in absenteeism is the school district occurred at the high school which houses the clinic.

Before the DuSable school-based clinic began, 60 percent of students said they missed school to see a doctor. Over 4,000 visits to the DuSable school-based clinic during the first year of operation represent at least that many schooldays not missed by students, who might have stayed at home instead or missed a day to seek medical attention elsewhere.

In Mississippi, pregnancy related dropout was reduced from about 50 percent of those pregnant prior to instituting the school-based clinic to 14 of 142 participating mothers since the program began.

Eighty percent of teen mothers remain in school to graduate at the high schools which house clinics in St. Paul, representing a dramatic decline in drop out rates at those schools.

Rates of teen sexual activity, pregnancy and births have also been reduced or delayed among teens using school-connected health programs.

Two Baltimore schools with adjacent health clinics demonstrated that, among the teens served, onset of sexual activity was significantly delayed. In addition, pregnancies among young women in the two schools were reduced by 30 percent while teen pregnancies in Baltimore schools without health services increased by 58 percent.

Since 1976, birth rates to female students at the St. Paul schools with clinics have declined 37 percent to a rate that is about half the rate for St. Paul teens lacking access to these services. Repeat pregnancies were markedly reduced as well.

Over the 9 years of operation of the West Dallas Youth Clinic, there has been a 52 percent decline in the teen birth rate for 13 to 14-year-olds, a 28 percent decline for 15 to 16-year-olds, and a 19 percent decrease for 17 to 18-year-olds. The percent decrease was greatest for the two youngest age groups, suggesting a delay in childbearing among this population.

Of the 128 student mothers served by the Jackson-Hinds school-based health clinic in Mississippi, there were only four repeat pregnancies after 1 year.

School-based health service programs have also reduced low birthweight and infant mortality rates for infants born to teen mothers, who are the highest risk group for poor birth outcomes.

Over the 9-year period of the West Dallas clinic's operation, there was an 88-percent reduction in the infant mortality rate.

In Kansas City, there were no low birthweight infants delivered to the teen mothers in the clinic's prenatal program.

The low birthweight rate for 1982–84 was 4.9 percent for teens participating in the comprehensive single-site component of San Francisco's TAPP project, compared to a rate of 16.7 percent for students who had dropped out.

Teen mothers—7.2 percent—who received prenatal care at the St. Paul school-based clinics had low birthweight infants, compared to 13 percent for mothers 15 to 18 in St. Paul who did not receive prenatal care at the school-based clinics.

Despite this compelling evidence, the Federal Government targets very few health resources for adolescents. And those few programs which may have provided resources for teenagers—such as alcohol abuse prevention, compensatory education, Medicaid and MCH—have suffered drastic cutbacks during this administration.

But our neglect of the health needs of teenagers will come back to haunt us in later, more costly and more complex treatment, rehabilitation and dependency.

With this legislation, we have a chance to take a different path. By helping communities that voluntarily choose to establish school-based health programs, we can invest in the futures of an otherwise vulnerable group.

School-based services have demonstrated that they can provide valuable prevention and intervention services which effectively reduce health problems, as well as nonhealth related school problems, such as school dropouts. What is also clear is that they can save a great many tax dollars.

The 62-percent decline in hospitalization rates for adolescents in West Dallas accounted for a cost savings to the local hospital of $1.0 to $1.5 million annually.

DuSable High School in Chicago saved $4,000 in education resources alone during the first 2 months of clinic operation as a result of school days not missed by students because they had access to health care onsite. These savings have been multiplied several fold in the clinic's first year, with over 4,000 visits by students to the school-based clinic.

In Illinois, the Executive Service Corps estimates that for every $1 invested in school-based clinics, $12 would be saved over a 5-year period.

Some argue that school-based health services for teens amount simply to family planning services, and that such services are encouraging teenage sexual activity.

The weight of the evidence supporting the range and effectiveness of school-based services negates those arguments.

The private sector has already recognized the emerging importance of school-based services in improving the overall health and welfare of the Nation's teenagers, and has taken the lead in establishing and expanding new programs. State legislatures in Washington, Connecticut, Minnesota, North Carolina, California, and Oregon have introduced or enacted legislation to provide opportunities for local communities to elect this option. Approximately 60 local communities and school districts nationwide have taken it upon themselves, with the help of private foundation and government support, to develop comprehensive school-based services for teens.

During its first year, the Select Committee on Children, Youth, and Families, which I chair, learned first hand about the effectiveness of school-based clinics. The select committee held a hearing at the St. Paul Central High School and visited the clinic and child care facilities associated with that program.

Many of the facts mentioned earlier we learned first hand at that visit, talking to the teens who use the services, their teachers, and administrators.

In the past few months, another group of teens gathered here for a convention under the sponsorship of the Kennedy Foundation to discuss teenage pregnancy.

They overwhelmingly supported school-based health clinics.

Why don't we listen to them.

We can invest in their futures without new technologies or new bureaucracies.

None of us like what we see regarding trends in teen health, teen pregnancy, and teen drop out rates. This bill gives us a chance to stop wringing our hands and start making a modest, commonsense commitment to our teenagers.

## NATIONAL SPACE POLICY AND THE PAINE COMMISSION REPORT

### HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. BROWN of California. Mr. Speaker, today I am introducing legislation along with many of my colleagues on the Science and Technology Committee. My bill directs NASA to review the report of the National Commission on Space, and by December 31, 1986, to recommend a long-range implementation plan, including a specific agenda for the next 5 years. I believe that the recommendations set forth in the Paine Commission report is just what the American space program needs at this juncture in its existence.

The congressionally-mandated, presidentially-appointed National Commission on Space, headed by former NASA Administrator Thomas O. Paine, was created to study existing and proposed space activities and formulate an aggressive civilian space agenda to take America into the 21st century. The report of the Pine Commission entitled "Pioneering the Space Frontier" is a triumph of vision and boldness.

As NASA is rebuilt out of the ashes of the *Challenger* tragedy, a clear set of national goals, and a precise strategy for achieving those goals, must be established. To this end, the administration and Congress need look no further than the Pine Commission report. The report gives a comprehensive rationale for exploring and settling the solar system, as well as detailing 12 technical milestones to mark our progress over the next 50 years.

The commissioners set their sights beyond the immediate difficulties at NASA and envisions thousands of people living and working not only on the Moon and Mars, but also on spaceports throughout the solar system. The exploration and eventual settlement of space is a natural extension of the pioneering American spirit.

It is difficult to conceive of these advances in our current political and economic environment. But 50 years ago, today's space

achievements were also inconceivable. To accept the challenge of the Paine Commission will take a long-term commitment by the American people. Reaching out to meet the challenge of the next frontier will take the resources and determination of a generation or more.

Adopting these ideas, however, will not translate into an inflated NASA budget in fiscal year 1987. The Paine Commission suggests a steady, low-level, but significant increase in funding over the next several years. In fact, the funding necessary to achieve the goals of the Paine Commission would only be about half the NASA budget during the height of the Apollo program.

One difficulty of overseeing NASA in Congress is determining priorities for the many and varied programs within NASA. This situation can be attributed to the vague goals that NASA has been operating under the past 15 years. If NASA's long-term objectives are clear, Congress and the administration can make sound decisions on the near-term programming. My legislation would begin to lay the groundwork for establishing such a comprehensive national space policy.

Several weeks ago, the House and Senate held hearings on the Paine Commission report. After listening to the impressive testimony given by Dr. Paine and other commission members, I am convinced that it is appropriate to take the next step in implementing the Paine Commission recommendations.

I welcome and encourage cosponsors for my legislation. In addition, I would urge my colleagues to support efforts in both the House and Senate to include the language contained in my bill in their respective authorization and appropriations bills for NASA's fiscal year 1987 budgets.

Mr. Speaker, I strongly urge my colleagues to join me in this bold step in support of the Paine Commission report. There may well be deficiencies in the report that will be uncovered by NASA. My bill simply asks NASA to review the findings and recommendations of the Paine Commission report and report back to Congress and the President with their evaluation and plan for implementation of the space agenda. With NASA's report, Congress and the President can then prepare the necessary space policy to take this Nation into the 21st century.

I challenge Congress, the administration, and the American public to embrace the pioneering mission stated in the opening pages of the Paine Commission report:

To lead the exploration and development of the space frontier, advancing science, technology, and enterprise, and building institutions and systems that make accessible vast new resources and support human settlements beyond Earth orbit, from the highlands of the Moon to the plains of Mars.

For your information, I have provided the text of my legislation below.

H.R. 5366

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. DECLARATION OF FINDINGS.

The Congress finds and declares that—

(1) the United States civilian space program has contributed enormously to technological advances which have improved the quality of life on Earth;

(2) the civilian space program has greatly increased our scientific understanding of the Earth, the Sun, the solar system, and the universe;

(3) the preeminence of the United States in space activities has contributed to the Nation's standing in the world and to the spirit of the American people;

(4) the benefits to the Nation of a vigorous civilian space program will far outweigh the costs of such a program;

(5) the National Aeronautics and Space Administration was created with specific goals, including the expansion of human knowledge of phenomena in the atmosphere and space, and the preservation of the role of the United States as a leader in space science and technology and in the application thereof;

(6) the civilian space program is currently undergoing a serious reassessment of its goals and objectives in the wake of the Challenger tradegy and the failure of other launch systems, and the country needs a clearly enunciated statement of the reasons for and goals of the program;

(7) in 1984 the Congress directed the President to create a National Commission on Space to develop long-term goals for the civilian space program;

(8) the National Commission on Space has duly discharged its duties by publishing the report "Pioneering the Space Frontier", which outlines a program for United States civilian space activities over the next 50 years and explains the rationale for conducting a civilian space program and sending humans into space; and

(9) the report of the National Commission on Space can materially contribute to the ongoing reexamination of the civilian space program.

SEC. 2. LONG-RANGE PLAN FOR IMPLEMENTATION OF SPACE COMMISSION'S REPORT

The Administrator of the National Aeronautics and Space Administration shall review the findings, recommendations, and proposed space agenda of the National Commission on Space as set forth in its report submitted under section 204(c) of Public Law 98-361, and shall recommend to the President and the Congress a long-range plan for the implementation of such no later than December 31, 1986.

## H.R. 5377, SCHOOL-BASED ADOLESCENT HEALTH SERVICES

### HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. WAXMAN. Mr. Speaker, today I am pleased to introduce with my colleagues Congressman MILLER of California and Congressman ATKINS, H.R. 5377, the School-Based Adolescent Amendments of 1986. The purpose of this legislation is to provide funds on a demonstration basis for the establishment of local school-based programs that would offer preventive and primary health care services to adolescents. As recent experience clearly demonstrates, Mr. Speaker, the need for such services—especially among low-income children—has never been greater.

Despite the common belief, Mr. Speaker, that older children are healthy and strong, there is increasing evidence that thousands of such children are, in fact, in poor health or have special health care needs. Some of the health problems confronting adolescents are, of course, experienced by all children. There are, however, additional health concerns which, while not unique to older children, are of special significance.

Use of drugs and alcohol among adolescents remain at startingly high levels. The 1985 national survey of drug use among high school seniors found that 45 percent of boys and 28 percent of girls reported heavy drinking; 20 percent are daily cigarette smokers; 5 percent smoke marijuana daily; and 6 out of 10 have experimented with illegal drugs.

Nearly 1 in 10 young teens suffer from emotional or behavioral illnesses. Poor, nonwhite, males and chronically ill children all have higher rates of mental or behavorial problems.

Nationally, teens age 15 to 19 are among those at highest risk of contracting sexually transmitted diseases. One inner-city study has found that among the nearly 200 girls served, 11 percent tested postive for gonorrhea while 28 percent tested positive for chlamydia.

Suicide now ranks among the leading causes of death for older children. Statistics show that although the overall death rates for children age 10 to 19 are declining, suicide rates are increasing. The overall risk of death among 15- to 19-year-olds is greatest for white males, whose death rate now stands at 122 per 100,000.

The rate of pregnancy among teenages remains high. Indeed, a 1985 cross-national study of teenage pregnancy and fertility found that among the six developed countries surveyed, the United States was the only one in which the rate of teenage pregnancy is rising. Today, an estimated 5 million teenage girls and 7 million teenage boys are sexually active. Almost one-half of all girls between the ages 15 and 19 are sexually active and 1 in 6 will experience an unintended pregnancy. Each year more than 1 million teens become pregnant. Pregnant teenage girls are more than twice as likely as all mothers to receive either inadequate or no prenatal care until the final 3 months of pregnancy. And babies born to teens are disportionately likely to be born at low birthweight, the No. 1 cause of infant mortality.

As we all well know, Mr. Speaker, appropriate health care for all these conditions is essential to success in school and social settings, as well to maintenance of good health.

Yet, the evidence is clear that such care is either not available or accessible to the vast majority of adolescents who are in need of services. A national survey conducted between 1980 and 1981 revealed that older children have the lowest physician visit rate of any age group. And services such as comprehensive physical examinations, health counseling, and vision and hearing testing are often not available or performed. Furthermore, the survey reported that childern between ages 12 and 18 are the least likely of any age group to have a regular source of health care. Indeed, the statistics show that 10 percent of these children do not see a physician or other health care provider on a routine basis.

To a great extent, Mr. Speaker, this situation can be attributed to a lack of insurance

coverage for children's preventive and primary health care services. This is particularly true for poor teenages who depend on public insurance programs such as Medicaid. Statistics show, for example, that children between ages 12 and 18 who are eligible for Medicaid services are the least likely to have full-time coverage.

All of these problems have been compounded in recent years by both the elimination of public health projects designed specifically to serve this special population and the cutbacks in other, nontargeted health programs. In 1981, for example, Federal maternal and child health program requirements to develop and fund comprehensive health clinics for children and youth—known as C & Y projects—were abolished under the newly created maternal and child health block grant—title V of the Social Security Act. The elimination of these requirements, coupled with reductions in funding levels for all health programs, has resulted in the terminations of these projects in most States. Consequently, many States now have no maternal and child health services targeted to their adolescent population while many others are able to meet only a fraction of the need.

In reaction both to the continuing unmet health needs of older children and to the inadequate response of the Federal Government, a number of model health care programs designed to serve teenagers have sprung up across the country. These comprehensive clinics often have been placed within schools, but depending on local needs, various other settings such as community health centers or hospitals, have proven more appropriate, but equally effective.

These clinics have demonstrated remarkable success, Mr. Speaker, not only in reaching teenagers and getting them to use services, but in improving their overall health, lowering the number of teenagers pregnancies, and reducing the school dropout rate. In addition, these programs have proven effective in saving precious education-related dollars.

In Chicago's school-based program, teens made nearly 500 visits to the clinic during its first 2 months of service. In the first month alone, 50 students were found to be in need of eyeglasses and 5 cases of previously undiagnosed diabetes and 6 cases of previously undiagnosed cases of high blood pressure were found through routine examinations. A significant number of youths were also found to be infected with sexually transmitted diseases. The initial 500 visits made to the clinic represents at least that number of days of class not missed by students who might otherwise have spent a day at home or a day seeking medical attention elsewhere. This improved attendance record saved the school $8.73 per day for each absence prevented.

School-based clinic programs in St. Paul, MN have made tremendous progress in reducing that city's teenage pregnancy rate. Currently, about 33 percent of the female students participating in the program use family planning services which have helped to reduce the fertility rate among these teens by 37 percent.

In Mississippi, a 1-year followup study of student mothers who were patients of an adolescent health clinic found that there were only four repeat pregnancies and that each teen mother served graduate with her class.

Two Baltimore school-based clinic programs have been successful in both lowering teenage pregnancy rates and in delaying the age of onset of sexually activity. Studies show that for those who participated in the programs, the pregnancy rate decreased by over 30 percent during a 2-year period while among those who did not join, the pregnancy rate increased by almost 58 percent. The findings also indicate that teenage boys used the clinic as freely as girls of the same age.

Kansas City high schools with adolescent health programs have experienced the greatest decline in absenteeism in the school district. School suspensions have been reduced and not one student who completed the treatment program for alcohol and drug abuse—designed to substitute for suspensions—has been cited again for substance-related disciplinary action.

Over the years, programs like those I have just described, have been supported through the contributions of private organizations such as the Robert Wood Johnson Foundation. Such entities recognize the value of providing early and comprehensive services to older children in order to avoid unnecessary pain and disability as well as the need for complicated, more costly health care later in life. But the private sector cannot continue alone to provide all the resources required to initiate and maintain successful adolescent health programs. And it cannot continue alone to do the job of government to help ensure that every child has access to appropriate health care services.

The time has come, Mr. Speaker, for the Federal Government to do its fair share to make these programs possible for the many communities which want to replicate the projects' real and measured success but which lack the resources to do so entirely on their own. It is this strong conviction that is the basis for our introduction today of H.R. 5377.

In brief, Mr. Speaker, H.R. 5377 would establish a demonstration grants program under which funds would be made available for up to 4 years for the development and operation of comprehensive adolescent health services projects. The specifications for this program are based on the lessons learned from the privately financed projects outlined above.

Under H.R. 5377, projects would be required to offer various preventive and primary health care services to older children and would have to make such services available on a year-round basis. Services would have to be provided within or adjacent to schools located in the area to be served by the applicant or in any other location that would better meet the needs of its adolescent population. Authorizations for the grants program would be $50 million for each of the next 4 fiscal years. Grants would be provided on a matching fund basis, with communities required to increase their matching payments over time. Participation in the grants program would be totally voluntary; no community would be required to apply for funding or to otherwise provide health services to their teenagers under this type of arrangement.

Mr. Speaker, this legislation simply would help provide the startup funds for those areas which under current economic and social conditions cannot afford the entire cost to initiate new programs, but at the same time, cannot afford to ignore the growing heatlh needs of their teenager population. We believe school and community-based adolescent health projects can and do make a significant difference in the health and well-being our older children and that this bill will go a long way in helping to make such projects an integral part of local health service efforts.

Despite the success of existing school-based programs and the great interest in developing new projects, I am well aware, Mr. Speaker, that some groups are very much opposed to our proposal. Their opposition is grounded, however, not on the basis of a lack of need or demand for comprehensive services targeted to teenagers, but rather on the premise that the availability of one service in particular—family planning—is not appropriate for adolescents. They argue the provision of this service—among many, many others—will encourage older children to engage in sexual activities that they might otherwise avoid, delay, or forego altogether. They argue, too, that schools are not a proper setting for adolescent health services programs because they make it too "convenient" for teenagers both to obtain family planning services and to withhold information from their parents.

I believe this opposition is without merit and indeed, flies in the face of reality. Virtually all of the young girls and boys who have participated in adolescent health programs across the country were sexually active before they entered the clinics. And most were sexually active without the knowledge or permission of their parents. The same is true with regard to those teenagers who have been involved with drugs and/or alcohol.

I recognize, however, that the views to the contrary are strongly held. But under this bill, a community which believes that school-based clinics would encourage sex among its teenagers has no obligation whatsoever to establish such a program. Conversely, the legislation would enable the Federal Government to provide assistance on a demonstration basis to a community which thinks that this program could improve the health status of its adolescents and is willing to contribute some of its own funds for this purpose. In this way, H.R. 5377 accommodates both perspectives on this issue. Thus, those who would oppose this legislation on the grounds that it promotes or encourages teenage sexuality are, in effect, imposing their own moral judgments on every community in this country. Such action is most inappropriate in our democracy with its tradition of religious pluralism and its protection of local self-determination.

The evidence is clear, Mr. Speaker: School-based clinics are not the cause of the health-related problems our teenagers face today; instead, they are a proven method of helping to resolve these problems in a way that meets the needs of adolescents and communities alike. Given such strong and compelling evidence, Mr. Speaker, it only makes sense for the Federal Government to make funds avail-

able to those localities that wish to establish comprehensive programs of their own.

I urge my colleagues to support this legislation and look forward to working with them on meeting the health needs of all America's children.

## IMPACT OF TEXTILE TRADE BILL ON AGRICULTURAL EXPORTS

### HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. BEREUTER. Mr. Speaker, I encourage my colleagues to read the following lead editorial of the August 8, 1986, edition of the Omaha World Herald. This leading newspaper from the heartland of the Grain Belt notes the probable negative impact of the "protectionist textile trade bill" on agricultural exports and farmers, as well as its impact upon other industries and consumers.

[From Omaha (NE) World-Herald, Aug. 8, 1986]

U.S. HASN'T ABANDONED FREE TRADE COMMITMENT

By refusing to override President Reagan's veto of a protectionist textile trade bill, 146 members of the House of Representatives made an important statement to America's trading partners. They said, in effect, that the United States retains its willingness to take a stand for free trade.

The override attempt fell eight votes short. The 146 House members who held firm included Nebraska's three representatives. Their votes reflected the concern of Midlands farmers about the possibility that nations targeted in the textile bill would have retaliated by cutting their purchases of U.S. agricultural products.

Hong Kong, Taiwan and South Korea would have been forced to reduce their textile shipments to the United States. The bill also would have restricted U.S. purchases of copper products and shoes from abroad. A dozen exporting nations would have been affected. Nebraska Rep. Hal Daub said those nations accounted for 43 percent of the U.S. farm exports in 1984.

Advocates of protectionism contend that more import restrictions are needed to protect American jobs and prevent the shutdown of American industries that can't compete with lower-priced labor in the Third World.

The solution is not to build a protectionist wall around America but to make American industries more competitive. Labor unions could help by not making unreasonable wage demands. Congress could help by reducing the deficit and pursuing fiscal policies that maintain a realistic balance between the dollar and foreign currencies.

Import restrictions harm a country in more than one way. They can reward inefficiency in domestic industries by reducing competition from more efficient industries in other countries. They can create tensions that undermine political relationships. They can cause consumers to pay more for domestic goods—the White House said the textile bill would have caused Americans to pay $44 billion more in the next five years for clothing and shoes.

In upholding the veto, the House reaffirmed the nation's free trade goals. But the Common Market and Japan should be aware that a continuing lack of cooperation from them could strengthen protectionist pressures in the United States. More help will be needed from them if progress is to be made.

## TRIBUTE TO HON. BERKLEY BEDELL—RETIRES AFTER 12 YEARS OF HOUSE SERVICE

### HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. RODINO. Mr. Speaker, I join my colleagues today to pay tribute to Representative BERKLEY BEDELL, who for the last 12 years has served the people of the Sixth District in Iowa and the Nation with distinction and compassion.

Like so many great leaders of this Nation, BERKLEY hails from the heartland of our country: The Midwest Farm Belt. He was born and raised in Spirit Lake, IA. He graduated from Spirit Lake High School and attended Iowa State University.

As an enterprising 15-year-old, BERKLEY started a fishing tackle and marine supply business with savings he had earned as a paperboy. The business grew into the Berkley & Co. of Spirit Lake, still thriving today under the management of his children.

Representative BEDELL was first elected to Congress in 1974. He serves on the Agriculture Committee and the Small Business Committee, and is chairman of the Subcommittee on Agriculture Department Operations, Research and Foreign Agriculture. Over the years, Congressman BEDELL has used these forums to champion the interests and well-being of America's farmers. He has consistently opposed trade embargos, which would jeopardize markets for American agriculture products, and he has led the fight to protect the family farm from the devastation of the recession and depressed prices.

Mr. Speaker, people who live off the land—farmers and their children—often possess a special respect for life. BERKLEY has this special respect for life and a determination to preserve it from the constant threat of war and nuclear destruction. Perhaps his greatest contribution to his constituents and the Nation was his leadership in the fight for passage of a Nuclear Test Ban Treaty.

Mr. Speaker, I join my colleagues in sending best wishes to BERKLEY and his lovely wife, Elinor, and his children, Ken, Joanne, and Tom.

Although he will be missed, his work here will not be forgotten, and his contributions to his fellow Americans will continue to benefit many for years to come.

## TRIBUTE TO A. GERALD DOYLE—JOURNALIST AND HUMANITARIAN

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. BIAGGI. Mr. Speaker, it is with a heavy heart and deep respect that I pay a very special tribute today to A. Gerald Doyle, who for 41 years was the heart and soul of the Bronx (NY) community. His profession was journalism and for more than four decades he was the editor and publisher of the Bronx Press-Review, which is "the" American weekly newspaper. But, Gerry was so much more. He was a humanitarian. He was a historian. He was a fair and compassionate human being. He was a good friend. On July 15, at the age of 79, Gerry Doyle died.

President John F. Kennedy once said that "when the high court of history sits in judgment on each of us * * * our success or failure, in whatever office we hold, will be measured by the answers to four questions: First, were we truly men of courage? * * * Second, were we truly men of judgment? * * * Third, were we truly men of integrity? * * * Finally, were we truly men of dedication?" Gerry Doyle, then, was a great success.

Gerry was a combination of cheerleader and father-figure to the Bronx. On the one hand he would constantly spotlight the positive of our great borough—all the Federal grant awards, both large and small; the police arrests; the individual heroes of our community; the special accomplishments of our young people; the cultural and economic growth; and the many community service programs available to Bronx residents. But, he was given to honest and unbiased reporting so that meant the community's indiscretions and ills could not be ignored.

He would report the corruption, the disasters, the crime, and the economic woes. The stories, good news and bad news, were always factual, but there was an unavoidable feeling from each edition of the Press-Review that the people behind the newspaper cared about the news they were printing. In fact, there was nobody that cared more about the Bronx community than Gerry Doyle and every issue of the Press-Review reflected that attitude.

Here was a man who was able to treat the news of one of the world's largest urban areas with a small town flavor—a special sort of intimacy that made all of us feel closer to what was happening around us.

Significantly, Gerry was also able to convey this same sense of intimacy with our Bronx past. Every week he would print columns entitled, "The Bronx In History," and "10, 20 and 35 Years Ago in the Bronx." These columns and other similar articles, which appeared periodically, gave us a refreshing glimpse of our history and taught us to appreciate its importance. In fact, as much as anything else, the Bronx Press-Review serves as a week-to-week record of Bronx history, and Gerry Doyle has left an indelible mark on that history.

On July 17, the Bronx Press-Review published an editorial in tribute to Gerry Doyle. In part, it said that "the Bronx has lost more than an editor this week, it has lost a friend. A friend who encouraged us to believe in our borough and its importance to this city and this State. He was fond of saying 'The Bronx is up!' He wanted us to strive for better communities. He wanted us to believe in ourselves."

Gerry Doyle won't be forgotten and neither will his message. He gave the Bronx 41 years of dedicated service. He was a master of his profession and he left all of us who knew him fond memories, as well as America's "greatest" weekly. We can ask no more of any man.

Mr. Speaker, on behalf of this august body I wish to extend condolences to the family of Gerry Doyle, especially to his lovely wife Lenis, his daughter, Elizabeth, and his son, Gerald. May the wonderful memories of a life well-lived comfort them during this difficult time.

## CONGRESSIONAL CALL TO CONSCIENCE—1986

### HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. WOLF. Mr. Speaker, I would like to share with my colleagues the case of Vladimir Khailo, a Soviet Baptist Evangelist from Krasny Luch in the Ukranian Republic. Mr. Khailo was arrested on November 14, 1980. He has been forcibly confined to a psychiatric institution for an indefinite period because of his peaceful attempts to practice his religion and to get permission to leave the Soviet Union.

According to reports, Mr. Khailo has been forcibly confined to a psychiatric hospital in the closed city of Blagoveschensk. He was arrested in Voroshilovgradd on November 14, 1980, but the exact charge against him has not been made public. On December 1, 1980, a court ordered him forcibly confined for an indefinite period to a special psychiatric hospital designated for those "who represent a special danger to society," although there is no evidence that Mr. Khailo posed such a threat.

Mr. Khailo has been harassed for 17 years and repeatedly attacked in the local newspaper. His children were discriminated against in school and the eldest son was sent for psychiatric examinations several times. In 1977, his children stopped attending school for fear of victimization. In response to their situation the Khailos applied for permission to emigrate from the Soviet Union in 1974 and again in 1977 without success.

Because of Mr. Khailo's work with underground Baptist churches in the Soviet Union, he was sentenced by Soviet courts to undergo psychiatric evaluation. The diagnosis was "religious schizophrenia." Mr. Khailo, now serving his fifth year of forced confinement, was recently transferred to the Blagoveschensk Psychiatric Hospital, reportedly the worst such institution in the Soviet Union. It is reported that his treatment at the hospital has included mind-altering drugs. This psychiatric institution, in the closed city of Blagoveschensk, is five time zones away from his family, isolating Mr. Khailo from his family and press attention.

Mr. Khailo, age 54, is a former fire brigade employee who is married with 15 children. He belongs to a Baptist congregation which refuses to accept state restrictions on religious practice. These restrictions include control of the content of sermons, the appointment of clergy, and religious education of children.

The treatment Mr. Khailo has received is designed to discourage his peaceful attempts to practice his religion and to emigrate. These events are of concern to us, since we believe that freedom of religion is the legitimate right of every citizen. In addition, as you are aware, the freedom to emigrate is provided for under the Soviet Constitution, the Helsinki Final Act, the Universal Declaration of Human Rights and other agreements to which the U.S.S.R. is party.

It is our responsibility to continue to speak up against cases of human rights and religious persecution in the Soviet Union. By ending the repression of religious groups, the Soviet Union could take a positive step toward the goal of improved relations with our country.

## GOING NOWHERE IN THE MIDDLE EAST

### HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. BEREUTER. Mr. Speaker, I invite my colleagues to examine the column by Joseph C. Harsch which was printed in the August 5, 1986, edition of the Christian Science Monitor. We in the Congress should consider whether we see any substantial progress toward a real Middle East peace from the various nations of the region that now seem to consider themselves as "entitlement countries" for U.S. foreign assistance. I also encourage the State Department to either counter or respond to the criticism directed toward the Reagan administration in this column.

[From Christian Science Monitor, Aug. 5, 1986]

GOING NOWHERE IN THE MIDDLE EAST

(Joseph C. Harsch)

Vice-President George Bush gets home tomorrow from the Middle East, where he tried to persuade King Hussein of Jordan to open direct talks with Prime Minister Shimon Peres of Israel. King Hussein said no.

Mr. Bush also wanted to meet and talk with King Hassan II of Morocco. But King Hassan, having received Mr. Peres in Morocco the week before, declined even to receive the vice-president of the United States.

King Hassan will be rewarded for having been willing to talk to Mr. Peres. He will visit Washington shortly, where his annual American retainer ($140 million) will be renewed, and perhaps sweetened, even though nothing came of his talk with Mr. Peres. But both the Peres trip to Morocco and the Bush trip to Jordan failed to advance the peace process in the Middle East.

In other words, peace in the Middle East stands now just where it was when Ronald Reagan became President of the US. A beginning was made at Camp David. Camp David remains now like the forgotten foundation of a house. In six years nothing has been built upon that foundation.

There is a reason.

To understand the reason let us go back to the 1967 war, which lasted six days and left the Israelis in possession of large chunks of Arab territory. The Israelis took the Sinai Peninsula and the Gaza Strip from Egypt, the West Bank and east Jerusalem from Jordan, and the Golan Heights from Syria.

After the war, the United Nations drafted a plan for a long-term and comprehensive peace. Its terms were spelled out in UN Resolution 242, which had been drafted by US and British delegations in full consultation with Israel. It was approved and accepted at the time by Israel.

UN 242 called for a peace between Israel and its Arab neighbors to involve recognition of Israel by the Arabs in return for restoration to the Arabs of "occupied territories."

Ever since, this has been the formula under which a settlement has been sought. It has been accepted as a right and proper framework for peace by all except the extremist wings of the Palestinians and the Zionists. The extreme Palestinians still dream of someday expelling all Jews from Palestine. The extreme Zionists want not only to keep all of the occupied territories, but dream of adding all of what is now Jordan, and the lower part of Lebanon as well.

One of Henry Kissinger's great achievements is that he persuaded the Arabs as well as the Israelis to look to Washington to preside over a process of working toward peace under the formula of Resolution 242, Russia was excluded from the process. The central Kissinger argument with the Arabs was that Washington, and only Washington, could persuade the Israelis to surrender the bulk of the occupied territories.

So long as the Arabs believed that eventually Washington would be able to regain those lost lands for them in return for recognition of Israel, they were willing to look to Washington and forget about Moscow. But that formula required, for its success, a belief among the Arabs that Washington believed sincerely in the fairness of 242, and would work toward carrying out 242.

Arab confidence in Washington existed during the Nixon, Ford, and Carter administrations. It has washed away during the Reagan years. Syria has returned to Moscow for support, Jordan now says it will negotiate with Israel only in the framework of a general conference including the Russians.

Officially the Reagan administration still pays lip service to Resolution 242, but in actual operating policy it has been trying to maneuver individual Arab countries into making separate peace deals with Israel without Israel's relinquishing its conquests. The Nixon, Ford, and Carter administrations intended and expected Israel to give up the bulk of its 1967 conquests in return for recognition. The Reagan administration does not push Israel toward 242.

This means that Israel has little incentive to move along the peace road now. So long as Washington will support Israel with its 1967 conquests, Israel might as well rock along with things as they are.

There will again be progress toward peace in the Middle East if and when Washington is willing to use its leverage with Israel toward carrying out 242. But meanwhile the

Peres trip to Morocco achieved a credit for King Hassan in Washington, and the Bush trip made presidential candidate Bush look like a working diplomat.

## THANKS, LEO RAMIREZ

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. LAGOMARSINO. Mr. Speaker, today I wish to thank Mr. Leo Ramirez of Port Hueneme, CA for his decades of community service. Mr. Ramirez has announced that he will step down after serving 28 years as a commissioner on the Oxnard Harbor District Board of Harbor Commissioners. Upon hearing this, his fellow Commissioner Stan Daily remarked, "To me, Leo is the Harbor District."

Aside from his long, distinguished tenure on the Harbor District Board Leo Ramirez has also been the mayor of Port Hueneme, a member of the city council, a member of both the recreation and parks commission and the planning commission, and on the board of the old Port Hueneme Sanitary District. It is little wonder that Leo and his wife Dorothy were named Port Hueneme's Citizens of the Year for 1971. Ventura Star-Free Press columnist Bob Holt said it best, "He wanted to serve his hometown."

Men like Leo Ramirez, men who want to serve their hometown, are the foundation of this Nation's greatness. Without their kind of selfless dedication to improving community life American democracy simply wouldn't work. I wish Leo a happy retirement, he has certainly earned it, and I want to thank him again for his endless efforts on behalf of the Port Hueneme area. Thanks, Leo Ramirez, for all you've done.

[From the Ventura Star-Free Press, July 25, 1986]

LEO THE QUIET

(By Bob Holt)

The old ball player, Leo Durocher, earned the nickname Leo the Lip because of his loquaciousness.

Leo Jeronimo Ramirez has no nickname as far as I know. But if he did, it might be something like Leo the Calm or Leo the Quiet.

I periodically covered public meetings he was involved in for more than 30 years, and can hardly remember when he raised his voice in public.

In private may have been another matter.

Last week, Leo, 75, let it be known that he will not run for another term as commissioner of the Oxnard Harbor District.

He has served on the body, which operates Ventura County's only commercial port, for 28 years, or longer than any other man. The district itself dates from 1937.

Before joining that body, he was a city councilman and mayor of Port Hueneme, his hometown.

He even served on the old Port Hueneme Sanitary District Board, the only local agency of government there before incorporation.

He was on the county's Selective Service Board back in the days when young men actually got drafted for military service.

Some who run for councils and such see it as a step to higher office. But Leo had no such ambitions. He wanted to serve his hometown.

He moved there in 1931. Before that, Leo had lived in Los Angeles from the age of 3. He was born in Mexico.

I can remember only a couple of public meetings I attended which started in the evening and were still in session to greet the dawn.

One such was in 1959, when the city was considering firing the police chief and disbanding the department.

The council met then in a not very large meeting place where the Chamber of Commerce and Historical Society now sit, at 220 Market St.

Ramirez ultimately resigned as mayor over the police issue.

He had been elected to the council in 1954, six years after incorporation.

As an unincorporated place, Hueneme dated from 1872, when the town plat was recorded.

it was a county shipping point before railroads and harbors. There is deep water just offshore, and coastal steamers used to unload their cargo there for transport ashore. That was even before the construction of the Hueneme wharf in 1871.

In World War II, the city was a wide-open Navy town. The original impetus for cityhood, it is said, came from the element that wanted a police department that would leave prostitution undisturbed.

But the better element came to control the city, and ultimately brought in Al Jalaty, a sheriff's sergeant and symbol of incorruptibility, as the chief.

Back in the 1950s, relations were not good between Port Hueneme and its larger neighbor, Oxnard.

Oxnard annexations gradually surrounded the city. Finally, it appeared, there would be no opportunity for Port Hueneme growth, with Oxnard on three sides and the ocean on the fourth.

But the city did make a dramatic increase in its size when it took in the Port Hueneme Seabee base.

Ramirez has had a lot of occupations over the years. He has been a nurseryman, diesel mechanic, grocer, rancher and real estate broker, among others.

And always a very nice guy.

[From the Oxnard Press-Courier, July 15, 1986]

LEO RAMIREZ TO LEAVE PORT COMMISSION

Leo Ramirez, the senior member of the Oxnard Harbor District Board of Harbor Commissioners, announced Monday that he will not seek re-election in November.

Ramirez, 75, took fellow commissioners by surprise when he declard that he intends to step down after 28 years on the board that overseas the operation of the commercial Port of Hueneme. He has served on the board longer than anyone else.

"To me, Leo is the harbor district," Commissioner Stan Daily said, beginning an outpouring of praise from the rest of the board for the feisty, white-haired Ramirez.

Commissioner Bob Jennings characterized Ramirez as "an independent thinker who speaks from the heart." He and Board President Ray Fletcher said they would even miss their arguments with Ramirez.

Ramirez said he promised himself four years ago that this term would be his last. He wanted to serve at least 25 years on the board so he could match the record of the late Fred Aggen. He added, "A quarter of a century is long enough in public service."

"I have no regrets, but I'll miss it," he said.

His career in public service goes back farther than 25 years. A former mayor of Port Hueneme, he served on the City Council from 1954 to 1960. He also has been a member of the city Recreation and Parks and Planning commissions, and of the old Port Hueneme Sanitary District board.

He also has been active in the Navy League, the Selective Service Board and the Salvation Army board, in addition to his membership in Mary Star of the Sea parish.

He and his wife, Dorothy, were named Port Hueneme's Citizens of the Year for 1981. The Ramirezes have had a nursery business, a grocery store and a hardware store over the years, and are known to nearly everyone in the small, tightly-knit community of Port Hueneme.

The terms of Stan Daily and Cecil Schnelle also will expire in November, but both have announced their intentions to run again. Schnelle, who also is in his 70s, told Ramirez, "I'm foolish enough to stick my neck out and run for another term."

## A RESPONSE TO CONCERNS ABOUT H.R. 4567

### HON. SHERWOOD L. BOEHLERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. BOEHLERT. Mr. Speaker, in the CONGRESSIONAL RECORD of May 21, the distinguished chairman of the House Energy and Commerce Committee, Mr. DINGELL, explained what he views as defects in the proposed H.R. 4567. The chairman also expressed his desire to work within the Energy Committee to achieve a more acceptable compromise. That is a welcome, constructive offer, and I am pleased to see that the chairman has scheduled a markup for H.R. 4567.

Since the markup will most likely address complex issues, I would like to submit, for the record, a response to Mr. DINGELL's concerns written by Mr. Richard Ayres, chairman of the National Clean Air Coalition. As you will see, Mr. Ayers' response helps to allay some of Mr. DINGELL's concerns.

Supporters of H.R. 4567 look forward to full, fair, and prompt committee consideration of the bill.

The text of Mr. Ayres' letter follows:

NATIONAL CLEAN AIR COALITION,
*Washington, DC, July 18, 1986.*

Hon. JOHN D. DINGELL,
*Chairman, Committee on Energy and Commerce, House of Representatives, Washington, DC.*

DEAR MR. DINGELL: I am writing on behalf of the National Clean Air Coalition in response to concerns about the motor vehicle provisions of H.R. 4567 raised in your statement of May 21, 1986. The statement did not contest the feasibility of any of the standards in the proposed legislation. Nevertheless, the statement characterized the standards as "new and more stringent" and questioned their justification on public health or acid rain control grounds. But major reductions in motor vehicle emissions are badly needed to meet complex of public health and environmental problems ranging from persistent ozone nonattainment to acid rain. In response to your concerns, I

would like to make the following observations.

1. STANDARDS FOR HEAVY TRUCKS AND BUSES ARE NOT MORE STRINGENT

First, the majority of the proposed standards—the $NO_x$ standards for heavy-duty engines and vehicles—are not new or more stringent. They are identical to the $NO_x$ standards promulgated more than a year ago by the EPA. The EPA $NO_x$ standards, in fact, are extraordinarily related. Most of the manufacturers, including General Motors, Ford, Chrysler, and Cummins, declined to join a lawsuit filed to challenge them. Indeed, health and environmental considerations enumerated below dictate heavy-duty $NO_x$ standards substantially stronger than these.

2. STANDARDS FOR AUTOMOBILES ARE ACHIEVABLE AND COST-EFFECTIVE

Second, the statement also expressed concern about the bill's proposed $NO_x$ standard of 0.7 grams per mile (gpm) for automobiles. Specifically, you suggested there may be difficulty in meeting that standard, which is now in effect in California, in conjunction with the federal carbon monoxide (CO) standard of 3.4 gpm. You noted that California's CO standard is weaker than the federal one, a fact which is asserted to make compliance with the 0.7 gpm $NO_x$ standard "easier" for manufacturers.

EPA's preliminary 1986 certification data, however, shows that, nationwide, 87% of the engine families currently manufactured (506 out of 576) are already simultaneously meeting levels at or below 0.7 gpm $NO_x$ and 3.4 gpm CO. Looking at California models only, 93% of the engine families (217 out of 233) simultaneously meet the 0.7 gpm $NO_x$ and 3.4 gpm CO standards. These certifications take into account all necessary allowances for in-use deterioration over the cars' useful lives. The cars which meet these levels include large, heavy models as well as small, light ones. There is, therefore, no technical obstacle to all cars' meeting these standards, and no supportable basis for the weaker California CO standard.

Consequently, there would be no increase in costs for the 87% of the engine families manufactured nationwide (93% for California) which already meet these levels. Thus, even accepting the modest $18–$43 range of per vehicle costs estimated by the EPA, the cumulative cost for the 13% of the engine families which need modification will be only a small fraction of the figure you cited.

For these reasons, the NCAC would support eliminating the California option of a CO standard weaker than 3.4 gpm in conjunction with nationwide adoption of a $NO_x$ standard of 0.7 gpm. Indeed, substantially tighter CO and $NO_x$ standards are in our view feasible and justified on health and environmental grounds.

3. ON-BOARD/STAGE II REFUELING CONTROLS PROVIDE BIG REDUCTIONS AT LOW COST

It is also essential that EPA control gasoline refueling vapors by means of carbon canisters and associated equipment on vehicles ("on-board controls"), vapor recovery equipment on gasoline pumps ("stage II controls"), or both. Hydrocarbon vapors are released during vehicle refueling are one of the most important contributors to the dangerous ozone smog that afflicts areas with more than one-third of the nation's population. The vapors also present a serious cancer hazard. The soundest strategy for public health protection is to institute both onboard and stage II programs, in order to make the maximum ozone reductions in the nonattainment areas and the maximum carcinogen reductions nationwide.

According to the EPA, the cost-effectiveness (cost per ton of pollutant controlled) of these programs is so favorable that the cumulative cost of both taken together is less than the cost of other ozone control measures routinely imposed on industrial pollution sources.

4. THE REDUCTIONS ARE NEEDED TO PROTECT HEALTH AND THE ENVIRONMENT

The scientific evidence demonstrates that further control of mobile source $NO_x$ and hydrocarbon emissions are critically important to protect public health and to control acid rain.

Recent scientific research has shown that short-term exposures to very low concentrations of nitrogen dioxide gas impairs lung function in asthmatics. Chronic low-level or repeated peak exposure to $NO_2$ are believed to increase susceptibility to colds and other respiratory infections, especially in children.

According to the National Academy of Sciences, man-made emissions of nitrogen oxides are, along with sulfur oxides, the chief precursors of acid rain. $NO_x$ emissions which are converted to nitrates in the atmosphere contribute about one-third of the acidity in precipitation in the eastern United States, and over half the acidity in the West. These nitrates play a particularly important role in causing aquatic damage during the spring, when they dominate the acidity released during the snowmelt. In 1982, the International Conference on Acidification of the Environment in Stockholm recommended, in addition to controls on sulfur emissions, that "best available technology which is economically feasible should also be applied to reduce $NO_x$ emissions from both stationary and mobile sources."

$NO_x$ emissions also seriously degrade visibility. They impart a yellowish-brownish color to the sky, and they contribute to regional haze that obscures visiblity over broad areas.

Furthermore, $NO_x$ and hydrocarbon emissions combine to form ozone. More than 75 million people still live in areas that violate the minimum health standard for ozone. In his speech to the Air Pollution Control Association on June 23, EPA Administrator Lee Thomas stated that recent research on the health effects of ozone "indicate that ozone concentrations typical during the hot summers in many of our urban areas are unhealthy not only for people with pre-existing lung disease, but even for people in good health." He took note of the recent conclusion of EPA's independent Clean Air Scientific Advisory Committee, "that the current short-term health standard had little or no margin of safety, and that more lasting health effects might result from long-term exposure." In addition to these health damages, ozone contributes to billions of dollars worth of damage to crops and forests each year.

In addition to their important role in forming dangerous levels of ozone, hydrocarbon emissions from tailpipe emissions and gasoline refueling contain carcinogenic components including, but not limited to, benzene.

In sum, the provisions of H.R. 4567 are feasible, economical, and are the minimum required by public health and environmental concerns. We urge you to add your support for them to that of the cosponsors of H.R. 4567.

Sincerely,

RICHARD E. AYRES,
*Senior Attorney,*
*Natural Resources Defense Council.*

## NEW PMG NAMED

## HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. GARCIA. Mr. Speaker, on Thursday, the Postal Service Board of Governors named a new Postmaster General. He is Preston Robert Tisch, president of Loew's Corp.

As my colleagues know, the Postal Service has had its share of problems lately. Many of them emanating from the Board of Governors. As a member of the Post Office and Civil Service Committee, I have had a particular interest in seeing that things are put in order with regard to the relationship between the USPS and the Board of Governors. I hope and believe that appointing Bob Tisch as the new PMG is a positive step in that direction.

Bob is a friend and fellow New Yorker. I have the greatest respect for him, and I am hopeful that his appointment will usher in a new era of prosperity and harmony between the USPS and the Governors. I am, of course, proud that a fellow New Yorker has been named PMG.

I wish Bob a lot of luck and offer him my support. I am inserting in the RECORD a copy of an article on the appointment of Bob Tisch as PMG from yesterday's Washington Post for my colleague's perusal.

[From the Washington Post, Aug. 7, 1986]

LOEWS HEAD TISCH NAMED POSTAL CHIEF—BOARD OF GOVERNORS' LONG SEARCH ENDS

(By Jonathan Karp)

Loews Corp. President Preston Robert Tisch was named postmaster general yesterday, ending a seven-month search and a prolonged internal debate by the Postal Service Board of Governors over who should lead the $30 billion-a-year corporation.

"Bob Tisch is a careful, highly skilled manager and corporate leader who can strengthen the Postal Service," board Chairman John R. McKean said in announcing the appointment.

The board settled on Tisch, a Democrat from New York, Tuesday morning, Tisch 60, and his brother Laurence began building what would become a $6.7 billion-a-year conglomerate by buying a New Jersey hotel in 1946.

Since then, the brothers have amassed assets of more than $16 billion, including resort hotels and motor lodges in the United States and abroad; Loews Theaters; Lorillard Corp., a major tobacco manufacturer; CNA Financial Corp., a property, casualty and life insurer, the Bulova watch company, and BSIC, a defense contractor. Loews is also the largest single shareholder of CBS Inc., with 22 percent of CBS stock, and Laureance Tisch sits on the company's board.

Bob Tisch said in response to a reporter's question that he heard about the postmaster job through New York University president and former U.S. representative John

Brademas (D-Ind.), who was approached for the post by the board's recruiter, Brademas didn't want the job, said Tisch, who contacted retiring Postmaster General Albert V. Casey to apply.

McKean said there was "no question" Tisch was the "outstanding" outside candidate.

"He really impressed me," board member George W. Camp said in an interview. In the end, Camp said, the board struggled over whether to choose an insider or Tisch. "It was a real long, drawn-out discussion," he said.

"It was no easy choice," board member Ruth O. Peters said in an interview about the protracted selection process. "It was a knock-down, drag-out. And that's the way you come up with a postmaster general."

Tisch will assume command of the Postal Service during one of the rockiest periods in its history. Following the guilty plea in May of board Vice Chairman Peter E. Voss to charges of embezzlement and receiving kickbacks, the service is under investigation by the Postal Inspection Service in conjunction with the Justice Department and the General Accounting Office.

At yesterday's news conference, Tisch showed little knowledge of postal issues. "I haven't had a chance to study," he said, and later joked that "I'm relatively new in the job."

When asked about delivery problems in New York City, Tisch said he didn't realize the area was a problem. "I know my mail is delivered on time," he said, "and I assume everybody else's is also."

Tisch, whose family's fortune was estimated by Forbes to be worth $1.6 billion, is widely credited with having coined the term "power breakfast." He will earn $86,200 a year as postmaster general. Tisch said he will resign from Loews Corp. by Aug. 15—the day he begins serving as postmaster general.

## INTRODUCTION OF LEGISLATION TO END U.S. TRADE SUBSIDIES FOR HUMAN RIGHTS VIOLATORS: THE CASE AGAINST CHILE

### HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. STARK. Mr. Speaker, I am introducing two pieces of legislation today that would prevent the United States from giving preferential tariff treatment to human rights-violating countries. Under the Generalized System of Preferences [GSP], the United States allows eligible products from certain developing countries to be imported duty-free into the United States. Under the present law, nations that aid or abet international terrorism are excluded from receiving this benefit. But at the same time there is no such exisiting exclusion for countries that implement terrorism within their own boundaries. One of my bills will make any country ineligible for GSP benefits which violates internationally recognized human rights or that is governed by a totalitarian regime that is not implementing measures for a transition to a democratic form of government.

My second bill, introduced with Representative BEREUTER, calls for the United States to directly support the people of Chile in their struggle against the tyranny of the Pinochet regime. As we speak, close to a thousand political prisoners are in Chilean jails being tortured or awaiting torture. In Representative MORRISON's recent report on the human rights situation in Chile, he describes how prisoners are stripped naked, watered down, and then electrically shocked. But such actions are nothing new. Since 1973, the Chilean people have continuously suffered from government sponsored torture, arbitrary arrests, and political killings. The citizens of that country as well as the American conscious have had enough. The only way to ensure the halting of these internationally recognized human rights violations is for Chile to return to its democratic tradition.

Despite widespread support within Chile for this transition to democracy, the Pinochet government has made it clear that it has no intention of abandoning its authoritarian practices. On July 11, 1986, General Pinochet declared that he intended for his regime to continue until 1997. The Chilean Government also has not implemented any significant reforms that are necessary for the development of democracy. Political parties are still outlawed, election laws have not been implemented and there is no freedom of speech or press. Furthermore, General Pinochet has refused to open into any dialogue with the democratic opposition.

Our bill attempts to support an end to human rights violations and a transition to democracy in Chile by denying duty-free treatment to any product exported from Chile into the United States as granted by the U.S. Generalized System of Preferences [GSP]. This action will continue to be in effect until Chile has improved its human rights situation to a level as to be considered acceptable by international standards and has taken significant steps to restore democracy.

I urge my colleagues to suport these bills and make it the U.S. policy to no longer reward oppressive nations with tariff breaks.

## NEW INITIATIVES IN EDUCATION

### HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. SOLARZ. Mr. Speaker, It is my honor to speak today in praise of both the Dropout Prevention and Reentry Act and the Gifted and Talented Children and Youth Education Act.

These bills together represent a comprehensive approach toward the overall upgrading of this country's educational system. As the Dropout Prevention Act works to insure that everyone achieves a minimum satisfactory level of education, the Gifted and Talented Children Act extends the resources available to those enrolled in conventional programs, and enables them to realize their potential.

The combined effect of halting decline and increasing growth will very likely lead to an overall improvement in national academic performance as well as greater national productivity due to higher education levels.

Two million young people in this country have uncommon gifts, yet their talents go unrecognized. It is a crime to let such a valuable and limitless resource go to waste. The Gifted and Talented Children and Youth Act is a vital first step to preserving and developing the gifts these young people have to offer. We have the opportunity to nurture a chance which can only repay us a thousandfold when the benefits are reaped.

With the impetus this legislation will provide, we bring to fruition the maximum potential of exceptional young people. I can think of no nobler goal.

The Dropout Prevention and Reentry Act strikes at the heart of one of the major problems assailing our educational system: How can we hope to educate our children if students abandon the classroom?

Lack of education is a problem that extends beyond its impact on the individual. The effect generated by the student who has dropped out goes much further. His unrealized abilities are an immeasurable and unrecoverable loss to society.

The Dropout and Prevention Act not only recognizes the dropout problem, but it initiates a program that is designed to pool successful methods of keeping young people in the classroom and extend exemplary projects.

As a member of the Education and Labor Committee, I am pleased to have been a cosponsor of both these measures and I applaud my colleagues in Congress for unanimously approving them and taking initial strides in this important area of national concern. I am sure it will not be long before we see tangible evidence of the value of these two pieces of legislation.

## SOVIET JEWRY

### HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. KEMP. Mr. Speaker, I thank my friend from Texas [Mr. FIELDS] for his leadership in the issue of human rights in the Soviet Union, and for providing the Members of Congress with the opportunity to talk about the Fainbergs, a refusenik family facing great hardship and tragedy. I know that Mr. FIELDS feels very strongly about the issue, and he has expressed to me his deep personal concern for the Fainberg family.

The Fainbergs, Michael and Faena and their sons, Andrew and Michael, applied to emigrate in 1979, when emigration and hopes were high. These hopes were dashed long before they were officially turned down 2 years later. Both Faena and Michael, Sr., were dismissed from the important jobs they had earned as outstanding graduates of the top Soviet institutions. Andrew and Michael Jr. are following in their footsteps with brilliant academic careers, in spite of the obstacles faced by all Jews, and particularly refuseniks. They are harassed, beaten and constantly assaulted.

It is crucial that the Fainbergs be permitted to emigrate this year. Next year Michael will be eligible for induction into the Army. Once

he is part of the military system, he is considered to have access to state secrets, and that means an end to his hopes for emigration and probably the hopes of his entire family.

Their tragedy is part of the litany of tragic tales which result from Soviet oppression of its Jews, Christians, Germans, and other ethnic minorities.

I'd like to point out that this month marks the 25th anniversary of the construction of the Berlin Wall. I joined my good friend, Tom Lantos, in sponsoring the bill condemning its existence and calling for its builders to dismantle it.

That's not the only wall which needs to be dismantled. There is another wall—a wall of shame—and this one surrounds the Soviet Union. It is this wall of shame which locks in Ida Nudel, Mark Terlitsky, and the hundreds of thousands of other victims of Soviet terrorism.

We must continue our efforts on behalf of Soviet Jewry, on behalf of the Fainbergs, of the Feltsmans, the Slepaks, Ida Nudel. Because of our continuing efforts, Natan and Avital Shcharansky are living as a family in Israel. They will soon be joined by Natan's brother, Leonid, and their mother, Ida Milgrom.

The Helsinki Review Conference begins in November in Vienna. We must use this forum to press for increased activity by the Soviets in favor of Soviet Jewry, to push for increased emigration, to visibly affirm our commitment to human rights.

It is thanks to the continuing activities of groups such as the Union of Councils for Soviet Jewry, the National Conference on Soviet Jewry, and the Interparliamentary Group for Human Rights to the Soviet Union and all my colleagues who join the gentleman from Texas, that we can hope that the Fainbergs and other refuseniks will soon follow their path to freedom.

We are the hope of the Fainbergs, and of all the refusenik families. We must remember that human life does not come from the state, but from God himself. As Jews and Christians we are taught to love our neighbor. We can fulfill this obligation by standing up for those who are held prisoner behind that wall of shame surrounding the Soviet Union.

## EXPLANATORY REMARKS TO H.R. 5365

### HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. BONKER. Mr. Speaker, today I am introducing a bill to amend the International Claims Settlement Act of 1949. This bill provides that the value of claims determined by the Foreign Claims Settlement Commission be based on the fair market value of the property taken.

In the past, legislation concerning the Foreign Claims Settlement Commission has not contained an explicit reference to the compensation standard required by international law, with the exception of the Cuban Claims Act of 1964. Without the definition of a compensation standard, the potential for claims decisions inconsistent with international law exists, which could harm current and future U.S. investment abroad. This bill remedies that situation.

The purpose of this legislation, which is entirely prospective, is to specify that fair market value may include, but not be limited to, the market value of outstanding securities, replacement value, and going-concern value. It establishes a presumption that in the case of service industries, the appropriate basis for determining fair market value is going-concern value. This presumption is not mandatory, nor does it limit the discretion of the Foreign Claims Settlement Commission in any way.

Growth in the service industries is vital to the economy of the United States, and this includes the ability of those industries to expand overseas. It is important to not only protect business interests abroad which are owned by U.S. nationals, but also to ensure that if their property is nationalized or otherwise taken by a foreign government, the value of their claims for such losses will be determined fairly.

## SOVIET JEWRY

### HON. MICHAEL A. ANDREWS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. ANDREWS. Mr. Speaker, I rise today to protest the treatment of Jews in the Soviet Union, and to condemn the human rights violations they are forced to endure. I recall the day earlier this year when I shook the hand of Anatoly Shcharansky, hoping that his release would be an omen of better treatment of Soviet Jews. But the Soviet Government persists in violating the freedom of its own people.

This is not the first time I have spoken out against the treatment of Soviet Jews. As a member of the Congressional Caucus on Soviet Jewry, I have committed myself to the fight against religious persecution within the Soviet Union. I have spoken before on this issue, and will continue to do so until freedom of religion and the right to emigrate is granted to Jews of the Soviet Union.

Today I wish to address the case of the Fainberg family of Moscow. Michael and Faena Fainberg have been attempting to leave the Soviet Union with their children, Michael, Jr., and Andrew, since 1979. Since they applied to emigrate, Michael and Faena have been fired from their jobs. Because their children refuse to join Communist youth groups, they have been harassed and assaulted by other Soviet youths. And soon, Michael, Jr., and Andrew will be drafted by the Soviet Army which will make them ineligible for emigration.

This case is not unlike the situation of Vladimir and Karmella Raiz, a Soviet refusenik family I personally have adopted. Like Michael and Faena Fainberg, Vladimir and Karmella are graduates of highly rated Soviet universities, and major contributors to intellectual and academic fields in their country. They also suffer from blatant religious discrimination in the Soviet Union. Yet, like the Fainbergs and thousands of other Soviet Jews, they are not granted the freedom to live in Israel of the United States.

Mr. Speaker, as I have said, I have presented this issuel on the House floor in the past. I have also presented this issue to members of the Soviet Government—in person and in writing. Yet, I have received no response from these officials. How frustrating and sad it is when a government shows so little regard for its own people.

This issue will not be resolved until families such as the Fainbergs and the Raizes are granted their fundamental rights as human beings. And we as Americans will not stop our protest and efforts until they are granted those rights.

## PENOBSCOT MARINE MUSEUM 50TH ANNIVERSARY

### HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Ms. SNOWE. Mr. Speaker, today I would like to offer my congratulations to the Penobscot Marine Museum in Searsport, ME, on their 50th anniversary.

The museum was founded in 1936 by 11 members of the community, including Lincoln Colcord, poet, novelist, and newspaper correspondent, and Clifford Nickels Carver, former secretary to the American Ambassador in London and assistant to Bernard Baruch of the National Council of Defense. The museum was established in the Old Town Hall and run by volunteers until 1958 when the board of trustees hired a curator. Today the museum boasts eight buildings and a full-time professional staff.

During the height of the sea trade, when the trim Clipper ships and the sturdy Down-Easters graced the high seas, 1 out of every 10 American deepwater skippers called Searsport home. These men and their families were as at home on the streets of Shanghai as they were on Steamboat Avenue in Searsport.

The Penobscot Marine Museum celebrates the work and lives of these men and their families. The telescopes, sextants, and scale models of the square-rigged Down-Easters on display tell only half of the story. The log books, paintings and personal effects of the captains and their families tell the other half, the human story. What was it like to sail a Clipper ship around the Cape of Good Hope? The logbooks and letters tell touching stories of captains burying their wives at sea, raising their children alone and the fears that overtake a man becalmed in the middle of the Atlantic Ocean.

The museum has a library that has been used as a reference source by people from all over the world. Researchers and descendants alike have called on the library for genealogic data about ship captains, the vessels sailed by them, the shipyards where these vessels were built, and how they came to their end. Many of those descendants who have been helped in tracing their ancestry have in turn helped the museum by donating family heirlooms brought back from exotic ports of call by the same ancestors they have traced.

Last year 2,025 children visited the museum. Teaching the history of Searsport

and the 23 other communities of Penobscot Bay which thrived under the sea trades, has become an important part of the museum's work. Special programs for children are available year round and range from a Victorian Christmas to what life aboard a Clipper bound for China was like.

The Penobscot Marine Museum has sought to preserve a special part of the history of Searsport and our Nation as well. The 50th anniversary of the museum is an occasion well worth celebrating, and I extend my congratulations to the museum and its board of trustees and wish them the best of luck as they embark on their next 50 years of history.

## TRIBUTE TO BERKLEY BEDELL

### HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. IRELAND. Mr. Speaker, It is not only a pleasure but an honor to stand here today and bid farewell and thank you to a great American and a true hero of the small business movement, BERKLEY BEDELL. BERK will not only be missed; in all honesty, I must tell my colleagues that such a man cannot be replaced. First, let me tell you about his small business exploits.

No one understands the problems of small business better than an actual entrepreneur and their is no one who fits that bill better than the kind gracious patriot from Spirit Lake, IA. At age 15 he decided that the existing fishing tackle was insufficient and inefficient. He created his own and wound up head of the multi-million-dollar Berkley and Co. In 1964, he was the Nation's Small Businessman of the Year. He has since sold the business to his children.

During his time in the Congress, he has devoted perhaps more time and energy than any other Member of the House to small business. In every major issue that has affected small business over the years, he has veen deeply involved. Most notable have been his efforts to include small business in the Federal procurement process, especially in the defense area. And of course he will always be known as the father of the Small Business Research and Development Act. Small business is suffering a great loss with BERK's departure.

There are some in Government who will be pretty happy when they hear that this fine man has left—Mainly the nonperforming insensitive bureaucrats. Granted that there are only a few but BERKLEY was always on their trail. There are many stories around right now about his exploits over the years, but believe me when I tell you that these stories will become legends as the years go by. Let's see: There was the time he drove by a Federal agency in the dead of night during the energy crisis and found every light in the building on. The next day, the head of that agency found a visitor from Capital Hill in his office and it was "lights out"! Then there was the time that a constituent had a problem with a Federal agency, yet could never get anyone to answer the phone when he called the agency. You guessed it—the next day Mr. BEDELL showed up at the agency and found about 20 empty desks at the office in question. When he finally found someone, they told BERK that everyone "was on flextime; they come and go as they please." Mr. BEDELL said, "thank you" and took the elevator right to the top floor and walked into the head of the agency's office and said he was there with a constituent problem. The problem was taken care of and "flextime" was ended for certain agency employees.

I could go on and on about my dear friend BERKLEY. They ought to put his picture in Webster's so everybody knows without question what the definition of public servant means. Now I know people will ask themselves, "Indeed, doesn't the man have any faults?" The answer is that I have found two—he is leaving the Congress and he has never taken me fishing with him. BERKLEY, I am ready! God bless you and the best of everything for you and Elinor in the years ahead.

## FAREWELL TO A FRIEND AND COLLEAGUE

### HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. VENTO. Mr. Speaker, Let me commend my colleague, NEAL SMITH of Iowa, for providing this opportunity to recognize our colleague, BERKLEY BEDELL, who has done a most laudable job representing the great State of Iowa.

I have been privileged to work with and have a friend in BERKLEY BEDELL. He has worked effectively, especially to represent the family farmer and the agriculture economy so fundamental to the people of our Nation.

BERKLEY BEDELL's remarkable vision has been significant in encompassing a global view placing an international perspective on our Nation's role and responsibilities. As a member of the Agriculture Committee and a subcommittee chairman, he has been in the lead of creative policy formation to address the family farmer's needs and the food shortages on an international basis.

BERKLEY BEDELL has been a strong voice for a myriad of programs that represent the best values of the America people in helping less developed nations and using the strength of agricultural productivity in an effective manner.

His concern, caring and sincere response to issues, especially humanitarianism and nuclear arms controls, have made a positive impact on U.S. policies.

The lapel pin BERKLEY BEDELL wears speaks for his work—his dedication to reordering our national priorities and turning swords into plowshares.

BERKLEY represents the best of Iowa and has set a very high mark of service in Congress. Our best wishes go with BERKLEY and Eleanor and all the Bedell family with whom we have shared the joys, life, and challenge of service in Congress.

## IT'S TIME TO SEND A MESSAGE ON TRADE

### HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. DENNY SMITH. Mr. Speaker, a vote to override the President is never an easy thing for this body to do, especially on an issue as contentious as this. The headlines have told of $170 billion trade deficits and lost jobs in the textile industry. We have seen an administration that is strong in rhetoric but short in results. We have seen our trading partners sign new agreements and promise to do what they could to open their markets to U.S. products. But we've heard all of this before, and the deficit continues to rise. This country could not, and should not, wait for more rhetoric, broken promises and noncooperation. For this reason I voted to override the President's veto and pass H.R. 1562, the "Textile and Apparel Trade Enforcement Act."

I know that my actions will not be politically popular back in my district. I have always supported the concept of free trade. But, above all, I have supported fair trade. Right now we have neither. H.R. 1562 was protectionist and it was discriminatory. It was difficult for me to vote for it, especially since I opposed passage last year. But the alternative was to sustain the veto and allow the status quo to continue. That would be devastating to the country.

The results of this vote should not be misinterpreted by either the administration or our trading partners. This veto was upheld by only eight votes. As I explained to the President in the following letter, the message has been sent. It is my hope that it is received and acted upon.

[Letter to President Reagan follows:]

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, DC, August 7, 1986.*

Hon. RONALD W. REAGAN,
*President of the United States, The White House, Washington, DC.*

DEAR MR. PRESIDENT: I wanted to take this opportunity to explain to you my reasons for voting to override your veto of H.R. 1562, the "Textile and Apparel Trade Enforcement Act of 1985." It was a very difficult decision, but I felt that it was necessary if we were to make any progress on the large trade deficits that we are facing.

My main reason for voting to override is what I perceive as inaction on the part of your administration in taking positive, forceful steps in dealing with our trading partners. As I explained to you in our conversation, my feeling is that if you had taken immediate action to help the machine tool industry of this country back in 1981, we would not only have a machine tool industry today, but yesterday's vote probably would not have been necessary.

Our trading partners have given us a lot of rhetoric lately expressing concern and understanding for our position on this issue. Yet they do nothing to assist us. Now that H.R. 1562 has been defeated, I have no doubt that the signators to the MFA and the other recently signed trade agreements will be evaluating ways to circumvent the provisions of those treaties. Having travelled extensively in the Far East, I have

come to learn one thing . . . the leaders of that region understand nothing other than power. The signing of treaties does not make as much an impression on them as the subsequent enforcement on our part.

The failure of this override attempt should not be viewed by our trade officials as a victory for you or an endorsement of the status quo. It was neither. A bipartisan group of 276 members of the House felt that the enactment of this bill, bad as it was, was preferable to the way things have been going. The message is clear . . . the time has come for serious leadership to be demonstrated with our trading partners, and that time is now.

Mr. President, as I stated earlier, it was very difficult for me to vote against you on this measure. Even though it was politically harmful for me to do it, I still felt that it was in the best interest of this country, and your administration, to voice my displeasure with the current trend that has become evident in dealing with trade issues.

Respectfully yours,

DENNY SMITH,
*Member of Congress.*

## A TRIBUTE TO BERKLEY BEDELL

### HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. MITCHELL. Mr. Speaker, I have mixed feelings about the tribute I am about to pay to one of our fellow colleagues in the House. First, I am happy that I have this opportunity to offer an outstanding Member of this body and my friend, BERKLEY BEDELL, my best wishes for a happy life after serving the Sixth District of Iowa and the Nation with pride and dignity for 14 years. On the other hand, I am saddened to know that one of our strongest allies on the Small Business Committee will no longer enthusiastically confront and often lead the fight to eradicate the many obstacles which beset small businesses across this country.

During his service in the Congress, BERKLEY BEDELL has been a crusader for small business and agriculture, both of which make up the economic base of his district. As chairman of the Small Business General Oversight Subcommittee during the 98th Congress, he led the campaign to open the Pentagon's spare parts procurement system to small businesses by ostentatiously dramatizing procurement problems in a way that only he can. Despite strong opposition from the administration, the Defense Department, and two House committees, he toted his now famous tool kit and directly challenged the procurement wisdom of the Pentagon, and ultimately prevailed in forcing the military to discontinue using a qualified bidders list to restrict competition.

BERKLEY BEDELL has long been a friend of the many farmers and small business constituents he represents, but he has also been a sincere and dedicated Member of this Chamber, using his quiet political style to fashion powerful coalitions among his peers to get the job done.

The people of his district in Iowa, and all of us in the Nation will suffer from his absence in the Congress. I hope that he overcomes his health problems very soon and that he continues in some special way to make this world a better place.

## RULE ON THE INTERNATIONAL DRUG TRAFFIC ENFORCEMENT ACT OF 1986

### HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. ROSTENKOWSKI. Mr. Speaker, I take this opportunity to inform my colleagues that the Committee on Ways and Means will be transmitting legislative language to the majority leader of the House to be considered for inclusion in the leadership's omnibus drug package. It is the intention of the committee to introduce a bill, the International Drug Traffic Enforcement Act of 1986, and file its report to the House no later than Wednesday, August 13, 1986.

I wish to serve notice, pursuant to the rules of the Democratic caucus, that I have been instructed by the Committee on Ways and Means to seek less than an open rule for the consideration of this proposed legislation by the House of Representatives.

## BERKLEY BEDELL AND COOPER EVANS: OUTSTANDING PUBLIC SERVANTS

### HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. SKELTON. Mr. Speaker, I rise today to join my colleagues in recognizing two outstanding Members of Congress from the State of Iowa who are retiring at the end of this session. BERKLEY BEDELL and COOPER EVANS have served this body with distinction for many years. These two Iowans are respected in the House for their nonpartisan advocacy in support of the American family farmer and small businessman.

I have served and worked with BERKLEY BEDELL on the Agriculture and the Small Business Committees, along with the Congressional Rural Caucus, where his integrity and commitment to Iowa, as well as the entire Nation, is well-known.

COOPER EVANS came to the House 6 years ago and his work for rural America and American farms on the Agriculture Committee is thought highly of by his colleagues in the House.

Mr. Speaker, the House is losing two fine Members in 1986, Members who will be hard to replace. While we will miss their expertise and counsel on legislation, more importantly, the House will be losing two patriotic and outstanding Americans.

## INTRODUCTION OF THE ASBESTOS INFORMATION ACT OF 1986

### HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. LENT. Mr. Speaker, on June 24, 1986, I introduced along with my colleague from Mississippi, Congressman DOWDY, H.R. 5078—the Asbestos Information Clearinghouse Act of 1986. The objective of this legislation was to counter what many consider to be a history of wasteful litigation proceedings in asbestos property damage cases. Too often plaintiffs in these cases will sue up to 50 asbestos manufacturers even though many of the manufacturers did not even produce an asbestos product similar to the one in question. The result is an unnecessary waste of court time and legal fees. Plaintiffs and defendants lose as court cases drag on indefinitely.

On July 17, 1986, the Subcommittee on Commerce, Transportation, and Tourism held a hearing on this legislation. At that hearing, we received many helpful recommendations on how to improve H.R. 5078. The bill I am introducing today reflects those suggestions. It would achieve the same result as the original legislation without the need to establish a clearinghouse to store and analyze asbestos samples. The new legislation would simply require building owners before filing suit to preserve a sample and to provide some preliminary information on the kind of asbestos product in the building, such as whether it is ceiling tile or pipe insulation. This kind of information should significantly reduce the number of defendants and help ensure a more timely resolution of asbestos property damage cases for the benefit of all involved.

On July 30, 1986, the Subcommittee on Commerce, Transportation, and Tourism approved the text of the bill I am introducing today, by voice vote and without amendment, for consideration by the full Energy and Commerce Committee. I am pleased to report that at least nine of my colleagues from both sides of the aisle are cosponsoring this legislation with me. I believe this legislation deserves the support of all the Members of the House, and I urge my colleagues to join us in working toward its swift passage.

## SCLC NATIONAL ASSAULT ON POVERTY

### HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Friday, August 8, 1986*

Mr. LELAND. Mr. Speaker, I rise to bring to the attention of the American people an event of extraordinary merit and import to the future of our Nation. The Reverend Joseph E. Lowery, president of the Southern Christian Leadership Conference will on August 13 bring to the public conscience a challenge to again place poverty on the national agenda. This champion of justice who walks in the

footsteps of SCLC's founder, Dr. Martin Luther King, Jr., is issuing a call to arms. When thousands come together in Jacksonville, FL, at noon on August 13, Dr. Lowery will stand before a multiracial ecumenical assemblage of people of principle, who represent the spirit and will of our Nation.

As chairman of the Congressional Black Caucus, my colleagues and I stand with Reverend Lowery in spirit and walk together with these men and women in brotherhood. We, in the U.S. Congress, must indeed rededicate ourselves and our energies to the total elimination of poverty.

We join in expressing our support to the Southern Christian Leadership Conference and extend our commendations for the untiring and unwavering commitment of Rev. Joseph Lowery.

# SENATE—August 9, 1986

*(Legislative day of Monday, August 4, 1986)*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

## PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, You know Your children. You know that everyone here this morning would rather be someplace else. You know the mixed emotions stirring in our hearts, the disappointment, the frustration, the weariness. You know the plans which have had to be changed, the trips canceled, the broken promises, the pleasures postponed. You know the confusion felt by spouses and children, the sense of loss, the stubborn questions about their own importance in the Senators' priorities and schedules. In love and grace kind Heavenly Father, heal the hurts, bind the wounds, restore confidence and love, forgiveness and understanding. Grant special wisdom to these who labor here this morning. Enable them to accomplish their purposes and find time for special personal and family blessing despite the inconvenience. In Your name we pray. Amen.

## RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished acting majority leader is recognized.

## SCHEDULE

Mr. COHEN. Mr. President, the two leaders under the standing order will be allocated 10 minutes each, and following that, there will be special orders in favor of the following Senators not to exceed 5 minutes each: Senator HAWKINS and Senator PROXMIRE.

Routine morning business will not extend beyond the hour of 10 a.m. with Senators permitted to speak therein for not more than 5 minutes each.

At 10 a.m., the Senate will resume consideration of S. 2638, the Department of Defense authorization bill. Pursuant to the unanimous-consent agreement entered into last evening, pending will be the Glenn amendment No. 2671, and votes can be expected throughout the day, and for all of today.

## CONTROL OF SENATOR HAWKINS' TIME

Mr. COHEN. Mr. President, I ask unanimous consent that the time allocated to Senator HAWKINS be under my control.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## RECOGNITION OF SENATOR PROXMIRE

The PRESIDENT pro tempore. The distinguished Senator from Wisconsin [Mr. PROXMIRE] under the previous order, is recognized for not to exceed 5 minutes.

## RESERVATION OF THE MINORITY LEADER'S TIME

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the time of the minority leader be reserved for his use later in the day.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## GRAMM-RUDMAN HAS FAILED—LET'S TRY PAY AS YOU GO

Mr. PROXMIRE. Mr. President, the big fiscal shocker of the year is that we are now told that the deficit for this 1986 fiscal year, the first year of Gramm-Rudman-Hollings will be $230 billion. That is the latest bombshell estimate by the administration itself. So now the Congress faces an $85-billion reduction in 1987 to get down to the $144-billion deficit target in the year beginning just 52 short days from now.

Now let me say just plainly as I can that the Congress will not, I repeat not, meet that target. We will not come close. The deficit will miss the target by many billions. It may be worse, much worse. The chances are that 1987 will end up a year from now with the deficit once again above $200 billion. In fact, if the country slips into a recession, this Senator flatly predicts the deficit will exceed $300 billion! Do you ask, PROXMIRE, what happened to the Gramm-Rudman-Hollings bill which you voted for? Well, now you know the answer. It did not work. Under the circumstances we tried what seemed to be the toughest medicine we could contrive. It was not tough enough.

So what is next? What is next is to change the circumstances and use the toughest medicine of all. This is medicine that will work. It is called pay-as-you-go. Why does it work? Because it applies the ultimate discipline to Federal spending. What is that discipline? That discipline is a tax increase. The Congress will be faced with a choice. It can have these costly programs only if it pays for them by raising the taxes necessary to do so. And why not? Throughout America States do it. Our States have always done it. Cities do it. Cities have always done it. Counties do it. Counties have always done it. Through much of American history even the Federal Government has done it.

So why does the Congress not go on a pay as you go basis now? Answer: Because an extraordinarily popular President has intimidated the Congress. He stands there with his veto pen in hand. Like Clint Eastwood in a barroom showdown he challenges the Congress to reach for a tax increase, and he will shoot it down. Now almost nothing in politics is more painful for the electorate under any circumstances than a tax increase. This is precisely why the only real cure for excessive spending is the requirement that when you spend money you have to provide the taxes to pay for it.

Pay-as-you-go requires that excessive spending demands raising taxes immediately. That is why pay-as-you-go can and will impose the most direct and effective discipline on Federal spending. What is the real discipline behind Gramm-Rudman-Hollings? If you spend it, the President makes it impossible to raise the taxes to pay for it. So the Congress resorts to rosy estimates that grossly underestimate spending and rosy estimates that grossly overestimate revenues. It then borrows another $200 billion every year. This is oh, so much less painful, and, oh, so much less effective than paying for it. What is the real answer to this exercise in irresponsibility? Pay-as-you-go. Let us try it.

And when do we try pay-as-you-go? Mr. President, we can do it now. Today or early next week we will once again be confronted with a request to raise the debt limit. That means that today or early next week we can go on the pay-as-you-go discipline by the simple device of saying "no!" to any increase in the debt limit. With that one vote, the Congress and the administration will have no choice except to cut spending, or raise taxes, or more probably do both to bring this outrageous series of deficits to an end. One congressional vote can do it. States do it.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Cities do it. Counties do it. It is time we did it.

I yield the floor.

Mr. COHEN addressed the Chair.

The PRESIDENT pro tempore. The Senator from Maine is recognized.

## TRIBUTE TO SENATOR BARRY GOLDWATER

Mr. COHEN. Mr. President, I think everyone in this body is familiar with the expression that for the first 6 months you wonder how you got here. For the next 6 months you wonder how everybody else got here. I have never subscribed to that particular adage.

In fact, as the years have passed—for some 14 years now I have been serving in the Congress—I have gained a deeper respect for the extraordinary talent and diversity of the people who serve in this body because we have lawyers, judges, businessmen, farmers, veterinarians, professors, astronauts, college presidents, and a few would-be poets.

I dare say there is no other institution in this country that possesses the diversity of interest and abilities, indeed personalities as does this body.

But there is one individual who is unique among all of us. That is the senior Senator from Arizona. I know he is known as the Godfather of Conservative Politics in this country, a man who has never believed in moderation in the pursuit and defense of freedom. I know many recognize him as an aviator. I doubt if there is a single plane in our inventory that he has not flown. Just last evening I overheard him chiding the senior Senator from Alaska, Senator STEVENS, about how he had just flown the Air Force's new trainer, the T-46.

There are a few who know about his deep feelings and commitment to the American Indian, to their culture and way of life, and the need to see to it that we do not foresake them in the face of expediency.

□ 0940

But I know BARRY GOLDWATER as more than all of these things—I know him as a great naturalist—a man who has a profound love of nature and the wilderness; an explorer, an adventurer who believes that "the running streams of this country should not be let out of the possession of the people."

I suspect that everybody in this Chamber associates the book "The Conscience of a Conservative" with BARRY. But there is another book of his that did not make the best seller list, that did not set political hearts beating high with excitement.

It is called "Delightful Journey." It is his dairy chronicling his exploration by boat of the Green and Colorado Rivers in 1940—the year that I was born.

In these pages you will find a different facet of a wonderfully complex and passionate man.

There is one passage that I am particularly fond of and enjoyed reading.

> If you go through all this, the blue headwaters of Lake Mead will fan there ahead of you, welcoming you. To learn all that is to learn freedom and patience; and you learn these lessons by ranging yourself on the side of the river.
>
> I like to think that all human effort takes place within the context of something permanent, like that river and its canyons.

These are the words of a man who has had a long love affair with life—here in the Senate, but especially out amongst the canyons, rapids and stars.

Justice Holmes once wrote a letter to Benjamin Cardozo and he said that:

> I have always thought that not place or power or popularity makes the success that one desires, but the trembling hope that one has come near to an ideal. The only ground that warrants a man for thinking that he is not living the fool's paradise if he ventures such a hope is the voice of a few masters. I feel it is so much that I don't want to talk about it.

This is the last DOD authorization bill that BARRY GOLDWATER will ever shepherd through the Senate.

He has done so, I might add, under extraordinary circumstances. He suffered a great personal loss earlier this year. He has been in considerable pain and discomfort for several weeks. Yet he is the first one here in the morning and he is the last one to leave, much against his will. Though sometimes he can be irascible, occasionally irreverent, he is always candid and most especially he is always honorable.

More than any other person in this Chamber, I believe he has come near to the ideal.

And I feel it so much I don't want to talk about it any longer.

## RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The distinguished and able Democratic leader, Senator ROBERT BYRD, is recognized.

## BEST WISHES TO PRESIDENT REAGAN

Mr. BYRD. Mr. President, today President Reagan becomes the longest-serving President since President Eisenhower. And today he enters the Bethesda Naval Hospital for an examination of the urinary tract.

Mr. President, I know I express the wishes of all Senators on both sides of the aisle, all Americans, whatever their political faith, that Mr. Reagan is given a clean bill of health following the examination.

My wife Erma joins in these wishes to President Reagan.

Mr. President, I yield the floor.

## ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond the hour of 10 a.m., with statements therein limited to 5 minutes each.

Mr. COHEN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

□ 1000

Mr. GLENN. Mr. President, I ask unanimous consent that proceedings under the quorum call be rescinded.

The PRESIDING OFFICER (Mr. EVANS). Without objection, it is so ordered.

## CONCLUSION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. If there is no further morning business, morning business is closed.

## NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

> A bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

The Senate resumed consideration of the bill:

> Glenn amendment No. 2671, to prohibit the Department of Defense from entering into contracts with foreign governments and foreign firms for the purpose of carrying out research in connection with the strategic defense initiative that could be reasonably performed by a U.S. firm.

AMENDMENT NO 2671

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I fully support research in connection with the strategic defense intitiative, the so-called Star Wars Program, as a way of capitalizing on emerging technologies which could lead to the development of a useful ballistic missile defense system. We have reduced the administration's funding request to a more realistic, research-oriented basis. I think the expectations of near-term success have been oversold. Possible

benefits from this program won't be evident for a long time.

While the potential capability and deployability of SDI has been exaggerated, we do have reason to hope for a partial but significant defense against a Soviet ballistic missile system. I do not think it will be the overall umbrella defense the President has talked about that will give perfect protection to everyone in our country, but it can make a difference in Soviet perceptions of what might be possible if the Soviets were foolish enough to start a nuclear war.

It is therefore important to support a robust research program. SDI research is at the cutting edge of defense technology. We must safeguard this vitally important technology. As recent espionage scandals have shown, it is difficult enough to protect such information in the United States and we would encounter very serious additional security problems in sharing it with other countries. Also, I question how much expertise, unavailable in the United States, other countries can bring to this program. Furthermore, I have been concerned for some time at the extent to which the administration has attempted to purchase support for SDI among our allies by permitting them to conduct research and development with American funds.

So today I have two amendments. The first which is pending, would forbid the award of a contract to any foreign government or foreign firm or any consortium of governments or firms unless the Secretary of Defense certifies that the research of interest cannot reasonably be performed by U.S. firms.

It provides that funds appropriated for research on SDI will be spent in the United States unless the Secretary of Defense certifies in writing to the Congress that the research cannot reasonably be performed by U.S. firms. I believe that makes good policy and good common sense. SDI research is on the cutting edge of high technology, and given the chance, I believe that Americn workers, inventors, and scientists can still outinvent, outproduce, outwork, and outcompete anybody in the world given a fair chance. We know what has happened to our Nation's trade balance. It is headed for a record $168 billion deficit in 1986 and the American economy—and with it American jobs, firms, and industries—is ailing overseas. Let us not let the same thing happen to SDI research work. I believe our Government should do everything we can to do SDI research here.

We are very concerned about burden sharing in Europe with our allies. We talk about it all the time. The distinguished Senator from Georgia introduced a bill some time ago which said that we would pull our troops out of Europe because we were so concerned that the Europeans were not doing enough burden sharing. The allies were not living up to the 3-percent real growth in defense spending that they had pledged. We in turn were spending $13 to $15 billion a year for each new carrier task force to protect the sealanes from the Persian Gulf. These sealanes benefit the Europeans far more than they benefit us.

We keep some 350,000 troops in Europe and are therefore concerned about burden sharing. Burden sharing is a two-way street. The United States has surpassed other nations in the field of education.

Just as important, we have put more money into basic, fundamental research than other countries. Americans make the most breakthroughs. Americans discover the most new scientific principles. Americans discover the new medicine and materials that let us create new jobs and business. The rest of the world has followed in our wake. It is because we put more money into research. What has happened since World War II? Well, we find ourselves cutting back on research at the Government level. Most of the major advances have come from Government laboratories in the past.

However, the rest of the world has recovered since World War II and they have accelerated their research efforts. We see the Japanese, the Germans, the French, and others putting more effort into not only education, but into basic, fundamental research. Much of our breakthrough research has come from the defense sector. These breakthroughs have included metals, medicines, and computers. What has followed from these breakthroughs? We have had one civilian spinoff after another. To a great extent, we are what we are as a nation today because of the money we have spent on basic research.

We are now cutting back on our own research efforts. Yet we now have one of the greatest research programs ever conceived. I am one of Lt. Gen. Jim Abrahamson's greatest admirers; he is a brilliant man and has one of the finest technical minds in Government. However, we are going to put out billions of dollars' worth of research while our own universities and research institutes are crying for help in this country and cannot get it. What are we going to do? Are we going to curry favor with our allies, who will not share their burdens to begin with, give them our research money, let them develop the technological infrastructure that will benefit them into the indefinite future?

We have scientists here. We have laboratories here. I say it is time we support ourselves. This should be research by and for America. That is what I would call this amendment—research for America.

□ 1010

When the British officials were here a few weeks ago, they said they may receive a billion dollars' worth of research from the United States. Here is a news clipping from the Defense News on Monday, July 1, entitled "British Could Reap $1.5 Billion From SDI." That is vitally important research going abroad which we need here at home. I say let us do that research in America.

I am not proposing in this measure that we make this unwavering and absolute. When research cannot be done in this country, we may have to contract with our allies. But let us spend American dollars for the benefit of Americans, here at home, where we need to develop our own scientific infrastructure, so that we can compete and, not be outcompeted by others.

At a time when we are concerned about trade balances, we are about to spend billions abroad to give our allies a competitive edge. What I am proposing with this legislation is that we do this research here, unless it can be shown that we cannot do it. We cannot buy the support of our allies. The French, for example, are far from ideal as an ally. I fought with them in World War II and they are a great people. But now the French want to compete for SDI funds and they are not even NATO members. That makes very little sense to me.

I would love to have some of this money go to research institutes in Ohio. For example, I would like to see the Battelle Institute of Ohio, one of the finest scientific institutions in the world, form a consortium with Ohio to do some of this important research.

Mr. President, that is basically the issue here. We are paying for research. Our allies do not have to pay one nickel for this research, yet they will get a great share of the benefit.

As I stated previously, there will be enormous nonmilitary spinoffs from SDI research. Sir Alexander Fleming experimented with mold and discovered penicillin which changed the world. Little things like that have a far-reaching effect. We are about to pay for our allies and economic competitors to develop such enormous potential spinoffs. I think that is preposterous.

So what my amendment does is say that we will do this research in America, where it can be done in America. We do not want to pay them to outcompete the United States. We do not want to add to our deficit problems and our trade imbalance. I want to see this research done in this country. We must not act like a kid standing on the school ground with a sack of candy, gaining friends by passing out the candy to passers-by.

Mr. President, I will have a follow-on amendment to this which states that

if we should go to another country, for SDI research, costs should be shared 50–50. If that cannot be done, for whatever reason a waiver may be granted. Just report it to the Congress.

Again, Mr. President, my first amendment states that we should spend SDI research money in the United States; and if it cannot be done here, then we will spend the money abroad. But we should try to do all SDI research in America.

Mr. WARNER. Mr. President, I have listened with great interest to the Senator from Ohio, and he raises valid points about the program now under way in the SDI area with respect to contracting abroad.

However, I must say, with due respect to my colleague, that it is not being conducted like having a bag of candy on a school playground, handing out candy just to gain friends. We have had hearings on this subject, and General Abrahamson has been before the Armed Services Committee.

It is very clear—and I can be more specific, and I will be later—that, generally speaking, the United States now contracts with firms abroad in the area of SDI only in the sole source area, where there is not to be found in the United States a firm with the technical capability offered by a firm overseas.

In the case of competitive contracts, the contracts have to be cost competitive and the foreign firm has to have a technical advantage to gain that contract.

□ 1020

Now to date, memorandums of understanding—that is the sort of preamble to the contracting that we utilize in connection with our overseas work—have been signed with the United Kingdom, Federal Republic of Germany, and Israel.

I submit to my distinguished colleagues, those are two allies and the third a friend of the United States, which nations have stood by this country in the past several decades unfailingly.

So while there is a basis for criticism toward some allies, certainly not the three that have thus far signed the MOU.

Mr. GLENN. Mr. President, will the Senator yield on that point?

Mr. WARNER. Yes.

Mr. GLENN. I exempt contracts already signed. Everything I am proposing would be prospective.

Mr. WARNER. I understand that is the Senator's amendment but I listened very carefully to the presentation which had a rather tough indictment with respect to the generic category of allies and I wish to point out that specific.

Mr. GLENN. Will the Senator yield for one further question?

Mr. WARNER. I yield.

Mr. GLENN. Can the Senator name one kind of research that we cannot do in this country that we have to contract out for?

Mr. WARNER. I will be able to do that momentarily and I intend to bring to the Senate's attention that category.

Now, the amendment as submitted by the Senator from Ohio raises, I say, a subject that is of concern to a number of Senators. At the present time, both sides, the majority and the minority managers of this bill, are prepared to accept an amendment that will be submitted today and listed among the amendments by the Senator from Arkansas [Mr. BUMPERS].

That, in the judgment of this manager of the bill, is the approach that we should take today, sending a strong message to the SDI organization that Congress is keenly aware of the participation by our allied nations, we are supportive of it but it should be continued only in the vein as stated by the amendment of the Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, will the Senator from Ohio answer a question that bothers me?

Mr. GLENN. Might I ask whose time we are on here?

Mr. PELL. Could we divide the time?

The PRESIDING OFFICER. There is not a time agreement. The Senator from Rhode Island is recognized.

Mr. PELL. I thank you.

I think I do not share the enthusiasm for SDI as do many of my colleagues.

One concern I have is that all the contracts are awarded to American firms. One of the results of that will be that we will vastly increase the lobbying force of those contractors and individuals who want to push SDI no matter what within our own country.

If some of these contracts go abroad the lobbying force is obviously far less.

I am wondering what the reaction is of my friend and colleague from Ohio to this thought.

Mr. GLENN. I would reply that if we use that kind of logic, I would think we would then want to contract out all of our weapons systems. If we do not want to build up a lobbying group in this country, we will want to contract out all our aircraft, ship, and tank production because then we would not build up a lobbying group in this country.

I do not think he will agree with that.

Mr. PELL. I am all for the ships and tanks and things of that sort.

I am a little less enthusiastic about SDI. That is the reason for my reservation.

Mr. GLENN. I understand that, but I would not use that as a rationale. I have my own doubts about some aspects of SDI.

I spent 10 days last August and 10 days the previous August traveling around this country and talking to our finest scientists involved with lasers, neutron particle beam projectors, and other aspects of SDI research. So I have a good sense of the problems and potentialities of SDI.

SDI is a long-term program that we are going to have to furnish at reasonable levels but pursue for a long time to come. We cannot turn it on and off.

But as I said before, I want that research to be done here and I want this to be done for the benefit of Americans. Our European friends have not lived up to their responsibility for burden sharing.

The distinguished Senator from Georgia has addressed that in the past. I agree with him completely.

For us to be funding foreign research is preposterous.

Mr. NUNN. Will the Senator yield who has the floor?

Mr. PELL. I yield the floor.

Mr. WARNER. I yield such time as the Senator from Georgia may desire.

The PRESIDING OFFICER. There is no time limit.

Mr. NUNN. Mr. President, may I be recognized in my own right?

The PRESIDING OFFICER. The Senator from Rhode Island has the floor.

Mr. PELL. I yield the floor. I was interested in the response.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I understood there was a time agreement. Evidently there is no time agreement.

We have now used 25 minutes on this amendment. Will the Senator from Ohio agree since he has had more than half of the 25 minutes, to have 15 additional minutes on this amendment equally divided?

Mr. GLENN. I thought we had 20 minutes on a side. I agreed to 40 minutes, but apparently that was not locked in last night. I guess we have no time limit on this.

Mr. NUNN. Does the Senator object to that unanimous-consent request?

Mr. GLENN. What was it? State is again.

Mr. NUNN. Fifteen minutes equally divided from this point on on this amendment.

Mr. GLENN. Yes. I have no knowledge of anyone else on our side who wants to speak on this, so that would be acceptable.

Mr. NUNN. Mr. President, I ask unanimous consent that there be an additional 15 minutes on this amendment equally divided between the Senator from Virginia and the Senator from Ohio.

The PRESIDING OFFICE. Without objection, it is so ordered.

Who yields time?

Mr. NUNN. Mr. President, I would like to just take 2 or 3 additional minutes of the time of the Senator from Virginia. I am sympathetic with what the Senator from Ohio is trying to do. I share his frustration with and at least the strong skeptimism that is produced by a great number of contracts going abroad for SDI. You really wonder whether it is because of reseach or whether it is because of politics.

On the other hand, I think to require 50 percent on every negotiated memorandum of understanding between our country and allies not only would preclude most of the smaller countries from around the world from participating including Israel, I might say, I think it would preclude countries like Norway, Italy, and many countries of even thinking about participating in SDI.

The thing that bothers me is we have just started a cooperative program between the United States and NATO and in this bill we have provision for the Secretary of Defense to enter into a similar program with Israel on research and development, nonstrategic defense initiative research and develoment, but on multiple types of research contracts, and we are trying to stimulate a cooperative kind of arrangement so that we can begin with our allies at the research stage and then we can go ahead and have joint procurement.

As the Senator from Ohio well knows, because he is a leader and champion of NATO for many years, one of the biggest problems we have in NATO is we do not have commonality of weapons systems. Every country has different weapons, different tanks, different artillery tubes, different armed personnel carriers, different airplanes, different air defense systems.

What we have is each year NATO outspends the Warsaw Pact; both sides, the United States and Soviet Union, each year we outspend them. There has been only 1 year that they outspent us in the last 20, 25 years, but they have overwhelming conventional superiority.

If we apply the theory of the Senator from Ohio here, the 50-percent requirement, to all the other research and development contracts, first of all the so-called noninitiatives is out the window.

Mr. GLENN. No; that is the second amendment, not this amendment.

Mr. NUNN. I know this SDI amendment does not require that on anything other than SDI. I understand that.

Mr. GLENN. No.

Mr. NUNN. I am saying if you apply the concept——

Mr. GLENN. If the Senator will yield, so I can correct that, this particular amendment says we will buy America where possible. The second amendment, which I have not yet presented, is a 50-50 requirement. The pending amendment we will vote on here is to buy America if possible.

Mr. NUNN. Will the Chair inform us which amendment is now pending?

The PRESIDING OFFICER. The amendment now pending is amendment 2671.

Mr. GLENN. I have not proposed the second one.

Mr. NUNN. The Senator is correct. He is talking about the second amendment. I will go ahead and make my point on the second amendment while we are here.

That second amendment, the 50-percent formula basis, the concept of it if it is taken and extended to other contracts and to other research type programs will absolutely kill everything we have strived to do for the last 5 years in going toward commonality of NATO. I know that is not the Senator's intent, but that is what that amendment will do.

□ 1030

Mr. President, on the first amendment, the first amendment says "Nothing can be contracted out to any other foreign country unless it cannot be reasonably performed by a United States firm."

I ask the Senator, what does "reasonably" mean in this context: let us suppose an American company bids $10 million for a research contract. Let us assume a company in England bids $1 million for the same research contract and the Defense Department determines they have equal skill. The U.S. firm has bid $9 million more.

There is not anything in the Senator's amendment that says anything about low price, competition, any of those things. The only words we have to guide us by are "reasonably perform." Does the Senator intend this to mean that the English firm would win the contract because it is unreasonable to leave $9 million of the taxpayer's money on the table, or does competition enter into this amendment?

Mr. GLENN. We put the term "reasonably" in there so there will be some judgement exercised.

The Senator properly sets up an extreme situation. Research is not going to be that different in cost from one place to another. If it was unreasonable and it was going to be a 10-to-1 cost, we could put it in and have it under control. So I would tend to think "reasonably" would mean if there was a 10-to-1 cost difference performing the same job, we would go for it.

Mr. NUNN. Suppose it is $1 million? Suppose the English, for instance, bid $9 million and an American firm bid $10 million and had equal skills, what would the Senator's answer be?

Mr. GLENN. Depending on what the project was and what we sought as the future benefit of that project. I would think, in that particular case, if the project had some spinoff applications to civilian use, I would go American for that. I would put that research in this country because we are the ones who are going to benefit.

Mr. NUNN. Would you go to court and challenge the Secretary of Defense if he decided to go British with that because there was a $1 million differential and he did not want to waste $1 million of the taxpayers' money? Are we going to have every contract argued in the Defense Department that is awarded abroad challenged in court? That is what the Senator is setting up here. This is a lawyer's dream, because every contract that goes can be challenged on whether it is reasonable or not.

I understand what the Senator is trying to do, but I think the Senator's amendment has not been drafted considering the reality of what the proliferation of lawsuits does in defense contracts.

Mr. WARNER. Mr. President, the question was posed what technicalities or technical ability seems to be abroad at this time. Here are three examples: in the United Kingdom, they have klystrons to serve as a power supply for free electron lasers. The United Kingdom is doing an architecture study on theater defense. They also have advanced technical work in ion research.

I pose the question, as did my colleague from Georgia: supposing two contractors in the United States and two in the United Kingdom were vying for this and clearly that the dollars may have traded out but that the United Kingdom had a technical superiority? How would the Secretary decide under your theory?

Mr. GLENN. He would decide on how it compared with our American capability here and what the costs were, and that is the reason we put that word "reasonable" in there.

I would submit that what we are talking about here is not automatically sending billions of dollars over to Europe. That is what General Abrahamson said. It is $1.5 billion that the British are going to get on this.

I want to see this money spent here. I want to buy research in this country that will benefit us in the long term.

The Senator from Georgia talked about the commonality of NATO. But we are not talking about whether we are buying tanks or M-16's, or whatever.

As far as this being a lawyer's dream, this is not the case. We are talking about a big portion of money going to Europe automatically.

Mr. WARNER. Mr. President, the Senator from Ohio is serving a very

important function of alerting the Congress of our intention to make certain that the billions do not flow.

What has happened to date? To date, there have been five contracts in the United Kingdom, totaling $15 million; one to Israel, $1 million; three to West Germany at $8 million, totaling roughly 25 million dollars' worth of contracts. That is hardly in the category of billions of dollars.

I say to my friend from Ohio that we should and will, during the course of this day or perhaps in the context of the amendment of the Senator from Arkansas, try to clearly indicate the sentiment in this body.

The PRESIDING OFFICER. The time of the Senator from Virginia has expired.

Mr. GLENN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Three minutes and fifty-three seconds.

Mr. GLENN. Mr. President, what the Senator has been talking about here are a few tens-of-millions-of dollars already. Granted, I would not disturb those contracts. I specifically provided that any contracts already in place would be carried through.

What we are talking about are billions of dollars that go into future research. It is not just star wars that concerns me. When we build these laboratories, and hire scientists and technicians to do this research, we are building an infrastructure that benefits that nation into the future. We are providing them with research that could be highly useful to our own Nation.

I say buy American research that will benefit Americans. If the United States cannot do this research and if there are advantages abroad, as the Senator from Virginia and the Senator from Georgia stated, it should be done abroad. I am all for that. But that is not going to be what the bulk of these foreign funds are spent for.

I yield 1 minute to the Senator from New Hampshire.

Mr. RUDMAN. Mr. President, I just want to rise in support of the amendment offered by the Senator from Ohio.

Mr. President, a time when this country has got a hemorrhage in its international economy, we are importing cheap shoes, cheap steel, cheap automobiles, cheap everything, what the Senator from Ohio is trying to do is prevent us from exporting research knowledge which would only add to the imbalance of payments.

The second point I want to make is that what this SDI program is all about is the most sophisticated, complex research this country probably will ever engage in. And to export American taxpayer's dollars to foreign countries, unless they are the only ones that can do it, makes little sense at all.

I think the Senator from Ohio ought to be commended. I do not know whether this is going to be carried or not, but I do not think the American people, facing $160 to $170 billion trade deficits, are particularly pleased with the prospect that more billions of their dollars will go overseas for projects that can be contracted in this country. I am hopeful we will support the amendment offered by the Senator from Ohio.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. ROTH. Mr. President, I am extremely perturbed by the implications of the amendment offered by the Senator from Ohio. He would have the Senate limit research and development contracts in the SDI field to U.S. contractors unless the Department of Defense could prove that the work could not "reasonably" be performed in the United States. Only then would our NATO allies in Europe participate in the cooperative contracts which they already have been promised.

How are we to define the term "reasonably"? I must agree with the senior Senator from Georgia when he asserts that we may be legislating our way into a lawyer's paradise. If this amendment is enacted, how will DOD ever be able to award a contract to a European company, no matter how necessary the award, when disappointed U.S. contractors will be free to go to the courts to assert that they too could "reasonably" have performed the work? So let us make no mistake about the final effect of this amendment—it will sound the death knoll for cooperation in SDI if enacted.

I fully understand and empathize with the Senator from Ohio's frustration with our European allies in the defense field. He and I both joined with Senator NUNN in 1984 in an attempt to legislate U.S. troop reductions in Europe in the absence of serious improvements in European defense budgets. I am happy to say that, while that amendment failed, it has had a salutary effect in Europe.

In the aftermath of the amendment, transatlantic arms cooperation also has improved significantly, largely because of the hard work of Ambassador David Abshire and the appointment of William Taft, a man genuinely committed to improved transatlantic cooperation, as Deputy Secretary of Defense.

The seed money which this body fenced into the fiscal year 1986 Defense authorization budget has begun to bear fruit. DOD is currently engaged in joint R&D with our European allies on a variety of weapons and support systems such as modular standoff weapons, information distribution systems, and aircraft identification systems. We should note that these projects all greatly enhance NATO interoperability and, in so doing, buy all NATO members a bigger bang for the buck. I would not argue with the Senator from Ohio if he believes that the situation still needs great improvement. However, I must ask, should we be hitting our European allies over the head just when the situation is on the upswing?

In closing, let me make two related points. So often, when discussing transatlantic projects, we base our discussion on the implicit belief that we are "doing the Europeans a favor." This is simply not so. In proposing cooperative arrangements for SDI, the President is not looking for a way to spend dollars in Europe. Rather, he is seeking to tap into a deep reservoir of European expertise which could prove critical in the development of the SDI program. I am sure that the Senator from Ohio is quite familiar with the strong British record in the software field and the German expertise in optics. Are we going to turn our backs on this expertise and seek to reinvent the wheel here in the United States at the expense of the U.S. taxpayer?

Finally, I believe that, in fields such as this, it is absolutely crucial that we allow the executive a reasonable degree of latitude to chart a course of development for SDI rather than seek to micromanage the program from here in the Capitol. The President has negotiated an arrangement with Prime Minister Thatcher to permit British participation in SDI. Meanwhile, Mrs. Thatcher, at some political risk, has endorsed the concept of SDI. Are we in the Congress now to pull the rug from under her feet and demonstrate to our European allies that an agreement with the President of this Nation is purely provisional and subject to being undermined by the Congress? I hope that the conferees on this bill will consider the implications of its enactment for our relations with Great Britain, West Germany, and France in particular, all governments which, in varying degrees, have endorsed the concept of cooperative research and development in SDI. In response to U.S. prompting. This Government must speak with one voice. This amendment shatters that one voice and transforms it into a cacophony.

Mr. GLENN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. One minute and 44 seconds.

Mr. GLENN. How much time for the other side?

The PRESIDING OFFICER. There is no time on the other side.

Mr. GLENN. Mr. President, the Senator from New Hampshire stated the case very well. I am concerned not just about star wars, I am concerned about spending tax dollars to support America's technological infrastructure. If we do not have the capability—and I would submit that there are very few

areas where we do not have the capability to do this research—it should be done elsewhere if it can be done better and more cheaply. I will not quarrel with those judgments once made.

But I do quarrel with the idea that we are sort of seeing the pseudoallocation of giant research funds going abroad to buy support, in effect, from our allies. Because they were not enthusiastic for star wars, we cut them in on research as a way of getting their support. I do not agree with that. That is like the kid with a sack of candy who buys friends temporarily.

We should spend our research money in this country. We should benefit from it ourselves. If we do not have the facilities to do that, then we contract abroad, and only then.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WARNER. Mr. President, I move to table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Virginia [Mr. WARNER] to table the amendment of the Senator from Ohio [Mr. GLENN]. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SIMPSON. I announce that the Senator from Vermont [Mr. STAFFORD] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 33, nays 64, as follows:

[Rollcall Vote No. 199 Leg.]

YEAS—33

| | | |
|---|---|---|
| Armstrong | Gramm | Pressler |
| Bentsen | Hecht | Quayle |
| Boschwitz | Heflin | Roth |
| Chafee | Humphrey | Simpson |
| Cochran | Kassebaum | Stennis |
| Cohen | Laxalt | Stevens |
| Danforth | Lugar | Thurmond |
| Dole | Mathias | Trible |
| Durenberger | McConnell | Wallop |
| Evans | Nunn | Warner |
| Goldwater | Packwood | Wilson |

NAYS—64

| | | |
|---|---|---|
| Abdnor | Burdick | Dodd |
| Andrews | Byrd | Domenici |
| Baucus | Chiles | Exon |
| Biden | Cranston | Ford |
| Bingaman | D'Amato | Garn |
| Boren | DeConcini | Glenn |
| Broyhill | Denton | Gore |
| Bumpers | Dixon | Gorton |
| Grassley | Lautenberg | Proxmire |
| Harkin | Leahy | Pryor |
| Hart | Levin | Riegle |
| Hatch | Long | Rockefeller |
| Hatfield | Matsunaga | Rudman |
| Hawkins | Mattingly | Sarbanes |
| Heinz | McClure | Sasser |
| Helms | Melcher | Simon |
| Hollings | Metzenbaum | Specter |
| Inouye | Mitchell | Symms |
| Johnston | Moynihan | Weicker |
| Kasten | Murkowski | Zorinsky |
| Kennedy | Nickles | |
| Kerry | Pell | |

NOT VOTING—3

| | | |
|---|---|---|
| Bradley | Eagleton | Stafford |

So the motion to lay on the table amendment No. 2671 was rejected.

□ 1100

The PRESIDING OFFICER. No time remains on the underlying amendment. The yeas and nays have been ordered.

Mr. NUNN. Mr. President, does the Senator from Ohio need the yeas and nays? We got the message on this vote.

Mr. GLENN. Mr. President, I think I have not submitted the second amendment.

The PRESIDING OFFICER. On the first amendment, the yeas and nays have been ordered.

Mr. GLENN. No, Mr. President, we do not need the yeas and nays.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the yeas and nays be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. GLENN. I move to reconsider the vote by which the tabling motion on amendment No. 2671 was rejected.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment numbered 2671 of the Senator from Ohio.

The amendment (No. 2671) was agreed to.

Mr. GLENN. I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN. Mr. President, I understand the Senator will not propose his second amendment.

Mr. GLENN. I shall not propose the second amendment. I believe the vote was a very decisive vote, so there will be no need to offer the second one.

Mr. NUNN. Mr. President, the Senator won that vote. If we had known he was not going to propose the second one we could have probably taken the first one. Although I do not like the amendment, I think it was wrong, this is a good example of how we might be able to save some Members' time. We have used 1 hour here on something that we could have solved in 10 minutes.

Mr. GLENN. Mr. President, this is the first I heard any consideration given at all that the first one would have been accepted had the second not been a part of it. I separated them intentionally and if I had known the floor managers were likely to accept them both, I might not have done that.

Mr. NUNN. Mr. President, we were informed by the Senator's staff that the first one was the one pending. But that is history.

I understand the Senator from Montana has two amendments now. He has agreed or will agree to time limits of 30 minutes and 20 minutes. Is my understanding correct on that?

Mr. MELCHER. That is correct, Mr. President,

Mr. WARNER. Mr. President, is that equally divided?

Mr. NUNN. Equally divided. If Members desire, we could stack these two votes and give everybody time to look in on their offices.

Mr. BUMPERS. Mr. President, may we have order, please?

The PRESIDING OFFICER (Mr. DURENBERGER]. The Senate will be in order.

Mr. WARNER. Mr. President, in order to move this calendar along, I see the distinguished Senator from Arkansas is here. Knowing his amendment very closely approached the Glenn amendment, I am wondering if that amendment needs further consideration?

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. WARNER. Yes, I yield.

Mr. BUMPERS. I thank the Senator for yielding. That is the very point I want to make. My amendment was not as binding as that of the Senator from Ohio. As I understand it, the second amendment which the Senator from Ohio is now apparently not going to offer suggested that our NATO allies also contribute; as a matter of fact, it mandated that they contribute in any contracts they got. Is that correct?

Mr. GLENN. That is correct. The amendment I have withdrawn would have provided that where we see research cannot be done in this country and can be done better abroad, the least they could do is support 50 percent of the expense of that in the interest of burden-sharing. We had a waiver in it that would have provided for the Secretary of Defense to make alterations there and make different contracts depending on who was going to get the benefit. The guideline would have been 50-50 on the expense.

Mr. NUNN. Mr. President, I think rather than discussing this, we are willing to take the Bumpers amendment as it is, even with this in there.

If we could avoid debate on it, we will take it.

Mr. BUMPERS. I thank the Senator because I was not going to offer it.

Mr. NUNN. We can do it either way. I do not see any need to have debate on it.

Mr. BUMPERS. Mr. President, I shall offer it at the proper time. As a matter of fact, I can offer it now if the managers would like to dispose of it.

Mr. WARNER. Mr. President, I have seen the amendment of the Senator from Arkansas. It has been indicated on the majority side that we will accept it.

Mr. BUMPERS. Mr. President, I send my amendment to the desk and ask for its immediate consideration.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Ohio.

Mr. BUMPERS. Mr. President, let me suggest that the only thing this amendment does is essentially what that of the Senator from Ohio did but it encourages anybody who is awarded a contract between the Defense Department and that country, encourages them to participate financially.

It is a sense-of-the-Senate amendment and simply encourages our allies to participate in the funding of SDI. Since it is a sense-of-the-Senate resolution and would not be binding, I withdraw the amendment and will not offer it.

TIME LIMITATION AGREEMENT

Mr. NUNN. Mr. President, we have an opportunity to get a unanimous-consent agreement. If the Senator from Montana will consent, we can stack the votes and, based on the unanimous-consent agreement, the votes will be stacked until about 12 o'clock or until we know where we are going.

Would that be satisfactory to the Senator?

Mr. MELCHER. If the Senator from Georgia will yield to me, Mr. President, it is entirely satisfactory to me.

Mr. NUNN. Mr. President, I ask unanimous consent that there be a time limitation on the two Melcher amendments, the first to be a 30-minute time limitation, with time equally divided; the second a 20-minute time limitation with the time equally divided, with the votes stacked.

Mr. DOLE. And that the second vote be a 10-minute vote.

Mr. NUNN. And that the second vote be a 10-minute vote.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. WARNER. It is the intention of the managers of the bill to follow as nearly as possible the amendments as listed at the desk.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana is recognized. He is informed that the pending business is the Wilson amendment.

Mr. MELCHER. I ask unanimous consent that amendment, No. 2595, be set aside temporarily.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2672

(Purpose: To reduce the authorization by an amount equal to 20 percent of any funds that remain unobligated as of the end of fiscal year 1986)

Mr. MELCHER. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana [Mr. MELCHER] proposes an amendment numbered 2672.

On page 229, between lines 14 and 15, add the following new section:

"SEC. . REQUIREMENT FOR RETURN OF UNOBLIGATED FUNDS TO THE TREASURY.

Notwithstanding any other provision of law or of this Act, the authorization for appropriations is reduced by an amount equal to twenty (20) percent of any funds appropriated to or for the use of the Department of Defense that remain unobligated as of September 30, 1986. Twenty percent of any funds appropriated to or for the use of the Department of Defense that remain unobligated as of September 30, 1986, shall be made available for the programs authorized by this Act.

Mr. MELCHER. Mr. President, I did not ask that the amendment not be read in full because it is a very short amendment. It is an easily understood amendment. If we put the short title to this amendment, it should be called Sanity in the Slush Fund, because that is exactly what we have. There are $60 billion in unobligated funds in the Pentagon that are available and they should be reduced.

First, Mr. President, this bill is $3 billion over budget authority as it stands right now.

□ 1110

Second, the bill is $8 billion over budget outlays as it stands right now. Now, this amendment would reduce budget authority $10.8 billion, bringing it within the budget. On outlays, it would reduce it $1.6 billion. That will not bring this bill under the budget. Under Gramm-Rudman-Hollings there would be requirement of further cuts from even these amounts in budget outlays. The reason for that, of course, is obvious. The CBO estimate for fiscal 1987 deficit is $173 billion. The OMB estimate for fiscal 1987 deficit is $146 billion. And we must get—those two figures presumably will be averaged. They will average higher than the $144 billion which we must reach under Gramm-Rudman-Hollings. So this bill is too high.

If the spending level is not met, we are faced with sequester, and sequester would simply mean that every item in defense would have to be cut a certain percentage and the cut would be across the board. It would affect the pay that the troops receive; it would affect the troop level; it would affect readiness drastically. It would be an intolerable step. So it is up to us in Congress to take the necessary steps toward sanity in defense outlays.

Now, what does reducing the unobligated funds do? Well, first of all, it does not affect multiyear contracts. And where does all this money come from? Well, in 1981, at the close of the fiscal year, the unobligated funds were at a level of $26 billion, but now it is at a level of $60 billion. I would like to submit for the RECORD, Mr. President, and I ask unanimous consent to do that at this point, the figures from 1981 through 1987 as prepared by the Office of Assistant Secretary of Defense, the Comptroller. This has previously been printed in the CRS report.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

*Defense Department's unobligated balances*

| Year: | *Billion* |
|---|---|
| 1981 | $26.5 |
| 1982 | 34.6 |
| 1983 | 43.4 |
| 1984 | 51.6 |
| 1985 | 61.5 |
| 1986 [1] | 59.9 |
| 1987 [1] | 60.3 |

[1] Estimate.

Source: Office of the Assistant Secretary of Defense (Comptroller), reprinted in CRS Report.

Mr. MELCHER. The Comptroller General is very candid—and this is the Comptroller General in the Pentagon—about the growth of these funds and how much they are. The unobligated funds are to cover multiyear programs but not multiyear contracts. The Comptroller tells us that there will be a requirement of $6.5 billion out of these funds for this year in budget authority, and plus $6 billion in budget authority that has been cut by the committee in the first amendment that was submitted. It still leaves $54 billion of unobligated funds at the end of this fiscal year.

This amendment is very easy to understand. It simply says that 20 percent of what is unobligated at that time, 20 percent of the $54 billion, will be used to fund necessary programs in fiscal 1987 as is required and proposed under this act. The result is reducing budget authority by $10 billion for fiscal 1987 and reducing budget outlays by $1.6 billion.

The amendment simply cuts the unobligated funds, to transfer them to necessary spending as is covered in the bill for this coming fiscal year.

Now, I particularly call the attention of the members of the Budget Committee and the Appropriations Committee to this amendment because it is very clear to us that the bill is too

high. It is also necessary under Gramm-Rudman-Hollings. The time for figuring out whether sequestering will have to be ordered is approaching us very quickly. Sequestering is impossible, sequestering for the Armed Forces would not work. It must be avoided.

We would be cutting readiness across the board. We would be cutting troop pay and troop levels across the board. And that simply cannot be tolerated. It is time now to recognize that budget cuts must be made. This is the proper place, the most reasonable place to make it in this bill.

Mr. President, I reserve the remainder of my time.

Mr. STEVENS. Mr. President, would the manager loan me time?

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I hope that the Senator would not persist with this amendment, but if he does that the Senate will not support it and it will be disposed of in a manner that will allow us to consider the concept in the appropriations bill. This is really an amendment that belongs on the appropriations bill because it deals with making funds available to the Department. This bill does not make funds available to the Department. This bill authorizes funds for the Department, and leaves it up to the Appropriations Committee to determine where the funds originate. As a matter of fact, there is a great deal of misunderstanding about the prior years' authorizations that are still unfunded.

We deal with budget authority and with budget outlays and this amendment confuses the two, I would say respectfully to my good friend from Montana, because it says that "20 percent of any funds appropriated to or for the use of the Department that remain unobligated as of September 30 shall be made available for programs authorized under this act."

Now, let us take a cruiser. We fully fund a cruiser. That money may not be spent for 5 years. We know when it will be spent. We have put it in the pipeline to spend and it is outlays. Each year as the time comes up for spending, we look at the outlay ceilings and that is the thing that comes into effect. The Senator's amendment, as I understand it, would take 20 percent of the funds that have been appropriated in the past and remain unobligated at September 30 and say use them this year, in 1987. They may well be scheduled for the completion of that cruiser in 1988, 1989, and 1990.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. STEVENS. On his time.

Mr. MELCHER. Yes, for my question on my time.

Mr. STEVENS. Yes.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MELCHER. Mr. President, I thank the Senator for yielding to me, but, first of all, I must point out if the cruiser he is talking about is in a multiyear contract——

Mr. STEVENS. It may or may not be.

Mr. MELCHER. This would have no effect.

Mr. STEVENS. Mr. President, if we could have unanimous consent that we charge the time to one another as we use it, therefore, we will not have an argument each time. Mr. President, I think this dialog would be helpful——

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

Mr. MELCHER. Mr. President, as I understand, the request is that we charge each other for the time we use; is that right?

The PRESIDING OFFICER. The Senator from Montana is correct.

Without objection, it is so ordered.

Mr. STEVENS. Let me say to my friend that we do not have multiyear contracts on all appropriations but we do fully fund some items and they represent the bulk of the funds that are unobligated at the end of each year, and to have a concept in this bill that does not deal with appropriations, to say that the moneys to be used to fund this bill are to come from the unobligated accounts on September 30 is in effect to prejudge the appropriations bill that has not even been marked up.

I understand what the Senator is doing and if at the time we bring the appropriations bill here he wants us to reach out and find the unobligated balances that represent savings—and I would call the Senator's attention to the fact that last year I did that with $6.7 billion and put them into a special fund, and that fund was used and it represented savings from the past and future years, I might add.

□ 1120

We have now used that to absorb $1.5 billion for the shuttle. This Senate initiated the full use of that in the supplemental appropriations.

I say respectfully to my friend that this is not the place, because this is not an appropriations bill. This is an authorization bill.

This authorization, incidentally, represents about two-thirds of the money that will be spent in 1987. One-third represents the amount that will be spent by prior years' authorization, and that money is outlays. As we consider budget authority, we have one ceiling; and as we consider budget outlays, we have another ceiling. This amendment deals with budget authority on budget outlays, and I think it is improper.

Mr. WARNER addressed the Chair.

Mr. MELCHER. Mr. President, will the Senator from Virginia permit me to respond to the Senator from Alaska?

The PRESIDING OFFICER. The Senator from Montana is recognized on his time.

Mr. MELCHER. Mr. President, I should respond to the Senator from Alaska exactly at this point.

He says that if I want to bring an amendment on the appropriation bill, that will be OK. I must inform the Senator from Alaska that if I offer an amendment on an appropriation bill, as I did last year, to accomplish the point he is talking about, that amendment will be ruled out of order as legislation on an appropriation bill. I attempted to do this very thing last year and I could not do it because it was ruled to be legislation on an appropriation bill.

This is the only bill on which the Senator or any other Senator on the floor can offer this, to either the authorization bill or the appropriation bill, to accomplish what I am trying to accomplish.

The Senator from Alaska says that one-third of it is necessary to be available under the process that we follow of budget authority versus budget outlay. I point out to the very able Senator from Alaska that more than one-third of this $6 billion slush fund will be available. I am only taking 20 percent.

I reserve the remainder of my time.

Mr. STEVENS. Mr. President, I hope Members will see what I am talking about.

This says: "Notwithstanding any other provision of law or of this act."

I am always suspicious of that—not suspicious of my friend. That means disregard the whole United States Code. That means that specific moneys we have authorized for tanks or planes or cruisers or aircraft carriers, whatever it is, that we know will not be spent in 1987, the moneys that are still unobligated on September 30, 1986, we are going to reduce that amount by 20 percent. We do not know where it will come from, but we will take 20 percent of them.

Then, this amendment directs that the Appropriations Committee take into account that that 20 percent which has already been appropriated will be used in 1987.

It may seem strange to other Members of the Senate, but we do not fund bridges the way we fund ships. When we say we are going to build a ship, we forward fund it. We take into account a projection for inflation, and that money is there for 5 years. I can tell you that on September 30, 1986, there will be a lot of that money unexpended and unobligated, and it should not be touched because it has been committed by law.

Mr. WARNER. Mr. President, the managers are anxious to move the bill along, and we are going to yield back the time we have on this amendment very shortly.

Fortunately, we have one of the greatest authorities in the U.S. Senate who has some remarks to make on this matter, and I yield now to the Senator from Mississippi.

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. STENNIS. Mr. President, I appreciate the fine work of the author of this amendment. He usually does a good job. I believe he is on the wrong track here.

I remember when we had the system in the Armed Services Committee whereby we just appropriated for a ship what we thought they could use for that year.

Harry Byrd, Sr., was on the committee, and he raised cain. We know his record of honest conservatism.

We finally adopted what is called full funding as to ships and other costly military items. That is, instead of piling them up on the books—so many tanks and so many ships—you had to appropriate the money when you started off on the project.

That is good old common horse sense, anyway. I suppose it was 15 or 20 years ago that we finally adopted that method. That is the method we are following today, although times have changed greatly. But we are maintaining under this system what I would call the integrity of these purchases and these large costly ships and other items we use.

You can get a ship started, but if you do not have the money provided in advance, when you get to where you want to put the arms on it, you have no money to buy them, and that ruins the whole thing.

For that reason, I think it is highly important that we stick to the system.

Mr. WARNER. Mr. President, I thank the distinguished Senator from Mississippi. He has summarized, along with the Senator from Alaska, the precise points the opposition wishes to make.

Senator STENNIS used the example of the full funding principle for ships, but it applies to missiles, tanks, and all other forms of military equipment.

I urge the Senate not to go back to the way it was done many years ago.

Mr. President, I understand that two Senators wish to join in speaking in opposition. I yield first to the Senator from Nebraska for 2 minutes, and then the Senator from New Mexico will follow for another 2 minutes.

Mr. EXON. I thank the Senator from Virginia for yielding.

Mr. President, I associate myself with the remarks made by the Senator from Alaska and the Senator from Mississippi, with this reservation: I believe that the Senator from Montana is entirely proper in offering this amendment on this authorization bill, but I think it should be defeated on its merits and not on whether or not it should be delayed until some other time, on an appropriations bill.

I think the key thing is this: There is complication and misunderstanding between budget authority and budget outlays. Budget authority is good and proper because it sets long-term limits on what we are going to spend.

□ 1130

For example, I am sure the Senator from Montana will say this is not what he is necessarily aiming at, but it would hurt an important program such as the D-5 missile which will go on the D-5 Trident submarine. That is not going to be launched until the 1990's, but we have that in the budget authority, and I am quite certain that the D-5 missiles have not yet come under contract but they will be as this program moves along.

Therefore, as true as it is, as the Senator from Montana has said, we are going to have to reduce our overall military spending. I think to do it in a fashion with only 20 minutes of equally divided debate destroys the whole authorization, the appropriation process and does not allow us to let the committees who have jurisdiction in this area to properly work.

I yield back any other time that I might have to the Senator from Virginia.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I, too, do not quibble with the right of the distinguished Senator from Montana to offer this amendment.

But let me say to the Senate, if someone wants to attack the unobligated balances in the Department of Defense, then it seems to this Senator he ought to go get a list of them and then put them here before the Senate and say "We want to take 20 percent of this unobligated balances" and list them.

I think you would be amazed with what you find. Clearly, you would find multiyear contracts that are halfway completed, but you might even find single-year contracts; you might even find some 4-months contracts the way this is written, because as of September 30 of this year you take 20 percent of unobligated balances.

We know what is in there. We ought to tell the Senate. If someone is serious about this, we ought to send off and get a list of the unobligated balances.

There are all kinds of things that everybody is for. This is not the way to cut the Defense Department. This is the way to perform some kind of surgery that is absolutely absurd because nobody knows what it will do. This does not mean unobligated balances; does not mean that it is not allocated to something that the U.S. Congress has overwhelmingly voted for. We just have not allocated it yet because of the contract, because of timing, because of negotiating or because you are in the midst of a multiyear contract.

So I urge the Senator if he is serious about restraining defense further, we are restraining it dramatically. As a matter of fact, we can hardly restrain defense any more and, nonetheless, the deficits are not going down, not because of defense, but because of other things, because we are spending in other areas or because we are not collecting the taxes that we expected.

So I urge that we be reasonable. If we do not like unobligated balances let us do something about analyzing each one and telling our appropriators to decide whether it is unneeded or not.

The overwhelming percentage will be spent for things we voted for. This is an accounting method to call it unobligated balances. What will this do to the Defense Department? We do not even know how many contracts will they have to cancel, how much procurement that they have to stop that we are for that we are unequivocally for, perhaps for by ratios of 10 to 1.

I yield the floor.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Montana.

Mr. MELCHER. Mr. President, I wish to answer the distinguished Senator from New Mexico, the chairman of the Budget Committee.

First of all, under the amendment, the Defense Department would determine which of the programs would be slowed down slightly. The fact is that the funds that are unobligated have been growing and growing very rapidly. To increase from $24 to $25 billion in 1981 to $60 billion at the end of this fiscal year in unobligated funds is a rapid growth.

Mr. DOMENICI. Mr. President, will the Senator yield?

Mr. MELCHER. Yes; under the terms we have.

Mr. DOMENICI. I want to make an observation. Obviously, unobligated balances in the past 5 years have grown because we have decided to rebuild the defense establishment and we are spending more money on contract things and obligating more and more money because of what we have decided to do.

It has to happen. If it did not happen, we would not have approved or built up any programs.

Mr. MELCHER. Mr. President, these are unobligated funds. I am only dealing with unobligated funds, the so-called slush fund.

There are savings that must be made. The savings must be made

somewhere in the defense establishment.

We do not do anything about multiyear contracts. They are already obligated. We are not going to touch multiyear contracts. They are not affected. The Secretary of Defense will make the determination.

I have no quarrel at all with the full-funding concept. As the Senator from Mississippi correctly stated, it is what was needed.

What I am saying in the amendment is that here is an area where we can afford because there is inflation, because there has been overappropriations, because there has been at times some management that you could call lax or unavoidable, that allows unobligated funds to grow, that for all of these reasons we permit the Secretary of Defense to select what is absolutely essential, but we reduce the amounts of the unobligated funds.

Mr. President, I retain the balance of my time.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. I yield 30 seconds to the Senator from Nebraska and 30 seconds to my good friend from Michigan, and then I reserve 1 minute to myself.

The PRESIDING OFFICER. There is a minute and a half remaining.

The Senator from Nebraska is recognized.

Mr. EXON. With all due respect to my able colleague from Montana, it is not fair to call these slush funds. They are not slush funds.

I go back to the example I cited a few moments ago. We are in the process of building important missiles to our deterrent Trident submarines. Some of this money called slush funds that I am sure the Senator from Montana is referring to would be to buy the missiles that have to go in the Trident submarine in the early 1990's.

I simply say it is not a slush fund, and I hope that his amendment is defeated.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. I thank the Chair and the Senator from Virginia.

Mr. President, to say funds are unobligated is not to say they are not needed. These are not unneeded funds being cut arbitrarily. In many cases these are the most needed funds we have in the whole budget.

For instance, we say put $1 billion in for an aircraft carrier. Some of that has not been obligated. The radar has not been obligated because it only takes a year to build a radar, but it takes 5 years to build the aircraft carrier. Do we throw out the radar arbitrarily? No.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I just follow-on with the distinguished colleague from Michigan when we, the Congress of the United States, authorize a ship, an account is set up, a line item. The ship is full funded. Each year the Secretary of the Navy draws against that account as the ship is built or in the case of the tanks, 840 tanks this year, an account is established for 840 tanks and as each tank is finished during the course of several years the money is expended.

The PRESIDING OFFICER. The time of the Senator from Virginia has expired.

Mr. WARNER. Mr. President, I move to table——

The PRESIDING OFFICER. The Senator from Montana still has 3 minutes and 8 seconds remaining.

Mr. WARNER. Mr. President, I apologize. I was informed he yielded back his time.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MELCHER. Mr. President, the long and short of this is there has to be cuts on this bill. It is over budget both in outlays and in authorization.

The amendment would bring down this budget authority in the bill enough so it does satisfy the budget requirements. It would not make it right for budget outlays. But it would get us about halfway there. That is so much for our budget.

The fact is that we are facing the possibility of sequester, further reductions, which would have to be made across the board.

If we want to make some savings and we must make some savings, this is, I believe, the most practical area to make it in this bill.

If we are going to have a rapid pace, for instance, in buying tanks, the Department of Defense can then make the decision—do they want to slow down procuring so many tanks, or do they want to slow down procuring so many missiles. They will make the decision. But the decision has to be made.

Our responsibility here in Congress is to direct in which way these savings should be made.

This, I believe, is the best way. I hope the amendment can be adopted by the Senate.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

Mr. GRAMM. How much time do we have remaining?

The PRESIDING OFFICER. All time has been yielded back on the amendment of the Senator from Montana.

Mr. WARNER. Mr. President, I move to table, and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second.

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Under the previous order, the vote on the first amendment will occur after 20 minutes of debate on the second amendment by the Senator from Montana.

AMENDMENT NO. 2607

(Purpose: To reduce authorization of appropriations for Research, Development, Test and Evaluation)

Mr. MELCHER. Mr. President, I send my second amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana [Mr. MELCHER] proposes an amendment numbered 2607.

Mr. MELCHER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Notwithstanding any other provision the figures on the following pages are deemed to be the following:

On page 10, line 24, "$4,093,318,650" in lieu of "$4,815,669,000".

On page 11, line 2, "$7,875,571,300" in lieu of "$9,265,378,000".

On page 11, line 3, "$12,672,542,050" in lieu of "$14,908,873,000".

On page 11, line 4, "$6,214,327,900" in lieu of "$7,310,974,000".

□ 1140

Mr. MELCHER. Mr. President, this second amendment goes directly to research and development funds for the Armed Forces. We are frequently asked by taxpayers, Why is defense spending so high, and what can be done to reduce it?

What can be done to reduce it, in my judgment, Mr. President, is to take on the proposition at the very start of weapons procurement, and that will have to be in research and development.

For each of the Armed Forces, this amendment would reduce the amount available as authorized under this bill. It is a 15-percent cut reduction, a 15-percent savings, which adds up to about $6 billion. Since spending cuts are absolutely essential, this is, I believe, an area to take part of those cuts from.

We cannot reduce troop levels, I do not believe, because of our commitments at home and abroad for our own national defense and for cooperation with our allies around the world. We cannot reduce readiness and should not reduce it.

Therefore, the place to make the cuts is right head-on, right where they start, where the weapons procurement system starts. It is called research and development, and that is where I suggest that we make those cuts in this amendment.

Mr. President, I reserve the balance of my time.

Mr. NUNN. Mr. President, I will be very brief. This is an across-the-board cut in the research and development account. We are going to have to make some cuts in the conference. Everyone knows that. We have been up front. We have been honest. We have told the people this bill is over the ceiling.

But this is an across-the-board cut in all the conventional research and development. Our committee has tried to beef up that conventional research and development. We have had some very serious cuts in some of the independent agencies, particularly DARPA, the Defense Advance Research Projects Agency, has had something like an 11-percent cut last year under the Gramm-Rudman distribution that took place in February.

We also had a report from the Defense Science Board that the United States is behind the Soviet Union in armor warfare and antiarmor warfare. We know we have a serious quantitative disadvantage in the military force. We have got to compensate for that in the wise use of technology.

We are not always in the position of saying we are using that technology wisely, but the research and development funds are the very area where we could have some advantage over the Soviet Union and the Warsaw Pact.

So we would oppose this amendment. We are going to have to make cuts in the conference committee. But this is just straight across the board and we hope we can have a lot more discretion in choosing and picking from higher priority programs. I urge my colleagues not to make this across-the-board cut.

Mr. WARNER. Mr. President, I join the Senator from Georgia. We in the committee already took out $5.6 billion. By taking out another $5.4 billion, that would result in an $11 billion taking and a total reduction of 25 percent from the request of the administration.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 8 minutes and 15 seconds remaining.

Mr. NUNN. I yield whatever time the Senator from Maine may desire.

Mr. COHEN. I will just take a couple of minutes.

Mr. President, this is sort of typical of what happens during the course of debate on a defense budget. People get up day after day and add program after program—a half billion dollars here, $200 million there, another $300 million for this program—and during the final moments of the debate they are going to say, "We are spending too much for defense. Let's just have a cut across the board, but don't touch personnel. We don't want to do that. Don't touch O&M, operations and maintenance. That is not the way to go. Don't touch the existing weapons systems. Let's cut R&D across the board," the one area we have to put more money into if we are going to try to overcome the conventional deficiencies that we currently suffer from.

Everyone recognizes we cannot match the Soviets tank for tank, man for man, in a NATO versus Warsaw Pact confrontation. Technology is the one thing we have to compensate for our conventional deficiencies.

So this is the very area we have to do more, not less, in. The suggestion of the Senator from Montana, that the way to save money is to take an arbitrary meat-axe, across-the-board cut in R&D, would jeopardize our national security for the future and not improve it.

Mr. WARNER. Mr. President, I yield such time as the Senator from South Carolina desires.

Mr. THURMOND. Mr. President, of all the programs that should not be reduced is research and development. It is because of research and development that we are able, through radio, to get words through the air; to view pictures that come through the air. Because of research and development, we were able to put a man on the Moon. Because of research and development, we have been able to develop a new Army tank that can compete with the Soviet tanks. Because of research and development, we have been able to develop intercontinental missiles to combat those of the Soviets.

If there is anything important in defense, it is research and development. Not only has research and development benefited the Defense Department, the benefits of that research have gone to civilization in many other ways. It has been beneficial to our country.

By all means, I think it would be a great mistake to cut across the board this research and develoment. I hope that this amendment will be defeated.

Mr. WARNER. Mr. President, I yield such time as the Senator from Texas desires.

Mr. GRAMM. Mr. President, how much time remains?

The PRESIDING OFFICER. The manager has 5 minutes and 30 seconds.

Mr. GRAMM. Mr. President, we will have two amendments before us to vote on. The first amendment shows absolutely no understanding of the procurement process. This amendment picks one day during the year and says that whatever funds have not been obligated that day constitute a slush fund. Funds appropriated for a purpose for which no contracts have been signed are unobligated balances. We can't sign a contract the day Congress provides funds. The amendment shows a total lack of understanding of anything related to procurement. Unfortunately, it confuses people into thinking we have got all this money sitting out there in a slush fund. I think that is unfortunate.

But to propose cutting the funds that we have set aside on an unobligated basis to pay for procurement is just absolutely absurd policy.

The second amendment would be more appealing to me if the Senator said what he wanted to cut. We have to use across-the-board cuts at the end of the budget process in something like Gramm-Rudman if Congress will not do its job because we cannot have anybody else come in and set priorities if Congress will not set them.

But if the Senator really wants to cut something, let him tell us what he wants to cut. Do you want to cut R&D for the D-5 missile? Do you want to cut R&D for the advanced technology bomber? Do you want to cut R&D for the C-17?

We have already cut R&D by $5.5 billion. But we did not say we are cutting R&D by $5.5 billion. We took the list and we went down the list and we let people choose.

If the Senator had offered an amendment like that, I would give it serious consideration. I do not consider this to be a serious amendment.

Mr. MELCHER. Mr. President, I will answer the Senator from Texas right at this point and state that I would prefer that either the committee make the cuts or the Defense Department make the cuts. This is exactly what this amendment does. Since the committee has not come in under budget, it has come in over budget, this amendment permits the Defense Department, the Secretaries of the Air Force, the Navy, and Army, to suggest where the cuts will be made.

It is obvious that cuts are necessary. This gives them the leeway to make those cuts since the committee has not made the cuts.

Mr. President, I retain the balance of my time.

Mr. MELCHER. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes and 20 seconds.

Mr. WARNER. Mr. President, I yield back the balance of our time.

Mr. MELCHER. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 7 minutes and 17 seconds.

Mr. WARNER. Mr. President, I shall not use all of that time. I will use 2 or 3 minutes now and yield back the balance so we can get on with the vote.

But first of all let me say that on the question of whether or not we are meeting our responsibility, to come in with authorizing bills and appropriations bills that are within the budget is a clear responsibility.

It makes it absolutely essential we do that, and particularly for Defense, or we will have sequestering and across-the-board cuts in every category. We will have no choice then. So this type of amendment, as well as the previous amendment, are sensible and logical amendments to be taken up, and I hope voted affirmatively.

There is $36 billion in research and development in this bill. We have been running about at that pace for the past several years, between $36 billion and $38 billion in research and development for the Armed Forces. It is the area where the Pentagon spending has increased most dramatically and the most rapidly in proportion to all other areas. That is saying a lot.

We ask the Air Force or the Navy or the Army, "How much more can you use," the answer will be always, "Yes, we could use more; we have these needs, these requirements, these things we would like to do." When cutting is necessary, you have to select the proper place to cut. On weapons procurement, new weapons systems, this is a proper place to cut. The committee has not made the bill come in at a level that is within the budget. Somebody has to do something. I am saying in this particular amendment since it is over budget, since it is too high, we will allow the Secretaries of the respective forces to make their decision on where it would be cut.

I hope this amendment as well as the previous amendment can be adopted.

Mr. President, I yield back the balance of my time.

Mr. WARNER. Mr. President, I move to table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

MOTION TO TABLE AMENDMENT NO. 2672

The PRESIDING OFFICER. Under the previous order the vote will occur first on the motion of the Senator from Virginia to lay on the table the first amendment of the Senator from Montana.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Vermont [Mr. STAFFORD] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON] is necessarily absent.

The PRESIDING OFFICER (Mr. TRIBLE). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 89, nays 8, as follows:

[Rollcall Vote No. 200 Leg.]

YEAS—89

| | | |
|---|---|---|
| Abdnor | Glenn | McClure |
| Andrews | Goldwater | McConnell |
| Armstrong | Gore | Mitchell |
| Baucus | Gorton | Moynihan |
| Bentsen | Gramm | Murkowski |
| Biden | Grassley | Nickles |
| Bingaman | Hart | Nunn |
| Boren | Hatch | Packwood |
| Boschwitz | Hatfield | Pressler |
| Broyhill | Hawkins | Quayle |
| Bumpers | Hecht | Riegle |
| Byrd | Heflin | Rockefeller |
| Chafee | Heinz | Roth |
| Chiles | Helms | Rudman |
| Cochran | Hollings | Sarbanes |
| Cohen | Humphrey | Sasser |
| Cranston | Johnston | Simon |
| D'Amato | Kassebaum | Simpson |
| Danforth | Kasten | Specter |
| DeConcini | Kennedy | Stennis |
| Denton | Kerry | Stevens |
| Dixon | Lautenberg | Symms |
| Dodd | Laxalt | Thurmond |
| Dole | Leahy | Trible |
| Domenici | Levin | Wallop |
| Durenberger | Long | Warner |
| Evans | Lugar | Weicker |
| Exon | Mathias | Wilson |
| Ford | Matsunaga | Zorinsky |
| Garn | Mattingly | |

NAYS—8

| | | |
|---|---|---|
| Burdick | Melcher | Proxmire |
| Harkin | Metzenbaum | Pryor |
| Inouye | Pell | |

NOT VOTING—3

| | | |
|---|---|---|
| Bradley | Eagleton | Stafford |

So the motion to table amendment No. 2672 was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. MATHIAS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. Mr. President, the next vote will be a 10-minute vote. Let me alert my colleagues on both sides that we are going to try to stick to the 15 minutes and maybe have some other 10-minute votes. A lot of people are anxious to leave at an early hour today, so let us try to keep the votes within bounds.

MOTION TO TABLE AMENDMENT NO. 2607

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Montana [Mr. MELCHER]. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Vermont [Mr. STAFFORD] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 93, nays 4, as follows:

[Rollcall Vote No. 201 Leg.]

YEAS—93

| | | |
|---|---|---|
| Abdnor | Goldwater | McConnell |
| Andrews | Gore | Metzenbaum |
| Armstrong | Gorton | Mitchell |
| Baucus | Gramm | Moynihan |
| Bentsen | Grassley | Murkowski |
| Biden | Harkin | Nickles |
| Bingaman | Hart | Nunn |
| Boren | Hatch | Packwood |
| Boschwitz | Hawkins | Pell |
| Broyhill | Hecht | Pressler |
| Bumpers | Heflin | Pryor |
| Byrd | Heinz | Quayle |
| Chafee | Helms | Riegle |
| Chiles | Hollings | Rockefeller |
| Cochran | Humphrey | Roth |
| Cohen | Inouye | Rudman |
| Cranston | Johnston | Sarbanes |
| D'Amato | Kassebaum | Sasser |
| Danforth | Kasten | Simon |
| DeConcini | Kennedy | Simpson |
| Denton | Kerry | Specter |
| Dixon | Lautenberg | Stennis |
| Dodd | Laxalt | Stevens |
| Dole | Leahy | Symms |
| Domenici | Levin | Thurmond |
| Durenberger | Long | Trible |
| Evans | Lugar | Wallop |
| Exon | Mathias | Warner |
| Ford | Matsunaga | Weicker |
| Garn | Mattingly | Wilson |
| Glenn | McClure | Zorinsky |

NAYS—4

| | |
|---|---|
| Burdick | Melcher |
| Hatfield | Proxmire |

NOT VOTING—3

| | | |
|---|---|---|
| Bradley | Eagleton | Stafford |

So the motion to lay on the table amendment No. 2607 was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

□ 1220

Mr. ANDREWS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. ANDREWS. Mr. President, I have an amendment at the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

Mr. NUNN. Mr. President, will the clerk suspend, and will the Senator yield to me for a brief observation while we have Senators on the floor?

Mr. ANDREWS. I am more than happy to if it does not come out of the time allotted we may have.

Mr. NUNN. Mr. President, I ask unanimous consent at this time that time not be charged to either side. Mr. President, for the information of Senators who may have other conferences going on, it is apparent to me that this amendment will take about 40 minutes. Then we have a Simon amendment, if the Chair recognizes the Senator from Illinois next, and that one will take about 30 minutes.

I do not know whether the Senator from North Dakota would be willing to stack votes after his debate. If he would be willing to do that, we could debate the Andrews amendment, then

the Simon amendment, and then have perhaps a 15-minute, 10-minute rollcall as we did on the last two, if the Senator would be willing to do that.

Mr. ANDREWS. The more you get away from the debate, might I point out to my colleague, the less chance the amendment has, but I am interested in preserving the time of the Senate. I might even take less than 40 minutes. I would rather take 30 minutes and debate it and have the vote at the end of the debate.

Mr. NUNN. I can inform my colleagues then that apparently we will have a vote somewhere in the neighborhood of about 1 o'clock. Then we would, say, 15 minutes and at 1:15 we would start, if the Chair recognizes the Senator from Illinois, on the Simon amendment, have a 30-minute debate on that and probably have another vote shortly before 2 o'clock.

Then it would be our preference—again it depends on the Chair's recognition; we do not control that—it would be our preference to take up two amendments by the Senator from Arkansas [Mr. BUMPERS], followed by an amendment on MilCon by Senator FORD, followed by a Byrd amendment on the advanced technical bomber.

We could have debate on all of those amendments. I think all of those will require rollcalls.

Now, after we leave those amendments, the rest of the list it seems to us we can work out. It is going to take some time to work them out, but they should not require that many rollcalls. But then we also have the debt ceiling and we have final passage so that gives our Members some idea of where we are.

It seems to me, if I could just venture this, that if everyone cooperates and we move everything expeditiously, we could be through at least with this bill somewhere in the neighborhood of 5, 5:30, 6 o'clock.

The PRESIDING OFFICER. The Senator will suspend for a moment. Senators should be advised that under the unanimous-consent agreement agreed to last evening, Senator ANDREWS' amendment is limited to 20 minutes equally divided.

Mr. NUNN. Mr. President, I believe that was a mistake and I believe that it was on my part. I think they had asked for 40 minutes and the unanimous consent was propounded for 20 minutes. So I would ask unanimous consent that if it is satisfactory for both sides, it be 30 minutes instead of 20 minutes equally divided between the proponents and opponents.

The PRESIDING OFFICER. Is there objection? Without objection it is so ordered.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Democratic leader.

Mr. BYRD. I just want to say to the distinguished managers of the bill that I do have a national trade amendment which I may want to call up prior to the Stealth, B–1 amendment.

Mr. NUNN. I thank the Senator from West Virginia.

Mr. BYRD. And I think there would be a rollcall vote.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. That last vote took about 10½ minutes. We were right on the money. We are going to try to keep the votes at 15 minutes. So I would say to all my colleagues—and I know it may be a little hard on the Senate conferees on the tax bill because they are some distance away—we are going to try to keep the votes to 15 minutes and that will make all of us happy, particularly the Senator from Arkansas [Mr. PRYOR].

Mr. PRYOR. Mr. President, now that my name is evoked in this debate, if the majority leader will yield just a moment, most of this week—and I say this respectfully—most of our rollcall votes seem to be taking about 25 minutes. And I would just like to say, why, in the name of common sense and in the interest of getting out of here at a reasonable time, could we not have 10-minute rollcall votes on all amendments and on all issues? I know that the Senator says the tax conferees are meeting somewhere else, but maybe they could come over here and accommodate us a little bit. I just respectfully suggest that we could probably save 1 or 1½ hours today if we could limit those votes to 10 minutes.

Mr. DOLE. Let me confer with Senators PACKWOOD and LONG the next time they come to vote—we will keep the next one at 15—and if it is all right with them, I will make that request.

□ 1230

The PRESIDING OFFICER. The pending business is the Wilson amendment.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the Wilson amendment be set aside for the consideration of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Dakota is recognized.

Mr. KENNEDY. Mr. President, will the Senator from North Dakota yield to me for a statement, without the time being charged against him?

Mr. ANDREWS. If the Senator is asking unanimous consent that I yield 3 minutes without the time being charged to my time, I have no objection.

The PRESIDING OFFICER. Time does not begin to run until the amendment is reported.

Mr. KENNEDY. I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

## URGING THE SOVIET UNION TO CONTINUE ITS NUCLEAR TEST MORATORIUM

Mr. KENNEDY. Mr. President, both the Senate and the House of Representatives have now sent an unmistakable signal to the Reagan administration that the time has come for a new effort to achieve an end to nuclear testing.

On Wednesday, the Senate called on the administration to begin immediate comprehensive test ban negotiations with the Soviet Union and to ratify two other long-dormant treaties which limit the size of nuclear explosions. On Friday, the House of Representatives passed legislation to cut off funds for all but very low-yield United States nuclear tests after January 1, 1987, so long as the Soviet Union agrees to the same threshold and accepts a seismic monitoring network within its borders to verify the test limits.

For the past year, the Soviet Union has observed a unilateral moratorium on nuclear tests, and many of us in Congress have urged, to no avail, that President Reagan should reciprocate. The Soviet moratorium, after two extensions in the past year, was scheduled to end on August 6, the anniversary of Hiroshima, and it is far from certain that the Russians will agree to a further extension in the face of the Reagan administration's adamant opposition.

It is now certain that President Reagan will be asked to sign legislation that contains strong measures in support of efforts to achieve a comprehensive nuclear test ban with the Soviet Union.

I therefore urge the Soviet Union not to resume nuclear testing in the face of these unprecedented actions by Congress. Resumption of testing would do serious damage to the long-awaited possibility of progress in this essential area of arms control. I hope that the Soviet Union will announce its intention to continue its moratorium so long as there is a realistic chance that the Reagan administration will acquiesce in the will of Congress.

I also urge President Reagan to recognize the mandate that is building in the Congress and in the country for a treaty banning all nuclear tests. Such a treaty has been a top arms control priority of every administration since Eisenhower—and now, at a time when the technology for verification is indisputable, at a time when the Soviet leadership is receptive, it would be irresponsible for the United States to say no.

## NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

The Senate continued with consideration of the bill.

AMENDMENT NO. 2610

(Purpose: To delete the requirement relating to purchase of alcoholic beverages for resale)

Mr. ANDREWS. Mr. President, I call up my amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Dakota [Mr. ANDREWS] proposes an amendment numbered 2610:

On page 203, strike out lines 1 through 13.

The PRESIDING OFFICER. The Senate will be in order. Senators are asked to take their seats.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the names of Senators ABDNOR, BURDICK, INOUYE, and NICKLES be added as cosponsors of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, let me summarize very briefly, because I do not want to take too much time on this amendment. We have a number of amendments to consider.

This amendment is to put back into place the alcochol beverages provision that is now law. We had a recorded vote in the Senate last December, and 66 Senators voted for our amendment; 29 voted against it. It is now the law of the land.

In constructing the bill before us, they removed it. The alcohol provision is very simple. It says that on our several military bases around the Nation, if they are located within a State, they must purchase their alcoholic beverages from wholesalers within that State, so that they pay the appropriate local and State taxes. It is really a local protection act more than anything else. It is the law of the land, and it is working well.

Mr. President, my colleagues will be interested in the fact that 31 Governors support this amendment; four are noncommittal; 15 Governors gave no response. So not only have 56 Senators voted on a recorded vote for this amendment, with only 29 opposing, but no Governor of the 50 Governors opposes it, on the basis of a letter from Governor Clinton to his colleagues in the National Governors Association. Thirty-one positive; 15, no reponse; 4, noncommittal.

Following that brief summary, I point out that section 8099 places some necessary restrictions on the ability of the Department of Defense to procure alcoholic beverages. It says that none of the funds appropriated could be used to procure alcoholic beverages except within the State where the military installation is located. In other words, these bases then become good neighbors. They are paying the appropriate tax on the alcoholic beverages, and that is used to police the potential misuse of alcoholic beverages. They are not paying more for the drinks.

Before Congress adopted section 8099, the Department of Defense was preparing to waste millions of the taxpayers' money in order to build its own alcoholic beverages distribution system. This alcoholic beverages distribution system would purchase alcoholic beverages from central sources rather than from established, in-State sources, and fly it in on military aircraft. We addressed the issue in the Senate last December. Local option won. Despite that rather clear statement by the Senate, the Armed Services Committee has included a provision, section 1205, in the fiscal 1987 authorization bill to repeal this section.

The opponents say that DOD will lose over $10 million in lost profits as a result of it; that since such profits are used to help morale, welfare, and recreation activities, the lost profits come directly out of the soldiers' pockets. That is baloney. It is not true.

Section 8099 does not mandate lost profits. It merely states that the military bases should purchase from in-State sources. The section only affects wholesale prices, not retail profits.

It is misleading for the DOD to claim lost profits when it fails to include hidden taxpayer's subsidies in the example. Examples of hidden taxpayers' subsidies regarding military sale of alcoholic beverages include the construction of the facilities, the warehouse, the transportation of alcoholic beverages, the ordering of different brands and sizes and quantities.

With an administration that advocates New Federalism for privatization, does it make sense for the DOD to enter into competition with services in our States by the private sector?

I believe that DOD should concentrate on military matters and not get into an alcoholic beverages pipeline for the central purchasing in the avoidance of local State taxes.

I do not want to take up any more time of the Senate, because we have a number of important issues to address.

I reserve the remainder of my time.

Mr. WILSON. Mr. President, I yield to the junior Senator from Texas 5 minutes of our time.

Mr. GRAMM. Mr. President, let me first set the issue straight in terms of what our record is on this amendment.

The Armed Services Committee in conference last year rejected this proposal as an outright rip off of the American soldier. It is a proposal that prevent competition and denies benefits to the people who serve in the military, who bear the burden of defending the free world and who keep Ivan back from the gate.

The Appropriations Committee in a rider, legislating on an appropriation bill, put in this provision. It was discussed at a late hour in the debate. The distinguished majority leader had announced that he would table all amendments to expedite adjournment. The provision was raised by the distinguished Senator from Ohio and it was defeated not on its merits but by the clock.

The issue here is a simple issue. We currently have a provision where the military, through the NCO and Officers Club and through purchases on bases, goes out and competitively bids for beer, wine, and other types of alcohol. They seek the best price they can find.

Under existing law, Mr. President, beer cannot be sold on a military base for any less than 10 percent below what is being sold on the local market. Competitive purchase under this system generates a substantial earning. That earning is, in turn, used for drug and alcohol abuse programs, it is used for child care, it is used for libraries, it is used for physical fitness centers and other forms of quality of life programs for our service personnel.

As to the argument that military bases ought to be good neighbors, I would like to say, Mr. President, that from the beginning of the Republic, communities have tried to get the Army to come out and open bases in their area. They begged the Army to come and protect them from the Indians, to promote the local economy, and once they are there they try to rip them off every single day.

This amendment is no different than the medicine dealers outside the first Army post that was built on the frontier. This amendment is a backhanded way to tax items sold on military bases which the Supreme Court has always denied. It is a way to prevent competition and deny the benefits received through competitive purchase.

Obviously, we all know Governors are for this. They want money. We know local alcohol distributors are for it because they want monopoly profits. But its not right.

I ask my colleagues to remember that our warriors do not have lobbyists. They are out working and sweating this afternoon, to be ready to defend the Republic, to keep Ivan back from the gate. Our job in the Senate is to see they are not forgotten.

I flatly reject the idea suggested by the Senator from North Dakota, that the military bases are not good neighbors. In fact, I am willing to say here and now that anybody who thinks he has a raw deal with a military base in his State, anybody who thinks that he is not getting a good deal because he cannot tax things sold on base, let me

help you. I will agree to allow any of these military bases to be moved to Texas.

The truth is that we all want military bases. We beg to get them. We use logrolling to bring them to our State and then we get them there, and many want to profiteer on them.

I know the beer distributors, the wine distributors, and the whiskey distributors want a local monopoly. They want to prevent competition. Who can blame them?

I urge my colleagues not to allow special interest to rip off the people who provide for our freedom. Do not allow funds that are going for quality of life and alcohol and drug abuse to be taxed away by government or to be siphoned away by people who want monopoly profits.

Local distributor can sell if they are competitive. Our program encourages local purchases if local prices are competitive.

I urge my colleagues, to defeat this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. WILSON. Mr. President, how much time remains to the opponents?

The PRESIDING OFFICER. Ten minutes remain. Five minutes has been consumed thus far.

Mr. WILSON. I yield 5 minutes to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, I strongly oppose the amendment of the Senator from North Dakota.

Section 1205 of the committee bill, which this amendment would delete, simply requires the Department of Defense and the military services to purchase alcoholic beverages for resale in DOD installations in the most efficient and economic manner, without regard to the location of the source of the beverage.

It may seem strange that we have to include a provision in our bill requiring DOD to purchase something "in the most efficient and economic manner." The reason the committee had to take this unusual step was because the fiscal year 1986 Defense Appropriations Act included a provision—(section 8099)—that had just the opposite effect: It required that all alcoholic beverages purchased with non-appropriated funds for resale on a military installation located in the United States be purchased in the State in which the military installation is located.

If I ever saw a special interest piece of legislation, Mr. President, this provision in last year's Defense Appropriations Act was it. Unfortunately, this amendment being offered today fits the same description, because it will continue to benefit alcoholic beverage distributors in every State and some of the State governments at the expense of important morale, welfare and recreation programs for our military servicemen and their families.

Today all of the military services sell alcoholic beverages in military package stores, in officer and enlisted clubs, and in military exchanges located on military installations. Under Defense Department policies, the prices in military package stores must be within 10 percent of the prices of local civilian commercial outlets to prevent unfair competition.

The profits from sales of alcohol in military package stores, like the profits from the military exchanges and officer and enlisted clubs, are used in supporting the morale, welfare and recreation programs in each of the military services. These important programs operate physical fitness centers, libraries, child care centers, outdoor recreation programs and other activities which exist to improve the quality of life for military members and their families.

In 1983, the U.S. Fifth Circuit Court of Appeals held that States cannot regulate where the military services purchase alcoholic beverages. As a result, the military services developed consolidated alcohol purchasing programs to buy in volume directly from the cost competitive source, regardless of location.

Since section 8099 of the fiscal year 1986 Defense Appropriations Act became law, however, the military services have been forced to purchase all of the alcohol for resale on a military installation within the State where the military installation is located.

Mr. President, this is terrible procurement policy, and flies directly in the face of all of the pressure Congress is putting on the Defense Department to increase competition in defense procurement. This provision has severely restricted competition because it has eliminated the military services' current ability to negotiate and purchase alcoholic beverages in volume from the most competitive source. According to the Defense Department, as a result of section 8099 of last year's Defense Appropriations Act, the military services' longstanding purchasing practices for alcoholic beverages have had to be replaced on an emergency basis; in-State sources have found it difficult to react to the sudden demands of military installations; and certain products are not even available in certain States. It is not surprising that we have all been hearing from the local alcoholic beverage distributors back home on this one; they know a good deal when they see it.

Mr. President, section 8099 of the fiscal year 1986 Defense Appropriations Act has also reduced the profits from military package stores and thereby reduced the amount of funds available each year to support morale, welfare, and recreation programs for our military members and their families. The Defense Department estimates that the requirement to purchase all alcoholic beverages in State will cost military morale, welfare and recreation programs $22 million this year from reduced package store profits. The potential out-year annual impact could go as high as $46 million in reduced profits.

Mr. President, this kind of money wouldn't be missed in a lot of defense hardware programs, but we are talking here about programs that have a direct and immediate impact on the day-to-day quality of life of military members and their families. Just to maintain the present level of morale, welfare and recreation programs, Congress will have to raise the level of appropriated funding for these activities—which is unlikely—or the military services will have to raise the current user fees and charges for these activities.

Finally, section 8099 of the fiscal year 1986 Defense Appropriations Act undermines the Federal Government's sovereign immunity from taxation by the States and provides an inequitable benefit only to certain States. Each of the 32 States where State-licensed, commercial distributors serve as wholesalers are able to collect alcohol beverage taxes from the military—and the Federal Government—on an indirect basis. But there are 18 States where the States themselves are the alcoholic beverage wholesalers and where the prices charged directly to the military cannot include State taxes because this would amount to illegal direct taxation of the Federal Government. These 18 monopoly States are not able to share in the windfall tax collections that would be enjoyed by the 32 license States.

Mr. President, I would ask the sponsors of this amendment if they want to force the military services to buy everything they use on a military installation within the State in which the installation is located? Why stop at alcoholic beverages? Why not extend this in-State purchase requirement to fuel, food, and every other commodity that can have an organized lobby come in here and knock on doors like the alcoholic beverage distributors have done?

Mr. President, the Armed Services Committee included section 1205 in the fiscal year 1987 defense authorization bill because section 8099 of last year's Defense Appropriations Act is a narrow, special interest provision that reduces competition; undermines the sovereign immunity of the Federal Government by subjecting it to mandatory indirect taxation by some of the States; and significantly reduces funds for important morale, welfare

and recreation programs for our military members and their families.

I urge any colleagues to support the committee position and oppose this amendment to delete the requirement for DOD activities to purchase alcoholic beverages in the most efficient and economic manner possible.

Mr. President, I agree strongly with the remarks of the distinguished Senator from Texas. I think he was right on target. I strongly oppose the amendment of the Senator from North Dakota.

What we provide for in the DOD is to purchase things in the most efficient and economic manner possible. Those criteria are supposed to guide the Pentagon.

Then we turn around and say in this case we do not mean it.

Why do we not go out and say every State buys its own tanks, buys all food within the State? Why do we not buy everything within each State?

What we want is to operate the Defense Department in the most efficient and economic manner.

If I ever saw a special interest piece of legislation, this is it. Of course, the beer distributors are for it and, of course, every Governor is for it. I guess they would be crazy if they were not.

These interests are doing this at the expense of service personnel will use the profit from these funds that would have gone to the morale, welfare, and recreational programs for servicemen and their families.

The profits from the sale of these things goes to support all of those different activities—fitness centers, libraries, child care centers, outdoor recreation programs, and other activities that exist to improve the quality of life for military members and their families.

In 1983, the U.S. Fifth Circuit Court of Appeals held that States cannot regulate where the military services purchase alcohol beverages. As a result, the military services developed consolidated alcohol purchasing programs like they do for everything else that is sold in the PX or bought for the military from the most competitive source, regardless of location.

And in the 1986 Defense Appropriation Act then when it became law, the military services are forced to purchase all of the alcohol for resale on the military installation within the State where the military installation is located. That is terrible procurement policy. It flies directly in the face of all the pressure Congress is putting on the Department of Defense to increase competition in defense procurement. It severely restricts competition.

I submit once again that if we are going to force the DOD to procure in this manner, then why not do the same thing for tanks, food, and everything else that we buy consolidated for the services and get a better deal on it because we can buy in quantity through one source?

So it is not surprising we have been hearing from the local alcohol beverage distributors back home. They know a good deal when they see it.

Section 8099 of the fiscal 1986 Defense Appropriation Act, as I say, undermines the Federal Government's sovereign immunity from taxation by the States and provides inequitable benefits only to certain States.

The distinguished Senator from Texas agrees to address the police cost involved in this issue.

Everybody fights to get these bases and then try to rip off the people once they are there by deals like this.

I close with this important thought. The Senate of the United States is, in effect, the last ditch trade association for the service personnel of this Nation. They do not have a union. They do not have a trade association. They do not lobby for themselves like other trade associations. We are the trade association for the service people of this country. It is up to us to represent them.

I think the proposal of the Senator from North Dakota is poor legislation and I oppose it and I presume that we would move to table at the appropriate moment.

Thank you.

The PRESIDING OFFICER. Who yields time?

Who yields time?

If no one yields time, time will be assessed against both sides.

Mr. WILSON. Mr. President, I yield 1 minute of our time to the distinguished Senator from Indiana.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. QUAYLE. Mr. President, time and time again, I have heard Senators on this floor stand up and say we need procurement reform. We have to make the Department of Defense more efficient and economic.

Let me tell you what this amendment is going to repeal. It is going to repeal the requirement that alcoholic beverages be purchased in the most efficient and economical manner. We are simply going to take procurement reform as we envision it to see more economic, more efficiency, and literally turn it on its head.

Pure and simple, Mr. President, there is simply a power grab for money. This is going to be procurement inefficiency. This is going to be away from what everybody says they want to do and that is to have the most efficient mechanisms in place for the Department of Defense.

I hope this amendment will be rejected.

The PRESIDING OFFICER. Who yields time?

Mr. ANDREWS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from North Dakota has 10 minutes remaining.

Mr. ANDREWS. Mr. President, let me point out and make it crystal clear that this amendment repeals nothing. There is a repealer amendment in the bill before us to repeal the present law.

Let me also point out that it is a lot more efficient to buy alcoholic beverages, which are heavy, from wholesalers in the State within which the base is.

Let me also point out that military personnel do not spend all their time on the base. The tax on the beer, the tax on the liquor, is used to help police people who have drunk a little too much, and if you want these military people to be traveling on the roads and you say the limited law enforcement in these smaller localities and smaller States, are not going to be able to get their tax revenues, then that is destroying the concept of local option.

Let us be perfectly frank about it. We have it now in place. It is working. It allows for competitive bidding among the several wholesalers within the State. It protects the States' power to police, which we all say we are interested in, and, as far as the welfare fund on the military post, they will continue in precisely the same way they are continuing now because that is the way it is being purchased now.

The difference, the profit that is made on each drink or in the sale of the six-pack or whatever else goes into this kind of a post fund, whether you buy from a wholesaler in Ohio or Texas and fly it in military aircraft, or whether you do it the way it ought to be done and you buy from a wholesaler within the State where the base is located. It makes sense.

I would hope that we can preserve this part of the law.

Mr. President, I yield 1 minute to my colleague from South Dakota.

The PRESIDING OFFICER. The Senator from South Dakota [Mr. ABDNOR] is recognized.

Mr. ABDNOR. Mr. President, I rise in support of the distinguished Senator from North Dakota, Senator ANDREWS, who has placed before you an amendment which would require the purchase of alcoholic beverages from local distributors. I wish to thank my distinguished colleague for his efforts on this bill.

Contrary to the arguments made against this provision, in-State purchasing allows ample opportunities for competitive contracting. In-State purchasing does not mean that closed contracts would be offered; it means that military bases would be offered the best price from those distributors wishing to service the military installation.

My colleagues must remember that the point of competition can be argued from both sides. The local business community is faced with the constant problem of bootlegging from the commissary stores. By nonmilitary personnel being able to purchase alcoholic beverages from individuals stationed on the base, the local business community loses revenues from those sales, and the State loses the tax that is not attached to commissary sales.

In-State purchasing helps to offset revenue lost due to bootlegging. It also means that each State with a military installation would gain tax revenue to support their communities. If the military opened alcoholic beverage purchasing to national competition, the States and local military communities would be denied an essential part of their tax base.

Considering the services that local communities provide to this Nation's military installations, it is only fair that these communities be provided with a way to fund these services. Our amendment assures that communities will receive support from their military installations.

Arguments that this amendment will lead to abuse are not well founded. If corruption is found due to the military's purchasing from local distributors, normal defense contracting procedures could be implemented to curb the abuse.

It has always been my belief that the military should support the local business community whenever possible. With the case of alcoholic beverage purchasing, it makes more sense to purchase from the local distributor and support the tax base of that State instead of spending taxpayers' money to transport alcohol from another State distributor across the country. This amendment prevents that abuse of taxpayers' money, and it supports the local taxpayer.

Mr. WILSON. Mr. President, I yield myself 4 minutes.

Mr. President, the claim has been made that the law is working. Let me tell you how it is working.

This is a letter from Chapman B. Cox, Assistant Secretary of Defense. And I quote: "Since enactment on December 1985"—it has not been working long—"the Department has experienced an increase in our cost prices which will reduce package store earnings used to support community activities"—the kind of things the Senator from Texas described: child care, physical centers, drug abuse, and alcohol programs—"which will reduce package store earnings used to support community activities by an estimated $22 million over the next year. We estimate that an annual impact 5 years from now will be more than double, or about $46 million."

It is not working very well for the troops. It is working very poorly.

Now, much has been said by the proponents of this that military bases should be good neighbors. Mr. President, with all respect, I think I probably have more experience in this area than anyone else on this floor. For 11 years, I was mayor of San Diego, a city that is blessed with more military bases, perhaps, than any other in the Nation. They are not only a good neighbor, but a very profitable one, I will tell you. We did not urge them to leave. They brought in enormous payrolls and, because of that, in many instances, they permitted city services to civilian personnel that we could not otherwise afford.

If we are talking about the cost of policing young, drunken servicemen from driving automobiles, I will tell you this: If they got drunk in my city, it was in civilian establishments, because if they got too tight to drive on a military base, they were not permitted to drive off that base.

So let me say that the policy is one that is very, very selfish. Over 30 States have a State monopoly. Of course, the Governors are for it. I guess I do not blame them. But I will have to say I think they are being greedy. I think that this is clearly not in the interest of the troops, the people on whom we rely to fight our battles for us, or, better yet, to keep us ready so that we are credible enough not to have to fight.

I am not deeply impressed with the argument that we need to go further and allow a monopoly to operate to the detriment of the welfare of these troops.

Mr. President, how much time remains for the opponents?

The PRESIDING OFFICER. The Senator has 2 minutes and 22 seconds remaining.

Mr. WILSON. Mr. President, I yield that to the distinguished Senator from Arizona, the chairman of the committee.

The PRESIDING OFFICER. The able Senator from Arizona, the chairman of the committee, is recognized.

Mr. GOLDWATER. Mr. President, at one time—in fact, last year—I was for this amendment. In fact, I helped the proponents get passage of it. But, Mr. President, since that time, I have discovered that the troops at my air bases and my posts do not like it.

Now, I want to cite the Supreme Court in the United States versus Mississippi Tax Commission. In 1973 and 1975, in two different cases, they held that the 21st amendment does not permit State taxation of Federal alcohol purchases or sales.

Then, again in 1983, the Fifth Circuit Court of Appeals, in a case involving Texas, held States cannot regulate where military services purchase alcohol. They could not require in-State purchase which would have permitted indirect taxation on the United States when direct taxation was held unconstitutional under Mississippi law.

Mr. President, when it was first proposed one of the arguments was that the amendment would help reduce alcohol consumption. I can tell you, Mr. President, this is not true. It is not a health-related amendment. It is pure and simple, Mr. President—and I have found this from all of my bases in the State, which I visit regularly—that it is a little grab for money by people who have found an easy way to get it without really having to work at it.

There are many areas that benefit by this. The profits from alcohol sales used to support morale, welfare, and recreation activities like child care centers, libraries, physical fitness centers, are used at no cost to the Federal Government. If profits are not there, then appropriated funds must be used.

Maintaining the situation that existed before the passage of this amendment accomplishes two things: it denies the Federal Government the necessity, if that is the word, of providing money for those purposes.

The PRESIDING OFFICER. All time of the Senator has expired.

Mr. GOLDWATER. I thank the Chair.

I do not like taking this position, because I have told my friend that I would help him get the bill up. But I want to see it defeated.

PROCUREMENT POLICY FOR ALCOHOLIC BEVERAGES

Mr. BENTSEN. Mr. President, I am pleased to join the distinguished Senator from North Dakota [Mr. ANDREWS] and others in urging the Senate to reject the costly and unwise policy recommended in this bill for the purchase of alcoholic beverages for sale at military bases.

Current law requires purchase of such beverages within the State where the military installation is located. That law should be retained.

This amendment will avoid the costly duplication of the beverage distribution system already provided by the private sector. The wholesale beer distributors of Texas have estimated that it would cost the Pentagon over $10 million a year to duplicate the existing beer distribution system in the State of Texas alone.

Maybe some of these costs for refrigerated trucks and warehouses and so forth could be avoided. But why should the Defense Department superimpose its own nationwide network on what already is an efficient localized system?

I reject the argument that centralized procurement is the free market way. On the contrary, it tips the scales in favor of big businesses over small ones and adds paperwork for additional levels of bureaucracy. It creates the illusion of cost savings by papering

over the hidden subsidy for transportation from central warehouses.

Mr. President, the current system works well in practice. It has the additional advantage of benefiting the local economy where the beverages are procured. This is a "good neighbor" policy which ought to be continued, and which will be preserved if this amendment is adopted.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. ANDREWS. Mr. President, let me sum up very briefly. The issue is clear. It merely says the military base must purchase its alcoholic beverages from whatever wholesaler in the State in which the military base is located.

I, quite candidly, do not think the Defense Department ought to be in the business of purchasing alcoholic beverages. I think the various PX's and service clubs ought to purchase them at the lowest net cost, but from the State within which the base is located. It is reasonable. it is logical. It is now the law.

And if there are those people within the State who are wholesalers who are ripping off people, other wholesalers will come in and be competitive. There are funds on each base that are pulled from the profits from the various clubs and alcoholic sales on the base. That will continue precisely whether the raw beverage is purchased from some central depot in Ohio or Texas and flown in in military aircraft, or whether it is picked up in Mississippi or North Dakota or Minnesota, or wherever, at a wholesaler within the State.

□ 1300

Mr. President, I think it is extremely important that alcoholic beverages remain the province of the individual States. I think it is extremely important that the base community be subject to the same rules that any other community in that State is subjected to as far as alcoholic beverages are.

Mr. President, let me conclude by saying I will not even dignify the argument that says that if we mandate the purchase of alcoholic beverages from local wholesalers within the State then by reference we ought to mandate the purchase of tanks in each separate State. That just does not follow. The issue is clearcut. The vote was 66 to 29 last time. I hope, Mr. President, the vote comes out essentially the same this time.

I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GOLDWATER. I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on the motion of the Senator from Arizona to lay on the table the amendment of the Senator from North Dakota. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Vermont [Mr. STAFFORD] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 41, nays 56, as follows:

[Rollcall Vote No. 202 Leg.]

YEAS—41

| | | |
|---|---|---|
| Biden | Harkin | Mitchell |
| Byrd | Hart | Moynihan |
| Cohen | Hecht | Nunn |
| Cranston | Heinz | Quayle |
| Danforth | Hollings | Rockefeller |
| Denton | Humphrey | Roth |
| Dole | Kennedy | Rudman |
| Exon | Kerry | Sasser |
| Glenn | Lautenberg | Stennis |
| Goldwater | Laxalt | Symms |
| Gore | Levin | Thurmond |
| Gorton | Lugar | Wallop |
| Gramm | McClure | Wilson |
| Grassley | Metzenbaum | |

NAYS—56

| | | |
|---|---|---|
| Abdnor | Durenberger | Melcher |
| Andrews | Evans | Murkowski |
| Armstrong | Ford | Nickles |
| Baucus | Garn | Packwood |
| Bentsen | Hatch | Pell |
| Bingaman | Hatfield | Pressler |
| Boren | Hawkins | Proxmire |
| Boschwitz | Heflin | Pryor |
| Broyhill | Helms | Riegle |
| Bumpers | Inouye | Sarbanes |
| Burdick | Johnston | Simon |

| DeConcini | Mathias | Warner |
| Dixon | Matsunaga | Weicker |
| Dodd | Mattingly | Zorinsky |
| Domenici | McConnell | |

NOT VOTING—3

| | | |
|---|---|---|
| Bradley | Eagleton | Stafford |

So the motion to table amendment No. 2610 was rejected.

□ 1320

Mr. GOLDWATER. I move to reconsider the vote by which the motion was rejected.

Mr. ANDREWS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. FORD. Mr. President, that leaves the amendment hanging? It was just not tabled?

Mr. INOUYE. Mr. President, we ought to pass that amendment.

The PRESIDING OFFICER. That is correct. The motion to lay on the table was rejected. Therefore, the question occurs on the amendment of the Senator from North Dakota. The yeas and nays have been ordered.

Mr. ANDREWS. Mr. President, I ask unanimous consent to vitiate the request for the yeas and nays.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from North Dakota [Mr. ANDREWS].

The amendment (No. 2610) was agreed to.

Mr. WARNER. I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, I believe the Senator from Illinois [Mr. SIMON] is next.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

The Chair alerts the Senator from Illinois to the fact that the Wilson amendment (No. 2595) is still pending and must be set aside by unanimous consent before we move on to other matters.

Mr. GLENN. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senator from Ohio has requested that there be order in the Chamber.

Mr. SIMON. Mr. President, I ask unanimous consent that the Wilson amendment be set aside.

The PRESIDING OFFICER. Without objection, the pending amendment of Mr. WILSON is set aside. The Senator from Illinois is recognized.

Mr. SIMON. Mr. President, I understand my colleague from Florida has an amendment that has been agreed to. I shall yield to him for 2 minutes.

Mr. CHILES. Mr. President, the Senator may proceed. I am waiting for an agreement.

AMENDMENT NO. 2673

(Purpose: To increase the amount of special incentive pay that may be paid to members of the Armed Forces who are proficient in foreign languages)

Mr. SIMON. Mr. President, I send the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Illinois [Mr. SIMON] proposes an amendment numbered 2673.

Mr. SIMON. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 78, line 17, strike out "$100" and insert in lieu thereof "$250".

On page 80, line 5, strike out "$7,300,000" and insert in lieu thereof "$18,300,000".

Mr. SIMON. Mr. President, I yield myself as much time as I may consume.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Mr. President, my colleagues rarely see me on the floor asking for increases to the Department of Defense budget, but in this case, the Department of Defense has made a reasonable request for a needed increase. Let me give the background.

The Department of Defense—and Secretary Weinberger and Secretary Marsh particularly were involved in this—requested $36 million as an incentive for language study for armed services personnel. OMB cut the $36 million down to $18 million. The committee cut the $18 million down to $7.3 million. My amendment goes back to the OMB figure.

Why is this important? I remember when I was a brandnew Member of the House hearing the former chairman of the House Armed Services Committee, Representative Eddie Hébert, make a talk. In that talk, he said, "We have a problem." I was working in the foreign language field as far as our diplomatic corps is concerned. A few weeks before he died, Senator Scoop Jackson told me, "You ought to be paying attention to the armed services in the area, too. We have major problems."

We do have major problems. Eighty percent of this fund goes into the intelligence area. But it goes beyond that. In every major NATO exercise that is held, one of the weaknesses that is cited is the language problem. Our commanders in Korea report the same. A study made about 3 years ago in Japan indicated that the primary problem that exists between our bases there and the Japanese community is the language problem.

Not too long ago, and we all remember it vividly, we intercepted information sent by Libya in the Berber language about a bomb that was going to go off in Berlin. Unfortunately, we did not have enough people who could translate Berber quickly enough and the delay caused needless death.

Interestingly also, the Department of State recently conducted an experiment mandated by Congress where, in two countries, everyone in embassies designated by Secretary Haig had to speak the language of the country where they were stationed. Senegal and Uruguay were designated by Secretary Haig.

The Inspector General's report comes back and says it improved the morale of these posts, but it specifically says that the military attachés and the Marine guards were much more effective because they spoke the language of the people where they were stationed.

Mr. President, why should we go to this particular figure? The aim of the Department of Defense in requesting the $36 million was to have approximately 22,000 people who could speak foreign languages competently and translate them. If you were just to say these are going to be all overseas, this would be 4 percent of those stationed overseas.

The bill calls for a maximum pay increase to those in the Armed Forces of $100. My amendment increases that to $250.

Why do we need that increase from $100 to $250? The $100 is for people who speak two additional languages, one of them considered to be a hard language—that is, Arabic, Korean, Japanese, or Russian, something like that. By the time you get down to one language and down to NCO's, in fact, instead of learning another language, they can make more money working as a bartender one night a month in a tavern somewhere. It really makes sense.

Let me quote from the Secretary of the Army: "The Service Secretaries have identified a need to encourage and reward language capabilities. Foreign language proficiency is essential in order to meet military global commitments. To help maintain high levels of foreign language proficiency, the State Department, the CIA, and the NSA have foreign language pay programs. There is no similar incentive program for military personnel to encourage maintenance or increased proficiency. Language skills not continually refreshed are quickly lost."

Mr. President, we are asking for a very, very tiny sum in this overall budget but the tiny sum can make our military more effective.

I was speaking last night with our colleague, Senator FRITZ HOLLINGS, who said of the total military budget, we spend approximately $10 billion on education, whether it is baker school or remedial education or what it is. What we are asking for in this amendment is a paltry $11 million more, not as much as the Department of Defense has requested but half of what they have requested. I think it really makes sense.

This is a need. I do not think anyone who has taken a look at the problem does not acknowledge it is a need. I hope we do the sensible thing and approve this amendment.

Mr. President, I reserve the remainder of my time.

Mr. GOLDWATER. Mr. President, this is a very worthwhile approach to what I consider to be a real problem. We had a problem this year, though, Mr. President, with the request from the Armed Forces on this matter. They asked for $250 a month and because they are not ready yet—they may be ready now. I have not heard lately—to start this training, we put it down at $100, a total of $7.3 million for the authorization. Mr. President, we are talking here, and the Senator is talking primarily about 6,100 people or 6,200, whatever the amount may be.

I can remember, Mr. President, in World War II and I can remember since observing the forms filled out by men and women coming into the service. There was always a question about ability in other languages. Almost universally, there was a zero. The forces have been recognizing this. The Department of State finally, to some extent, has been recognizing it. We have a very big language school up at Monterey, we have other language schools that are being used and more and more of our people are beginning to be able to converse in another tongue.

I have to say, Mr. President, I think all Americans will admit this, we are notably weak; we are lucky if we speak one language. To have more than two in this country—we would have to get along on one, whichever that might be, while in other countries, you will almost invariably find their enlisted people and officer people are not just proficient in two, but some of them in three and four languages.

I do not think there is any question that the Armed Services Committees of both Houses will provide the money that is necessary for this training when the forces are ready.

□ 1330

Now, do not ask me the question, "What do you say it takes to be ready?" because I have no idea. I believe that anybody could go to any place and learn a language. In fact, Mr. President, for a long time we provided language training at the graduate school of foreign management near my home and we charged about $2,000 and the man could become extremely proficient in Spanish in a matter of—well, he could speak it in 6 weeks but he could speak it as a native in 2 or 3 months. So, Mr. President, while I am very, very sympathetic to the concept, the idea behind this, we have already discussed this at great length in the committee and we have come to the conclusion that we can allow $100 a month. I will have to admit that they have not even started using the amount of money that we said we would authorize.

I am very sympathetic to the amendment. I think it is a good amendment. I do not think this is the time for it because the services are not ready. Even in the State Department, the situation is getting better. I remember one trip I made to Chile and found myself in need of a taxi, and I had a member of the State Department with me. I asked the driver to take us to the

Embassy. He did not understand, and the State Department man could not tell him. So in my limited Spanish we got back home. So while I am completely in sympathy with the amendment of the Senator, I will attempt to table it only because the military is not ready.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. WILSON. Mr. President, I yield 5 minutes to the distinguished Senator from Ohio.

Mr. GLENN. Mr. President, I want to clarify something here and I hope this meets with the understanding of the distinguished Senator from Illinois, too. The way this is written, this is special pay, not for training as such, the way we had it written in the bill. What the distinguished Senator from Illinois does only changes the amounts we were talking about, but the purpose of the bill as we wrote it in committee is not for training.

This is for specialist pay—doctor pay, sea pay, diving pay, and hazardous duty pay. What we are doing with the qualifications here, we say we are entitled to pay this for those people who just have that language skill to retain them. These other categories are qualified in the military specialty requiring that proficiency. They have received previous training under regulations prescribing the assigned duties requiring that proficiency. In other words, we are giving them a little extra incentive to help keep them in. And it does only that. It is just like it is a skill pay but this does not actually set up or fund new schools or put new funding into old schools. We are giving new language training.

Now, I am very much in sympathy with what the distinguished Senator from Illinois is trying to do. We need these language skills. We need them desperately. We have to have them for all the reasons that our distinguished chairman just mentioned, as well as the Senator from Illinois. Our only problem when we considered this whole thing in committee was the amount. That is the problem.

The committee authorized this pay at a lower level than requested in the budget because we wanted to review the implication of it. We felt the lower level of $100 a month would prove adequate perhaps. The committee does not disagree in any way, shape, or form with the need for this special pay. That is the reason we wrote it in the bill. And I want to see it perhaps increased. And much as I agree with the Senator from Illinois—and I congratulate him for bringing this up because it is important—the State Department, the military, all of us need better proficiency in these areas for all the reasons with which we are familiar. So we agree with that. The question is how far can we go this year? We regrettably had to restrict this because of budget limitations to only $100 a month. And that is what we have retained. I do not like to oppose the distinguished Senator from Illinois on this because I am so much for the end intent of what he is trying to do. But I do have to oppose this and suggest that we stick with the language of the bill as it came out of committee, which provides $100 a month which is not for training.

This is one little extra sweetener to try to get people who have these skills to stay in the service. Next year, perhaps, if we are in a little better budget situation, I would more than support what the Senator from Illinois is trying to do because he is right on target. We felt $100 a month was a good kicker to start with, and we hoped it would work and will assess it this year.

Let me mention one other figure, too. The Army alone says they need 25,000 people. They estimate they have 25,000 people to whom they would like to give this pay. Now, 25,000 times $2,400 a year—that would be the $200 a month—that comes out to $60 million. That is very substantial. What we did in the committee was say $100 a month with a $7.3 million cap for the year. So we are at a different level, and I think with the budget restrictions being what they are, we would be a little hard pressed to find money to do what would have to be done if we went along with the Senator from Illinois. So regrettably I must oppose on behalf of the committee.

The PRESIDING OFFICER. Who yields time? The Senator from California.

Mr. WILSON. I thank the Chair.

Mr. President, how much time remains to the opponents?

The PRESIDING OFFICER. The Senator from California has 6 minutes remaining. The Senator from Illinois has 9 minutes remaining.

Mr. WILSON. Mr. President, as the distinguished ranking member has made clear, we do not oppose the program. Indeed, the program does not yet exist. We are inaugurating it. It is an initiative of the Subcommittee on Manpower and Personnel. We recognize full well the desirability of providing an added incentive beyond the desire to serve more proficiently, to achieve an incentive in military personnel to gain and maintain language proficiency and to remain on duty where they can exercise it. There is no argument about the desirability of achieving that proficiency.

The question here is what are the needs really to make the program work and what are the costs, and as you have heard from the ranking member, we had to start lower than the budget request of the administration both because we are under an obligation to accept our share of the burden for reducing $30 billion cost enjoined upon the Department of Defense and upon the Armed Services Committee. Also, there is no experience yet to indicate what is required.

Now, I think these are desirable programs. This is the second time this morning I have mentioned experience as mayor of San Diego. I instituted a similar program to achieve a language proficiency within members of the police department.

But I would have to tell you that I do not think an enormous amount is required to provide that incentive, and as the ranking member has just illustrated with the example chosen from the Army alone, 25,000 personnel at $200 a month, which is what this amendment seeks, brings it up to the tidy sum of $60 million. Now, I would have to say that when we have had experience with the program it may be necessary to add a sweetener beyond this initial authorization. But we should go slowly, Mr. President. We should not start at a level from which we know we will find it impossible to come back. It is virtually impossible once you have set a level of compensation, a rate of compensation, to reduce that level.

□ 1340

Frankly, there are other priorities competing for the money. So we will stipulate to the desirability of gaining this proficiency on a more widespread basis. That is not the issue. The question is what we have to do to achieve it and whether we can afford the more generous increase that the Senator from Illiniois is authorizing. His heart is in the right place.

I think we are compelled, in terms of dire economic constraints upon defense spending, to be very concerned that we not authorize new programs.

I think it was altogether proper when the ranking minority member said that in authorizing this new program we did have an eye upon the kinds of special pay that now exists. He mentioned several. One that perhaps serves as an interesting basis for comparison is hazardous duty pay. The level that is being sought by this amendment would be substantially in excess of the hazardous duty pay that we pay for people to be shot at in combat. I am not certain that those in the military, particularly those who have voluntarily extended as a sense of duty, are particularly interested in the kind of money he is talking about. Obviously, they are interested in money.

We make a particular effort to keep competitive with the private sector. But I point out to my friend from Illinois that we are very much concerned this year with the affordability of a pay raise. We do not want to cut back

on that. Even with that pay raise, we are not going to maintain comparability with the private sector, but we will not open up the gap that would occur otherwise without it.

So we are saying that these funds are competing with others, and the potential for growth in this program is enormous.

So, reluctantly, at the proper moment, we will have to offer a motion to table.

Mr. GLENN. Mr. President, I would be happy to work with the Senator from Illinois in the coming year. Let us see what effect this has. Let us check with the Army. I will be glad to make certain that we have hearings on this next year, when it will be brought up in the subcommittee that is chaired by the distinguished Senator from California and on which the ranking minority member serves. We will look at the data and see if it is doing the job. If it is, fine. I will be glad to come here and offer that.

Mr. SIMON. Mr. President, I yield 2 minutes to the Senator from Maryland.

Mr. SARBANES. Mr. President, I commend the distinguished Senator from Illinois for offering this amendment and, more broadly commend him for the interest he has taken in the subject of making sure that those who serve our country are proficient in foreign language. He sought to do the same with respect to American diplomats who work abroad, and this is consistent with that initiative which he exercised there with a great deal of imagination and responsibility.

I think it is obvious on the face of it that this is an enormously important skill for members of the armed services to have.

I want to ask the Senator from Illinois a couple of questions, in view of the arguments that have been made.

First of all, as I understand the amendment, while it would permit the Secretary to pay more special pay, a higher monthly rate than in the bill, it does not require him to do so. This is a ceiling. It says "not in excess of." The Secretary could still make the judgment to pay only 100 or 50 or 150. He could not go above the Senator's figure. Is that correct?

Mr. SIMON. The Senator is correct.

In fact, the intent of the Armed Forces is to give that maximum only when we have two additional languages, one of which is a hard language—Japanese, Korean, Russian, something like that.

Mr. SARBANES. I think that is a very important point. The Senator's amendment does not require the higher monthly pay. It only gives the Secretary the authority to pay up to that figure if he chooses to do so.

So it gives some discretion to the Secretary in order to make this program work, just as the Secretary, as I understand it, has the discretion to judge which languages are necessary.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SIMON. I yield the Senator 1 additional minute.

Mr. SARBANES. As I understand the way the legislation is written, the Secretary of Defense is going to be able to determine which language is necessary in which to have this proficiency. In other words, if you have a language in which many people are qualified, you do not need to urge it; and the Secretary, I take it, would not put that language on the list.

So the Secretary has two discretions. One is the language to be sought. Is that correct?

Mr. SIMON. That is correct.

Mr. SARBANES. Second, under the Senator's amendment, this would only allow him to pay the higher figure that he judged was necessary.

I submit that this is an important program. This is giving the Secretary sufficient latitude in order to have some real chance of making the program work.

As the Senator pointed out, you may have related languages in which you want to develop a skill, in which more likely a skill can be developed, and you may need a greater incentive in order to accomplish that.

I strongly support the Senator's amendment. I commend him for offering it. I cannot think of a limited area at small cost that would pay greater returns in strengthening our military bases.

Mr. SIMON. Mr. President, I thank my colleague from Maryland, Senator SARBANES, for his comments. I think he is right on target.

I appreciate the comments of Senator GLENN, Senator GOLDWATER, and Senator WILSON, even though I do not agree with their conclusion as to what we should do with this amendment.

Senator GOLDWATER says that the military is not ready. The reality is that the Department of Defense thinks they are ready—not for the $18 million I am asking for but $36 million. They want 22,000 people to whom they can give this pay incentive. My amendment cuts that in half. The amendment of the committee basically cuts that down to one-quarter.

What you have here is a resource for the Nation. I cite what happened in the bombing in Berlin, where we intercepted the Libyan intelligence in Berber, only we did not have any who could translate Berber; and we had it translated 24 hours late, too late, to stop the tragedy in Berlin.

Let me cite a figure—and I regret that I do not have the up-to-date figure—but as of 3 or 4 years ago, we had 497,000 U.S. armed service personnel stationed overseas. The Armed Forces regarded 512 of over 400,000 as linguistically accomplished in the country where they were stationed. You do not need to be a military expert to recognize that that presents real problems, and this moves in the right direction.

Eighty percent of these people will work in the field of intelligence. With this pay incentive we can retain the people who really have the skills or have a better chance at retaining those skills.

Finally, Mr. President, I disagree with the Senator from California when he said that we have no experience as to whether it will work. The CIA does this; the State Department does this; the NSA does this. I am advised that other groups do it with their armed forces. I do not know the details there.

Mr. WILSON. Mr. President, will the Senator yield?

Mr. SIMON. I yield.

Mr. WILSON. I thank the Senator from Illinois for his courtesy.

I think the Senator misunderstood. We do not doubt the wisdom of the program or we would not have authorized it. What I said was how it will work and whether or not 100 or 200 were required. We are looking for time and experience to determine whether or not this is a sufficient incentive.

□ 1550

Mr. SIMON. I understand.

I would simply say I think we can, with some prudence, cut back on the Defense Department's request. Their request was for $36 million. OMB cut it back to $18 million. The committee has cut it back to $7.3 million. I am simply putting it back to 50 percent of the Defense Department's request.

I think it is a modest request. I think to move to half of what they request really makes sense for the armed services of our Nation.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. SIMON. I am pleased to yield.

Mr. SARBANES. I simply say all you are doing is giving the Secretary a higher monthly figure which he can use at his discretion. You are not requiring him to pay that figure. This gives him some latitude to make some judgments with respect to the difficulty of the language, with respect to the number of language skills that a particular person may have that you want to hold in the service so that he has an ability then to implement the program in such a way that it can produce a maximum response.

The lower you cut the figure under which he can operate the less ability he has to adjust to the situation with respect to language capabilities in terms of the number of languages or with respect to the desirability of obtaining skills in certain difficult languages in which very few people may

have the skills and which it is very difficult to acquire them.

I spent a lot of time overseas and I have seen firsthand. I have been around the world. I have been to a lot of embassies as have both of these Senators and they know how the requirement goes. But we need this kind of training.

With this budgetary restriction this year we thought we had to limit this.

Mr. SIMON. I thank my colleague from Maryland. I have nothing further.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. Mr. President, I yield such time as I need. I will not be more than about 1 minute.

The PRESIDING OFFICER. Who yields time?

Mr. WILSON. I yield the remainder of our time to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. GLENN. How much time do we have remaining?

The PRESIDING OFFICER. The Senator has 42 seconds and counting.

Mr. GLENN. Good.

The distinguished Senator from Maryland makes an excellent point that this does not have to be paid to the maximum and indeed we have some experience along that line with reenlistment bonuses when they are varied up and down.

I am not sure, though, that with the original request having been as high as it was, the distinguished Senator from Illinois reducing it, and us cutting it further here that it would be anything but administered at the higher level. It might be, and it is a good point to bring up. I want to keep on looking at the issue because I am concerned with retaining people with badly needed language skills.

The PRESIDING OFFICER. The Senator from Illinois has 53 seconds remaining.

Mr. SIMON. Fifty-three seconds and counting, to use Senator GLENN's phrase.

I simply want to reiterate we are talking about a $300 billion authorization basically. Here we have $18 million that could really be significant in preventing the kind of disasters that too often we have.

I hope we will do the commonsense thing. I hope we will give the Defense Department not everything they have requested but half of what they have requested here.

I think it is a reasonable request.

The PRESIDING OFFICER. There is no time remaining on the opponents' side.

The Senator from Illinois has 12 seconds remaining.

Mr. SIMON. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GOLDWATER. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Illinois [Mr. SIMON].

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Oregon [Mr. HATFIELD] and the Senator from Vermont [Mr. STAFFORD] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER (Mr. HECHT). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 39, as follows:

[Rollcall Vote No. 203 Leg.]

YEAS—57

| Eagleton | Stafford |

So the motion to lay on the table amendment No. 2673 was agreed to.

□ 1410

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine is recognized.

AMENDMENT NO. 2567, AS MODIFIED

Mr. COHEN. Mr. President, on August 7, this body unanimously agreed to an amendment offered by myself and the Senator from Georgia, Senator NUNN. The purpose was to enhance the capabilities of the United States to combat terrorism and other forms of unconventional warfare. In light of the fact that we converted it from a sense-of-the-Senate to mandatory legislation, there were certain provisions which were technically in error.

I am asking unanimous consent that we be allowed to amend the amendment which was agreed to in several respects: To restore the language pertaining to the Assistant Secretary of Defense, which was inadvertently omitted by legislative counsel; to make the Deputy Assistant to the President a sense-of-the-Senate provision rather than binding legislation; and to correct the language pertaining to the rank of the commanders of the special operations commands. These were technical errors inadvertently made by legislative counsel.

I have discussed this at some length with the Senator from Virginia, who is opposed to the legislation, and I might add very strongly. But I have talked with him and Senator CHAFEE of Rhode Island, and I believe we have arrived at an agreement as to how best to proceed with this.

So I ask unanimous consent that these technical changes be made.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Reserving the right to object, while I do not intend to object, but I do urge the Senate to accept the amendment from the Senator from Maine. While, as he stated, I and perhaps others do not favor certain portions of this legislation, the Senator has acted within his rights, and I think it is imperative for the record of the Senate to reflect more accurately the action taken by the Senate which through inadvertence and no mistake on the part of the Senator from Maine was not reflected in the Journal of the proceedings.

So the Senator is merely correcting the Journal of the proceedings and the RECORD to reflect the action taken by the Senate on a voice vote some 2 days ago.

It is my hope, however, that prior to the conference on this bill the Senator from Maine and other interested parties can once again address this issue so that at the time of the conference we emerge with such action as we feel must be taken by the Congress. Hope-

fully it will not be in the exact form as we are presumably about to enact.

I thank my distinguished friend and colleague from Maine for his cooperation. I am pleased that he has elected to take this initiative, and I join him.

Mr. COHEN. I thank the Senator.

I want to express my appreciation for his willingness to resolve this issue in the fashion that he has. It is very kind of him to yield to this unanimous-consent request.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The Senator will send the modification to the desk.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. I ask the amendment be so modified according to the amendment now at the desk.

The PRESIDING OFFICER. The amendment is so modified.

The amendment (No. 2567), as modified, is as follows:

On page 5 of the amendment strike out paragraphs (3) and (5) of subsection (b) and insert the following:

(3) Unless otherwise directed by the National Command Authorities (NCA), all active and reserve special operations forces of the Army, Navy, and Air Force based in the United States shall be assigned to the unified combatant command established pursuant to paragraph (1).

(5) Unless otherwise directed by the NCA, special operations missions shall be conducted under the operational command of the unified combatant commands in whose geographic areas such missions are to be conducted.

On page 6 of the amendment (subsection (c)) strike out "hold the grade of general or, in the case of an officer of the Navy, admiral if appointed to that grade by the President, by and with the advice and consent of the Senate" and insert in lieu thereof "be of general or flag officer grade".

On page 6, strike out subsection (e) and insert in lieu thereof the following:

(e) ASSISTANT SECRETARY OF DEFENSE FOR SPECIAL OPERATIONS AND LOW INTENSITY CONFLICT AND DEPUTY ASSISTANT TO THE PRESIDENT FOR NATIONAL SECURITY AFFAIRS FOR UNCONVENTIONAL WARFARE.—(a) Section 136(b) of title 10, United States Code, is amended by adding at the end the following new paragraph:

"(7) One of the Assistant Secretaries shall be the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict. He shall have full responsibility for policy and resource oversight of special operations forces.".

(2) It is the sense of the Congress that the President should designate within the Office of the President a Deputy Assistant to the President for National Security Affairs for Unconventional Warfare.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. CHILES. Will the Senator from New York yield to the Senator from Florida for several minutes?

Mr. MOYNIHAN. I am happy to.

Mr. CHILES. I thank the Senator from New York.

AMENDMENT NO. 2674

(Purpose: To promote increased use of multiyear contracting authority by the Department of Defense)

Mr. CHILES. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to setting aside the amendment of Senator WILSON? Without objection, the clerk will report.

The assistant legislative clerk read as follows:

The Senator from Florida [Mr. CHILES], for himself and others, proposes an amendment numbered 2674.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 186, between lines 9 and 10, insert the following:

SEC. 963. GOALS FOR INCREASED USE OF MULTIYEAR CONTRACTING AUTHORITY IN FISCAL YEAR 1988

(a) IN GENERAL.—The Secretary of Defense shall take appropriate actions to ensure that the Department of Defense increases the use of multiyear contracting authority in fiscal year 1988.

(b) MULTIYEAR PROCUREMENT GOAL.—The total amount obligated under multiyear contracts (authorized by section 2306(h) of title 10, United States Code) for Department of Defense procurement programs eligible for multiyear contracting during fiscal year 1988 should be an amount that is not less than 10 percent of the total obligational authority used by the Department of Defense for procurement programs of the Department during such fiscal year.

(c) APPORTIONMENT OF GOAL.—The Secretary of Defense shall specify the percentage of obligational authority of each military department and Defense Agency that is to be used for multiyear contracts to achieve the goal prescribed in subsection (b).

(d) BASELINE REPORT.—Not later than January 1, 1987, the Secretary of Defense shall submit to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives a written report which contains (1) a list of all procurement programs which the Secretary determines to be Defense SAR procurement programs eligible for multiyear contracting, (2) the Secretary's assessment of the feasibility and desirability of the multiyear procurement goal prescribed in subsection (b), and (3) whether the Secretary expects to achieve the goal prescribed in subsection (b) for fiscal year 1988 and, if the Secretary does not expect to achieve such goal, the reasons why such goal will not be achieved.

(e) DEFINITIONS.—As used in this section:

(1) The term "SAR" means Selected Acquisition Report as defined in section 139a(b)(1) of title 10, United States Code.

(2) The term "Defense procurement program eligible for multiyear contracting" means a procurement program of the Department of Defense (A) which satisfies the conditions of clauses (A) through (F) of section 2306(h)(1) of title 10, United States Code, and (B) under which production of fully configured end items is planned for a period exceeding 3 fiscal years.

Mr. CHILES. Mr. President, I rise to present the Senate with a positive DOD procurement reform amendment. It follows in the footsteps of such well considered works as the Carlucci initiatives, the Packard Commission, and the Grace Commission. It continues in the same direction as the baseline budgeting set forth in the committee bill. This amendment encourages higher usage of multiyear contractor of all DOD procurement items. The result will be substantial cost savings, increased program stability within DOD procurement, and improved program performance.

At this point, let me briefly explain what multiyear procurement is. Multiyear procurement is a method of acquisition which permits 3 to 5 years of procurement under one contract. This allows contractors to purchase materials in economic order quantities at bulk rates. Cost savings are the result of these bulk rate purchases and stability results from fewer changes due to contractural restrictions. Most significantly, improved system performance is derived from the attention a program manager can direct to matters of system quality. This amendment is part of the continuing evolution of the multiyear contacting concept. In 1981, multiyear contracting was limited due to a maximum contract cancellation clause of only $5 million. In that same year, Deputy Secretary of Defense Carlucci recommended increased use of multiyear contracting to save money. Congress picked up the ball in 1982 by removing the cancellation clause and requiring congressional approval of multiyear contracted major systems with cancellation ceilings over $100 million. This was later changed to $500 million. Nonmajor systems were also included for authorization if the cancellation clause was over $20 million.

Costs savings have been a primary objective of multiyear procurement proponents such as the Grace Commission. For example, to avoid overly generous cost savings estimates, Congress requires DOD reports of savings both before and after the contract is signed. However, program stability has also been an important objective as illustrated in the Packard Commission Report.

To ensure that these two concerns were met by DOD, Congress established six criteria a system must meet to be a multiyear candidate.

First, the benefits to the Government must be shown as savings in present value terms;

Second, the requirement for the system must be stable;

Third, the funding must be stable;

Fourth, the configuration must be stable;

Fifth, the cost estimates must be reasonable; and

Sixth, the contractor must have the capability to handle the contract.

A recent Congressional Budget Office study which I commissioned demonstrated how effective multiyear contracting has been. Between fiscal years 1982 and 1986 the Department of Defense requested congressional approval to enter into 59 multiyear contracts. Of these, the Congress judged that 40 meet the current criteria for multiyear funding. The Department of Defense projects $6.2 billion savings in total obligational authority for these 40 contracts, relative to the costs associated with using annual procurement.

Mr. President, the greater stability of multiyear contracting has a number of significant benefits. Of the 40 approved multiyear contracts 39 were actually awarded and only 2 of these have had purchases over the life of the contract that differed from the planned contract amount. That is a stability rate of 95 percent.

Some of the finest major programs we have produced come as a result of multiyear contracting. The Air Force's superb fighter, the F-16, and the Army's outstanding multiple launch rocket system are both recent multiyear procurement programs. Not only have significant savings resulted in these programs, but, most importantly, we have derived highly capable weapon systems which have strengthened our national security.

Clearly, the primary objectives of cost savings and program stability have been met. Yet, there are other benefits from multiyear contracting. The fiscal year 1984 Selected Acquisition Report Program indicated that 16 of the 20 program cost decreases cited in the report were in multiyear programs. Thirteen of these programs were reported at or ahead of schedule.

However, the report also suggested a disturbing trend. Between fiscal years 1982 and 1985, the precentage of DOD procurement obtained on a multiyear basis increased from 3.2 to 11.9 percent of total obligational authority. Unfortunately, as certain major programs have been completed the level of multiyear procurement has begun to decline and will fall to 6.4 percent during fiscal year 1987 even if Congress approves all the DOD's fiscal year 1987 multiyear candidates.

My amendment will attempt to remedy these problems by establishing a goal for the DOD of 10 percent of procurement total obligational authority by fiscal year 1988.

If DOD does not meet this goal, it need only report why procurement programs were not recommended for multiyear contracting. There may be programs that do not meet the established criteria and should not be multiyear contracted. This report will encourage an honest evaluation of programs to determine their suitability for multiyear contracting.

Mr. President, my amendment is a first step toward increasing stability and thus moving toward the Packard Commission goals. My objectives are to save money in these restrictive budgetary times and at the same time to help reduce instability in DOD programs.

Before I close, I would like to take this opportunity to commend the Congressional Budget Office on the fine job they did on this study. As the Senate takes further action on multiyear contracting, I hope it will continue consulting with the National Security Division of CBO. This report is typical of the thoughtful and well balanced work they produce. I would also like to express my special thanks to the Director of the National Security Division, Robert Hale, the Deputy Director, Jack Mayer, and to the report's author, Dr. G. Wayne Glass.

In conclusion, my amendment puts into action the suggestions of the Carlucci initiatives, the Grace Commission, and the Packard Commission. This amendment is designed to further complement and reinforce the Armed Services Committee's forward looking work on baseline budgeting. It provides additional benefits over and above those provided by the Nunn-McCurdy amendment. DOD has expressed eagerness for a positive multiyear requirement from Congress. Congress has shown past acceptance of the concept. The time is now here to bring both parties together in striving for reduced costs, increased stability and improved performance.

Mr. President, this amendment sets the goal for increased use of multiyear procurement. It supports the committee's move toward baseline budgeting. It is supported by a comprehensive CBO study which indicated that we could save up to $9 billion by fiscal year 1991 if we increased our use of multiyear procurement.

I understand the committee has agreed to hold some hearings, and will have a thorough review of this concept. This is as first step toward achieving the goals of the stability contained in the Packard Commission report. The message is, if we are going to buy a system, we should buy it right.

I believe the committee has agreed to accept the amendment.

Mr. GOLDWATER. Mr. President, we have no objection to this amendment. It is perfectly all right with us.

Mr. NUNN. Mr. President, I think this is a good amendment. Multiyear procurement can save a great deal of money if we choose the right systems and if we can begin to increase the percentage of contracts under that concept. That is exactly what the Senator from Florida is trying to give an incentive toward.

I recommend approval of the amendment.

Mr. QUAYLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, I congratulate the Senator from Florida for bringing this forward and encouraging the multiyear procurement as recommended in support by the Packard Commission. I think the multiyear procurement has a very valuable function that it can provide.

I must also point out that this is a goal that we are going to try to achieve of 10 percent we are going to have some hearings but more important, I would also like to point our another recommendation that was in the Packard Commission that would enhance multiyear procurement considerably. That is budget stability.

But the problem we have, particularly in programs in multiyears procurement is the instability that we have in the budget from year to year. Im a multiyear procurement, which is good, you have to have a lot of the up front funding. Therefore, I hope we can eventually get to maybe a 2-year budget, have more budget stability, and we might be able to move more in the direction that the Senator from Florida is recommending.

I strongly support multiyear procurement. It is a good recommendation. But also the most important thing we can do in the long run is to get that budget stability. It is a very very important program for multiyear procurement.

Mr. CHILES. I urge adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Florida.

The amendment (No. 2674) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHILES. I thank the distinguished Senator from New York.

□ 1420

AMENDMENT NO. 2675

(Purpose: To prohibit the United States Government from subsidizing the sale or transfer of goods or services to Communist governments)

Mr. MOYNIHAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to setting the Wilson amendment aside?

Mr. DOLE. Mr. President, reserving the right to object. I will, under the

reservation, ask what the amendment is. It is not listed. We had no notion how to prepare for it. I think we would like to know that.

I will object until we can take a look at the amendment.

Mr. BYRD. Mr. President, the Senator's amendment is on the list.

Mr. MOYNIHAN. It says, "Moynihan, national security and trade."

I do not recall any other objections this morning to an amendment becoming the pending business, with the Wilson amendment being set aside.

Mr. DOLE. National security and trade, I might add, covers a rather broad range of issues.

Mr. BYRD. It is on the list.

Mr. GOLDWATER. Mr. President, we will admit that it is on the list but it is on the list only as national security and trade. We have not seen the contents. We would like to know what it is about and have a moment or two to study it.

Mr. MOYNIHAN. Mr. President, may I say to my friend from Arizona, I will propound the proposition very directly.

Mr. DOLE. I withdraw my objection.

Mr. GOLDWATER. The leader has withdrawn his objection.

The PRESIDING OFFICER. Without objection, the clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from New York [Mr. MOYNIHAN] proposes an amendment numbered 2675

At the end of the bill, add the following new section:

SEC. . Notwithstanding any other provision of law, the United States Government shall not expend any funds to subsidize the sale or transfer of goods or services to a Communist government or subdivision thereof.

Mr. MOYNIHAN. Mr. President, we are coming now to the end of an extensive and useful debate on the Department of Defense Authorization Act for fiscal year 1987. Senators who have looked at the report of the committee will know, and those involved in the debate will know, that we are in the process of authorizing an enormous sum of money. In the first summary on page 3 alone, we find that $225 billion is being authorized for procurement and other matters, with an additional $4 billion in manpower. Indeed, the national defense budget is approaching the $300 billion mark.

Forty years ago, at the end of the Second World War, if anyone would have suggested that the day would come when during peacetime the United States would be spending $300 billion on defense, it would have seemed a puzzling proposition and to some an altogether unpersuasive, even outrageous, thought.

Yet here we are, and we are doing what we have been doing, in effect, for near 40 years, appropriating extraordinary sums in peacetime to a defense establishment.

And why? It is very simple. We face in the Soviet Union a determined, tenacious, well-armed, and, in the large sense, threatening adversary.

This engagement was not of our choice. Forty years ago we demobilized our forces and went about rebuilding a war-torn world with purposes of peace.

The Soviets, however, chose a different path. And so, before that decade was out, the Truman Doctrine had sent American aid to Greece and Turkey, NATO had been founded to reestablish a military alliance in Western Europe including Western Germany.

Mr. President, I do not think there is much disagreement in this Chamber about the true nature of Soviet intentions in the world, that the threat to peace has been real, and has been validated in one way or another over these 40 years. Thus, we do of necessity what we are forced to do. With a defense program sustained over two political generations, we have said to the Soviet Union, "Whatever your purposes, you cannot prevail. You cannot succeed. The combined forces of the Democratic nations of the world are so much greater—or are at least sufficiently greater—that no plan of conquest will succeed. You cannot win a war."

But, Mr. President, it seems to me that as we consider this puzzle, we need also to consider the Soviet proposition that really, in the end, the U.S.S.R. need not win a war. That was never part of the prophecy of Marx and Engels, nor indeed of Lenin.

Rather, the prophecy was that the Capitalist West will collapse of its own internal contradictions.

Let us be clear. We are dealing with a doctrinal adversary. There is a real sense in which it must be said of the leaders of the Soviet Union, and some of their satellites, that they are a People of the Book. They have texts which prophesy the ultimate triumph of their system through the collapse of ours, not through its overthrow from outside but from its collapse from within.

The doctrine was first set forth in the mid-19th century by Karl Marx and Friedrich Engels, and was extensively codified in Marx's book, "Das Kapital."

The doctrine is not all that complex, Mr. President. Karl Marx stated that the bourgeois system of production under capitalism was by far the most advanced stage that civilization had reached, but not the last stage. He said it had released unparalleled productive capacity, compared to which the pyramids of Egypt were insignificant achievements.

But this release of energies would lead to ever-increasing production, and that sooner or later the capitalist systems of the West would overproduce. As they began to overproduce, profit margins would fall. As profit margins fell, wages would fall, and the immiserization, to use the term of Marx, of the masses would commence. It would end in a great convulsion of protest against an intolerable system and new and vital days of history would emerge in which there was communal ownership of goods and services and, indeed, the disappearance of the state.

Yes; one of the prophesies of Soviet doctrine was that the state would wither away. The prophesy was that across national borders workers would unite as never before, recognizing a common nationality superior to any attachment to nation, religion, or other commitment.

□ 1430

The Germans and the Russians, the Italians, the Irish, the Scots, the Chinese, and the Russians would all become one solid class under the red flag, because the blood of all men is red and that was the color of the worker's flag.

They prophesied all this and then a half-century went by and it did not come to pass. The prophecies were not fulfilled. And there was in fact a crisis of belief in the Marxist world at the turn of the century. The prophet was dead, his prophecies had not come to pass.

Whereupon Lenin published his book "Imperialism: the Highest Stage of Capitalism" in which he described and explained the delay in the system's collapse. He said that the European nations had discovered that, through imperialistic foreign policies, they could accumulate colonies which would be their outlet for the surplus production that otherwise would bring about the Marxist prophecy. So the prophecy simply had been delayed. It was still valid but you had to wait while the producers filled India with locomotives and whatever, until even India, as it were, could no longer absorb any more of that production. Then profits would fall, the masses' wages would fall, and the final convulsion would come.

Mr. HEFLIN. Would the Senator yield?

Mr. MOYNIHAN. If my good friend would let me conclude this statement, I shall be happy to yield for a question in very short order.

Mr. President, one of the ironies and one of the events of our time is that Lenin, who made that prophecy writing in Switzerland, came to power in what was then Petrograd, now Leningrad. One of the first things he said to the Soviets and to the Communist Party leadership was that whatever the proclaimed enmity of the West to their regime—and after all, Britain, France, and the United States sent ex-

peditionary forces to overthrow that revolution and we landed in Murmansk, we landed in Vladivostok—Lenin said, "Don't worry, their's is a surface hostility. The raw necessity of capitalist overproduction will lead them to shower us with goods and services. They have no choice."

It is often said that Lenin made the remark, "They will sell us the rope with which to hang them." Actually, there is no documentation for that exact statement, but the essence is there. Permit me to read a passage from George Kennan's masterful work, "Russia and the West Under Lenin and Stalin." He describes what he calls "an imaginary statement" of the Soviet leaders to the Western governments. Permit me to quote from that imaginary statement. It says:

Since we are not strong enough to destroy you today * * * we want you during this interval to trade with us. We want you to finance us. An outrageous demand? Perhaps. But you will accept it because you are slaves to your own capitalistic appetites. You will wink at our efforts to destroy you. You will compete with one another for our favor. It is, in fact, you who will, through your own cupidity, give us the means wherewith to destroy you.

Kennan then says, and now I quote him:

I can only assure you that this formulation is not one whit sharper or more uncompromising than the language consistently employed by the Soviet leaders at that time. I do not believe it embraces a single thought which did not then figure prominently in their utterances.

Mr. President, Louis Fischer, in his "Life of Lenin," gives an account of an address to the Ninth World All-Russian Congress of Soviets in 1921, in which Lenin said as much. An important translation, said to be from Lenin's papers, was published in "Novyi Zhurnal", a New York Russian-language paper, in 1961. We find similar propositions in this work. I ask unanimous consent that both of these be printed in the RECORD.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

Excerpt from Louis Fischer, "The Life of Lenin" (pp. 563-64):

The capitalist nations had refused the Soviet government diplomatic recognition, yet they traded with it. A thousand locomotives had been ordered abroad. "We have already received the first thirteen Swedish, and thirty-seven German" locomotives (said Lenin). "This is the smallest beginning, still it is a beginning * * * we are overpaying, nevertheless they are helping our economy. They brand us as criminals yet they help us * * *"

Excerpt from "Novyi Zhurnal" (P. 147):

* * * The capitalists of the whole world and their governments in their rush to conquer the Soviet market will close their eyes to the activity referred to above (various diplomatic subterfuges of the Soviet government) and will thereby be turned into blind deaf mutes. They will furnish credits which will serve us for the support of the Communist Party in their countries and, by supplying us materials and technical equipment which we lack, will restore our military industry necessary for our future attacks against our suppliers. To put it in other words, they will work on the preparation of their own suicide.

Mr. MOYNIHAN. Next I go to a more contemporary source, that of Henry Kissinger, who wrote in 1982 an article published in the New Republic entitled "Trading with the Russians." He said:

Lenin's legendary dictum that capitalists would compete to sell the rope with which they would be hanged has come true with a vengence—for Lenin never guessed that Western governments would provide the money to buy the rope and subsidize the price to facilitate the purchase.

I say again, "to buy the rope and subsidize the price to facilitate the purchase."

Mr. President, in the great war of nerves between our two systems, of which weaponry in merely evidence—indeed, as the Marxists might say, an epipheromeon—the one thing we ought never to do is confirm the few tattered prophecies the Soviets have left. Those prophecies are very hard for any of us here to remember—none of us were really around at the time. But it was confidently expected that the Socialist mode of production, which would be put in place under a Marxist system, would be superior in its productive capacity, and that Russians—it turned out to be Russians—would be richer than the West because their system would work better. That expectation soon disappeared.

It was confidently expected that the world would rise in sympathetic response to the success in Russia. That disappeared.

It was expected the state would wither away. That disappeared.

It was expected that, at the minimum, there would be absolute solidarity between Marxist states committed to the same standards, united by the same realities, and enrolled in the same production system. But first with the break with Yugoslavia in 1948, and then with the catastrophic break with the Chinese in the sixties, that disappeared.

All those prophecies are gone. But one remains: That we will sell them the rope with which they will hang us.

For 10 years on this floor, I have pointed to examples in our activities and in the activities of other Western nations. It is the great scandal of the West that we spend fortunes in arms, that by their nuclear nature lead us to live on the brink of the final catastrophe, whilst we will not submit to the simple restraints of actions that will let the Soviets know that their ideology is false, their system has failed, and that their future is bleak unless they reach some accommodation with reality, which is the West.

We keep confirming that last prophecy, the one they still have to cling to, and I do not see how we can do this. I do not think we ought to do it. We should not do it.

I have said all I intended to say, Mr. President. The purpose of this amendment is clear. If is not that we will not trade with the Soviets. Trade is perfectly normal to our system. It should be pursued.

The distinguished majority leader the other day quoted a remark of President Eisenhower when he said, "We will sell them anything they cannot shoot back at us." And we should sell to them—but at a market price for a legitimate profit. But to subsidize, no.

Subsidization means, you see, that Lenin was right: The capitalists are overproducting, they cannot afford the system. That we are only in the last gasp of capitalism, that of imperialism and colonialism.

I hope, Mr. President, that we will adopt this simple amendment that says the U.S. Government shall not expand any funds to subsidize the sale or transfer of goods or services to a Communist government or subdivision thereof.

□ 1440

I will be happy to yield for a question from my distinguished friend from Montana.

Mr. MELCHER. I thank my friend for yielding and I thank him for his excellent statement on Communist philosophy and ideology. I agree with him on ideolgy, but I wonder if my friend recalls how slippery trade was at the time Secretary of State Alexander Haig canceled out of proposed sale of butter, U.S. butter, which is subsidized, canceled that out and then approved a contract or the sale to New Zealand, which immediately melted it down to butter oil and sold it back to the Russians at a profit of some $20 million?

Mr. MOYNIHAN. I would say to my friend from Montana, who follows these matters with great tenacity and accuracy, that is exactly the kind of thing I am talking about. I say it was a scandal of the democracies that we behaved in this way, that we would at genuine cost to all of our nations and peoples provide enormous sums for arms but counteract the whole impression those expenditures make when we act nonetheless in matters that foretell our self-destruction.

Mr. MELCHER. Mr. President, will the Senator further yield for another question?

Mr. MOYNIHAN. Of course.

Mr. MELCHER. I thank the Senator.

Was not that a rather foolish venture then?

Mr. MOYNIHAN. Yes, it was.

Mr. MELCHER. Did not we lose $20 million? Why should we have not sold directly to the Soviets rather than selling to New Zealand, who bought it from us at a reduced price and then sold it to the Soviets?

Mr. MOYNIHAN. I say to my good friend that if we were in a position to sell at market prices—to the Soviets or new Zealand—we should have done it. But we should not have sold at subsidized prices, nor should we have enabled an ally to do the same, which is what evidently happened.

Mr. MELCHER. I thank my friend for yielding, but I do not think the point is clear. The world price of butter reflects a lower price and is a lower price than what is our price for selling it out of CCC stocks. So it is subsidized. The first offer on the world price was a subsidized price.

Mr. MOYNIHAN. I take the Senator's point, and I would respond simply to say that if others do it, we ought not. Too much is at stake. The future of the free societies of the world is at stake.

Mr. MELCHER. I think that is the particular point. If we do not do it, we allow New Zealand to buy it even cheaper from us, sell it back to the Soviets, make a profit out of it and we lose. So trade is slippery.

Mr. MOYNIHAN. If I may say, I would like to have the Soviets observe that there are some things we will not do to sustain their system.

Mr. HARKIN. Will the Senator yield?

Mr. MOYNIHAN. I will be happy to yield to my friend from Iowa for a question.

Mr. HARKIN. I thank the distinguished Senator for yielding and I, to, want to say that I enjoyed and was also enlightened by the Senator's historical prespective of the development of the Communist thought and how their theory has been all along that they were going to use our surplus production to build up their own forces and overtake us.

I often thought that was an important Communist aspect of ideology that has not been clearly understood by the American people. I am going to have more to say in my own time on this, but my question to the Senator on this amendment has to do with the word "subsidize." "Subsidize" means different things to different people. We have not considered it a subisdy to our farmers when we make target price payments to make up for the deficiency between what the market price is and what we consider the farmer's income ought to be. We do not consider that a subsidy.

On the other hand, the GATT nations have always considered that a subsidy and that has been a bone of contention between us and the GATT countries for a long period of time.

I ask the Senator, would he include in his definition of subsidy not just the subsidized sale of wheat, which is now going on to the Soviet Union but would that also include all of those target price payments, I think now amounting if I am not mistaken this year to somewhere close to $20 billion to our farmers? Would that be included also in the Senator's amendment, that this would not be allowed?

Mr. MOYNIHAN. That would not be my intention at all. I would like to say to my distinguished friend from Iowa that with respect to the exact meaning of that word "subsidy," which anyone who has been involved in trade matters knows can be the subject of yearlong conferences, I am prepared to have it understood that I expect the Secretary of State to make that judgment.

Mr. HARKIN. If the Senator will yield for another question—I have about two or three questions—again, it revolves around the use of that word "subsidy." We at the present time have in the law a provision that says that a certain amount of our Government grain that is sent abroad has to be shipped on Americans bottoms. Now, how much of this goes to the Soviet Union I do now know, but again because it costs more to ship it in American bottoms than it does in, let's say, Soviet ships, that, too, is a part of a subsidy. I mean we do not charge any more for the grain that goes on American bottoms than we do on Liberian bottoms or Russian bottoms, even though it costs us more because of labor rates and things like that.

Again, is that a subsidy?

Mr. MOYNIHAN. I would say of that particular case that it is a payment by the American Government to American workers and does not affect the landed price in that sense, but again I would let the Secretary of State make that decision.

Mr. HARKIN. There would be a further question. That would be like the target price payments to farmers.

Mr. MOYNIHAN. Yes.

Mr. HARKIN. The Senator from New York would say that is a payment to farmers to subsidize their yearly, or annual income, or something like that?

Mr. MOYNIHAN. Internal decisions we have made as to how we arrange our own affairs.

Mr. HARKIN. One last question, if I might, to the distinguished Senator from New York. Involving again the use of the word subsidize and transfer and use the words "subdivisions thereof, Communist government or subdivision thereof." I do not understand the language "subdivision thereof." There are, as the distinguished Senator knows, countries who are in the orbit, let us say, or the sphere of influence of certain Communist countries, that is, the Soviet Union, that might not be a subdivision of the Soviet Union but certainly would be included within the diplomatic-military orbit of the Soviet Union.

Mr. MOYNIHAN. May I say to my friend that I refer to, for example, the Ukraine or Byelorussia or Tashkent, Uzebkistan or equivalent subdivisions in Czechoslovakia or Poland in that same sense.

Mr. HARKIN. But this would not include, for example, let us say an extreme case, maybe India, which may not be in the orbit of the Soviet Union but deals with them?

Mr. MOYNIHAN. Oh, no, the Government of India is not a Communist government.

Mr. HARKIN. OK, how about Albania?

Mr. MOYNIHAN. Albania is a Marxist government, a Communist government.

□ 1450

And the city of Tirana would be a subdivision of Albania.

Mr. HARKIN. A country that would be strictly Marxist but would be allied with the Soviet Union?

Mr. MOYNIHAN. There are not many things that are clear in this vale of tears we live in, but if one thing is clear, it is that if you have a Communist government, you will know it.

Mr. HARKIN. Mr. President, on my own time, I wanted to get into the aspect of why we are in the mess today with all the surpluses. There is merit to what the distinguished Senator from New York is trying to do, although I think there are problems with it, also.

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. HEFLIN. In reading the language of the amendment, I have come to the conclusion that it is quite broad in its language relative to subsidizing the sale or transfer of goods and services.

In effect, in some of the questions that have been asked of the Senator previously, he has indicated that it would be subject to interpretation and that the Secretary of State would be the interpretor of what language such as "subsidy" means.

Do I correctly understand the Senator to say, therefore, that whether something is a subsidy and falls within the purview of this section, he would leave it entirely to the Secretary of State to determine whether or not it is a subsidy?

Mr. MOYNIHAN. I say to my learned friend from Alabama, who was a distinguished jurist before joining us, that he is right in asking this explicit question concerning wherein a decision would reside.

Under our laws, Mr. President, this is a decision that the President of the

United States makes. I offer it as my judgment that any President I have known—and I have worked with a number—would turn to his Secretary of State for counsel in these matters.

Mr. HEFLIN. As I interpret the legislative history the Senator is giving, that is the way I understand the conduit is, through the President to the Secretary of State. But rather than having defined what a subsidy is, there would be no standards, no guidelines for anyone to be able to interpret. Therefore, with the breadth that would be there, it could possibly include irrigation, reclamation, education institutions, the extension service that would be involved, any form of subsidy, depending upon the interpretation that might be given.

In other words, I am saying that it appears that the language is so broad that it does allow for a very wide and varied type of interpretation. Does the Senator feel that there is any narrowing of interpretation of "subsidy"?

Mr. MOYNIHAN. May I say to my good friend that I assume that the President would turn to the State Department for counsel:

I know that these matters are difficult, but I also know that they can be very clear.

It is not everyday that we read on the front page of our papers that the Secretary of State was clearly distressed by a decision made by the Chief Executive. Yet, on this Tuesday past, we learned in an article in the Washington Post by Don Oberdorfer and Ward Sinclair that Secretary of State Shultz expressed strong misgivings about President Reagan's decision to sell subsidized wheat to the Soviet Union, saying that the Soviets "must be chortling" and "scratching their heads."

Mr. President, I ask unanimous consent that this article be entered into the RECORD, together with two articles on the same subject, one from the Washington Post of July 31, 1986, and the other from the Washington Post of August 5, 1986.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From The Washington Post, Aug. 5, 1986]

SHULTZ ASSAILS REAGAN DECISION TO SUBSIDIZE GRAIN FOR SOVIETS

(By Don Oberdorfer and Ward Sinclair)

Secretary of State George P. Shultz expressed strong misgivings yesterday about President Reagan's decision to sell subsidized wheat to the Soviet Union, saying Soviets "must be chortling" and "scratching their heads" at their ability to pay less for American-produced food than American housewives can.

Shultz, who previously termed such subsidized sales to Moscow "ridiculous" and led opposition to them within the administration, surprised White House and State Department officials by continuing his criticism after Reagan made his decision Friday.

Asked about the subsidized wheat sales yesterday morning in an interview with the editorial board of USA Today and other Gannett newspapers, Shultz described them as a form of protectionism and added: "I don't think it is good for the United States." He said they could lead to "a subsidy war."

Nonetheless, he said. "There must be a lot of pluses to it, because it has been decided—but I can't think of any myself."

To Senate Majority Leader Robert J. Dole (R-Kan.), a sponsor of the grain sale who said Shultz should visit more state capitals and fewer foreign capitals, Shultz responded with unusual bluntness:

"I've visited my share of state capitals and I haven't noticed people advocating taxes on Americans to subsidize food for Russians."

A senior White House official said there is virtually no chance that Reagan's decision will be reversed, despite Shultz's strong views, and noted that the issue had been fully debated last week within a divided Cabinet and that there is pressure on Capital Hill for expansion of the subsidized wheat sales.

White House political operatives and Republican lawmakers had argued for the subsidized sales, saying the issue could play an important role in the battle to preserve GOP control of the Senate.

Dole, in a letter to Agriculture Secretary Richard E. Lyng, asked that the U.S. "competitive price program," as he called it, be extended "across the board for corn, soy beans and other farm commodities to all legal markets."

While welcoming Reagan's decision, Dole said it could penalize exports of other commodities "until the current uncertainty and unevenness in U.S. agricultural trade policy is resolved."

Dole told reporters that he does not believe the wheat offer would hurt U.S.-Australian relations. "They weren't strained when they took our markets," he said. "They shouldn't be strained when we're taking them back."

Members of an Australian government delegation, after meetings yesterday with administration and congressional leaders, denounced the U.S. subsidy decision as a political move that will cost American taxpayers heavily and provoke a strong reaction in Australia.

John Kerin, Australia's minister of primary industry, told reporters here that the subsidy "is not about selling wheat. . . . it's about winning votes at the taxpayers' expense."

Kerin also said "the most frightening part" about the Australians' meetings was that U.S. farm-state senators were "misinformed" about Australian agricultural policy, which he maintained is free of government subsidy.

Kerin and others in the delegation said the U.S. pricing decision will approximately halve the gross value of Australia's wheat crop. "Very few farmers can make money in the coming months," Kerin said.

Ralph Hunt, opposition spokesman for agriculture in the Australian parliament, said his country will continue to pressure the Reagan administration to reverse the subsidy policy. "We must focus on the stupidity of agricultural policy in the United States," he said.

Undersecretary of Agriculture Daniel G. Amstutz, who oversees commodity export programs, said the U.S. wheat would be sold to the Soviet Union for $91 to $92 for each metric ton, the world price level, rather than current domestic price for the same wheat of about $104 to $105 a ton.

The subsidy of about $13 per ton, slightly higher than inustry leaders had projected, would cost U.S. taxpayers about $52 million if the Soviets purchase at this price all of the nearly 4 million tons of wheat they are committed to buy between now and Sept. 30 under the long-term U.S.-Soviet grain trade agreement.

---

[From the Washington Post, Aug. 5, 1986]

AUSTRALIANS PROTEST

CANBERRA, AUSTRALIA, Aug. 4.—Angry farmers dumped wheat outside the U.S. Embassy today to protest President Reagan's plan to sell the Soviet Union subsidized grain.

The deal is straining Australian-U.S. relations, with politicians here calling for boycotts of American products and threatening to use joint military bases as a diplomatic lever.

About 60 farmers demonstrated today, and a delegation met Ambassador Laurence W. Lane Jr., who said Australia was too dependent on its exports of primary produce. Lane said the subsidized sale of 4 million tons of U.S. wheat still left room for Australian grain sales. "I think you're going to compete a lot better than you are giving yourselves credit for," he said.

---

[From the Washington Post, July 31, 1986]

ADMINISTRATION IS DIVIDED OVER CHEAP GRAIN FOR SOVIETS—AUSTRALIA CALLS LEGISLATION "DEVASTATING"

(By Don Oberdorfer)

President Reagan is caught in an election-year tug-of-war among his top advisers over legislation that would require subsidized U.S. grain sales to the Soviet Union and China, an issue that will force the president to choose between domestic and international politics.

The House Agriculture Committee, following the lead of the Senate last week, yesterday approved by voice vote a bill requiring such sales. The vote came as Australian Prime Minister Robert Hawke warned that the legislation would have "devastating implications" for his country and call into question U.S. leadership of the Western world.

Australia is a major grain exporter and likely would lose foreign sales because of subsidized U.S. exports.

Reagan's top advisers are sharply divided on the issue, with Secretary of State George P. Shultz, Secretary of Defense Caspar W. Weinberger and other foreign policy officials strongly opposed to the subsizied sale and Secretary of Agriculture Richard E. Lyng, Secretary of the Treasury James A. Baker III and domestic political advisers backing the sales to help U.S. agriculture and aid GOP lawmakers facing close political races this fall in the Midwest grain belt.

The officials laid out their differences at a White House meeting with the president on Monday. A senior White House official said the foreign policy advisers "made a good case" in the meeting but that "the political logic" on the other side was "pretty hard to refute." The official said control of the Senate next year might be affected if the issue is mishandled by the Republican administration.

Reagan already has the power to order the subsidized grain sales under the 1985 farm bill, but has taken no action. The pending legislation in being used by supporters in Congress to pressure him to do so. The White House said Reagan had made no

decision on the question as of late yesterday, and a spokesman said none is expected today.

The issue erupted on July 22 when a Senate coalition led by Majority Leader Rober J. Dole (R-Kan.) attached an amendment to a funding bill for the Export-Import Bank requiring the subsidized sales.

One of Dole's cosponsors was Sen. James Abdnor (R-S.D.), who faces a tough race for reelection against Rep. Thomas A. Daschle (D-S.D.). Last Friday, Daschle introduced a more sweeping version of the subsidy plan, which was adopted yesterday by the Democratic-controlled House Agriculture Committee on a voice vote. An aide to Daschle said House Democratic leaders may bring the bill to the floor next week.

Shultz, calling the Dole plan "ridiculous," said last Friday that the measure would subsidize the Soviet Union in violation of an agreement with U.S. allies. He also expressed concern about the impact on Australia, a key U.S. ally in the Pacific.

Australia is particularly important, and Hawke's Labor government is in a sensitive position since Washington excluded New Zealand from the ANZUS (Australia-New Zealand-United States) alliance because of its refusal to allow port calls by U.S. nuclear-armed warships.

Hawke predicted dire effects of U.S. subsidized sales in a letter to about 50 members of Congress released by the Australian Embassy. He said application of the U.S. subsidies to wheat sales to the Soviet Union and China, Australia's two top wheat customers, "would inflict critical damage on the well-being of all Australians."

Hawke said the "price war" brought about by the proposed U.S. subsidies would cost Australia about $280 million in export revenue.

He also said that subsidizing the Soviet state at the expense of "America's friend and ally Australia" would inevitably cause questions "about America's commitment to its leadership of the West."

A team headed by Minister for Agriculture John Kerin is to arrive in Washington today to make Australia's case with the administration, Congress and the U.S. public.

Mr. MOYNIHAN. I hope the Senator from Alabama would not adopt a cross-exmamination mode there. He knows what I mean by this amendment and why I propose this matter.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BYRD. Mr. President, will the distinguished Senator from Montana yield to me without losing his right to the floor?

Mr. BAUCUS. I yield.

Mr. BYRD. Mr. President, I wonder if the distinguished majority leader would be ready at this time to propound a unanimous-consent agreement. I wonder if he would be in a position to do it now, so that we would be able to get this off our hands.

Mr. MOYNIHAN. I say to the minority leader that I believe I have the floor.

Mr. BAUCUS. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Montana has been recognized.

Mr. MOYNIHAN addressed the Chair.

Mr. BAUCUS. I am happy to yield to the Senator from New York.

Mr. MOYNIHAN. Mr. President, I was involved in a colloquy with the Senator from Alabama, and I never yielded the floor.

The PRESIDING OFFICER. In the judgement of the Chair, the Senator from New York lost the floor.

The Senator from Montana.

Mr BAUCUS. Mr. President, I must say that it was unclear whether or not the Senator from New York yielded the floor, and I will be happy to yield the floor so that the Senator from New York will have the floor.

Mr. MOYNIHAN. I thank my friend.

Mr. BAUCUS. Mr. President, I do so with the understanding that when the Senator from New York does yield the floor, I might be recognized.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MOYNIHAN. Mr. President, I did not hear the Senator from Montana.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Senator from New York be recognized as having the floor and that when the Senator from New York yields the floor, the Senator from Montana be recognized.

Mr. BYRD addressed the Chair.

Mr. MOYNIHAN. Mr. President, I had only asked to have the floor in order to yield to the minority leader, and evidently it is to be so done, and I am to yield now to the Senator from Montana.

Mr. BAUCUS. Mr. President, a parliamentary inquiry.

Mr. MOYNIHAN. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Montana has the floor.

Mr. BYRD. Mr. President, I did not realize who had the floor. I thought the Senator from Montana had the floor, and that is the reason why I asked him to yield. I did not mean by that to indicate who might have yielded the floor. I hope that the Senator who now has the floor will yield to me, without losing his right to the floor.

Mr. BAUCUS. I yield.

Mr. BYRD. If the distinguished majority leader is ready, I wonder if we can proceed with this agreement.

Mr. DOLE. I say to the distinguished minority leader—if the distinguished Senator from Montana will yield—that I am prepared to do that now. I think a number of our colleagues would like to know precisely what may be happening next week, and how we will dispose of the debt-ceiling extension. That is in addition to Contra aid and South Africa and the Boren amendment, which are all covered in the agreement.

I ask unanimous consent to proceed with the unanimous-consent agreement.

Mr. GOLDWATER. Mr. President, reserving the right to object—and I will not object—for the interest of our colleagues who are interested in this legislation, about how long will this take?

□ 1500

Mr. DOLE. I would guess at least 15 minutes.

Mr. BAUCUS. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Might I ask the Senators from West Virginia and Kansas whether or not we can complete action on this amendment before we move to the unanimous-consent request? I do not have much time I wish to take on this amendment. I sense there will not be much time taken on this amendment. Perhaps we can agree to a time limit of 15 minutes so we can dispose of this and then move more orderly into the unanimous-consent request.

Mr. DOLE. Mr. President, will the Senator from Montana yield?

Mr. BAUCUS. I am happy to yield.

Mr. DOLE. I hope it will not take long to dispose of this amendment. I do not really believe anybody has any idea what the amendment means. It means to me we cannot trade anything with the Soviet Union because we subidize cotton, rice, corn, tobacco, wheat, anything we might sell to the Soviet Union under this amendment. It is a total embargo, no more trade.

I believe once those of us frm the farm States understand that then we will be able to dispose of the amemdment, but it my take a while because we were taken by surprise. We have sent for staff, trade staff, ag staff, other staff. This amendment is not germane or relevant to this bill, but it may take 2 or 3 hours.

Mr. BAUCUS. Mr. President, with that understanding I withdraw my objection.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana has the floor.

Mr. DOLE. Is there objection to the request?

The PRESIDING OFFICER. Is there objection to the request?

Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—SOUTH AFRICA AND CONTRA AID

Mr. DOLE. Mr. President, I thank the Senator from New York and other Senators who permitted us to propose the UC agreement which I will do.

Let me explain at the outset what we have worked out with the cooperation of a number of Senators. I believe that the treatment we have reached is fair, fair to both sides. I mean by "both sides" both sides who may have views on Contra aid, those who may have different views on South Africa, and those who might have different views on political action committees with reference to the Boren amendment.

The Boren amendment was not initially part of the discussions but it did arise during the discussions. We have reached an agreement. As far as I am concerned, it is fair to all my colleagues because everyone of us is involved in that particular issue.

So we begin our agreement with an agreement or what we will do with reference to the Boren amendment.

I will make the entire request and if there are questions, perhaps they could maybe be reserved until we go through the agreement and then come back and address the specific questions that Members may have.

Mr. President, I particularly thank the distinguished minority leader, who spent hours and hours on this agreement, as the majority leader has, in addition to the Parliamentarians and particularly the Chief Parliamentarian, Bob Dove, who is necessarily absent today because of a death in the family.

So we have spent a lot of time. Members of our staff have spent a lot of time.

We believe that it satisfies everyone's concerns. If not, I think it is good that we find out.

So I ask unanimous consent that at 10 a.m. on Monday, August 11, notwithstanding the provisions of the unanimous-consent agreement entered into on November 14, 1985, the Senate turn to S. 655 and there be 5 hours of debate total to be equally divided between the Senator from Minnesota [Mr. BOSCHWITZ] and the Senator from Oklahoma [Mr. BOREN] or their designees, and that 3 of the 5 hours of debate occur on Monday's session of the Senate.

I further ask unanimous consent that there be two amendments in order to S. 655, the pending Boren amendment No. 1168 and an amendment relating to campaign financing to be offered by Senator BOSCHWITZ, that these be first-degree amendments and not subject to motions to table.

I ask unanimous consent that at 9 a.m. on Tuesday, August 12, there be 1 hour of debate on the Boren amendment No. 1168 to be equally divided in the usual form and that following the conclusion or yielding back of time the Senate proceed to vote on the Boren amendment without any intervening action, motion, or debate.

I ask unanimous consent that following the vote on the Boren amendment the Senate proceed immediately without any intervening action to consideration of the Boschwitz amendment and there be 1 hour of debate to be equally divided in the usual form and following the conclusion or yielding back of time the Senate proceed to vote on the Boschwitz amendment without intervening action, motion, or debate; further, providing nothing in this agreement precludes further consideration of S. 655 during the remainder of the 99th Congress.

That is the agreement on the Boren amendment.

Since that is part of the total agreement let me proceed then with South Africa and Contra.

I ask unanimous consent that at 1 p.m. on Monday, August 11, the Senate proceed to H.R. 5052, the Military construction appropriations bill, and at the point only amendments dealing with title I be in order, and that they be limited to 20 minites each, to be equally divided in the usual form, and be limited to the following:

Senator WILSON, California issue; Senator MATTINGLY, technical changes; Senator MATTINGLY, school of Americans; Senator SASSER, relating to burden-sharing; Senator DIXON, weather training at Chuanute Air Force Base; Senator DIXON on Scott Air Force Base Computer Center.

I also ask unanimous consent that there be 1 hour of debate on title I, to be equally divided between Senators MATTINGLY and SASSER, or their designees, and that following the disposition of amendments and the expiration or yielding back on time on title I, the Senate immediately proceed to vote on the question: "Shall the Senate adopt title I" without any intervening action, motion, or debate?

I ask unanimous consent that following disposition of title I, of H.R. 5052, the Senate immediately proceed without intervening action, motion, debate, or quorum call, to consideration of titles II and III, en bloc.

I ask unanimous consent that at 10 a.m., on Wednesday, August 13, the Senate immediately proceed to vote, without any intervening action motion, debate or quorum call on cloture on closing debate on titles II and III, or H.R. 5052.

I ask unanimous consent that regardless of the outcome of the cloture vote taken on titles II and III, on Wednesday, August 13, the Senate proceed to consideration of cloture on S. 2701, the South Africa bill.

Further provided that, if after both cloture votes, cloture has not been invoked on both matters, a second cloture vote occur on the unclotured matter or matters.

I ask unanimous consent that there be 30 minutes of debate to be equally divided in the usual form, between each of the four above described cloture votes, if necessary, and that at the expiration, or yielding back of the 30 minutes allotted for debate between cloture votes, after the first cloture vote, the Senate proceed immediately to vote without any intervening action, motion, debate, or quorum call, or cloture on the matter to be clotured.

I further ask that unless cloture is invoked on both items, meaning South Africa and Contra aid, then this agreement is null and void, with the proviso, in which event, that as much of the August recess, as necessary, be null and void in order to complete Senate action on both H.R. 5052 and S. 2701.

I ask unanimous consent that once cloture is invoked on titles II and III, Contra aid, and S. 2701, South Africa, the Senate immediately resume consideration of titles II and III, of H.R. 5052, without any intervening action, motions, debate, or quorum call, under the terms and conditions of this agreement. Further, following disposition of H.R. 5052, under the terms of this agreement, the Senate proceed immediately, without any intervening action, motions, debate or quorum call to consideration of S. 2701, South Africa, under the terms and conditions of this agreement.

I ask unanimous consent that in the case of titles II and III, of H.R. 5052, prior to cloture, there be 10 hours of debate to be equally divided in the usual form between Senators MATTINGLY and SASSER, and that there be an additional 2 hours for debate for each of the following Senators for their use: Senators LEAHY, KERRY, and HARKIN to be used on Monday, August 11, prior to amendments being offered, and that if any of this time has not been used prior to the cloture being invoked, it be automatically vitiated.

I ask unanimous consent that after cloture has been invoked, on titles II and III, there be 4 additional hours of debate to be equally divided in the usual form, during which time, listed amendments may still be called up and disposed of.

I ask unanimous consent that in the case of S. 2701, South Africa, there be 8 hours of debate, to be equally divided in the usual form, between Senators LUGAR and PELL, and that there be an additional 2 hours of debate each, for Senators WALLOP and DENTON.

I ask unanimous consent that during the Senate's consideration of titles II and III of H.R. 5052, and of S. 2701, the following amendments be the only amendments in order, and that they be first degree amendments, germane

or relevant, and limited to 1 hour each:

On this side, the Contra aid amendments:

MATTINGLY, relating to Contra assistance; MATTINGLY, relating to Central America assistance; MATTINGLY, in the nature of a substitute; WALLOP, aid enhancement to Central America; DOLE, amendment with reference to Contra assistance; and a second Dole amendment with reference to Contadora process and the Lugar amendment relating to Central America assistance and Nicaragua in the nature of a substitute.

On the Democratic side of Contra aid amendments:

SASSER, strike titles II and III;

LEAHY, relating to restrictions on CIA involvement;

KENNEDY, relating to cut off of aid to Contras;

KENNEDY, relating to prohibition on U.S. combat troops;

KENNEDY, relating to channeling the $5 million for Misurasata's through State Department;

BYRD, relating to La Prensa;

BYRD, relating to funding levels for Contras;

BYRD, relating to United States Central America diplomacy;

DODD, relating to Contadora;

DODD, relating to human rights;

BIDEN, relating to diplomatic process;

BIDEN, relating to definition of role of U.S. advisors;

KERRY, relating to Contadora;

MELCHER, relating to elimination of the additional $300 million in bill;

MELCHER, relating to extending the $225 million in emergency food aid through September 1987;

MELCHER, relating to substitution of surplus commodities in lieu of $300 million cash aid;

HARKIN, relating to limitation on United States military trainers and advisors in Costa Rica or Honduras;

HARKIN, relating to using Contra funding for agriculture;

HARKIN, relating to limitation on CIA contingency fund;

PELL, relating to victims compensation fund;

SIMON, relating to transfer of Contra funds to IFAD;

SIMON, relating to a limitation of funding for programs in Nicaragua; and

KERRY, relating to enforcement procedure for section 204.

And I am advised that there is an amendment by Senator WILSON relating to Contadora.

I ask unanimous consent that once cloture is invoked on titles II and III of H.R. 5052, that all remaining amendments be limited to 30 minutes each, to be equally divided, in the usual form.

I ask unanimous consent that after the conclusion of the allotted time on titles II and III of H.R. 5052, and S. 2701, South Africa, if there are any amendments from the above lists of amendments that have not been disposed of, and Senators wish to call up, they be limited to 2 minutes each, to be equally divided in the usual form, and disposed of.

Let me go ahead and complete this list and I will come back and do South Africa.

Further, I ask unanimous consent that in relation to H.R. 5052, following the disposition of the above mentioned amendments and the expiration or yielding back of time, the Senate proceed immediately, without any intervening action, motion, debate, or quorum call to vote on agreeing to titles II and III, as amended, if amended, and then proceed immediately without any intervening action, motion, debate, or quorum call to third reading and then proceed immediately without any intervening action, motion, debate or quorum call, to vote on final passage of H.R. 5052, as amended, if amended.

I ask unanimous consent that in relating to S. 2701, South Africa, following the disposition of the above mentioned amendments, and the expiration or yielding back of time, the Senate proceed immediately, without any intervening action, motion, debate or quorum call, to third reading of S. 2701, South Africa, and then proceed immediately, without any intervening action, motion, debate, or quorum call, to consideration of H.R. 4868, the House companion measure to S. 2701.

Further provided that the Senate then proceed immediately, without any intervening action, motion, debate, or quorum call, to a nondebatable and nonamendable motion to strike all after the enacting clause of H.R. 4868 and insert the text of S. 2701, as amended, if amended, and then proceed immediately, without any intervening, action, motion, debate, or quorum call, to third reading of H.R. 4868, and then proceed immediately, without any intervening motion, action, debate, or quorum call, to vote on final passage of H.R. 4868, as amended.

I ask unanimous consent that no motions to recommit with or without instructions or motions to reconsider the final passage votes be in order to H.R. 5052, the military construction appropriations bill, S. 2701, South Africa, or H.R. 4868, House companion to South Africa.

I ask unanimous consent that with respect to consideration of S. 2701, South Africa, third reading occur not later than 6 p.m., on Friday, August 15, provided that if Senators still have amendments which have not been disposed of from the above mentioned list, which they still wish to call up, the Senate will not begin the August recess until disposition of such amendments, third reading of S. 2701, and final passage of H.R. 4868.

I ask unanimous consent that if this agreement is entered, House Joint Resolution 668, the debt limit, be advanced to third reading without any intervening action or motion, and with 1 hour equally divided, and that the vote on final passage of the joint resolution occur at a time agreed to by the majority and minority leaders but no later than the close of business on Saturday, August 9, 1986.

I ask unanimous consent that during the consideration of H.R. 5052, and S. 2701, there be alternate recognition of amendments between Democrats and Republicans.

I ask unanimous consent that following disposition of H.R. 5052, the military construction appropriations bill, and H.R. 4868, South Africa, that any motion to request a conference, insist on Senate amendments, and appoint conferees be indivisible and nondebatable.

Further provided that, during consideration of H.R. 5052, S. 2701, and H.R. 4868, there be 10 minutes equally divided in the usual form on any debatable motion, appeal, or point of order, if submitted by the chair.

Mr. President, I failed to list the South Africa amendments, and I will do so now.

Senator BOSCHWITZ has four amendments: No. 1, compensate South Africa blacks made unemployed by this act; No. 2, dealing with South African judges; No. 3, dealing with black-owned businesses; and No. 4, sense of the Senate to convene a conference on past apartheid democracy.

Senator PRESSLER: No. 1, strike section which authorizes sale of U.S. gold stocks; No. 2, exempt nonwhite South African businesses from ban on U.S. new investments; No. 3, 3 month delay in imposition of punitive sanctions; No. 4, strike section 501(b); No. 5, delete section 303; No. 6, assist South Africa's neighbors in compensating with sanctions; No. 7, strike lines 6 through 9 in section 311(b); and No. 8, strike section 501(c)(6).

Senator MCCONNELL: U.S. policing in the opposition to the system of apartheid in South Africa.

Senator LUGAR, to be identified during unanimous consent. Do we have his amendments? I will put in a call to Senator LUGAR, but the amendments, in any events, would have to be germane or relevant. I do not have them. It says amendments to be identified and we need to identify those amendments.

Senator SYMMS: No. 1, prohibition against sanction on strategic minerals; No. 2, require that the proceeds of the sale of gold be used to purchase silver; No. 3, banning purchases from countries which do not outlaw free trade

unions; and No. 4, to prohibit the sale of gold rubles.

Senator DURENBERGER: No. 1, dealing with prohibiting U.S. intelligence sharing with South Africa; No. 2, prohibit U.S. cooperation with armed forces of South Africa; and No. 3, same as No. 1; nearly the same as No. 1.

Senator MURKOWSKI, to restrict military cooperation with the Government of South Africa.

Senator DENTON: No. 1, disassociation the United States from organizations that condone "necklacing"; No. 2, to ascertain African National Congress compliance with U.S. law; No. 3, to ascertain whether Transafrican, the Free South African movement and the Washington Office on Africa are in compliance with U.S. law; No. 4, to encourage the African National Congress to disaffiliate with South Africa Communist Party; No. 5, encourage African National Conference to participate in peaceful process to end apartheid; No. 6, to assure just treatment of black South African exiles; and, No. 7, to assure that when future sanctions are imposed that full account has been taken of other national security interests of the United States.

I am now advised that Senator LUGAR will only have two amendments. One will be a technical amendment which will be germane and relevant. The second one will be an amendment in the nature of a substitue. Those are the only two that Senator LUGAR has.

Mr. BYRD. That would be in the nature of a substitute to what?

Mr. DOLE. To the bill.

Mr. BYRD. S. 2701.

Mr. DOLE. That is right.

Proceedings with D'AMATO-MOYNIHAN, there is one amendment permitting states and policed subdivisions, to enforce the state or local antiapartheid laws.

Mr. HELMS: No. 1, policy declaration taking note of progress made; No. 2, policy declaration toward African National Congress, and Pan Africanist Congress, and so forth; No. 3, authority to provide assistance to South African victims of apartheid and terrorism; No. 4, policy declaration to encourage fighting against apartheid to disavow Communist affiliations and so forth; No. 5, President to seek cooperation to end apartheid and terrorism in South Africa; No. 6, prohibit scholarship aid to known Communists, or those known to have engaged in violence; No. 7, earmarking of $175,000 for direct assistance to families affected by violence, and $500,000 to blacks working for multiracial sharing through nonviolence; No. 8, declaration against "necklacing"; No. 9, prohibit assistance to businesses owned by those who have participated in violence; No. 10, prohibit assistance to housing of black employees of U.S. Government who have participated in violence; No. 11, adds to the Sullivan code of conduct; No. 12, prohibits issuing of visas to South African nationals known to be Communists or terrorists; No. 13, conditions termination of provisions upon certain actions of the African National Congress; No. 14, requires the President to report to Congress on the extent of Communist infiltration in antiapartheid group; and No. 15, any combination of the above amendments.

Mr. WALLOPS: No. 1, extend provision applicable to South Africa under the act to the stated countries and any other country that has a record of human rights violations; No. 2, extend provisions under the act of the Soviet Union; No. 3, denunciating the practice of "necklacing"; and No. 4, strike section 308, under the visa provisions of the bill.

For Senator MCCLURE: No. 1, strikes section 309 relating to sale of U.S. gold stocks and, 2, dealing with strategic minerals.

Senator HUMPHREY will have to identify that.

Mr. HUMPHREY. Do we need a description at this point?

Mr. DOLE. If we could have a brief description.

Mr. HUMPHREY. It will deal with the withdrawal of air rights for carrier coordination.

Mr. DOLE. Senator HATCH, I must say all I have for Senator HATCH is an unidentified amendment relating to South Africa, germane or relevant. And the same is true of the majority leader and Senator CHAFEE.

Senator D'AMATO, which would be a second amendment, State and municipal apartheid statutes and flow of Federal funds; Senator WEICKER, there are two amendments, both identified germane or relevant. I am not certain that will be satisfactory.

Senator KASSEBAUM, delete language for UISAS.

For Senator DANFORTH, encourage suspension of violence while negotiations take place between the South African Government and black community.

Senator WILSON, which would be an additional amendment, United States companies training of black South Africans.

On Senator NICKLES, I overlooked exempting agricultural export products from credit sanctions.

Then the Democratic list of amendments on South Africa: Senator CRANSTON, four amendments, the first relating to the computer ban, second relating to textile ban, third relating to disinvestment trade embargo, fourth relating to congressional approval of sanction waiver; Senator BIDEN relating to automatic sanction trigger; Senator DODD relating to expansion of import ban; Senator DODD relating to South African banks; and Senator KERRY relating to transfer of South African sugar quota to the Philippines.

Senator PROXMIRE has four amendments; the first relating to South Africa banking, the second relating to the South African banking, third relating to termination of sanctions, fourth relating to section 403, private right of action subsection (c).

For Senator MOYNIHAN: An amendment relating to States' enforcement of State or local antiapartheid laws;

For Senator SARBANES: An amendment relating to South Africa landing rights;

For Senator LEVIN: There are four amendments, and the first is relating to munitions list export ban; relating to commodity control list export ban; relating to foreign tax credit; and relating to meeting between Mandela and United States Ambassador to South Africa.

For Senator SIMON: There are two amendments. The first relates to flurospar ban; and relating to definition of South Africa to include territory occupied in violation of international law.

For Senator EAGLETON: There is an amendment relating to termination of sanctions.

For Senator BRADLEY: There is an amendment relating to sale of gold.

For Senator RIEGLE: There is an amendment relating to expulsion of South African military attachés from the United States.

Senator KENNEDY has three amendments relating to military construction. That is No. 1. No. 2 relates to Commonwealth sanctions I; and the second relates to Commonwealth sanctions II.

If I might just take another minute, 2 minutes, to sort of put it all in perspective because It may be somewhat confusing. [Laughter.]

In addition to the Boren amendment which we will dispose of as far as Monday is concerned, at 1 o'clock what we are going to do is consider title I of the military construction appropriations bill for the limited number of germane amendments be in order.

After the conclusion of title I, the title in effect would be closed off from further amendments. That will take care of title I.

Then the Senate will begin Contra aid titles II and III and 10 hours will be equally divided with 2 hours each for the following Senators. I have already indicated Senators KERRY, HARKIN, and LEAHY, and also during this time, after the debate, amendments will be in order which are listed as germane and relevant limited to 1 hour each.

On Wednesday, we vote at 10 o'clock. The Senate will vote on cloture on Contra aid. Then the Senate will vote cloture on South Africa. Assuming both failed regardless of the

outcome, the Senate will have another cloture vote on Contra aid and South Africa. In other words, if we get cloture the first time around, we will go right back to titles II and III.

If we do not get cloture on Contra aid the first time, we then vote cloture on South Africa, and we come back and have another cloture vote on Contra aid. If we have not gotten the cloture the first time on South Africa, then we would have a second cloture vote on South Africa.

□ 1530

That is what that means.

If we get cloture on one and not the other either the first or the second time, then the whole agreement is void. Under this agreement we would stay in the following week to complete action on both measures. That means final disposition.

After the Contra issue, the Senate will have 8 hours of debate and 2 additional hours for Senators WALLOP and DENTON. At this point the amendments may be called up. There are a lot of amendments.

What we tried to do, I might say to may colleagues—and you have figured it out, I guess, you have had enough time—is to strike a balance, so that everybody will know they have been fairly treated, whether they were for or against Contra aid, for or against sanctions against South Africa. We tried to make as certain as we could that each issue would have about the same amount of time.

As I look at it, there might be a bit more time on the Contra aid issue and a bit less on South Africa. Both are vitally important to many Members on each side. But we did understand what we were searching for was fairness to the people who were for it to have time to debate and people against it would have time to debate, and all the amendments would be considered even though we ran out of time. You could still call up your amendment and have 2 minute of debate and ask for a rollcall.

Has Senator WEICKER identified his amendments?

Senator WEICKER has two amendments deleting or adding sanctions to S. 2701.

The McConnell amendment I referred to on South Africa I described as United States policing in opposition to the system of apartheid in South Africa. It should be changed to an amendment on South Africa in the nature of a substitute.

I am happy to yield to the minority leader.

We also have cloture motions to send to the desk at the appropriate time.

Mr. BYRD. Mr. President, I thank the distinguished majority leader. I thank all Senators for listening and for their very close attention.

On those amendments that have not been identified, of course, it is understood that they would have to be identified before we consent to this agreement. I have just a few modifications I would like to call to the distinguished majority leader's attention.

With reference to the 2 hours which would be allotted to each of the three Senators—Messrs. KERRY, HARKIN, and LEAHY on Monday—Mr. KERRY would like permission to carry over one-half of his time to Tuesday; Mr. HARKIN would like the same.

Mr. LEAHY. If the distinguished Senator from West Virginia would yield at that point, I had understood that the 2 hours, if not used, vitiates at the appropriate time on the cloture motion, as stated by the distinguished Senator from Kansas in the request. But I also had assumed that if, in my case, my 2 hours are not used on Monday, provided I were to use it prior to the time it would be vitiated by the cloture vote, I could still use it on Tuesday. I hope my understanding is correct, or that this would be modified to protect that. I would ask for such a modification. I fully understand vitiating the remainder of the 2 hours if not used at the cloture vote. But I would not want to be put into the position of it all being used on Monday.

Mr. BYRD. Mr. President, may I say to the distinguished Senator from Vermont, the original intent and the original request provided for the use of 2 hours each by the three Senators named, all to be used on Monday. There were at least two reasons for that, one being to get as much debate up front as possible before the cloture votes were had; second, in view of the fact that on Monday, some Senators may be a little late in the day getting here, it was thought that as much debate could be gotten out of the way on Monday, thus clearing the way for rollcall votes and action thereafter.

It was understood to begin with that the 2 hours each for Mr. LEAHY, Mr. HARKIN, and Mr. KERRY would all be consumed on the first day. Subsequent thereto I received the request from Messrs. KERRY and HARKIN that one-half of their time be utilized on the second day.

Another reason is that there are a plethora of amendments, as we have all seen, and it is going to be a colossal problem at best, getting the amendments up, giving Senators the opportunity to debate them, and get rollcall votes on them.

We are hoping that all Senators will work together as best as possible to try to compress the time, to utilize it in a way that can best expedite the overall agreement. I hope, if we could, we would not have to carry over 3 hours out of the 6.

Mr. LEAHY. I understand, Mr. President. I want to cooperate. I do not want to go so long that someone files cloture under the unanimous-consent request, and I am not suggesting in any way that distinguished majority leader would cut us off by adjourning early on Monday. I do not mean to suggest that.

But I also know that there will be a pile of things coming and the hour would get late, and I am willing to stay as late as anyone on Monday, or we might not even get the debate in I wonder as a compromise, instead of asking to carry over my time on Tuesday if I might carry a half hour of my time on Tuesday provided it is not used on Monday night.

Mr. DOLE. I do not have any quarrel with modification. I think we ought to keep in mind, just being reminded by the distinguished Senator from Alaska, that we will have about 18-hour-days in any event. If we start moving Monday into Tuesday, I am not certain where we are going to move Friday. I know it will be Saturday, or I assume.

Every amendment has 1 hour prior to cloture being invoked. After cloture is invoked it drops to 30 minutes. I believe it was suggested by the Senator from California, Senator CRANSTON, that maybe we could do the debate up front on South Africa and Contra and maybe set the stage for the amendments. Maybe that will not work.

Mr. STEVENS. Will the Senator yield?

Mr. LEAHY. If I might make myself clear, I fully expect to use all my time on Monday night, but if I could just have that protection. If I am not going to need it, I will not ask for it. Nobody wants more to get the debate actually rolling on these issues than I do.

Mr. KENNEDY. Will the leader yield?

Mr. BYRD. Might I yield to the distinguished Senator from Alaska first?

Mr. STEVENS. I thank my friend. My only comment is that I have seen so many of these agreements that contemplate people being here early in the morning to offer their amendments, but we do not get started until noon or 1 o'clock. This is not going to work unless there are some specific timeframes for the debate and specific timeframes for the amendment process, in my judgment. If you want to carry over the debate until the next day, it ought to be in the debate timeframe on Tuesday and not at the time when amendments will be called up. I really think you will have to allocate these 18 hours a day for 5 days to make it through all of these amendments.

Mr. BYRD. May I say, on Tuesday we will expect amendments to be called up, even during the 10 hours of debate. If Senators want to call up amendments during this period, they should call them up.

□ 1540

Mr. KENNEDY. Mr. President, I have had the good fortune of serving in this body for some 24 years. I commend Senator BYRD and Senator DOLE for this request of the U.S. Senate. I think they have tried to accommodate, in the best tradition of this body, views which are widely divergent in a very complex, involved process. I, as one who has passed, quite frankly, the majority leader and the minority leader on certain issues, want to express my very deep appreciation and gratitude for what I think is the thoroughness of consideration that has been given to all views.

All of us know at this hour, after a very extensive week, we can flyspeck this agreement until tomorrow morning. I hope we will not. I think that this request has demonstrated a real sensitivity to trying to accommodate different interests. Many of us might have structured it in different ways, but I think all of us who share this tradition of trying to accommodate different interests owe the Senator from West Virginia and the Senator from Kansas a very deep debt of gratitude and I, for one, who feel very strongly about both issues, want to express that view at this time.

Mr. BYRD. Mr. President, I thank the Senator from Massachusetts, not only for the effective efforts he put into developing the agreement but also for his strong expression of support for the agreement now that it has been outlined.

I hope, then, that we could agree that one-half hour of the 2 hours of Mr. LEAHY's request will go over until Tuesday if he does not use it on Monday.

Also, Mr. DODD wishes 30 minutes of the time on titles I and II under his control before cloture. I would be willing to take that 30 minutes from the 10 hours if that would be agreeable so we do not add time to the overall debate; we simply let Mr. DODD have 30 minutes of the 10 hours.

Mr. DOLE. Mr. President, I do not know of any discussion. The distinguished Senator from Georgia is here. I understand there is 1 hour equally divided between Senators MATTINGLY and SASSER. This would be an extra 30 minutes on title I?

Mr. BYRD. Yes, and I would suggest that it be equally divided between the two managers, to come off the 10 hours; it would be 15 minutes off one side, 15 minutes off the other.

Mr. DODD. If the minority leader would yield——

Mr. BYRD. Yes, Mr. President, I yield.

Mr. DODD. It seems to me that on Monday, given the unanimous-consent agreement that has been reached already with those who will be using the 2 hours or a good portion of the 2 hours, there is a practical matter that getting involved on Monday may be difficult. Nonetheless, I would like an opportunity prior to the cloture motion on Wednesday to have a half-hour to discuss the background and history of this particular question, rather than a specific amendment. So I hope that on Tuesday, I would be able to have that one-half hour in order to lay that framework out. That is the thing I am hoping for.

Mr. BYRD. That would not add to the overall time. I am just suggesting that from the 10 hours of debate, 15 minutes come from each side and be allotted to Mr. DODD for his control.

Mr. DODD. Privided that is not on title I. Title I would come on Monday. I would rather not be constrained to fit that half-hour in on title I. I would rather leave it until we are considering title II on Tuesday.

Mr. MATTINGLY. Mr. President, would that be an extra half-hour?

Mr. DODD. No, it would be extracted from the 10 hours, 15 minutes to a side.

Mr. MATTINGLY. I think it ought to be allocated proportionally. I think we have it right now as 8 hours and 2 hours.

Mr. BYRD. No, it is 10 hours.

Mr. MATTINGLY. I think it ought to be allocated proportionally, 8 hours and 2 hours of debate, am I not correct, Mr. President? There are 8 hours of debate to their side and 2 hours on our side.

Mr. DODD. Mr. President, the 8 hours is on South Africa. On Contra aid——

Mr. DOLE. I might say if the minority leader would yield, there is more interest on that side taking time on Contra aid and there is more interest on this side in taking time on South Africa. What we have attempted to do is make certain we understand those concerns and try to calculate the time accordingly. So on South Africa, we have set aside 2 hours for Senator DENTON, 2 hours for Senator WALLOP. We think we have a pretty good balance. I do not think this is a matter of any great moment.

Mr. MATTINGLY. I have no objection, Mr. President.

Mr. DODD. There is no objection on that particular request, did I understand that correctly?

Mr. HARKIN. Reserving the right to object.

Mr. BYRD. I hope we have resolved Mr. DODD's request.

Mr. HARKIN. I am reserving the right to object because I did not catch it. Was this a half-hour on title I or II?

Mr. DODD. I sought the time on title I and title II so as not to be constrained. I would prefer to have the half-hour for debate on titles II and III.

Mr. HARKIN. Dealing with the subject matter in titles II and III?

Mr. DODD. That is correct.

Mr. HARKIN. But not on title I.

Mr. DODD. That is correct.

Mr. HARKIN. So what the Senator from Connecticut is asking is that he be given a half-hour to discuss something on title II and title III?

Mr. DODD. That is correct.

Mr. BYRD. May I call to the attention of the Senators also that there is 1 hour of debate on title I, the military construction bill, under the control of the managers. They can yield that. There are 10 hours on titles II and III of the military construction bill. The managers can yield that to Senators so Senators do not have to feel they have to carve out their 15 minutes here today or 20 minutes.

I think we have settled the problem of the Senator from Connecticut.

Mr. DODD. I thank the Senator.

Mr. President, it is my understanding that that unanimous-consent request has been accepted, is that correct?

Mr. BYRD. That is part of the overall agreement, yes.

Mr. MELCHER. Mr. President, perhaps both leaders can straighten this out. First of all, is it clear that during the 10 hours of debate, some of which might be used on Monday on titles II and III, and I would like to have the distinguished majority leader's attention on this.

Mr. DOLE. Excuse me, Mr. President.

Mr. MELCHER. Is it clear that on titles II and III, under the 10 hours of debate equally divided, if it is opportune, amendments could be offered on Monday?

Mr. BYRD. Yes.

Mr. DOLE. Yes.

Mr. MELCHER. And there could either be time yielded out of the 10 hours or, if there is a lull on the recognition of those on the list——

Mr. DOLE. That is correct.

Mr. MELCHER. All right. Then, do I understand correctly on South Africa that at the conclusion of the time—this is on page 4 of the unanimous-consent request, the top request, that on the conclusion of all time on South Africa, amendments that were not brought up could be brought up at that time. What would be the time limit on those amendments?

Mr. BYRD. Two minutes.

Mr. MELCHER. Two minutes. So it applies equally to titles II and III of the first bill on Contras and on South Africa.

Mr. DOLE. Yes.

Mr. BYRD. Yes, Mr. President.

Mr. MELCHER. I thank both leaders and I commend both leaders.

Mr. STEVENS. Will the minority leader yield for another question?

Mr. BYRD. Yes, Mr. President.

Mr. STEVENS. I presume this agreement is based on an assumption that the Department of Defense bill is fin-

ished before 10 a.m., on Monday, August 11.

Mr. DOLE. No, this is not.

Mr. BYRD. No, this is not. This agreement takes hold immediately the first of next week.

Mr. STEVENS. What happens to the DOD bill? It is set aside until after the recess?

Mr. DOLE. Yes.

Mr. BYRD. Or until after this is completed.

Mr. DOLE. Hopefully, we are going to finish that in this next 3 hours.

Mr. STEVENS. As far as this Senator is concerned, I am going to reserve the right to object and I may object. We are within 13 amendments of finishing this bill. We have not had an authorization bill now for 3 years before we have had an appropriations bill. This year we must have.

It is not possible to get through this budget process without an authorization resolution. I want some understanding that the defense bill will be finished before Monday morning at 10 o'clock. That means Senators will have to agree here and now to limit their amendments, so we can finish them either tonight or tomorrow afternoon so we can start this on Monday morning. Otherwise, we have frustrated entirely the budget process by this agreement, in my judgment.

□ 1550

Mr. BYRD. May I say with respect to Senator MELCHER'S inquiry a moment ago, I am sure the majority leader will join me in hoping Senators will indeed begin calling up amendments on Monday, even after title I has been agreed to and voted on, because the more amendments we can dispose of, dealing with titles II and III, on Monday, the greater the opportunity for Senators to call up their amendments before cloture is voted, if it is voted, prior to the time that the 2-minute limitation takes place.

I yield to the Senator from Iowa.

Mr. HARKIN. I thank the minority leader for yielding. I also want to add my compliments to the distinguished minority leader and majority leader for working this out. I think it is a fair agreement, it is one which will allow complete and open and full discussion of the issues surrounding both the Contra aid and the South Africa situation. I am hoping that there will not be any objection to this unanimous-consent agreement. I only have basically one comment to make.

I join with Senator LEAHY, I do intend to use the 2 hours that have been allotted to me on Monday. I just want to be assured that if something happens on Monday, the schedule slips and things happen, I might at least have some time reserved to continue on Tuesday morning and in that regard I would ask of the distinguished majority leader if in fact it was his intention to bring the Senate in early Tuesday morning?

Mr. DOLE. I think the distinguished minority leader has the floor but I have no problem with that.

Mr. HARKIN. Because of the situation we come in early Tuesday morning, finish our debate and get on with the amending process. So that is the only reason that I wanted to be protected on that.

The other question I had was on the 10 hours of debate that is running, that will run prior to cloture on Wednesday, for example, that amendments can be drawn up at that time and offered, debated, and voted on at that time, and I am asking the periods used for voting, will that count in that 10 hours or not?

Mr. BYRD. Mr. President, there is so much noise going on in this Chamber, this is a very complex agreement and the questions are pertinent and I would like to be able to hear the questions before attempting to respond.

The PRESIDING OFFICER. The minority leader is correct. The Senate is not in order. Will staff please take their seats and Senators take their seats. Please continue.

Mr. BYRD. I thank the Chair. Will the Senator repeat his question.

Mr. HARKIN. I thank the distinguished minority leader. The question surrounds the 10 hours of debate that comes before the cloture vote on Wednesday on the Contra bill, it would also pertain to the 8 hours of debate prior to the final vote on the South Africa bill also that during that 10 hours of debate amendments can be called up in the usual form, offered and debated and voted on. During that time votes are held, the 15-minute voting period, for example, is that counted and subtracted from that total 10-hour period?

Mr. BYRD. Fifteen minutes on the rollcall vote?

Mr. HARKIN. Yes.

Mr. BYRD. It does not come out of the 10 hours. The 10 hours are for debate.

Mr. HARKIN. I understand.

Mr. BYRD. Rollcall votes are not considered to be debate.

Mr. HARKIN. I understand but obviously, the debate will and everything else. Again I just want to compliment the two leaders for working out what I consider to be an eminently fair compromise of the situation and I hope we can move ahead with this without objection.

Mr. BYRD. I thank the distinguished Senator.

Mr. LEVIN. Will the Senator yield?

Mr. BYRD. I yield to the Senator.

Mr. LEVIN. Again, I would also like to commend the leaders on this. I have discussed one provision with the Parliamentarian and there is some ambiguity I think left on its face that I would like to inquire about relative to two matters. The provision in question is at the top of page 2, if cloture fails on both, as to what would happen. My question is this: If cloture is invoked after two votes on each subject, invoked on one of the subjects but not on the other, at that point this agreement is null and void?

Mr. BYRD. No, not if it is invoked on one and not on the other, the first two votes. But after the four votes, is that what the Senator is saying?

Mr. LEVIN. That is correct, after four votes, if cloture has been invoked on one item but not on the other, at this point the agreement is null and void?

Mr. BYRD. Yes, it would be.

Mr. LEVIN. My question has to do with that situation. No. 1, am I incorrect in believing that at that point we would be in a post cloture situation on the item that cloture had been invoked on but a precloture situation on the other one?

Mr. BYRD. I was distracted. Will the Senator repeat his question?

Mr. LEVIN. Yes. Assuming after the four votes cloture has been invoked on one item but not on the other, at this point will we be in a postcloture mode on an item on which cloture had been invoked?

Mr. BYRD. No. The agreement from top to bottom will be null and void.

Mr. LEVIN. Including any action that we have taken under it

Mr. BYRD. That is exactly correct.

Mr. LEVIN. My second question is this——

Mr. BYRD. No, no, no, not including any action that had been taken on amendments.

Mr. LEVIN. Including any action on cloture.

Mr. BYRD. Yes, that is correct.

Mr. LEVIN. My second question is this: In that situation where we have invoked cloture on one but not the other, this language says that so much of the August recess as necessary will be null and void in order to complete Senate action on both. Is it my understanding then that unless cloture is invoked on both and both disposed of, we could not have a recess even though a majority of us desired to do so, that this agreement would supersede our usual rules which allow for a majority of us to vote to recess, in support of a motion to recess.

Mr. BYRD. Well, let me say this, that any agreement, of course, can be voided by a subsequent unanimous-consent agreement.

Mr. LEVIN. That is why I say majority of us instead of unanimous consent.

Mr. BYRD. Well, the agreement is that if the two matters are not clotured, the agreement is null and void and, if this agreement becomes null and void, then so much of the recess as is required to complete action on

these two measures would be null and void. That is the unanimous-consent agreement.

Mr. LEVIN. Am I correct in my statement that any one of us could prevent an August recess even though the majority of us wish to recess without disposing of these two matters?

Mr. BYRD. In my judgment, that would be correct. That would be correct. If we agree to this, we are saying we are going to stay here during that August recess, if cloture is not invoked. And if this agreement becomes null and void, then we are going to stay here during the August recess until action is completed on both measures. Now, action can be completed in many ways. I must say I do not think that is going to happen.

Mr. STEVENS. Mr. President, will the Senator yield again? I wonder if I could ask the two leaders if we could make this agreement contingent upon the completion of the DOD bill before the close of business this evening?

Mr. DOLE. Assuming the minority leader will yield, I think we can do that. I would be willing to do that.

Mr. BYRD. Very well.

Mr. DOLE. I ask unanimous consent the aforementioned agreement be null and void if the DOD authorization bill is not disposed of by the close of business tonight.

Mr. BYRD. Well, I do not want to enter into that agreement. I do not want this agreement to be null and void if this bill is not finished tonight.

Mr. STEVENS. How about a time certain for voting on DOD?

Mr. BYRD. I think we could arrive at that later if we just take a pencil and try to add up the amendments and the time that remains. I will be happy to try to work out something on that, but I would not agree that this agreement be null and void if we do not finish action on this DOD bill tonight.

Mr. STEVENS. Mr. President, reserving the right to object, I want to say I shall object unless we can assure that the managers of this bill can complete this bill.

□ 1600

I think we all ought to recognize that our good friend is managing this bill for the last time. It is a bill that must be finished in order that he can take it to conference and bring it back here as a bill that can be completed this year. I would like to see us finish this bill tonight.

This agreement the two leaders have negotiated is a monumental agreement, the best one I have ever seen in my 18 years here. But I do believe that this DOD bill must be finished before we start this on Monday morning.

Mr. BYRD. Mr. President, the distinguished Senator from Alaska is right. There is no problem, in that the majority leader can keep us here this evening. I do not think we need to enter the kind of agreement that was just discussed, because that would destroy the arrangement. I believe the DOD bill can be finished today.

Mr. GOLDWATER. Mr. President, will the distinguished Senator yield?

Mr. BYRD. I yield.

Mr. GOLDWATER. Mr. President, I agree with everything the Senator from Alaska has said.

We have 13 amendments remaining, four rollcall votes. I think that, after being here 6 days and 6 nights, we should be allowed by the leader to finish this bill. If we do not finish this bill tonight, it will never be finished. We know that is coming up, and we are going to face once again a situation where the military of this country has not received the proper attention.

I have to say this, Mr. President, with all due respect. I admire what the Senator from West Virginia and the Senator from Kansas have done. Frankly, it is something I did not think they could do. But here we are worrying about what we are going to do to a country thousands of miles away, wondering what we are going to do to a country 800 miles away, and we are talking about defending the freedom of the people of America. I happen to think that that should take precedence over everything else.

Mr. BYRD. Mr. President, I suggest that the distinguished majority leader ask unanimous consent that all action on the Defense Department appropriations bill be completed not later than 12 o'clock midnight tonight. I think that is more than enough time, so that it will get this argument out of the way.

Mr. DOLE. Mr. President, I do not want to object, but I have been advised by one chairman that depending upon what the nature of the amendment may be, that can be difficult to do.

I wonder if we might modify that to say that if we do not complete the DOD authorization bill by midnight tonight, we revisit this agreement—in other words, go ahead and get approval of the agreement; but if we do not finish DOD, then we would have to recall and resubmit the unanimous-consent request.

Mr. BYRD. Mr. President, I do not want to take a chance on this. There have been many hours spent on this. It involves many emotional issues. There is no reason why we cannot finish the DOD bill tonight.

I have two amendments on the DOD bill. I would like to call them up.

It is not my fault that this DOD bill was not laid down until the close of business on last Friday. It could have been called up earlier.

I have two amendments I would like to call up. I think they are amendments that should be considered. I think they are important. But I am perfectly willing, in order to make this thing work and avoid keeping Senators here too late tonight, to withdraw one or both of those amendments from the list, if I have to do it in order to complete action by midnight.

I certainly do not want to be around here at midnight, because I have been here five nights already until midnight, and I have not been to bed during the past 4 days before 1:30 in the morning, and one can only stand so much of that.

I am willing to take down one amendment or both amendments in order to complete action on the bill.

Mr. DANFORTH. Mr. President, reserving the right to object——

Mr. BYRD. I have not made any request.

Mr. DANFORTH. I say to the Democratic leader that I appreciate his very generous comment about the possibility of withdrawing amendments.

One of the amendments the Democratic leader is considering offering, I am told, has to do with trade and security. I say to the leader that the same subject matter is going to be heard in the Finance Committee on Wednesday. We have a day's hearing on this. The subject of the amendment, as I understand it, closely approximates a bill that a number of Senators introduced, I think, about a year and a half ago. It is my thought that that particular subject matter might be more appropriately addressed in the Finance Committee, because we are going to have a hearing exactly on that subject in 4 days.

Mr. BYRD. Mr. President, in responding to the distinguished Senator from Missouri, I say that I offered this amendment in more comprehensive form by way of a bill a year ago or longer. There have never been hearings on it.

I was somewhat amazed to see an omnibus trade bill floating around here not too long ago that had most of my language in it. That is all right. This amendment which I have in mind here does not contemplate that whole measure. I have taken out of this amendment, so as to avoid any constitutional question on the floor, any question with respect to levies, duties, giving the President additional power to raise import duties, or to impose quotas, et cetera. I may favor a lot of than, but I took it out of this amendment. This amendment compresses the time the Commerce Department has under the present law, which is a year, in making a determination with respect to an industry that petitions for relief because the imports of the products it manufactures threaten to impair the national security.

At the present time, the Commerce Department has a year to make a report to the President. The President

may take 1 or 2 years or more, while the industry that is suffering and petitioning for relief may have to wait all this time without knowing what the decision will be or the reasons for the petition's rejection.

My amendment would compress dates and give the Defense Department a voice in the report that the Commerce Department submits to the President.

Mr. DANFORTH. Mr. President, further reserving the right to object, I understand what the Democratic leader is saying. But the subject matter of the leader's amendment is also incorporated in a much more narrow bill that has been introduced, I think, by about 10 Senators. A hearing on this precise issue is scheduled in the Finance Committee on Wednesday.

It strikes me that if the issue is trying to wrap up the defense authorization bill in a timely fashion tonight, this might be one issue that could be left to the work of the Finance Committee, since we are going to be addressing this question.

I also say, with respect to completing the work on the defense bill, that the pending amendment, which was offered by Senator MOYNIHAN, is obviously a controversial amendment. I plan to speak on that when we get back to that amendment. I think that would be very time consuming. My hope on that amendment is that in fairly short order a tabling motion could be made, so that if it succeeds, we could limit the amount of time we are going to be spending on subsidized sales to totalitarian countries. If that tabling motion does not prevail, then I would guess that it would be very difficult to complete work on the Defense Department authorization bill in a timely fashion this evening.

□ 1610

Mr. BYRD. Mr. President, I will be happy to limit the time on my amendment on the DOD bill to 10 minutes, equally divided.

It does not treat generically the whole matter of trade. It deals only with imports that threaten to impair our national security, and it speeds up the processes whereby the Commerce Department, the Defense Department, and the President make their determinations, have those determinations appear in the Federal Register, and give the public, the petitioners, and Congress the reasons why the petitions have been turned down. I can do it in 10 minutes, equally divided. I think it ought to be on this bill because it deals with national security.

Mr. DANFORTH. Mr. President, further reserving my right to object, again I think that the Democratic leader assumes that this subject matter is only dealt with the so-called omnibus trade bill. It is dealt with as a title to that bill but also essentially the same subject matter, as a matter of fact, the identical subject matter, is dealt with in S. 1871 which was introduced by Senator GRASSLEY and others and that bill, S. 1871, will have a hearing in the Finance Committee on Wednesday.

It seems to me that in a matter relating to international trade and the fundamental change in the trade laws, this really should be brought before the Finance Committee. Since it is an active matter now before the Finance Committee, I really do think that it would be the best solution to deal with it in what I am sure would be a much longer debate than this 10 minutes on the floor of the Senate.

Mr. BYRD. Mr. President, I have been trying to say it every way I know how that this amendment I have does not bring about a fundamental change in the trade law. I will be glad to take 10 minutes on it later and if someone wants to table the amendment they can so move.

On the other amendment I have listed I would be happy to limit debate to 10 minutes equally divided in an effort to expedite action.

Mr. GOLDWATER. Will the Senator press for that unanimous consent on what he has asked for? It is very important to me.

Mr. BYRD. Yes. The Senator means on the two amendments?

Mr. GOLDWATER. Tonight, finishing this bill tonight.

Mr. BYRD. I yield to the distinguished majority leader for his comments.

Mr. DOLE. Mr. President, if the minority leader will yield.

Mr. BYRD. Yes, I yield for that purpose.

Mr. DOLE. I know the chairman of the Finance Committee is here. Maybe if the minority leader could yield to Senator PACKWOOD.

Mr. BYRD. Mr. President, I yield for that purpose without losing my right to the floor.

Mr. PACKWOOD. I thank the distinguished minority leader.

Mr. President, I say to the majority leader I apologize. I just left the Finance Committee. I did not hear Senator DANFORTH on the speaker as I was coming over.

We do have a hearing set on the subject of national security and trade on Wednesday. It is a subject that I am deeply, personally interested in in the full committee hearing over which I will preside.

One of the reasons I wanted this hearing that was set especially at my request was that I have a continual frustration with the military on exports on licenses and things that will not let my manufacturers sell because of military security.

I am reluctant, if I understand the amendment, to get into a debate about whether we are going to give DOD any further power to clarify what is necessary for national security as far as imports or other trade matters may be concerned, but I can assure the majority leader and minority leader this is the very subject we are having the hearing on Wednesday.

The hearing has been set for some period of time. It was not suddenly called up on the spur of the moment as a defense against this amendment.

I hope very much the amendment did not have to come up today. If it does come up, I simply cannot agree to a time limit on it.

Mr. BYRD. Mr. President, if I may respond to that, I am not disposed to be bullheaded about the amendment. I have had this legislation introduced here for well over a year. But I am glad to see this sudden willingness not to give some consideration to a National Security Trade Act amendment.

But I will certainly consider what the distinguished Senator has said, and I may or may not press this in the remainder of the day. I was prepared to, I think, present testimony for the hearing which was to have been earlier this week but which was postponed.

Mr. PACKWOOD. At the request of one of the senior Democrats on the committee who wanted to bring some specific witnesses, it was moved from Wednesday or Thursday of the current week. Which week are we in? It is still Saturday. Of this week to next week at the request of one of our colleagues.

Mr. DECONCINI. Will the minority leader yield on that subject matter?

Mr. BYRD. I will say I will not put forth a roadblock.

Mr. PACKWOOD. I thank the Senator.

Mr. DECONCINI. Will the distinguished minority leader yield for just a comment on his trade subject?

Mr. BYRD. Yes.

Mr. DECONCINI. I happen to agree with the bill that he submitted. I just want to give notice here I am one Senator who is not going to permit this to have unanimous consent that we have to finish this, when two Senators stand up and say "If I don't get my way on tabling motion, I am going to extend it forever."

So I am going to object to any unanimous consent that we finish this bill tonight or at any time. We can finish it as long as the majority leader wants to keep us in here.

I think for us to be intimidated by Members who do not get their way on a motion to table, we are not going to have a recess, not going to go into South Africa, not going to do Contra aid, not going to do the minority leader's trade bill is nonsense.

Mr. MELCHER. Mr. President, reserving the right to object.

Mr. GRAMM. Mr. President, will the minority leader yield?

The PRESIDING OFFICER. The minority leader has the floor.

Mr. GRAMM. Will the distinguished minority leader yield?

Mr. BYRD. I have not propounded any request.

I merely suggested to the distinguished majority leader that he may wish to propound a request anent the pending bill.

Prior to that time, I am glad to yield to the Senator from Montana without losing my right to the floor, and then to the distinguished Senator from Texas.

Mr. GRAMM. Mr. President, will the distinguished Senator yield?

Mr. MELCHER. Mr. President, will the Democratic leader yield to me?

Mr. BYRD. Yes.

Mr. MELCHER. I thank the Democratic leader.

I really believe that there should not be any objections from that side, from the Republican side, particularly in light of wanting to finish the defense bill because unless this agreement is agreed to regular order brings us right back to the debt ceiling and we are not on defense anymore. We are back on the debt ceiling with only two amendments in order, those amendments being on Contra aid and South Africa.

So I am a little bit amazed by all this discussion. We seem to take too much time in discussion about the unanimous-consent request but when we are discussing, from the Republican side, from the majority side, there are objections to it. In order to get the Defense bill passed, we are forgetting unless we get this agreement the regular order that is part of this agreement, I refer to the third from the last paragraph——

Mr. GOLDWATER. We are not objecting to anything over here. We want to get the bill passed.

Mr. MELCHER. All right.

Mr. GOLDWATER. All right.

Mr. STEVENS. I might say if the Senator will yield, Mr. President——

The PRESIDING OFFICER. The minority leader has the floor.

Mr. BYRD. I yield to the Senator.

Mr. MELCHER. That is fine. Let us get on with it, because unless we have agreement on this and we do not get vitiated that call for the regular order that puts us right back on the debt ceiling with no agreement. We are on South Africa and Contra aid tonight.

Mr. BYRD. The Senator is correct.

I believe I promised to yield to the distinguished Senator from Alaska. I yield to the distinguished Senator from Alaska.

Mr. STEVENS. Mr. President, I want to respond, if the Senator is yielding to me, to the Senator from Montana. I am asking it be part of this agreement that this agreement not commence unless the Defense bill is finished first.

I state again to the Senator from Montana, I have equal rights as anyone else, I already stated I will object if we do not finish the DOD bill before this starts.

Mr. DOLE. Mr. President, will the distinguished minority leader yield?

Mr. BYRD. Yes, I yield to the distinguished majority leader without losing my right to the floor.

Mr. DOLE. I wonder if we might do it this way: I did not want to have to go through the whole agreement later on. It took an hour to read it all and all amendments.

If I might suggest this as a way to resolve it: I ask unanimous consent that this agreement be set aside until the DOD bill is disposed of; once that bill is disposed of, the unanimous-consent agreement will recur.

Mr. BYRD. Mr. President, I have to object to the way that agreement is worded. I know what the distinguished Senator is attempting to do.

Mr. DOLE. It was go ahead and finish the DOD bill.

Mr. BYRD. Provided it is finished today by midnight.

But I cannot give that kind of an open-ended agreement waiting until this bill is disposed of. It may not be disposed of for a week.

Mr. DOLE. I can withdraw the request. I hate to go through all that material again. There are four pages of agreement and four pages of amendments.

I am trying to find some way to do it. If I withdraw the request, I assume we will be back——

Mr. WEICKER. Mr. President, will the distinguished minority leader yield?

Mr. BYRD. I yield.

Mr. WEICKER. Why not get on with the bill here? I think we are spending more time talking about and trying to devise something.

I know the experience of the distinguished Senators from Arizona and Georgia. I think if we just put it in their hands, we will be through with it in 2 hours.

Mr. NUNN addressed the Chair.

Mr. BYRD. Mr. President, I have the floor.

I think what the distinguished majority leader is attempting to do is to withdraw the unanimous-consent request for the time being and present it after the disposition of the DOD bill tonight.

There has been no action taken on the request. He can withdraw it if he wants.

□ 1620

Mr. DOLE. Mr. President, I will withdraw it here in a moment, but I want to suggest when I submit it again that I do not have to go through all that exercise, or at least I am going to wait until everybody goes home.

Mr. President, I withdraw my unanimous-consent request.

The PRESIDING OFFICER. The unanimous-consent request is withdrawn.

The Senator from Arizona is recognized.

Mr. GOLDWATER. Mr. President, let me put it in a simple way: If we do not get an agreement to end this bill by midnight, I am going to oppose the unanimous consent.

---

## NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

AMENDMENT NO. 2675

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the amendment of the Senator from New York.

Mr. DOLE. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll to ascertain the presence of a quorum.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue to call the roll.

The assistant legislative clerk resumed the call of the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded. According to the unanimous-consent agreement that we had previously entered into, the Senator from Montana was to be recognized.

The PRESIDING OFFICER. Is there objection to calling off the quorum call? Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his parliamentary inquiry.

Mr. BAUCUS. As I understand the proceedings, when we moved to discuss the Senate agreement, it was with the understanding that at the termination of the discussion of that agreement

the Senator from Montana would be recognized.

Mr. BYRD. Mr. President, that is correct. And I know the distinguished majority leader in moving to table, forgot the order for the Senator's recognition, and I forgot it. The Senator from Montana was entitled to retain the floor. He yielded to me and to others, and by virtue of the protection assured him, he still retains the floor and no Senator could move to table the amendment until the Senator from Montana either gives his permission or yields.

The PRESIDING OFFICER. The unanimous consent had been granted that the Senator from Montana would be first recognized. The Senator from Montana was not seeking recognition. The Chair recognized the majority leader.

Mr. BYRD. No, no, no. The order was for the Senator from Montana to retain the floor.

The PRESIDING OFFICER. The majority leader had made a motion to table the Moynihan amendment.

Mr. BYRD. The majority leader could not be recognized for that motion while that order was yet pending.

The PRESIDING OFFICER. If the Senator from Montana was seeking recognition at that time, he is entitled to be recognized.

Mr. BAUCUS. Parliamentary inquiry.

Mr. DOLE. Mr. President, I ask unanimous consent to withdraw my motion to table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I will be very brief here.

Mr. BYRD. Mr. President, I want the RECORD to show that the Senator from Montana retained his right to the floor, while yielding to me and others. It is the duty of the Chair to protect the rights of Senators.

The PRESIDING OFFICER. The Chair is well aware of the point being made by the minority leader and the point the minority leader is making has already been attended to.

Mr. BYRD. It has been attended to, but I want the RECORD to show that the Senator from Montana retained his right to the floor under an order. It is the Chair's duty to protect that Senator's right under that order. That order had not been vitiated. I just want the RECORD to show that.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I will not take a great deal of time here. The hour is late. It is already late in the afternoon, a Saturday afternoon. I will yield the floor very quickly.

The amendment offered by the Senator from New York essentially is to prohibit any goods or services to be sold to the Soviet Union that are in any way subsidized. I must say that I think we all recognize how much the world of international trade has dramatically changed in the last decade.

Every country is out there hustling to sell products. We are at a point in world history where countries are enacting all sorts of measures to help their own people, their own workers, their own firms. They are subsidizing. They are granting below market interest rates. They are establishing quotas and tariffs. They are trying to do anything to help themselves out.

The fact is that most goods traded in the world today are traded under a system that is other than that of the United States. That is, most countries operate under rules where subsidies are more prevalent, rules where certain companies, firms, and employees are favored rather than our country, which is more laissez faire. It is characterized more by free competition.

The fact is that the rules of international trade have dramatically changed in the last decade. Most countries operate under rules that are different from ours. This amendment is very, very broad. It is very sweeping. It is draconian.

In fact, Mr. President, I must say I think it is an unsubtle amendment from a usually very subtle mind. This amendment says that no sales or services to any Communist country would be allowed.

Mr. MOYNIHAN. Mr. President, might we have order? The Senator from Montana is entitled to be heard.

The PRESIDING OFFICER (Mr. STEVENS). The Senator from New York is correct. The Senate will be in order so the Senator from Montana may be heard. Senators conversing in front of the Chamber, please retire.

Mr. BAUCUS. I thank the Chair.

Mr. President, essentially, this amendment would, I think not only put American workers, American firms, and American farmers with one hand behind their back in trying to trade in this world. But more than that, it would put both arms behind their back and knock them out, then tell them to go out and compete in world trade.

This amendment says no sales are to be subsidized to Communist countries. Well, what is a subsidy? Most goods, in some way, entering the international trade in this world today are in some way or another subsidized. The industry support system certainly could be subsidy. Trade with the Soviet Union in light machinery and equipment, that could be a subsidy. Investment tax credits; R&D tax credits—is that a subsidy? It could be a subsidy, and the Moynihan amendment does not define what a subsidy would be.

This amendment is so broad and so sweeping in its form and intent that it would sweep most any goods we trade within a Communist country within its scope. I do not think we want to do that. It just refers to any Communist country—Poland, Yugoslavia, China.

□ 1630

There are a host of other Communist countries in addition to the Soviet Union with whom we trade. Do we want to bar forever any trade with those countries because some goods may in some way or another be subsidized? I think not.

Finally, we must ask ourselves, what is the point of this? Whom will this hurt? The Soviet Union? Do you think this amendment is going to hurt the Soviet Union?

Not at all. Canada, Argentina, Australia, and many other countries will sell to the Soviet Union, make a deal to help their farmers, help their people, if the United States does not make that sale.

This does not hurt the Soviet Union one whit.

Whom does it hurt? It hurts us. It hurts American farmers, American businesses, American firms, American employees because they cannot sell.

This amendment obviously is an ideological statement. I applaud the ideological statement. If this were a statement of intent, I could understand that.

This is an amendment that says no sales of goods or services to any country if they are subsidized.

I submit, Mr. President, that at this late hour, Saturday afternoon, we should not spend much time debating this. It is patently not proper. It is patently not a good idea for the reasons I have mentioned. I hope that we will not waste a lot of time debating it and that we do not adopt it.

Several Senators addressed the chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I know we want to move along and I will not speak for more than 2 or 3 minutes.

I listened very intently to the remarks of my good friend and colleague from New York, known as one of the most learned Members of the body. His style and intellect are not exceeded, in my opinion, by other Members in the U.S. Senate.

I think his remarks could best be described as interesting and most appropriately a lecture to students in international trade. Having said those nice things, I think we should promptly defeat this, and I believe the majority leader is going to make a tabling motion very soon.

Aside from the fact that the trade of the American farmers has gone down from 1981, when 42 percent of all of

our corn and wheat was exported internationally to 18 percent in 1985; despite the fact that the American farmer is being driven from his land and into bankruptcy at the fastest rate since the Great Depression of the early 1930's; despite the fact that we have lowered significantly the amount of the dollar, our trade troubles continue with an ever-increasing trade deficit—despite all of that we are trying in this amendment, in this Senator's opinion, to further hurt the American farmer. And yet, I would remind my colleagues, this is only a 60-day period. It is only on wheat. I suspect that many people agree with this Senator that the President's action was probably more wrapped up around the politics of the situation today with the upcoming elections in November than anything else.

But putting all of these things aside, Mr. President, the wording of the amendment offered by the Senator from New York, which has just been alluded to by the Senator from Montana and others, is so broad that I think any kind of exchange or trade would be interrupted with any nation that is Communist, and there are an awful lot of Communist nations around the world with whom we carry on a great deal of trade.

It does not say the Soviet Union. It says Communist nation.

It is so broad, I would suggest, that not only does it include trade, but, to read from this, it says shall not expend any fund to subsidize the sale or transfer of goods or services to a Communist government or subdivision thereof.

I suspect that this is even so broad, although it might or might not have been intended, that it would preclude the sending of the New York Symphony or the opera to the Soviet Union, which I suspect was not the intent of the Senator from New York.

I simply say I hope we will not waste a great deal of time on this, but for all the reasons stated above, I hope this amendment will be promptly tabled.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. Mr. President, there are a couple of brief points which I do not think have been covered yet as to why the amendment of the Senator from New York is not well taken.

It violates a long tradition we have had in the United States with respect to food aid which is provided to countries regardless of their ideology.

Second, it undermines the Jackson-Vanik amendment.

Third, it undermines the position which we have recently taken with respect to a $300 million war chest of the Eximbank to offset subsidies that are provided by other countries.

First, with respect to food aid, it happens that some of the real disasters that are going on around the world, and have over a period of years, have happened in Communist countries. When Senator BAUCUS, Senator SASSER, and I went to Cambodia, that was a Communist country. The American people provided food aid.

In Ethiopia, we have provided food aid.

In Mozambique we have provided food aid.

Free food.

We have taken the position that where food is concerned, ideology does not count. That has been the tradition of this country. We do not ask the ideology of the recipients of food aid. Such food aid would be no longer possible under Public Law 490 or otherwise if the Moynihan amendment is agreed to.

Second, Jackson-Vanik. The Jackson-Vanik amendment, among other things, conditions subsidized loans and credits on freedom of emigration. If it is no longer possible to provide subsidized loans or credits to the Soviet Union and other Eastern bloc countries, then the Jackson-Vanik amendment, which has been successfully used to provide for emigration of Jews and others——

The PRESIDING OFFICER. The Senator will suspend. The Senator cannot be heard.

The Senator from Missouri.

Mr. DANFORTH. I thank the Chair.

Then the utility of the Jackson-Vanik amendment would be undermined.

Finally, with respect to the Eximbank and the so-called war chest, Mr. President, we learned long ago that we are in stiff competition with the French, the Japanese, and others in selling goods throughout the world. General Electric and Westinghouse have used or are in the process of using Exim credits for sales of turbines and locomotives to China, the People's Republic of China.

That would not be possible under the Moynihan amendment.

So with respect to food aid, the importance of Jackson-Vanik, and because of the necessity of using subsidies, unfortunately, to compete with the Japanese and French in sales to the PRC and other countries, for all three reasons, in addition to the plight of the American farmer, I oppose the Moynihan amendment.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. I rise to oppose this amendment.

I must say, we all have tremendous respect for the parliamentary skills, the intellect, the sensitivity of the Senator from New York. But as one looks at this amendment, one cannot help but wonder what went into the drafting of it. At first I thought this was not an anti-Communist amendment but a simple antirural amendment, because when you start talking about the export of goods, that includes commodities that are grown in my State and in many other States.

I voted for the grain embargo in 1980, and I must say that was not my proudest hour. It seemed to me that we had to do something to reflect our disdain for the Soviet Union's invasion of Afghanistan and that seemed about the only available thing to us.

We now know that the Soviet Union was never deprived of one bushel of wheat, not one bushel of corn. They simply went to our competitors and bought what they might otherwise have bought from us. If we should adopt an amendment like this, it will further hurt the farmers of this country, who have declined in numbers by 7 percent. If you saw the Washington Post this morning you saw that in 1985 alone, the farm population of this country declined 7 percent, and next August, when you are debating on the floor of the U.S. Senate, you will see that it declined at least another 7 percent in 1986.

Mr. President, I was talking to a group of horse traders, the Cattlemen's Association, in a rural county in my State 5 years ago. I will never forget it. During the question and answer session some farmers were rather irate about my vote on the grain embargo. I told them that we had obviously punished ourselves more than we punished the Soviet Union, and if the time ever came again when a President imposed a grain embargo, I would not say positively that it would have to be an act of war that would cause me to vote for one, but certainly I would be as circumspect as possible, and it ought to be something only as a last resort because of international competition, and especially the plight of our farmers.

An old 75-year-old horse trader stood up at the back of the crowd. This was conservative Arkansas speaking. This man had an eighth-grade education.

He said, "You know, Senator, I have always felt that we ought to sell the Russians anything they want to eat, because I always felt that a well-fed Russian was a lot less dangerous to us than a starving Russian."

I said, "You might fit well into the U.S. Senate. I doubt that 100 Senators have thought of that."

But listen to this amendment. "Notwithstanding any other provision of law, the U.S. Government shall not expend any funds to subsidize the sale or transfer of goods or services to a Communist government."

The Senator from Missouri said it well. That means you could not send food to starving children in Ethiopia.

You could not send food to starving people in Cambodia. It means that when Poland was hungry, we could not send food to the Polish people, and our sending food was widely applauded everywhere. And just recently, during the Chernobyl disaster in the Soviet Union, in the Ukraine, near Kiev, I applauded President Reagan because he was the first person to communicate with General Secretary Gorbachev and said, "We know this is a disaster for you. We will be happy to send aid. You tell us what you need."

□ 1640

And they said "Thank you very much, but we believe we can handle it."

But, in any event, the President was reflecting the very highest traditions of America's national character. He could not do even that if this amendment were adopted.

So I hope my colleagues, if for no other reason but for the poor draftsmanship of this amendment, to vote to table this amendment.

Several Senators addressed the Chair.

Mr. THURMOND. Mr. President, I agree in principle with the amendment offered by my distinguished colleague from New York.

Unfortunately however, this amendment is far too broad in its scope. It does not discriminate between instances of true humanitarian assistance, such as aid to the starving in Ethiopia, and the unwarranted low-cost purchases that allow goods or commodities to be sold cheaper abroad than they can be purchased at home.

Therefore, Mr. President, I will suppport the motion to table.

Mr. President, the amendment offered by Senator BYRD is a sound amendment. Unfortunately it has come to my attention that if the amendment is adopted, the defense authorization bill will be filbustered. If this takes place, there will be no defense authorization bill for fiscal year 1987. This would not be in the best of interest of the Nation. Therefore, I will vote against the amendment of my good friend from West Virginia.

Mr. LEVIN. Mr. President, I will vote to table this amendment, even though I too am greatly concerned about the recent decision to make a subsidized grain sale to the Soviet Union.

Unfortunately, this amendment is overly broad. It would not distinguish between countries. It would treat Poland the same as the Soviet Union. Furthermore, since it applies to all subsidies and since subsidies in one form or another are so pervasive, it could very well lead to a de facto elimination of almost all trade with a number of countries we want to trade with.

There is a need for some legislation to address the concerns which gave rise to this amendment. However, it should be fine-tuned before being approved by the Senate.

Mr. DOLE. Mr. President, I move to table the amendment.

Mr. MOYNIHAN addressed the Chair.

Mr. DOLE. Mr. President, I have checked. We have been on the amendment about 45 minutes. Can we get a time agreement so I can move to table, say, 5 minutes from the Senator from New York and the Senator from Iowa?

Mr. HARKIN. I need 3 minutes.

Mr. MOYNIHAN. Can I ask for 6 minutes? I may want to amend the amendment.

Mr. DOLE. We will object to amending the amendment.

Mr. MOYNIHAN. Then I might take longer. I need 6 minutes to take two words out of the amendment.

Mr. DOLE. We have had the yeas and nays asked for. It would take a unanimous consent to modify the amendment.

Mr. MOYNIHAN. Then I will ask unanimous consent to do so. Then it will be over in the next 10 minutes.

Mr. DIXON. Objection.

Mr. DOLE. Objection is heard.

Mr. MOYNIHAN addressed the Chair.

Mr. DOLE. Mr. President, I do not want to frustrate the Senator from New York. We have worked together on nearly everything.

When someone starts agitating the farm block in the Senate, they have a problem.

I would say in this case it is not either side of the aisle. It extends beyond the farm block. The point was just made by the Senator from Arkansas.

We are not advocating sale of technology or any weapons systems. But I do believe that this amendment needs a very close look, either by the Finance Committee or some other committee because I have to believe it will affect shipping. I assume they are shipping subsidies. There are export-import banks, credits, loans, and we subsidize our farmers. That is a subsidy. Whether it is cotton, rice, peanuts, wheat, or feed grains under this amendment all that would be ineligible.

If we want to vote on whether we can trade with the Soviet Union, we can have a flat out vote. Then I do not think many of us would quarrel. But the Senator from New York does not make that argument. He says we want to trade with the Soviet Union. We do not want to subsidize, whatever that word may mean.

I just remind the Senator from New York that I disagree with Secretary Shultz. The President disagreed with Secretary Shultz. The Secretary kept talking in any event. It seems to me when the President makes a decision, those who work for him ought to be quiet. I think the talking stopped. But, in any event, the President made a decision we are going to complete or fulfill a very limited agreement called the long-term grains agreement. They purchased corn. They had not purchased wheat. Why? Because we were not competitive. All of the other countries have been subsidizing—whatever they may call it—to be competitive.

I believe the State Department made a decision not on whether or not we were competitive, but because the Australians complained because we were trying to take back a market that they had taken from us over the years. I do not quarrel with the Australians.

So I just suggest that the amendment does not belong in this bill in the first place. It is not even a printed amendment. We have had no hearings, and it seems to me the best way to complete this would be to table it.

I know there are other Members who want to speak. We have been on this for about 1 hour longer than any other amendment we were talking about all day long. I do not want to preclude the Senator from New York from speaking, but I would preclude the Senator from New York modifying the amendment.

The Senator from New York offered the amendment. Now he has heard the complaints and he wants to modify it. It still will not be correct. But the Senator already admitted by suggestion that he wanted to amend it, it is not accurate to start with, it is not a good amendment, and that it ought to be modified.

I do not believe that those of us who oppose the amendment gain anything by letting the Senator now say, well, I made a mistake, and I did not mean to do this; I want to take out the words "or transfer" and leave only the word "sale." I assume that is what the Senator is about to take out.

I would be happy to yield to the Senator from Iowa for a question.

I have been urged by the managers to table. I do not want to cut off anybody. I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. Mr. President, I asked for a moment to speak.

The PRESIDING OFFICER. No debate is in order at this time.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senator from New York might have 5 minutes to speak.

The PRESIDING OFFICER. Is there objection?

Mr. MOYNIHAN. It is not unduly using up the time of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. I object. I withdraw the objection.

The PRESIDING OFFICER. The Senator from New York is recognized for 5 minutes.

Mr. MOYNIHAN. Mr. President, I am glad we had this debate. I did not have any illusions about what would be the outcome.

I wanted to make two points, however, to the Senators who stated that in the aftermath of the grain embargo, which was imposed by President Carter after the invasion of Afghanistan in December of 1980, that the Soviet Union was deprived of wheat purchases. No. It was not. The Soviet Union was deprived only of wheat purchases from America.

I said in my opening remarks that it is a scandal of our democracy that we sell subsidized goods to the Soviet Union. By doing so, we are confirming the last prophesy left to the Soviets—that in the final stages of capitalism, we would be forced to act in just this way.

This issue is not in any sense meant to be directed against the farm sector or any other. We can take care of our own people. But I said at the outset, if we can spend $300 billion on arms, we can find the resources to maintain our domestic economy without supporting the Soviet economy. Sooner or later the democracies are going to have to face up to this matter.

I will end by quoting again from a short passage in Henry Kissinger's recent article. Kissinger said "Lenin's legendary dictum that capitalists would compete to sell the rope with which they would be hanged is coming true with a vengeance—for Lenin never guessed that Western governments would provide the money to buy the rope and subsidize the price to facilitate the purchase."

Mr. President, I yield the floor.

I thank the majority leader for his courtesy.

□ 1650

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment of the Senator from New York on the table.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Oregon [Mr. HATFIELD] and the Senator from Vermont [Mr. STAFFORD], are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. EAGLETON], are necessarily absent.

The PRESIDING OFFICER (Mr. MATTINGLY). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 72, nays 24—as follows:

[Rollcall Vote No. 204 Leg.]

YEAS—72

| | | |
|---|---|---|
| Abdnor | Gorton | Mattingly |
| Andrews | Gramm | McClure |
| Baucus | Grassley | McConnell |
| Bentsen | Harkin | Melcher |
| Biden | Hart | Metzenbaum |
| Bingaman | Hatch | Murkowski |
| Boren | Hawkins | Nickles |
| Boschwitz | Hecht | Nunn |
| Bumpers | Heflin | Packwood |
| Burdick | Heinz | Pell |
| Chafee | Inouye | Pressler |
| Cochran | Johnston | Pryor |
| Cranston | Kassebaum | Rockefeller |
| Danforth | Kasten | Roth |
| Denton | Kennedy | Simon |
| Dixon | Kerry | Simpson |
| Dole | Lautenberg | Stennis |
| Domenici | Laxalt | Stevens |
| Durenberger | Leahy | Symms |
| Evans | Levin | Thurmond |
| Exon | Long | Trible |
| Ford | Lugar | Warner |
| Glenn | Mathias | Weicker |
| Goldwater | Matsunaga | Zorinsky |

NAYS—24

| | | |
|---|---|---|
| Armstrong | Garn | Quayle |
| Broyhill | Gore | Riegle |
| Byrd | Helms | Rudman |
| Chiles | Hollings | Sarbanes |
| Cohen | Humphrey | Sasser |
| D'Amato | Mitchell | Specter |
| DeConcini | Moynihan | Wallop |
| Dodd | Proxmire | Wilson |

NOT VOTING—4

| | |
|---|---|
| Bradley | Hatfield |
| Eagleton | Stafford |

So the motion to lay the amendment (No. 2675) on the table was agreed to.

□ 1710

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Arkansas.

Mr. BUMPERS. Mr. President, in a moment, I will have a couple of amendments to offer. But prior to that, I would like the attention of the distinguished minority manager, Senator NUNN.

We have a critical problem in the city of Barling, AR, population 3,761. Barling, AR, is a community that mostly serves Fort Chaffee. It is surrounded on the north by the Corps of Engineers, on the west by Fort Smith, and on the east by Fort Chaffee.

They have been trying for years to expand, under mandate, their waste treatment facilities, and the only possible way they can do that is to lease land from Fort Chaffee. They are willing to pay for 320 acres on a long-term lease or outright purchase.

I simply want to say that the distinguished chairman, Senator THURMOND, and the distinguished ranking minority member, Senator BINGAMAN, of the Military Construction Subcommittee, graciously acceded to our request to put some pretty good report language in the MilCon part of the report accompanying this bill, stating that the Armed Services Committee would ask the Department of the Army to conduct an analysis of this issue and report to the committee by December 31, 1986.

I make that statement so that those on the Armed Services Committee will know that that report is coming, and we hope it will keep the Army's nose to the grindstone until the report is filed. This small community is absolutely desperate and has been for a long time.

AMENDMENT NO. 2393

(Purpose: To authorize from existing funds $2.75 million for construction of a Fuel Systems Maintenance Dock at Little Rock Air Force Base, Arkansas)

Mr. BUMPERS. Mr. President, I call up amendment No. 2393.

I ask unanimous consent that the pending amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment of the Senator from Arkansas will be stated.

The legislative clerk read as follows:

The Senator from Arkansas [Mr. BUMPERS] proposes an amendment numbered 2393.

Mr. BUMPERS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the military construction provisions of the bill, insert the following:

"SEC. . $2,750,000 is authorized from Fiscal Year 1987 or prior year funding, whichever is available, for the construction of a Fuel Systems Maintenance Dock at Little Rock Air Force Base, Arkansas."

Mr. BUMPERS. Mr. President, this deals with a situation that exists at the Little Rock Air Force Base. It deals with a facility where fuel cells are reworked, where fuel cells are examined for safety, and so on. The facility there now is simply not safe for our servicemen who work there. The environmental deficiencies there have been pointed out by the Department of Pollution Control and Ecology in our State. The facility is inadequate.

This amendment would authorize $2.75 million for the construction of a fuel systems maintenance dock to alleviate a serious problem.

The Air Force makes no bones about the fact that this facility does not meet its standards so far as safety and environmental workplace are concerned. OSHA has ruled that it is not fit for men to work in. The only reason the Air Force has given a waiver to allow the existing facility to continue to be used is that it is the only facility they can use for that purpose on the base.

The Senate Appropriations Committee put report language in thier MilCon bill stating that this facility poses a health and safety threat to the military personnel and civilian employees and that the Air Force recognizes this and has granted waivers permitting the continued operation of the facility. It says that the committee urges the Air Force to identify to Congress such facilities and requests military construction from Congress on a priority basis so that these unsafe facilities can be modernized or replaced as quickly as possible.

Mr. President, we do not ever send men into combat deliberately to jeopardize them, so why should we allow our servicemen to work in an unsafe environment which is obviously deleterious and jeopardizing to their health?

Mr. President, I will be pleased to hear from the floor managers on this amendment.

Mr. THURMOND. Mr. President, as our distinguished chairman has stated throughout this debate, we have been forced to make difficult decisions in cutting projects for budget reasons that are otherwise meritorious. In fact, we have made significant cuts in base modernization that will hamper the ability of our service personnel to operate effectively. However, its a question of affordability, and for that reason I must oppose this amendment from the distinguished Senator from Arkansas.

I move to table the amendment.

Mr. BUMPERS. Mr. President, will the Senator withdraw his tabling motion for the moment?

Mr. THURMOND. I do.

Mr. BUMPERS. I thank the Senator.

I wonder if the Senator from South Carolina would be willing to consider report language accompanying this bill, or some indication from the Senator, that the Senator is aware of this problem and would like the Pentagon to address the problem of this particular facility.

I cannot stand idly by, as the Senator from Arkansas, and allow people to work in an unsafe environment, and not raise my voice against it. I dare say that I doubt that there are any other servicemen in the country working under conditions any more dangerous to their health than this. We are appropriating $290 billion, and yet we allow a situation like this to exist.

I realize that the chairman of the MilCon Subcommittee has had to make some difficult choices, and maybe it is much worse than I thought. But I will say this: If this one did not rate the consideration of that committee, knowing that situation as I do, I would like to see another situation that is as bad.

Mr. NUNN. Mr. President, It is my understanding that the Senator from Arkansas would know better than I that this is in the House bill and therefore will be in conference. Is that correct?

Mr. BUMPERS. That is correct.

Mr. NUNN. I will personally take a careful look at that in conference. I cannot bind the other members of the committee, but I will take a look at it.

The Senator has made a strong case on the floor. If the Senator saw fit to withdraw his amendment, I assure him that he will get our careful consideration in conference. I cannot guarantee the outcome in the conference. The Senator from South Carolina [Mr. THURMOND] and the Senator from New Mexico [Mr. BINGAMAN] will be our experts in conference.

Mr. THURMOND. Mr. President, we could not add report language here. That would not be permissible. But we will take a careful look at it in conference.

Mr. BUMPERS. I thank the Senator from South Carolina and the Senator from Georgia.

We have an appropriations process coming through, and maybe I can visit with the Senators further and maybe find a way to get funding.

The report language in the Senate Appropriations Milcon bill report identify for Congress such facilities and request construction funds.

With that, Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

□ 1720

AMENDMENT NO. 2395

(Purpose: To authorize from available funds $825,000 for the construction of a National Guard armory at Booneville, Arkansas.)

Mr. BUMPERS. Mr. President, I call up amendment No. 2395.

The PRESIDING OFFICER. Without objection, the Wilson amendment will be set aside.

The clerk will report.

The legislative clerk read as follows:

The Senator from Arkansas [Mr. BUMPERS] proposes amendment numbered 2395.

Mr. BUMPERS. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

At the appropriate place in the Military Construction provisions of the bill, insert the following:

"SEC. . From funds authorized for the Army National Guard, $825,000 is hereby authorized from fiscal year 1987 or prior year funds for the construction of a National Guard armory at Booneville, Arkansas, contingent upon provision of $275,000 in matching funds by the State of Arkansas, provision of a suitable tract of land for such a facility by the community and the availability of authorized fiscal year 1987 or prior year funds.

Mr. WARNER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WARNER. Will this amendment be governed by a time agreement and if so, how much?

Mr. BUMPERS. Mr. President, I understand there is no time agreement on this. I understand we can dispose of it quickly.

The PRESIDING OFFICER. There is a time agreement.

Mr. BUMPERS. There is a 20-minute time agreement to be equally divided.

The PRESIDING OFFICER. That is correct.

Mr. WARNER. I thank the Chair.

Mr. BUMPERS. Mr. President, this is what some would call a parochial amendment. It is only parochial if you live outside Arkansas.

I remember when President Ford was first President, he made an interesting speech one night. He said it did not take him long after he came here as a Congressman to recognize all those boondoggles in all the 49 States and meritorious projects in the State of Michigan, particularly in his district.

We are all here to represent our people.

This seems like a very small item because it deals with a National Guard armory in my State, the oldest armory, the one that the National Guard has said needs replacing badly, in a community which has just about the oldest National Guard unit in Arkansas.

It has been identified by both the State of Arkansas and the Guard Bureau here as in desperate need of replacement.

It is in the city of Booneville, AR. I want to say, No. 1, the State of Arkansas has already appropriated $275,000 for its matching share. The city of Booneville has already purchased 5 acres of land which they are prepared to give the National Guard for the construction of this facility.

One of my experiences is this project has to be built. You can do it now or you can do it later. The later you do it, the worse conditions the Guard unit there will train under.

We have I do not know how many Guard armories in my State. I would guess somewhere between 100 and 200. And this is the only one that our National Guard in Arkansas has identified as absolutely desperately in need of replacement.

If we do not do this, there is a very good chance, I can tell you categorically that the $275,000 that the State of Arkansas has appropriated—and we do not have very much money to throw around, I can tell you our economy is stagnant, our revenues are stagnant—if we do not use the money that has been appropriated for the State now it is going to go back into the State treasury and the land which the city of Booneville really stretched out to

purchase may very well be sold to the highest bidder because they cannot go on forever wondering whether or not we are going to do this.

It is a very meritorious project. It is $825,000. I am not asking for the money. I am not asking that one additional dime be put into this authorization bill.

I am saying that within that particular budget if someone else's armory or construction project falls through within that particular category, then the money would be used for this purpose. I am willing to go to the end of the line.

I recognize the committee has already done its work. I am not criticizing the committee in any way.

But all I am saying is please put us on the list, at the very end if need be, and if we do not make it we do not make it. But if others fall through and some other State legislature does not appropriate the money for their armory, we have already done everything we are required to do and it seems to be that it is eminently fair to seriously consider this amendment.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. BUMPERS. I am happy to yield.

Mr. GOLDWATER. I wonder if the Senator will accept a voice vote on this. I will give him my personal assurances that I will follow up on this.

As the Senator knows, I have been flying in and out of Arkansas for 30 or 40 years, and I can say truthfully and honestly there is no State in this Nation that is more hospitable, kind and decent to the Armed Forces than Arkansas.

I will do all I can to help you with your National Guard project.

Mr. BUMPERS. I thank the Senator very much for those words and I express my thanks on behalf of all the people of Arkansas. They will be most gratified to hear that.

The PRESIDING OFFICER. Who yields time?

Does the manager yield time?

Mr. GOLDWATER. I yield—how much time 1 minute?

Mr. THURMOND. About 5 minutes.

Mr. GOLDWATER. Five minutes for this? I yield 2 minutes to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I am a strong friend of the National Guard, and I want to do everything I can to help the National Guard.

I want to say that this request did not come from the Army or the National Guard to us and was not considered and if you put this in you will have to take something out that belongs to some other Senator.

While I am sure that the request from the distinguished Senator of Arkansas is worthwhile, the effect of this amendment would be to cancel Guard projects that the committee has already authorized.

As our most able chairman has explained, budgetary impacts have been severe. The committee was forced to cut the military construction budget by $1.5 billion. Many worthwhile projects were cut that would have improved the quality and efficiency of our military forces.

The Guard has not been spared. Fortunately, the committee was able to restore $27 million that was cut at the subcommittee level. This money was needed just to help fund projects already authorized. Even with those additional funds, there is still not enough money available.

Senator BUMPER'S amendment makes that situation worse. Until this problem has been solved, no additional Guard projects should be added to the authorization.

Regretfully, I cannot support the amendment offered by the Senator from Arkansas.

I will do everything I can to help in the future but right now this would come out of someone else. I do not think that would be fair. If it is next year at the right time, we will do what we can to help.

Mr. BUMPERS. If I may just respond to that, I want to make this point, and I made it earlier. We are not asking that any other project that the Milcon Committee has approved be torpedoed or removed or jeopardized in any way.

We are simply saying that in that budget if there is some projects which the States, the local communities do not come up with their share, only then would this project be funded. I will tell you that the National Guard bureau here considered this highly. The Pentagon had to make a $21 million cut and admittedly this got caught up in that. That is the reason the request was not made.

I want to say the plans have already been drawn. They were completed and they were prepared to take bids on October 1.

An awful lot of work has been done in my State and the local community in this project. It just seems to me it would be unfair not to even let them get on the list and have a shot in case someone else falters or falls through.

Mr. THURMOND. That is true, but they did not submit it to us and we had to make judgments on those that were submitted.

We could not take all those that were submitted. If you take this you are showing a priority here and preference over others we had to turn down when we considered the matter.

Mr. President, I move to table the amendment.

Mr. NUNN. Mr. President, will the Senator withhold that just for 1 minute? May I have 1 minute?

Mr. THURMOND. I am glad to withhold.

Mr. NUNN. I do not know whether the Senator from Arkansas needs a rollcall.

I join the chairman giving assurance we will work with him. I do not know whether it will be in conference. We will work with him. I do not know the Senator needs a rollcall.

At this phase, I urge him at least to withdraw the amendment with the assurance he already received.

Mr. BUMPERS. Mr. President, I do not want to put the Senate to the time for a rollcall vote on this amendment. I feel very strongly about it. I suspect that since the chairman of the Milcon committee opposes it, it will be defeated. I regret he opposes it. I thought he agreed to it. But since he will not, with the assurances of the floor managers, the Senator from Arizona, the chairman of the committee, and the ranking minority member from Georgia, with that kind of assurance I feel sure we will get results very shortly.

With that in mind, and the especially nice compliments of the Senator from Arizona, I will withdraw the amendment.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

The Senator from Georgia.

Mr. NUNN. Mr. President, I thank the Senator from Arkansas.

We have the Senator from Michigan, Senator LEVIN, who has an amendment. I believe he is right outside the Chamber. The amendment will take only 3 or 4 minutes.

I might inform our colleagues that we are moving along very rapidly now and there are two matters that seem to me that may require rollcall votes.

That would be the matter relating to B–1 advanced technical bomber. That will be entered by the minority leader, Senator BYRD. I believe the Senator from Ohio has some comments to make and perhaps another amendment in that same overall area.

It seems to me that those two could be debated very rapidly, although we do not have a time agreement on them.

Then we have the Byrd amendment on trade. I do not know what the disposition of that will be.

But those are the only two matters that I know of that are now in dispute. We have about six other amendments.

I have an amendment that will take about 5 minutes to explain. I think everyone in this body will be interested in that amendment. It will not take very long. I hope there will be no opposition. We are within sight if things go smoothly of finishing this bill within an hour.

Mr. WARNER. Could I ask, would a rollcall vote be on final passage?

Mr. NUNN. I believe that is correct. I expect we will have a rollcall.

Mr. WARNER. A total of three.

Mr. NUNN. A total of three.

It seems we would be through within an hour if we expedite debate on the trade agreement and B–1. That is within the control of other parties. We have the Senator from Michigan here in hopes he will be recognized to take up an amendment.

AMENDMENT NO. 2676

Mr. LEVIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the Wilson amendment will be set aside.

The clerk will report.

The legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for himself, Mr. CHAFEE and Mr. KENNEDY proposes an amendment numbered 2676.

Mr. LEVIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, line 19, insert the following new section:

(f) COMPLIANCE WITH THE ABM TREATY.—

(1) The Congress finds—

(a) that the President's Commission on Strategic Forces declared in its report to the President, dated March 21, 1984, that "One of the most successful arms control agreements is the Anti-Ballistic Missile Treaty of 1972"; and

(b) that the Secretary of State has stated that the "ABM Treaty requires consultations, and the President has explicitly recognized that any ABM-related deployments arising from research into ballistic missile defenses would be a matter for consultations and negotiation between the Parties";

(c) that the Secretary of State declared on October 14, 1985, that "our research program has been structured and, as the President has reaffirmed, will continue to be conducted in accordance with a restrictive interpretation of the treaty's obligations";

(d) that the President has determined that the Krasnoyarsk radar is a violation of the ABM-Treaty; and

(e) that the Krasnoyarsk radar therefore erodes the integrity of the ABM Treaty and is a matter of serious concern.

(2) The Congress therefore declares—

(a) that it fully supports the declared policy of the President that a principal objective of the United States in negotiations with the Soviet Union on nuclear and space arms is to reverse the erosion of the Treaty between the United States and America and the Union of Soviet Socialist Republics on the Limitation of Anti-Ballistic Missile Systems, signed on May 26, 1972; and

(b) that action by the Congress in approving funds in this Act for research on the Strategic Defense Initiative does not express or imply an intention on the part of the Congress that the United States should abrogate, violate, or otherwise erode such treaty, and does not express or imply any determination or commitment on the part of the Congress that the United States develop, test, or deploy ballistic missile strategic defense weaponry that would contravene such treaty.

Mr. LEVIN. Mr. President, many of us have been concerned about the relationship between the SDI Research Program and the ABM Treaty.

Those of us who are concerned about that treaty want to make sure that there is no implication in these research funds that are being authorized, at whatever level, that we would either now intend to permit violation of the ABM Treaty by authorizing those funds or that we by authorizing these funds imply a commitment or determination by the Congress to proceed in a way which would violate that treaty at a later date.

So, this language, which is very similar to last year's language, says precisely that. The critical language here is that the Congress in authorizing funds in this act for research on SDI does not express or imply an intention on the part of the Congress that the United States should abrogate, violate, or otherwise erode the ABM Treaty, and does not express or imply any determination or commitment on the part of the Congress that the United States develop, test, or deploy ballistic missile strategic defense weaponry in a manner that would contravene the ABM Treaty.

This has been cleared now on both sides. I greatly appreciate the efforts of my friend from Virginia making it possible for us to offer this with the support again, I believe, of a vast majority of the Senate. It will not require a rollcall vote because it has been cleared. I am grateful to him and Senator NUNN and his staff.

Mr. CHAFEE. Mr. President, I enthusiastically cosponsor the amendment the distinguished Senator from Michigan has offered. It seems to me the ABM Treaty is the great treaty that we have with the Soviets. And what we are stating in this is, despite what we are doing in SDI, that that is not intended as an abrogation of the ABM Treaty. So I commend it to my colleagues and look forward to the comments of the senior Senator from Virginia.

Mr. WARNER. Mr. President, the proponents of this amendment, the Senator from Michigan and the Senator from Rhode Island, have correctly stated that we have reviewed this and we are prepared to accept it. I, in a sense, rise in support of it because they have allowed my thoughts and the thoughts of others to be incorporated in the amendment. The amendment is quite similar to a provision that was included in the fiscal year 1986 Defense Authorization Act. Minor changes, at our request, have been made and certain additions.

There are two elements in this amendment that differ from the language adopted last year. The first is a quote from Secretary of State Shultz on the administration's current policy of adhering to a restrictive interpretation of the ABM Treaty, even though the administration has determined that a broader interpretation of the treaty's limitations is legally justified. It is not the intent of my colleagues' amendment to limit the administration's flexibility in managing the SDI Program.

The administration's fiscal year 1987 arms control impact statement submitted to the Congress states that:

. . . the President determined that as long as the program receives the support needed to implement its plan, it is not necessary to restructure the SDI program towards the boundaries of Treaty interpretation which the U.S. could observe.

This amendment in no way seeks to restrain the administration from exercising its right to observe a less restrictive interpretation of the ABM Treaty if, for whatever reason, it decides that this action is necessary on behalf of the national security.

The second change, make at my request, to this amendment is the inclusion of two clauses that relate to Soviet violations of the ABM Treaty. I believe it is important for the Senate to indicate that it views Soviet noncompliance as a matter of grave concern. In my judgment, and that of other Members of this Chamber, if the pattern of Soviet treaty violations is not reversed, and if new instances continue to arise, it will erode the very foundation of the arms control process.

In conclusion, Mr. President, I think this addition strengthens the Levin amendment and I urge its adoption.

Mr. LEVIN. Mr. President, again I do appreciate the efforts on the part of the Senator from Virginia relative to this amendment. There is no intention in this amendment or otherwise that I know of in this Senate to limit the research program on SDI. The amendment does not set forth any limits on such a research program.

There is a difference, of course, on the question of the restrictive or broader interpretation of the ABM Treaty, and this amendment is silent on the question of whether or not the administration would, under the treaty, have a right to move to a broader interpretation. We do not seek in this amendment to decide one way or the other that issue, but it is important that we have added this year the statement of the Secretary of State:

Our research program has been structured and, as the President has reaffirmed, will continue to be conducted in accordance with a restrictive interpretation of the treaty's obligations.

Mr. GOLDWATER. Mr. President, we have studied this amendment. We find it a fine amendment, one I think that is very apropos here and we approve it.

Mr. CHAFEE. Mr. President, I think the comments in the revised resolution dealing with the Krasnoyarsk radar

are good. We are deeply concerned about that and we realize the problem that it presents to the ABM Treaty. I thank the managers of the legislation.

Mr. WILSON. Mr. President, I thank the chairman of the strategic subcommittee for the statement that he has made and on the changes and the revisions he had requested and which the proponents of this amendment have agreed to.

It is not my purpose to enter into any kind of prolonged debate. I will simply say that I think the reservations he has expressed are wise ones, ones that reflect reality and not wishful thinking.

It my personal hope that the research program being conducted under the auspices of the strategic defense initiative offices will result in the kind of advances in technology that make defenses the means by which we will protect the world from intercontinental ballistic missiles, rather than the continued reliance on the doctrine of mutual assured destruction, which, in my view, is a reliance on a very precarious balance on nuclear terrorists. I think that it is an end we devoutly hope for and earnestly pursue. I do not think we should rely upon historical documents, however well intended, when, in fact, events, technological developments, in particular, may have overtaken them.

I think we need to be concerned with the actual goal—I think the goal that we all share—and that is one of greater safety against the kind of prompt, hard target kill capability that is represented by the inventory of intercontinental ballistic missiles in which the Soviet Union enjoys a very heavy advantage.

So I commend my friend, the senior Senator from Virginia. I fully concur with the goals and the wishes of the proponents of this measure. I do not have the unqualified confidence that they do in the ability of this ancient treaty to secure those goals. I think he has remined us of the limitations of the good intentions inherent in the treaty.

Mr. WARNER. Mr. President, I thank the Senator from California for his remarks. He does speak with a base of knowledge on this subject, because the subcommittee has, on a number of occasions, received testimony to the effect that continued compliance by the United States under this treaty, decisions made by the President to adhere to the restrictive version of it, results in the SDI Program being more costly taking more time, and reducing the level of confidence we will have in the results of our research. But that is a decision the President has made. We are prepared, of course, to support the President's decision and to continue to review the implications of that decision.

I thank my colleagues for their remarks.

Mr. HELMS. Mr. President, I share the apprehensions indicated by my friend from California.

Mr. President, two shall not press for a rollcall vote on this amendment but two feel different perspective would be useful.

When the strategic arms limitation treaty [SALT] talks began in 1969, the United States had two fundamental objectives: preventing the Soviets from deploying an offensive first strike capability, and preventing the Soviets from deploying a nationwide antiballistic missile defense. These two objectives were integrally linked in the preambles to the 1972 SALT I ABM Treaty, the 1972 SALT I Interim Offensive Agreement, and the 1979 SALT II Treaty. But we have completely failed to achieve our two fundamental SALT objectives, after almost two decades of the SALT negotiating process. This is because the Soviets now have a first-strike capability, and are about to have a nationwide ABM defense. Thus supreme United States national interests should require America to withdraw from the 1972 SALT I AMB Treaty, rather than to pledge to Soviet Dictator Gorbachev to abide by it for another 7 years.

I believe that the United States should withdraw from the ABM Treaty partly because of the following U.S. unilateral statement to SALT I ABM Treaty, of May 9, 1972, expressing American policy:

> . . . The U.S. Delegation believes that an objective of the follow-on [i.e. SALT II] negotiations should be to constrain and reduce on a long term basis threats to the survivability of our respective strategic retaliatory forces. . . If an agreement providing for more complete strategic offensive arms limitations were not achieved within five years, U.S. supreme national interests could be jeopardized. Should that occur, it would constitute a basis for withdrawal from the ABM Treaty.

But the Soviets now have deployed a first strike counterforce capability which threatens the survivability of our deterrent retaliatory forces, according to authoritative administration statements. Moreover, after 14 years of negotiations there are no permanent, or even interim constraints on Soviet offensive forces; The SALT I Interim Offensive Agreement expired in 1977 and the fatally flawed SALT II Treaty was never ratified and expired in 1985. Therefore, under two conditions of the 1972 U.S. unilateral statement, U.S. supreme national interests required United States withdrawal from the ABM Treaty.

There is another criterion available to judge the failure of the SALT process. Under the Brooke amendment to the SALT I resolution of approval of 1972, the Senate itself stated that SALT I and the SALT II negotiations would be based upon:

> The preservation of longstanding U.S. policy that neither the Soviet Union or the United States should seek unilateral advantage by developing a first-strike potential.

The Brooks amendment thus posited that the success of SALT I and SALT II depended on the prevention of a Soviet first strike potential.

But according to authoritative administration statements, the Soviets have a first strike capability. President Reagan has stated that:

> Modern, accurate ICM's carrying multiple nuclear warheads—if deployed in sufficiently large numbers relative to the size of an opponent's force structure, as the Soviets have done with their ICBM force—could be used in a rapid first strike to undercut an opponent's ability to retaliate effectively . . . (Strategic Defense Initiative Presidential White Paper, January, 1985).

President Reagan's National Security Adviser stated in January 1985:

> . . . American land-based missiles have become even more vulnerable to Soviet first strike attack over the past few years.

And in President Reagan's May 1985 Victory in Europe Day speech, he also described the Soviet "first strike" capability, and alarmingly warned that the Soviet threat now emerging jeopardizes "deterrence itself."

In President Reagan's strategic modernization statement of June 3, 1986, he again stated that there is a:

> Growing strategic imbalance between the U.S. and the U.S.S.R. . . . In calculating what they call "the correlation of forces," the Soviet political and military leadership are ever mindful of the state of the nuclear balance between the United States and the Soviet Union . . . any weakening of our nuclear deterrent, leaving the Soviet Union with superior nuclear force . . . could invite the Soviet Union to rely on such an advantage . . . this loss in survivability of U.S. strategic forces, coupled with the magnitude of the Soviet buildup, had begun to erode seriously the stability of the strategic balance . . .

Moreover, Adm. William Crowe, Chairman of the Joint Chiefs of Staff, testified to the Senate on June 19, 1986, that:

> The strategic nuclear balance has shifted dramatically. The Soviets now enjoy superiority in ICBMs . . .

ICBM's are the key element in a first strike capability, and the Soviets have over a six to one advantage against United States hard targets in ICBM warheads. Finally, the CIA testified to the Senate on June 26, 1985, that:

> The Soviets already have enough hard-target-capable ICBM reentry vehicles today to attack all U.S. ICBM silos and launch control centers. . . . . In such an attack today, they would stand a good chance of destroying Minuteman silos.

In sum, it is clear that the Soviets have a first strike capability.

What about preventing a nationwide Soviet ABM defense, the second and integrally linked fundamental United States SALT objective? Last Novem-

ber, Defense Secretary Weinberger testified to the Senate that the Soviets already have "some nationwide ABM capability." Of course, even a base for a nationwide ABM defense is banned by article I of the ABM Treaty. According to the authoritative, official, unclassified intelligence estimates, the Soviet Moscow ABM system modernization and upgrade will be operational in 1987, as will the illegal Krasnoyarsk radar. The ABM-capable SAM-10 and SAM-12 mobil systems will be widely deployed by next year, and are already being internetted with the ABM-capable, already widely deployed SAM-5. The Soviet mobile ABM-3, already in mass production for deployment around Moscow, may also be deployed nationwide by next year. The SAM-5, SAM-10, and SAM-12 are also all being internetted with the Moscow ABM system. These ABM deployments will connect the Moscow ABM system to the illegal Krasnoyarsk ABM radar, where SAM-5's, SAM-10's, and SAM-12's, are deployed, making a nationwide ABM defense for the Soviets. As the Defense and State Department White Paper on "Soviet Strategic Defense Programs," of October 1985, confirmed:

The aggregate of current Soviet ABM and ABM-related activities suggests that the U.S.S.R. may be preparing an ABM defense of its national territory—precisely what the ABM Treaty was designed to prevent.

Mr. President, I agree with President Reagan's statement of June 3, 1986: "We come to one of those unique crossroads of history where nations decide their fate. Our choices are clear. Defense Secretary Weinberger stated last November that the United States would have to add to its offensive forces in the event of Soviet ABM break out.

In conclusion, Mr. President, I believe that it is a grave concession undermining world peace, American security, and strategic stability for the United States to agree to extend compliance with the ABM Treaty, especially on the eve of Soviet ABM break out. Instead, we should withdraw from the ABM Treaty ourselves, not only because of Soviet nationwide ABM defense break out violations, but also because of the 14-year failure of the SALT process to prevent a Soviet first strike capability jeopardizing American supreme national interests. The United States may be subjected to nuclear blackmail by the Soviets in agreeing to extend our compliance with the ABM Treaty, against our supreme national interests. As Secretary of State Shultz has correctly stated, "Arms control is impossible in conditions of inequality." As Defense Secretary Weinberger has stated, we are now in the precise situation the SALT process was supposed to prevent.

Mr. NUNN. Mr. President, I support the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If there is no further debate on the amendment, the question is on agreeing to the amendment.

The amendment (No. 2676) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

□ 1740

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

AMENDMENT NO. 2677

(Purpose: To establish a Barry Goldwater Scholarship and Excellence in Education Program)

Mr. NUNN. Mr. President, we are getting down to the last couple of amendments. We have three or four more. But I think there are only two matters that are really going to be in dispute here.

I think it is appropriate to send an amendment to the desk that I think all of our colleagues will be interested in.

I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the Wilson amendment will be set aside, and the clerk will report.

The legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN] for himself and Mr. THURMOND, Mr. BYRD, Mr. STEVENS, Mr. LAXALT, Mr. DECONCINI, Mr. EXON, Mr. COHEN, Mr. GLENN, Mr. GRAMM, Mr. DIXON, Mr. DENTON, Mr. BINGAMAN, Mr. KENNEDY, Mr. SIMON, Mr. LEAHY, Mr. EVANS, Mr. STENNIS, Mr. QUAYLE, and Mr. MATTINGLY, proposed an amendment numbered 2677.

Mr. NUNN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, insert the following new division:

DIVISION E—BARRY GOLDWATER SCHOLARSHIP AND EXCELLENCE IN EDUCATION PROGRAM

This division may be cited as the "Barry Goldwater Scholarship and Excellence in Education Act".

SEC. 5101. STATEMENT OF PURPOSES.

The Congress finds that—

(1) Senator Barry Goldwater has served his country for 56 years as a soldier and statesman, including service in the United States Senate for a period of 30 years;

(2) Senator Goldwater has a distinguished record as Chairman of the Select Committee on Intelligence of the Senate and as Chairman of the Committee on Armed Services of the Senate; and

(3) Senator Goldwater has long maintained a special interest in the education of America's youth, particularly in the fields of science and mathematics; and

(4) it would, therefore, be a fitting tribute to the leadership, courage, and vision of Senator Goldwater to establish in his name a scholarship program to foster and encourage excellence in science and mathematics.

SEC. 5102. DEFINITIONS.

In this division:

(1) The term "Foundation" means the Barry Goldwater Scholarship and Excellence in Education Foundation established under section 5103(a).

(2) The term "Board" means the Board of Trustees of the Barry Goldwater Scholarship and Excellence in Education Foundation established under section 5103(b).

(3) The term "fund" means the Barry Goldwater Scholarship and Excellence in Education Fund provided for under section 5108.

(4) The term "institution of higher education" means any such institution as defined by section 1201(a) of the Higher Education Act of 1965.

(5) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, and, considered as a single entity, Guam, the Virgin Islands, American Samoa, the Trust Territories of the Pacific Islands, and the Commonwealth of the Northern Marianas.

(6) The term "eligible person" means a citizen or national of the United States or a permanent resident alien of the United States.

SEC. 5103. ESTABLISHMENT OF THE BARRY GOLDWATER SCHOLARSHIP AND EXCELLENCE IN EDUCATION FOUNDATION.

(a) There is established, as an independent establishment of the executive branch of the United States Government, the Barry Goldwater Scholarship and Excellence in Education Foundation.

(b) The Foundation shall be subject to the supervision and direction of the Board of Trustees. The Board shall be composed of 13 members, as follows:

(1) Two members from the Senate, one appointed by the majority leader and one appointed by the minority leader of the Senate.

(2) Two members of the House of Representatives, one appointed by the majority leader and one appointed by the minority leader of the House of Representatives.

(3) Eight members, not more than four of whom shall be of the same political party, to be appointed by the President, by and with the advice and consent of the Senate, at least one of whom shall be a representative of the aerospace industry and at least one of whom shall be a representative of a private foundation concerned with aerospace education.

(4) The Secretary of Education, or his designee, who shall serve ex officio as a member of the Board but shall not be eligible to serve as Chairman.

(c) The term of office of each member of the Board shall be six years, except that (1) the members first taking office shall serve as designated by the President, four for terms of two years, five for terms of four years, and four for terms of six years, and (2) any member appointed to fill a vacancy shall serve for the remainder of the term for which his predecessor was appointed and shall be appointed in the same manner as the original appointment for that vacancy was made.

(d) Members of the Board shall serve without pay, but shall be entitled to reim-

bursement for travel, subsistence, and other necessary expenses incurred in the performance of their duties.

SEC. 5104. BARRY GOLDWATER SCHOLARSHIP AND EXCELLENCE IN EDUCATION AWARDS.

(a)(1) The Foundation is authorized to award scholarships and fellowships to eligible persons for study in the fields of science and methematics. Such scholarships and fellowships shall be awarded to persons as provided in this division who meet the minimum criteria established by the Foundation.

(2) Scholarships shall be awarded to outstanding undergraduate students who intend to pursue careers in mathematics and the natural sciences.

(3) Fellowships shall be awarded to outstanding graduate students who intended to pursue advanced degrees in mathematics and the natural sciences.

(4) The Foundation shall also award scholarships to eligible persons selected on the basis of nationwide competition.

(b) Recipients of scholarships and fellowships under this division shall be known as "Barry Goldwater Scholars".

(c)(1) The Foundation is authorized to award honoraria to outstanding educators, teachers, and persons who have volunteered to assist in secondary schools who have made significant contributions to improve the quality of instruction in mathematics and sciences in the secondary school as follows:

(A) To two such persons selected at large from each State.

(B) To one such person selected from each county in each State.

(2) The Board shall establish a schedule of honoraria to be awarded under paragraph (1).

(3) The Board shall adopt regulations which provide that persons affiliated with secondary schools on military reservations and with the dependent overseas school system shall be appropriately represented among those persons who receive awards under this division.

SEC. 5106. STIPENDS.

Each person awarded a scholarship or fellowship under this division shall receive a stipend which shall not exceed the cost to such person for tuition, fees, books, room and board, or such lesser amount as may be prescribed by the Board.

SEC. 5107. SCHOLARSHIP CONDITIONS.

(a) A person awarded a scholarship under this division may receive payments authorized under this division only during such periods as the Foundation finds that the person is maintaining satisfactory proficiency and devoting full time to study or research and is not engaging in gainful employment other than employment approved by the Foundation pursuant to regulations of the Board.

(b) The Foundation is authorized to require reports containing such information in such form and to be filed at such times as the Foundation determines to be necessary from any person awarded a scholarship under this division. Such reports shall be accompanied by a certificate from an appropriate official at the institution of higher education, approved by the Foundation, stating that such person is making satisfactory progress in, and is devoting essentially full time to study or research, except as otherwise provided in subsection (a).

SEC. 5108. BARRY GOLDWATER SCHOLARSHIP AND EXCELLENCE IN EDUCATION FUND.

(a) There is established in the Treasury of the United States a trust fund to be known as the Barry Goldwater Scholarship and Excellence and Education Fund. The fund shall consist of amounts appropriated to it pursuant to section 5112.

(b) It shall be the duty of the Secretary of the Treasury to invest in full the amounts appropriated to the fund. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. For such purpose, such obligations may be acquired (1) on original issue at the issue price, or (2) by purchase of outstanding obligations at the market place. The purposes for which obligations of the United States may be issued under the Second Liberty Bond Act are hereby extended to authorize the issuance at par of special obligations exclusively to the fund. Such special obligations shall bear interest at rate equal to the average rate of interest, computed as to the end of the calendar month next preceding the date of such issue, borne by all marketable interest-bearing obligations of the United States then forming a part of the public debt, except that where such average rate is not a multiple of ⅛ of 1 percent, the rate of interest of such special obligations shall be the multiple of ⅛ of 1 percent next lower than such average rate. Such special obligations shall be issued only if the Secretary determines that the purchases of other interest-bearing obligations of the United States, or of obligations guaranteed as to both principal and interest by the United States or original issue or at the market price, is not in the public interest.

(c) Any obligation acquired by the fund (except special obligations issued exclusively to the fund) may be sold by the Secretary at the market price, and such special obligations may be redeemed at par plus accrued interest.

(d) The interest on, and the proceeds from the sale or redemption of, any obligations held in the fund shall be credited to and form a part of the fund.

SEC. 5109. EXPENDITURES FROM THE FUND.

(a) The Secretary of the Treasury is authorized to pay to the Foundation from the interest and earnings of the fund such sums as the Board determines are necessary and appropriate to enable the Foundation to carry out the purposes of this division.

(b) The activities of the Foundation under this division may be audited by the General Accounting Office under such rules and regulations as may be prescribed by the Comptroller General of the United States. Representatives of the General Accounting Office shall have access to all books, accounts, records, reports, and files and all other papers, things, or property belonging to or in use by the Foundation pertaining to such activities and necessary to facilitate the audit.

SEC. 5110. EXECUTIVE SECRETARY.

(a) There shall be an Executive Secretary of the Foundation who shall be appointed by the Board. The Executive Secretary shall be the chief executive officer of the Foundation and shall carry out the functions of the Foundation subject to the supervision and direction of the Board. The Executive Secretary shall carry out such other functions consistent with the provisions of this division as the Board shall prescribe.

(b) The Executive Secretary of the Foundation shall be compensated at the rate specified for employees in grade GS-18 of the General Schedule under section 5332 of title 5, United States Code.

SEC. 5111. ADMINISTRATIVE PROVISIONS.

(a) In order to carry out the provisions of this division, the Foundation is authorized to—

(1) appoint and fix the compensation of such personnel as may be necessary to carry out the provisions of this division, except that in no case may an employee other than the Executive Secretary be compensated at a rate to exceed the maximum rate provided for employees in grade GS-15 of the General Schedule under section 5332 of title 5, United States Code;

(2) procure temporary and intermittent services of experts and consultants as are necessary to the extent authorized by section 3109 of title 5, United States Code, but at rates not to exceed the rate specified at the time of such service for grade GS-18 under section 5332 of such title;

(3) prescribe such regulations as it considers necessary governing the manner in which its functions shall be carried out;

(4) receive money and other property donated, bequeathed, or devised, without condition or restriction other than it be used for the purposes of the Foundation, and to use, sell, or otherwise dispose of such property for the purposes of carrying out its functions;

(5) accept and utilize the services of voluntary and noncompensated personnel and for travel expenses, including per diem, as authorized by section 5703 of title 5, United States Code;

(6) enter into contracts or other arrangements, or make grants, to carry out the provisions of this division, and enter into such contracts or other arrangements, or make such grants, with the concurrence of two-thirds of the members of the Board, without performance or other bonds and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5);

(7) make advances, progress, and other payments which the Board considers necessary under this division without regard to the provisions of section 3324 of title 31, United States Code;

(8) rent office space in the District of Columbia; and

(9) make other necessary expenditures.

(b) The Foundation shall submit to the President and to Congress an annual report of its operations under this division.

SEC. 5112. APPROPRIATIONS AUTHORIZED.

There are authorized to be appropriated to the Department of Defense $40,000,000 to be transferred to the Treasury for the fund.

Mr. NUNN. Mr. President, the amendment I send to the desk deals with a serious problem which is undermining our ability to maintain one of America's greatest national security and commercial strengths—our technological leadership.

I send this amendment to the desk on behalf of myself; Senator THURMOND from South Carolina; Senator BYRD, our Democratic leader; as well as Senator STEVENS; Senator LAXALT; Senator DECONCINI; Senator EXON; Senator COHEN; Senator GLENN; Senator GRAMM; Senator DIXON; Senator DENTON; Senator BINGAMAN; Senator KENNEDY; Senator SIMON; Senator LEAHY; Senator EVANS; and Senator QUAYLE.

Mr. President, I have also discussed this amendment with other Senators.

I think many of them would like to join as cosponsors.

The problem is the shortage of qualified American professionals in the fields of math and science. With every year that passes the United States is losing the opportunity to educate and train the new generations which must be equipped to meet the ever-increasing challenges in both the commercial and national security fields. The Department of Labor in its report "A Nation at Risk" recommended that all students graduating from high school be required to take 3 years each of math and science. But the National Commission on Excellence in Education reports that "American students * * * receive less than 4 hours of mathematics and less than 2 hours of science instruction each week." Consequently, the Commission reports, "the Nation that dramatically and boldly led the world into the age of technology is failing to provide its own children with the intellectual tools needed for the 21st century." The danger is all the greater because its effects accumulate gradually, so by the time the full effect is realized it may take decades for the United States to recover, unless this deterioration is checked now.

Other nations are not neglecting this opportunity. The Soviet Union graduates five times the number of engineers that the United States does. And it is not just the Soviet Union that is "out educating" us in math and science. In 1983, the last year for which we have reliable statistics, Great Britain, France, and West Germany each produced a greater number of graduates in the natural sciences than the United States did. In that same year, a smaller proportion of U.S. college graduates received engineering degrees than in any other country. Lest anyone doubt the importance of technical training to the United States, the Bureau of Labor Statistics estimates that between 1982 and 1995 4 million new jobs will be created in high-technology fields. These are jobs we may not have the qualified workers to fill.

Clearly our Nation cannot afford to allow our leadership in science and technology to be put at risk. We risk damaging our national defense in the face of an increasingly sophisticated Soviet military threat. And just as importantly, we risk becoming a secondary industrial power, unable to maintain a competitive edge over other advanced industrial nations.

The U.S. technological prowess is one of our strongest national security assets and we must insure that we have both highly qualified math and science teachers as well as encourage studies in this area.

Not all Americans have been blind to this disturbing trend. One of the strongest advocates of this critical education for America's youth has been Senator BARRY GOLDWATER. I need scarcely remind his colleagues here in the Senate that Senator GOLDWATER has served his country for 56 years—as a soldier and a statesman—including representing the State of Arizona in the Senate since 1952, Senator GOLDWATER has a distinguished career as chairman of the Select Committee on Intelligence and currently as the chairman of the Armed Services Committee. Thus Senator GOLDWATER's expertise in national security issues has encouraged and confirmed his longstanding special interest in the quality and quantity of science and math education received by students in the United States.

Thus I believe it is fitting that the Congress take action to turn the tide on this disturbing decline in our Nation's technological abilities by establishing the Barry Goldwater Scholarship and Excellence in Education Foundation. Though I know this is not an honor that BARRY GOLDWATER would seek for himself I think it is entirely fitting that his colleagues honor him as he retires from the Senate with the establishment of a foundation that will carry on the work to which he dedicated himself during his decades of public service. And I say to the Senate that Chairman GOLDWATER knew absolutely nothing about this effort to establish the Goldwater Excellence in Education Foundation.

I would like to tell my colleagues briefly about how this foundation would work, and we have talked to the people involved in the education committees about this. I believe we have their approval.

The Barry Goldwater Foundation will be established as an independent entity of the executive branch. The foundation will be authorized to award scholarships to outstanding undergraduate and graduate students for study in the fields of mathematics and science.

This act authorizes a one-time—I emphasize one-time—$40 million appropriation for a trust fund which the Secretary of the Treasury is required to invest in U.S. Government securities; $40 million invested at an interest rate of 8½ percent—that is a rough approximation—will generate in excess of $3 million per year, a sum adequate to carry out the program.

We are not talking about a program that is going to require an appropriation each year. We are talking about a one-time expenditure. The activities of the Goldwater Foundation will be subject to auditing by the General Accounting Office.

The Barry Goldwater Fund is modeled after the Truman Scholarship Foundation which was created by an act of Congress in 1975 with an endowment of $30 million. The Truman Fund has proven to be a phenomenal success, requiring no subsequent funding from the U.S. Government while providing 105 scholarships in 1986 to deserving students in a broad range of fields of study. The Truman Fund has very little overhead expenses.

The amendment requires the foundation to award scholarships to two undergraduate students from each State, the District of Columbia, and Puerto Rico and 75 graduate scholarships nationwide each year. The size of those scholarships will be determined by the foundation, but we expect that the endowment will permit the undergraduate scholarships will be approximately $5,000 per year and the graduate scholarships to be approximately $15,000 per annum. However, no student's scholarship would exceed tuition and board costs.

The foundation will also be authorized to award honoraria to outstanding individuals in secondary schools who have made significant contributions to improve the quality of instruction in mathematics and sciences. Two individuals will be selected from each State and will receive an estimated $1,000 award, and one from each county in the United States will receive an estimated $150 award. In addition, the foundation will provide that individuals affiliated with secondary schools on military reservations and the dependent overseas school system shall be eligible for honoraria.

The foundation will be subject to the supervision of a board of trustees composed of thirteen members: Two Members from the Senate, one from each political party appointed by the majority and minority leader; two Members from the House appointed by similar means; eight members appointed by the President with the advice and consent of the Senate; and the Secretary of Education or his designee. The sponsors of this act expect that the President will name as one of his designees a member of the Goldwater family, following the precedent set by the Truman Scholarship Foundation. We also believe it appropriate that one of the board members be from a private foundation concerned with aerospace education, thus ensuring that Senator GOLDWATER's particular interest in aviation and space will be represented. Members of the board will serve without pay.

By enacting this one-time endowment for the Barry Goldwater Scholarship and Excellence in Education Foundation we will set in place a program which can be equally successful in aiding outstanding members of future generations and in ensuring that the United States maintains its position as a leader among nations in the essential fields of science and mathematics. The foundation created by this amendment will serve a critical need in the education area and it is ap-

propriate that it be named after BARRY GOLDWATER—soldier, Senator, and statesman who we are all very proud to have as the chairman of the Armed Services Committee.

Mr. President, I am grateful to the many cosponsors of this amendment. I hope that our colleagues will approve.

Mr. PELL and Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, before making a few remarks on this subject, I ask unanimous consent that the able Senator from Georgia, Senator MATTINGLY, be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, as I stated in my opening remarks at the beginning of consideration of the Defense authorization bill, I have known and admired BARRY GOLDWATER for more than 30 years. We have shared, as the saying goes, some of the best of times, and some of the worst of times. Four different decades have been involved in our service together in the Senate, and I would like to briefly share some of my thoughts about this period of our history together.

I joined Senator GOLDWATER in the Senate during a period of time that has been referred to as the golden years. The United States was the undisputed world power, and we were at peace despite all the rhetoric about a cold war. This period of U.S. history has spawned a great deal of nostalgia through television shows, movies, and popular music.

This period of relative calm, however, was followed by the turbulent 1960's, a decade that was to bring BARRY GOLDWATER into the national spotlight and a decade that was to divide this Nation over a foreign war.

Senator GOLDWATER was nominated in 1964 as the Republican candidate to face a popular Democratic incumbent President. At this period in our history, we were becoming increasingly involved in a war in Southeast Asis.

□ 1750

Senator GOLDWATER warned the Nation that you cannot commit yourselves to war one step at a time; wars great or small must be fought to be won. To shed the lifeblood of a Nation for any less a goal than victory is sacrilege. For his honesty, he was portrayed as a warmonger, and he was soundly defeated in the general election. The Nation that was promised no war in Vietnam if it rejected BARRY GOLDWATER at the polls got just the opposite. History will be our judge as to whether or not we should have heeded his warning. In my opinion, history will record that we erred greatly by not electing him President.

The decade of the 1970's brought the Nation another form of division—Watergate and the downfall of a President. The decade also found our Nation wanting in its global commitments to maintain a strong defense as we began a downward spiral as a national power. During this time, BARRY GOLDWATER repeatedly warned that we were falling dangerously behind the Soviets.

The decade of the 1980's was to begin with a majority of American voters electing a President who, if you closed your eyes for a moment, sounded just like BARRY GOLDWATER in 1964. Indeed many of the ideas that BARRY GOLDWATER has long espoused, a reduced role of the Federal Government in our lives, and lower taxes, are finally coming to pass. His goal of constancy in the strength of our national defenses unfortunately remains elusive.

Mr. President, BARRY GOLDWATER is witty, intelligent, and frank. He is also cantankerous and stubborn, but we all admire and respect him greatly.

It has been more than two decades since he stepped into the limelight and became a national figure; it is only fitting that his Nation recognize that he is also a national treasure.

Mr. President, I am pleased to be a cosponsor of the amendment and accept it on behalf of the majority.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. Mr. President, it is with great pleasure, and with much esteem for our distinguished colleague from Arizona, Senator GOLDWATER, that I count it a privilege to cosponsor this amendment to create an educational scholarship foundation in his honor.

The amendment seeks to pay tribute to Chairman GOLDWATER's leadership and long service to the Nation by establishing the "Barry Goldwater Scholarship and Excellence in Education Foundation."

The Nation owes to Chairman GOLDWATER a debt which mere words cannot portray. He has served our country with great distinction—both as a soldier and as a Senator.

Mr. President, Chairman GOLDWATER has defended his beloved country in military combat, and in the legislative trenches. We are a more secure nation, and the Senate is a richer institution, because of his innumerable contributions.

This foundation embodies the chairman's long-standing special interest in the quality and extent of science and mathematics education in the United States.

Our distinguished colleague from Arizona long ago recognized the importance to the national security and economic strength of the United States of improving our technological leadership.

Endowed by a $40 million trust fund, the Barry Goldwater Foundation will seek to maintain and expand America's technological advantages in two ways: By providing scholarships to outstanding undergraduate and graduate students in the fields of mathematics and science; and by providing honoraria to outstanding individuals in secondary schools who have made significant contributions to improve the quality of instruction in these fields.

I believe this is a perfectly appropriate testament to the distinguished Senator, and I am honored to join in expressing my strong support for it.

Mr. President, someone once said:

Fame is a vapor; popularity an accident; riches take wings; those who cheer today may curse tomorrow.

Only one thing endures: character.

To me, BARRY GOLDWATER is the embodiment of character. He is someone whose courage, whose dedication, whose integrity and character we might all seek and hope to emulate.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, it is a great privilege to be a cosponsor of the matter before us, offered by our colleague from Georgia.

When he announced this program that many of us cosponsor, he indicated that it was to be kept from Senator GOLDWATER. He not only wanted it to be a surprise, but he thought if he brought it to him earlier, Senator GOLDWATER might veto it and we did not want to give him that opportunity.

As a man who came to the Senate about 8 years ago and took my place on several committees, including the Armed Services Committee, I was thrown into a unique relationship with the great Senator from Arizona.

I have learned to respect him so very, very much over the last few years.

While this is not a farewell address to Senator GOLDWATER—we will have time for that later—I simply want to say that those of us who have banded together in this effort are simply recognizing the tremendous and outstanding dedication he has made to this Nation and all factors of this Nation, all the people of this Nation, in his service.

Therefore, this is probably not so much a tribute to BARRY GOLDWATER, but we believe that the results of this foundation will play a keen role to keep America strong in national defense which has been, among everything else, the hallmark of Senator GOLDWATER's service to his country. I am proud to be part of it.

The PRESIDING OFFICER. The distinguished majority leader.

Mr. DOLE. Mr. President, I will only take a minute. I would not be surprised if Senator GOLDWATER did not

kill this amendment. He does not like all of this talk anyway.

Mr. President, I cannot think of a more fitting way to end this very important legislation dealing with our Nation's security than to honor our colleague whose life has been totally dedicated to keeping our Nation strong and free. The establishment of the Barry Goldwater Scholarship and Excellence in Education Act is a tremendously appropriate testament to the senior Senator from Arizona and will go far in furthering academic excellence in the fields of mathematics and science. The millions of dollars being made available to our students nationwide by this act will not only reward deserving academic excellence but also encourage serious pursuit of two fields so vitally critical to our Nation's defense.

THE PROGRAM

Two undergraduates from each State as well as 75 graduate students will benefit annually. The program also authorizes honoraria to outstanding educators who have made significant contributions in improving the quality of math and science instruction. In the educator category, I would say Chairman GOLDWATER has been the model example for us all.

TRIBUTE

With only a short but very important interval in the sixties, the chairman has served our body since 1953 as a true statesman and leader. As I said last year at this very same closing moment, BARRY's knowledge and experience in national defense issues have been invaluable to me as majority leader. I will miss his candor and wise counsel but the legacy he leaves behind will have a lasting impact not only on this body but our Nation as a whole.

Mr. President, I would say as a longtime friend of Senator GOLDWATER, I cannot think of a more fitting—not tribute—indication of the Senate at its best in a bipartisan sense because we have respect for the man, in this case, Senator GOLDWATER. If we did not know him before, we knew him when we got here. If we did not know him when we got here, we did not know what was happening in the Senate.

I wanted to join my colleagues on both sides of the aisle to express my appreciation to those who had this idea, an idea that will extend beyond all of our lives and will enrich the lives of the young people in the future and, in the process, be a great contribution to our country.

For that, we can thank the inspiration which started with the man we know on this side as Mr. Republican; the man they know on the other side as a man of intellect, courage, honesty, integrity, and, above all, a decent human being.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I would like to join in congratulating the Senator from Georgia for offering this amendment.

Senator GOLDWATER is a gallant colleague who has always believed that the real strength of our Nation is the sum total of the character of the people who, in particular, will lead us.

Here we are both honoring the character of one of the leaders and at the same time filling an educational need in our Nation. This is a wonderful amendment, wrapping up those two things.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I am pleased to have the privilege to speak honoring the distinguished senior Senator from Arizona.

I draw on a quotation from Thomas Jefferson. He said:

> God grant that men of principles always be our principal men.

We are fortunate the Senate has received such leadership.

□ 1800

Mr. LEVIN. Mr. President, I know of no more appropriate way to honor our country than to establish this foundation in the name of BARRY GOLDWATER. He is a rare man. His steadfastness and loyalty to America are symbolized in a small way by his sitting in that chair hour after hour, day after day, week after week on an authorization bill relative to the security of the country that he loves and puts ahead of everything, including his own life. It is an honor to be a cosponsor of this amendment.

Mr. DECONCINI. Mr. President, I do not intend to belabor this subject, because we all know BARRY GOLDWATER well in this Chamber; we know he probably finds himself uncomfortable hearing all these great things about himself, as true as each and every one of them is.

When BARRY GOLDWATER came to the Senate in 1952, he upset the whole political system in Arizona. When he came to this office it appeared to many people in Arizona that he was a voice in the wilderness. He first ran against and defeated the then majority leader. Soon respect for him grew and when he ran the second time, he again defeated the majority leader. He won that election by his second-largest majority. That is when we Democrats called it the good old days—when Arizona was a Democratic State. It was difficult for a Republican to get elected statewide in Arizona but BARRY GOLDWATER did it by his straightforwardness.

The Democrats learned a lot from BARRY GOLDWATER about addressing the issues in Arizona. Today we pay tribute to him in an area that I know Senator GOLDWATER holds as his highest agenda item. That is education.

Senator GOLDWATER spends a lot of speaking time in schools in Arizona—in elementary schools, in high schools, and at the University of Arizona, at Arizona State University, and Northern Arizona University—and he talks about the need to go to school, to learn. Establishment of a scholarship fund in his name for education in science and math is a fitting tribute to him.

These scholarships are going to live long after all of us are out of the office that we hold in this body. They are a fitting tribute to the man who has championed the cause of education, who has fought for it as vigorously as he has fought for the national security. I am honored to call BARRY GOLDWATER my colleague. I am more honored to call him my friend. He has served the State of Arizona and the Nation with distinction and deserves the tribute we are bestowing on him today.

I thank the Senator from Georgia for offering and including me in this amendment.

Mr. GRAMM. Mr. President, it has been a great honor for me to serve with BARRY GOLDWATER for 2 years. When I was in the 11th grade, I read his book, "The Conscience of a Conservative." It started me thinking about the political process. The longer I thought about it, the more convinced I became that Senator GOLDWATER is right.

I am certainly glad to join Senator NUNN in cosponsoring this amendment. It has been one of the great privileges of my life to serve as a Member of the U.S. Senate and a member of the Armed Services Committee with a man that I read about as a boy and that I have always considered a historic figure.

Mr. STENNIS. Mr. President, I was out of the Chamber when this matter started or I would have been addressing the Chair earlier.

BARRY and I have been down the road together a good bit over a good long period of time. I have seen him in a lot of tight places but I never have heard him call for quarters nor skip a duty the least bit as he saw it. That is just about as fine a situation as you can find. I think this tribute is well deserved. All who were privileged to work with him under good conditions and bad, when he was tried on severe questions, can still say what I have just said about BARRY.

I never did doubt anything he said to me or told me as a fact. But it got to where, in the Armed Services Committee, presenting his bills, particularly the bills for the entire budget, it got to where he would tell me, "Now, I have got to be away next week. I have got matters here that I have to attend to, it has to have my personal attention and I do not want you to set anything

next week that requires me to be here."

I readily and quickly agreed to that, and followed it up. It got to be such a regularity.

I did not doubt a word about his really needing to be away, but I was still suspicious about what the real, rock-bottom reason was. Somebody said, "Look back for the last 5 years and get the dates and also the date for this year, when the Paris Air Show comes. It is the official need to know."

That is the only thing I could ever find where he was absent and he really said so much and earned the tribute of being there.

I could tell you some political stories, too, where he and I have swapped compliments. Let us summarize it this way: He sent a very strong message to Mississippi once when he was a candidate; then he sent another strong one later when I was a candidate. I want to publicly acknowledge that and thank him for it.

I tell you, Mr. President, he has been of great value, tremendous value. His idea of public service is highly commendable and I can recommend following it to any young citizen of America.

I congratulate him for such a wonderful record, thank him for what he has done for his country, and I am so pleased to join in this compliment and in the spirit of this entire occasion.

Mrs. HAWKINS. Mr. President, as a latecomer to the South, I was an active observer in politics and thought everybody in the world was a Democrat until I moved to Florida in 1962. The first political activity I ever took part in was Volunteers for Goldwater as Orange County Chairman in Orange County, FL. We organized that county so well, with so many volunteers for BARRY GOLDWATER, even though we never saw your name in our local newspaper or had so much as an affirmation from outside of Florida that you were the nominee and the candidate for President, I would like this body to know that we carried Orange County for Goldwater in 1964.

All the things you told us would happen did happen after that because you were not elected. I want to tell you, whether it was a book that we read, The Conscience of a Conservative, or other things you have written and spoken, you have made a lasting impression not only on the lives of those who serve in this body—and I never dreamed I would be standing on the same floor with BARRY GOLDWATER. I was just a volunteer and mobilized 3,000 people in my county in 1964. That lifelong impact has carried over to my children and my grandchildren into generations to come.

It is a great honor to join in paying tribute to my colleague as a great American.

Mr. WILSON. Mr. President, I can think of no more inspired tribute to the contribution that Senator GOLDWATER has made in so many ways than to create a foundation in his name that will provide the means whereby other young men and women can continue his contribution to America. He has been an education by his example to all those who have been privileged to serve with him.

Particularly those of us on the Armed Services Committee have not only learned tremendous respect for him even beyond that we came here with, but I think a special affection inspired by that sometimes impatient, sometimes cantankerous, but always affectionate regard that he expresses for his colleagues. He is the epitome of fairness. He has put his Nation first, as several people have observed, even in times of great pain. The character that has been pointed out he has demonstrated by his example, almost excessively, to the point where it has taken a toll upon himself. He has earned the admiration of everyone in this body many times over, I hope that those who are privileged to receive some stipend from this foundation will think often of the man whose name it bears and they will make an extra special effort to be aware of the kind of effort that he has given to America.

□ 1810

I thank the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I am honored to be a cosponsor of this proposal.

We know BARRY around the Senate as a man whose language is stated as sometimes colorful, and so I would like to use language that he might use himself.

I will just say that he is one hell of a man. I am proud to call him a friend.

Mr. BINGAMAN. Mr. President, I am proud to join as a cosponsor of this amendment to create a Barry Goldwater Scholarship and Excellence in Education Foundation to fund scholarships and honoraria in mathematics and the sciences. This is, indeed, a fitting tribute to Senator GOLDWATER for the enormous contributions which he has made to the Nation during his long career of public service, including 30 years in the Senate.

Senator GOLDWATER has truly been dedicated to excellence in education. Mr. President, I hope that all those who will receive Barry Goldwater scholarships for undergraduate and graduate study in mathematics and the sciences and Barry Goldwater honoraria for contributions to secondary education in those subjects will, each in his or her own way, seek to emulate Senator GOLDWATER's dedication to this country, his independent judgment, and his commitment to excellence.

Mr. President, education of our young is truly the backbone of this country's defense, of our economic prosperity, and of our social fabric. There is no better way for any statesman to be honored than to be associated with the vital task of preparing a new generation of American leaders in mathematics and the sciences. Senator GOLDWATER is eminently deserving of that honor.

I also hope that some of these future Goldwater scholars will attempt to bridge the often wide chasm between science and politics and help illuminate future public policy debates. Perhaps, a Goldwater scholar will one day serve in this body and on the Armed Services Committee. In any case, I know that the Goldwater scholars will make enormous contributions to our Nation and that will be a fitting legacy for this great legislator from Arizona.

Mr. MATTINGLY. Mr. President, this amendment will serve as a lasting tribute to an American patriot, BARRY GOLDWATER. BARRY serves as a model that all of us Americans should aspire to.

I was once referred to in an article in my great State of Georgia as a "Barry Goldwater, Junior." I am proud of that association and will try to live up to that high standard.

BARRY GOLDWATER, we love, admire and respect you.

Mr. CHILES. Mr. President, BARRY GOLDWATER has distinguished himself as a great American in the over half century he has served our country as a soldier and a statesman. Direct, honest, and frank, he learned through study and experience and passed his knowledge on to those with whom he served in uniform and the Senate. Most importantly, BARRY GOLDWATER is a leader who sets a moral example of integrity and courage. His leadership on national security is his legacy and all Americans are fortunate for his service.

Mr. DOMENICI. Mr. President, I rise to support the permanent recognition we are bestowing today on my neighbor Senator BARRY GOLDWATER. He asked nothing from his country for himself and gave much to it, more than most of us. This permanent scholarship program will serve as a reminder for all generations of Americans that a real patriot lived in our time. Congratulations, Senator GOLDWATER.

Mr. LEVIN. BARRY GOLDWATER is a conservative—always has been, always will be. But Mr. President, BARRY GOLDWATER is a man who transcends political ideology. BARRY GOLDWATER's America is rooted in constitutional principles—and he has never sacrificed those principles to political expediency

nor has he ever been reluctant to defend them despite political threat.

On a personal level, let me say this: working with BARRY GOLDWATER has been an education. And I don't just mean that I learned a great deal about the nature of national defense. On a more fundamental level, I mean that I learned a great deal about politics. BARRY GOLDWATER has shown once again the truth of the observation: different views and different records are often driven by the same desire and motivated by the same love of country. We deal with complex issues in this body and sometimes we are tempted to ascribe bad motives to those who oppose our positions. You just cannot do that with BARRY GOLDWATER. You can disagree with him—but you can't even think that his conclusions are insincere or that his reasons are less than well motivated. Serving with BARRY GOLDWATER, reminds us of the ultimate lesson of politics and perhaps life: that men and women of good will ought not be too quick to judge the motives of others; we ought not be too quick to translate policy disputes into personal disagreements; and we ought to be quick to see the possibility of compromise, the probability that perfection is not the exclusive property of any ideology, and the prospect that we can work together to achieve a better America and a better world.

Mr. President, working with BARRY GOLDWATER has been an honor and a privilege. That BARRY GOLDWATER has been holding his ground isn't a sign of rigidity or blindness: it is proof that he selected that ground very carefully many years ago and that he has defended it very well for all the years since.

Senator GOLDWATER is as much a part of the American heritage as the Arizona land he loves so well. And when Americans give thanks for the beauty of that land, they ought to know that all that natural beauty is reflected in the spirit of BARRY GOLDWATER.

Mr. NUNN. Mr. President, I do not want to cut anyone off. I know we could go on a long time. I am afraid the chairman is going to move to table this amendment if we go on much longer. So I would like to ask the following names be added as cosponsors: Senators LEVIN, CHILES, HOLLINGS, WILSON, SYMMS, PRYOR, PROXMIRE, RUDMAN, WARNER, PELL, MOYNIHAN, HART, ANDREWS, INOUYE, and JOHNSTON.

Mr. President, I ask unanimous consent that all of our colleagues who would like to add their names be permitted to do so at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. And the chairman would also like to be added.

[Applause.]

Mr. GOLDWATER. Mr. President, I might run again.

[Applause.]

Mr. GOLDWATER. There is no way in the world for me to say thank you, so I will not try.

[Standing ovation.]

The cosponsors of the amendment (No. 2677) are as follows: Mr. THURMOND, Mr. BYRD, Mr. STENNIS, Mr. STEVENS, Mr. LAXALT, Mr. DECONCINI, Mr. EXON, Mr. COHEN, Mr. GLENN, Mr. BINGAMAN, Mr. LEAHY, Mr. EVANS, Mr. QUAYLE, Mr. MATTINGLY, Mr. GRAMM, Mr. WARNER, Mr. LEVIN, Mr. DOMENICI, Mr. ABDNOR, Mr. PRESSLER, Mr. ANDREWS, Mr. BIDEN, Mr. ROCKEFELLER, Mr. CHAFEE, Mr. HOLLINGS, Mr. ZORINSKY, Mr. COCHRAN, Mrs. KASSEBAUM, Mr. DURENBERGER, Mr. CHILES, Mr. WILSON, Mr. SYMMS, Mr. PRYOR, Mr. PROXMIRE, Mr. RUDMAN, Mr. PELL, Mr. MOYNIHAN, Mr. HART, Mr. INOUYE, Mr. JOHNSTON, Mr. CRANSTON, Mr. HEFLIN, Mr. DOLE, Mr. MURKOWSKI, Mr. SPECTER, and Mr. SIMPSON.

Mr. NUNN. Mr. President, I call for the question on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2677) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields recognition?

Mr. HUMPHREY. What is the pending business, Mr. President?

The PRESIDING OFFICER. The amendment of the Senator from California is the pending business.

Mr. HUMPHREY. Is the Senator from California ready to proceed further with his amendment?

Mr. WILSON. Yes, Mr. President.

Mr. HUMPHREY. I yield the floor.

AMENDMENT NO. 2595

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. WILSON. I thank the Chair.

This amendment has been fully debated. The Senator from Nebraska had some questions. We have reached an understanding. The understanding simply stated is that the additional cost of research and procurement would be absorbed within the budget for that purpose, The Navy would be granted no additional funds.

Mr. EXON. Mr. President, I would like to engage in a colloquy with the sponsor of the amendment concerning the RAM missile program.

This Senator understands that the effect of the Wilson amendment is to authorize the Navy to proceed with the rolling airframe missile program with the expectation that the Navy would spend up to $24.2 million in research and development and $40 million in weapon procurement for the program. Further, this Senator understands that the procurement funds may not be obligated until the Congress has received a certification from the Secretary of Defense as outlined in the Senator's amendment. It is my further understanding that at my suggestion the Navy is required to provided offset for these total funds as opposed to increased funding.

Mr. WILSON. The Senator's understanding of the effect of this amendment is correct. The amendment has the effect of reinstating the RAM missile program but does not increase the aggregate level of funds provided to the Navy for research and development or for weapons procurement. By reinstating the program, the committee understands that the Navy will have to offset the $24.2 million in research and development and $40 million in weapons procurement with reductions in other activities. The authorization for the RAM program as provided by the Wilson amendment has the effect of adding an undistributed reduction of $24.2 million to Navy research and development and $40 million to weapons procurement, Navy.

The PRESIDING OFFICER. Is there further debate? If not, the question occurs on the amendment of the Senator from California.

The amendment (No. 2595) was agreed to.

Mr. WILSON. Mr. President, I move to consider the vote by which the amendment was agreed to.

Mr. EXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. May I ask the floor managers if there is someone ready to offer an amendment? I want to speak on the bill, but if someone is ready to offer an amendment I do not want to hold that up.

Mr. NUNN. In response to the Senator, I think the Senator from West Virginia has an amendment, and he has been waiting.

Mr. HUMPHREY. I yield the floor.

AMENDMENT NO. 2678

Purpose: Prohibition against using funds authorized for the Advanced Technology Bomber and the Advanced Cruise Missile programs for any other purpose; and limitation of the B-1B Bomber Fleet to 100 aircraft.)

The PRESIDING OFFICER. The Democratic leader.

Mr. BYRD. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 2678.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

PROHIBITION AGAINST USING FUNDS AUTHORIZED FOR THE ADVANCED TECHNOLOGY BOMBER AND THE ADVANCED CRUISE MISSILE PROGRAMS FOR ANY OTHER PURPOSE; AND LIMITATION OF THE B-1B BOMBER FLEET TO 100 AIRCRAFT

SEC. . (a) It is the sense of Congress that—

(1) the capabilities inherent in the technologies associated with the Advanced Technology Bomber and the Advanced Cruise Missile program are a critical national security asset for maintaining an adequate and credible deterrent posture;

(2) such technologies and programs should be developed as rapidly as feasible in order to produce and deploy advanced systems which will complicate the military planning of the Soviet Union and as a consequence enhance the deterrent posture of the United States;

(3) such technologies and programs should be funded at the levels authorized in this Act; and

(4) all the funds appropriated for such programs should be fully used for such programs.

(b) None of the funds appropriated pursuant to an authorization of appropriations in this Act to carry out the Advanced Technology Bomber program or the Advanced Cruise Missile program may be used for any other purpose.

(c) None of the funds appropriated pursuant to an authorization of appropriations in this or any other Act may be used for research, development, demonstration, procurement or any other purpose related to B-1B bombers beyond the 100 such bombers previously authorized.

Mr. BYRD. Mr. President, the amendment I am offering is a variation on similar amendments I have offered over the last several years to protect the development of our most advanced aviation technologies: The so-called Stealth Programs. I have been a strong advocate of these programs because, in the competition we are engaged in with the Soviet Union, in the security area, U.S. high technology is our trump card.

The United States dare not give away that trump card on the assumption that the Soviet Union is no longer our adversary, or that the competition is dissipating. Unfortunately, such is not the case. And with a new and vigorous leadership in power in Moscow, the vigor of our adversary has been renewed.

There can be little doubt about how important the accelerated development of our most advanced technologies is for our national security. Without the threat that our SDI Program apparently poses to the Soviets, for instance, I seriously doubt that we would be witnessing the positive give-and-take on arms control matters that we see today.

In the case of the Stealth Programs, they represent a technological edge over Soviet Defenses and countermeasures; they not only keep the air-breathing leg of our strategic Triad viable but force the Soviets to expend considerable resources to attempt to counter them. I would certainly rather keep the Soviets busy attempting to counter the forces we would have at our disposal, in the event of a confrontation, than to passively permit them to erect a wide array of new offensive systems with which they could intimidate and eventually overwhelm the West.

In the past, Mr. President, the extremely sensitive and highly classified nature of these programs prohibited a discussion of their details. But, thanks to the constant attention the Armed Services Committee has devoted to seeing these technologies through to their maturation, we are now seeing some results. From the information available to me, I have been impressed with the successful pacing of the Stealth bomber, and believe that the schedule, budget and technological milestones reached by the program to date all are well within acceptable ranges.

I want to ask the distinguished managers of the bill some questions for the record along these lines. But first, I would note that the cost of the Stealth bomber is now such that Secretary Weinberger felt he needed to declassify certain facts about the program. I believe that was a wise decision, in that the Senate really does need to know more about these details, given the cost. The basic question, of course, is: Are we getting our money's worth?

There have been some, particularly in the other body, who are not convinced that we should be funding the Stealth bomber at current levels, or who question the proven nature of the technology. There are those who, consequently, feel we ought to buy more B-1B bombers, beyond the currently-authorized fleet of 100—perhaps as a hedge against failure or disappointment in the performance of the Stealth. I do not share these sentiments. I feel strongly that we ought to leave the B-1B where it is, at 100 aircraft for the present at least. The second part of my amendment is intended to accomplish this purpose, because we just do not have the resources to vigorously develop the preferred bomber technology and continue to buy more B-1's. We do not have that financial luxury.

Mr. President, on June 3, 1986, the Department of Defense did issue a couple of "fact sheets" on the advanced technology bomber. I hope all of my colleagues have received the information which indicates that the costing of the Stealth compares "favorably" to the B-1. The information contends that the "program is on schedule, the technology is well understood and working, and we expect the system to be operational in the early 1990's." The information goes on to contend that the promise of the technology, to penetrate Soviet air defenses into the next century, so far appears to be genuine.

Mr. President, there is still a need to keep a tight circle around this technology, in order to delay the Soviet development of countermeasures to it. Therefore, I would not expect Senators to go into any further explanation. At this point, I would like to engage the managers in a colloquy concerning the program, to the extent that we can do so within the confines of the classification of these programs.

□ 1820

Mr. GOLDWATER. I will be happy to do my best.

Mr. BYRD. I thank the distinguished manager of the bill.

Mr. President, recent information released by the Department of Defense—so that we can have these questions and answers solidly on the record—recent information released by the Department of Defense indicated that the cost, per aircraft of the Stealth bomber compares about equally with the per unit cost of the B-1B bomber. In addition, I have understood that the ability of the Soviets to defend against penetrating Stealth technology will be extremely costly for them—in the way of new, large and numerous radar facilities, as well as other costly outlays.

Would the distinguished Senator from Georgia state his assessment as to whether the ATB—Stealth—Bomber Program is cost-effective, and how he arrived at his assessment? Am I, for instance, correct in the general estimates which I have just indicated?

Mr. GOLDWATER. I might say to the distinguished minority leader that the total cost of the B-1 Program is approximately $20.5 billion. I think it works out to about $200 million an aircraft.

I remind my friend from West Virginia that when the B-1 was first introduced, it was $27 million an aircraft.

The Senator will recall that President Carter cut the production, and when they reopened, the cost jumped almost immediately to over $100 million, and it is now up to about $200 million.

They have just recently—I think in the last few weeks—released the total cost of the ATB, and it is $36.6 billion. I do not know yet what the Air Force

is going to ask as the total, but I think the price is going to be rather comparable.

The ATB will be more costly, because it involves some of the most advanced technology we have ever used in aircraft manufacturing. It involves concepts that we have never used on any aircraft before.

Discussing the ATB is something we cannot do in public. It is still very highly classified, but it should be a great revelation when the airplane is finally displayed to the public. I have seen it several times, have been in it, and I am very enthusiastic about it just from an airplane standpoint.

The ATB, the advanced technology bomber, was designed, of course, to present a much smaller target to the radar system of the Soviets. While I cannot give the exact dimensions of, say, the B-52 and the ATB and even the B-1, the size of the radar image of the advanced technology bomber would be very small compared to the B-52, which is much, much larger, and compared to the B-1, which is larger, also.

But the B-1 has tremendous speed, particularly at lower levels; and the great advantage of the B-1 compared to the B-52, which we are still using and will be for some time, is the fact that B-1's can fly at very low, near the speed of sound, while the B-52 will do only about 350 miles an hour at the same altitude, and with their very flexible wings, some of the B-52's might not get there.

Mr. NUNN. Mr. President, will the Senator yield?

Mr. BYRD. I yield.

Mr. NUNN. Mr. President, I will be pleased to address the issues raised by the distinguished Senator from West Virginia. The application of Stealth technology will dramatically improve the survivability of United States manned bombers in the event they are called upon to penetrate Soviet air space. The Soviets have spent the better part of the post-war period encircling their country with a highly sophisticated, redundant air defense network which has placed significant limits on the effectiveness of our existing bomber force. Even the B-1B bomber, with its somewhat reduced radar signature, will find itself increasingly vulnerable by the mid-1990's. Stealth technology will render this advanced Soviet radar network virtually obsolete. The Soviets will be required to revamp most of their air defense system. This will greatly complicate Soviet defense plans while forcing them to invest billions of rubles to dramatically expand their radar network, if they choose to move in this direction, if they choose to continue their emphasis on very thick air defenses. The money for this required expansion will be money that cannot be spent to build more ICBM's, ships, tanks, or planes. It is money that cannot be used in Afghanistan, Cuba, or Nicaragua. It is money that will have to be spent in a purely defensive role, diverting their scarce resources away from threatening, offensive systems.

The Secretary of Defense has reported to the Congress that the unit cost of an ATB is only a few percent greater than the equivalent unit cost of a B-1B, with those costs expressed in constant 1981 dollars. Such a comparison is certainly valid; after all, the use of constant dollars to compare programs spread over different time periods is a well established methodology. If constant dollars are not used, we would be comparing apples and oranges, instead of apples and apples. Such an apples to apples comparison is important, because it clearly shows that the costs of acquiring this revolutionary and robust technology are not unreasonable, as some have claimed, but are very much in line with our most recent strategic aircraft cost experience, but are very much in line with our most recent projected aircraft cost experience. However, this demonstration of cost reasonability misses a key point—that the ATB offers a quantum jump in capability. Its superior survivability, due to its low signature characteristics, combined with excellent range and payload performance, result in an aircraft that is substantially more effective than the B-1B. That is not said in derogation of the B-1, but it is an accurate kind of comparison. It is a very substantial increase in capability. When considered from these aspects the ATB offers a staggering improvement to our strategic capability at a reasonable price and as such is most certainly a cost-effective investment. It will invalidate years of Soviet investment in the world's most capable air defense system.

Mr. BYRD. Within the confines of the classification of the details of the Stealth Program, how would the distinguished manager rate the performance of the Stealth program so far in terms of its schedule, its budget, and its technological development? That is, is it generally on schedule, on budget, and reaching the promise of its technological aspirations?

Mr. NUNN. Our developments in Stealth technology represent a major technological superiority over the Soviets. We know that the Soviets place a heavy emphasis on the acquisition of highly technical intelligence. The dollars and American ingenuity that we as a nation have invested to produce this advantage would, in essence, be wasted if specific details of the program were to become available as a result of our discussion in an open forum. However, I can say that the ATB program remains on schedule and shows every promise of continuing to meet its program milestones with our continued funding support and commitment. The technologies have matured significantly during recent years and are now well understood. With these technologies in hand, the technical goals of the program show every indication of achievement. In summary, the program remains on track and should be allowed to proceed as currently proposed.

Mr. BYRD. Are the additional capabilities inherent in the Stealth so valuable as to justify another new fleet of strategic bombers? Would it not be just as well to build a few more B-1B's and stop there? Looking at this question from another perspective, is it necessary for the United States to continue to develop the most advanced bomber fleet possible, and what would be the strategic considerations which would drive this requirement?

Mr. NUNN. As I stated earlier, the ATB does not represent an revolutionary advance in capability. It is a revolution step—a quantum leap forward. No reasonable number of additional B-1B's will provide us with an equivalent capability. We need the technological advantage offered by this new Stealth technology. The Soviet Union has assembled a conventional and strategic arsenal of staggering proportions. Although the United States also had sizable military forces, we have traditionally traded numbers for technological superiority. Indeed, current strategic doctrine relies on the conviction that the Armed Forces of the United states are so qualitatively superior that the disparity in numbers is offset. There is not reason to abandon this historical commitment to high quality, technologically superior weapons systems. Therefore, the improvement of U.S. military technology is of critical importance if this balance is to be maintained. More important is the protection of existing and future technology which will give the United States an edge in the numbers versus technology calculation. And, yes, I do think we need the most advanced bomber fleet possible. I fully support our triad deterrent strategy. The manned bomber—a proven, recallable, flexible, stabilizing leg of that triad, continues to be a most desirable system from my perspective. The ATB is, by far, the most cost-effective way to keep that leg healthy and strong. I cannot envision a realistic strategic consideration that would change this assessment.

Mr. BYRD. Is it not true that the long-term capabilities of the Stealth will provide a very significant improvement over those of the B-1B, even if the B-1B is "modified?"

Mr. NUNN. The B-1B represents a conventional design approach and has only a very limited potential for further improvements to its "stealth"

characteristics and performance. Its continued survivability will remain very dependent on modifications to its electric countermeasures, or ECM, systems, with ever diminishing net effect as the Soviet air defense network improves in the 1990's. After all, the Soviets have been working on the challenge of the B-1B as a low-altitude penetrator for a number of years and are fine-tuning their air defenses to this threat. The result is that by the mid-1990's, the B-1B will be increasingly vulnerable in a strategic penetration role. Only the ATB will be able to penetrate projected Soviet air defenses well into the next century.

Mr. BYRD. May I ask the distinguished ranking member of the Armed Services Committee a further question: Does he understand that the other body will produce a DOD authorization bill with a funding level reduced well below that of the Senate bill? And, would that funding level, if adopted by the conference, set back the schedule for Stealth development?

Mr. NUNN. It is my understanding that the funding level which will be recommended by the other body would result in undesirable impacts to both the current schedule for first flight and the initial operational capability, or IOC, date.

Mr. BYRD. Last, Mr. President, I would indulge the attention of the managers of this bill with this question: Would the further production of the B-1B be in the national interest, given the increasing pressure on our funding capabilities? Would the further production of the B-1B, beyond the 100 aircraft already authorized, jeopardize our capability to move forward vigorously with Stealth production?

Mr. NUNN. The Nation does not need, nor can we afford, additional B-1B's. Production of more than 100 B-1B's, even if we were not facing the budgetary realities of the foreseeable future, would not be in the best interests of the Nation. B-1B's will serve us well as an interim penetrator until the mid-1990's. However, as the ATB is deployed, the B-1B will have to transition to less demanding roles in order to remain survivable. Only the ATB will be capable of penetrating into the Soviet Union into the next century. Production of additional B-1B's would require an enormous near term investment with only a marginal payoff and would divert scarce resources from important national priorities, which would include vigorous pursuit of our advantage in Stealth technology.

□ 1830

Mr. GOLDWATER. Mr. President, I do not think it would be correct for us to finish any discussion of the advanced technology bomber without giving credit to the manufacturer. I can give the manufacturer lots of trouble on a lot of things he has done. But the manufacturing methods that he has developed in creating this bomber will revolutionize not just the aircraft industry but all manufacturing in this country.

I go back to the days when they were making aircraft out of wood and Dutch linen and now to go into this factory and see as an example of the construction of a wing where you used to see literally hundreds of people today you might see 50 or 60. Photography is used. The transfer of blueprints from computer to material is used. It is something that has never been done before.

Another very interesting thing has been the way they have almost eliminated the draftsman. Today they use a computer. You can go into the designer and say "Well, I am a pilot and I look at this problem," and he is punching buttons all the time and the first thing the pilot knows he punches the big button. There is the answer.

I hope that satisfies the minority leader.

Mr. BYRD. It is certainly satisfactory.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I send to the desk a copy of a perfecting amendment to the Byrd amendment and ask it be——

Mr. WARNER. If the Senator will withhold a minute, this side of the aisle wishes to express our intention to accept the amendment.

Mr. GLENN. Withhold that, and I will address the Chair later.

Mr. NUNN. Mr. President, I vigorously support the Byrd amendment. I think it is an excellent amendment. I believe what the Senator from West Virginia passed before this Senate are the ingredients in securing the kind of momentum of the ATB that otherwise would not be present.

This is an important amendment. I support it wholeheartedly.

Mr. WARNER. If I might continue briefly in looking at the 1986 Authorization Act, it is to be noted that the distinguished minority leader put a like provision in that act.

So, to the best of my knowledge, the amendment this year tracks consistently if not identically with the one that was in the 1986 act.

Mr. GOLDWATER. Mr. President, if I might, the distinguished minority leader mentioned one factor that I forgot, and I think it is one of the most important. He is worried about whether or not we are going to buy more than 100 B-1 bombers. I can tell my colleagues that the Air Force has no intentions as of now of buying any additional B-1 bombers.

Mr. GLENN. Mr. President, I ask——

Mr. BYRD. Will the distinguished Senator withhold so I may respond briefly to the distinguished Senator from Virginia?

The amendment this year is not identical with that of last year. I believe it was the sense-of-the-Senate amendment; whereas, this year it mandates that there be no additional money for the B-1 bombers beyond 100.

Mr. WARNER. It is the same goal as this year being written into law.

Mr. BYRD. Yes. I thank the distinguished Senator.

Mr. WARNER. I thank the distinguished Senator.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I thank the Senator.

AMENDMENT NO. 2679

(Purpose: To provide that funds may not be used for the purpose of assembly or integration of more than 100 B-1B aircraft)

Mr. GLENN. Mr. President, I ask for consideration of the amendment I send to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN] for himself and Mr. MCCLURE proposes an amendment numbered 2679 to the Byrd amendment numbered 2678.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out subsection (c) of the amendment and insert in lieu thereof the following:

(c) None of the funds authorized to be appropriated under this Act may be used for the purpose of assembly or integration of more than 100 B-1B aircraft.

(d) The Defense Science Board shall conduct a study to determine the most operational and cost effective mix of strategic bombers consistent with national security objectives. The study is to be completed by February 1, 1987, and submitted to the Committee on Armed Services of the Senate and House of Representatives.

Mr. GLENN. Mr. President, I favor the advanced technology bomber, the ATB, but I do not feel the support for ATB should be as unconditional as the distinguished minority leader indicates.

So I stand in opposition to the amendment offered by the distinguished minority leader.

I am convinced that we need to modernize our strategic bomber forces.

I have never really supported the need for strategic bombers' nuclear delivery capability as much as I have for their conventional warfare capability.

I think that if we get into a full-scale nuclear exchange with the Soviets, we are not very likely to fly bombers into Moscow while ICBM's and cruise mis-

siles are coming in. But we do need a heavy bomber.

What we need in the strategic bomber program is flexibility to ensure a hedge against possible serious technical problems and excessive cost growth.

The amendment offered by my distinguished colleague from West Virginia does not retain that flexibility. In fact, it will have the opposite effect. The intent of his amendment is to freeze out any other consideration of this issue.

By codifying, and I quote, that "None of the funds authorized to be appropriated under this act may be used for research, development, demonstration, procurement or any other purpose, related to the B-1 bomber beyond the 100 such bombers previously authorized" eliminates any flexibility in the bomber modernization program. Those words "or any other purpose" means it is an absolute lockout of the B-1B bomber.

So the amendment by the distinguished minority leader could effectively terminate any further consideration of the B-1. It presumes perfections in a brandnew conceptual airplane, and violates one of the most important recommendations of the Packard Commission. "Fly before you buy." Do not buy a pig in the poke. Know its capabilities first.

With the ATB, we are going with a brandnew concept, with lots of things that we cannot talk about in open session because they are still highly classified. This is still a black program and we can only refer to some newspaper reports about it.

But to take this step is something we have never done with any other airplane, or with any other weapons system. We are totally precluding the possibility that there will be trouble with that airplane.

We know from experience that every airplane has a development period when difficulties are worked out, that cannot be foreseen.

We are not perfect. We all know that. Even after some 20 shuttle flights, we were not perfect. And to assume at this point that we have attained absolute, infallible perfection with the ATB and want to close out any other option for all time is a mistake.

I believe to take such a step at this critical juncture in our bomber modernization program is to be penny-wise and pound-foolish.

My perfecting amendment, like the amendment of my colleague from West Virginia, does not provide for the procurement of additional B-1's. My amendment does not provide for more than the 100 aircraft currently authorized. But it does protect the option for DOD. It protects our option for procurement, if we do have problems with the ATB.

My amendment does not provide for any additional funding for additional B-1's. Also it says that we will not unequivocally close this out—destroy the dies, cut up the line, and end the B-1 for all time. We will not procure additional aircraft, but we will not forclose that option in case we need it. In other words, we must not terminate our capability of going back to the production line if we need it.

The passage of my amendment would be consistent with recent House Armed Services Committee action. Their bill provides some money. It provides $200 million for a strategic bomber contingency fund, and makes available to the Secretary of Defense three alternatives: First, establishment of competitive alternative sources for the ATB; second, procurement of additional B-1B aircraft components up to long lead time items; and third, there could be submission of a rescission.

Mr. BENTSEN. Will the Senator yield?

Mr. GLENN. Yes.

Mr. BENTSEN. I want to congratulate the Senator from Ohio for what he is offering. When you talk about the Stealth bomber, you are talking about a very substantially advanced state of the art. There is no question we have some concern about the instability and major changes in an airframe. What you have in the B-1 is a proven bomber and a very fast bomber. And, obviously, many of those things that we learned in the research there could have been applied to the B-1. I doubt that there is that much gain in the new bomber.

I am deeply concerned with trying to stake all of our future, insofar as the bomber is concerned, on the next stage of it. I am delighted to support the Senator's amendment.

Mr. GLENN. I thank the Senator. I appreciate that very much.

I am convinced that, given the uncertainties facing our entire strategic modernization program, just keeping the B-1B production option open provides maximum flexibility. I urge my colleagues to think very carefully, before voting to terminate that option. We must continue the most successful procurement of a strategic weapons system since the acquisition of the Polaris submarine some 30 years ago.

I believe this option has several benefits.

First, it will provide additional time for us to determine the most operationally and cost-effective mix of B-1B's and ATB's. A recent Air Force bomber-mix study, requested by the Armed Services Committee, did not do that although it was clearly the intent of Congress that such a mix be addressed.

The current Air Force bomber inventory totals 325 aircraft. That means that approximately 90 additional aircraft will have to be procured beyond the 100 B-1B's and 132 ATSB's that are contracted for now.

My amendment proposes that the Defense Science Board he tasked to conduct an independent, objective bomber-mix study. Given both the projected costs of the ATB and the demonstrated capability of the B-1B, especially when the B-1 is equipped with the long-range, stealth advanced cruise missile, the most effective and affordable mix of the two aircraft should be determined before the B-1B production line option is foreclosed.

Concerning the projected costs of modernizing our strategic bomber force, let me review, for my colleagues, what I have been able to learn about costs.

Mr. President, I ask for order in the Senate so these figures may be heard, because I think they will be rather startling to some people.

The PRESIDING OFFICER. The Senate will be in order. Senators conversing will retire to the Cloakroom. Staffers conversing will retire to the back of the Chamber.

Mr. GLENN. Mr. President, first, the figures we were given a short time ago from the Secretary of Defense are very misleading. I have written a letter to the Pentagon to this effect.

They present these figures in fiscal year 1981 dollars. We are living in 1986, and we are going to procure these aircraft in the outyears.

Now, do we have any idea what the costs are going to be in these outyears? Yes, we do. Comparisons have been published. Some of the figures are a little speculative, but most of them have come directly from the Pentagon.

Do we know how many ATB's we are going to get for $1 billion? Only two.

The figures released, when you upgrade those 1981 budget figures up to fiscal 1986 figures, as published in the Los Angeles Times on June 4 puts the cost at $455 million each. The Washington Post estimate is $568 million each.

So we are talking about two approximately two per billion dollars—horribly expensive. Quite a different figure from the much lower fiscal 1981 figures.

The DOD factsheet, when we went back to June, the 132 program, in fiscal 1981 dollars shows a cost of $277 million each. These are figures that have been released.

So, compared to those 1981 figures, we go from $277 million per aircraft up to $455 million. And, if one of the other estimates is correct, it is $568 million per copy.

Some of us on the Armed Services Committee have been briefed on this privately and I am only giving published reports here, because much of the program remains black.

It would seem to me that figure of two aircraft per billion dollars has to be a shock for anyone who is considering what the costs are going to be in the out-years.

Mr. President, I ask unanimous consent to have this table printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COST COMPARISONS

[Unit Cost]

| B–1B | ATB |
|---|---|
| Fiscal year 1981 dollars: | |
| $205M—Presidential cert. 1981 (baseline 100 acft). | $277M—DOD fact sheet, June 3, 1986 (132 acft program). |
| $265M—DOD fact sheet, June 3, 1986 (Baseline 100 acft plus B–1A R&D). | |
| $140M—Rockwell International unsolicited proposal, March 1986 (48 additional acft). | |
| Fiscal year 1986 dollars: | |
| $195M—Rockwell International unsolicited proposal, March 1986 (48 additional acft). | $355M—Washington Times, June 4, 1986. |
| Then year dollars: | |
| $263M—Rockwell International briefing, May 1986 (48 additional acft). | $455—Los Angeles Times, June 4, 1986. |
| | $568M—Washington Post, June 4, 1986; Aerospace daily, June 6, 1986. |

□ 1840

The PRESIDING OFFICER. The Senate will be in order. The Senator deserves to be heard. We will suspend for a moment while those Senators conversing retire from the Chamber.

Mr. GLENN. Mr. President, those costs are quite different from what I think most Members of the Senate believe we are going to be paying for the ATB and the B–1. The cost figures updated into 1986 dollars now are $455 million for the ATB and around $263 million for the B–1.

I am not saying that we should go ahead and procure B–1 over ATB. Quite the opposite. All I am saying is that if these costs get further out of hand and if there are technical problems with this brand new aircraft, then we better have an alternative heavy bomber. That is the crux of the whole matter.

A second benefit of maintaining the B–1 option, besides the cost, would be to provide a hedge against possible serious technical and/or cost growth problems in the ATB development program. The President, in a recent message to Congress on strategic programs, described the ATB as "the most revolutionary development in military aviation since World War II."

□ 1850

So by any yardstick it is a high-risk program. I cannot in open session go into some of the technical difficulties that the aircraft might encounter. I would be glad to discuss it with individual Members. I have been to the plant, talked to workers, and I have reviewed their problems. They have made a lot of progress. But we cannot discuss that in open session because that is still considered in the black part of the program.

The design, manufacturing techniques, and aerodynamics, are pushing the envelope as hard or harder than any program of which I am aware, either in the past or currently. Given these risks, I find it very difficult to understand why the Chief of Staff of the Air Force, General Welch, has not come forward himself and requested to keep his options open.

In fact, I believe we are already seeing evidence of potential problems. General Welch testified recently that the program has now slipped "2 to 3 months" even though we are still in the relatively early stages of R&D. Is that just the tip of the iceberg? I hope not.

But let me tell you what can happen in some of these situations. Back when I was involved in flight testing, I knew of a testing program for a new fighter that when the guns were fired, they set up a resonant frequency the same as a wing length, and it popped 21 square feet off the wing tip. Fortunately, the airplane was controllable, and it still could come back and land.

In another case, we had guns mounted on the edge of a duct. When the guns were fired, it set up a standing wave like an organ pipe. It caused such a reverberation up and down the face of the engine, that it actually would put the fire out on the engine. It was a glider at 40,000 feet.

No one could have seen that in the testing program. We had to make major modifications because of that.

We tried to put on another airplane what you bird hunters will understand, a cups compensator similar to that on the end of a shotgun. We had the same thing apply to a 20-millimeter cannon. It was a fine big chunk of stainless steel. It worked fine. You fired and all the engineering looked correct. Except after we fired it for awhile, it broke off, burned through the duct, and stripped the engine. Luckily, we did not have the airplane blow up.

Those are just some of the things that happen as you bring new airplanes out. I know about these because these are three incidents in which I was involved personally. We had no way of foreseeing those things. We stripped engines and tore chunks off wings, even after all the computer studies of the manufacturer had been perfect.

All I am pointing out is there are unknowns in testing programs.

I cannot say when the first flight of the ATB is going to be. It is not soon. I can say that. We cannot even put that out. That is still part of the black program. We do not know the nature of the beast. Yet, we are about to foreclose forever any other option, even though leaving that door open would not cost us any money here on the floor.

Mr. President, the third benefit is that by preserving the B–1B production option, we can keep competitive pressure on the ATB Program.

While there are those who believe that Congress merely has to legislate a cost cap on the ATB Program to prevent overruns, this ignores reality. If cost capping were the total answer, then we could simply legislate overruns out of existence. I do not believe it was the cost cap alone that has kept the B–1B below the $20.5 billion cost ceiling—I believe that in large part, it was the competitive threat from another bomber production program that has been the primary motivator.

In summary, Mr. President, I would again urge my colleagues to consider very carefully the strategic and economic implications of terminating the B–1B production option prematurely and unequivocally,

We are completely relying on computer and model studies. And I know it has been wind tunnel tested more than almost any other airplane in history. Maybe completely more than any other airplane. While that gives us a high probability of success; let us not cut our options 100 percent.

We are assuming every model study has gone perfectly and will pan out in full scale as it did in the models. We are saying that the problems so far in development of the ATB are all soluble beyond any doubt whatsoever. And we are saying that the Soviets will not be successful in any way, shape, or form in developing countermeasures or in developing ways of overcoming this new technology. All this is very doubtful.

So, Mr. President, I see no advantage whatsoever in closing out any options to the ATB. I am not proposing additional production schedules. I do not want to see additional money for production.

I support the minority leader in his hope that the ATB will be the new successful bomber of the future. But everything I have ever experienced in flight testing tells me that a new airplane is going to have trouble. We do not know how serious. We are moving here into technology beyond anything we have ever had. Still, we must not close our options.

I yield the floor.

THE NEED TO KEEP THE B–1B PRODUCTION LINE WARM

Mr. McCLURE. Mr. President, I support the Glenn perfecting amendment on the advanced technology bomber and the B–1B, because I believe we must keep the B–1B production line warm. For as little as $200 million we can preserve the option to keep the B–1B production line warm. We are not

asking for this funding now. We only want to keep this option open.

There are several reasons to keep the B-1B production line warm.

First. There will be a "bomber gap" between 1988, when B-1B production of 100 units is completed, and 1991 or 1992, when the ATB may become operational. During this period, the Soviets will be producing three bombers—the Backfire, the TU-95 Bear H, and the Blackjack.

Second. There are only a few warm U.S. production lines, the MX, the Trident, and the B-1B. We should not unilaterally curtail one in this dangerous period of our strategic inferiority and vulnerability to the Soviets.

Third. The Soviets have broken out of the SALT II Treaty, and are breaking out of the SALT I Anti-Ballistic Missile Treaty, by their 21 confirmed violations of the former, and their 9 confirmed violations of the latter. In this period of Soviet break out, we should not be unilaterally disarming by cancelling the option to keep the B-1B production line open.

Mr. WARNER. Mr. President, I rise in opposition to the amendment of the Senator from Ohio. The amendment precludes funding for assembly or integration of more than 100 B-1B's, but does not limit funds for long lead components to protect the option to produce more than 100 B-1B's. Since long lead funding is what the B-1B issue is really all about in this year's Defense budget, the omission of long lead funding in the amendment opens the door to further B-1B production.

Mr. President, no one has more respect for the military and technical judgment of the Senator from Ohio than this Senator. During this past year, Senator GLENN and I have spent numerous hours together receiving highly classified testimony and briefings on the advanced technology bomber, and have discussed bomber modernization issues at length.

While we may have some disagreements with regard to the merits of bomber force structure analysis that has been done by the Department of Defense, I do not believe we, or any other Senators who have been informed on these highly classified matters, disagree on the merits of the advanced technology bomber in either strategic nuclear or conventional conflict, or on the technical status of the program.

Neither do we disagree on the need to put competitive pressures on the advanced technology bomber contractors in order to secure this critical system at a fair and affordable price. Where we disagree is how to put that competitive cost pressure on the Stealth contractor.

The Senator from Ohio has made no secret of his answer to this problem, which is to provide up to $200 million for long lead production funds to protect the option to build additional B-1B's. This position is no doubt based, in part, on the very positive contribution that the development of the Stealth bomber has brought to the cost performance of the B-1B. I do not argue that the continuation of a two bomber program—that is to say, the continuation of the B-1B production line—as we proceed with the ATB, would put competitive cost pressures on the Stealth bomber program.

The problem, however, has to do with the schedule of the ATB Program, and affordability considerations that follow from those schedules. While I cannot get into any details here, because of security considerations, I can say that ATB schedules would require carrying the B-1B option for several more years in order to put the appropriate competitive pressures on the ATB contractor at critical contract milestones.

And therein is the rub. The $200 million in fiscal year 1987 would only be the down payment. To make the B-1B option credible at critical junctures in ATB contracting, we would have to fund the B-1B option in fiscal year 1988 at a cost of over $1 billion, and in fiscal year 1989, at a cost of $5.4 billion.

So we must turn to the issue of whether we want to produce additional B-1B's.

The Air Force has testified in no uncertain terms that it does not want and cannot afford additional B-1B's. General Welch, the new Air Force Chief of Staff, testified while still Commander of the Strategic Air Command that even if the ATB were not Stealthy, he would still prefer the ATB over the B-1B as a strategic bomber.

Mr. President, we have heard no arguments today to justify the need for expensive "insurance" against the failure of the Stealth Program to meet technical goals. I can assure my colleagues that in the extensive classified hearings and briefings which I and other Senators on the committee have attended, that the ATB Program is on schedule, and an extensive research and development program has minimized the areas of risk that were identified at the outset of the program as being the major challenges.

Finally, Mr. President, my colleagues should be aware that there are more affordable ways to put cost pressures on the ATB contractor. One of the most promising is to impose a program cost ceiling at the appropriate time, as was successfully done in the B-1B Program. Now is not the time in the development of the bomber to take such an action. I can assure my colleagues, however, that when the program reaches the point of sufficient maturity, the committee will consider recommending that a cost cap on the ATB Program be legislated, as was the case for the B-1B.

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I have listened with tremendous interest to the Senator from Ohio because I have great, great respect for his pilot ability, for his thorough knowledge of aeronautics, and I sat here thinking how he could apply that without any problem to every airplane that we have ever made in the history of our country.

I had the pleasure several weeks ago of flying a new T-46. I am not going to talk about it too much. It is the first production airplane. It does have bugs. Every airplane we have ever built has a few bugs in it. They can be smoothed out as we have smoothed out bugs in every airplane. We are still modifying the B-52 and it is 40 years old. We are still modifying the F-4 and it is over 30 years old. That is to keep up with the progress, and the mistakes we find.

But I just have to say that I think we should realize that the $200 million that is being asked does not result in useable end items delivered to the Air Force at the end of the year. The long lead items are machine forgings that can only be used in the subsequent production of additional aircraft. If no more B-1B's are produced, the funds would have been wasted. The nature of the items are such that they cannot be called spare parts.

It is with great reluctance, Mr. President, that I move to table the Senator's amendment.

Mr. NUNN. Mr. President, will the Senator withhold just for 1 minute?

Mr. GOLDWATER. Yes.

Mr. NUNN. Mr. President, I will not take much time. I know everyone is ready to go home. There is a possibility this would be the last rollcall vote on this bill other than final passage. We have two more amendments that may be worked out. They may not be. But we are hoping they will be. We could have as many as three rollcalls.

Let me say on the Glenn amendment I have tremendous admiration for my colleague from Ohio. He is a very, very valuable member of our committee. He has had tremendous experience in all areas of aviation, far more than most of us in this body. I would have to oppose his amendment and urge that the tabling motion be carried by this body.

Mr. President, we are not talking about a situation where we are going to the House with just this amendment. The House has put $100 million in. They have really invited the Department of Defense to keep the production line open on the B-1B.

This amendment is a back door invitation to keep the B-1B production line open. That is what it is. It is not just a question of $100 million. We really do not have any milestones between now and next year on the ATB.

I know this is intended to be a hedge against the ATB not being all that we hope it is. But we are going to have to put up another $1 billion in next year in order to keep this same hedge open. Unless you keep it open for a year-and-a-half, you really are not doing anything.

So we really are talking about whether to invite the Department of Defense to keep the production line on the B-1B open with possible spare parts and long lead items. You are talking about $1 billion. I do not think we can afford that kind of insurance at this stage. So I would urge my colleagues to join the Senator from Arizona, and the Senator from Georgia, and the Senator from Virginia in tabling this second-degree amendment. Then I hope we would pass the Byrd amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arizona to lay on the table the amendment of the Senator from Ohio to the amendment of the Senator from West Virginia. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

□ 1900

Mr. SIMPSON. I announce that the Senator from Maine [Mr. COHEN], the Senator from Oregon [Mr. HATFIELD], the Senator from Nevada [Mr. LAXALT], and the Senator from Vermont [Mr. STAFFORD] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from New Jersey [Mr. BRADLEY] are necessarily absent.

The PRESIDING OFFICER (Mr. TRIBLE). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 75, nays 19, as follows:

[Rollcall Vote No. 205 Leg.]

YEAS—75

| | | |
|---|---|---|
| Abdnor | Exon | Kasten |
| Andrews | Ford | Kennedy |
| Armstrong | Garn | Kerry |
| Baucus | Goldwater | Lautenberg |
| Biden | Gore | Leahy |
| Bingaman | Gramm | Levin |
| Broyhill | Grassley | Long |
| Bumpers | Harkin | Lugar |
| Burdick | Hart | Mattingly |
| Byrd | Hatch | McConnell |
| Chiles | Hawkins | Melcher |
| Cochran | Hecht | Metzenbaum |
| D'Amato | Heflin | Mitchell |
| Danforth | Heinz | Moynihan |
| DeConcini | Helms | Nunn |
| Denton | Hollings | Packwood |
| Dodd | Humphrey | Pell |
| Domenici | Inouye | Pressler |
| Durenberger | Johnston | Proxmire |
| Evans | Kassebaum | Pryor |
| Quayle | Sarbanes | Stevens |
| Riegle | Simon | Thurmond |
| Rockefeller | Simpson | Trible |
| Roth | Specter | Warner |
| Rudman | Stennis | Zorinsky |

NAYS—19

| | | |
|---|---|---|
| Bentsen | Glenn | Sasser |
| Boren | Gorton | Symms |
| Boschwitz | Mathias | Wallop |
| Chafee | Matsunaga | Weicker |
| Cranston | McClure | Wilson |
| Dixon | Murkowski | |
| Dole | Nickles | |

NOT VOTING—6

| | | |
|---|---|---|
| Bradley | Eagleton | Laxalt |
| Cohen | Hatfield | Stafford |

So the motion to table amendment No. 2679 was agreed to.

□ 1910

Mr. GOLDWATER. I move to reconsider the vote by which the amendment (No. 2679) was tabled.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2678

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia.

Mr. NUNN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. NUNN. Am I right in saying that the underlying Byrd amendment is now the pending business and must be disposed of?

The PRESIDING OFFICER. The Senator is precisely right.

Mr. NUNN. Mr. President, I suggest a voice vote unless the Senator feels the need for a rollcall vote.

Mr. BYRD. Mr. President, I do not feel we need a rollcall vote. I think the RECORD speaks for itself on the previous vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia.

The amendment (No. 2678) was agreed to.

□ 1920

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2680

(Purpose: To amend section 232 of the Trade Expansion Act of 1962 to improve its administration, and for other purposes.)

Mr. BYRD. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The Senate will be in order. Senators are asked to take their seats and the clerk will report the amendment.

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 2680.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following:

SEC. . IMPORTS THAT THREATEN NATIONAL SECURITY.

(a) IN GENERAL.—Subsection (b) of section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862) is amended—

(1) by striking out "Upon request" and inserting in lieu thereof "(1) Upon request",

(2) by striking out ", Secretary of Commerce,",

(3) by striking out "Secretary of the Treasury" and inserting in lieu thereof "Secretary of Commerce",

(4) by striking out "within one year after receiving an application from an interested party or otherwise beginning" and inserting in lieu thereof "by no later than the date that is 6 months after the date on which the Secretary receives a request for an investigation under this section or on which the investigation otherwise begins", and

(5) by adding at the end thereof the following new paragraphs:

"(2)(A) The Secretary shall immediately notify the Secretary of Defense of any investigation initiated under paragraph (1) with respect to imports of an article. Upon receiving such notice, the Secretary of Defense shall conduct a separate defense needs assessment with respect to such article.

"(B) By no later than the date that is 3 months after the date on which the investigation under paragraph (1) of imports of an article is initiated, the Secretary of Defense shall complete the defense needs assessment conducted under subparagraph (A) with respect to such article and submit to the Secretary a report on the assessment. Such report shall be submitted by the Secretary to the President with (and be considered a part of) the report that the Secretary is required to submit to the President under paragraph (1).

"(3)(A) The report submitted by the Secretary under paragraph (1) shall include a written statement by the Secretary of Defense expressing concurrence or disagreement with the findings and recommendations of the Secretary contained in such report and the reasons for such concurrence or disagreement.

"(B) The report submitted by the Secretary under paragraph (1), or any portion of such report (including the report submitted by the Secretary of Defense under paragraph (2)(B)), may be classified only if public disclosure of such report, or of such portion of such report, would clearly be detrimental to the security of the United States.

"(C) Any portion of the report submitted under paragraph (1) which—

"(i) is not classified in accordance with subparagraph (B), and

"(ii) is not proprietary information described in paragraph (5)(A),

shall be published in the Federal Register.

"(4)(A) The President shall take action, or refuse to take action, under paragraph (1) with respect to any report submitted under paragraph (1) by no later than the date that

is 90 days after the date on which such report is submitted to the President.

"(B) The President shall make a written statement of the reasons why the President had decided to take action, or refused to take action, under paragraph (1) with respect to each report submitted to the President under paragraph (1). Such statement shall be published in the Federal Register.

"(5)(A) Proprietary information which is provided by a person who has made a written request to the Secretary or the Secretary of Defense that such proprietary information not be disclosed to the public—

"(i) shall only be disclosed to those persons who are directly involved—

"(I) in investigations conducted under this section, or

"(II) in carrying out the provisions of this section, and

"(ii) shall not be disclosed in any statement or report which is required to be published under this section.

"(B) The Secretary is authorized to prescribe regulations that—

"(i) ensure compliance with the requirements of subparagraph (A), and

"(ii) impose sanctions against any person who violates the provisions of subparagraph (A).".

(b) CLARIFYING AMENDMENT.—Subsection (d) of section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862) is amended by inserting "in the Federal Register" after "published".

Mr. BYRD. Mr. President, if we may have the attention of the Senate——

The PRESIDING OFFICER. The Senator will suspend. Senators are asked to take their seats.

Mr. BYRD. Mr. President, it is not my intention to delay the Senate very long. I hope that Senators will listen to the contents of the amendment and then I want to make a judgment as to where we go from there.

Mr. President, as we weigh important questions of defense policy, we should keep in mind the fact that economic security is necessarily related to national security. I introduced the National Security Trade Act—S. 1533—on July 31, 1985. By the end of that year, the trade deficit had reached a record $148.5 billion. If the first 6 months of this year are any measure of what we can expect, we could end 1986 with a trade deficit of $168 billion—or more. Every dollar of that trade shortfall has an impact on American jobs. It means that we are seeing less exports and more imports. Some of those imports are undercutting our defense preparedness and industrial base in ways that no nation can accept.

Section 232 of the Trade Expansion Act of 1962 was devised to address this problem—to assure that imports would not be allowed to undermine our defense preparedness and our industrial base. Despite a clear showing of congressional intent in this regard, since 1962 only 2 of the 16 petitions filed under this statute have resulted in relief for the affected industries, and both of those involved imports of petroleum products. Most recently, President Reagan declined to act on the basis of the machine tool industry's section 232 petition. Instead, he elected to seek a program of restraints by major foreign machine tool producers. This is only the latest example of the failure to recognize this important statute.

The amendment I offer today is designed to promote adequate relief when an industry vital to national security is threatened by imports. It is a modified form of my National Security Trade Act which I introduced in July of last year. There has been no hearing on that legislation since that time. This is only a portion of that act. I believe the amendment has broad support. I thank Senator ROTH, in particular, for his help in improving this legislation.

Let me describe what this amendment does.

First, the amendment establishes a time certain for Presidential action on any petition. Within 90 days of the time the Secretary of Commerce—and the Secretary of Defense—report their determination to the President, he must act, or state why he has refused to act on a matter that could impact upon the national security. Under present law, there is no time limit. We have seen petitions by the ferroalloys industry and the machine tools industry drag on months and months without resolution. American companies deserve the certainty of a response—and we all need to know whether the national security is threatened as a result of imports. Once an industry is gone, it is too late.

Similarly, the time which the Secretary of Commerce and the Secretary of Defense have to make such a determination is reduced to 6 months. I do not believe it is unreasonable to require that a matter which may involve national security be decided within 6 months. Again, time is of the essence.

Second, the amendment enlarges the role of the Secretary of Defense. He cannot supplant the role of the Secretary of Commerce—nor should he. The Commerce Department has much of the economic data on American industries and the scope of foreign imports. But this is not a conventional trade question. The language of the statute makes clear that the threat of injury to national security must be assessed after weighing many factors—many of them within the expertise of the Department of Defense. For that reason, this legislation calls upon the Secretary of Defense to make a separate defense needs assessment within 3 months of the time a petition is initiated, and that this report be included in the Commerce Department's report to the President. Moreover, the amendment requires a separate statement of concurrence or dissent from the Secretary of Defense—the chief Cabinet officer charged with responsibility for national security determinations.

Again, nothing in this amendment should be understood as undercutting the Commerce Department. The statute as it stands gives the responsibility to the Commerce Department for good reason. But I believe we need to formalize and make explicit the Defense Department's responsibility in making this national security determination. The Secretary of Defense knows the needs of the defense industrial base, and his Department should have an explicit role in making a decision on the impact of imports.

Finally, this amendment increases the visibility of the entire section 232 process the results of the report of the Secretary of Commerce, as well as the President's final determination, are to be published in the Federal Register—excluding, of course, any information that is classified or deemed business confidential. This increases the visibility of the entire process. The petitioning parties, the Congress, and the public at large deserve to know the basis on which such decisions are made. The present law has become a dead letter and the petitioners—the ferroalloys industry and the machine tool builders included—have lost faith in the operation of the law. If the data are not restricted for a sufficient reason, petitioners should know why a decision has been made.

Does this amendment open a broad new avenue of trade relief? It does not. However, it does create a realistic avenue of relief when vital defense sectors of the economy are threatened by imports. It breathes life into a moribund statute and supports the original intent of Congress: That national security be understood to encompass economic security for critical sectors of our industrial base.

Which industries can expect relief under this legislation? Surely industries such as the ferroalloy producers should have reason for hope. In addition, crucial high technology sectors, such as the semiconductor manufacturers, should consider how this legislation applies to their situations. Emerging technologies such as fiber optics and ceramics may be eligible.

We need to get beyond the idea that national security is solely a function of how many troops and weapons we can field. The ability to sustain our defense production base and support our military in time of crisis is an important measure of our national security—and of our strength as a nation. I am convinced that this legislation will make an important contribution to safeguarding our national security base.

I would point out to my colleagues that article XXI of the General Agreement on Tariffs and Trade [GATT] specifically allows a government to take action necessary for the protection of its essential security interests.

Nothing in this amendment abridges the authority of the President. Nothing here requires the President to do anything other than make a timely determination when this country's national security is in question. But it provides an important expression of Congressional confidence in a statute that should be the baseline of our trade policy. Whether Senators are devoted to a purist's view of free trade or hardened by the trade crisis, I hope they will support this important amendment enhancing our national security interests.

Now, Mr. President, in short let me say this, that under the present law the Commerce Department has 1 year to make determinations and to submit recommendations to the President under section 232 of the Trade Extension Act of 1962. The legislation I am introducing would compress that time into 6 months rather than 1 year.

Under the present law, the industry petition which says that the industry is being injured by imports and that injury threatens to impair the national security is considered by the Commerce Department for a year and then the Commerce Department submits its recommendation to the President. There is no time limit on the President, no time requirement in which he has to make a determination and take such action as is necessary to adjust the imports so that they no longer threaten to impair national security. He may take 6 months; he may take a year; he may take 18 months; he may take 2 years or longer. Under this amendment, he would have 90 days in which to say yes or to say no. And if he says no, then he should so state in the Federal Register, and give his reasons for that decision.

Under this amendment, not only would the Commerce Department have a decision to make but within that 6-month period the Secretary of Defense would have 3 months in which to make recommendations.

The Department of Defense report would go along as a part of the Department of Commerce report to the President. Then the President would have all of this information on which to make a judgment. He would have the Department of Commerce recommendations, the Department of Defense recommendations, and a statement from the Defense Department saying whether or not they concur, whether or not they dissent. The President then would have 90 days in which to make his decision, and if his decision is negative, as I have stated, he must say so in the Federal Register and the Federal Register then would lay it out, as to what the reasons are for the industry petition's rejection.

□ 1930

Not only would the petitioners finally understand, not after waiting months and years, as was the case with ferroalloys, but they would understand the disposition of their case within 6 months plus 90 days—they would understand by reading the Federal Register—just what the reasons were for the turndown. The public would know and Congress would know. If Congress feels then that some action should be taken then to amend our trade laws dealing with national security, Congress could act.

For the present time, under the circumstances, we have seen these things go on and on and on. We have seen the ferroalloys industry, for example, wither on the vine. It is a very important industry. It is not a labor-intensive industry. There are not more than 3,600 employees in the United States in this industry, not more than 450 in West Virginia.

We cannot have airplane engines, we cannot have medical stainless steel instruments, we cannot have jet engines, we cannot have missiles, we cannot have tanks and guns and submarines if we don't have the ferroalloys. We cannot have the girders to build bridges.

The ferroalloys are vital, and at the present time the major supplier of some of these ores and ferroalloys is South Africa. Of course, we can always fall back on the second major supplier, the Soviet Union. Think of that.

Here we are with serious threats to vital industries that are important to the national security of this country; and unless we do something to put teeth into this law and speed up the process, we are going to see industry after industry perish in this country, industries that are vital to the national security.

This amendment does not make any changes in the fundamental policy of this country concerning trade in general. I am only talking about section 232, which deals with national security.

I hope the Senate will be willing to vote on this amendment quickly. I hope there will not be a tabling motion. I have nothing more to say on the amendment. I have made my case, and I rest it with the Senate.

Mr. PACKWOOD. Mr. President, I hope the Senator from West Virginia will withdraw this amendment, and I will indicate why.

First, on the argument of national security, we can have lots of debates about this administration, but I do not think anyone can accuse it of being insensitive in their minds to what they think the national security is. They are opposed to this amendment. But that is not why I oppose it.

I oppose the amendment because it has some significant trading complications, and the Senator from West Virginia referred to those trading complications. I think it is basically a trade amendment.

I have misgivings about giving the Defense Department any further jurisdiction over whether or not something involving trade relates to the national security. We have enough difficulty now on export licenses for many of our companies that are selling things that anybody can buy in the world, but our companies have difficulty selling them because of export trade licenses. That is a trade argument.

My real argument is this: The Finance Committee has now had six or seven hearings on the subject of trade. It is my hope to mark up a trade bill in September, if there is a hope of getting one, and I do not eliminate the possibility of the hope of getting one. I have to be very realistic. Clearly, the administration does not like the House-passed trade bill; and if the Senate were to pass a bill like that, it would be vetoed, and I think the veto would be sustained. But I do have some hope that if Senators can agree upon a trade bill, there might be a possibility of negotiating with the House and getting a bill the administration would accept. I think the administration is willing to give some in this area—not as much as some would like, but some.

Whether or not we get a trade bill really depends upon whether all the parties—House, Senate, and the President—can somehow coalesce their differences to a sufficient mass to get together on a bill. If not, there will not be one. It is still my hope to mark one up.

We have had six or seven hearings. We had one set for this week on section 232, the section that the Senator from West Virginia is talking about.

Often in this body we have seen the situation where, in order to forestall a vote, a committee chairman will say, "I promise you a hearing."

This hearing was set and was postponed from this week until next Wednesday at the request of one of the senior Democrats on the Finance Committee who wants to bring some witnesses. At this request, I postponed it until this Wednesday. There is no harm in that, because there was no intention on my part to start a markup on the bill until after Labor Day.

I hope the Senator from West Virginia would be willing to withdraw this amendment until we finish our hearing on Wednesday and until I have at least an attempt to try to mark up the trade bill. I do not want to try to filibuster; it is not my nature. But if this cannot be withdrawn, I will have to discuss it at some length tonight. I hope that, in a spirit of comity, it is understood that the Finance Committee is not delaying this. We had hearings scheduled and had to change it for a 1-week delay at the request of a senior Democrat.

I hope the Senator can withdraw this amendment and give us a chance to finish our work.

Mr. BAUCUS. Mr. President, this puts us in a dilemma. This is a good amendment. This amendment is almost identical to the provision in the Finance Committee trade bill. It is a bipartisan trade bill. Republicans and Democrats all agree on this trade bill.

I am confident that when we do have a markup in the Finance Committee, we will report out this provision. There is very little doubt in my mind about that, and I doubt that there is much doubt in the minds of the members of the Finance Committee about that. So it is a good amendment. It is bipartisan. It is agreed to.

The Senator from Virginia offered virtually the same amendment some time ago and has strong support from others not on the Finance Committee. The question is, what do we do here about this? It is a good amendment.

It is a dilemma because there is no guarantee, unfortunately, that we are going to have a trade bill in this Congress. Many of us want to see a trade bill. I do not want a protectionist bill or a free trade bill. I think most of us in this body want a good trade bill. There is no guarantee that we are going to have a good trade bill. In fact, I think it is unlikely that we are going to have a good trade bill unless the chairman of the committee, the majority leader, or others can guarantee that we will. I know they cannot make those guarantees now. I wish they would.

So we are faced with a very good amendment. The amendment only asks that the time period within which these decisions are made by the Department of Commerce and the President are speeded up a little. A year for the Department to decide, plus an indefinite period for the President to make up his mind, is too long. The amendment basically tightens that up. That is all it does. I think it is a very good amendment.

So I suggest that even though this is somewhat in the nature of a trade bill, it is still very closely related to the Defense Department authorization bill. After all, we are talking about national security here. This is not an amendment to amend section 301 or section 201. That is not what this is. It is an amendment directly related to our national security.

Mr. BAUCUS. Mr. President, this puts us in a dilemma. This is a good amendment. This amendment is almost identical to the provision in the Finance Committee bill. It is a bipartisan trade bill. Republicans and Democrats all agree on this trade bill.

I am confident that when we do have a markup in the Finance Committee, we will report out this provision. There is very little doubt in my mind about that, and I doubt that there is much doubt in the minds of the members of the Finance Committee about that. So it is a good amendment. It is bipartisan. It is agreed to.

The Senator from West Virginia offered virtually the same amendment some time ago and had strong support from others not on the Finance Committee. The question is, what do we do about this? It is a good amendment.

It is a dilemma because there is no guarantee, unfortunately, that we are going to have a trade bill in this Congress. Many of us want to see a trade bill. I do not want a protectionist bill or a free trade bill. I think most of us in this body want a good trade bill. There is no guarantee that we are going to have a good trade bill. In fact, I think it is unlikely that we are going to have a good trade bill unless the chairman of the committee, the majority leader, or others can guarantee that we will. I know they cannot make those guarantees now. I wish they would.

So we are faced with a very good amendment. The amendment only asks that the time period within which these decisions are made by the Department of Commerce and the President are speeded up a little. A year for the Department to decide, plus an indefinite period for the President to make up his mind, is too long. The amendment basically tightens that up. That is all it does. I think it is a very good amendment.

So I suggest that even though this is somewhat in the nature of a trade bill, it is still very closely related to the Defense Department authorization bill. After all, we are talking about national security here. This is not an amendment to amend section 301 or section 201. That is not what this is. It is an amendment directly related to our national security.

□ 1940

So like all dilemmas there is no easy solution, there is no definite solution, I suggest, because it was a good amendment, because there is very strong agreement in this body to it and because there is no guarantee we are going to have a trade bill this year and because it is in the interest of our national security that we adopt the amendment and get on with it.

Mr. President, I yield the floor.

Mr. DANFORTH. Mr. President, first, let me say that the Democratic leader has pointed out a very real problem in our trade laws. These cases brought under section 232 of the Trade Act can go on forever.

The machine tool care is a case in point. That case was filed in March 1983 and finally wrapped up in May 1986. It went on for 3 years and 2 months.

Clearly, the time should be shortened, and to that end at least a couple of bills have been introduced and, as the chairman of the Finance Committee pointed out, there is going to be a hearing on Wednesday. There are a couple of different proposals.

Senator BYRD has outlined his view of how the precise procedure for 232 cases should be written.

I point out that one of the differences between his bill and the bill that was introduced by Senator GRASSLEY—both would provide for a 90-day period of time for the President to make up his mind—but Senator GRASSLEY's bill provides that after the 90 days, if the President does not act, then the recommendation of the Secretary of Commerce is put into place automatically. That automatic institution of the Secretary's recommendation is not in the bill of Senator BYRD.

Which is the best of those two ideas, I am not sure. That is what hearings are all about.

I know that Senator PACKWOOD feels very strongly that the Finance Committee should act on a trade bill. We have had a very busy year this year, as everyone knows. But I have spoken with Senator PACKWOOD very frequently about the need for trade legislation.

I also know that the majority leader feels very strongly that the Senate should act on trade legislation. Whether we get the job done remains to be seen. We certainly hope so.

I can say that many, many discussions are going on. My hope would be that we could have a fast markup and fast floor action, not on the bill that would please everybody, or even anybody, but on a good positive approach to tightening up our trade laws but still passing a bill which would be signed by the President.

My hope would be that the process could go forward and that we in the Finance Committee could deal with this matter after hearings on Wednesday. I know that that is our intention.

No one in this Senate more respects the institution than the distinguished Democratic leader, and I know he realize more than any of us the appropriate role of the committee structure and the desirability of utilizing that structure to work out legislation.

There are times when a committee will not act, when a committee does not want to act, when a chairman does not want to act. In those instances it is appropriate to bring a matter to the floor. But when the Finance Committee sincerely wants to act, it is going to hold hearings, my hope would be that we in the Finance Committee would be given that opportunity which is just 4 days away.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, this amendment causes me some distress because I am terribly anxious to get on with a trade bill and we have been working on this. It is a bipartisan

measure. As has been stated, we have had several hearings in the Finance Committee and, as mentioned, we have one coming up this Wednesday on this very matter.

I personally have great concerns about tampering with the discretion of the President in the limitation placed upon him of 90 days. It reduces, it seems to me, his opportunity to negotiate a solution to some of these matters.

At the same time, I share the concerns. My State is a machine tool State, and we have been deeply involved in the case that has been mentioned here before under 232.

Nonetheless, I would hope this amendment would not be pressed because the entire trade situation is going to be reviewed in this comprehensive bill. I think it is the most substantial trade bill that we have considered certainly since I have been here and on the Finance Committee.

These hearings are extremely useful. They are not a pro forma gesture. At the same time, we have not only heard from witnesses from both sides and a multitude of issues but it gives us a chance as a committee to decide what we believe is best in trying to achieve the goals.

So, therefore, I would hope we would be given a chance in this.

As has been mentioned, everyone on the Finance Committee wants to have a trade bill. I do not think there is anybody there who says no, let us do nothing, everything is fine. That is certainly not the case.

I would hope that we could put together a bill that considers all the aspects following the hearings, and I believe it will meet the satisfaction of Members of both sides.

Mr. BYRD. Mr. President, I am loathe to press action on this amendment at this time. I know that Senators are tired. I know that Senators have reservations on planes and they have other commitments. I do not like to be put in a position here of delaying the Senate and inconveniencing my colleagues.

The problem here, however, Mr. President, and we all know it, is that no trade legislation is going to pass this Congress and be put on the President's desk this year. And even if he were presented with such a bill, he would not sign it. We all know that. We know it. We only have 5 more days, or 6, before recess. Those days are going to be completely filled with other matters. We have 4 weeks when we come back from recess before we go back for the October adjournment sine die if that occurs, and the Finance Committee is very busy in dealing with the tax reform legislation.

We just know that for the Finance Committee and the Ways and Means Committee to get together on legislation passed by both Houses dealing with comprehensive trade policies of this country—we know that is not going to be done this year.

So what do we do then? Do we wait? When will it happen next year? We come in as a new Congress and have to start the whole process all over again. The committees have hearings all over again. This thing will go on and on and on.

We have talked until we are blue in the face.

I have talked to the President down in the Oval Office about ferroalloys. Other Senators have talked about textiles and shoes. Others have talked about steel.

These pleas just continue to fall on deaf ears. The State Department does not hear us. This administration does not hear us. Our industries are going overseas. Our manufacturing base continues to be eroded and, if we get into another war, we are going to have to have the smokestack industries, we are going to have to have industries that produce the goods and weapons of war, but we won't have them.

And if I thought for one moment that a piece of trade legislation would be reported out before this Congress goes out, acted upon, goes to conference, comes back, is put on the President's desk and he would sign it, I would say yes, that is the committee process. That is the legislative process. That is the way we ought to go.

But we have tried and at every point of the way we are promised this by the administration, we are promised that by the administration. And I am not saying it is all just this administration. We have seen this happen before. But this is a Department of Defense authorization bill. This bill has to do with our national security.

Senator NUNN said a few days ago it is time that we take up a piece of legislation that deals with national security in this country, that is in the interest of this country. That is what this bill is all about. And that is what this amendment is all about.

Now we have an amendment here that is in the security interest of this country. We have an amendment that is in the interest of our national security and it is being offered to an appropriate vehicle and that, too, is a part of the legislative process. We all know that.

I hesitate to appear to be bullheaded and stubborn and say, well, I want to go to a vote, but I am just faced with this dilemma. We are not going to get this any other way. We are not going to get it if we wait on the committee to report out legislation and expect that legislation to make the President's desk. We are not going to do it, and this is just a small part, as I say. This deals with the national security side, section 232, and our ferroalloy industries, our machine tools industries, the other industries that have a role in the national security because they create products that are important to the national defense and should not have to petition and wait and wait and wait and wither and just become anemic while awaiting a decision that never comes. And when it does come, it is too late and it is against them.

That is the dilemma I am in. I do not think I have ever, in 28 years here, offered an amendment and withdrawn it. The managers of the DOD bill have labored and worked hard. Senators have waited here. They are waiting now. I know they wish I would sit down.

But I am in a dilemma. I think it is in the best interest of this country that this Senate vote on this tonight. If the Senator wants to move to table the amendment, let us have a vote one way or the other.

□ 1950

Mr. LONG. Will the Senator yield?

Mr. BYRD. Yes.

Mr. LONG. Mr. President, I hope the Senator will not ask that the amendment be tabled before I can say a word or two.

Mr. BYRD. Yes, I thank the Senator.

Mr. PACKWOOD. Mr. President, I am sorry that we are going to have to go to a vote on this.

The Senator from West Virginia has talked about national security. Mr. President, there is no case, no case pending under section 232 today anyplace in this whole Government; not in the Commerce Department. Nothing has been filed.

So when the Senator from West Virginia talks about the need for urgency and there may or not be a trade bill, there is nothing even pending involving the national security now or that anyone knows about under this section that is going to make any difference whether or not this amendment passes.

So all I am asking is that the Senator extend the decency to the committee which has jurisdiction, which has a hearing pending and which hopes to have a trade bill, to give us to chance to work our will on this.

But I can assure you that the national security will not be jeopardized if this amendment does not pass. There is nothing pending anyplace in the Government to which this amendment, if it is passed, if it is in the bill and becomes law, will have any effect in the foreseeable future.

Mr. BYRD. Mr. President, I understand the President has deferred a formal decision in a section 232 case. The final decision in the machine tool case has been deferred.

I will tell you, the distinguished Senator says there is no case pending. This process has become so rotten that the industries in this country

have thrown up their hands. What is the use? Their petitions are going to be turned down, and their petitions are going to be hanging there month after month after month. And the months go by and the industries do not hear a thing. And, after months, or years, in some cases, they are turned down. That is why the whole process has become so devastating to the industries in this country that produce goods that are vital to the national security. No wonder, there is no use to petition.

Mr. LONG. Mr. President, ordinarily, I would support the distinguished chairman of the Finance Committee in his request that this matter be deferred until the Finance Committee can act on it.

But, Mr. President, in this case, I believe that we could vote on the amendment, and I personally will vote for it. Let me explain my reasons.

As one who once served on the Armed Services Committee—where I served and enjoyed it very much; it has always been a very fine committee—I would point out the reason the Finance Committee has jurisdiction over the subject is because the Finance Committee has jurisdiction over revenue. And trade, traditionally, was a matter of raising revenue. It had to do with tariffs, it had to do with quotas, and, so, in the beginning, that was the principal way we financed our Government, not by an income tax. It was against the Constitution back at that time. You financed the Government plainly by a tax on imports or a tariff. That is why the jurisdiction here is in the Finance Committee.

But, Mr. President, there is no revenue involved in this amendment. All we are talking about is a determination that has to do with national defense. In other words, under law, the President is required to make a decision as to whether the imports are in the process of destroying an industry and whether that, in turn, is going to imperil our national defense.

Now, the problem which the amendment addresses itself is that the President has forever to make decisions. He can take from now until as long as the good Lord leaves him here on this planet, if he is still President. And the next President can take his entire term, and the next President can take his entire term.

So the President can just sit there with it. He does not even have to look at it; just do not bother.

And, as the distinguished Democratic leader pointed out, that is why it is so frustrating and that people do not even file their petition. What is the point? There is no hope. Nothing is going to happen. It will just sit there forever. If you get a decision at all, it might be unfavorable. But, in any event, there will be no decision.

All that is requested here is that the President make a decision not in 3 years—please understand, he could take forever. He does not have to make a decision at all. He does not have to ever make the decision even if the Secretary of Defense and the Secretary of Commerce advises it. So it is simply to require the President to make up his mind at some point, and I believe in this it would be 90 days.

In view of the fact, Mr. President, that the amendment really relates to a matter not of trade—because the trade part of our jurisdiction is a revenue aspect. The problem here is not the money you make by trading with somebody, the problem is whether you can afford to sacrifice the industry. Under those circumstances, Mr. President, I would like to see the Senate make a decision. Are we going to make a decision if we do not vote on the amendment? Well, only the good Lord knows. It might happen and again it might not happen.

As far as this Senator is concerned, I will not be here next year or the year after that. I would like to see the President decide a matter of this sort rather than simply delay it forever. I have no doubt if we get a bill out of the Finance Committee we will recommend something of this sort that has been suggested.

But I see nothing wrong, Mr. President, with the amendment being on a bill out of the Armed Services Committee, because the decision that is sought is really a decision relating to national defense.

SEVERAL SENATORS. Vote.

The PRESIDING OFFICER. Is there further debate? If not, the question is on the amendment of the Senator from——

Mr. PACKWOOD. Mr. President, I saw the Senator from New Hampshire rise. Are you going to talk on this amendment?

Mr. HUMPHREY. Not on this amendment. Might I make a suggestion? I assume there is going to be a rollcall vote on final passage. Perhaps we could stack the votes.

Mr. PACKWOOD. It is my intention to move to table this amendment. I do not want to cut anybody off who wants to debate it.

Mr. NUNN. Mr. President, the Senator from New Hamsphire has a reasonable suggestion, because we can handle the other amendments, I believe, on this bill within the next 5 minutes. I believe we have the amendment worked out sponsored by the Senator from Michigan and the Senator from Wisconsin. We have technical amendments.

Mr. PACKWOOD. I do not want to mislead you. I do not want to put this amendment last. I want to move to table to see what happens.

Mr. NUNN. What I am suggesting is that we complete these other matters and then perhaps stack the rollcalls.

Mr. PACKWOOD. No, I think I would object to that.

The PRESIDING OFFICER. Is there further debate on this amendment?

Mr. PACKWOOD. Mr. President, I am about to move to table the amendment. I am not sure what the Senator from New Hampshire wishes to do.

Mr. HUMPHREY. Mr. President, if the Senator will yield, the Senator could probably secure a unanimous-consent agreement making it contingent upon the tabling motion succeeding, or whatever you want to do.

Mr. PACKWOOD. Mr. President, I think I probably should move to table the amendment now.

If the Senator is asking for 5 minutes to speak on the bill, I have no objection. I just want to move to table this amendment.

Mr. HUMPHREY. That is what I was seeking to do.

Mr. PACKWOOD. I will just yield the floor for the moment and let the Senator from New Hampshire speak.

Mr. HUMPHREY. Mr. President, I thank the Senator for his courtesy. I will only be about 5 minutes. I know Senators are anxious, including this Senator, to get out. But I do feel it is important to take this opportunity to sound a warning—sound a warning—about—may we have order, Mr. President?

The PRESIDING OFFICER. The Senate is in order.

Mr. HUMPHREY. May we have order, Mr. President?

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I want to take this occasion to sound a warning of the impending and dangerous decline in the state of our national defense preparedness. I do make that statement loudly and I make it as chairman of the Subcommittee on Preparedness of the Senate Armed Services Committee.

Mr. President, in the early 1980's we substantially increased defense spending across the board. Not surprisingly, most of the standard measurements of preparedness began to rise.

But beginning in 1984, substantial cuts were made in the levels of funding anticipated by the preceding 5-year defense plans. And where were the cuts made? Largely in those accounts that are "outlay-rich," as we say. In the defense bill, the most outlay rich account is the operations and maintenance account. O&M has been cut deeply from levels anticipated in the 5-year defense plans. Cuts in funds associated with force structure and procurement of major weapons systems have been cut also, but the

O&M account has been cut disproportionately as measured against needs.

So what has happened? What does happen when you keep increasing force structure, keep adding major weapons, but cut back on operations and maintenance funds? You begin to cut back on training. You begin to defer maintenance on ships, aircraft and land vehicles. You begin to defer maintenance on real property—on living and working quarters, on runways and so on.

The backlogs of deferred maintenance on both equipment and real property begin to grow. You cut down on the purchase of spare parts and ammunition. That's what happens. And that is what is happening.

The irony is, we have been through this before. Remember how things were in the late 1970's? We had ships that could not sail. We literally had ships tied up for lack of trained crew and lack of spare parts. We had aircraft that could not fly. We literally had some of the most modern aircraft in the world sitting useless on the ramp. If you looked up their tailpipes you saw there were no engines. Aircraft were being canibalized for lack of spare parts. The Chief of Staff of the Army testified before the Congress that he commanded a hollow Army. Our military services had become slumlords, so run down were the living and working conditions of our servicemen and women. I know my colleagues remember that sorry state of affairs. It was not so long ago, and it was not the fault of any one administration.

As chairman of the Senate Subcommittee on Preparedness, I want my colleagues to know we are headed right back to that sorry situation. We are heading right back toward a hollow force structure. We are headed right back toward the situation of dangerous defense unpreparedness in which we found ourselves not so long ago and from which we extricated ourselves at such great expense. And we are headed back there for the same reason we got into that mess in those days, we are not providing operations and maintenance funds proportionate to the size of the force.

Let me review a few cardinal figures. The President requested $93 billion for operations and maintenance and readiness-related accounts for fiscal year 1987. The bill before us recommends $87.3 billion. This is a $5.7 billion cut. Now please listen carefully to this: The level of spending we are recommending in this bill for operations and maintenance and other readiness accounts for which the Preparedness Subcommittee is responsible is $800 million less than this year's appropriations. It is less. The kind of spending is literally going down in actual terms, and in real dollars. We are going to be spending less in fiscal year 1987 on the preparedness accounts than we are spending in fiscal year 1986.

Let me repeat that for emphasis. In fiscal year 1987 there will be less money in the operations and maintenance accounts and in the other readiness accounts for which the Preparedness Subcommittee is responsible than in fiscal year 1986. Have we less equipment and facilities to maintain? No. Has the force structure been cut? No, the number has grown, because these weapons ordered years ago are just now being delivered. Has inflation been eliminated? No; it is reduced but it is still there.

So in the face of increased force structure and continuing inflation, we are cutting back the preparedness accounts. The result will be another disaster like that of the 1970's.

O&M funding has been cut below last year's level in 8 of 15 service accounts. You should know, for instance, that the Air Force will have less O&M money next year. So will the Navy. So will the Air Force Reserve. So will the Army Reserve. So will the Navy Reserve. So will the Army National Guard.

Mr. PRYOR. How much less did the Senator say the Navy will have next year?

Mr. HUMPHREY. I am sorry. I do not have that figure with me. On overall, for DOD it is $800 million. But the point is it is not growing commensurate with the growing force structure.

And so will service account. All of this notwithstanding next year's larger force structure requires higher outlays in O&M. The cuts will translate into reduced flying hours, steaming days, and training days. Depot maintenance backlogs will grow to over $1 billion. Ship overhauls will be deferred. Real property maintenance backlogs will grow to over $3.2 billion.

Ammunition problems are alarming. Current shortages in the production base and ammo procurement are already affecting readiness and sustainability. As an example, the Navy is back to cross-decking ammunition again. They do not have enough to fully stock all operational ships. Hearing testimony reveals we have a $65 billion shortfall in the production base. Production facilities are in bad shape. There are shortfalls in the days of supply for the overwhelming majority of ammo requirements. Further, I use this occasion to notify and warn my colleagues days of supply of ammunition is going to begin declining again, starting around 1990.

Further, the economic assumptions in the O&M accounts leave little margin for error or adverse events. For example, the authorization for fuel assumes the price of oil will remain at $12 per barrel crude during the remainder of fiscal year 1986 and in fiscal year 1987. My colleagues know that OPEC has recently agreed to cut production and raise prices—as high as $18 to $22 per barrel.

Where will that shortfall be made up in the event it only goes to $13? It is likely to go that high and probably higher. You will know. It will be made up by forcing the services to cut back further on spending, further on maintenance, further on spare parts and further on ammunition. It is quite likely indeed that the services are going to have to give more in the way of funding cuts than is now apparent.

I hope we have learned the lessons of the past about short-shrifting the readiness accounts. Perhaps not. In any event, I feel it is my duty to notify my colleagues about very worrisome trends. I hope the conferees on the bill will take this information into account.

I hope the Appropriations Committee when they begin to do their work will take it into account, and the Members will take it into account when the appropriations bills get on the floor, and goes to conference.

I hope all Members will bear that in mind this year and in the coming years.

I thank the Chair.

Mr. GLENN. Will the Senator yield?

Mr. HUMPHREY. I will.

Mr. GLENN. I think the Senator is doing a good job in pointing out some of these deficiencies. I truly do. One thing we have to be fervent on is keeping up O&M and accounts. We had the sorry spectacle in the Indian Ocean with one carrier going over to relieve another, and they did not have enough missiles to take along to put on the airplanes. They had to cross deck them from one deck to the other.

We are in the sorry state right now of spending many, many billions of dollars for attack submarines, and we are proud of those forces. What do we do with what they are going to shoot? It is classified as to how many torpedo loads we have. I can tell you this. It is well under two torpedo loads. That is not classified. The actual figure is.

If we get into a real honest-to-goodness shooting war what the Senator is talking about is right. We are going to be out there shooting water slugs, and scaring people with bubbles.

We had better be watching out for these O&M accounts. It does not make any sense to spend a lot of money, to spend on big weapons systems for the carriers for the weapons system like submarines carrying torpedoes and not buy the weapons to put on it. It is preposterous.

So I think what the Senator is pointing out is really something we have to look at. We should be working on it next year. I think the Senator is doing a service by pointing it out.

Mr. HUMPHREY. Mr. President, I thank the Senator for his contribution.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I will be very brief.

The discussion I initiated here by the Senator from New Hampshire that the Senator from Ohio said is one that should have had a lot more attention in this body in my opinion. A few months ago I introduced a bill to take $5.2 billion away from some of the gold-plated weapons systems and programs and put it in things such as spare parts, ammunition, howitzers, and so on. The committee, I think, did its best to address that to some extent. I would like to hear one of the floor managers talk about that. I think we made more progress this year in addressing the shortage of ammunition supplies than we have made in some time. I personally do not think it was enough. The committee did, I think, probably more this year than they have done in years past. I note that the committee actually has provided more money for Army ammunition than the administration requested, and I applaud them for that.

But I never will forget how I got interested in this issue. I got interested in it incidentally from my experience in the Marine Corps. We never seemed to have enough of any of the mundane items. We always had plenty of the big ticket items, but we never had the things we really needed to fight the war with.

When I came to the Senate, the second year I was here I went on the Armed Services Committee for a year. I began to talk to some of the admirals and generals, and visit some of the Navy and Army bases around. I never will forget going down to Virginia to talk to Admiral Kidd, who at that time was commander of all of our Atlantic naval forces. And I said, "Admiral, if you had your choice between a nice, new, fully complemented *Nimitz* class carrier and a huge warehouse full of spare parts, which would you choose?"

□ 2010

He said, "Senator, I will take the warehouse full of spare parts in a bird dog minute."

Subsequent to that, I came back and began to discuss that issue with then Defense Secretary Harold Brown.

Secretary Brown said, "You know, Congress talks a good game. They always talk about conventional warfare and readiness items. But when the voting begins, it is always for the fancy, gold-plated big-ticket items, never those mundane things that you have to have to fight the kind of war we are most likely to have to fight."

I am not on this committee so I do not get to have much input. I do serve on the Appropriations Committee, it was said that perhaps some of this could be addressed in the Appropriations Committee.

I would be very pleased to hear from the Senator from Georgia on what the committee did in addressing particularly our ammunition shortfall in Europe.

Mr. NUNN. I will say to the Senator from Arkansas that this year the committee decided before markup we were going to give priority to ammunition, O&M, steaming hours, flying hours, and those items. We did cut the number of production lines in terms of the per unit production of existing weapons systems.

What we do not do and what the Pentagon does not do is cut out weapons systems. So you have a real dilemma. When you trade off, you cut the production line of weapons systems down, and you make the production line less efficient. Each units costs more because you are not absorbing the overhead as effectively. In fact, that is the largest area, in my opinion, of waste of dollars we have.

The problem is we have too many weapons systems, to many production lines to have the money allocated in an effective and efficient way.

I say to the Senator from New Hampshire, you have to make a great presentation, and I agree with that. He has made an accurate presentation.

We spent the first day on this bill, the Senator from Arizona and myself, talking about the whole funding problem, but the funding problem is going to get worse every year for the next 4 years. No doubt O&M is going to suffer and ammunition will suffer. The only way we are going to avoid having some very serious erosion even worse in this year than the years past, is that we are going to have to have some weapons systems that we all would like to fund canceled, not cut back in numbers but canceled. We are going to have to slow down new starts.

I do not contend this bill has come to grips with all that. It has to start in the Department of Defense.

Any Senator who has tried to participate in killing a weapons system on Capitol Hill I think would understand that. It is just hard to do once you start.

In the operation and maintenance account, they do not have the protection that weapons systems do nor the lobbyists that weapons systems do.

I would say we have done a great deal in this bill to avoid further damage. We have not done nearly as much as I would have hoped for.

It starts not in the Congress but what Secretary Brown said is accurate in terms of the overall picture. I think in the last 3 to 4 years Congress has done a better job in protecting O&M and protecting the various components of readiness than we have for the last decade.

I think the executive branch is where it starts. The executive branch theory is, "Do not worry about the O&M accounts and ammunition as much as you worry about platforms because if you get in a war you are going to be able to get the funding for those items very quickly but platforms take a longer time to build."

When I say executive branch, I am not talking about this administration but I am talking about the Pentagon and any administration. That is the theory. This one has been perhaps a little bit more that way.

The individual we read about, Lawrence Core, who was recently put under tremendous pressure because of some frank statements he made, wrote a number of articles on readiness and the fact that readiness was not a priority in this administration and in the Pentagon. That caused some of his problems over there.

The Senator from New Hampshire makes a good point but I think you have to put what he says in the overall framework. The overall framework is that we have a terrible budget problem. We have a defense budget with a 5-year plan that they are working on over in the Defense Department right now, which is about $325 billion above the 5-year plan, or the 3-year plan projected out to 5 years, that the congressional budget resolution contains.

There is always a difference between Congress and the administration on that, but this is the largest gap, I think, in history. The next Secretary of Defense, even this Secretary of Defense, will have the hardest job in peacetime anyone has ever had. The Department of Defense will have to go back to the drawing boards with their 5-year plan. Congress will have to come to grips with the budget. We have not done that yet. We all know that. This year we are putting Band-Aids on a major wound.

In the Department of Defense, when we get through with the conference, the Senator from Arizona and I have pledged to do everything we can to meet the budget authority total. We believe we can do that. But that budget authority total does not meet the outlay total.

The Senator from Alaska, in the Appropriations Committee, will have to do that in the final analysis.

The administration has not decided whether they are going to ask for the activation of the contingency fund, the fund put in the resolution which is a request for additional funds if they have to be utilized either for national security or domestic purposes, but they also have to identify offsetting cuts or tax increases.

I urged the White House, the President, to come to an early decision on that. We need it before we finish the

conference. They have not decided yet.

To add to my frustration, we have received three letters this week—after hearing complaints about the budget squeeze, knowing the O&M problems, the ammunition problems, knowing we have to cut production lines—we have received three letters this week from the administration endorsing add-ons that Members of this Senate decided to put on. We have added nearly a billion dollars in non-defense purposes in this bill.

On the Coast Guard, I favor that. We have added $500 million for NASA on a rollcall vote, though I opposed it. We have added other money into this bill endorsed by Defense, while they cry that they do not have enough in their own programs.

I am perplexed about who is tending shop and minding the budget problems of the country in the Department of Defense. We have a long way to go.

The Senator from New Mexico and the Senator from Florida recognize this better than anybody in this body.

The Senator from New Hampshire is correct in what he is saying, but it goes further than the Defense Department. It goes to the budget.

Mr. BUMPERS. I want to make two observations: No. 1, when I introduced my bill earlier this year to take money away from exotic systems and put it into mundane items, I made a statement saying that the reason for this is that there is no lobby for spare parts or ammunition.

After I made that statement I found out that there is. I did have a few people come along and say, "Senator, there really is a lobby. We just do not have very much force."

The Senator from Georgia has put his finger right on one of the problems. That is we never kill a program.

I complimented Secretary Weinberger, and he is not one of my favorite Cabinet members. I complimented him because he had the courage to kill the Divad Weapon Program which Congress did not have the courage to kill. Everybody knew that weapons system. Two billion dollars into research for that thing and it never hit anything. I admire the Secretary for taking the bull by the horns and doing it.

I might also say that I think the AMRAAM missile has no potential unless it shapes up. I know the committee in the past has taken away some of its production money.

The amendment I wanted to offer, but did not, was to take more money from AMRAAM production and put it into readiness items, like missiles that the Navy used against Qadhafi, and ammunition and howitzers and spare parts for the Marines.

I yield the floor, Mr. President.

SEVERAL SENATORS. Vote! Vote!

Mr. DOMENICI. I just want to say to the Senate I do not think we need any more speeches. I would urge that they read Senator GOLDWATER's opening remarks of Tuesday and Senator NUNN's remarks. If we think we can maintain an adequate defense posture and cut the defense budget further, read the speeches.

If we think we can maintain an adequate defense, the type we are talking about here on the floor, and satisfy the concerns of informed people, read the speeches.

We are in for big trouble if we have to meet the budget resolution targets for the next 5 years if somebody does not come to their senses here and in the White House and decide that you cannot cut defense any more.

We have cut in excess of $180 billion in budget authority of the President's original 5-year request in 5 years.

That might not mean anything. They may have been too high. But if people think there is more and more blue sky in this budget, and that we are going to maintain the strong defense we have been talking about here, it is not going to happen.

□ 2020

You just ought to read the options because clearly, they are weapons reduction options and they are O&M personnel reduction options. The latter yields outlay savings "quick." The former yields outlay savings "slow." Since we are bent on outlays for deficit reduction, we are in one big bind and the sooner somebody in the White House and here decides to solve it with additional resources, the better off we are going to be.

We cannot find any more cuts here in the defense budget and nobody wants to cut the domestic programs. We seem to have reached bottom. Yet we wonder why the deficit does not go down.

Every penny we saved in defense this year over the projections of last year has been eaten up in increased costs for agriculture, bank failures, and revenue losses because we have not had sustained economic growth. How are we to make any headway? We get $20 billion out of defense, but we lose $25 billion on the other side. I do not believe we are going to keep on doing that and reduce the deficit. In fact, it is impossible.

I repeat, Mr. President: Read the options outlined by the managers of this bill and let us get together and fix it. They are not miracle men on armed services. There is no way to fit what everybody wants within the targets we have insisted upon. Even with the extra money the President can ask for in the contingency reserve, it will be awfully tight.

Mr. PACKWOOD. Mr. President, we are on the amendment of the Senator from West Virginia, which is not an operations and maintenance amendment. I do not want to put anybody off from talking on the amendment or the bill generally. I plan to move to lay it on the table if no one else wants to speak.

In that case, Mr. President, I move to lay the amendment of the Senator from West Virginia on the table and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from West Virginia.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maine [Mr. COHEN], the Senator from Oregon [Mr. HATFIELD], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Nevada [Mr. Laxalt], the Senator from Vermont [Mr. STAFFORD] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Missouri [Mr. Eagleton] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 50, nays 43—as follows:

[Rollcall Vote No. 206 Leg.]

YEAS—50

NOT VOTING—7

| | | |
|---|---|---|
| Bradley | Hatfield | Stafford |
| Cohen | Heinz | |
| Eagleton | Laxalt | |

So the motion to lay the amendment (No. 2680) on the table was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

□ 2040

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2681

Mr. KASTEN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. KASTEN], for himself, Mr. LEVIN, and Mr. PROXMIRE, proposes an amendment numbered 2681.

Mr. KASTEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, strike out lines 1 through 8, and insert the following new subsection:

(4) Funds may not be obligated or expended for the procurement of a lead minesweeper hunter ship or a partially outfitted hull of a minesweeper hunter ship from a foreign country until the Secretary of the Navy has certified to the Congress in writing (A) that purchase of up to two foreign built ships responds to an urgent national security requirement; (B) that no United States shipbuilder has demonstrated the capability, or that no shipbuilder can demonstrate the ability to acquire that capability to meet that requirement in a timely fashion.

Mr. KASTEN. Mr. President, I send this amendment to the desk on behalf of the Senator from Michigan [Mr. LEVIN] as well as the senior Senator from Wisconsin [Mr. PROXMIRE], and myself.

Our mine countermeasure capability in the United States is at a all-time low. Our available ships are over 20 years old.

Now we have many new ports beginning to be constructed under the strategic homeporting concept. The requirement for 32 ships under our current homeport situation will not be enough. And we do not even have 32 ships yet.

I agree with the committee that we need mine-hunting ships now. However, we must also support our own American shipbuilding industry. But times are difficult for them. We cannot and must not admit defeat and say that our shipbuilders are no longer competent to build ships with current technology.

Mr. President, we have made a change in this amendment which indicates that although funds may be obligated for the procurement of a lead minesweeper hunter ship or a partially outfitted hull of a minesweeper hunter ship from a foreign country, the Secretary of the Navy will also give strong consideration to our Nation's shipbuilders.

More particularly, the amendment points out that the urgent national security requirement would be responded to and that no U.S. shipbuilder has demonstrated the capability or—and this is the change—that no shipbuilder can demonstrate the ability to acquire that capability to meet that requirement in a timely fashion.

We must give our shipbuilders in the United States the opportunity to compete. The legislation in the bill was conveyed as being prescriptive instead of prohibitive. The prescription on the shipbuilders in the United States is running out. We support a strategic mobilization base. We support technology transfer.

Yet, efforts are made to preclude U.S. shipbuilders from competing for our own U.S. Navy ships.

I support the committee's concern for national security. I want the best ship we can get. I want the best competitor to win. However, we must have competitors. I am not trying to push the Navy to solely buy America. In all contracts I am not trying to give more preference to our NATO allies. I just want U.S. contractors to get a fair shake.

This amendment has been reviewed by the leadership on both sides. I want to thank the chairman and the Senator from Georgia for their help in working out a compromise on this issue. In the beginning we were seeking to strike the entire section on MSH's. In the interim a compromise has been worked out. We were also given answers that the design contract, that was negotiated, has licensing provisions in it so that any shipbuilder can acquire a production license and also train his workers. With this change in the language and the assurances we have received from the assistant Secretary of the Navy for shipbuilding I am confident that American shipbuilders have a better opportunity to compete.

Mr. NUNN. Mr. President, I think we can wrap up action on this amendment in a moment, with acceptance by both sides.

Mr. KASTEN. Mr. President, I yield to the Senator from Michigan.

Mr. LEVIN. Mr. President, this provision in the measure is a mistake, and we hope it will be corrected.

With this modification, it makes it clear that if a shipbuilder can demonstrate the ability to acquire a capability to build a ship in a timely fashion, then that U.S. shipbuilder will also be providing the minesweeper, instead of having this go abroad.

I congratulate the Senator from Wisconsin for this amendment. We have been given assurances by the Navy Department that the design contract that has been negotiated does have license provisions in it so that any shipbuilder can acquire a production license and train his workers.

With that assurance from the Navy and this change in the language, which is an improvement, I support the amendment.

Mr. NUNN. Mr. President, I recommend that the amendment be accepted.

Mr. GOLDWATER. I have nothing to say on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (No. 2681) was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EXON. Mr. President, I rise to speak in favor of the Defense Authorization Act for fiscal year 1987. This is not to say that I am pleased with every provision of this bill; that is impossible in a bill of this scope and size. Overall, however, under the leadership of Senators GOLDWATER and NUNN, the committee's effort, is as sound as it could be under the constraints we faced.

Defense spending is expensive. There is no way to escape this reality. No matter how difficult the economic times, no matter how large the deficit and the need to reduce it, large defense spending will remain a necessity. But this does not mean that the defense budget is isolated from the economic situation or immune to lower Federal spending. It does mean, however, that every single dollar spent on defense must be maximized. It means that the President, the Department of Defense, and the Congress are going to have to do a much better job of determining real defense priorities within realistic budget constraints. It means we have to change the way we do business in this town.

The President has refused to acknowledge that even our necessary defense modernization effort will have to be cut back in order to deal with our ruinous national debt. He also ruled out higher revenues to sustain growth in defense spending. The Defense Department also has been slow in assisting the Congress in identifying real priorities when it is clear that some reductions would have to be made.

The Congress is also suspect in not maximizing our defense dollars. While

highly critical of the Defense Department for not recognizing the present budget crunch, Members of the Congress are also scrambling about to make sure that the weapon built in their State or district is funded, even if there may be pressing military need for it. Not only are base closings still politically difficult, but new bases for the Navy's strategic homeporting plan are authorized in this bill. Given the size and changing nature of the Soviet Navy, a few additional ports to further disperse our fleet may be prudent. But one can only wonder at a plan that calls for not one or two new naval bases on the gulf coast but rather six entirely new ones in addition to increases at existing gulf Navy bases. Each of these new bases will be for only three or four ships! But that pork bait is too attractive for either the Defense Department not to use or the Congress not to bite. By going ahead with these politically attractive programs, real needs such as serious munitions shortfalls and maintenance backlogs remain shortfunded.

This tendency to place domestic political concerns ahead of overall national security interests is real waste in defense spending. While the $400 hammers and $600 washers we have heard so much about were largely the result of negligence and disinterest, the fact that, once again, the Congress has placed domestic political considerations ahead of legitimate, top priority national security concerns is evidence that we are not acting in total responsibility in this climate of budget constraints. That this bill contains over $250 million for items not even requested by the Defense Department is proof of that.

Nonetheless, credit is due Senators GOLDWATER and NUNN because they have worked to limit this. Most significantly, under their leadership, the committee's hearings this year focused on matters of military strategy and operations so that priorities could be better identified within the budget request. Many actual reductions in this bill are left up to the Defense Department to decide. That is the way it should be. The Congress should provide the guidelines and not micromanage.

Mr. President, it is important to allocate our resources and use every dollar wisely for another reason. We must never lose sight of the tremendous threat that we face with the Soviet Union and its allies and surrogates. Sometimes we tend to debate numbers and weapons systems and we lose sight of the real reason for the debate in the first place. Make no mistake about it—the Soviet bloc today represents the greatest military challenge the Free World has ever faced. While overall Western defenses have improved over the last 10 years, the threat has grown just as much or more. This bill, totaling almost $300 billion for next year, is basically a big insurance premium to guard against the loss of freedom and to protect our vital interests. The protection of our society is serious business and this bill represents our effort to met that responsibility with the limited resources we have.

I was also pleased that the committee has begun to approach the strategic defense initiative from a more realistic perspective, shaping a meaningful program with realistic goals and needed flexibility for arms control considerations. Indeed, this is the one area in which the committee identified real priorities by noting that SDI was breaking the bank, seriously reducing our conventional research and development efforts, and thereby hurting our efforts to counter the massive conventional buildup of the Soviet Armed Forces. Clearly, a more balanced research program into future technologies is needed to maintain an overall balance of power between ourselves and the Soviets, in the area of both nuclear and conventional weapons. Research into strategic defense is absolutely necessary and I strongly support it. The strategic defense initiative can be a powerful tool of leverage for the President to employ in reducing offensive weapons. I hope he uses this leverage wisely. However, SDI should not be oversold as our only hope for future peace and stability.

It remains to be seen what the final level of defense spending will be this year. I remain concerned that the House figure will be dangerously low. I hope that the final outcome of our effort and that of the Appropriations Committee will be at the level of the budget resolution. I hope that in future years we will ensure a higher, yet reasonable, level of spending so that the gains of our defense modernization effort will not be lost. We cannot afford the continued rapid growth in defense spending favored by the President. Neither can we afford to return to days of the fast funding of the Armed Forces. We have, as members of the Armed Services, done our best under difficult deficit and budget constraints. We shall revisit it again.

AMENDMENT NO. 2262

(Purpose: To extend and improve the National School Lunch Act and the Child Nutrition Act of 1966)

Mrs. HAWKINS. Mr. President, I send an amendment to the desk.

THE PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Florida [Mrs. HAWKINS] for herself and Senators DOLE, BOSCHWITZ, HARKIN, LEAHY, LUGAR, COCHRAN, MCCONNELL, MELCHER, SIMON, DANFORTH, WILSON, and ANDREWS, proposes an amendment numbered 2262.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

THE PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill insert the following:

REAUTHORIZATION OF CHILD NUTRITION PROGRAMS

SEC. . SUMMER FOOD SERVICE PROGRAM FOR CHILDREN.

Section 13(p) of the National School Lunch Act (42 U.S.C. 1761(p)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. . COMMODITY DISTRIBUTION PROGRAM.

Section 14(a) of the National School Lunch Act (42 U.S.C. 1762a(a)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. . STATE ADMINISTRATIVE EXPENSES.

Section 7(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1776(i)) is amended by striking out "1984" and inserting in lieu thereof "1989".

SEC. . SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN.

Section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786) is amended—

(1) in subsection (c)(2), by striking out "Subject to" and all that follows through "1984" and inserting in lieu thereof "Subject to amounts appropriated to carry out this section under subsection (g)";

(2) in subsection (g)—

(A) by designating the first and second sentences as paragraphs (1) and (3), respectively; and

(B) by amending paragraph (1) (as so designated) to read as follows:

"(1) There are authorized to be appropriated to carry out this section $1,570,000,000 for fiscal year ending September 30, 1986, such sums as may be necessary for each of the fiscal years ending September 30, 1987, and September 30, 1988, and $1,782,000,000 for the fiscal year ending September 30, 1989."; and

(3) in subsection (h)(2), by striking out "1984" and inserting in lieu thereof "1989".

SEC. . NUTRITION EDUCATION AND TRAINING PROGRAM.

The first sentence of section 19(j)(2) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(2)) is amended by striking out "1984" and inserting in lieu thereof "1989".

TITLE II—SCHOOL LUNCH AND BREAKFAST PROGRAMS

SEC. . BASIS OF COMMODITY ASSISTANCE.

Section 6(b) of the National School Lunch Act (42 U.S.C. 1755(b)) is amended—

(1) in the first sentence, by striking out "May 15" and inserting in lieu thereof "June 1"; and

(2) in the second sentence, by striking out "June 15" and inserting in lieu thereof "July 1".

SEC. . INCLUSION OF WHOLE MILK AS A SCHOOL LUHCH BEVERAGE.

Effective July 1, 1986, section 9(a) of the National School Lunch Act (42 U.S.C. 1758(a)) is amended—

(1) by designating the first, second, and third sentences as paragraph (1), (3), and (4), respectively; and

(2) by inserting after paragraph (1) (as so designated) the following new paragraph:

"(2) In addition to such other forms of milk as the Secretary may determine, the

lunches shall offer whole milk as a beverage.".

SEC. . AUTOMATIC ELIGIBILITY FOR CERTAIN PROGRAMS.

Effective July 1, 1986, section 9(b) of the National School Lunch Act (42 U.S.C. 1758(b)) is amended by adding at the end thereof the following new paragraph:

"(6)(A) A child shall be considered automatically eligible for a free lunch and breakfast under this Act and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.), respectively, without further application or eligibility determination, if the child is a member of—

"(i) a household receiving assistance under the food stamp program authorized under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.); or

"(ii) an AFDC assistance unit (under the aid to families with dependent children program authorized under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.)), in a State where the standard of eligibility for the assistance does not exceed 130 percent of the poverty line (as defined in section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2))).

"(B) Proof of receipt of food stamps or aid to families with dependent children shall be sufficient to satisfy any verification requirement imposed under paragraph (2)(C).".

SEC. . LIMITATION ON MEAL CONTRACTING.

Effective July 1, 1986, section 9 of the National School Lunch Act (42 U.S.C. 1758) is amended by adding at the end thereof the following new subsection:

"(e) A school or school food authority participating in a program under this Act may not contract with a food service company to provide a la carte food service unless the company agrees to offer free, reduced-price, and full-price reimbursable meals to all eligible children.".

SEC. . CHANGE IN TUITION LIMITATION FOR PRIVATE SCHOOLS.

(a) SCHOOL LUNCH PROGRAMS.—Section 12(d)(5)) of the National School Lunch Act (42 U.S.C. 1760(d)(5)) is amended—

(1) in clause (A) of the first sentence, by striking out "$1,500" and inserting in lieu thereof "$2,000"; and

(2) by adding at the end thereof the following new sentence: "On July 1, 1988, and each July 1 thereafter, the Secretary shall adjust the tuition limitation amount prescribed in clause (A) of the first sentence of this paragraph to reflect changes in the Consumer Price Index for All Urban Consumers during the most recent 12-month period for which the data is available.

(b) SCHOOL BREAKFAST PROGRAMS.—Section 15(c) of the Child Nutrition Act of 1966 (42 U.S.C. 1784(c)) is amended—

(1) in clause (A) of the first sentence, by striking out "$1,500" and inserting in lieu thereof "$2,000"; and

(2) by adding at the end thereof the following new sentence: "On July 1, 1988, and each July 1 thereafter, the Secretary shall adjust the tuition limitation amount prescribed in clause (A) of the first sentence of this paragraph to reflect changes in the Consumer Price Index for All Urban Consumers during the most recent 12-month period for which the date is available.".

(c) APPLICATION.—(1) The amendments made by subsections (a)(1) and (b)(1) shall apply for the fiscal year beginning on October 1, 1986, and each school year thereafter.

(2) The amendments made by subsections (a)(2) and (b)(2) shall apply for the school year beginning on July 1, 1988, and each school year thereafter.

SEC. . USE OF SCHOOL LUNCH FACILITIES FOR ELDERLY PROGRAMS.

Section 12 of the National School Lunch Act (42 U.S.C. 1760) is amended by adding at the end thereof the following new subsection:

"(i) Facilities, equipment, and personnel provided to a school food authority for a program authorized under this Act or the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) may be used, as determined by a local educational agency, to support a nonprofit nutrition program for the elderly, including a program funded under the Older Americans Act of 1965 (42 U.S.C. 3001 et seq.).".

SEC. . PILOT PROJECTS FOR ADMINISTRATION OF CHILD NUTRITION PROGRAMS BY CONTRACT OR DIRECT DISBURSEMENT.

(a) PILOT PROJECTS.—Section 20 of the National School Lunch Act (42 U.S.C. 1769) is amended by striking out subsection (d) and inserting in lieu thereof the following new subsection:

"(d) The Secretary may conduct pilot projects in not more than three States in which the Secretary is currently administering programs to evaluate the effects of the Secretary contracting with private profit and nonprofit organizations to act as a State agency under this Act and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) for schools, institutions, or service institutions referred to in section 10 of this Act and section 5 of the Child Nutrition Act of 1966 (42 U.S.C. 1774).".

(b) CONFORMING AMENDMENT.—The first sentence of section 20(c) of the National School Lunch Act is amended by striking out "except for the pilot projects conducted under subsection (d) of this section,".

SEC. . DEPARTMENT OF DEFENSE OVERSEAS DEPENDENTS' SCHOOLS.

(a) SCHOOL LUNCHES.—Section 22(d) of the National School Lunch Act (42 U.S.C. 1769b(d)) (as added by section 1408(a) of the Education Amendments of 1978 (92 Stat. 2368)) is amended by striking out "and for" and all that follows through "reduced-price lunch".

(b) SCHOOL BREAKFASTS.—Section 20(d) of the Child Nutrition Act of 1966 (42 U.S.C. 1789) is amended by striking out "and for" and all that follows through "reduced-price breakfast".

SEC. . RESTORATION OF CERTAIN KINDERGARTENS TO THE SPECIAL MILK PROGRAM.

Effective October 1, 1986, section 3(a) of the Child Nutrition Act of 1966 (42 U.S.C. 1772(a)) is amended—

(1) in the first sentence—

(A) by inserting "(1)" after the subsection designation;

(B) by redesignating clauses (1) and (2) as subparagraphs (A) and (B), respectively; and

(C) in subparagraph (A) (as so redesignated), by inserting "except as provided in paragraph (2)," after "and under,";

(2) by designating the second through eighth sentences as paragraphs (3) through (9), respectively; and

(3) by inserting after paragraph (1) (as so designated) the following new paragraph:

"(2) The limitation imposed under paragraph (1)(A) for participation of nonprofit schools in the special milk program shall not apply to split-session kindergarten programs conducted in schools in which children do not have access to the meal services program operating in schools the children attend as authorized under this Act or the National School Lunch Act (42 U.S.C. 1751 et seq.).".

SEC. 210. IMPROVEMENT OF BREAKFAST PROGRAM MEAL PATTERN.

(a) ADDITIONAL ASSISTANCE.—Effective October 1, 1986, section 4(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1773(b)) is amended by adding at the end thereof the following new paragraphs:

"(3) The Secretary shall increase by 3 cents the annually adjusted payment for each breakfast served under this Act and section 17 of the National School Lunch Act (42 U.S.C. 1766). These funds shall be used to assist States, to the extend feasible, in improving the nutritional quality of the breakfasts.

"(4) Notwithstanding any other provision of law, whenever stocks of agricultural commodities are acquired by the Secretary or the Commodity Credit Corporation and are not likely to be sold by the Secretary or the Commodity Credit Corporation or otherwise used in programs of commodity sale or distribution, the Secretary shall make such commodities available to school food authorities and eligible institutions serving breakfasts under this Act in a quantity equal in value to not less than 3 cents for each breakfast served under this Act and section 17 of the National School Lunch Act.

"(5) Expenditures of funds from State and local sources for the maintenance of the breakfast program shall not be diminished as a result of funds or commodities received under paragraph (3) or (4).".

(b) NUTRITION REQUIREMENTS.—The Secretary of Agriculture shall review and revise the nutrition requirements for meals served under the breakfast program authorized under the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) and section 17 of the National School Lunch Act (42 U.S.C. 1766) to improve the nutritional quality of the meals, taking into consideration both the findings of the National Evaluation of School Nutrition Programs and the need to provide increased flexibility in meal planning to local food authorities.

(2) Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall promulgate regulations to implement the revisions.

SEC. . EXTENSION OF OFFER VERSUS SERVE PROVISION TO THE SCHOOL BREAKFAST PROGRAM.

Section 4(e) of the Child Nutrition Act of 1966 (42 U.S.C. 1773(e)) is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end thereof the following paragraph:

"(2) At the option of a local school food authority, a student in a school under the authority that participates in the school breakfast program under this Act may be allowed to refuse not more than one item of a breakfast that the student does not intend to consume. A refusal of an offered food item shall not affect the full charge to the student for a breakfast meeting the requirements of this section or the amount of payments made under this Act to a school for the breakfast.".

SEC. . STAFFING STANDARDS.

Section 7 of the Child Nutrition Act of 1966 (42 U.S.C. 1776) (as amended by section 103) is further amended—

(1) by striking out subsection (b); and

(2) by redesignating subsections (c) through (i) as subsections (b) through (h), respectively.

TITLE III—SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN

SEC. . COSTS FOR NUTRITION SERVICES AND ADMINISTRATION.

(a) DEFINITIONS.—Section 17(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(b)) is amended—

(1) by striking out paragraph (1);

(2) by redesignating paragraphs (2), (3), and (4) as paragraphs (1), (2), and (3), respectively; and

(3) by inserting after paragraph (3) (as so redesignated) the following new paragraph:

"(4) 'Costs for nutrition services and administration' means costs that shall include, but not be limited to, costs for certification of eligibility of persons for participation in the program (including centrifuges, measuring boards, spectrophotometers, and scales used for the certification), food delivery, monitoring, nutrition education, outreach, startup costs, and general administration applicable to implementation of the program under this section, such as the cost of staff, transportation, insurance, developing and printing food instruments, and administration of State and local agency offices.".

(b) CONFORMING AMENDMENTS.—Section 17 of such Act is amended—

(1) by striking out "administrative funds" each place it appears in subsections (f)(11), (h)(2), (h)(3), and (h)(4) and inserting in lieu thereof "funds for nutrition services and administration"; and

(2) by striking out "administrative costs" each place it appears in subsection (h) and inserting in lieu thereof "costs for nutrition services and administration".

SEC. . STATE ELIGIBILITY FOR WIC FUNDS.

(a) ELIGIBILITY.—Section 17(c) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(c)) is amended by adding at the end thereof the following new paragraph:

"(4) A State shall be ineligible to participate in programs authorized under this section if the Secretary determines that State or local sales taxes are collected within the State on purchases of food made to carry out this section.".

(b) APPLICATION.—The amendment made by subsection (a) shall apply to a State beginning with the fiscal year that commences after the end of the first regular session of the State legislation following the date of the enactment of this Act.

SEC. . PARTICIPATION REPORT.

(a) BIENNIAL REPORT.—Section 17(d) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(d)) is amended by adding at the end thereof the following new paragraph:

"(4) The Secretary shall report biennially to Congress on—

"(A) the income and nutritional risk characteristics of participants in the program;

"(B) participation in the program by members of families of migrant farmworkers; and

"(C) such other matters relating to participation in the program as the Secretary considers appropriate.".

(b) USE OF EVALUATION FUNDS FOR REPORT.—Section 17(g)(3) of such Act (as amended by section 104(2)(A)) is further amended by inserting "preparing the report required under subsection (d)(4)," after "health benefits,".

SEC. . PLAN OF OPERATION AND ADMINISTRATION.

(a) PLAN.—Paragraph (1) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(1)) is amended to read as follows:

"(1)(A) Each State agency shall submit annually to the Secretary, by a date specified by the Secretary, a plan of operation and administration for a fiscal year.

"(B) To be eligible to receive funds under this section for a fiscal year, a State agency must receive the approval of the Secretary for the plan submitted for the fiscal year.

"(C) The plan shall include—

"(i) a description of the food delivery system of the State agency and the method of enabling participants to receive supplemental foods under the program, to be administered in accordance with standards developed by the Secretary;

"(ii) a description of the financial management system of the State agency;

"(iii) a plan to coordinate operations under the program with special counseling services, such as the expanded food and nutrition education program, immunization programs, prenatal care, well-child care, family planning, alcohol and drug abuse counseling, child abuse counseling, and with the aid to families with dependent children, food stamp, and maternal and child health care programs;

"(iv) a plan to provide program benefits under this section to, and to meet the special nutrition education needs of, eligible migrants and Indians;

"(v) a plan to expend funds to carry out the program during the relevant fiscal year;

"(vi) a plan to provide program benefits under this section to unserved and underserved areas in the State, if sufficient funds are available to carry out this clause;

"(vii) a plan to provide program benefits under this section to eligible persons most in need of the benefits and to enroll eligible women in the early months of pregnancy, to the maximum entent practicable; and

"(viii) such other information as the Secretary may require.

"(D) The Secretary may permit a State agency to submit only those parts of a plan that differ from plans submitted for previous fiscal years.

"(E) The Secretary may not approve any plan that permits a person to participate simultaneously in both the program authorized under this section and the commodity supplemental food program authorized under sections 4 and 5 of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note).".

"(b) APPLICATION.—The amendment made by subsection (a) shall apply to a plan submitted by a State agency under section 17(f)(1) of the Child Nutrition Act of 1966 for the fiscal year ending September 30, 1987, and each fiscal year thereafter.

SEC. . PUBLIC COMMENT.

Paragraph (2) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(2)) is amended to read as follows:

"(2) A State agency shall establish a procedure under which members of the general public are provided an opportunity to comment on the development of the State agency plan.".

SEC. . AVAILABILITY OF PROGRAM BENEFITS.

Paragraph (8) of section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)(8)) is amended to read as follows:

"(8)(A) The State agency shall, in cooperation with participating local agencies publicly announce and distribute information on the availability of program benefits (including the eligibility criteria for participation and the location of local agencies operating the program) to offices and organizations that deal with significant numbers of potentially eligible persons (including health and medical organizations, hospitals and clinics, welfare and unemployment offices, social service agencies, farmworker organizations, Indian tribal organizations, and religious and community organizations in low income areas).

"(B) The information shall be publicly announced by the State agency and by local agencies at least annually.

"(C) The State agency and local agencies shall distribute the information in a manner designed to provide the information to potentially eligible persons who are most in need of the benefits, including pregnant women in the early months of pregnancy.".

SEC. . REPAYMENT OF CERTAIN BENEFITS BY RECIPIENTS.

Effective October 1, 1986, section 17(f) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(f)) is amended by adding at the end thereof the following new paragraph:

"(15) If a State agency determines that a member of a family has received an overissuance of food benefits under the program authorized by this section as the result of such member intentionally making a false or misleading statement or intentionally misrepresenting, concealing, or withholding facts, the State agency shall recover, in cash, from such member an amount that the State agency determines is equal to the value of the overissued food benefits, unless the State agency determines that the recovery of the benefits would not be cost effective.".

SEC. . PRIORITY FUNDS FOR WIC MIGRANT PROGRAMS.

(a) PRIORITY FUNDING.—Effective October 1, 1986, section 17(g) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(g)) (as amended by section 104(2)(A)) is further amended by inserting after paragraph (1) the following new paragraph:

"(2) Of the sums appropriated for any fiscal year for programs authorized under this section, not less than nine-tenths of 1 percent shall be available first for services to eligible members of migrant populations. The migrant services shall be provided in a manner consistent with the priority system of a State for program participation.".

(b) ACCOUNTABILITY.—To the extent possible, accountability for migrant services under section 17(g)(2) of the Child Nutrition Act of 1966 (as added by subsection (a)) shall be conducted under regulations in effect on the date of the enactment of this Act.

SEC. . IMPROVING STATE AGENCY ADMINISTRATIVE SYSTEMS.

Section 17(g)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(g)(3)) (as amended by sections 104(2)(A) and 303(b)) is further amended by inserting "providing technical assistance to improve State agency administrative systems," after "subsection (d)(4),".

SEC. . PAPERWORK REDUCTION.

Section 17(h)(1) of the Child Nutrition Act of 1966 (42 U.S.C. 1766(h)(1)) is amended by adding at the end thereof the following new sentence: "The Secretary shall limit to a minimal level any documentation required under the preceding sentence.".

SEC. . ALLOCATION STANDARDS.

Section 17(h)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(3)) is amended—

(1) in the second sentence, by striking out ", which satisfy allocation guidelines established by the Secretary"; and

(2) by striking out the last sentence.

SEC. . ADVANCE PAYMENTS.

Effective October 1, 1986, section 17(h)(4) of the Child Nutrition Act of 1966 (42 U.S.C.

1786(h)(4)) is amended by striking out "shall" and inserting in lieu thereof "may".

SEC. . AVAILABILITY OF FUNDS.

(a) AVAILABILITY.—Section 17(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(i)) is amended—

(1) by designating the first, second, third, fourth, and fifth sentences as paragraphs (1), (2), (4), (5), and (6), respectively; and

(2) by inserting after paragraph (2) (as so designated) the following new paragraph:

"(3)(A) Notwithstanding paragraph (2)—

"(i) not more than 1 percent of the amount of funds allocated to a State agency under this section for supplemental foods for a fiscal year may be expended by the State agency for expenses incurred under this section for supplemental foods during the preceding fiscal year; or

"(ii) not more than 1 percent of the amount of funds allocated to a State agency for a fiscal year under this section may be expended by the State agency during the subsequent fiscal year.

"(B) Any funds made available to a State agency in accordance with subparagraph (A)(ii) for a fiscal year shall not affect the amount of funds allocated to the State agency for such year.".

(b) APPLICATION.—Section 17(i)(3)(A)(i) of the Child Nutrition Act of 1966 (as amended by subsection (a)) shall not apply to appropriations made before the date of enactment of this Act.

## TITLE IV—OTHER NUTRITION PROGRAMS

SEC. . HEARINGS ON FEDERAL AUDIT ACTIONS UNDER THE CHILD CARE FOOD PROGRAM.

Section 17(e) of the National School Lunch Act (42 U.S.C. 1766(e)) is amended—

(1) by striking out "The" and inserting in lieu thereof "(1) Except as provided in paragraph (2), the"; and

(2) by adding at the end thereof the following new paragraphs:

"(2) A State is not required to provide a hearing to an institution concerning a State action taken on the basis of a Federal audit determination.

"(3) If a State does not provide a hearing to an institution concerning a State action taken on the basis of a Federal audit determination, the Secretary, on request, shall afford a hearing to the institution concerning the action.".

SEC. 402. BASIS FOR NUTRITION EDUCATION GRANTS.

Section 19(j)(2) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(2)) is amended by striking out "$75,000" each place it appears and inserting in lieu thereof "$50,000".

SEC. . EXTENSION OF ALTERNATIVE MEANS OF ASSISTANCE.

Section 14 of the National School Lunch Act (42 U.S.C. 1762a) is amended by adding at the end thereof the following new subsection:

"(g)(1) As used in this subsection, the term 'eligible school district' has the same meaning given such term in section 1581(a) of the Food Security Act of 1985.

"(2) In accordance with the terms and conditions of section 1581 of such Act, the Secretary shall permit an eligible school district to continue to receive assistance in the form of cash or commodity letters of credit assistance, in lieu of commodities, to carry out the school lunch program operated in the district.

"(3)(A) On request of a participating school district (and after consultation with the Comptroller General of the United States with respect to accounting procedures used to determine any losses) and subject to the availability of funds, the Secretary shall provide cash compensation to an eligible school district for losses sustained by the district as a result of the alteration of the methodology used to conduct the study referred to in section 1581(a) of such Act during the school year ending June 30, 1983.

"(B) There are authorized to be appropriated $50,000 to carry out this paragraph, to be available without fiscal year limitation.".

SEC. . NATIONAL DONATED COMMODITY PROCESSING PROGRAMS.

In accordance with the terms and conditions of section 1114(a)(2) of the Agriculture and Food Act of 1981 (7 U.S.C. 1431e(a)(2)), whenever a commodity is made available without charge or credit under any nutrition program administered by the Secretary of Agriculture, the Secretary shall encourage consumption of the commodity through agreements with private companies under which the commodity is reprocessed into end-food products for use by eligible recipient agencies.

## TITLE V—TECHNICAL CORRECTIONS

SEC. . OBSOLETE PROVISIONS.

(a) NUTRITION PROGRAM STAFF STUDY; TRUST TERRITORY APPROPRIATIONS.—(1) Sections 18 and 19 of the National School Lunch Act (42 U.S.C. 1767 and 1768) are repealed.

(2) The first sentence of section 3 of such Act (42 U.S.C. 1752) is amended by striking out "sections 13, 17, and 19" and inserting in lieu thereof "sections 13 and 17".

(b) STUDY OF MENU CHOICE.—Section 22 of such Act (42 U.S.C. 1769c) (as added by section 9 of the Child Nutrition Amendments of 1978 (92 Stat. 3623)) is repealed.

(c) CONFORMING AMENDMENTS.—(1) The National School Lunch Act (as amended by sections 207 and 208(a) and subsection (b)) is further amended by redesignating sections 20, 21, and 22 (42 U.S.C. 1769, 1769a, and 1769b) as sections 18, 19, and 20, respectively.

(2) Clause (3) of the first sentence of section 6(a) of such Act (42 U.S.C. 1755(a)) is amended by striking out "section 20" and inserting in lieu thereof "section 18".

SEC. . OBSOLETE REFERENCES TO HEALTH, EDUCATION, AND WELFARE.

(a) REFERENCE IN NATIONAL SCHOOL LUNCH ACT.—Clause (1) of the sixth sentence of section 17(a) of the National School Lunch Act (42 U.S.C. 1766(a)) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(b) REFERENCES IN CHILD NUTRITION ACT OF 1966.—(1) The Child Nutrition Act of 1966 is amended by striking out "Health, Education, and Welfare" each place it appears in section 4(a) (42 U.S.C. 1773(a)), subsections (b)(6), (b)(13), (e)(2), (k)(1), and (k)(2) of section 17 (42 U.S.C. 1786), and subsections (d)(2) and (d)(3) of section 19 (42 U.S.C. 1788) and inserting in lieu thereof "Health and human Services".

(2) Section 19(j)(3) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(3)) is amended by striking out "Office of Education of the Department of Health, Education, and Welfare" and inserting in lieu thereof "Department of Education".

SEC. . CONFORMING AMENDMENTS.

(a) DEFINITION OF SECRETARY.—Section 12(d) of the National School Lunch Act (42 U.S.C. 1760(d)) is amended by adding at the end thereof the following new paragraph:

"(8) 'Secretary' means the Secretary of Agriculture.".

(b) REDESIGNATION OF SUBSECTION.—Section 19 of the Child Nutrition Act of 1966 (42 U.S.C. 1788) (as amended by sections 105, 402, and 502(b)(2)) is further amended by redesignating subsection (j) as subsection (i).

Mrs. HAWKINS. Mr. President, I understand that this amendment has been cleared on both sides. It is being sponsored by myself and Senators DOLE, BOSCHWITZ, HARKIN, LEAHY, LUGAR, COCHRAN, MCCONNELL, MELCHER, SIMON, DANFORTH, WILSON, and ANDREWS.

Mr. HELMS. Mr. President, I certainly recognize the deep desire that the Senator from Florida has in seeing enactment of child nutrition legislation. She has been a tireless advocate on this subject. Even during her recent hospitalization, she was diligent in lobbying from her hospital bed for action and conclusion of child nutrition legislation.

The problem is, Mr. President, as it is so often these days, money. There simply is not enough room in the budget to accommodate the Senator's desire for this amendment which would add, according to the Congressional Budget Office, $46 million during fiscal year 1987, a total of $168 million during the next 3 fiscal years.

The Senator from North Carolina is more than willing to see a reauthorization of child nutrition programs—even a reauthorization that would include cost-of-living increases in reimbursements for meals served. What the Senator cannot agree to is additional increases which would have major budget ramifications.

All of us love children, and none of us opposes child nutrition programs that assist in providing valuable lunches and breakfasts for the Nation's school children. But what are the ramifications for the Nation if this amendment is adopted?

If we are ever to reduce the Federal deficit, we simply cannot shrink from our duty to refuse to increase Federal spending. It is a matter of principle with me, Mr. President.

Spending will be increased by nearly $50 million annually. That is spending for entitlement programs. There will be no second chance for the Appropriations Committee to restrain spending. If this amendment is adopted, entitlement spending will increase.

I know that the Senator believes that there was "room in the budget resolution" for the extra money. But it has become apparent since the budget resolution was adopted that it was a budget based more on wishful thinking than reality. Unofficial estimates emerging from OMB and CBO now indicate that the projected deficit for fiscal year 1987 will be something on the order of $164 to $169 billion. That is $20 to $25 billion more—more—than the budget resolution an-

ticipated. We'll find out for sure next week, on August 15.

Mr. President, under Gramm-Rudman-Hollings, for each dollar that projected spending is above the targets—$144 billion for fiscal year 1987—the automatic sequester will require that defense and nondefense spending will be reduced 50 cents each.

That means that this amendment is not only likely to contribute to reductions in defense spending, but reductions are likely to be made more severe for agriculture, education, and other nondefense spending programs that are not exempt from sequester under the Gramm-Rudman-Hollings legislation.

It is for these budgetary reasons, Mr. President, that this Senator has attempted to outline the consequences of this spending to my colleagues who also serve as conferees on the child nutrition legislation, H.R. 7.

In my judgment, the conferees for the Armed Services Committee will be faced with the same situation that has confronted the chairman of the Agriculture Committee. Inclusion of this amendment will make more difficult an overall budget that is within the Gramm-Rudman-Hollings parameters. Something else will have to be deleted or reduced to accommodate this additional spending. If Senators would rather reduce defense, or other important nondefense expenditures, so be it, but I must respectfully express my disagreement, with the greatest admiration and respect for Senator HAWKINS.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2262) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mrs. HAWKINS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MELCHER. Mr. President, this year's defense authorization bill, like last year, is big on spending for weapons procurement and for further development of new weapons systems. But this bill again short changes operation and maintenance.

The momentum of this bill and last year's defense authorization plunges on to more and more spending for weapons systems that are very expensive with disproportionate amounts for training, repair, flying time for pilots, and steaming time for naval craft.

Although this is clear to the Senate, this bill is flawed with too many weapons systems on production lines, costing too much at a pace that is too quick.

Readiness suffers.

At a price tag of near $300 billion, this bill is over budget. The amendment which I offered to trim the loose overappropriation process that we pursue was nevertheless rejected as well as a cut in the $36 billion funds for development of new weapons systems.

The unsound disproportionate authorization of more weapons at the expense of operations and maintenance penalizes training ammunition, and the essentials of readiness.

That causes me to protest the bill. I shall vote "No".

AMENDMENT NO. 2682

(Purpose: Technical corrections)

Mr. GOLDWATER. Mr. President, I send to the desk an amendment correcting technical errors in the bill, as amended, which has been cleared by all Senators concerned, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment immediately.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. GOLDWATER] proposes an amendment numbered 2682.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of amendment No. 2620 as adopted, add the following new section:

"On page 268, line 9, strike "$2,148,689,000" and insert in lieu thereof "2,149,749,000".

In amendment No. 2633 as adopted, on page 1, line 6, strike "$8,866,000,000" and insert in lieu thereof "$8,370,800,000".

In amendment No. 2633 as adopted, on page 2, line 2, strike "$15,334,573,000" and insert in lieu thereof "$14,908,873,000".

In amendment No. 2633 as adopted, on page 2, line 4, strike "$19,687,171,000" and insert in lieu thereof "$19,304,871,000".

In amendment No. 2638 as adopted, beginning on page 1, line 9, strike all through page 3, line 15.

In amendment No. 2657 as adopted, on page 2, line 6, strike the period and insert ", and those provisions contained in amendments numbered 2597, 2641, 2645, 2654, and 2655.".

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 2682) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. Is there further debate?

Mr. HOLLINGS. Mr. President, I would like briefly to discuss two Energy Department projects requested by the administration. Both concern environmental protection at the Savannah River Plant, SC. One project, 87-D-152, would provide $1,500,000 for plantwide environmental protection activities. The second, 86-D-154, would provide $15,650,000 for an effluent treatment facility at Savannah River. The defense bill, as reported, does not authorize funds for either of these projects.

I certainly understand the severe budget constraints that the Armed Services Committee faces this year. Many proposed projects must be cut. These two projects, however, have a special importance. The Department of Energy is now making good faith efforts to comply with environmental laws which the courts have ruled must be obeyed. To avoid potentially costly litigation, and to maintain the trust of citizens living near its weapons plants, the Energy Department has requested modest funding to meet these regulatory requirements.

Mr. President, I understand that the bill reported by the House Armed Services Committee recommends authorizing these two projects. I wonder if I might ask my good friend, the Senator from Georgia, whether he would be willing to consider the House position when Senate and House conferees meet to discuss this legislation. I think that these two projects not only would protect and benefit the citizens of our two States but also would help the nuclear weapons program—a program absolutely essential to our national defense—avoid unnecessary and costly litigation.

Mr. NUNN. Mr. President, I would be pleased to consider these two projects when Senate and House conferees meet. As the Senator from South Carolina says, the Armed Services Committee faces great budget difficulties this year. But I would be glad to give these projects every consideration.

Mr. HOLLINGS. I thank my good friend. As always, I deeply appreciate his courtesy and counsel.

Mr. President, in closing I would like to mention a third environmental project at Savannah River. The Federal Clean Water Act requires the Energy Department to cool the extremely hot water that flows out of two of the Savannah River plant's nuclear production reactors. The administration requested $5 million in fiscal year 1987 funds to begin work on cooling towers to meet this environmental requirement. Neither the Senate nor House authorization bills recommend funding this request. Some Members want time to review the environmental impact statement now being prepared on this subject. I understand their desire to review this matter. Soon, however, the Congress will need to decide how best to deal with this important legal requirement. I stand

ready to work with my distinguished colleagues on this issue.

GREAT LAKES SHIPPING OF MILITARY CARGO

Mr. GLENN. Mr. President, I had planned to bring up an amendment dealing with Great Lakes shipping of military cargo. However, I understand it may require extensive debate and a rollcall vote, and I recognize the severe time contraints that the Senate is working under. So I have decided to withdraw the amendment—but I would like to make the following points for the benefit of my colleagues.

In 1984, the Department of Defense moved 6.6 million measurement tons of cargo by ship from the four U.S. coasts. Interestingly, more than 20 percent of this cargo was manufactured in the Great Lakes States. Yet, Great Lakes ports' share of this cargo was less than 1 percent. One of the reasons why the Great Lakes got such a negligible portion of military cargo shipping was that there was not a U.S.-flag carrier in the Great Lakes trade before 1985.

Now, I want my colleagues to know that Great Lakes shipping service is good for DOD and for the taxpayer, and experience bears this out. In 1985, the first U.S.-flag service was inaugurated between the Great Lakes and northern Europe. As a direct result of this competition, DOD realized substantial transportation cost savings and was able to reduce its dependency on the Military Sealift Command [MSC] fleet of roll-on/roll-off [RO/RO] commercial charters:

Government cargo bids in October 1985 were more than 60 percent lower in may categories than they were in October 1984.

A competitor of the Great Lakes Service stated that the lower rates offered by all companies as a result of the Great Lakes roll-on/roll-off service saved the Department of Defense $68 million in 1985.

The Department of Defense has praised the Great Lakes Service. In a November 1, 1985 letter to me, Assistant Secretary of Defense for Acquisitions and Logistics Jim Wade wrote:

The initiation of [U.S.-flag] service earlier this year has been beneficial to shipping interests in the Great Lakes region as well as to the DOD. [This new service] has provided excellent service to the DOD in shipping both Government cargo and household goods of Service members between the Great Lakes and northern Europe * * * Based on the significantly lower shipping rates brought about by [the Great Lakes] competition with other commercial RO/RO carriers, we have been able to reduce to four the number of Military Sealift Command [MSC] commercially-owned chartered RO/RO ships operating on the east coast to European routes.

Since then, Dr. Wade has stated that the MSC commercially-owned chartered RO/RO ships serving the east coast will be further reduced to one by October 1, 1986. I ask unanimous consent that a copy of Dr. Wade's letter to me be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ASSISTANT SECRETARY OF DEFENSE,
*Washington, DC, November 1, 1985.*

Hon. JOHN GLENN,
*U.S. Senate, Washington, DC.*

DEAR SENATOR: Thank you for your October 4, 1985 letter which forwarded a copy of Mr. David Oberlin's letter describing Fednav Lakes Services, Inc. progress in shipping Department of Defense (DoD) cargoes.

The initiation of Fednav service earlier this year has been beneficial to shipping interests in the Great Lakes region as well as to the DoD. Fednav has provided excellent service to the DoD in shipping both government cargo and household goods of Service members between the Great Lakes and Northern Europe.

Since the initiation of Fednav service, we have closely monitored DoD roll-on/roll-off (RO/RO) shipping requirements and have evaluated the costs of using privately-owned MSC chartered ships and scheduled service such as that offered by Fednav. Based on the significantly lower shipping rates brought about by Fednav's competition with other commercial RO/RO carriers, we have been able to reduce to four the number of Military Sealift Command (MSC) commercially-owned chartered RO/RO ships operating on the East Coast to European routes. Further, MSC is attempting to redeliver two of these ships if they can negotiate a satisfactory arrangement with the ships owners that would minimize the cost to the government.

While it is difficult to accurately forecast long term DoD shipping requirements in any detail, you can be assured that we will continue to move DoD cargoes through the Great Lakes when the service meets our requirements and is cost competitive.

Sincerely,

JAMES P. WADE, Jr.

Mr. DIXON. Mr. President, I share the Senator from Ohio's support for Great Lakes shipping and I would like to share an example of the cost savings and excellent service with my colleagues. According to the Military Traffic Management Command, in 1985, the cost to the Department of Defense of moving Bradley Fighting Vehicles from their point of origin, San Jose, CA, to their southern port of embarkation (Beaumont, TX) and by ship to Europe cost $9,550 per vehicle. When the Great Lakes began offering this service in 1985, the cost of moving the Bradley Fighting Vehicle from San Jose to the Great Lakes port of embarkation and to Europe was just $5,293 per vehicle—A savings to DOD and the taxpayer of $4,257 per vehicle.

Mr. LEVIN. Mr. President, I agree with the distinguished Senators from Ohio and Illinois, that the Great Lakes offers a tremendous opportunity to the Department of Defense. A perception that shipping through the Great Lakes is more expensive and, in some cases, more time consuming has been a factor in decisions by Federal Government agencies and others to route cargo through tidewater ports rather than through the St. Lawrence Seaway. Yet the Lakes have in fact often been cost-competitive throughout the Seaway's 26-year history. A recent economic study by the Center for the Great Lakes in Chicago indicates that a Great Lakes routing would have been cost-competitive for 91 percent of outbound and 88 percent of inbound DOD cargoes shipped overseas from east coast ports between 1979 and 1984. Mr. President, I ask unanimous consent that excerpts from this report, "Moving Government Goods on the Great Lakes," by the Center for the Great Lakes, be printed in the RECORD.

Let me stress to my colleagues, we don't want special treatment in the Great Lakes. We just want it to be recognized that there is a fourth seacoast, and it offers economical and high quality service to the Government. We want our ports to be given the opportunity to compete with other ports for military cargo. Sometimes our ports are not even listed as an option in the bid where the military equipment manufacturer can deliver the equipment. This is despite the fact that the equipment is often manufactured in Great Lakes States.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

MOVING GOVERNMENT GOODS ON THE GREAT LAKES

(A Report from The Center for the Great Lakes)

THE GREAT LAKES AS COMPETITOR

A perception that shipping through the Great Lakes is more expensive and, in some cases, more time consuming has been a factor in decisions by federal government agencies and others to route cargo through tidewater ports rather than through the Great Lakes/St. Lawrence system. Yet the lakes have, in fact, often been cost competitive during the Seaway's 26-year history. Data presented in Appendix I, Tables 1 and 1-A indicate that a Great Lakes route has been used before and therefore could potentially have been cost-competitive for 91 percent of outbound and 88 percent of inbound Defense Department cargoes shipped between the East Coast and overseas ports between 1979 and 1984. (These figures represent 54 percent of outbound cargo and 45 percent of inbound cargo moving through the four U.S. coasts (Atlantic, Pacific, Gulf and Great Lakes).

TABLE 1.—SELECTED DEFENSE DEPARTMENT SHIPMENTS BY FISCAL YEAR, ORIGIN, AND DESTINATION

| DOD sponsored cargo | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 | 1983 | 1984 | Average |

Source: Military Sealift Command: Dry Cargo Traffic/Route-Commodity-Carrier Reports.

Mr. METZENBAUM. I wholeheartedly share the sentiments expressed by my colleague and friend from Ohio. The Department of Defense needs to ship more cargo from Great Lakes ports.

The Department of Defense spends approximately $750 million for the ocean transportation of defense cargo. It is only fitting that a fair share of military cargo manufactured in the Great Lakes be transported through Great Lakes ports on U.S.-flag vessels.

DOD ignored the fourth sea coast for too long. Two years ago, DOD shipped less than 1 percent of its total cargo through the Great Lakes, even though 20 percent of the cargo was manufactured in the eight Great Lakes States.

There is no excuse to bypass the Great Lakes ports. DOD can no longer overlook the cost savings which can accrue from shipping military cargo from these ports. Last year, U.S.-flag service was inaugurated between the Great Lakes and northern Europe. The increased competition from this helped reduce DOD's total shipping costs by 60 percent and saved DOD $68 million.

It is good public policy and good fiscal policy for DOD to ship a more

realistic portion of its cargo through the Great Lakes. I am confident that they will see the wisdom in doing so.

In summary, it is clear that the entry of Great Lakes service has resulted in savings to DOD and the taxpayer, and provides excellent service in shipping both military cargo and household goods between the Great Lakes and northern Europe.

THE LAUTENBERG AMENDMENT (No. 2628) OFFERED ON AUGUST 7

● Mr. LEVIN. Mr. President, during the debate on August 7 on the Lautenberg amendment which related to the wearing of religious apparel, I referred to a speech made by President Reagan to the Baptist Fundamentalism Convention in 1984. This statement by the President bears witness to the existence and the value of religious pluralism in the military and makes specific reference to the wearing of a skull cap in the military in a highly supportive way that the text of the President's remarks appear at this point in the record.

The remarks follow:

BAPTIST FUNDAMENTALISM 1984 CONVENTION

(Remarks at the Convention April 13, 1984)

Reverend [Jerry] Falwell, ladies and gentlemen, thank you very much, for there are no words to describe a welcome such as you've given me here. It's a real pleasure to be with so many who firmly believe that the answer to the world's problems can be found in the Word of God.

I'm only sorry I can't spend the entire evening with you, but I'm expected across town. [Laughter] But tonight, believe me, I came here with some trepidation, and your warm welcome didn't exactly make me feel any easier, because I'm going to do something that I haven't done before. I'm not going to talk to you about some of the things we've talked about before and some of the things that we've tried to accomplish and that we haven't yet. With regard to that, I will only say let us all heed the words of an old Scotch ballad, "For those defeats that we've had so far, we are hurt; we are not slain. We'll lie us down and rest a bit, and then we'll fight again."

What I'm going to do—and I know you're not supposed to apologize any time you start speaking for what you're going to say—but I know that even you, whose calling it is to keep the rest of us, if possible, on the right path, in these days of cynicism, in these day's when there are people that in the guise of separating church and state would go so far as to say we should not even have chaplains in the military service—I know that there are times when all of us wonder whether we're being effective. And tonight, I'd like to share an account that I received that shows how God works in our lives even in the darkest of hours.

This report concerns the marines in Beirut—brave men who believed that the goal we sought in that place was worthy of their best and gave their best. In the end, hatred centuries old made it impossible for Lebanon to achieve peace when we and so many others hoped it would. But while they were there, those young men of ours prevented widespread killing in Beirut, and they added luster, not tarnish to their motto, "Semper Fidelis."

I'm going to read to you another man's words. And they're words that, perhaps, answer what I said a moment ago about whether we sometimes were shaken in our faith and in our beliefs. On that October day when a terrorist truck bomb took the lives of 241 marines, soldiers, and sailors at the airport in Beirut, one of the first to reach the tragic scene was a chaplain, the chaplain of our Sixth Fleet, Rabbi Arnold E. Resnicoff. And here is what he finally felt urged at the end of that day to put down in writing of the experiences of that day.

He said, "I along with Lieutenant Commander George 'Pooch' Pucciarelli, the Catholic chaplain attached to the marine unit, faced a scene almost too horrible to describe. Bodies and pieces of bodies were everywhere. Screams of those injured or trapped were barely audible at first, as our minds struggled to grapple with the reality before us—a massive four-story building, reduced to a pile of rubble; dust mixing with smoke and fire, obscuring our view of the little that was left.

"Because we'd thought that the sound of the explosion was still related to a single rocket or shell, most of the marines had run toward the foxholes and bunkers while we, the chaplains, had gone to the scene of the noise, just in case someone had been wounded. Now, as the news spread quickly throughout the camp—news of the magnitude of the tragedy, news of the need for others to run to the aid of those comrades who still might be alive, marines came from all directions. There was a sense of God's presence that day in the small miracles of life which we encountered in each body that, despite all odds, still had a breath within. But there was more of His presence, more to keep our faith alive, in the heroism and in the humanity of the men who responded to the cries for help. We saw marines risk their own lives again and again as they went into the smoke and the fire to try to pull someone out or as they worked to uncover friends, all the while knowing that further collapse of huge pieces of concrete, precariously perched like dominos, could easily crush the rescuers.

"There was humanity at its best that day and a reminder not to give up the hope and dreams of what the world could be in the tears that could still be shed by these men, regardless of how cynical they had pretended to be before, regardless of how much they might have seen before.

"Certain images will stay with me always," he writes. "I remember a marine who found a wad a money amidst the rubble. He held it at arm's length as if it were dirty and cried out for a match or a lighter so that it could be burned. No one that day wanted to profit from the suffering of catastrophe. Later the chaplains would put the word out that the money should be collected and given to us, for we were sure that fund for widows and orphans would ultimately be established. But at that moment, I was hypnotized with the rest of the men and watched as the money was burned.

"Working with the wounded—sometimes comforting, simply letting them know help was on the way; sometimes trying to pull and carry those whose injuries appeared less dangerous in an immediate sense than the approaching fire or the smothering smoke—my *kippa* was lost. That is the little headgear that is worn by rabbis. The last I remember it. I'd used it to mop someone's brow. Father Pucciarelli, the Catholic chaplain, cut a circle out of his cap—a piece of camouflaged cloth which would become my temporary headcovering. Somehow he wanted those marines to know not just that we were chaplains, but that he was a Christian and that I was Jewish. Somehow we both wanted to shout the message in a land where people were killing each other—at least partially based on the differences in religion among them—that we, we Americans still believed that we could be proud of our particular religions and yet work side by side when the time came to help others, to comfort, and to ease pain.

"Father Pucciarelli and I worked that day as brothers. The words from the prophet Malachi kept recurring to me—words he'd uttered some 2,500 years ago as he had looked around at fighting and cruelty and pain. 'Have we not all one Father?' he had asked. 'Has not one God created us all?' It was painfully obvious, tragically obvious, that our world still could not show that we had learned to answer, yes. Still, I thought, perhaps some of us can keep the question alive. Some of us can cry out, as the marines did that day, that we believe the answer is yes.

"Before the bombing, Pooch"—that's his name for the other chaplain with him—"and I had been in a building perhaps a hundred yards away. There'd been one other chaplain, Lieutenant Danny Wheeler, a Protestant minister who'd spent the night in the building which was attacked. Pooch and I were so sure that he was dead that we had promised each other that when the day came to return to the States we would visit his wife together. Suddenly, Pooch noticed Danny's stole, what he used to call his Protestant tallit. Because it was far from the area Danny was supposed to have been in, there was cautious hope that perhaps he had been thrown clear, that perhaps he had survived. Later, Danny would tell the story of his terror. He was under the rubble, alive, not knowing what had happened and not knowing how badly he was hurt. Then he heard voices of the marines searching near his stole. And his cry for help was answered with digging, which lasted 4 hours before he was dragged out alive.

"Danny told me later that I treated him like a newborn baby when he came out; that I counted his fingers and toes, trying to see that he was whole. I didn't realize that I was so obvious, but the truth is that we couldn't believe that he was in one piece. I hugged him as they brought over a stretcher. I can still hear his first words. Wracked with pain, still unsure of his own condition, he asked how his clerk was. Like so many of the men we would save that day, he asked first about others.

"These men, the survivors, still had no idea of the extent of the damage. They still thought that perhaps they'd been in the one area of the building hit by a rocket or mortar. We would wait until later to sit with these men and tell them the truth, to share with them the magnitude of the tragedy. After the living were taken out there was much more work to be done. With the wounded, with those who had survived, there was the strange job of trying to ease a gnawing feeling of guilt that would slowly surface, guilt that they—"

[At this point, the President was interrupted by persons chanting, "Bread, not bombs."]

Wouldn't it be nice if a little bit of that marine spirit would rub off, and they would listen about brotherly love? [Applause.]

[The chanting continued.]

I was talking about the guilt that was felt by the men who were alive, the guilt that they had somehow let down their comrades by not dying with them. That is something that happens a great deal in combat.

"So our job," he said, "was to tell them how every life saved was important to us; how their survival was important to our faith and our hope. They had to give thanks with us that they still had the gift and the responsibility of life which would go on—"

[The chanting continued.]

I've got more decibels at work for me than they have. [Applause.]

[At this point, there was some commotion in the audience.]

I think they've leaving. [Applause.] Well, back to the chaplain. [Laughter.]

"With others, the marines who stayed behind to continue the job of digging—a terrible, horrifying job of collecting human parts for identification and for eventual burial—there was the job of comforting them as they mourned.

"Thankfully, the self-defense mechanism within us took over from time to time and we were able to work without reacting to each and every horror that we would encounter. But suddenly something would trigger our emotions, something would touch our humanity in a way impossible to avoid. For some it would be the finding of a friend's body, someone filled with life only days before. For others, it would be a scrap of paper or a simple belonging, a birthday card or a picture of someone's children which would remind them that this was no abstract body count of 240 military casualties. This was a tragedy of people where each was unique and each had a story. Each had a past and each had been cheated of a future. As the Mishnah puts it, 'Each was a world.' We were not digging up 240. We were digging up one plus one plus one.

"I have a personal memory of two things which brought to my mind images of life, images which haunt me still. One was a packet of three envelopes tied together with a rubber band. On top, under the band, was a note which read, 'To be mailed in case of death.' The other was a Red Cross message delivered the next morning. The American Red Cross is the agency used by many Navy families to communicate medical news from home. This message was a birth announcement. A baby had been born, and we were to deliver the good news. Only now, there was no father whom we could congratulate, no father to whom the news could be conveyed. That message stayed on the chaplains' desk for days. Somehow we couldn't throw it away, so it stayed on the desk and without mentioning it, we all seemed to avoid that desk.

"I stayed in Beirut for 4 more days before finally returning to Italy and to my family. During those days, as the work went on, a marine here or there would send a silent signal that he wanted me, that is a chaplain, near. Sometimes it was to talk. Sometimes it was so that he could shrug his shoulders or lift his eyes in despair. Sometimes it was just to feel that I was near. For despite the struggles I might be feeling on a personal level, I was a chaplain and, therefore, a symbol that there was room for hope and for dreams, even at the worst of times.

"In our tradition, of course, when we visit the home of a mourner during Shiva, the first week following the death of a loved one, visitors follow a simple rule: If the mourner initiates the conversation, the visitor responds. Otherwise, you sit in silence, communicating concern through your very presence, even without words. Somehow I applied those rules during those days of digging. When a soldier or sailor said something, I responded. Otherwise, I stood by.

"During all of my visits to Beirut, I, along with the other chaplains, spent much time simply speaking with the men. Informal discussions, whether going on while crouched in a foxhole or strolling toward the tents set up for chow, were just as important as anything formal we might set up.

"I remember the first time I jumped in a foxhole, the first time the shells actually fell within the U.S. area. Looking around at the others in there with me, I made the remark that we probably had the only interfaith foxholes in Beirut. The Druze, the Muslims, Christians, all had theirs. The Jewish forces in the Israeli Army had theirs. But we were together. I made the comment then that perhaps if the world had more interfaith foxholes, there might be less of a need for foxholes altogether.

"To understand the role of the chaplain—Jewish, Catholic, or Protestant—is to under stand that we try to remind others, and perhaps ourselves as well, to cling to our humanity even in the worst of times. We bring with us the wisdom of men and women whose faith has kept alive their dreams in ages past. We bring with us the images of what the world could be, of what we ourselves might be, drawn from the visions of prophets and the promises of our holy books. We bring with us the truth that faith not only reminds us of the holy in heaven, but also of the holiness we can create here on Earth. It brings not only a message of what is divine, but also of what it means to be truly human.

"It's too easy to give in to despair in a world sometimes seemingly filled with cruelty and brutality. But we must remember not just the depths to which humans might sink, but also the heights to which they may aspire.

"That October day in Beirut saw men reach heroic heights—indeed, heights of physical endurance and courage to be sure, but heights of sacrifice, of compassion, of kindness, and of simple human decency as well, and even if the admission might bring a blush to the cheeks of a few of the marines, heights of love.

"Long ago the rabbis offered one intepretation of the Biblical verse which tells us that we're created in the image of God. It does not refer to physical likeness, they explained, but to spiritual potential. We have within us the power to reflect as God's creatures the highest values of our Creator. As God is forgiving and merciful, so can we be; as He is caring and kind, so must we strive to be; as He is filled with love, so must we be.

"Because of the actions I witnessed during that hell in Beirut, I glimpsed at least a fleeting image of heaven, for in the hearts and hands of men who chose to act as brothers, I glimpsed God's hand as well. I did not stand alone to face a world forsaken by God. I felt I was part of one created with infinite care and wonderful, awesome potential.

"We live in a world where it's not hard to find cause for despair. The chaplain has the challenge to bring those who often see terror at its worst, some reason for hope. We need to keep faith and to keep searching, even in the worst of times. Only then may we find strength enough to keep believing that the best of times might still be."

"These were the words of Lieutenant Commander Resnicoff. I read them because I just felt that all of us—and I know how much you do of this—let us strive to live up to the vision of faith that Chaplain Resnicoff saw that day, and let us never stop praying and working for peace.

"Thank God, and thank you, and God bless you all.

### DEFENSE MAPPING AGENCY

Mr. PELL. Mr. President, I wish to record my concern about one aspect of the Department of Defense budget for the coming year which is of great concern to the State of Rhode Island, and that is the operation of the Defense Mapping Agency.

Technological innovations in mapmaking appear to be having a substantial impact on the operation and structure of the Defense Mapping Agency, but the effects are being distributed unevenly throughout the organization. Last March, the Agency singled out its Rhode Island field office for possible shutdown, throwing the work force of 225 civilian cartographers into a difficult period of anxiety and uncertainty while a feasibility study is conducted.

While a number of secondary reasons were given for the Agency's action, at base it appears to have resulted from the Agency's conversion to sophisticated computerized digital technology which involves new equipment to receive and convert signals from space satellites. The Agency, and its Director, Maj. Gen. Robert Rosenberg, are to be commended for the strides which are being made in converting to the new technology, which has important implications for defense navigational and guidance systems worldwide, as well as for mapmaking.

However, the Agency does not appear to have done a systematic job of planning and anticipating the impact of the new technology on its internal organizational structure, which includes five field offices as well as its headquarters in Washington and numerous other components. The selection of the Providence field office for possible closure appears to have been made at random, independent of any comprehensive and systematic plan for integrating the new technology into the overall structure of the Agency.

Because of this lapse, I believe that all steps to close the Providence field office should be suspended. There simply is no justification for proceeding with an ill-planned action and for placing in question the future status of the 225 skilled employees. They deserve far more consideration than they have received thus far, and they are entitled to the assurance that their future status is not being determined by whim or random chance.

Had it been appropriate to do so, I was prepared to move in conjunction with my able and distinguished colleague, Senator CHAFEE, to amend the pending bill to direct the Defense Mapping Agency to suspend all plans

for closing facilities until Congress has had the opportunity to review a detailed and comprehensive plan for integrating new technology into the structure of the Agency. Because the Armed Services Committee is opposed to legislative management of proposals to close defense installations, we are withholding our amendment at this time.

However, in doing so, we record our concern and our intention to seek administrative relief from the Department of Defense. The Secretary of Defense has a clear responsibility to review this matter and to insist that structural changes in the Defense Mapping Agency are undertaken only in a framework of prudent organizational planning.

Mr. CHAFEE. Mr. President, I join my distinguished colleague from Rhode Island in expressing my deep concern about the Defense Mapping Agency's apparent intention to close its Providence field office in West Warwick, RI. I regret that this bill does not present an opportunity for us to offer an amendment that would block any proposed closing of the field office.

The Providence field office, which compiles topographic and navigational charts for the Department of Defense, has operated continuously since 1951. By all accounts, including that of the Director of the Defense Mapping Agency, the Providence workers form a highly skilled team that has always performed outstandingly. Since their cartography skills are not easily marketable outside the Agency, many would be forced to leave Rhode Island if the field office were closed. These workers would be able to understand the Agency's feasibility study if it were looking at all options for best consolidating the Agency. Unfortunately, the Agency seems to have singled out the Providence office as their only candidate for termination, without any good explanation and despite the fact that this office has always been and can continue to be a great asset to the Agency.

In this regard, there are several important points to keep in mind;

First, although Defense Mapping Agency officials claim to be looking at the proposed closing of the Providence field office as part of a big cost-saving push involving the entire agency, they are not conducting any similar feasibility studies at any of their other five facilities.

Second, Agency officials initially claimed that the main reason for the proposed closing was that the current facility in Rhode Island has neither the electrical nor the floor loading capacity to handle their new, heavy computerized equipment. Recently, however, local town planners have demonstrated that this is not the case. And the landlord at the current facility has expressed his willingness to discuss modifications which would make the facility suitable.

Third, the proposed change is billed as a cost-saving measure, yet the fact is that on August 1, 1983, the Agency signed a 10-year lease for their current facility, at $485,000 per year. Thus, closing the facility will be a very costly move for the Department of Defense.

Fourth, the Director of the Defense Mapping Agency has said that he plans to explore every option for keeping the Providence field office open. His main concern, as expressed to me, was that constructing a new, suitable facility in Rhode Island would cost about $18 million, and he knew of no existing, available facilities that could serve as substitutes. Those conducting the study were shown an available facility in the same town which meets all of the Agency's requirements; however, I am concerned they are not seriously considering it.

It has been pointed out that centralization of our mapmaking facilities would not be in the best interest of national security. If all of mapmaking facilities are consolidated to a few locations, it is arguable that in the case of an attack, we could be without this vital service.

In the face of the fact that there are strong arguments for keeping the Providence office of the Defense Mapping Agency open, particularly in view of its excellent record, I remain deeply concerned over the way the Agency's feasibility study has been conducted. Since the study will be completed next month, I believe it is very important that the DOD step back, suspend the feasibility study and realize the wisdom of keeping the Defense Mapping Agency in Rhode Island.

I will continue to press the Department of Defense to review this matter at the highest level.

Mr. DURENBERGER. Mr. President, we have spent a considerable amount of time on this floor debating the Defense authorization bill for fiscal year 1988. The stakes associated with this bill are high: Approximately one third of all Federal spending, about 6 percent of the gross national product, and the security of the United States depends on the decisions we will make.

As chairman of the Select Committee on Intelligence, I would like to point out the importance of intelligence for these decisions, and, in particular, for decisions affecting the acquisition of weapons systems.

Intelligence for defense acquisition is produced by a number of agencies funded under the General Defense Intelligence Program, part of the National Foreign Intelligence Program. In the present system, each of the armed services generally produce their own intelligence for the weapons they propose for acquisition. For example, the Air Force develops the assessment of Soviet missile defense that are used to design the B–1B and Stealth bombers.

As I see the problem, intelligence for defense acquisition should serve two purposes. First, this intelligence should enable defense planners to build the best weapons possible. That is, if we have decided to build a new bomber, then we should make sure that we have the intelligence that will tell us how to build the bomber so that it can penetrate Soviet defenses effectively.

This part of the acquisition cycle seems to work well. Program managers work hard to make sure their weapons can beat the opposition. These managers usually designate red teams within their staffs, who then put themselves in the place of Soviet military leaders and try to think of how the system under development could be defeated. By the time most U.S. weapons reach production, they are, in a sense, already veterans of many wars.

The other purpose intelligence plays in the acquisition cycle is to tell defense officials which of several weapons is the best choice for meeting a given threat. For example, if the mission is to deliver a nuclear warhead to the Soviet Union, this intelligence should suggest whether the best choice is a bomber, or a ballistic missile, or a cruise missile, or perhaps some other vehicle.

I must admit that this part of the acquisition process does not seem to work as well. As I said before, the armed services usually develop their own threat assessment. Sometimes they are even developed by the company building the weapon. As one might understand, the Navy is reluctant to develop intelligence that shows aircraft carriers are a less efficient way to deliver bombs to Bering Sea ports than are manned bombers—just as the Air Force is reluctant to develop intelligence that might suggest that sea-based cruise missiles are better at beating Soviet air defenses than are bombers.

This is only natural. Program managers have many incentives to develop the intelligence necessary to make their weapon the best possible. They have few incentives to develop the intelligence that might kill their program by showing that a better alternative exists.

There are also other problems in the use of threat assessments in defense acquisition today. Many threat assessments are introduced into the acquisition cycle too late to do much good.

The acquisition of a major weapon system today, by law, is said to go through three phases: A first phase, in which the basic concept of the weapon is defined; a second phase, in which the design of the weapon is developed;

and a third phase, in which the weapon is actually manufactured and deployed. Under current law, the first formal requirement for developing a threat assessment to support the acquisition of a weapon occurs at the end of the first phase, when the concept of the weapon is determined. It is true that only a small amount of money will have been spent by that point; paper-and-pencil studies are cheap. Yet, the truth is, by defining just the basic concept of a weapon, one will have determined fully 70 percent of its entire lifetime costs before any assessment of the threat is required.

One might ask, "Does this really matter?" Plainly, it does.

Take one recent example, the Army's divisional air defense gun, or, as it was known, the "DIVAD."

The Army spent 7 years and $1.8 billion developing the DIVAD. As most of the Members will recall, the Defense Department canceled the DIVAD last year just after it entered production. Secretary Weinberger claimed at the time of the cancellation that DOD's decision was based on the fact that the DIVAD lacked the range of fire necessary to shoot down Soviet helicopters. The helicopter could remain out of range and destroy U.S. forces using stand-off missiles.

Why didn't the Army know about the Soviet helicopters? The Chief of Staff of the Army, Gen. John Wickham, recently met with some reporters and discussed the matter. General Wickham admitted that a mistake had been made, and said that there must have been, to use his words, "some disconnect" between the intelligence community and the Defense Department, at $1.8 billion, that was some disconnect.

In truth, what happened was that the DIVAD was optimized against a single threat—low-flying aircraft. The gun was simply never intended to shoot down motionless helicopters hovering 2 miles away. The DIVAD could carry out its intended mission. The problem was that, when the decision was being made whether to go with the DIVAD or to build some other system instead, the defense planners had an inadequate picture of the total Soviet threat. That is to say, they had inadequate intelligence.

It is difficult to know how widespread this problem is. The Select Committee on Intelligence will be holding hearings next month, at which we will ask representatives from the Defense Department and the intelligence community to tell the members how threat assessments are developed and how they are used to support acquisition decisions.

I can say, however, that one useful step has already been taken. In the defense authorization bill for fiscal year 1988, the Armed Services Committee has proposed creating an Under Secretary of Defense for Acquistion. This Under Secretary would have the authority—and the responsibility—to insure that U.S. weapons systems are designed so that they meet U.S. requirements for national security. In this capacity, the Under Secretary will also be responsible for establishing guidelines for the development of threat assessments and their use in acquisition decisions.

Compared to the costs of a poorly designed weapon, the cost of intelligence is cheap—which, I might add in passing, is one more reason why intelligence should be given special consideration in decisions affecting spending for national security. Also, properly used, threat assessment lets us make the most of our defense dollars by aiming for the opponent's weak spots. I support the initiatives taken by the members of the Armed Services Committee and would urge my colleagues to do the same.

Mr. President, for the past few years, more and more of us have begun to recognize that, in defense as in other programs, money is necessary but it is not sufficient to ensure our security. It's as foolish to increase spending for the sake of increase as it is to cut for the sake of cutting. We have to remember that there are a number of comparatively invisible programs and an array of intangibles which, when put together, are the things which really determine whether we will have a military that is trained, deployable, sustainable, and robust enough to handle the extraordinary demands which will be laid upon it.

In many respects, the past couple of years have been very encouraging. The Packard Commission has returned its report on procurement reform, and people are beginning to understand that the management of weapons acquisition is not simply a matter of driving down the costs of hammers and toilet seats.

The Secretary of Defense has enunciated a set of principles governing the use of force which both reflect the best of military thinking after Vietnam and help to ensure that we will never again repeat that disastrous slide into humiliation.

Congress has come to grips with such issues as military compensation and recruiting standards, with the result that the young men and women now serving in our Armed Forces are some of the finest and most talented people we have seen in years.

Finally, of course, we have begun to take some basic steps toward achieving a more rational system of planning, coordination, and command through the adoption of the JCS reorganization bill.

Are these signs encouraging? Yes. Are they enough? Certainly not.

I hope, Mr. President, that we do not rest on our laurels. I hope that, after the burst of energy we have witnessed over the past couple of years, we do not conclude that all is now well and that we can return to business as usual. Much more remains to be done, and in the austere budget environment which we are now facing, we will be forced to make some very hard decisions about trade-offs.

Consider the issue of force structure. At the moment, we are largely locked in to enormous commitments in shipbuilding. But this year, we are likely to see zero growth at best and an actual decline at worst in our overall defense budget. If this trend continues—and it probably will—it is going to mean that every additional nuclear carrier battle group we purchase will mean several fewer sets of equipment for Army divisions. Are we really prepared to address that trade-off? Or are we instead going to take the view that we have somehow empowered the Chairman of the Joint Chiefs of Staff to impose coherence on the budget?

At a lower level, the Army is currently moving toward a structure of 17 active service divisions. Yet these divisions will be configured around as many as seven separate types: armored, mechanized, motorized, light, airborne, airmobile, and "leg" infantry. Manning these diverse structures will be tough enough, and coordinating them on the battlefield tougher still, but the problem looks nearly insurmountable when we consider the Army's personnel end strength is now fixed at 781,000. I agree strongly with those who feel that the Army should squeeze more fighting power out of its people by trimming its "tail" in order to sharpen its "teeth." But at some point, we have to ask whether we aren't getting too much of a good thing. Are we prepared to ask that question? Or will we let the Army pursue its traditional "mobilization mentality," a mentality which emphasizes form over substance in the belief that it can fill out its understrength units when a crisis draws our attention?

At a still lower level, we continue to face the severe shortages of prosaic but vital equipment which must underpin every armed force. As a recent editorial by David Evans, a newly retired marine lieutenant colonel, makes clear, we continue to be hampered by deficiencies in such elementary items as a decent bazooka for the infantry; secure antennas for our tactical radios; or water cans which are lightweight enough to be carried by tired troops. As one who served a number of years in the Army, I am struck by Colonel Evans' description of so basic an item as the new helmet. Everybody I knew hated the old steel pot when forced to wear it, and few of us really believed

that it would actually keep us alive if it were struck by a bullet. But it did serve its basic purpose, and it was adaptable as a cooking pot, a shaving basin, and a small pail. The new helmet, as Colonel Evans points out, can't even be worn without first spending 30 minutes adjusting the headband.

This is perhaps a trivial example, but it was one which struck home. At a more serious level, I must ask myself why it is, after all these years of experience, that the armed services can't agree on such basic items as a common means of sharing data; a common radio for air-to-ground and ground-to-air communications; a common architecture for tactical intelligence; a common plan for airlift and sealift.

Problems like these are not new. As Arthur Hadley has made clear in his most recent book, our armed services have traditionally had great difficulty working together in joint operations because of interservice differences, and have often ignored such basics as logistical support or intelligence support because of intraservice problems. Lest we think that such difficulties are unimportant, we should remember that it was difficulties of this sort which contributed to the disaster at Desert One, which contributed to casualties in Grenada, and which were singled out by the Long Commission investigating the deaths of some 240 marines in Beirut.

In short, Mr. President, we have done much in the past few years, and the military services have themselves made great strides both toward modernizing their forces and improving their skills. I am particularly pleased that the Air Force and the Army have signed a long memorandum of agreement on common missions and joint doctrine.

But for all the progress we have made, much remains to be done, and it is distressing how much of this represents issues and problems which are decades old.

It is now common wisdom that the enormous surge in our defense budget which began in 1980 is tapering off. Most of us recognize that this will impose some tough choices with respect to the procurement of major systems—the MX or SDI or the B-1 or new aircraft carriers.

But our task is to do more than simply weigh the merits of major systems. It is to look deeper, to address the difficulties of joint operations, of sustainability, of micromanagement.

Reform of the Joint Chiefs of Staff is a vital step in this direction, but it is not sufficient in its own right. Moreover, we must always remember that simply because Congress has shifted some boxes around in an organizational diagram, this is no guarantee that the reform will achieve its goals. Powerful organizations have a tendency to resist change as long as possible, and then to adopt only the trappings of change once action is mandated. That's why so many of the most eloquent spokesmen for organizational change—people like Gen. David Jones or Gen. Bruce Palmer—seem always to have argued their case after they left the military, not while they were serving.

Many years ago, another reformer, the Civil War hero Emory Upton, wrote of his frustrations in trying to rationalize the Department of the Army. In particular, he found it difficult to convince people that work needed to be done, and that once done the effort needed to be sustained. His words should provide us all with some caution. He wrote:

> Ultimate success in all our wars has steeped people in the delusion that our military policy is correct and that any departure from it would be no less difficult than dangerous.

Today, we debate the defense authorizations bill while basking in the sunlight of the JCS reform measure. We look with understandable pride and satisfaction at the quality of the people now serving in our Armed Forces. We remember with gratitude those who reminded Muammar Qadhafi that our patience has limits. In short, we have reason to feel good.

But let us not feel so good that we ignore the need for more effort. Much remains to be done, and doing it will be difficult. But as General Upton reminds us, our failure to do what must be done will be dangerous.

Mr. DODD. Mr. President, I rise in support of S. 2638, the fiscal year 1987 Department of Defense authorization bill. We have spent 6 long days on this bill and these days, when the Senate so often gets mired in all kinds of legislative gridlocks, 6 productive days spent with meaningful debates, making continuous progress, is rare indeed. I hope it is a sign that television coverage will force us to tidy up our work habits and use our time more productively.

The other reason for this unusual expediency has certainly been the outstanding management team that shepherded this legislation through the floor. The Senate is fortunate to have had the Senator from Arizona and the Senator from Georgia as, respectively, the chairman and the ranking minority member of the Armed Services Committee. Their unquestioned expertise in military matters matched by legislative skills of similar caliber have given them the necessary authority to keep the Senate on track until the completion of the business.

Mr. President, as is always the case with a legislation of this size and complexity, I like many of its provisions and dislike many others. Overall, however, I have found less in it to be unhappy about than in some earlier years. Perhaps the severe budget crunch that we are facing made us more careful in allocating our funds. Indeed another general observation I can make about this year's authorization debate was that the level of acrimony and partisanship was considerably less than in some previous years. I hope this can be the standard for the future.

To raise a few thoughts about specific points in this bill I am not very happy with the overall funding level, no growth above the rate of inflation. It could hardly be otherwise, though, as the size of the deficit and our attempt to cope with it, the Gramm-Rudman legislation made it virtually impossible even to consider anything above a 1 to 3 percent real growth. My objection is of a longer perspective. I opposed the excessive growth rates of the early 1980's precisely because I was convinced that that rate was not sustainable, and the steep increases would inevitably be followed by equally steep declines. I would much prefer a sustainable, moderate, real growth of about 3 percent to this roller coaster ride that is terribly wasteful as it upsets the economies of scale whenever production schedules have to be revised to accommodate necessary funding reductions. We must find a way of thinking ahead institutionally.

To speak of another shortcoming in this bill, I wish the Senate had had a stronger inclination to express its sense of urgency on the important goal of arms control. I was pleased that the Senate has confirmed its commitment to the ratification of the two unratified treaties on nuclear testing and to the idea of negotiating a comprehensive test ban. It was also reassuring that the Armed Services Committee itself felt the need to include a sense of the Senate provision on the desirability of our continuing compliance with the provisions of the SALT II Treaty. I hope the administration will give sufficient weight to this recommendation.

On the negative side I was surprised and disappointed by the defeat of the proposal to continue the moratorium on antisatellite [Asat] weapons. Similarly, it is probably more than just bad luck that within about 2 years we had the third vote that was decided by the vote of the Vice President in favor of chemical weapons.

On the question of funding the SDI Program I voted with 48 of my colleagues to restrict it to a 3-percent real growth for this year. It is unfortunate that even the more generous proposal of 15 percent growth was too low for a majority of the Senate. I only hope that the committee mark of 28 percent growth which became the bill's final figure will prove to be a manageable and fruitful investment, though I have strong doubts on that score.

I proposed an amendment to the bill to provide relief for the troubled ball bearing industry whose importance for our defense industry hardly needs to be emphasized. Although the managers thought that this subject was too large to be handled in an amendment to the authorization bill I was satisfied by the offer of the managers to hold a hearing on this important subject in the Preparedness Subcommittee shortly after the convening of the 100th Congress.

Another amendment I proposed was passed unanimously by the Senate. Its aim was to increase individual responsibility for fraud and other felonies committed while performing a contract for the Department of Defense. The amendment raised from 1 to 3 years a prohibition on the employment of those convicted of such felonies in any supervisory or management position with a defense contractor.

One great anxiety that I have with respect to this year's defense budget concerns not this bill but rather its House counterpart. I am referring to the ill-advised decision of the House to delete the Trident submarine from this year's budget. I would have a hard time to think up a more irresponsible move with respect to our strategic deterrent forces. Of the three legs of the strategic triad it is only the sea-based leg, our strategic missile submarines, that we can have full confidence in at this point. The controversy about the MX Program, about the Midgetman Program, and the debate between those favoring one of these against the other is a good indication of the uncertainties surrounding the land-based force. Similarly, questions about the penetrating ability of the B-1 bomber, the progress the Stealth [ATB] Program is making, and the B-1 versus Stealth dispute highlight the shortcomings of our airborne deterrent. It is only the Trident Program where we are totally confident of the capability and the reliability of the weapon system. I ask my colleagues, does it really make sense to tinker with this system?

The Tridents are assembled in my State, Connecticut, and I never apologize for speaking up in defense of the livelihood of my constituents. I want to tell my colleagues, however, that, according to the last data I have seen, my State is only at fifth place in its share of the Trident funds. California, Massachusetts, Minnesota, and Pennsylvania each ends up with a higher share of the funds expended on the Trident Program. So even on the jobs front this is not a local concern. Nevertheless, I am not phrasing my warning in terms of a job issue. The defense budget is not, should not be, a jobs bill. My warning should be understood and judged in terms of what damaging the Trident Program, derailing its construction schedule can do to the defense of our country, our national security. For many years now, the Tridents are produced on schedule, under cost, and in superb quality. Let's keep it that way. I cannot implore our conferees strongly enough to assure that the Trident remain in the budget after the conference.

Mr. President, I agree with the managers that this is one of the most important bills that we pass in this Chamber. The very first objective of our Government is to preserve the physical and moral integrity of our Nation, preferably by maintaining peace, but, if needed, by using force. This is what this bill is all about. I think the Senate did a good job under the circumstances and I congratulate again our managers for a superb job. With my reservations notwithstanding I vote for this piece of legislation with confidence and urge my colleagues to do likewise.

### CONGRESSIONAL CALL FOR AN END TO NUCLEAR TESTING

Mr. MATHIAS. Mr. President, the Congress has called for immediate steps to bring an end to nuclear testing.

Two days ago the Senate with the affirmative votes of 64 Senators urged the President to immediately resume negotiations toward a comprehensive test ban and to seek ratification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty. Just yesterday, the House of Representatives passed legislation that would prohibit nuclear tests above 1 kiloton as long as the Soviet Union accepts the same threshold and agrees to stringent verification measures.

These two actions send a clear message to the President that the time has come to seek an end to nuclear testing. A Gallup poll taken on June 8 shows that a clear majority of Americans favor a nuclear test ban. I hope the administration will respond to this sentiment and join with the Congress in a common effort to terminate nuclear testing.

For the past year, the Soviet Union has observed a unilateral test moratorium. The United States has not reciprocated. The United States has also rejected repeated Soviet offers to resume those negotiations despite overwhelming congressional support for such action. It is not clear whether the Soviet Union will continue to observe its nuclear testing moratorium in the face of ongoing United States nuclear testing and continued refusal to resume test ban negotiations. But I would urge the Soviet Union to extend its moratorium at least until we can determine the outcome of the recent action taken by Congress. It is now certain that the President will receive legislation that contains strong language in support of efforts to achieve a comprehensive test ban.

I also urge the President to respond to the calls of Congress and the American people to take immediate steps toward ending nuclear testing. I have great hope that negotiations on a comprehensive test ban could produce an agreement that would lead to a more secure world. But we will never know if a world free of nuclear testing can be realized if we refuse to talk to the Soviets about this critical issue.

We have the technology to verify a test ban and the Soviets seem prepared to allow onsite monitoring. The time for talking has arrived.

Mr. PELL. Mr. President, I will support the passage of S. 2638, the Department of Defense authorization bill for fiscal year 1987, but I do so only with reluctance and reservations.

Unfortunately, the bill is especially flawed with respect to the provisions relating to arms control.

Consider some of our actions in this area:

We have decided to lift the current ban on tests of antisatellite weapons against objects in space, by rejecting a measure that would have held off such testing by the United States as long as the Soviets also refrain.

We have contented ourselves with a most restrained reaction to the President's decision to abandon compliance with SALT restraints.

We have decided to move ahead with the production of chemical weapons despite the questions about the clear technical problems with the new weapon, despite its questionable military value even if the weapon works, despite the unlikely prospect that our allies will ever accept these weapons on their soil, and despite the probability that production will further diminish prospects for a chemical weapons ban.

We have authorized funding for the strategic defense initiative at a level which will assure substantial waste at a time of astonishing deficits.

Notwithstanding these flaws in the arms control provisions—and I would be much more enthusiastic if those sections of the bill were not flawed—I shall support the overall bill because I believe that on balance it represents another move in the direction of belt-tightening for the Department of Defense while still maintaining the strength of our conventional forces.

I am particularly pleased that the committee saw fit to trim the President's request by $25.4 billion in budget authority and $10.7 billion in outlays, and I hope there will be further trimming as a result of compromise with the House.

I especially support those elements of the bill which sustain a strong Navy, and I am very pleased that the bill makes provision for another *Ohio* class Trident submarine, which I hope will be built by Rhode Island workers.

And I was happy to support the Navy's proposal for strategic homeporting, representing as it does an endorsement of the very principles of dispersal which Senator Pastore and I joined in arguing, unfortunately without success, when the Navy withdrew from the Northeast seaboard in the early 1970's.

There is also, I should note, a postive side to the arms control provisions, notwithstanding the objections I have already registered. We have affirmed our support for ratification of the 1974 Threshold Test Ban Treaty and the 1976 Peaceful Nuclear Explosions Treaty, as well as resumption of negotiations on a comprehensive test ban treaty. And now the House has enacted an even stronger provision which would impose a 1-year moratorium on our tests if the Soviets do the same and allow onsite verification. It seems to me that in this area, the Congress has sent a message the administration would do well to heed.

I might just note, in conclusion, that the administration's record on arms control after 5 years is essentially nil. It has been clear that the Congress must be actively involved if there is to be meaningful progress leading to good agreements. Unfortunately, I have to conclude that we have bypassed important arms control opportunities. We should have sent a far stronger message to the administration not only that the Congress will stand with them if the present dialog leads in a productive direction, but, more signficantly, we will hold them to a high standard and insist that they put the Soviets to the test. We should tell the Soviets to put up or shut up. I hope that may happen in the next several months. I believe, however, that success would be much more likely if it were clearer that Congress wants arms control and is willing to insist that the administration do its utmost.

It is defensible if we do our utmost to achieve mutual and verifiable arms control but fail because the Soviets don't come through; it is indefensible if we content ourselves with talk and don't really try at all. Regrettably, there is no reason now to expect that our efforts so far in this decade will fare well when the history books are written.

STRENGTHEN U.S. SECURITY AND STAY WITH SALT

Mr. BUMPERS. Mr. President, a very important provision in this DOD authorization bill has gone virtually unnoticed, yet it sends a critical message to the White House and the world. This provision, section 1211 of the bill, says that the United States should continue to remain within the numerical sublimits of SALT II as long as the Soviets do. With the inclusion of that language in the bill, my colleagues Senators LEAHY, CHAFEE, and HEINZ and I have concluded that it is unnecessary for us to offer our amendment on SALT to this bill. But it is my strong hope that the administration will heed this message, endorsed by the tough-minded Senate Armed Services Committee and soon by the entire Senate, to stay with SALT II.

In 1984 the Senate supported this policy by 82 to 17, the first time we introduced our resolution. And everyone here, and in the White House, knew about Soviet violations then. In 1985 the Senate supported this policy by 90 to 5, and we supported the President's decision to dismantle that first Poseidon sub by 79 to 17. We knew all about the Soviet violations then, too.

Nothing has changed. The arguments for continuing SALT are just as compelling now as they were last year: It will enhance United States and allied security to stay within SALT's numerical limits, and it would dangerously weaken our security to break out of those limits. No one believes that SALT should last forever, but it makes no sense to get rid of SALT before we have something better to take its place. Until we get a new agreement, keeping SALT in place helps our military interests, it helps the Geneva negotiations, and it strengthens NATO.

Everyone wants success at Geneva, and we're more likely to get it if there are at least some restraints in place. Senator WARNER put it very well when he told a Washington Times reporter late last year that extending the SALT II agreement would be "conducive to continuation" of the arms control talks between the two countries. "A sharp turn away from that policy could well be detrimental to the atmosphere in which these talks are being conducted."

Even more important, SALT helps our security because it forces the Soviets to dismantle weapons that they otherwise would keep deployed. This is a key reason why the salt no-undercut policy has been consistently supported by the Joint Chiefs of Staff.

SALT supporters recognize the problem of Soviet violations and recommend steps to deal with it. SALT opponents almost never acknowledge what the Soviets have dismantled to keep within its limits. The facts are, the Soviets are continuing to dismantle missiles today to comply with SALT. Since 1978, the Soviets have dismantled 14 operational missile firing Yankee-class nuclear submarines, 4 in the last 2 years, to comply with SALT I's offensive limits, which technically have expired, and they continue to do this.

According to the Congressional Research Service, Soviets have dismantled 70 SS-11 ICBM's and 15 Bison bombers in the last year to compensate for the deployment of SS-25 missiles and Bear-H bombers. In fact, the Soviets have dismantled well over 500 operational missiles to comply with SALT.

The United States, by contrast, has had to dismantle only 48 operational missiles to comply with SALT. And if you believe the President, he ordered the dismantling of the latest two Poseidons for economic reasons, not for SALT, so the U.S. figure is actually just 16 missiles.

If we continue with SALT through 1987, the Soviets would have to dismantle about 10 times as many missiles as the United States, about 300 versus 32. Furthermore, the Poseidon subs to be scrapped for SALT would reach their 30 year life limits and have to be dismantled anyway in the early 1990's.

If we junk SALT, the Soviets will not have to make any of these reductions. Furthermore, they would be free to add up to 20 more warheads on each of their 308 SS-18 ICBM's, adding over 6,000 warheads to their totals. They could build still more SS-18's. They could easily exceed the SALT II limit of 820 MIRV'd ICBM launchers (since they now have 818), and are getting ready to deploy their new MIRV'd SS-24 this year.

Indeed, SALT II is about to have the biggest impact on the Soviets that it ever has. It is about to force the Soviets to begin dismantling the weapons that everyone agrees are the most destablilizing: MIRV'd, silo-based ICBM's. The Soviets will have to dismantle one SS-17 or SS-19 for every SS-24 they deploy. But if we junk SALT, they won't have to.

The fact is, opponents of SALT are unwittingly supporting the Russian SS-17 and SS-19 ICBM's. Why should we scrap SALT and allow the Soviets to keep more MIRV'd ICBM's than they otherwise would? This makes no sense at all. The Congressional Research Service estimates that the Soviets will have 10 SS-24's deployed by the end of this year. That means that unless we save SALT, the Soviets will have eight more MIRV'd ICBM's pointed at the United States than they otherwise would with SALT. And the numbers rapidly go up from there, as the Soviets deploy more SS-24's, more Typhoon and Delta IV submarines, and more SS-25 ICBM's. I ask unanimous consent that a factsheet describing the SS-17 and SS-19 ICBM's, that some people apparently want the Soviets to be allowed to keep, be placed in the RECORD at the conclusion of my remarks.

Some say the Soviets won't build up if we scrap SALT. The CIA doesn't agree. Last June they told Congress:

> While the Soviets would not necessarily expand their intercontinental attack forces beyond some 12,000 to 13,000 warheads . . . They clearly have the capability for significant further expansion, to between 16,000 and 21,000 deployed warheads by the mid-1990's. The lower figure represents a con-

tinuation of recent trends in deployment rates; the upper figure is not a maximum effort but would require a substantially greater commitment of resources.

The Pentagon publication, "Soviet Military Power 1986," says much the same thing, as does the Congressional Research Service, which has also studied this problem.

So if we junk SALT, the low end estimate for the mid-1990's is 3,000 to 4,000 more Soviet warheads, and the upper end estimate is 8,000 to 9,000 warheads. Why would we want to give the Soviets an opportunity to add these extra warheads? And who would feel safer as a result?

Perhaps if SALT kept us from doing something very important to our security it would be different. But it doesn't. SALT doesn't stop us from doing any part of the President's Strategic Modernization Program except Midgetman, and that is one proportional response that everyone agrees we should take for the SS-25.

In reality, the Soviets have many incentives to expand their warhead levels. Big increases in Soviet warheads would be a logical response to our Midgetman Program, because the Soviets could then try to barrage the area in which Midgetman would be deployed. More warheads would also help them in attacking our subs and bombers, too.

More Soviet warheads is also a logical response to our Star Wars Program. It's what we did in late 1960 as a response to Soviet ABM developments. And more Soviet warheads will mean a proportionately greater cost for star wars. There is little question but that if we built SDI, the Soviets will try to overwhelm it, not just with decoys, but with real warheads.

Every single one of our allies strongly support SALT, and every single one of them oppose our scrapping it. Every one of our NATO allies endorsed SALT II back in 1979, and they do so today. Listen to Hans-Dietrich Genscher, West Germany's Foreign Minister, as quoted by Stern magazine:

At the Lisbon NATO Conference in June we supported the United States Sentiment of commitment to the SALT II treaty, although it was never ratified. Because it is very difficult to make new agreements in arms control, it is all the more important to most carefully preserve existing treaties and adhere to them.

And at the NATO foreign ministers meeting in late May, it was reported that if a vote had been held on the President's new SALT policy, the vote would have been 15 to 1 against the United States.

Rejecting SALT now, before we have a new arms agreement in place, will be a body blow to the NATO alliance, and will give the Soviets a propaganda field day in Europe. The administration's decision on SALT is the worst blow that NATO has suffered since Caspar Weinberger talked about fighting a nuclear war limited to Europe.

Some say that because the Soviets have violated some of SALT's provisions we should junk the treaty. Ending SALT will not stop the SS-25, or Soviet missile encryption, or the Krasnoyarsk radar. All it will do is legalize them.

It's like saying that the best way to curb crime is to repeal the criminal code. It doesn't stop crime, it just legalizes it. Soviet violations are not militarily significant, and are essentially the same violation the United States plans to commit. Nevertheless, violations, no matter how small or big must not be disregarded, ignored or down-played. In this case we have a method of dealing with these violations and we should do it.

If these violations are not corrected or additional violations are committed the SCC doesn't satisfactorily resolve them. Or we can resolve them satisfactorily by direct negotiations, then we can either respond in kind or scrap the treaties. But for the moment, we would be the big losers by abandoning SALT II. The House of Representatives said as much in a recent vote by an overwhelming margin.

The President says it bothers him to be abiding by a treaty for 7 years that was never ratified. Well, we've been abiding by the Threshold Test Ban Treaty for 12 years and it hasn't been ratified either.

The President last year said that "appropriate and proportionate responses to Soviet noncompliance are called for to ensure our security." And he was right. What are such responses? Well, according to Secretary Weinberger, the Joint Chiefs believe that just continuing our current strategic modernization program constitutes the best response. But instead of following this sound military advice, the President's idea of proportionate response is to junk the entire treaty. That is a disproportionate response. The President ignored his own good counsel of last year. And unless that policy is changed, U.S. security will suffer because the Soviets will have more warheads than if we stayed with SALT.

Mr. BYRD. Mr. President, as the Senate completes consideration of S. 2638, the National Defense Authorization Act for Fiscal Year 1987, I urge my colleagues to approve this legislation.

I commend the managers of this bill—Chairman GOLDWATER and Ranking Minority Member NUNN—for their skillful achievement in guiding this detailed and lengthy legislation through the extended committee and floor deliberations.

All of us in the Senate, and the American people as a whole, owe a debt of gratitude to both Senators—and to all the members of the Armed Services Committee on both sides of the aisle—for completing so successfully their arduous responsibilities to review and reshape, for full Senate deliberation, the fiscal year 1987 Defense budget.

In this regard, Mr. President, there are no words eloquent enough to describe adequately the magnitude of the debt we all owe to Chairman GOLDWATER, not only for his contributions this year to U.S. national security, but for those many, many contributions he has made every year since he first entered the Senate.

It is difficult for me to acknowledge that this is Senator GOLDWATER's last year in the Senate, and that this bill we are about to vote on is the last annual Defense Authorization Act which will bear the direct, personal stamp of our beloved colleague.

The Senate will be the poorer, and the quality of the Senate's future deliberations on national security matters—while informed and influenced by many talented colleagues—will be diminished without Senator GOLDWATER's valuable and unique personal contributions.

I hope our distinguished colleague from Arizona, whose wit, wisdom, and humor all are renowned and appreciated, especially for their keenness, will honor us with his insights into defense matters when we ask his advice, even in his retirement.

Mr. President, the legislation before us is a tribute to Chairman GOLDWATER, because it represents an annual Defense program which will maintain and improve our national security.

This legislation also seeks to honor Chairman GOLDWATER's leadership and long service to the Nation by means of a provision establishing the Barry Goldwater Scholarship and Excellence in Education Foundation. This foundation will recognize the chairman's long-standing special interest in the quality and extent of science and mathematics education in the United States.

Our distinguished colleague from Arizona long ago recognized the importance to the national security and economic strength of the United States of improving our technological leadership.

Endowed by a $40 million trust fund, the Barry Goldwater Foundation will seek to maintain and expand America's technological advantages in two ways: By providing scholarships to outstanding undergraduate and graduate students in the fields of mathematics and science; and by providing honoraria to outstanding individuals in secondary schools who have made significant contributions to improve the quality of instruction in these fields.

It is a fitting testament to the distinguished chairman.

Mr. President, this bill represents a good faith attempt to satisfy the many competing budget and program claims on our scarce defense dollars.

There always will be honest differences among Senators on national security matters. That is to be expected with such a complex, and important, subject matter which affects all Americans, perhaps all the world's citizens.

For example, some of us might prefer that this complicated legislation has resulted in a different balance among the many legitimate defense priorities which must be met.

Some of us might believe that a better balance could have been struck between adequately funding and improving our conventional forces, and maintaining a necessary strategic nuclear deterrent.

Others might hold that this balance could have been struck better between funding the longer term procurement accounts and the daily combat readiness accounts. Still others will differ about the policy judgments in such disparate areas as arms control, procurement reform, and personnel policies.

However, on balance, this bill is a good bill—one which was produced through a healthy clash of views, and votes, and one which deserves the Senate's final approval.

I also note that this is the last defense budget authorization bill for another member of the Armed Services Committee—someone who also has made valuable contributions to improving our national security posture, and the country's thinking about military issues.

Our distinguished colleague from Colorado, Senator HART, was at the forefront of the military reform movement long before it became popular to challenge the established way of thinking about arms and armaments.

Long before there even was a recognized military reform movement, Senator HART was posing thoughtful questions and imaginative answers about the way we should organize our Armed Forces and our Defense Department to maximize military efficiency and effectiveness.

Mr. President, during the Senate's consideration of S. 2638, this legislation was strengthened in several ways by amendments from Senators on both sides of the aisle. I am particularly proud of many of my democratic colleagues, whose efforts—both successful and unsuccessful—to improve this legislation enhanced the quality of the Senate's national security deliberations, and the final outcome, in major ways.

Mr. President, much of the Senate's debate on S. 2638 focused on the dollars and cents of specific weapons procurement and research and development programs. Important policy statements and decisions ranging from nuclear testing arms control, to Pentagon acquisition reforms, to command structures for special operations forces, were discussed.

The bill, as reported from committee, also contained hundreds of other program funding decisions and statements of policy which the full Senate endorsed without debate. The fact that those decisions were approved by the Senate without comment makes them no less important and meaningful.

Particularly significant in this regard is the policy statement expressing the sense of the Senate that it is in the national security interests of the United States to continue voluntary compliance with strategic offensive arms agreements with the Soviet Union—by recognizing the central numerical sublimits on strategic systems in those accords so long as the Soviets comply with such sublimits.

Approval of the fiscal year 1987 Defense Authorization Act by the full Senate will place this body, which, under the Constitution, is a coequal partner with the executive branch in the treatymaking process, firmly on record in favor of continued U.S. compliance with the SALT accords.

Since the President seems determined to embark on a policy of abandoning U.S. compliance with SALT's central numerical sublimits—a policy fraught with many possible dangers to the United States and its allies—I hope he heeds the words of the full Senate and reconsiders his questionable course.

However, as important as all these specific policy statements and programs decisions are to our national security, it is reasonable to ask whether they sufficiently address the fundamental defense questions which Congress and the executive branch should confront if these many separate decisions—taken together—are to yield the most effective defense posture at an affordable cost.

Congress can vote billions of dollars each year for the defense budget, but if it authorizes and appropriates this money to continue business as usual in the way we think about, organize, develop, deploy, and manage our Armed Forces, there is reason to believe we will obtain far less security dividend than our taxpayers deserve for their large investment.

Many experienced and reflective military professionals and civilian defense experts have either written or spoken about the need for further reform of the Pentagon, the Armed Forces, and the basic philosophies we apply to national security.

The latest of these individuals to bring his views before the public is David Evans, a newly retired Marine Corps lieutenant colonel, combat veteran, and military planner in the Pentagon. On Sunday, August 3, 1986, the Washington Post editorial section ran a lengthy article entitled "We Still Don't Have the Arms and Tactics for a Major War," by Colonel Evans.

I do not agree with 100 percent of what Colonel Evans has written, but his observations and conclusions are provocative and important. They certainly deserve careful consideration by the Senate, and I commend this article to my colleagues.

Colonel Evans presents several major conclusions and raises disturbing, probing questions:

First, after stating an often forgotten fact that war—at least the ground combat without which no nation can achieve its war aims—"Remains very simple, direct, and brutal," he asks "Whether we are overdesigning forces that cannot win wars."

Second, he contends that "the American military is stuck in the rut of ingrained and comfortable habit," and that "too many of the lessons learned painfully years ago remain uncorrected."

Third, the design and complexity of American weapons result in systems too vulnerable on the battlefield and so rigid in their requirements for perfect operating conditions, and perfect operations, that "anything less than perfect execution can upset the game plan." Colonel Evans has concluded that less finely tuned weapons are "more forgiving (of mistakes) especially under the terrific and often unpredictable strains of combat."

Fourth, Colonel Evans questions, as have others, whether the military's peacetime planning for war is realistic enough, since he believes it has resulted in equipping our ground troops with some less-effective key weapons, and insufficient quantities of necessary ammunition. He also worries whether our peacetime combat exercises lack operational realism, thus, representing inadequate preparation for the extreme, harsh realities of actual combat.

Fifth, our command and control organization for ground combat is overcentralized, with too many decisionmakers too far removed from the front lines. "The swirling nature of a mechanized war of movement, slugged out at the small-unit level, calls for on-the-spot decisions. Leaders at the head of their troops will see more and react more quickly than their commanders in the rear," this 20-year veteran writes.

Sixth, Colonel Evans bemoans the American penchant to develop and procure weapons which embody revolutionary, not evolutionary, leaps in capability—a predilection which "aggravates technical and cost uncertainties. A vicious cycle of unrealized expectations and explosive cost growth is the usual result, with readiness cut-

backs and smaller forces in the field," he states.

Finally, Colonel Evans delivers a harsh conclusion about a popular concept unfortunately permeating the national defense debate. He states:

Perhaps the basic problem is the easy availability of money. It corrupted a sense of reality, and distorted the focus on fighting. * * * Instead of fighting power, the wealth poured into the business of war now stands as the measure of effectiveness. * * * Mindless buying is producing a military described by one former Army General as a "force without power—and at a cost the country cannot afford.

Mr. President, I am happy to say that the Senate already has led the way in trying to address the institutional and other fundamental problems besetting our national security establishment. The "BARRY GOLDWATER Department of Defense reorganization Act of 1986" is a historic example of this initiative.

Other solid reforms have been promoted first by the Senate, and ultimately enacted into law. The bill now before us contains additional improvements to our Defense Establishment.

However, the beneficial impacts of these reforms will not be realized fully for at least a year, and as Colonel Evans' article attests, additional reforms may well be necessary and must be considered.

As we vote on final passage of the National Defense Authorization Act for fiscal year 1987, the Senate should resolve to continue this reform effort so important to the national security of the United States and its allies.

I ask unanimous consent that the article to which I referred be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 3, 1986]

WE STILL DON'T HAVE THE ARMS AND TACTICS FOR A MAJOR WAR

(BY DAVID EVANS)

When I joined the 3d Marine Division on Okinawa last year, I was issued brand new equipment. Helmet, pack, canteens, the works. It was the first time in two decades the Marines had ever issued me anything new. Evidence, I thought, that the huge spending increases for defense were finally having an effect. Hard goods were trickling all the way to the tip of the national security spear.

Then I tried to install the leather sweatband in the new German-style helmet made of Kevlar. The simple spring clips on the sweatband of yore had been replaced by fasteners with little metal loops. It took a good half-hour, armed with pliers and jeweler's screwdriver, to work the sweatband into the helmet.

It was obvious the designers of the new headgear were sublimely ignorant of the infantryman's nustic lot in the field, where vise-grip pliers and miniature screwdrivers are as rare as Faberge eggs.

The helmet is symptomatic of the kind of military the United States is producing. It is rather like the British sports cars of the 1950s. Beautiful to look at, they were nevertheless cantankous and touchy to operate. Under less than optimum conditions—like rain—their electrical systems were maddening. They stand as an apt paradigm for today's combat systems.

War remains very simple, direct, and brutal. In contrast, our latest combat systems offer baroque complexity. They require the skills of highly trained technicians to understand and maintain. As we have pushed technology, the operating tolerances of our systems have narrowed. The military is now so complex it cannot go to war without air-conditioners. Not for the comfort of the troops, mind, but to keep its delicate computers from overheating. The question is whether we are oversesigning forces that cannot win wars.

Indeed, the American military system suffers from seven deadly flaws:

The system is not self-correcting. Instead, the American military is stuck in the rut of ingrained and comfortable habit. Too many of the lessons learned painfully years ago remain uncorrected.

When the Marines staggered out of the Chosin Reservoir 35 years ago, they said the standard five-gallon water can was too heavy for troops weakened by fatigue and cold. They suggested a three-gallon, insulated model.

In those engagements, only the simple M1 rifle, with its loose tolerances and robust operating mechanism, could be kept working in the extreme cold. The temperamental carbine, with its shorter bolt movement, jammed frequently. The complicated Browning Automatic Rifle (BAR) tended to clog with ice, and the Marines urged "simplification of the weapon."

Few of the men who fought that bitter campaign had received actual experience in cold-weather operations beforehand. Those who survived commented enviously on the white cloaks worn by the Chinese, which made them all but impossible to spot.

The situation today: White parkas are in the system. Genuine progress there. But the standard water can remains the five-gallon model, uninsulated. "How we're going to get water to the troops remains a basic, unanswered problem," one colonel told me. The M16A2 rifle, with its close tolerances and short bolt movement, experienced significant failures in cold weather tests in 1984.

The Marines have prepositioned a brigade's worth of equipment in Norway, but they have not designated or trained a specific unit for cold-weather operations.

Whether campaigning in the snow or desert, American troops are likely to encounter Soviet tanks. Their ability to kill them remains dismal. Recall the Army's experience with Task Force Smith, the Rapid Deployment Force of its day, fighting North Korean tanks at Osan in July, 1950. The forward companies were overrun because the Army's 2.36-inch bazooka lacked the punch to kill a tank from the front. Today, the infantryman's last-ditch weapon is still essentially a disposable bazooka—the M72—which fires a warhead that remains too small to inflict a kill.

The Army seems to have forgotten that fighting is largely psychological, and that battles are oftentimes won or lost on the strength of perceptions. If an attacking tank is hit from the front and explodes, an entire armored attack may be halted. Nobody wants to burn to death. On the other hand, if the tank is hit and keeps coming, what incentive does the defending infantryman have to stand and fight?

We're easy targets. Three rules for battlefield survival remain unchanged since World War I: Keep a low profile, stay off the skyline, and spread out. The U.S. military is distinguished by its billboard profile. The standard M923 cargo truck is a good 10 percent bigger than the M54 truck of 1960s vintage. Yet the new truck carries the same five-ton load.

The Army's M2 Bradley troop carrier is fully 10 feet high. Crashing through the woods at Fort Benning, it looks as big as a house.

Standing out against a neutral background is worse—troops moving along the crest of a ridge, for example. There is an electronic skyline, too. Anything that sends out electromagnetic radiation—radars and radios specifically—can reveal one's position. The need to transmit has to be balanced against the risk of detection. Instead, radios have become a convenient crutch. There are about 1,100 of them in a Marine division now, filling the air with mostly routine administrative messages, advertising our positions like so many searchlights on a dark night.

Omnidirectional antennas aggravate the situation by broadcasting in every direction. Directional antennas would greatly enhance communications security. One of the more powerful tactiful radios, the AN/TSC95, does not come so equipped, and pours out its 1,000 watts of power in all directions, like one of those faceted mirrored balls that hang from discotheque ceilings. Yet a good high-gain, directional antenna can be had for a fraction of the radio's cost. Claims one signals officer, "You can buy a better antenna for the TSC95 from Radio Shack than the one that comes with it."

Contrary to the need for dispersion, the massive and more powerful electronics tend to aggregate into large headquarters complexes. A division command post looks like an antenna farm, pumping out electromagnetic radiation, as well as heat and noise from ranks of diesel generators, fairly shouting its location.

We're too complicated. The virtue of simplicity runs counter to the reigning devotion to complex weapons. Although more can go wrong with complicated systems, the U.S. military is now freighted with unnecessary complexities.

The Pentagon's approach to weapons design is a major contributor. "Cost-effectiveness analysis," says one former Army officer, "tends to drive one to single-purpose weapons because of the one-on-one simulations and the fact that special interest communities conduct the analyses." The end effect was captured in one recent report, revealing for its frankness on the matter, "All combat-vehicle programs have designed their own unique weapons stations, resulting in a significant number of singlepurpose stations with unique logistics . . . heavy demands on training, and little or no interoperability or commonality . . . between different vehicles."

The Air Force and Navy have incompatible aerial refueling systems. The Air Force flies "female" fighters; its pilots fly next to the tanker and are plugged in by the boom on the mother ship. The Navy flies "male" fighters, mounting a probe that the pilot flies into the tanker's fuel receptacle. Unless both systems are mounted on the tanker, as in the case of the new hermaphroditic KC10, or the modification kit is handy for the older KC135, the two systems are not interchangeable.

At a more fundamental level, all the players on the battlefield are not dealing in the same units of measure. Infantry units use kilometers and meters for horizontal and vertical measure, using grid coordinates to mark locations. Pilots flying close air support for them deal in nautical miles, feet above sea level, and latitude-longitude locations.

Some aviators claim the difference is trivial, as it is easy to convert from one to the other. But why convert at all? The conversion process injects an unnecessary source of error. The military adopted 24-hour time to eliminate potential confusion. The same argument applies for problems of location.

There is not enough slack in the system. We are building systems where anything less than perfect execution can upset the game plan. Loose tolerances are more forgiving, especially under the terrific and often unpredictable strains of combat. The Navy's latest air-cushioned amphibious landing craft, the LCAC, is a good example of the kind or unforgiving systems now entering service. Since the LCAC is more like a helicopter with the roof off than a boat, the latest employment manual cautions that the "spotting of cargo is critical" to stay within center of gravity limits. Three inches is the allowed tolerance. Now imagine doing this with a 60-ton tank from a heaving loading ramp at sea.

Laser-guided bombs are the current rage in high-fashion weaponry. Accurate, yes, but they present unique problems. Laser spotters held by troops on the ground generated pulsed codes. These are meant to be read by a seeking device in the nose of the bomb hung under the wing of an aircraft. Yet the ground-based spotter pulses in a three-digit code while the bomb only "recognizes" a four-digit code. So, rather than having both components use the same three- or four-digit code, the bomb's coding has to be carefully translated beforehand into a three-digit equivalent.

There is absolutely no room for error here. Not only must the laser on the ground and the seeker in the air work perfectly, the pilot must be in constant radio contact with the infantryman to ensure that the ground laser is turned on at precisely the right time. If it is turned on prematurely, the bomb will lock on too early and fall short of the target. Moreover, since the pilot has to ride right down the laser beam, he must come in directly over the soldier's back. Thus, a bomb that falls short is likely to fall on friendly troops.

We are not ready for close-in fighting. The Army and Marine Corps have adopted a three-layer approach to antitank combat: TWO heavy antitank missiles for kills beyond two miles, the DRAGON medium antitank missile for kills at about a mile, and shoulder-launched rockets at belt-buckle range.

For these weapons, they have not invested in enough ammunition to do the job. The military does not buy munitions according to wartime need, but on the basis of what share of its peacetime budget it chooses to spend on ammunition. The planned consumption rates that result are absurdly low—in intense combat, one shot every two days for the TOW, and one shot every four days for each DRAGON, for example. "I'll shoot up my allowance in the first five minutes," said one astonished battalion commander when he was informed of these planned firing rates.

Even with adequate stocks of missiles, there are problems. The TOW can be spoofed by smoke and heat. The DRAGON is notoriously unreliable. After a decade of neglect the Army is finally moving to replace the near-useless DRAGON with an effective weapon of European design, but only for select units such as Rangers.

However, few battles are won or lost at long range. Opening fire early at long range can betray one's positions, and Rommel, a master at setting antitank ambushes, repeatedly inveighed against opening fire too soon for this very reason.

The nature of the battleground probably will not allow for the distant shots, anyway. Germany, for example, is heavily wooded and urbanized, and the Bundeswehr estimates 55 percent of all targets will be sighted at less than a quarter-mile. The Soviets, too, figure roughly 60 percent of all antitank engagements will take place within a half-mile range.

Army Gen. Frederick J. Kroesen, former commander of NATO's Central Army Group, is even more conservative: "Fog . . . and smoke-generating devices in abundance lead me to believe the next war will be won or lost at the 300-meter [fifth of a mile] range, just as in the past."

It is at this vital range that American troops are most vulnerable to the unnerving psychological impact of massed armored attacks, and where they stand virtually naked. The Army and Marines are buying the AT4 shoulder-fired rocket to replace the M72. It is not much of an improvement, and is known among cynics as "The Paint-Scratcher" because it will not penetrate the frontal armor of modern Soviet tanks.

Effective alternatives are available. Yet the situation now is that Soviet tanks will be able to break through at close range, and then there is almost no limit to what they can do. They will create havoc in the rear, overrunning artillery units with impunity. The standard U.S. 155mm artillery piece, although an excellent weapon for long-range fire, cannot kill tanks at close range, as it does not come supplied with antitank shells.

We are over-centralized. The swirling nature of a mechanized war of movement, slugged out at the small-unit level, calls for on-the-spot decisions. Leaders at the head of their troops will see more and react more quickly than commanders in the rear.

"There is no inspiration in the squeaking voice made dim and quavering by a mile of [telephone] wire," said Patton. But state of the art has come to mean centralized command, and a growing family of esoteric command-and-control systems are intended to push the flow of information to the rear.

This definition from a Marine Corps handbook is instructive: "Command-and-control is an active system for decision-making where decision makers are some distance from events [emphasis added] on which their decision is based," and [significantly] "from the people who must carry it out."

Note the shift away from officers as commanders and leaders to pallid "decision makers" who, like wingless queen bees, are absolutely dependent on a rich flow of information from engaged troops who have more pressing matters than sending detailed reports to the rear. The big difference from the bunker generalship of the First World War is that what was once done with telephones lines now takes place via radio.

The on-site, personal presence of the commander remains the greatest "force multiplier" of all. Instead, he has been pushed to the rear, snuggled up to a dozen or more radios, all broadcasting like beacons telling the enemy exactly where he is.

There are signs of change, Col. Creighton Abrams Jr., commander of the Army's 3rd Infantry Division's artillery in West Germany and son of the late Army chief of staff, suggests committing each artillery unit in a sector to support a designated front-line maneuver battalion. "This violates the time-honored principle of maximum feasible centralized control of artillery," Abrams admits, "but it frees up the bottleneck" of trying to control all the artillery firing from a central location. Abrams' argument for decentralization recognizes the fast-paced nature of modern maneuver combat, where there isn't time for elaborate coordination through centralized facilities far to the rear.

*We do not push ourselves in training.* The prospect of our complex systems working in battle is not likely to be discovered in peacetime, because our units and systems are rarely stressed under less than ideal conditons. Most large-scale exercises lack operational realism. Intended to orchestrate and rehearse the complicated command relationships stemming from over-centralization, the basic systems are not challenged.

We should start field problems with a quarter instead of a full tank of gas," says one logistician, in order to pressure the supply systems from the first hours.

Despite all the Pentagon hype about Soviet numerical superiority, we do not train to deal with it. Maneuvers typically are carried out against token and hopelessly outnumbered enemy forces. Although battalion commanders are admonished they must be prepared to fight outnumbered, they practice against company-size foes. Local air superiority is taken for granted. Frequently time-outs are provided to refresh and resupply units.

The ingrained and comfortable habits of peacetime exercises are not easily shed; recall that 6,500 troops were hurled against a few hundred haphazardly armed Cubans on Grenada.

Occasionally the defense establishment admits to itself things are badly amiss. Last spring the RAND Corp., a Pentagon-funded think tank, offered this confessional to its board of trustees: "The Army is currently deploying increasing numbers of technically sophisticated weapons that are hard to maintain, extremely expensive, and whose wartime demand rates are difficult to forecast." This assessment applies with equal, if not greater force, to the other armed services.

Appearances can lead to a false perception of power, and the U.S. military stands like a fine porcelain figure, good for display but best not dropped onto the hard surface of the battlefield. How did we get here? By not looking at the reality of war."Touchy, sensitive, delicate technology has no place at the front line," assets one Marine reserve colonel. He's right, of course, but that is what the troops have got.

An aura of "techno-prophecy" surrounds the promises of weapons now under development. But the current penchant for revolutionary leaps in capability aggravates technical and cost uncertainties. A vicious cycle of unrealized expectations and explosive cost growth is the usual result, with readiness cutbacks and smaller forces in the field. Steady, incremental improvements may not be dramatic, but they are likely to produce more usable combat power.

Other factors are at work. An absence of healthy skepticism, for one, leaving too many basic assumptions unchallenged. For example, the current rubric that "High-technology weapons are more lethal" is

belied by actual battlefield experience. Shrapnel and bullets are doing most of the killing in the war between Iran and Iraq, although both sides have invested in some of the most complex weaponry money can buy—from Exocet missiles to F14 fighters. In field exercises, the U.S. Army is discovering that large numbers of antitank missiles must be fired to achieve relatively few kills.

Counterproductive parochialism, for another, leads to endless compromises with special-interest fiefdoms. The Bradley troop carrier, for example, is the proverbial "camel"—a horse built by the committee. As an armored taxi, it carries too few troops. As a high-profile weapons platform, it will draw fire from every enemy weapon in range.

The Navy and Air Force have their own legacy of costly parochialism. The lightweight-fighter program of the 1970's was intended to produce a common first-line aircraft for both services. Instead, the Air Force flies the winner of that competition, the F16, and the Navy flies the loser, the F18.

Perhaps the basic problem is the easy availability of money. It has corrupted a sense of reality, and distorted the focus on fighting. "The battle's the thing," said the late military historian S.L.A. Marshall. Instead of fighting power, the *wealth* poured into the business of war now stands as the measure of effectiveness.

There is much earnest talk coming out of the Pentagon about the need for 3, 5, or 8 percent growth in defense spending. But when the argument shifts to the subject of fighting power, the certain rhetoric of an instant before devolves into vague ramblings about the "synergistic effects of combined arms," about the "single-pass multiple-kill" systems the troops will have five years hence, and the forthcoming marvels of "enhanced connectivity."

Faddish jargon has become a substitute for clear and serious thinking about the underlying foundations of combat effectiveness. Poetry devoid of philosophy is merely verse, and spending absent a sound concept of national defense is simply procurement. A freeze on defense spending would be an appropriate first step to sort things out. Mindless buying is producing a military described by one former Army general as a "force without power"—and at a cost the country cannot afford.

Mr. HART. Mr. President, I oppose this bill because I oppose both Gramm-Rudman-Hollings the idea, and Gramm-Rudman-Hollings the sequel. We continue to build a dangerous machine which has an unpredictable hair trigger and a vicious swing. We ignore our responsibilities and duties under the Constitution. We set our country at risk. It brings to mind a short parable of Kafka:

What are you building?

I want to dig a subterranean passage. Some progress must be made. My station up there is much too high. We are digging the pit of Babel.

Our pit of Babel is indeed a complicated subterranean passage. We dig downward in the name of progress. We denigrate the role of Congress under the Constitution to set the spending priorities of this Nation. We further the confusion of language that brought the end of the tower of Babel—we have replaced the language of Jefferson to argue in the jargon of accountants and economists. All in the name of expediency.

Beyond corrupting the debate, this bill puts our Nation at severe risk, a risk that goes unnoticed.

On August 20, CBO and OMB will propound an initial sequester order. I am told the average of the two estimates will lead to a sequester of about $22 billion. A sequester that would cut defense budget authority by over $20 billion, cut international affairs authority by $3.3 billion, and cut domestic programs by over 8 percent.

This preliminary order won't go into effect until October. Until then, we will have a chance to reduce the cut. Yet if we look at the CBO's most recent estimates, even if we enact all of the savings in the budget resolution—a fairly heroic assumption—the sequester should still be $17 billion.

Now we may, in the pressure of an election year and with the cooperation of the OMB, reduce this further by going back into the numbers kitchen. We may squeak by this year. But where does that leave us next year?

Under CBO baseline assumptions, it would leave us with a $30 billion sequester. Assuming the budget resolution is enacted, we stand a chance of meeting the Gramm-Rudman-Hollings targets—if the economy behaves.

If the economy behaves and produces $150 billion in revenue growth between 1986 and 1988, $90 billion of that between fiscal 1987 and fiscal 1988. If, in short, we grow out of the deficit. This brings to mind the last time we counted on growth to get us out of a budget bind. We all remember what we got—$200 billion deficits and the worst economic collapse since the Great Depression.

If growth falls short, we're in an entirely different ball game. Consider what would happen if growth proceeded at the pace it set in the first half of this year. The deficit projections go up by nearly $40 billion in fiscal 1988, according to the CBO. The threatened sequester falls into the range of $40 to $70 billion.

Even assuming the low end of these estimates, we face more than a 10-percent cut in defense outlays—and a 15- to 20-percent cut in defense budget authority. A $40 billion cut in defense spending is not far around the corner.

I don't know whether my distinguished colleague from New York is right in his diagnosis, but the phrase "cognitive dissonance" appears too polite and antiseptic a description of the inattention these threats are receiving. Maybe it has something to do with the election year. Maybe it means we think that if the numbers get that high a recession clause will spare us. The figure I just cited is what will happen if we have steady real growth of over 2 percent. That's no recession. I don't know why we can't look at these problems. Maybe that is the real cost of digging a pit of Babel.

In this bill, we're adding a new passage way, bringing in OMB but trying to tie its hands. It won't take Houdini to get out of the straight jacket we've designed. OMB has the motivation and ability. The minority staff of the Budget Committee have reviewed the administration's "Mid-Session Review of the Budget" and find that OMB has not changed its stripes. They've fudged inflation rates and twisted budget authority and outlay estimates. They've made unrealistic policy assumptions and relied, once again, on rosy scenario for their economics.

I am not alone in my concerns. Indeed, 36 Senators voted against the proposed fix, and 30 voted to repeal the entire contraption. Further, Senator MOYNIHAN and 12 other Senators joined me in expressing these concerns to our colleagues in the House of Representatives. I ask that our letter be inserted in the RECORD at the end of my statement.

Mr. President, these are perilous times for our Nation. We are losing our competitiveness abroad and our hope at home. Steelworkers, farmers, and families all know the failures we've had and the challenges we face. We need strong policies and we need fiscal responsibility. We need investments to make sure that the Laissez faire policies of this administration don't let the worst happen.

I proposed a fee on imported oil to actually reduce the deficit. I support the swift passage of the real deficit reductions in the budget resolution. I am willing to stay here day and night throughout August if we would spend the time arguing about our national priorities in the clear and simple language of governance. I cannot, however, support more and more procedural avoidance of the real choices.

Let me conclude with an observation that is relevant, I believe, to this bill and to the promises of the administration's economic program.

Henry Ford had made his fortune in manufacturing automobiles, and decided to do what many successful Americans do—he went back to Europe to discover his roots. And he traced his family back to a small county in Western Ireland. The local officials of the county and the community got together to host a reception for Mr. Ford.

It was a very cordial and warm reception, because they were honored by his presence. And he was so touched by their generosity, he asked if there was anything he could do for the community. They said, Mr. Ford, as a matter of fact, we are building a hospital—the first hospital this community would ever have—all our sick people have to go to the neighboring community to get treated. And we'er having a

fundraising drive, and we would certainly appreciate anything you could do for us. And Henry Ford, feeling very generous, wrote out a personal check for $5,000 and gave it to the community officials.

They thanked him very much. They saw him to his hotel, and he went to sleep. He woke up the next morning, and on the doorstep of his hotel room was the local newspaper, with the headline, "American Industrialist Henry Ford Contributes $50,000 to Hospital Drive."

Well, Mr. Ford was smart enough to know he was in big trouble. He called a meeting of the local officials and the hospital board. And he said, I gave you a check for $5,000 and you said that I gave $50,000—I don't know quite what to do. And they all looked around and said, "Well, Mr. Ford, the only thing we could think of is for you to give us the other $45,000." And Ford said, "OK, that's agreeable, I will write you a check for $45,000; but I want one request." He said, "I want to be able to put over the entryway to the hospital the words I feel are most appropriate under these circumstances—and I can assure you they will be appropriate for your circumstances as well." They said, that's agreeable.

And they took the $45,000 and built the hospital. And Mr. Ford insisted that when the carving was made, it remain veiled until the day the hospital was dedicated. The local officials got together and people gathered from miles around to dedicate this first hospital in the history of the community. Speeches were given. And then the time came to pull down the veil. And over the doorway to the hospital were these words: "I came as a stranger, and you took me in."

I urge my colleagues, let's not be taken in, yet again.

COMMUNICATIONS SECURITY

Mr. MOYNIHAN. Mr. President, I commend the members and staffs of the Armed Services Committee, and the Select Committee on Intelligence for including in next year's defense authorization a $129 million Communications Security Enhancement Program. This funding will permit the Department of Defense to protect classified and other sensitive domestic satellite communications. According to a recent Washington Post article, "the Pentagon spends $1 billion a year leasing communications lines that use commercial satellites. These lines carry everything from routine messages to secret, coded military orders. Figures for 1982, the latest available, show that the military leased 1,414 commercial satellite circuits." But it is not only military orders that are sent by satellite. Banking records, stock market transactions, law enforcement communications, to say nothing of common carrier long-distance calls are all sent by satellite as well. And, it is a truism in the communications world that the aggregate whole of unclassified messages often presents a classified picture.

Although it is not widely known, neither is it a secret that the Soviets operate a listening facility at Lourdes, just outside of Havana, Cuba. The State Department and Defense Department regularly publish satellite pictures of this facility. They note as well that approximately 2,100 Soviet technicians man the antennas and dishes at Lourdes—2,100. And the facility continues to grow. In fact, it is the largest and most sophisticated Soviet listening facility outside of its national territory—and it is aimed at our satellite communications. And now we learn that there are Soviet listening facilities being developed in Nicaragua. Will these, too, target our domestic communications and grow to the size of a Lourdes?

But you need not have a Lourdes to penetrate our satellite communications. Captain Midnight demonstrated that. An OPED in the May 17 New York Times notes: "It is a badly kept secret that an inexpensive device can be built and attached to a backyard dish that allows the dishowner to listen in on telephone calls." Another article lets us know that we can purchase this same device for just $395.

The message is loud and clear. We need to concern ourselves with communications security. The Armed Services Committee has done just that, and I encourage my colleague on the Appropriations Committee to do so as well. This is a national problem and its merits a National Government solution.

Communications security has no constituency. There is no product. And you can never really be sure that you have done anything. Moreover, this particular package is an add-on, and therefore a likely target for a cut; $129 million is no small sum in any year, most of all this year, but it would cost us so much more not to do it. That, at least, was the conclusion of my good colleagues on the Armed Services Committee and I commend them for it.

So I thank him very much for the attitude he has developed in this bill and for the spirit of cooperation he has shown for those who have been working and will be carrying on the work after he is through.

Mr. DOLE. Mr. President, I ask for the yeas and nays on final passage.

Mr. STEVENS. Mr. President, I did not join in the prior statements about my good friend, my long-time friend, from Arizona, and I think he understands why. But I do think we should recognize this bill to be a tribute to the Senator from Arizona.

We should recognize that by virtue of the work he has done and the attitude that he and the Senator from Georgia adopted, we believe that we may—I say we may—avoid the long, acrimonious battle between authorization and appropriations this year. We have pledged to try to do so, and we have done our best so far, through this bill. With the direction of the Senator from Arizona, we will say our prayers and hope it continues.

I personally congratulate you, Senator, for the work you have done and for the mark you have made on our Nation's defenses. I do not think there is anyone alive today who has had more to do in connection with our Nation's defenses over a longer period of time as an active participant.

□ 2050

We have another person on the floor, Senator STENNIS, who has had a long and illustrious career also in terms of the Department of Defense, and I certainly am not in any way casting a shadow on that, but I have known the Senator from Arizona now for almost 40 years, I think, and in all that time he has been one who has been quick to give wise counsel and also equally quick, as we have just seen, to give very quick criticism.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, let me indicate after this vote we hope to very quickly have the unaimous consent agreed to and then there will be a vote on the debt limit yet this evening.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maine [Mr. COHEN], the Senator from Oregon [Mr. HATFIELD], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Nevada [Mr. LAXALT], the Senator from Vermont [Mr. STAFFORD], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

On this vote, the Senator from Oregon [Mr. HATFIELD] is paired with the Senator from Pennsylvania [Mr. HEINZ].

If present and voting, the Senator from Oregon would vote "nay" and the Senator from Pennsylvania would vote "yea."

Mr. CRANSTON. I announce that the Senator from Montana [Mr. BAUCUS], the Senator from New Jersey [Mr. BRADLEY], the Senator from Missouri [Mr. EAGLETON], the Senator from Louisiana [Mr. JOHNSTON], and the Senator from Arkansas [Mr. PRYOR], are necessarily absent.

The PRESIDING OFFICER (Mr. STEVENS). Are there any other Sena-

tors in the Chamber who desire to vote?

The result was announced—yeas 86, nays 3, as follows:

[Rollcall Vote No. 207 Leg.]

So the bill (S. 2638), as amended, was passed as follows:

S. 2638

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE

This Act may be cited as the "National Defense Authorization Act for Fiscal Year 1987".

SEC. 2. ORGANIZATION

This Act is divided into four divisions as follows:

(1) Division A—Department of Defense Authorization.

(2) Division B—Military Construction Authorization.

(3) Division C—Department of Energy National Security and Military Applications of Nuclear Energy Authorization.

(4) Division D—Civil Defense.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATION

SEC. 100. SHORT TITLE

This division may be cited as the "Department of Defense Authorization Act, 1987".

TITLE I—PROCUREMENT

SEC 101. AUTHORIZATION OF APPROPRIATIONS, ARMY

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal year 1987 for procurement of aircraft, missiles, weapons, and tracked combat vehicles, and ammunition and for other procurement for the Army as follows:

For aircraft, $2,793,700,000.

For missiles, $2,198,200,000.

For weapons and tracked combat vehicles, $3,794,900,000.

For ammunition, $2,283,300,000.

For other procurement, $5,365,900,000.

(b) AQUILA REMOTELY PILOTED VEHICLE.—None of the funds appropriated to the Army pursuant to this title may be obligated or expended for the procurement of the Aquila Remotely Piloted Vehicle until—

(1) the Director of Operational Test and Evaluation has completed a comprehensive assessment of the Aquila system; and

(2) the Secretary of the Army has certified to the Committees on Armed Services of the Senate and the House of Representatives that—

(A) the Aquila system has satisfactorily demonstrated that it meets or exceeds all performance criteria established for the system by the Army; and

(B) the Army has negotiated a binding contract which provides for procurement of the entire system and limits overall liability of the United States under the contract.

SEC. 102. AUTHORIZATION OF APPROPRIATIONS, NAVY AND MARINE CORPS

(a) NAVY.—Funds are hereby authorized to be appropriated for fiscal year 1987 for procurement of aircraft, weapons (including missiles and torpedoes), shipbuilding and conversion, and other procurement for the Navy as follows:

For aircraft, $9,903,070,000.

For weapons (including missiles and torpedoes), $5,597,490,000.

For shipbuilding and conversion, $9,323,800,000.

For other procurement, $5,934,057,000.

(b) MARINE CORPS.—Funds are hereby authorized to be appropriated for fiscal year 1987 for procurement for the Marine Corps (including missiles, tracked combat vehicles, and other weapons) in the amount of $1,328,700,000.

(c) P-3 AIRCRAFT.—(1) Of the funds provided for procurement of P-3 aircraft, the Secretary of the Navy may transfer up to $120,000,000 for modification of existing P-3 aircraft.

(2) Within the funds appropriated pursuant to an authorization in this or any other Act for the procurement of P-3C aircraft, the Secretary of the Navy may carry out Navy obligations under the classified Maritime Surveillance Agreement of 1986. Two of the P-3C aircraft authorized to be procured may be used to implement United States obligations under such classified agreement.

(d) DDG-51 DESTROYER PROGRAM.—(1) The Secretary of the Navy shall incorporate helicopter support facilities into each Arleigh Burke (DDG-51) class destroyer to be constructed with funds authorized to be appropriated by this title.

(2) Section 102(h) of the Department of Defense Authorization Act, 1985 (Public Law 98-525; 98 Stat. 2501), is repealed.

(e)(1) MSH-X.—The Secretary of the Navy is authorized to procure from one or more foreign countries which are allied with the United States and which have proven minesweeper hunter shipbuilding capabilities, lead minesweeper hunter ship and one partially outfitted hull of a minesweeper hunter ship. The lead ship may be procured in whole or in part from such a foreign country.

(2) Funds appropriated or otherwise made available to the Navy for fiscal year 1986 for shipbuilding and conversion shall be available for the procurement in connection with the MSH-X minesweeper hunter ship program authorized in subparagraph (1) in the amount of $100,000,000.

(3) Follow-on MSH-X minesweeper hunter ships shall be constructed in shipyards in the United States.

(4) Funds may not be obligated or expended for the procurement of a lead minesweeper hunter ship or a partially outfitted hull of a minesweeper hunter ship from a foreign country until the Secretary of the Navy has certified to the Congress in writing (A) that purchase of up to two foreign built ships responds to an urgent national security requirement; (B) that no United States shipbuilder has demonstrated the capability, or that no shipbuilder can demonstrate the ability to acquire that capability to meet that requirement in a timely fashion.

(f) CONSOLIDATION OF NAVY MUNITIONS FUNDS INTO SINGLE ACCOUNT.—The President shall include within a single account all budget requests for Navy munitions for fiscal year 1988 and subsequent fiscal years.

(g) ROLLING AIRFRAME MISSILE PROGRAM.—(1) None of the funds appropriated pursuant to an authorization in this title may be obligated or expended in connection with procurement of the Rolling Airframe Missile program until the Secretary of Defense has certified in writing to the Committee on Armed Services of the Senate and the House of Representatives that—

(A) the total Navy research and development cost of the Rolling Airframe Missile program will not exceed $219,700,000; and

(B) the Secretary will terminate the program if at any time he determines that the total Navy research and development cost will exceed the amount specified in subparagraph (A); and

(C) the recurring missile unit flyaway cost for a minimum of 4,900 missiles will not exceed $100,000 per missile (using fiscal year 1986 dollars as the base year); and

(D) the design of the Rolling Airframe Missile and its unique support equipment are complete and that the system performance has not been degraded from the original development specifications (as contained in Navy Decision Coordinating Paper No. SO-167-AA); and

(E) the Director of Operational Test and Evaluation has approved a test and evaluation master plan for the Rolling Airframe Missile.

(2) If the Secretary of Defense fails to make the certification described in paragraph (1) by March 30, 1987, he shall cause the Rolling Airframe Missile program to be terminated effective on that date.

(3) Subsection (d) of section 205 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 608), is repealed.

(4) Department of Defense reprogramming request 85-91PA is approved.

SEC. 103. AUTHORIZATION OF APPROPRIATIONS, AIR FORCE.

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal year 1987 for procurement of aircraft and missiles and for other procurement for the Air Force as follows:

For aircraft, $16,383,104,000.

For missiles, $8,116,200,000.

For other procurement, $10,068,348,000.

(b) 30MM GAU-8 AMMUNITION.—None of the funds appropriated pursuant to the authorization of appropriations in this title may be obligated or expended for procurement of 30 millimeter GAU-8 ammunition until such time as the depleted uranium penetrator part of such ammunition is obtained as a separate procurement item.

SEC. 104. RESERVE COMPONENTS.

(a) AUTHORIZATION OF APPROPRIATIONS.—Funds are hereby authorized to be appropri-

ated for fiscal year 1987 for procurement of aircraft, vehicles, communications equipment, and other miscellaneous equipment for the reserve components of the Armed Forces as follows:

For the Army National Guard, $140,000,000.

For the Air National Guard, $20,000,000.

For the Army Reserve, $90,000,000.

For the Naval Reserve, $45,000,000.

For the Air Force Reserve, $150,000,000.

For the Marine Corps Reserve, $20,000,000.

(b) AUTHORIZATIONS IN ADDITION TO OTHER AMOUNTS.—The authorizations of appropriations contained in subsection (a) are in addition to any other amounts authorized to be appropriated by this or any other division.

(c) Notwithstanding the amounts authorized to be appropriated by subsection (a), the total amount authorized to be appropriated by this subsection is $454,300,000.

SEC. 105. AUTHORIZATION OF APPROPRIATIONS, DEFENSE AGENCIES.

Funds are hereby authorized to be appropriated for fiscal year 1987 for the Defense Agencies in the amount of $1,431,300,000.

SEC. 106. AUTHORIZATION OF APPROPRIATIONS FOR CHEMICAL DEMILITARIZATION.

Funds are hereby authorized to be appropriated for fiscal year 1987 for the purposes of the destruction of lethal chemical weapons in accordance with section 1412 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 747), in the amount of $120,100,000.

SEC. 107. EXTENSION OF CERTAIN AUTHORITY OF THE SECRETARY OF DEFENSE IN CONNECTION WITH THE NATO AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) PROGRAM.

Effective on October 1, 1986, section 103(a) of the Department of Defense Authorization Act, 1982 (Public Law 97-86; Stat. 1100) is amended by striking out "fiscal year 1986" both places it appears and inserting in lieu thereof "fiscal year 1987".

SEC 108. MULTIYEAR CONTRACTS.

(a) IN GENERAL.—(1) Subject to paragraph (2), the Secretary of the military department concerned may enter into a contract in accordance with section 2306(h) of title 10, United States Code, for procurement of the following:

UH-60A Blackhawk and EH-60A Quick Fix Airframe.

Patriot Weapon System.

HARM Weapon System.

Defense Support Program.

(2) A multiyear contract authorized by paragraph (1) for a program may not be entered into unless the total anticipated cost over the period of the contract is no more than 90 percent of the total anticipated cost of carrying out the same program through annual contracts.

(b) STINGER MISSILE.—The Secretary of the Army may not enter into a contract for the multiyear procurement of the Stinger air defense missile until—

(1) the Secretary has—

(A) obtained and evaluated bids for a competitive second source for such missile; and

(B) certified to the Committees on Armed Services of the Senate and the House of Representatives that acquisition of such missile from more than one source would be more costly than a multiyear procurement program from a single source; and

(2) the Comptroller General of the United States has evaluated the estimates on the basis of which the Secretary made his decision and has submitted his evaluation of the estimates to the committees named in clause (1).

The Comptroller General shall submit his evaluation to the committees named in clause (1) not later than 60 days after the certification of the Secretary has been received by such committees.

(c) OTHER NAVY PROGRAMS.—The Secretary of the Navy may not enter into a multiyear contract for procurement of the following:

F/A-18 aircraft.

MK-45 gun mounts.

MK-6 ammunition hoists.

SEC. 109. TECHNICAL AMENDMENT TO PUBLIC LAW 99-145 RELATING TO BINARY CHEMICAL MUNITIONS.

Section 1411(b)(1) of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 745), is amended by striking out "North Atlantic Council" and inserting in lieu thereof "Defense Planning Committee of the North Atlantic Treaty Organization meeting in permanent session".

## TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

SEC. 201. AUTHORIZATION OF APPROPRIATIONS.

Funds are hereby authorized to be appropriated for fiscal year 1987 for the use of the Armed Forces for research, development, test, and evaluation, in amounts as follows:

For the Army, $4,815,669,000.

For the Navy (including the Marine Corps), $9,289,678,000.

For the Air Force, $14,908,873,000.

For the Defense Agencies, $7,310,974,000, of which $141,800,000 is authorized for the activities of the Deputy Under Secretary of Defense, Test and Evaluation and of which $11,300,000 is authorized for the Director, Operational Test and Evaluation.

SEC. 202. PROGRAM RESTRICTIONS AND LIMITATIONS.

(a) ADVANCED FIELD ARTILLERY TACTICAL DATA SYSTEM/MARINE INTEGRATED FIRE AND AIR SUPPORT SYSTEMS, ARMY/NAVY.—None of the funds appropriated pursuant to this title for fiscal year 1987 may be obligated or expended for the development of the Army Advanced Artillery Tactical Data System or the Marine Integrated Fire and Support System until—

(1) a single program has been selected for both the Army and the Marine Corps; or

(2) the Secretary of Defense has certified to Congress, not later than December 15, 1986, that continuation of both programs is operationally sound and less costly to the United States than the development of a common system for use by both the Army and Marine Corps.

(b) ADVANCED TACTICAL AIRCRAFT, NAVY.—None of the funds appropriated pursuant to an authorization in this or any other Act may be obligated or expended for the full-scale development of the Navy Advanced Tactical Aircraft until the Secretary of Defense has certified to the Congress that the design selected for the aircraft will accommodate essential Air Force-peculiar requirements for such aircraft.

(c) TRIDENT II PROGRAM.—None of the funds appropriated pursuant to an authorization in this division for the Trident II missile development program or for the procurement of Trident II missiles and related support equipment may be used for any other purpose. In achieving any reductions required to be made in programs, projects, or activities for which funds have been appropriated pursuant to this division, the Secretary of the Navy may not reduce the amount of funds available for the program and equipment described in the first sentence.

(d) ADVANCED TACTICAL FIGHTER, AIR FORCE.—None of the funds appropriated pursuant to an authorization in this or any other Act may be obligated or expended for the full-scale development of the Air Force Advanced Tactical Fighter aircraft until the Secretary of Defense has certified to the Congress that the design selected for the aircraft will accommodate essential Navy-peculiar requirements for such aircraft.

(e) T-46 TRAINER AIRCRAFT, AIR FORCE.—None of the funds appropriated pursuant to an authorization in this or any other Act may be obligated or expended for research, development, test, evaluation, or procurement of or in connection with the T-46 trainer aircraft.

(f) DoD SOFTWARE ENGINEERING INSTITUTE AND VERY HIGH SPEED INTEGRATED CIRCUITS, AIR FORCE.—Of the funds appropriated pursuant to an authorization in this act, not more than $14,541,000 may be obligated and expended for the DoD Software Engineering Institute and not more than $127,897,000 may be obligated and expended for the Very High Speed Integrated Circuits program.

SEC. 203. TESTING OF ANTISATELLITE WEAPONS.

Section 8097 of the Department of Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190; 99 Stat. 1185), is repealed.

SEC. 204. ICBM MODERNIZATION.

(a) REPORT BY THE SECRETARY OF DEFENSE ON ICBM MODERNIZATION.—At the same time the Secretary submits his report to the Committees on Armed Services of the Senate and the House of Representatives on the ICBM modernization program pursuant to section 1231(c) of the Department of Defense Authorization Act, 1984 (Public Law 98-94; 97 Stat. 614), the Secretary of Defense shall submit a statement to such Committees containing the basis of the Secretary's recommendation to the President, and any decisions of the President, regarding the following matters:

(1) The configuration of a small intercontinental ballistic missile in terms of weight, number of warheads, and production schedule.

(2) The selected options for more survivable follow-on basing modes and basing locations for MX (Peacekeeper) missiles.

(3) The advisability of going forward with one or more selected basing modes to a full scale engineering development decision.

(b) LIMITATION OF FUNDING FOR THE SMALL ICBM.—(1) Of the $675,000,000 authorized to be appropriated in this Act for the development of the small ICBM and hard mobile launcher, not more than $337,750,000 may be obligated until the Secretary of Defense has submitted to the Committees on Armed Services of the Senate and the House of Representatives the report required by subsection (a) and a period of 30 days has elapsed following the date on which the report is received by such Committees. After the submission of such report and the period of 30 days has elapsed, the weight limitations specified in section 1231 of the Act referred to in subsection (a) shall no longer be effective.

(2) The limitations contained in section 1231 of the Department of Defense Authorization Act, 1984, on the deployment of the MX missile and the development of a small ICBM shall not apply if (A) the President requests funds from Congress adequate to

support the development schedule provided by law for the small ICBM, and (B) the full amount requested by the President to support that schedule has not been appropriated before September 30, 1987.

(c) LIMITATION OF FUNDING FOR FOLLOW-ON BASING DEVELOPMENT.—Of the $200,000,000 authorized to be appropriated for follow-on basing research and development for the MX (Peacekeeper) missile, not more than $100,000,000 may be obligated until the submission of the report required by subsection (a) and a period of 30 calendar days has elapsed following the date on which such report is received by the Committees on Armed Services of the Senate and the House of Representatives.

SEC. 205. BALANCED TECHNOLOGY INITIATIVE

(a) LIMITATION ON FUNDS FOR SDI PROGRAM.—Of the amount authorized in section 201 for Defense Agencies, not more than $3,597,000,000 is available for the Strategic Defense Initiative.

(b) EARMARKING FOR CERTAIN PROGRAMS.—(1) Of the amount authorized in section 201 for Defense Agencies, not less than $300,000,000 shall be used to expand research on innovative concepts and methods of enhancing conventional defense capabilities. The research and development efforts shall emphasize, but not be limited to the following:

(A) Armor/anti-armor initiatives.

(B) Defenses against armed helicopters.

(C) Hypervelocity missiles for ground combat use.

(D) Defense against anti-ship missiles, including those with "stealth" characteristics.

(E) "Smart" mines for both land and ocean warfare.

(F) Lightweight, air transportable vehicles with anti-armor capabilities for rapid transport to remote areas.

(G) Improved conventional anti-submarine warfare munitions.

(H) "Smart" standoff munitions and submunitions for aircraft delivery outside of lethal air defense ranges.

(2) The amount specified in paragraph (1) is in addition to the amount specified for the Strategic Defense Initiative in subsection (a) and is made available subject to the following conditions:

(A) That the Director of Defense Research and Engineering apportion the funds among the research, development, test, and evaluation accounts of the Army, the Navy, the Air Force, and the Defense Agencies on a merit basis, taking into consideration ongoing technology research and exploitation opportunities.

(B) That no portion of any undistributed reduction be applied against the funds appropriated for purposes of paragraph (1) and that no portion of any undistributed reduction be applied against any program, project, or activity for which additional funds are provided under subparagraph (A).

(C) That no portion of the funds provided for in paragraph (1) be applied to any program, project, or activity in support of the Strategic Defense Initiative.

(c) FUNDS FOR CONVENTIONAL DEFENSE TECHNOLOGY BASE.—Of the amount authorized in section 201 for Defense Agencies, not less than $153,000,000 shall be applied to restoration of the conventional defense technology base. Such amount is in addition to the amounts specified in subsections (a) and (b)(1) and is made available subject to the following conditions:

(1) That the Director of Defense Research and Engineering apportion the funds among the research, development, test, and evaluation accounts of the Army, the Navy, the Air Force, and Defense Agencies on a merit basis, either to augment ongoing but underfunded basic and exploratory research or to establish new basic or exploratory research programs.

(2) That no portion of such funds be applied to any program, project, or activity in support of the Strategic Defense Initiative.

(3) That no portion of any undistributed reduction made in any research, development, test, and evaluation account be applied against the technology base activities of any military department or Defense Agency in a greater proportion than the share of that department's or Agency's technology base as a proportion of the total research, development, test, and evaluation funds made available to that department or Agency for fiscal year 1987.

(4) That no portion of any undistributed reduction be applied against any program, project, or activity which has received additional funds under this subsection.

(d) REPORT.—Within 90 days after the date of the enactment of this Act, the Director of Defense Research and Engineering shall provide to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives a report on the implementation of this section. Such report shall include—

(1) the allocation by project of the amounts specified in subsections (b)(1) and (c);

(2) the identification of other ongoing research and development projects that should be included in a balanced defense technology effort to improve conventional defenses;

(3) for each program, project, or activity for which funds have been allocated under subsection (b)(1), or which is identified under clause (2) of this subsection, a 5-year funding profile sufficient to maintain significant progress in such program, project, or activity, including the major milestones and projected dates of accomplishment for such program, project, or activity; and

(4) a 5-year funding profile that would be required to restore by the end of fiscal year 1992 the defense technology base to the proportion of total research, development, test, and evaluation that such base was, on average, during the period from 1971 through 1980, and the effect of implementing that funding profile on the research, development, test, and evaluation defense programs of the United States.

(e) RESTRICTION ON OBLIGATION OF FUNDS.—None of the funds provided under subsections (b)(1) and (c) may be obligated until Congress has received the report required under subsection (d) and a period of 30 days has elapsed following the date on which the report is received by Congress.

(f) COMPLIANCE WITH THE ABM TREATY.—(1) The Congress finds—

(a) that the President's Commission on Strategic Forces declared in its report to the President, dated March 21, 1984, that "One of the most successful arms control agreements is the Anti-Ballistic Missile Treaty of 1972"; and

(b) that the Secretary of State has stated that the "ABM Treaty requires consultations, and the President has explicitly recognized that any ABM-related deployments arising from research into ballistic missile defenses would be a matter for consultations and negotiations between the Parties";

(c) that the Secretary of State declared on October 14, 1985, that "our research program has been structured and, as the President has reaffirmed, will continue to be conducted in accordance with a restrictive interpretation of the treaty's obligations";

(d) that the President has determined that the Krasnoyarsk radar is a violation of the ABM Treaty; and

(e) that the Krasnoyarsk radar therefore erodes the integrity of the ABM Treaty and is a matter of serious concern.

(2) The Congress therefore declares—

(a) that it fully supports the declared policy of the President that a principal objective of the United States in negotiations with the Soviet Union on nuclear and space arms is to reverse the erosion of the Treaty between the United States and America and the Union of Soviet Socialist Republics on the Limitation of Anti-Ballistic Missile Systems, signed on May 26, 1972; and

(b) that action by the Congress in approving funds in this Act for research on the Strategic Defense Initiative does not express or imply an intention on the part of the Congress that the United States should abrogate, violate, or otherwise erode such treaty, and does not express or imply any determination or commitment on the part of the Congress that the United States develop, test, or deploy ballistic missile strategic defense weaponry that would contravene such treaty.

SEC. 206. RESTRICTIONS ON USE OF RESEARCH AND DEVELOPMENT FUNDS OF THE DEPARTMENT OF DEFENSE

This Act does not authorize any research, development, test, and evaluation funds to or for the use of the Department of Defense for the purpose of making any grant or contribution to any educational institution unless the Secretary of Defense, using existing authority, determines—

(1) that the purpose of such grant or contribution has a potential relationship to a military function or operation; and

(2) that the grant or contribution is based on the technical merit of the proposed research that best satifies the requirements of the Department of Defense.

SEC. 207. REPORT ON PROJECTED COSTS OF SDI PROGRAM

Subsection (b) of section 223 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 613), is amended to read as follows:

At the end of subsection (b) add the following:

"(c) The Secretary shall specifically include in such report the following information:

"(1) The cost goals or cost objectives for the production and deployment of a Strategic Defense Initiative System determined on the basis of capabilities expected to be developed in the future and the cost goals or cost objectives for the individual components of such system (determined on the basis of capabilities expected to be developed in the future).

"(2) The estimated cost for the production and deployment of the Strategic Defense Initiative System referred to in subparagraph (1) and determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report and the estimated cost for the production and deployment of the individual components of such system (determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report)."

SEC. 208. PROHIBITION AGAINST CERTAIN CONTRACTS

(a) IN GENERAL.—Funds appropriated pursuant to an authorization contained in this or any other Act to or for the use of the Department of Defense may not be used for the purpose of entering into or carrying out any contract with any foreign government or any foreign firm if the contract is to provide for the conduct of research, development, test, or evaluation in connection with the Strategic Defense Initiative program unless the Secretary of Defense certifies to the Congress in writing that the work to be performed under the contract cannot be reasonably performed by a United States firm.

(b) EXCEPTIONS.—The prohibition in subsection (a) does not apply to—

(1) funds used to carry out any contract entered into before the date of the enactment of this Act; or

(2) funds appropriated specifically for research, development, test, or evaluation in connection with antitactical ballistic missile systems.

(b) DEFINITION.—As used in subsection (a), the term "foreign firm" means a business entity owned or controlled by one or more foreign nationals or a business entity in which more than 50 percent of the stock is owned or controlled by one or more foreign nationals.

## TITLE III—OPERATION AND MAINTENANCE

SEC. 301. AUTHORIZATION OF APPROPRIATIONS

Funds are hereby authorized to be appropriated for fiscal year 1987 for the use of the Armed Forces and other activities and agencies of the Department of Defense for expenses, not otherwise provided for, for operation and maintenance in amounts as follows:

For the Army, $20,596,070,000.

For the Navy, $24,009,960,000.

For the Marine Corps, $1,830,300,000.

For the Air Force, $19,029,371,000.

For the Defense Agencies, $8,332,928,000.

For the Army Reserve, $776,100,000.

For the Naval Reserve, $887,400,000.

For the Marine Corps Reserve, $12,800,000.

For the Air Force Reserve, $887,100,000.

For the Army National Guard, $1,714,800,000.

For the Air National Guard, $1,727,900,000.

For the National Board for the Promotion of Rifle Practice, $930,000.

For Defense Claims, $144,100,000.

For the Court of Military Appeals, $3,200,000.

For the Environmental Restoration Fund, Defense, $385,900,000.

SEC. 302. AUTHORIZATION OF APPROPRIATIONS FOR REVOLVING AND MANAGEMENT FUNDS

Funds are hereby authorized to be appropriated for fiscal year 1987 to provide capital for working-capital funds of the Department of Defense in amounts as follows:

For the Army Stock Fund, $271,700,000.

For the Navy Stock Fund, $438,500,000.

For the Marine Corps Stock Fund, $41,900,000.

For the Air Force Stock Fund, $219,400,000.

For the Defense Stock Fund, $125,800,000.

SEC. 303. ASSISTANCE FOR THE TENTH INTERNATIONAL PAN AMERICAN GAMES

(a) AUTHORITY TO PROVIDE SUPPORT SERVICES.—The Secretary of Defense may—

(1) provide logistical support and personnel services to the Tenth Pan Am Games;

(2) lend and provide equipment in support of the Tenth Pan Am Games; and

(3) provide such other services in support of the Tenth Pan Am Games as the Secretary considers advisable.

(b) AUTHORIZATION OF APPROPRIATIONS; LIMITATIONS.—(1) There is authorized to be appropriated to the Secretary of Defense for fiscal year 1987 an amount not to exceed $15,000,000 for the purpose of carrying out subsection (a).

(2) Except as provided in paragraph (3), funds may not be obligated for the purpose of carrying out subsection (a) unless specifically appropriated for such purpose.

(3) Paragraph (2) does not apply to funds used for pay and non-travel-related allowances for members of the Armed Forces (other than pay and allowances of members of the reserve components called or ordered to active duty to provide support for the Tenth Pan Am Games).

(4) The costs for pay and non-travel-related allowances of members of the Armed Forces (other than members of the reserve components called or ordered to active duty to provide support for the Tenth Pan Am Games) may not be charged to appropriations made pursuant to the authorization in paragraph (1).

(c) DEFINITION.—For the purpose of this section, the term "Tenth Pan Am Games" means the Tenth International Pan American Games, to be held at Indianapolis, Indiana, during the period beginning on August 7, 1987, and ending August 23, 1987.

SEC. 304. AUTHORIZATION OF APPROPRIATIONS FOR TRANSPORTATION OF HUMANITARIAN RELIEF SUPPLIES TO AFGHAN REFUGEES

(a) AUTHORIZATION OF FUNDS.—There is authorized to be appropriated to the Department of Defense for fiscal year 1987 the sum of $10,000,000 for the purpose of providing transportation for humanitarian relief for persons displaced or who are refugees because of the invasion of Afghanistan by the Soviet Union.

(b) AUTHORITY TO TRANSFER FUNDS.—The Secretary of Defense is authorized to transfer to the Secretary of State not more than 5 percent of the funds appropriated pursuant to the authorization in this section to provide local transportation outside the United States to accomplish the purposes of this section.

(c) TRANSPORTATION UNDER DIRECTION OF THE SECRETARY OF STATE.—Transportation provided with funds appropriated pursuant to the authorization in this section shall be under the direction of the Secretary of State.

(d) MEANS OF TRANSPORTATION TO BE USED.—Transportation for humanitarian relief provided with funds appropriated pursuant to the authorization in this section shall be by the most economical commercial or military means available, unless the Secretary of State determines that it is in the national interest of the United States to use means other than the most economical available. Such means may include the use of aircraft and personnel of the reserve components of the Armed Forces.

(e) AVAILABILITY OF FUNDS.—Amounts appropriated pursuant to the authorization in subsection (a) shall remain available until expended, to the extent provided in appropriation Acts.

SEC. 305. PROGRAM RESTRICTIONS AND LIMITATIONS

(a) PROHIBITION ON USE OF FUNDS FOR CERTAIN STUDIES, ARMY.—None of the funds appropriated to the Army pursuant to an authorization contained in this or any other Act may be obligated or expended, on or after the date of the enactment of this Act, for the purpose of continuing or completing any study, pursuant to the Office of Management and Budget Circular A-76, relating to converting the operation of the federally owned and operated McAlester Army Ammunition Plant, at McAlester, Oklahoma, or the Crane Army Ammunition Activity at the Naval Weapons Support Center, Crane, Indiana, from performance by personnel of the Department of Defense to performance by private contractor, until detailed reports have been submitted to the Congress by the General Accounting Office and the Department of Defense concerning the cost effectiveness of such a conversion and its effect on the defense readiness and mobilization base.

(b) TERMINATION OF PROHIBITION.—The prohibition in subsection (a) shall expire on March 31, 1987.

SEC. 306. AUTHORIZATION OF APPROPRIATIONS FOR FOREIGN CURRENCY PURCHASES

Funds are hereby authorized to be appropriated for fiscal year 1987 in the amount of $3,500,000 for the purchase of foreign currencies from the Treasury Department to pay expenses incurred in carrying out programs of the Department of Defense.

## TITLE IV—PERSONNEL AUTHORIZATIONS AND RELATED MATTERS

### PART A—ACTIVE FORCES

SEC. 401. AUTHORIZATION OF END STRENGTHS

The Armed Forces are authorized strengths for active-duty personnel as of September 30, 1987, as follows:

(1) The Army, 780,800.

(2) The Navy, 587,000.

(3) The Marine Corps, 199,600.

(4) The Air Force, 606,850.

SEC. 402. EXTENSION OF QUALITY CONTROL ON ENLISTMENTS INTO THE ARMY

Effective on October 1, 1986, section 302(a) of the Department of Defense Authorization Act, 1981 (10 U.S.C. 520 note), is amended by striking out "October 1, 1985" and "September 30, 1986" and inserting in lieu thereof "October 1, 1986" and "September 30, 1987", respectively.

SEC. 403. STRENGTH OF ACTIVE DUTY OFFICER CORPS

(a) REDUCTION IN SIZE OF OFFICER CORPS.—On and after each of the dates set forth in column 1 of the following table, the total number of commissioned officers serving on active duty in the Army, Navy, Air Force, and Marine Corps (excluding officers in categories specified in subsection (b)) may not exceed the percentage, set forth in column 2 opposite such date, of the total number of commissioned officers serving on active duty as of September 30, 1986 (excluding officers in categories specified in subsection (b)):

| Column 1 | Column 2 |
|---|---|
| On and after: | Percentage of total commissioned officers serving on active duty as of September 30, 1986: |
| September 30, 1987..... | 98 |
| September 30, 1988..... | 96 |
| September 30, 1989..... | 94 |

(b) EXCLUSIONS.—In computing the authorized strength of commissioned officers under subsection (a), officers in the following categories shall be excluded:

(1) Reserve officers—

(A) on active duty for training;

(B) on active duty under section 265, 270(b), 672a, 3033, 3496, 5251, 5252, 8033, or

8496 of title 10, United States Code, or under section 708 of title 32, United States Code;

(C) on active duty under section 672(d) of title 10, United States Code, in connection with organizing, administering, recruiting, instructing, or training the reserve components or the National Guard;

(D) on active duty to pursue special work;

(E) ordered to active duty under section 673(b) of title 10, United States Code; or

(F) on full-time National Guard duty.

(2) Warrant officers.

(3) Retired officers on active duty under a call or order to active duty for 180 days or less.

(4) Reserve or retired officers on active duty under section 10(b)(2) of the Military Selective Service Act (50 U.S.C. App. 460(b)(2)) for the administration of the Selective Service System.

(c) APPORTIONMENT OF REDUCTIONS BY SECRETARY OF DEFENSE.—The reductions in the number of commissioned officers serving on active duty required by subsection (a) shall be apportioned among the Army, Navy, Air Force, and Marine Corps by the Secretary of Defense. The Secretary shall report to the Committees on Armed Services of the Senate and House of Representatives not later than February 1 of each fiscal year in which reductions are required under subsection (a) on the manner in which the reductions have been or are to be apportioned for that fiscal year.

(d) REQUIREMENT FOR FUTURE AUTHORIZATION OF OFFICER CORPS STRENGTH.—(1) Section 138(c)(1) of title 10, United States Code, is amended by adding at the end the following new subparagraph:

"(D) Congress shall authorize the end strength as of the end of each fiscal year for commissioned officers the Army, Navy, Air Force, and Marine Corps serving on active duty. No funds may be appropriated for any fiscal year to or for the use of commissioned officers on active duty in the Army, Navy, Air Force, or Marine Corps unless the end strength for commissioned officers serving on active duty in that military service for that fiscal year has been authorized by law.".

(2) The amendment made by paragraph (1) shall take effect on October 1, 1987.

## PART B—RESERVE FORCES

### SEC. 411. AUTHORIZATION OF AVERAGE STRENGTHS FOR SELECTED RESERVE

(a) IN GENERAL.—For fiscal year 1987, the Selected Reserve of the reserve components of the Armed Forces shall be programmed to attain average strengths of not less than the following:

(1) The Army National Guard of the United States, 440,025.

(2) The Army Reserve, 290,639.

(3) The Naval Reserve, 134,212.

(4) The Marine Corps Reserve, 41,900.

(5) The Air National Guard of the United States, 108,700.

(6) The Air Force Reserve, 75,600.

(7) The Coast Guard Reserve, 12,500.

(b) ADJUSTMENTS.—The average strengths prescribed by subsection (a) for the Selected Reserve of any reserve component shall be proportionately reduced by (1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at any time during the fiscal year, and (2) the total number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at any time during the fiscal year. Whenever such units or such individual members are released from active duty during any fiscal year, the average strength prescribed for such fiscal year for the Selected Reserve of such reserve component shall be proportionately increased by the total authorized strength of such units and by the total number of such individual members.

### SEC. 412. AUTHORIZATION OF END STRENGTHS FOR RESERVES ON ACTIVE DUTY IN SUPPORT OF THE RESERVE COMPONENTS

(a) IN GENERAL.—Within the average strengths prescribed in section 411, the reserve components of the Armed Forces are authorized, as of September 30, 1987, the following number of Reserves to be serving on full-time active duty or, in the case of members of the National Guard, on full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing, or training the reserve components or the National Guard:

(1) The Army National Guard of the United States, 23,731.

(2) The Army Reserve, 12,157.

(3) The Naval Reserve, 19,010.

(4) The Marine Corps Reserve, 1,475.

(5) The Air National Guard of the United States, 7,269.

(6) The Air Force Reserve, 635.

(b) COUNTING OF PERSONNEL IN CERTAIN RESERVE CALL-UP SITUATIONS.—During any period that members of reserve components of the Armed Forces are serving on active duty pursuant to an order under section 673 or 673b of title 10, United States Code, members of reserve components serving on active duty may perform duties in connection with section 673 or 673b of such title and, for purposes of subsection (a), and shall not be counted against the number of Reserves ordered to active duty under those sections. Funds available for the pay and allowances of Reserves referred to in subsection (a) shall be available for the pay and allowances of such Reserves who perform duties in connection with section 673 or 673b of such title under the authority of this section.

### SEC. 413. ACCOUNTING FOR CERTAIN AUTHORIZED RESERVE COMPONENT MEMBERS

Section 138(c) of title 10, United States Code, is further amended—

(1) by striking out the text of paragraph (1)(A) and inserting in lieu thereof the following: "Congress shall authorize the end strengths as of the end of each fiscal year for each component of the armed forces for (i) active duty personnel who are to be paid from funds appropriated for active duty personnel, and (ii) active duty personnel and full-time National Guard duty personnel who are to be paid from funds appropriated for reserve personnel. Upon determination by the Secretary of Defense that such action is in the national interest, an end strength authorized pursuant to clause (i) of the first sentence for a fiscal year may be increased by a number equal to not more than 0.5 percent of the total end strength authorized for such component for that fiscal year and an end strength authorized pursuant to clause (ii) of the first sentence for a fiscal year may be increased by a number equal to not more than 2 percent of the total end strength authorized for such component for that fiscal year. No funds may be appropriated to or for the use of active duty personnel or full-time National Guard duty personnel of any component of the armed forces unless the end strength for such personnel of that component for that fiscal year has been authorized by law.";

(2) in paragraph (1)(B)—

(A) by striking out "for 180 days or less" in clause (v); and

(B) by adding at the end the following new clause:

"(vii) Members on full-time National Guard duty for 180 days or less."; and

(3) in paragraph (3)(D)—

(A) by striking out "and" at the end of clause (iii);

(B) by striking out the period at the end of clause (iv) and inserting in lieu thereof "; and"; and

(C) by adding at the end the following new clause:

"(v) an analysis of the number of officers and enlisted members serving on active duty for training under orders specifying a period in excess of 180 days as of the last day of the preceding fiscal year and an estimate for the current fiscal year of the number that will be ordered to such duty tabulated by the following categories:

"(I) Recruit and specialized training.

"(II) Flight training.
